In planning and performing our audit of the special-purpose financial statements of the various municipal divisions of the Twenty-Fourth Judicial Circuit, we considered the municipal divisions' internal controls over financial reporting in order to determine our auditing procedures for the purpose of expressing our opinion on the special-purpose financial statements and not to provide assurance on the internal controls over financial reporting. However, we noted certain matters involving the internal controls over financial reporting and their operation that we consider to be reportable conditions. Reportable conditions involve matters coming to our attention relating to significant deficiencies in the design or operation of the internal controls over financial reporting that, in our judgment, could adversely affect the municipal divisions' ability to record, process, summarize, and report financial data consistent with the assertions of management in the special-purpose financial statements.

A material weakness is a condition in which the design or operation of one or more of the internal control components does not reduce to a relatively low level the risk that misstatements in amounts that would be material to the special-purpose financial statements being audited may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions. Our consideration of the internal controls over financial reporting would not necessarily disclose all matters in the internal controls that might be reportable conditions and, accordingly, would not necessarily disclose all reportable conditions that are also considered to be material weaknesses. However, we noted certain matters involving the internal controls over financial reporting and their operation that we consider to be material weaknesses, and these matters are presented in the accompanying Management Advisory Report.

This report is intended for the information of the management of the various municipal divisions of the Twenty-Fourth Judicial Circuit and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

A handwritten signature in black ink, appearing to read "Claire McCaskill".

Claire McCaskill

The accompanying Notes to the Financial Statements are an integral part of this statement.

## Notes to the Financial Statements

TWENTY-FOURTH JUDICIAL CIRCUIT  
MUNICIPAL DIVISIONS  
NOTES TO THE FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies

A. Reporting Entity and Basis of Presentation

The accompanying special-purpose financial statements present only selected data for the funds administered by the various municipal divisions of the Twenty-Fourth Judicial Circuit of the state of Missouri.

Receipts, disbursements, and changes in cash are presented for each municipal division. The operating costs of each division are paid by the respective municipality and are not included in these financial statements.

The municipal division is responsible for cash bonds posted until case disposition allows appropriate disbursement. Bond monies relating to pending cases, whether in the custody of the city or the municipal division, are included in these financial statements.

B. Basis of Accounting

The Statements of Receipts, Disbursements, and Changes in Cash are prepared on the cash basis of accounting; accordingly, amounts are recognized when they are received or disbursed. This basis of accounting differs from generally accepted accounting principles, which require revenues to be recognized when they become available and measurable or when they are earned and expenditures or expenses to be recognized when the related liabilities are incurred.

C. Fiscal Authority and Responsibility

The municipal divisions account for fines and court costs resulting from prosecution of violations of municipal ordinances before the municipal judge or received through the traffic violations bureau, as well as cash bonds posted. Municipal violations could include traffic offenses, both moving and nonmoving; parking meter and overtime parking offenses; and other violations for which amounts are received by the municipal divisions and remitted to the city treasury. The municipal divisions also may account for restitutions received and disbursed through the divisions.

2. Cash

Section 479.080, RSMo 1994, requires municipal divisions to deposit fines and court costs into the city treasury at least monthly. Some divisions maintain bank accounts into which fines and court

costs are deposited and later remitted to the city treasury. Other divisions do not maintain bank accounts, transmitting fines and court costs directly to the city treasury. Escrow bank accounts for bond monies received may be maintained by the city or the municipal division.

At the financial statement dates identified in the table of contents for the years ended 1999, 1998, and 1997, all bank account balances reported for the municipal divisions of the Twenty-Fourth Judicial Circuit were entirely covered by federal depository insurance.

3. Disbursements to State

The municipal divisions collect various amounts that must be remitted to the state of Missouri. These amounts include the judgment for the Motorcycle Safety Trust Fund; and the surcharges for the Crime Victims' Compensation and Services to Victims Funds, the Peace Officer Standards and Training Commission Fund, the Statewide Court Automation Fund, and (until July 1, 1997, when municipal divisions were no longer required to assess the surcharge) the Independent Living Center Fund. The state's portions of these amounts are deposited into the city treasury for the municipal divisions of the city of Farmington, the city of Potosi, the city of Iron Mountain Lake, and (after April 1, 1999) the city of Bonne Terre. Prior to April 1, 1999, the city of Bonne Terre Municipal Division maintained a bank account for the deposit of fines and court costs and disbursements were made to the state by the court. Amounts remitted by the cities to the state are not included in the financial statements.

4. City of Iron Mountain Lake

Bonds posted by defendants for the city of Iron Mountain Lake Municipal Division are deposited directly into the city treasury. The amounts held by the city at year-end could not be determined and, therefore, are not included in the financial statements.

In addition, bonds refunded to defendants could not be determined, and these amounts are not included in the financial statements.

## MANAGEMENT ADVISORY REPORT SECTION

Management Advisory Report -  
State Auditor's Current Recommendations

TWENTY-FOURTH JUDICIAL CIRCUIT  
MUNICIPAL DIVISIONS  
MANAGEMENT ADVISORY REPORT -  
STATE AUDITOR'S CURRENT RECOMMENDATIONS

We have audited the special-purpose financial statements of the various municipal divisions (other than the city of Iron Mountain Lake Municipal Division as of and for the years ended December 31, 1998 and 1997) of the Twenty-Fourth Judicial Circuit as of and for the years ended September 30, 1999 and 1998; June 30, 1999 and 1998; March 31, 1999 and 1998; and December 31, 1998 and 1997, and have issued our report thereon dated October 28, 1999. That report expressed a qualified opinion on the special-purpose financial statements of the various municipal divisions of the Twenty-Fourth Judicial Circuit for the applicable fiscal periods.

We also had planned to audit the special-purpose financial statement of the city of Iron Mountain Lake Municipal Division as of and for the years ended December 31, 1998 and 1997, and have issued our report thereon dated October 28, 1999. In that report we did not express an opinion on the special-purpose financial statement.

The following Management Advisory Report presents our findings and recommendations arising from our procedures related to the municipal divisions' special-purpose financial statements. During those procedures, we also identified certain management practices which we believe could be improved. Our procedures were not designed or intended to be a detailed study of every system, procedure, and transaction. Accordingly, the findings presented in the following report should not be considered as all-inclusive of areas where improvements may be needed.

|           |  |
|-----------|--|
| <b>1.</b> | <b>City of Bismarck Municipal Division</b> |
|-----------|--|

A. Our review noted the following concerns related to receipts:

- 1) The duties of receiving, recording, and depositing fine and court cost monies collected by the municipal division are not adequately segregated. The Court Clerk collects fines and court cost monies on court night, and issues a prenumbered receipt slip from the court's one-write ledger for monies received. The City Clerk and City Collector collect fine and court cost monies at the Traffic Violations Bureau (TVB). When collecting monies at the TVB, a prenumbered city receipt slip is issued and the City Collector transmits the monies collected to the Court Clerk on a periodic basis. The Court Clerk posts these receipts to the court's one-write ledger and case files, and prepares the deposit. Receipt slips issued by the court and the city are not reconciled to amounts deposited.

To safeguard against possible loss or misuse of funds, internal controls should provide reasonable assurance that all transactions are accounted for properly and

assets are safeguarded. Since this is essentially an office of one employee and proper segregation of duties cannot be achieved, at a minimum, there should be a documented independent review of the bank reconciliations and a comparison of receipt slips issued to amounts deposited.

- 2) Monies collected are not deposited on a timely basis. Deposits are generally made about twice a month and average in excess of \$925. To adequately safeguard receipts and to reduce the risk of loss or misuse of funds, deposits should be made daily or when accumulated receipts exceed \$100.
  - 3) Checks and money orders received for payments of fines and court costs collected at the TVB are not restrictively endorsed upon receipt. To reduce the risk of loss or misuse of funds, checks and money orders should be restrictively endorsed immediately upon receipt.
- B. The police department does not issue prenumbered receipt slips for some bonds received. In these instances, unnumbered bond forms issued by the police department serve as the receipt slip to the defendant. To adequately account for all bond receipts, prenumbered receipt slips or bond forms should be issued for all bonds received by the police department and the numerical sequence should be accounted for properly.
- C. Neither the police department nor the municipal division maintains adequate records to account for the numerical sequence and ultimate disposition of tickets and summonses issued. The police department prepares a listing of tickets issued; however, tickets are not listed in numerical order and thus the listing is not used to account for the numerical sequence. In addition, this report does not include the final disposition of each case.

Without a proper accounting of the numerical sequence and ultimate disposition of tickets and summonses, the police department and the municipal division cannot be assured that all tickets and summonses issued were properly submitted to the court for processing. A log listing the ticket books assigned, each ticket and summons issued in numerical sequence, the date issued, and the violator's name would help ensure all tickets and summonses issued were properly submitted to the court for processing, properly voided, or not prosecuted. In addition, a record of the ultimate disposition of each ticket and summons should be maintained to ensure all tickets and summonses have been accounted for properly.

Similar conditions were also noted in our prior report.

**WE AGAIN RECOMMEND** the city of Bismarck Municipal Division:

- A.1. Establish a documented review of municipal division records by an independent person.

2. Deposit receipts daily or when accumulated receipts exceed \$100.
  3. Restrictively endorse all checks and money orders immediately upon receipt.
- B. Request the police department issue prenumbered receipt slips or bond forms for all bond monies received and account for their numerical sequence.
  - C. Work with the police department to account for the numerical sequence and ultimate disposition of all traffic tickets and summonses issued.

### **AUDITEE'S RESPONSE**

*The current Municipal Judge and current Court Clerk provided the following responses:*

- A.1. *We will request the City Clerk perform a reconciliation of receipts to deposits beginning with the next deposit.*
  2. *We will make an effort to deposit weekly.*
  3. *We have already implemented this recommendation.*
- B. *We will request the police department issue prenumbered receipt slips and record the receipt number on the bond forms. The Court Clerk will account for the numerical sequence of receipt slips issued by the police department.*
  - C. *The municipal court will request the police department maintain a record that complies with this recommendation.*

|           |   |
|-----------|---|
| <b>2.</b> | <b>City of Bonne Terre Municipal Division</b> |
|-----------|---|

- A. Neither the police department nor the municipal division maintains adequate records to account for the numerical sequence and ultimate disposition of tickets and summonses issued. The police department maintains a log of tickets and summonses issued; however, we noted that the log included gaps in the numerical sequence of tickets and summonses issued. In addition, the municipal division does not review the ticket or summons logs to account for the numerical sequence of tickets and summonses issued.

Without a proper accounting of the numerical sequence and ultimate disposition of tickets and summonses, the police department and the municipal division cannot be assured that all tickets and summonses issued were properly submitted to the court for processing. A log listing the ticket books assigned, each ticket and summons issued in numerical sequence, the date issued, and the violator's name would help ensure all tickets and

summonses issued were properly submitted to the court for processing, properly voided, or not prosecuted. In addition, a record of the ultimate disposition of each ticket and summons should be maintained to ensure all tickets and summonses have been accounted for properly.

- B. The Municipal Judge does not always sign the individual case file sheets or the court dockets after case dispositions are recorded. To ensure the proper disposition of all cases has been entered in the court records, the judge should review each court docket and sign the docket to indicate approval of the recorded disposition.
- C. The municipal division allows defendants to pay fines and costs over a period of time, contingent upon signing a payment plan agreement. Accounts receivable records are maintained on the computer system. However, there are no set procedures in place to follow up on unpaid amounts. Our review of partial payment arrangements revealed several cases over one year old on which there has been no action to collect unpaid fines and court costs. As of September 30, 1999, municipal division records indicated an accounts receivable balance of approximately \$57,800.

Proper follow-up action could include requiring the defendant to appear in court to justify reasons for non-payment, the issuance of arrest warrants for those defendants not providing such justification, and writing off those accounts which are deemed to be uncollectible, after review and approval by the Municipal Judge.

- D. The Court Clerk does not always forward required records of convictions on traffic offenses to the Missouri State Highway Patrol (MSHP). We reviewed 60 tickets issued during the two years ended September 30, 1999. Four of the 23 tickets (17 percent) which should have been filed with the MSHP had not been filed. Section 302.225, RSMo Cumulative Supp. 1999, requires records of any pleas or findings of guilty on traffic violations under the laws of the state, county, or municipal ordinance to be forwarded to the MSHP within ten days of the conviction date.

Conditions similar to B. and C. were also noted in our prior report.

**WE RECOMMEND** the city of Bonne Terre Municipal Division:

- A. Work with the police department to account for the numerical sequence and ultimate disposition of all traffic tickets and summonses issued.
- B. Require the Municipal Judge to review all court dockets for propriety and sign the dockets.
- C. Establish adequate accounts receivable follow up procedures.

- D. Forward all records of convictions on traffic offenses to the MSHP as required by state law.

**AUDITEE'S RESPONSE**

*The Mayor, City Clerk, and Court Clerk provided the following responses:*

- A. *We have updated the software program to include reporting for the sequence of tickets entered, including voided tickets. These reports are reviewed for gaps in sequence and compared to the police department ticket listing.*
- B. *The Municipal Judge now signs every ticket jacket to comply with this recommendation.*
- C. *The Municipal Judge has implemented a continuous docket system wherein all defendants on payment plans must appear in court each month until the balance is paid in full or a warrant is issued.*
- D. *Our procedure is to mail all applicable tickets to the Driver's License Bureau in Jefferson City each month after court.*

|  |
|--|
| <b>3. City of Desloge Municipal Division</b> |
|--|

- A. Prenumbered bond forms issued by the police department serve as a receipt slip to the defendant. However, the Court Clerk does not account for the numerical sequence of all police department bond forms. To ensure all monies received by the police department are transmitted to the court, the numerical sequence of police department bond forms should be accounted for properly.
- B. The Municipal Judge does not sign the court dockets after case dispositions are recorded. To ensure the proper disposition of all cases has been entered in the court records, the judge should review each court docket and sign the docket to indicate approval of the recorded disposition.
- C. The Court Clerk does not file a monthly report with the city of all cases heard in court. Section 479.080.3, RSMo 1994, requires the Court Clerk to prepare a monthly listing of all cases heard in court or prepaid at the TVB, including all fines and court costs collected, to be verified by the clerk or Municipal Judge and filed with the city's governing body.
- D. The Court Clerk does not always forward required records of convictions on traffic offenses to the MSHP. We reviewed 60 tickets issued during the two years ended June 30, 1999. Two of the 32 tickets (6 percent) which should have been filed with the MSHP had not been filed. Section 302.225, RSMo Cumulative Supp. 1999, requires records of

any pleas or findings of guilty on traffic violations under the laws of the state, county, or municipal ordinance to be forwarded to the MSHP within ten days of the conviction date.

A condition similar to A. was also noted in our prior report.

**WE RECOMMEND** the city of Desloge Municipal Division:

- A. Request the police department issue prenumbered receipt slips or bond forms for all bond monies received and account for their numerical sequence.
- B. Require the Municipal Judge to review all court dockets for propriety and sign the dockets.
- C. Prepare monthly reports of court actions, including fines and costs collected, and file these with the city's governing body in accordance with state law.
- D. Forward all records of convictions on traffic offenses to the MSHP as required by state law.

**AUDITEE'S RESPONSE**

*The Municipal Judge and Court Clerk provided the following responses:*

- A. *The municipal court will request the police department account for all prenumbered bond forms.*
- B. *The Municipal Judge writes his own docket entries on the individual case file envelopes and docket sheets are not used as official court orders. The judge will initial or sign court orders.*
- C. *The court previously complied with this requirement and was requested to stop by the previous City Administrator. The court has commenced again providing the report in accordance with state statute.*
- D. *It is the court's policy to comply with this state law and the two errors found appear to be oversights.*

|   |
|---|
| <b>4. City of Farmington Municipal Division</b> |
|---|

- A. The Court Clerk accepts cash, checks, and money orders for the payment of fines, court costs, and bonds. The Court Clerk does not consistently record the method of payment on receipt slips. To ensure receipts are transmitted intact, the method of payment should

be indicated on all receipt slips and the composition of receipt slips issued should be reconciled to the composition of transmittals.

- B. The municipal division allows defendants to pay fines and costs over a period of time and written and signed payment agreements are obtained from defendants. However, follow up on outstanding amounts due from defendants is not adequately performed. Our review indicated 132 old cases totaling approximately \$22,373 on which collection was not being pursued as these cases are deemed uncollectible by the court for various reasons. Collection of outstanding receivables should be pursued by the court and uncollectible accounts should be presented to the judge for disposition.
- C. To file a complaint, individuals go to the police department where a complaint form is completed before a notary. The police department forwards these complaint forms to the City Prosecutor who issues information forms for those charges he wishes to file. Complaint forms issued are not prenumbered and as a result, there is no accounting for complaint forms issued. In addition, there is no accounting for prenumbered parking tickets issued.

Without a proper accounting of the numerical sequence and ultimate disposition of parking tickets and complaint forms, the municipal division cannot be assured that all parking tickets and complaint forms issued are properly processed. A log listing each parking ticket and complaint form issued in numerical sequence, the date issued, and the violator's name would help ensure all parking tickets and complaints issued were properly submitted to the court for processing, properly voided, or not prosecuted. In addition, a record of the ultimate disposition of each parking ticket and complaint form should be maintained to ensure all parking tickets and complaint forms have been accounted for properly.

A condition similar to A. was also noted in our prior report.

**WE RECOMMEND** the city of Farmington Municipal Division:

- A. Record the method of payment on all receipt slips issued and reconcile the composition of receipt slips issued to the composition of transmittals.
- B. Follow up on outstanding receivables. Uncollectible accounts should be presented to the Municipal Judge for disposition.
- C. Work with the police department to obtain prenumbered complaint forms and implement a system to account for the numerical sequence and ultimate disposition of all parking tickets and complaint forms issued.

**AUDITEE'S RESPONSE**

*The Municipal Judge and Court Clerk provided the following responses:*

- A. Due to time constraints during court, it is not always possible to mark the method of payment on the receipts. We will attempt to indicate method of payment on receipts as much as possible.*
- B. We collect over 98 percent of our fines and therefore feel that our follow-up is more than adequate. We do issue warrants on unpaid cases as appropriate.*
- C. We question whether this is an issue for the court. However, within thirty days, we will present this issue to the City Administrator and involve ourselves with this issue if directed to do so.*

**AUDITOR'S COMMENT**

- B. Regardless of the percentage collected, there are 132 cases totaling approximately \$22,000 which have not been actively pursued. Warrants had not been issued on these cases at the time of our review.

|  |
|--|
| <b>5. City of Fredericktown Municipal Division</b> |
|--|

- A. The Court Clerk does not issue receipt slips for bond monies received through the mail from other courts. During our review, we noted instances where these bond monies were received and deposited into the court's bond account, but no receipt slips were issued. To properly account for all receipts and ensure all receipts are deposited into the court's bond account, prenumbered receipt slips should be issued for all monies received and the receipt slips reconciled to the bank deposits.
- B. The police department accepts cash and money orders for bonds. The police department issues prenumbered receipt slips for all bonds collected; however, the Court Clerk does not account for the numerical sequence of all police department receipt slips. To ensure all monies received by the police department are transmitted to the court, the numerical sequence of police department receipt slips should be accounted for properly.
- C. Neither the police department nor the municipal division maintains adequate records to account for the numerical sequence and ultimate disposition of tickets issued. The police department maintains a log of ticket books assigned to officers and traffic tickets issued. However, this log is not maintained in numerical sequence and neither the police department nor the court review this log for missing ticket numbers. Some tickets selected for testing could not be provided by the municipal division or the police department for our review.

Without a proper accounting for the numerical sequence and ultimate disposition of tickets, the police department and the municipal division cannot be assured that all tickets issued were properly submitted to the court for processing. A log listing each ticket issued in numerical sequence, the date issued, and the violator's name would help ensure all tickets issued were properly submitted to the court for processing, properly voided, or not prosecuted. In addition, a record of the ultimate disposition of each ticket should be maintained to ensure all tickets have been accounted for properly.

Conditions similar to B. and C. were also noted in our prior report.

**WE RECOMMEND** the city of Fredericktown Municipal Division:

- A. Issue prenumbered receipt slips for all bond monies received and reconcile recorded receipts to bank deposits.
- B. Account for the numerical sequence of all police department receipt slips.
- C. Work with the police department to account for the numerical sequence and ultimate disposition of all traffic tickets issued.

**AUDITEE'S RESPONSE**

*The Municipal Judge and Court Clerk provided the following responses:*

- A. *We are now issuing receipt slips for all monies received.*
- B. *By the end of April, we will discuss with the police chief, the possibility of issuing a separate sequence of receipt slips for bonds so that we can account for the sequence of receipt slips issued by the police department.*
- C. *By the end of April, we will meet with the police chief and ask him to provide a numerical ticket listing for each month so that we can account for the numerical sequence of tickets issued. In addition, the Court Clerk will begin entering tickets into her computer to account for the sequence of tickets turned over to the court.*

|   |
|---|
| <b>6. City of Iron Mountain Lake Municipal Division</b> |
|---|

- A. Our review noted the following concerns related to receipts:
  - 1) The duties of receiving, recording, and depositing fine, court cost, and bond monies collected by the municipal division are not adequately segregated. Currently, the Court Clerk performs all these duties. In addition, there is no

supervisory review performed of the Court Clerk's functions by an independent person.

To safeguard against possible loss or misuse of funds, internal controls should provide reasonable assurance that all transactions are accounted for properly and assets are safeguarded. Since this is essentially an office of one employee and proper segregation of duties cannot be achieved, at a minimum, there should be a documented independent comparison of receipt slips issued to amounts deposited.

- 2) Fines and court costs are not deposited into the city treasury on a timely basis. Deposits are generally made about twice a month at the same time as the city's receipts and range from \$200 to \$500. To adequately safeguard receipts and to reduce the risk of loss or misuse of funds, deposits should be made daily or when accumulated receipts exceed \$100.
- 3) The Court Clerk accepts cash, checks, and money orders for the payment of fines and court costs. The Court Clerk does not consistently record the method of payment on receipt slips. In addition, when monies are paid by someone other than the defendant, this information is not consistently indicated on the receipt slip.

To ensure receipts are deposited intact, the method of payment should be indicated on all receipt slips and the composition of receipt slips issued should be reconciled to the composition of monies deposited into the city treasury.

- 4) Checks and money orders received for payments of fines and court costs are not restrictively endorsed upon receipt. To reduce the risk of loss or misuse of funds, checks and money orders should be restrictively endorsed immediately upon receipt.

B. Our review noted the following concerns relating to bonds:

- 1) Receipt slips were not always issued for bond monies received from individuals and other entities. During our testing, we noted approximately \$1,100 and \$1,800 of bond receipts for the years ended December 31, 1998 and 1997, respectively, for which receipt slips were not issued by the former Court Clerk. To properly account for all receipts and ensure all receipts are deposited into the city treasury, prenumbered receipt slips should be issued for all monies received and the numerical sequence of receipt slips should be accounted for properly.
- 2) Bond monies received by the court are deposited into the city's general account for the city of Iron Mountain Lake Municipal Division. The city of Iron Mountain

Lake does not maintain separate records of the bonds deposited, disbursed, and held in its general account. Monthly listings of open items (liabilities) are not prepared. In addition, the Court Clerk does not maintain a bond ledger to account for the receipt, disbursement, and balance of bond monies. The only record of bonds held in trust is pending case files awaiting disposition at the next court date.

Monthly listings of open items are necessary to ensure proper accountability over open cases and to ensure monies held in trust are sufficient to meet liabilities. A bond ledger indicating date and amount of receipt and date of disbursement is necessary to ensure proper accountability over bonds. Any unclaimed bonds remaining one year after final court disposition should be disbursed to the state's Unclaimed Property Section as required by Section 447.595, RSMo 1994.

C. During our review, we noted the following concerns relating to tickets:

- 1) Neither the police department nor the municipal division maintains adequate records to account for the numerical sequence and ultimate disposition of tickets issued. The police department prepares a listing of tickets issued; however, the listing is not used to account for the numerical sequence. As a result, we were unable to locate several tickets issued during the two years ended December 31, 1998. In addition, this report does not include the final disposition of each case.

Without a proper accounting of the numerical sequence and ultimate disposition of tickets, the police department and the municipal division cannot be assured that all tickets issued were properly submitted to the court for processing. A log listing the ticket books assigned, each ticket issued in numerical sequence, the date issued, and the violator's name would help ensure all tickets issued were properly submitted to the court for processing, properly voided, or not prosecuted. In addition, a record of the ultimate disposition of each ticket should be maintained to ensure all tickets have been accounted for properly.

- 2) The Court Clerk does not forward required records of convictions on traffic offenses to the MSHP. Section 302.225, RSMo Cumulative Supp. 1999, requires records of any pleas or findings of guilty on traffic violations under the laws of the state, county, or municipal ordinance to be forwarded to the MSHP within ten days of the conviction date.

D. During our review, we noted the following concerns related to fees:

- 1) Crime Victims' Compensation (CVC) fees collected by the court have not always been paid to the state's Department of Revenue. During the two years ended December 31, 1998, CVC fees were disbursed by the city to the state only twice. In addition, inadequate documentation was maintained to indicate how these fees

were calculated. Section 595.045, RSMo Cumulative Supp. 1999, requires 95 percent of CVC fees be paid monthly to the state. The court should establish procedures to ensure the proper amounts are paid to the state on a timely basis. In addition, the court should determine the amount which is due to the state for CVC fees previously collected and remit this amount to the state.

- 2) The Police Officer Standards and Training Commission (POSTC) fee was not consistently assessed on all applicable cases. In addition, the POSTC fee was assessed on some cases, but was not listed on the TVB schedule. Also, POSTC fees were not disbursed to the state. Section 590.140.1, RSMo Cumulative Supp. 1999, requires this fee be charged on all cases for violations of municipal ordinances, except for cases dismissed by the court. POSTC fees should be disbursed monthly to the state.

- E. The municipal division allows defendants to pay fines and costs over a period of time; however, written and signed payment agreements are not obtained. In addition, follow up on outstanding amounts due from defendants is not adequately performed. We noted eight cases with total fines and costs of \$595 which were not being actively pursued by the court. A written and signed payment agreement is necessary to indicate the intent of the defendant to pay the fines and court costs and to aid in accounting for and collecting the amounts due to the municipal division. In addition, collection of outstanding receivables should be pursued by the court.
- F. The Court Clerk does not file a monthly report with the city of all cases heard in court. Section 479.080.3, RSMo 1994, requires the Court Clerk to prepare a monthly listing of all cases heard in court or prepaid at the TVB, including all fines and court costs collected, to be verified by the clerk or Municipal Judge and filed with the city's governing body.
- G. Although the municipal division operates a TVB that allows certain offenses to be paid prior the court date, a court order has not been issued to formally establish the TVB.

Section 479.050, RSMo 1994, states that a TVB may be established by the Municipal Judge. Supreme Court Rule No. 37.49 requires the Municipal Judge to establish the TVB by court order, to designate a TVB clerk, and to establish by schedule the amount of fines and costs to be imposed for each offense.

Conditions similar to A.1, A.2, B.2. and C.1 were also noted in our prior report.

**WE RECOMMEND** the city of Iron Mountain Lake Municipal Division:

- A.1. Establish a documented review of municipal division records by an independent person.

2. Deposit receipts intact daily or when accumulated receipts exceed \$100.
  3. Record the method of payment on all receipt slips and reconcile the composition of receipt slips issued to the composition of deposits.
  4. Restrictively endorse all checks and money orders immediately upon receipt.
- B.1. Issue prenumbered receipt slips for all bond monies received and account for the numerical sequence of receipt slips issued.
2. Ensure a bond ledger is maintained and a monthly listing of open items is prepared and reconcile these records to the bond monies held by the city. Any unclaimed bonds remaining after one year of court disposition should be disbursed in accordance with state law.
- C.1. Work with the police department to account for the numerical sequence and ultimate disposition of all traffic tickets issued.
2. Forward all records of convictions on traffic offenses to the MSHP as required by state law.
- D.1. Ensure CVC fees are remitted to the state as required by state law. In addition, the municipal division should work with the city to determine the amount of unremitted CVC fees due to the state and make the appropriate payment.
2. Assess POSTC fees in accordance with state law and update the TVB schedule to include all fees assessed. In addition, POSTC fees should be disbursed monthly to the state.
- E. Obtain written and signed payment agreements for those defendants which are allowed to pay fines and court costs over a period of time. In addition, the court should implement procedures to pursue collection of outstanding receivables.
- F. Prepare monthly reports of court actions, including fines and costs collected, and file these with the city's governing body in accordance with state law.
- G. Prepare a court order authorizing the establishment of a TVB.

### **AUDITEE'S RESPONSE**

*The Municipal Judge, current Court Clerk, and Mayor provided the following responses:*

- A.1. *Court monies are indicated separately on the deposit slips and the mayor will appoint someone to compare receipts to deposits on a monthly basis beginning with the May council meeting.*
- 2. *Deposits are currently made when monies are received, usually on the day before and day after court.*
- 3. *The method of payment is currently marked on the receipt slip. The council member which reviews receipts and deposit slips beginning in May 2000 will compare the composition during the monthly review.*
- 4. *Currently, checks and money orders are restrictively endorsed immediately upon receipt.*
- B.1. *Prenumbered receipt slips are currently issued for all bond monies received.*
- 2. *We will work on developing a bond ledger and include the balance of bond monies held on the monthly report immediately.*
- C.1. *We will meet with the police chief by the May council meeting to determine the best way to account for the numerical sequence of tickets issued.*
- 2. *We will review cases for the year 2000 and forward applicable tickets to the MSHP by May 2000.*
- D.1. *We will begin sending CVC fees to the DOR on a monthly basis by May 2000.*
- 2. *The TVB schedule was updated to include the POSTC fee and the fee is now being assessed on all applicable cases. The POSTC fees will be sent to the Department of Public Safety on a monthly basis by May 2000.*
- E. *Within the next few months, we will develop a payment agreement form to be signed by defendants and actively pursue the collection of outstanding receivables.*
- F. *A listing of cases heard or a copy of the court docket will be given to the city council on a monthly basis beginning with the May court date.*
- G. *This recommendation has been implemented. A court order has been issued and the TVB schedule updated.*

- A. The duties of receiving, recording, and depositing fine and court cost monies collected by the municipal division are not adequately segregated. Although the Police Chief may collect monies and post receipts to the accounting records, the Court Clerk is primarily responsible for receiving, depositing, recording and disbursing fine and cost receipts. There is no independent reconciliation between receipts and deposits. Although the Police Chief indicated he reviewed some of the Court Clerk's work, the reviews were not documented.

To safeguard against possible loss or misuse of funds, internal controls should provide reasonable assurance that all transactions are accounted for properly and assets are safeguarded. Since this is essentially an office of one employee and proper segregation of duties cannot be achieved, at a minimum, there should be a documented independent review of the bank reconciliations and a comparison of receipt slips issued to amounts deposited.

- B. The balance of the court's fine and court cost bank account consists partially of bad check restitution that has been paid to the court, but not yet disbursed to the appropriate vendor. The Court Clerk holds the bad check restitution in the court bank account until the defendant pays the balance in full. However, the Court Clerk does not prepare monthly listings of open restitution cases. Monthly listings of open items are necessary to ensure proper accountability over open restitution cases and to ensure monies held in trust by the court are sufficient to meet liabilities.
- C. City of Leadington police officers collect cash bonds for the municipal division when the Chief of Police is not on duty; however, the police officers are not bonded. Failure to properly bond all persons with access to assets exposes the municipal division and the city to the risk of loss.
- D. Neither the police department nor the municipal division maintains adequate records to account for the numerical sequence and ultimate disposition of summonses issued. Although the police department issues prenumbered summonses for non-traffic violations, the numerical sequence of these forms is not accounted for properly.

Without a proper accounting of the numerical sequence and ultimate disposition of summonses, the police department and the municipal division cannot be assured that all summonses issued were properly submitted to the court for processing. A log listing each summons issued in numerical sequence, the date issued, and the violator's name would help ensure all summonses issued were properly submitted to the court for processing, properly voided, or not prosecuted. In addition, a record of the ultimate disposition of each

summons should be maintained to ensure all summonses have been accounted for properly.

- E. The Court Clerk does not file a monthly report with the city of all cases heard in court. Section 479.080.3, RSMo 1994, requires the Court Clerk to prepare a monthly listing of all cases heard in court or prepaid at the TVB, including all fines and court costs collected, to be verified by the clerk or Municipal Judge and filed with the city's governing body.

Conditions similar to A., C. and D. were also noted in our prior report.

**WE RECOMMEND** the city of Leadington Municipal Division:

- A. Establish a documented review of municipal division records by an independent person.
- B. Prepare monthly open item listings for bad check restitution cases and reconcile these listings to monies held in trust.
- C. Request the city obtain bond coverage for all persons handling municipal division monies.
- D. Work with the police department to account for the numerical sequence and ultimate disposition of all summonses issued.
- E. Prepare monthly reports of court actions, including fines and costs collected, and file these with the city's governing body in accordance with state law.

### **AUDITEE'S RESPONSE**

*The current Court Clerk and Police Chief provided the following responses:*

- A. *The Police Chief reviews the monthly bank reconciliations but has not documented this review in the past. He will begin documenting his monthly review with the next monthly review of reconciliations.*
- B. *We no longer accept partial payments on restitution cases. The balance in the account consists of partial payments on restitution cases on which there are current outstanding warrants. As the warrants are resolved and full payment received, the monies held will be disbursed to the appropriate parties. As time permits, we will attempt to prepare a listing of the monies held in this account.*
- C. *The City feels this is a small risk and is cost prohibitive based on the number of bonds collected. The City does not plan to bond police officers other than the chief.*

- D. *Each month the Court Clerk will generate a listing of prenumbered summonses issued during the month. Voided summonses will also be entered into the computer system to ensure all summonses are entered in numerical order.*
- E. *We have done this in the past and the city no longer wants this information. Dockets are retained on file and available to the city upon request.*

|   |
|---|
| <b>8. City of Leadwood Municipal Division</b> |
|---|

A. Our review noted the following concerns related to receipts:

- 1) The duties of receiving, recording, and depositing fine and court cost monies collected by the municipal division are not adequately segregated. The Court Clerk collects fine and court costs monies on court night and issues a prenumbered city receipt slip. The City Clerk collects fine and court cost monies at the TVB and issues a prenumbered city receipt slip. The City Clerk transmits the monies collected at the TVB to the Court Clerk on a periodic basis. The Court Clerk posts receipts from the receipt slips to a cash control ledger, and prepares the deposit. Receipt slips issued by the Court Clerk and the City Clerk are not reconciled to amounts deposited.

To safeguard against possible loss or misuse of funds, internal controls should provide reasonable assurance that all transactions are accounted for properly and assets are safeguarded. Since this is essentially an office of one employee and proper segregation of duties cannot be achieved, at a minimum, there should be a documented independent review of the bank reconciliations and a comparison of receipt slips issued to amounts deposited.

- 2) Court receipts are not deposited intact and on a timely basis. Deposits are generally made about twice a month. On July 19, 1999, we counted cash on hand totaling \$1,804 for receipts dated July 6, 1999 through July 18, 1999. In addition, personal checks written by the Court Clerk are sometimes cashed from court receipts. To adequately safeguard receipts and reduce the risk of loss or misuse of funds, deposits should be made intact daily or when accumulated receipts exceed \$100, and the court should refrain from cashing personal checks from court receipts.

B. The Court Clerk does not file a monthly report with the city of all cases heard in court. Section 479.080.3, RSMo 1994, requires the Court Clerk to prepare a monthly listing of all cases heard in court or prepaid at the TVB, including all fines and court costs collected, to be verified by the clerk or Municipal Judge and filed with the city's governing body.

A condition similar to A. was also noted in our prior report.

**WE RECOMMEND** the city of Leadwood Municipal Division:

- A.1. Establish a documented review of municipal division records by an independent person.
- 2. Deposit receipts intact daily or when accumulated receipts exceed \$100, and discontinue the practice of cashing personal checks from court receipts.
- B. Prepare monthly reports of court actions, including fines and costs collected, and file these with the city's governing body in accordance with state law.

**AUDITEE'S RESPONSE**

*The Municipal Judge and Court Clerk provided the following responses:*

- A.1. *Within the next ninety days, we will talk to the Mayor regarding having an independent person compare the receipt slips to the deposits and review the monthly bank reconciliation.*
- 2. *Within the next ninety days, we will talk to the Mayor and City Clerk regarding the possibility of the City Clerk preparing deposit slips and depositing court monies once a week. The Court Clerk no longer cashes personal checks.*
- B. *The dockets are accessible at the Municipal Court Building and are readily available should the city officials wish to review them.*

|           |  |
|-----------|--|
| <b>9.</b> | <b>City of Park Hills Municipal Division</b> |
|-----------|--|

To file a complaint, individuals go to the Court Clerk where a complaint form is signed before the Court Clerk. The Court Clerk completes an information form and forwards the complaint and information form to the City Prosecutor who signs the forms for those charges he wishes to file. Information forms are not prenumbered and as a result, there is no accounting for information forms issued.

Without a proper accounting of the numerical sequence and ultimate disposition of information forms, the municipal division cannot be assured that all information forms issued are properly processed. A log listing each information form issued in numerical sequence, the date issued, and the violator's name would help ensure all information forms were properly submitted to the court for processing, properly voided, or not prosecuted.

**WE RECOMMEND** the city of Park Hills Municipal Division work with the City Prosecutor to obtain prenumbered information forms and implement a system to account for the numerical sequence and ultimate disposition of all information forms issued.

**AUDITEE'S RESPONSE**

*The Municipal Judge responded that as soon as the current supply of unnumbered information forms is exhausted, prenumbered information forms will be utilized.*

**10.**

**City of Potosi Municipal Division**

- A. The Court Clerk accepts cash, checks, and money orders for the payment of fines, court costs, and bonds. The Police Department accepts cash, checks and money orders for the payment of bonds. During our review, we noted receipt slips issued by both the Court Clerk and the Police Department which did not indicate the method of payment. To ensure receipts are deposited intact, the method of payment should be indicated on all receipt slips and the composition of receipt slips issued should be reconciled to the composition of bank deposits.
- B. Summonses issued by the police department are not prenumbered and as a result, there is no accounting for summonses issued. Without a proper accounting of the numerical sequence and ultimate disposition of summonses, the police department and the municipal division cannot be assured that all summonses issued are properly processed. A log listing each summons issued in numerical sequence, the date issued, and the violator's name would help ensure all summonses issued were properly submitted to the court for processing, properly voided, or not prosecuted. In addition, a record of the ultimate disposition of each summons should be maintained to ensure all summonses have been accounted for properly.

A similar condition was also noted in our prior report.

- C. The Court Clerk does not always forward required records of convictions on traffic offenses to the MSHP. We reviewed 60 tickets issued during the two years ended June 30, 1999. Eight of the 34 tickets (24 percent) which should have been filed with the MSHP had not been filed. Section 302.225, RSMo Cumulative Supp. 1999, requires records of any pleas or findings of guilty on traffic violations under the laws of the state, county, or municipal ordinance to be forwarded to the MSHP within ten days of the conviction date.

**WE RECOMMEND** the city of Potosi Municipal Division:

- A. Record the method of payment on all receipt slips issued and reconcile the composition of receipt slips issued to the composition of deposits.
- B. Work with the police department to obtain prenumbered summonses and implement a system to account for the numerical sequence and ultimate disposition of all summonses issued.
- C. Forward all records of convictions on traffic offenses to the MSHP as required by state law.

### **AUDITEE'S RESPONSE**

*The current Municipal Judge and Court Clerk provided the following responses:*

- A. *This has been corrected.*
- B. *We are currently checking on different summons forms in conjunction with the police department.*
- C. *All convictions will be forwarded to the MSHP in a timely manner.*

**11.**

### **City of St. Mary Municipal Division**

- A. Our review noted the following concerns related to receipts:
  - 1) The Court Clerk receives monies for bonds from other municipalities and fines and costs from defendants. The City Marshal occasionally receives bond monies directly from defendants. Receipt slips are not issued for bond monies received. Although prenumbered receipt slips are used for some fine and cost collections, receipt slips are not issued for monies received in the mail. Furthermore, these receipt slips are not bound and are not used sequentially.  
  
To adequately account for all monies received, prenumbered receipt slips should be issued for all monies received and the numerical sequence should be accounted for properly.
  - 2) Checks and money orders are not restrictively endorsed upon receipt. To reduce the risk of loss or misuse of funds, checks and money orders should be restrictively endorsed immediately upon receipt.

- 3) The duties of receiving, recording, and depositing fine, court cost, and bond monies collected by the municipal division are not adequately segregated. Currently, the Court Clerk performs all these duties.

To safeguard against possible loss or misuse of funds, internal controls should provide reasonable assurance that all transactions are accounted for properly and assets are safeguarded. Since this is essentially an office of one employee and proper segregation of duties cannot be achieved, at a minimum, there should be a documented independent review of the bank reconciliations and a comparison of receipt slips issued to amounts deposited.

- 4) The Court Clerk accepts cash, checks, and money orders for the payment of fines and court costs. The Court Clerk does not consistently record the method of payment on receipt slips. To ensure receipts are deposited intact, the method of payment should be indicated on all receipt slips and the composition of receipt slips issued should be reconciled to the composition of monies deposited.
- 5) Formal bank reconciliations are not prepared for the municipal division's bank account. In addition, a running checkbook balance is not maintained in the check register. As a result, the municipal division cannot ensure the amounts held for open bonds and the amounts turned over to the city each month are proper.

Monthly bank reconciliations are necessary to ensure accounting records are in agreement with the bank account and to detect errors on a timely basis. Maintaining a running checkbook balance ensures sufficient funds are available for disbursements.

- B. Bond monies received are deposited into the municipal division bank account with fines and costs. The Court Clerk does not maintain a bond ledger to account for the receipt, disbursement, and balance of bond monies, nor does she prepare a monthly listing of open-items (liabilities) to document the amount of bond monies held. The only record of bonds held in trust is pending case files awaiting disposition at the next court date.

Monthly listings of open-items are necessary to ensure proper accountability over open cases and to ensure monies held in trust are sufficient to meet liabilities. A bond ledger indicating date and amount of receipt and date of disbursement is necessary to ensure proper accountability over bonds. Any unclaimed bonds remaining one year after final court disposition should be disbursed to the state's Unclaimed Property Section as required by Section 447.595, RSMo 1994.

- C. The Court Clerk does not file a monthly report with the city of all cases heard in court. Section 479.080.3, RSMo 1994, requires the Court Clerk to prepare a monthly listing of

all cases heard in court or prepaid at the TVB, including all fines and court costs collected, to be verified by the clerk or Municipal Judge and filed with the city's governing body.

- D. Neither the police department nor the municipal division maintains adequate records to account for the numerical sequence and ultimate disposition of tickets issued. A log of tickets issued is not maintained by the police department or the court.

Without a proper accounting of the numerical sequence and ultimate disposition of tickets, the police department and the municipal division cannot be assured that all tickets issued were properly submitted to the court for processing. A log listing the ticket books assigned, each ticket issued in numerical sequence, the date issued, and the violator's name would help ensure all tickets issued were properly submitted to the court for processing, properly voided, or not prosecuted. In addition, a record of the ultimate disposition of each ticket should be maintained to ensure all tickets have been accounted for properly.

- E. The municipal division allows defendants to pay fines and costs over a period of time; however, written and signed payment agreements are not obtained. A written and signed payment agreement is necessary to indicate the intent of the defendant to pay the fines and court costs and to aid in accounting for and collecting the amounts due to the municipal division.

Conditions similar to A.1, A.2, A.3, and D. were also noted in our prior report.

**WE RECOMMEND** the city of St. Mary Municipal Division:

- A.1. Issue prenumbered receipt slips for all monies received and account for the numerical sequence of receipt slips issued.
2. Restrictively endorse all checks and money orders immediately upon receipt.
3. Establish a documented review of municipal division records by an independent person.
4. Record the method of payment on all receipt slips issued and reconcile the composition of receipt slips issued to the composition of deposits.
5. Prepare monthly bank reconciliations and maintain a running checkbook balance.
- B. Ensure a bond ledger is maintained and a monthly listing of open items is prepared and reconcile these records to the bond monies held in trust. Any unclaimed bonds remaining after one year of court disposition should be disbursed in accordance with state law.
- C. Prepare monthly reports of court actions, including fines and costs collected, and file these with the city's governing body in accordance with state law.

- D. Work with the police department to account for the numerical sequence and ultimate disposition of all traffic tickets issued.
- E. Obtain written and signed payment agreements for those defendants which are allowed to pay fines and court costs over a period of time.

### **AUDITEE'S RESPONSE**

*The Municipal Judge and Court Clerk provided the following responses:*

- A.1. *Receipt slips are now issued in numerical sequence for all monies received.*
- 2. *Checks will be endorsed by hand until a stamp is acquired.*
- 3. *Within the next two months, the Municipal Judge will ask the Mayor to assign the alderman over the police department to perform and document a monthly review of bank reconciliations and a comparison of receipt slips to deposits.*
- 4. *The Court Clerk now writes cash or check and the check number on receipt slips.*
- 5. *Monthly bank reconciliations are now performed and a balance maintained in the check register.*
- B. *The Court Clerk has implemented a bond ledger and open items list which she balances to the bank reconciliation. There are no unclaimed bonds on hand.*
- C. *The Court Clerk now prepares a report and gives it to the City Clerk each month.*
- D. *A ticket log is now maintained and the sequence of tickets issued is accounted for.*
- E. *The court now uses a payment agreement, which is signed by defendants at the time fines are assessed.*

|------------|--|
| <b>12.</b> | <b>City of Ste. Genevieve Municipal Division</b> |
|------------|--|

- A. The Court Clerk does not issue receipt slips for bond monies received from the police department and other entities. Bond monies received are recorded on a bond ledger which is also used to record the ultimate disposition of bonds received. To properly account for all receipts and ensure all receipts are transmitted to the municipal division and are properly deposited into the court bank account, prenumbered receipt slips should be

issued for all monies received and the numerical sequence of receipt slips should be accounted for properly.

- B. The municipal division allows defendants to pay fines and costs over a period of time; however, written and signed payment agreements are not obtained. In addition, follow up on outstanding amounts due from defendants is not adequately performed. As of October 7, 1999, municipal division records indicated an accounts receivable balance of approximately \$37,000.

A written and signed payment agreement is necessary to indicate the intent of the defendant to pay the fines and court costs and to aid in accounting for and collecting the amounts due to the municipal division. In addition, collection of outstanding receivables should be pursued by the court.

- C. The Court Clerk does not file a monthly report with the city of all cases heard in court. Section 479.080.3, RSMo 1994, requires the Court Clerk to prepare a monthly listing of all cases heard in court or prepaid at the TVB, including all fines and court costs collected, to be verified by the clerk or Municipal Judge and filed with the city's governing body.
- D. The Prosecuting Attorney forwards amended and dismissed tickets to the Court Clerk with a note indicating the amount of the fines and costs to be charged. Although the Prosecuting Attorney consistently signs amended and dismissed tickets, the Court Clerk does not retain the notes regarding fines and costs assessed on amended and dismissed tickets. As a result, there is no authorization for the fines and costs assessed.

To ensure the proper fines and costs are collected on amended and dismissed cases, the Court Clerk should retain documentation in the case files of amounts assessed on amended and dismissed cases.

- E. CVC, Law Enforcement Training (LET), POSTC, and Domestic Violence (DV) fees collected by the court are deposited and retained in a bank account under the control of the Court Clerk. The Court Clerk does not consistently remit these fees to the state and city on a monthly basis. During our review, we noted seven months during the two fiscal years ended September 30, 1999, in which fees were not disbursed to the state and city. Statutory guidelines require these fees to be transmitted to the state monthly. In addition, CVC fees should be disbursed to the city monthly in accordance with Section 595.045, RSMo, Cumulative Supp. 1999.
- F. The Court Clerk notarizes complaint forms which are filled out and signed by complainants and forwarded to the Prosecuting Attorney by the police department. The complaint forms are not prenumbered and, as a result, there is no accounting for complaint forms issued.

Without a proper accounting of the numerical sequence and ultimate disposition of complaint forms, the municipal division cannot be assured that all complaint forms issued were properly submitted to the court for processing. A log listing each complaint form issued in numerical sequence, the date issued, and the violator's name would help ensure all complaint forms issued were properly submitted to the court for processing, properly voided, or not prosecuted. In addition, a record of the ultimate disposition of each complaint form should be maintained to ensure all complaint forms have been accounted for properly.

Conditions similar to A., C., and E. were also noted in our prior report.

**WE RECOMMEND** the city of Ste. Genevieve Municipal Division:

- A. Issue prenumbered receipt slips for all bond monies received and account for the numerical sequence of receipt slips issued.
- B. Obtain written and signed payment agreements for those defendants which are allowed to pay fines and court costs over a period of time. In addition, the court should implement procedures to pursue collection of outstanding receivables.
- C. Prepare monthly reports of court actions, including fines and costs collected, and file these with the city's governing body in accordance with state law.
- D. Maintain documentation of fines and costs assessed by the Prosecuting Attorney on amended and dismissed cases.
- E. Disburse CVC, LET, POSTC, and DV fees to the state and city monthly in accordance with state law.
- F. Work with the Prosecuting Attorney and the police department to account for the numerical sequence and ultimate disposition of all complaint forms issued.

### **AUDITEE'S RESPONSE**

*The Municipal Judge and Court Clerk provided the following responses:*

- A. *We will issue receipt slips for all bond monies received from the police department and other entities starting with the next bond received.*
- B. *We have implemented a signed payment agreement for defendants paying over time. Court is held each quarter to review the delinquent payment docket for cases on payment plans.*

- C. We maintain a file of monthly reports which is readily available to the City Clerk. The City Clerk has requested that we not forward an individual copy to her.*
- D. We now staple the notes from the Prosecuting Attorney to the ticket so we have documentation for amended and dismissed tickets. We will discuss this with the Prosecuting Attorney to work toward a better system of documenting these amended and dismissed tickets.*
- E. We try to remit these fees monthly; however, during busy tax collection times, the fees sometimes do not get remitted on a monthly basis. We will try to consistently remit fees on a monthly basis.*
- F. By the end of April, we will request the police department prenumber the complaint forms and account for the sequence of complaint forms issued.*

This report is intended for the information of the management of the various municipal divisions of the Twenty-Fourth Judicial Circuit and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

## Follow-Up on State Auditor's Prior Recommendations

TWENTY-FOURTH JUDICIAL CIRCUIT  
MUNICIPAL DIVISIONS  
FOLLOW-UP ON STATE AUDITOR'S PRIOR RECOMMENDATIONS

This section reports follow-up action taken by the municipal divisions of the Twenty-Fourth Judicial Circuit on recommendations made in the Management Advisory Report (MAR) of our report issued for the two years ended 1995 and 1994. The prior recommendations which have not been implemented, but are considered significant, have been repeated in the current MAR. Although the remaining unimplemented recommendations have not been repeated, the municipal divisions should consider implementing these recommendations.

1. City of Bismarck Municipal Division

- A.1. Receipts were not deposited on a timely basis.
- 2. Checks and money orders received on court night were not restrictively endorsed until the following day.
- 3. The duties of receiving, recording, and depositing monies collected by the municipal division were not adequately segregated.
- B.1. The Court Clerk did not maintain a bond ledger and did not prepare monthly listings of open items (liabilities).
- 2. The Court Clerk did not account for the numerical sequence of all police department receipt slips. In addition, we noted three instances where a copy of the receipt slip was not retained in the receipt book.
- 3. Some bonds which were forfeited or applied to fines and court costs were not transferred from the bond account to the city general revenue account on a timely basis.
- C.1. Neither the police department nor the court accounted for the numerical sequence of traffic tickets issued.
- 2. Summonses issued for non-traffic violations were not prenumbered.
- D. The Court Clerk and the police officers were not bonded.
- E. The Municipal Judge did not sign the court docket after case dispositions were recorded.

- F. Crime Victims Compensation (CVC) and Law Enforcement Training (LET) fees were collected on all violations, including nonmoving traffic violations.
- G. The \$5 Independent Living Center (ILC) fee was not collected on alcohol-related offenses.
- H. The municipal division did not file a monthly report with the city for all cases heard in court.

Recommendations:

The city of Bismarck Municipal Division:

- A.1. Deposit receipts intact daily or when accumulated receipts exceed \$100.
  - 2. Restrictively endorse checks and money orders immediately upon receipt.
  - 3. Adequately segregate duties between available employees and/or establish a documented periodic review of municipal division records by an independent person.
- B.1. Maintain a bond ledger, prepare monthly listings of open items, and reconcile these listings to monies held in trust.
  - 2. Account for the numerical sequence of all police department bond receipt slips and ensure that one copy of each receipt slip is retained in the receipt book.
  - 3. Disburse all bonds applied and forfeited to the city at least monthly.
- C.1. Work with the police department to insure the listing of tickets issued is reviewed and any missing tickets are accounted for properly.
  - 2. Request the police department to issue prenumbered summonses and account for their numerical sequence.
- D. Request the city obtain bond coverage for all persons handling municipal division monies.
- E. Require the judge's signature on the court dockets.
- F. Assess LET and CVC fees in accordance with state law.
- G. Assess the ILC fee in accordance with state law.

- H. Prepare monthly reports of court actions and file these with the city in accordance with state law.

Status:

B.1, B.3,  
D, E, F,  
& H. Implemented.

A, B.2,  
& C. Not implemented. See MAR No. 1.

- G. Based on statutory changes effective July 1, 1997, the municipal division is no longer required to assess the ILC fee.

2. City of Bonne Terre Municipal Division

A.1. Receipts were not deposited on a timely basis.

- 2. The duties of receiving, recording, and depositing monies collected by the municipal division were not adequately segregated.

B.1. Monthly listings of open items (liabilities) were not prepared.

- 2. The March 31, 1995 balance of the bond account included a \$577 bond which had been held in excess of one year.

3. Receipt slips were not issued for bonds received from the Bonne Terre Police Department or from other municipalities.

C. Procedures were not established to follow-up on amounts owed to the municipal division on a timely basis.

D. Voided tickets were not retained.

E. The Municipal Judge did not sign the court docket after case dispositions were recorded. Also, the Prosecuting Attorney did not always initial or sign the ticket to document his approval of an amendment to the ticket.

F.1. LET and CVC fees were collected on all violations, including nonmoving traffic violations.

2. The municipal division was not remitting the \$1 Peace Officer Standards and Training Commission (POSTC) fee to the state as required.
3. The municipal division did not remit 95 percent of CVC fees to the state.
4. The \$5 ILC fee was not collected on alcohol-related offenses.

Recommendations:

The city of Bonne Terre Municipal Division:

- A.1. Deposit receipts intact daily or when accumulated receipts exceed \$100.
2. Adequately segregate duties between available employees and/or establish a documented periodic review of municipal division records by an independent person.
- B.1. Prepare monthly listings of open items and reconcile these listings to monies held in trust.
2. Dispose of unclaimed bonds in accordance with state law.
3. Issue prenumbered receipt slips for all bonds received and account for the numerical sequence.
- C. Establish procedures to pursue the collection of fines and court costs owed to the municipal division on a timely basis.
- D. Work with the police department to ensure all voided tickets are retained.
- E. Require the judge's signature on the court dockets and the Prosecuting Attorney's signature on all amended tickets.
- F.1. Assess LET and CVC fees in accordance with state law.
2. Disburse the POSTC fee to the state as required by state law.

3. Disburse CVC fees in accordance with state law.

4. Assess the ILC fee in accordance with state law.

Status:

A,B,D,  
F.1, F.2  
& F.3. Implemented.

C, E. Not implemented. See MAR No. 2.

F.4. Based on statutory changes effective July 1, 1997, the municipal division is no longer required to assess the ILC fee.

3. City of Desloge Municipal Division

A.1. The June 30, 1995 balance of the bond account included bond receipts totaling \$986 which had been held in excess of one year.

2. Prenumbered receipt slips or bond forms were not used by the police department.

B. Police Department complaints for non-traffic violations were not prenumbered and were not accounted for properly.

C. The duties of receiving, recording, and depositing monies collected by the municipal division were not adequately segregated.

D. LET and CVC fees were collected on nonmoving traffic violations.

Recommendations:

The city of Desloge Municipal Division:

A.1. Dispose of unclaimed bonds in accordance with state law.

2. Request the police department issue prenumbered receipt slips or bond forms for all bond monies received and account for their numerical sequence.

B. Request the police department to issue prenumbered complaints and account for their numerical sequence.

C. Adequately segregate duties between available employees and/or establish a documented periodic review of municipal division records by an independent person.

D. Assess LET and CVC fees in accordance with state law.

Status:

A.1.,  
B, C,  
& D. Implemented.

A.2. Partially implemented. Prenumbered bond forms are now used for all bond monies received by the police department. However, the municipal division nor the police department properly account for the numerical sequence of the bond forms issued. See MAR No. 3.

4. City of Farmington Municipal Division

A.1. Receipts were not transmitted to the city on a timely basis.

2. Receipt slips issued by the municipal division did not indicate the method of payments received.

3. Receipts were not transmitted to the city treasury intact. The Court Clerk cashed personal checks from court receipts and withheld cash from deposits to use to make change.

B.1. Bond receipts were not always deposited on a timely basis.

2. The Court Clerk did not issue receipt slips for bonds received from other municipalities.

3. The Court Clerk did not account for the numerical sequence of all police department receipt slips.

4. The June 30, 1995 balance of bonds in the bond account included \$2,071 in bonds which had been held in excess of one year.

5. The duties of receiving, recording, and depositing monies collected by the municipal division were not adequately segregated.

6. The police officers collecting bond monies were not bonded.

- C. Neither the police department nor the court accounted for the numerical sequence of traffic and parking tickets issued.

Recommendations:

The city of Farmington Municipal Division:

- A.1. Transmit all receipts intact to the city daily or when accumulated receipts exceed \$100.
2. Indicate the method of payment on all receipt slips issued and reconcile total cash, checks, and money orders received to transmittals to the city.
3. Discontinue the practice of cashing personal checks from court receipts and transmit all receipts intact to the city daily. If necessary, additional money should be requested from the city for a change fund.
- B.1. Deposit all receipts daily or when accumulated receipts exceed \$100.
2. Issue prenumbered receipt slips for all bonds received and account for the numerical sequence.
3. Account for the numerical sequence of all police department receipt slips.
4. Dispose of unclaimed bonds in accordance with state law.
5. Adequately segregate duties between available employees and/or establish a documented periodic review of municipal division bond records by an independent person.
6. Request the city obtain bond coverage for all persons handling municipal division monies.
- C. Work with the police department to account for the numerical sequence of traffic and parking tickets issued.

Status:

- A.1,  
B.1-2,  
B.4-6. Implemented.

- A.2. Partially implemented. The Court Clerk usually puts a checkmark on the one-write ledger to indicate payments by check; however, due to time constraints this is not always consistently done. See MAR No. 4.
- A.3. Not implemented. See MAR No. 4.
- B.3. Not implemented. Although not repeated in the current MAR, our recommendation remains as stated above.
- C. Partially implemented. The police department maintains an issuance log of traffic tickets; however, no issuance log is maintained for parking tickets and there is no accounting for parking tickets. See MAR No. 4.

5. City of Fredericktown Municipal Division

- A. Receipts were not deposited on a timely basis.
- B.1. The Court Clerk did not account for the numerical sequence of all police department receipt slips.
  - 2. Two bonds were received by the police department but not deposited to the bond account.
- C. Neither the police department nor the court accounted for the numerical sequence of traffic tickets issued.
- D. The LET and CVC fees were collected on all violations, including nonmoving traffic violations.
- E. The \$5 ILC fee was not collected on alcohol-related offenses.

Recommendations:

The city of Fredericktown Municipal Division:

- A. Deposit receipts intact daily or when accumulated receipts exceed \$100.
- B.1. Account for the numerical sequence of all police department receipt slips.
  - 2. Work with the police department to ensure all bond monies are deposited and all disbursements are made by check.

C. Work with the police department to account for the numerical sequence of all traffic tickets issued.

D. Assess LET and CVC fees in accordance with state law.

E. Assess the ILC fee in accordance with state law.

Status:

A. &

B.2. Implemented.

B.1.

& C. Not implemented. See MAR No. 5.

D. Based on statutory changes effective July 1, 1997, LET and CVC fees are to be collected on all cases, including nonmoving traffic violations.

E. Based on statutory changes effective July 1, 1997, the municipal division is no longer required to assess the ILC fee.

6. City of Iron Mountain Lake Municipal Division

A.1. Receipts were not always deposited intact or on a timely basis.

2. The duties of receiving, recording, and depositing monies collected by the municipal division were not adequately segregated.

B.1. The police department used the court receipt book to issue prenumbered receipt slips for all bonds collected. However, the Court Clerk did not initial the receipt slips prepared by the police department to indicate that the Court Clerk received the bond money.

2. The Court Clerk deposited bond monies into the city's general account but did not maintain any records of the balance of bonds on hand.

3. Monthly listings of open items (liabilities) were not prepared.

C. Neither the police department nor the court accounted for the numerical sequence of traffic tickets and summonses assigned and issued. In addition, voided tickets and summonses were not maintained.

D. The CVC fee was sometimes collected on nonmoving traffic violations.

E. The \$5 ILC fee was not collected on alcohol-related traffic offenses.

Recommendations:

The city of Iron Mountain Lake Municipal Division:

A.1. Deposit receipts intact daily or when accumulated receipts exceed \$100.

2. Adequately segregate duties between available employees and/or establish a documented periodic review of municipal division records by an independent person.

B.1. Initial all receipt slips prepared by the police department.

2. Maintain a running balance of bonds held in the city's general account.

3. Prepare monthly listings of open items and reconcile these listings to monies held in trust.

C. Work with the police department to ensure adequate records are maintained to account for the numerical sequence of all traffic tickets and summonses assigned and issued. In addition, voided tickets and summonses should be maintained.

D. Assess CVC fees in accordance with state law.

E. Assess the ILC fee in accordance with state law.

Status:

A,  
B.2-3,  
& C. Not implemented. See MAR No. 6.

B.1. Implemented.

D. Based on statutory changes effective July 1, 1997, LET and CVC fees are to be collected on all cases, including nonmoving traffic violations.

E. Based on statutory changes effective July 1, 1997, the municipal division is no longer required to assess the ILC fee.

7. City of Leadington Municipal Division

- A.1. Receipts were not deposited on a timely basis.
- 2. Checks and money orders were not always restrictively endorsed immediately u p o n receipt.
- 3. The duties of receiving, recording, and depositing monies collected by the municipal division were not adequately segregated.
- B.1. The Court Clerk did not maintain a bond ledger and did not prepare monthly listings of open items (liabilities).
- 2. Bond receipts were not deposited on a timely basis.
- 3. The Court Clerk did not always issue receipt slips for bonds received from the police department. In addition, receipt slips were not written for the bonds until the deposit was prepared.
- 4. The June 30, 1995 balance in the bond account included bond receipts totaling \$1,425 which had been held in excess of one year.
- C. Neither the police department nor the municipal division maintained adequate records t o

account  
f o r  
summo  
n s e s  
assigne  
d and  
issued.

- D. On June 30, 1995, the court bank account consisted primarily of CVC collections that had never been turned over to the city. In addition, open item listings were not prepared for bad check restitution cases which made up part of the bank account balance.
- E. Police officers were not bonded and collected cash bonds for the municipal division when the Chief of Police was not on duty.
- F. The LET and CVC fees were sometimes collected on nonmoving violations.

Recommendations:

The city of Leadington Municipal Division:

- A.1. Deposit receipts intact daily or when accumulated receipts exceed \$100.
  - 2. Restrictively endorse checks and money orders immediately upon receipt.
  - 3. Adequately segregate duties between available employees and/or establish a documented periodic review of municipal division records by an independent person.
- B.1. Maintain a bond ledger, prepare monthly listings of open items, and reconcile these listings to monies held in trust.
  - 2. Deposit receipts daily or when accumulated receipts exceed \$100.
  - 3. Issue prenumbered receipt slips for all bonds immediately upon receipt and account for the numerical sequence.
  - 4. Follow up on old bonds held by the court, determine their disposition, and dispose of any unclaimed bonds in accordance with state law.
- C. Work with the police department to ensure records are maintained to account for the numerical sequence of all summonses assigned and issued.

- D. Disburse CVC fees in accordance with state law. In addition, the division should prepare monthly listings of open items for the bad check restitution cases and reconcile these listings to monies held in trust.
- E. Request the city obtain a bond for all persons handling municipal division monies.
- F. Assess LET and CVC fees in accordance with state law.

Status:

A.1-2,  
B.2-4. Implemented.

A.3,  
C, E,  
& F. Not implemented. See MAR No. 7.

B.1. Partially implemented. A bond ledger is maintained and a monthly listing of open items is prepared; however, the listing totaled \$40 less than monies held in trust. Although not repeated in the current MAR, our recommendation remains as stated above.

D. Partially implemented. CVC is disbursed monthly to the city and state as required by state law. However, open items listings are still not prepared for bad check restitution cases and reconciled to monies held in trust. See MAR No. 7.

8. City of Leadwood Municipal Division

A.1. The City Clerk accepted payments for fines and court costs during the month. The Court Clerk made the deposit; however, the Court Clerk did not agree receipt slips issued to the amount deposited.

2. Receipts were not deposited on a timely basis.

3. The duties of receiving, recording, and depositing monies collected by the municipal division were not adequately segregated.

B.1. The Court Clerk did not maintain a bond ledger and did not prepare monthly listings of open items (liabilities).

2. The Court Clerk did not account for the numerical sequence of all police department receipt slips.

C. Adequate procedures to follow-up on amounts owed to the municipal division had not been established.

D.1. Neither the police department nor the municipal division maintained adequate records to account for regular or dog summonses issued.

2. Neither the police department nor the court accounted for the numerical sequence of traffic tickets issued. No one reviewed the police department's traffic ticket log.

E. The CVC fee was collected on nonmoving traffic violations and the LET fee was not collected on city ordinance violations.

Recommendations:

The city of Leadwood Municipal Division:

A.1. Reconcile total cash, checks, and money orders received, as noted on the receipt slips, to bank deposits.

2. Deposit receipts intact daily or when accumulated receipts exceed \$100.

3. Adequately segregate duties between available employees and/or establish a documented periodic review of municipal division records by an independent person.

B.1. Maintain a bond ledger, prepare monthly listings of open items, and reconcile these listings to monies held in trust.

2. Account for the numerical sequence of all police department receipt slips.

C. Establish procedures to maximize the collection of fines and court costs owed to the municipal division.

D.1. Request the police department issue regular summonses in sequential order and the city maintain a copy of all dog summonses issued. Work with the police department to account for the numerical sequence of all summonses issued.

2. Work with the police department to account for the numerical sequence of all traffic tickets issued.

E. Assess LET and CVC fees in accordance with state law.

Status:

A.1,  
C, D,  
& E. Implemented.

A.2-3. Not implemented. See MAR No. 8.

B.1. Partially implemented. The Court Clerk prepares open items listings each month and reconciles these to monies held in trust. However, the Court Clerk does not maintain a bond ledger to track all bonds receipted and their corresponding disbursement. Although not repeated in the current MAR, our recommendation remains as stated above.

2. Not implemented. However, the police department rarely collects monies for the court. Although not repeated in the current MAR, our recommendation remains as stated above.

9. City of Park Hills Municipal Division

A.1. Receipts were not deposited on a timely basis.

2. The duties of receiving, recording, and depositing monies collected by the municipal division were not adequately segregated.

B.1. Monthly listings of open items (liabilities) were not prepared.

2. The March 31, 1995 balance in the bond account included bond receipts totaling \$829 which had been held in excess of one year.

3. Receipt slips were not written for bond monies received until the deposits were prepared.

4. The Court Clerk did not account for the numerical sequence of all police department receipt slips.

C. The LET and CVC fees were collected on vehicle registration violations which were nonmoving traffic violations.

Recommendations:

The city of Park Hills Municipal Division:

A.1. Deposit receipts intact daily or when accumulated receipts exceed \$100.

2. Adequately segregate duties between available employees and/or establish a documented periodic review of municipal division records by an independent person.

B.1. Prepare monthly listings of open items and reconcile these listings to monies held in trust.

2. Dispose of unclaimed bonds in accordance with state law.

3. Issue prenumbered receipt slips for all bonds immediately upon receipt.

4. Account for the numerical sequence of all police department bond receipt slips.

C. Assess LET and CVC fees in accordance with state law.

Status:

Implemented.

10. City of Potosi Municipal Division

A.1. The municipal division's listing of open bonds at June 30, 1995 was \$325 less than the balance of bonds in the bank account.

2. The June 30, 1995 balance of the bond account included bond receipts totaling \$3,948 which had been held in excess of one year.

B.1. Neither the police department nor the municipal division maintained adequate records to account for parking tickets and summonses issued. The summons forms were not prenumbered.

2. Voided parking tickets were not always retained.

C. The Municipal Judge did not sign the court docket after case dispositions were recorded.

D. The LET and CVC fees were collected on all violations, including nonmoving traffic violations.

Recommendations:

The city of Potosi Municipal Division:

- A.1. Attempt to identify to whom the \$325 belongs, and disburse the funds appropriately. If this cannot be determined, these old unidentified bond monies should be turned over to the state's Unclaimed Property Section in accordance with Section 447.595, RSMo 1994.
- 2. Dispose of unclaimed bonds in accordance with state law.
- B.1. Require summons forms to be prenumbered. In addition, the municipal division should work with the police department to ensure records are maintained to account for the numerical sequence of all parking tickets and summonses assigned and issued.
- 2. Work with the police department to ensure all voided tickets are retained.
- C. Require the judge's signature on the court dockets.
- D. Assess LET and CVC fees in accordance with state law.

Status:

A,  
B.2, C,  
& D. Implemented.

- B.1. Partially implemented. The police department stopped issuing separate tickets for parking violations. However, the police department has continued to issue summonses, which are not prenumbered, for non-traffic violations. The summonses assigned and issued are also not accounted for by the police department or the municipal division. See MAR No. 10.

11. City of St. Mary Municipal Division

- A.1. Receipt slips were not issued for the receipt of some fines and court costs.
- 2. Checks and money orders were not restrictively endorsed immediately upon receipt.
- 3. The duties of receiving, recording, and depositing monies collected by the municipal division were not adequately segregated.

B. Neither the City Marshal nor the Court Clerk maintained adequate records to account for complaints issued. The complaint forms were not prenumbered.

Recommendations:

The city of St. Mary Municipal Division:

A.1. Issue prenumbered receipt slips for all monies received and account for their numerical sequence.

2. Restrictively endorse checks and money orders immediately upon receipt.

3. Adequately segregate duties between available employees and/or establish a documented periodic review of municipal division records by an independent person.

B. Require complaint forms to be prenumbered. In addition, the Court Clerk should work with the City Marshal to ensure records are maintained to account for the numerical sequence of complaints issued.

Status:

A. Not implemented. See MAR No. 11.

B. Not implemented. Complaint forms are no longer utilized by the municipal division for ordinance violations. Traffic tickets are issued for ordinance violations; however, there is no accounting for the numerical sequence of traffic tickets. See MAR No. 11.

12. City of Ste. Genevieve Municipal Division

A. The duties of receiving, recording, and depositing monies collected by the municipal division were not adequately segregated.

B.1. A monthly listing of open items (liabilities) was not prepared. The open items listing we prepared as of September 30, 1994 was \$317 less than the balance of bonds in the bond account.

2. The Court Clerk did not prepare formal bank reconciliations for the municipal division's bank account.

3. Receipt slips were not issued for bonds received from the Ste. Genevieve Police Department or from other municipalities.

4. The police department issued prenumbered receipt slips for bonds collected. The Court Clerk did not account for the numerical sequence of the receipt slips when monies were transmitted to the court.
- C.1. Neither the police department nor the municipal division maintained adequate records to account for complaints assigned and issued. The complaint forms were not prenumbered.
2. Neither the police department nor the court accounted for the numerical sequence of traffic and parking tickets issued.
- D. The Court Clerk cashed personal checks from city/court receipts.
- E. The state's portion of CVC and POSTC fees were not disbursed to the state, and the city's portion of CVC fees were not disbursed to the city on a monthly basis.

Recommendations:

The city of Ste. Genevieve Municipal Division:

- A. Adequately segregate duties between available employees and/or establish a documented periodic review of municipal division records by an independent person.
- B.1. Prepare monthly listings of open items and reconcile these listings to bond monies held in trust. In addition, the \$317 in old unidentified bond monies should be turned over to the state Unclaimed Property Section.
2. Perform monthly bank reconciliations.
3. Issue prenumbered receipt slips for all bonds received and account for the numerical sequence.
4. Account for the numerical sequence of all police department receipt slips.
- C.1. Require complaint forms to be prenumbered. In addition, the municipal division should work with the police department to ensure records are maintained to account for the numerical sequence of all complaints assigned and issued.
2. Work with the police department to ensure records are maintained to account for the numerical sequence of all traffic and parking tickets issued.
- D. Discontinue the practice of cashing personal checks with court monies.

E. Disburse CVC and POSTC fees in accordance with state law.

Status:

A.,B.1,  
B.2,  
C.2,  
& D. Implemented.

B.3,  
C.1.  
& E. Not implemented. See MAR No. 12.

B.4. Not implemented. Although not repeated in the current MAR, our recommendation remains as stated above.

## STATISTICAL SECTION

History, Organization, and  
Statistical Information

TWENTY-FOURTH JUDICIAL CIRCUIT  
MUNICIPAL DIVISIONS  
HISTORY AND ORGANIZATION

Organization

The Twenty-Fourth Judicial Circuit is composed of Madison, St. Francois, Ste. Genevieve, and Washington counties. The Honorable Kenneth Pratte serves as Presiding Judge. There are twelve municipal divisions within the Twenty-Fourth Judicial Circuit.

The municipal divisions are governed by Chapter 479, RSMo 1994, and by Supreme Court Rule No. 37 titled "Ordinance Violations and Traffic Violations Bureau (TVB)." Section 479.050, RSMo 1994, provides that each municipal division may establish a TVB in which fines and costs are collected at times other than during court and transmitted to the city treasury.

Operating Costs

The operating costs and court salaries of each municipal division are paid by the respective municipality.

Municipal Division Organization, Personnel, and Caseload Information

1. City of Bismarck

Organization

The City Clerk and City Collector are responsible for recording transactions as well as handling collections and disbursements during city office hours. The Court Clerk is responsible for recording transactions as well as handling collections during court night. The police department collects bond monies. The police department transmits bond collections to the City Collector daily. The court maintains a bank account for the deposit of fines, court costs, and bonds. Fines and court costs are disbursed to the city treasury and state monthly. Bond monies are held in the court bank account pending disposition. Court is held once a month. A TVB has been established to receive payments of fines and court costs at times other than during court.

## 2. City of Bonne Terre

#### Organization

The City Clerk served as the Court Clerk until September 15, 1999, when the positions were divided and a separate Court Clerk hired. The Court Clerk is responsible for collecting receipts and recording transactions on court night. The City Utility Billing Clerk is responsible for receiving payments, recording transactions into the court computer system, and preparing daily bank deposits of fine and cost receipts. The Court Clerk transmits court night collections to the Utility Billing Clerk the day after court. The City Utility Billing Clerk posts court night collections into the computer system. The police department collects bond monies during non-court hours. Bonds are transmitted to a lockbox when the Court Clerk is not present, and the Chief of Police brings them to the Court Clerk the next day. Prior to April 1, 1999, the court maintained a bank account for the deposit of fines and court costs. Since April 1, 1999, fines and court costs have been deposited into the city bank account. Fines and court costs are disbursed to the city treasury and state monthly. Bond monies are deposited in a court bank account pending disposition. Court is held once a month. A TVB has been established to receive payment of fines and court costs at times other than during court.

3. City of Desloge

Organization

The Court Clerk and Deputy Court Clerk are responsible for recording transactions and depositing receipts, as well as handling collections and disbursements. The police officers collect bond monies. The police officers transmit bond collections to a lockbox as the bonds are received, and the Court Clerk retrieves the bonds from the lockbox daily. The municipal division maintains bank accounts for the deposit of fines, court costs, bonds, Crime Victim's Compensation (CVC) fees, and Judicial Education Fund (JEF) fees. Fines and court costs are disbursed to the city treasury and state monthly. Bond monies are deposited in a court bank account pending disposition. CVC and JEF fees are disbursed monthly from the municipal division's fine and court cost account to the CVC/JEF account. CVC fees due to the state are disbursed from this account to the state monthly. Court is held twice a month. A TVB has been established to receive payment of fines and court costs at times other than during court.

4. City of Farmington

Organization

The Court Clerk is responsible for recording transactions as well as handling collections and disbursements of bond monies. While the Court Clerk prepares the deposits, the City Clerk is responsible for depositing court monies into the bank accounts. The City Clerk disburses fees collected to the appropriate agencies. The police officers collect bond monies. The police officers transmit bond collections to a lockbox as the bonds are received, and the Court Clerk retrieves the bonds from the lockbox daily. The Court Clerk transmits fines and court costs to the City Clerk for deposit in the city treasury two or three times a week. Bond monies are deposited by the Court Clerk in a court bank account pending disposition. Court is held three times a month. A TVB has been established to receive payment of fines and court costs at times other than during court.

## 5. City of Fredericktown

### Organization

The Court Clerk is responsible for recording transactions and handling collections. While the Court Clerk prepares the deposits, the City Treasurer is responsible for depositing court monies into the bank accounts. The Court Clerk and the City Clerk authorize disbursements from the court accounts. The police department collects bond monies at times other than the court's hours of operation. The police department transmits bond collections to the Court Clerk daily. The municipal division maintains bank accounts for the deposit of fines, court costs, and bonds. Fines and court costs are disbursed to the city treasury and state monthly. Bond monies are deposited in a separate court bank account pending disposition. Court is held once a month. A TVB has been established to receive payment of fines and court costs at times other than during court.

REVIEW OF  
FIXED ASSETS EQUIPMENT

**From The Office Of State Auditor  
Claire McCaskill**

Report No. 2000-38  
May 24, 2000  
[www.auditor.state.mo.us](http://www.auditor.state.mo.us)

AUDIT REPORT

Office Of The  
State Auditor Of Missouri  
Claire McCaskill

May 2000

**The following problems were discovered as a result of a review conducted by our office of the Fixed Assets Equipment.**

---

We tested fixed asset equipment records of the sixteen executive departments as of June 30, 1999. Based on our tests, we reached the following conclusions:

- Some departments' equipment records were not accurate or complete.
- Some departments did not properly record assets purchased in the fixed asset records.
- Some departments could not physically locate equipment items that were listed on the records. In many instances, the department did not know why the items were missing.
- Some departments do not record equipment transactions in a timely manner, which increases the likelihood of errors or omissions in the records.
- Some departments did not perform adequate annual physical inventories of equipment items.
- Some equipment acquired by lease purchase agreements was not recorded in accordance with state policy and generally accepted accounting principles.
- Some departments did not report accurate information to the Office of Administration (OA) for inclusion in the state's comprehensive annual financial report. For example, equipment items totaling \$3,042,000 that were recorded on the Division of Job Development and Training equipment records were not reported to the Office of Administration (OA) for inclusion in the state's annual financial report. These assets are located at the offices of Service Delivery Areas throughout the state. Furthermore, record keeping or valuation problems prevented some other departments from reporting accurate equipment balances to the OA.

Departments reviewed in this audit include the following:

- Office of Administration, Revenue, Elementary and Secondary Education, Higher Education, Agriculture, Insurance, Conservation, Economic Development, Labor and Industrial Relations, Natural Resources, Transportation, Public Safety, Mental Health, Social Services, Health, and Corrections.

## STATE AUDITOR'S REPORT

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

Honorable Mel Carnahan, Governor  
and  
All Executive Department Directors

We have conducted a review of fixed assets equipment owned by the State of Missouri's sixteen executive departments. The objectives of this review were to:

1. Determine the accuracy of the equipment records as of June 30, 1999.
2. Determine the valuation of equipment by various dollar value ranges as of June 30, 1999.
3. Determine if the \$250 value for capitalization of equipment should be raised.
4. Review internal controls over accounting for state-owned equipment.

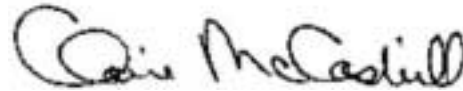

Our review was made in accordance with applicable generally accepted government auditing standards and included such procedures as we considered necessary under the circumstances. In this regard, we reviewed applicable state laws and regulations, interviewed applicable personnel of various executive departments, and reviewed certain records and documents.

As part of our review, we assessed the state's management controls to the extent we determined necessary to evaluate the specific matters described above and not to provide assurance on those controls. With respect to management controls, we obtained an understanding of the design of relevant policies and procedures and whether they have been placed in operation and we assessed control risk. In order to assess control risk, we performed tests of controls to obtain evidence regarding the effectiveness of the design and operation of certain policies and procedures.

Our review was limited to the specific matters described above and was based on selective tests and procedures considered appropriate in the circumstances. Had we performed additional procedures, other information might have come to our attention that would have been included in this report.

The accompanying information presented in the appendices is presented for informational purposes. This information was obtained from the state's management and was not subjected to the procedures applied in the review of fixed assets equipment.

The Results and Overall Conclusions Section presents the findings of our review of fixed assets equipment.

A handwritten signature in black ink, appearing to read "Claire McCaskill". The signature is fluid and cursive, with the first name "Claire" and last name "McCaskill" clearly distinguishable.

Claire McCaskill  
State Auditor

December 2, 1999 (fieldwork completion date)

## EXECUTIVE SUMMARY

## REVIEW OF FIXED ASSETS EQUIPMENT EXECUTIVE SUMMARY

We tested fixed asset equipment records of the sixteen executive departments as of June 30, 1999. Based on our tests, we reached the following conclusions:

- ! Some departments' equipment records were not accurate or complete.
- ! Some departments did not properly record assets purchased in the fixed asset records.
- ! Some departments could not physically locate equipment items that were listed on the records. In many instances, the department did not know why the items were missing.
- ! Some departments do not record equipment transactions in a timely manner, which increases the likelihood of errors or omissions in the records.
- ! Some departments did not perform adequate annual physical inventories of equipment items.
- ! Some equipment acquired by lease purchase agreements was not recorded in accordance with state policy and generally accepted accounting principles.
- ! Some departments did not report accurate information to the Office of Administration (OA) for inclusion in the state's comprehensive annual financial report. Record keeping or valuation problems prevented some departments from reporting accurate equipment balances to the OA.
- ! Departments are experiencing a significant record keeping burden because they track an extensive number of low dollar value equipment items which constitute only a small portion of the dollar value of the equipment balance. As a result, the State Auditor's office has initiated official rulemaking procedures to raise the capitalization threshold for fixed asset equipment items from \$250 to \$1,000. When officially approved, the increase in the capitalization threshold should ease some of the record keeping burden but still provide adequate information for financial reporting purposes.
- ! Departments should continue to identify and account for sensitive type equipment items below the \$1,000 threshold.
- ! Departments should ensure a complete and accurate conversion of their fixed asset accounting records to the SAM II system. In addition, the departments should comply with the requirements in the *SAM II Policies and Procedures* manual related to accounting for fixed assets.

## SCOPE AND METHODOLOGY

## REVIEW OF FIXED ASSETS EQUIPMENT SCOPE AND METHODOLOGY

### Scope

We surveyed each of the sixteen executive departments to determine the number of equipment items by dollar value ranges as of June 30, 1999. Each department maintains its own records. At the end of each fiscal year, departments are required to report equipment balances to the Office of Administration (OA) for inclusion in the state's comprehensive annual financial report. We reviewed applicable state laws and regulations, interviewed applicable personnel of the various departments, and reviewed the departments' fixed asset equipment records and procedures.

### Methodology

We performed the following procedures as part of our audit work:

- ! Reviewed the executive department's records and procedures for compliance with the requirements of Section 34.125, RSMo 1994, CSR 40-2.031, Control of Fixed Assets, and the guide entitled *Accounting for Fixed Assets in State Departments* issued by the State Auditor.
- ! Sent surveys to the sixteen executive departments (and their respective divisions and special purpose funds, if necessary) to obtain information on equipment balances as of June 30, 1999, organized by various dollar value ranges.
- ! Reviewed and evaluated the departments' internal controls for fixed assets and the record keeping systems and procedures related to equipment assets.
- ! Selected expenditures from the state's accounting system (additions) for each department for equipment purchases above \$250. The completeness, accuracy, and timeliness of the departments' addition recordings were tested by comparing information from the purchasing documentation to the information recorded in the equipment records.
- ! Selected equipment items physically on location at various offices in each department (160 items). The completeness and accuracy of the departments' equipment records were tested by comparing specific information noted for an observed asset to information recorded on the equipment records.
- ! Selected a sample of assets which were recorded on the departments' equipment records. The existence and usage of each asset and the accuracy of the equipment records were tested by physically locating or confirming each asset.
- ! Selected equipment assets removed from departments' equipment records (dispositions) during the year ending June 30, 1999. The authenticity, accuracy, and timeliness of the departments'

disposition recordings were tested by comparing the disposition information from the equipment records to the documentation supporting each entry.

## RESULTS AND OVERALL CONCLUSIONS

## REVIEW OF FIXED ASSETS EQUIPMENT RESULTS AND OVERALL CONCLUSIONS

### **The fixed asset equipment records of five departments were inaccurate and incomplete.**

The combined results of the individual tests performed at each department (tests of asset balances, purchases, and dispositions) indicated that some departments' equipment records were significantly deficient. Based on the items tested, the records were inaccurate or incomplete. A listing of those departments and their most significant deficiencies follows:

#### Office of Administration (OA)

- ! Some equipment items purchased were not properly recorded in the asset records.
- ! Equipment items selected for testing could not be physically located.
- ! Equipment transactions were not recorded in a timely manner.
- ! The OA maintains fixed asset records for the Board of Public Buildings. The Board of Public Buildings purchases equipment with state appropriations and places some of this equipment in buildings owned by the board but occupied by the departments of Corrections and Mental Health. Equipment totaling \$1,150,000 was recorded on the equipment records of both the board and the applicable department. As a result, these assets were reported twice to the OA.

#### Department of Revenue

- ! Some equipment items purchased were not properly recorded in the asset records.
- ! Equipment items selected for testing could not be physically located.
- ! Equipment transactions were not recorded in a timely manner.

#### Department of Economic Development (DED)

- ! Equipment items totaling \$3,042,000 that were recorded on the Division of Job Development and Training (DJDT) equipment records were not reported to the OA for inclusion in the state's annual financial report. These assets are located at the offices of Service Delivery Areas (SDA) throughout the state.

#### Department of Social Services

- ! Some equipment items purchased were not properly recorded in the asset records.
- ! Equipment items selected for testing could not be physically located.

#### Department of Corrections

- ! Some equipment items purchased were not properly recorded in the asset records.
- ! Equipment items selected for testing could not be physically located.
- ! Annual inventory procedures were not properly performed and, as a result, errors in the records were not discovered.

### **Nearly thirteen percent of equipment items purchased during the year were not properly recorded in the fixed asset records.**

We tested 168 purchases of equipment and noted 21 equipment items (a 12.5% error rate) that had not been recorded in the fixed asset records. A listing of error rates for each department follows:

| <u>Department</u>                | <u>Number of<br/>Errors</u> | <u>Number of<br/>Items Tested</u> | <u>Error<br/>Percentage</u> |
|----------------------------------|-----------------------------|-----------------------------------|-----------------------------|
| Office of Administration         | 6                           | 23                                | 26.1%                       |
| Revenue                          | 4                           | 10                                | 40.0%                       |
| Elementary & Secondary Education | 2                           | 10                                | 20.0%                       |
| Higher Education                 | 0                           | 9                                 | 0.0%                        |
| Agriculture                      | 2                           | 10                                | 20.0%                       |
| Insurance                        | 1                           | 9                                 | 11.1%                       |
| Conservation                     | 0                           | 10                                | 0.0%                        |
| Economic Development             | 0                           | 10                                | 0.0%                        |
| Labor and Industrial Relations   | 0 8                         | 0.0%                              |                             |
| Natural Resources                | 0                           | 10                                | 0.0%                        |
| Transportation                   | 0 10                        | 0.0%                              |                             |
| Public Safety                    | 0                           | 10                                | 0.0%                        |
| Mental Health                    | 0                           | 10                                | 0.0%                        |
| Social Services                  | 1                           | 9                                 | 11.1%                       |
| Health                           | 0                           | 10                                | 0.0%                        |
| Corrections                      | <u>5</u>                    | <u>10</u>                         | <u>50.0%</u>                |
|                                  | 21                          | 168                               | 12.5%                       |

**Over four percent of the equipment items selected for testing could not be physically located.**

We physically observed or obtained a confirmation response for a total of 632 items. We physically observed many equipment items that were located in or near Jefferson City and we obtained signed confirmation letters from the asset custodian for assets that were located in other areas of the state. A total of 28 items (a 4.4% error rate) were not located by these procedures. A listing of error rates for each department follows:

| <u>Department</u>                |   | <u>Number of<br/>Errors</u> | <u>Number of<br/>Items Tested</u> | <u>Error<br/>Percentage</u> |
|----------------------------------|---|-----------------------------|-----------------------------------|-----------------------------|
| Office of Administration         |   | 3                           | 38                                | 7.9%                        |
| Revenue                          |   | 2                           | 40                                | 5.0%                        |
| Elementary & Secondary Education |   | 1                           | 37                                | 2.7%                        |
| Higher Education                 |   | 2                           | 37                                | 5.4%                        |

|                                  |   | 28                          | 632                               | 4.4%                        |

**Equipment transactions were not recorded on the equipment records in a timely manner.**

We selected 322 equipment transactions (acquisitions and dispositions) to determine how quickly the departments recorded these transactions in the records. We did not perform this test for 91 items at 6 departments because their records did not track the data entry date. Of the 231 transactions we were able to test, 19 transactions (a 8.2% error rate) were recorded more than one month after the equipment transaction occurred. A listing of error rates for each department follows:

| <u>Department</u>                |   | <u>Number of<br/>Errors</u> | <u>Number of<br/>Items Tested</u> | <u>Error<br/>Percentage</u> |
|----------------------------------|---|-----------------------------|-----------------------------------|-----------------------------|
| Office of Administration         |   | 3                           | 39                                | 7.7%                        |
| Revenue                          |   | 3                           | 14                                | 21.4%                       |
| Elementary & Secondary Education |   | 0                           | 18                                | 0.0%                        |
| Higher Education                 |   | 0                           | 9                                 | 0.0%                        |
| Agriculture                      |   | 3                           | 18                                | 16.7%                       |
| Insurance                        |   | N/A                         | N/A                               | N/A                         |

**Some departments do not ensure annual inventory counts of equipment are performed and do not ensure that employees independent of the equipment records or equipment custody are responsible for conducting or verifying the inventory counts.**

Our review of equipment inventory procedures involved inquiries of personnel of the sixteen executive departments regarding the timing and procedures for conducting inventory counts. Our inquiries noted that many departments have procedures in place to ensure annual inventory counts are properly performed by independent employees. However, we did note that certain agencies either did not perform annual inventories or did not ensure that independent personnel were involved. A listing of departments which we noted deficiencies in is shown below:

| <u>Department</u>                               | <u>An annual<br/>inventory count<br/>was not<br/>performed</u> | <u>Inventory count<br/>personnel<br/>were not<br/>independent</u> |
|---|--|---|
| Office of Administration-Division of Personnel  | X  |   |
| Conservation                                    |  | X   |
| Economic Development-Public Service Commission  |  | X   |
| Natural Resources                               | X  |   |
| Public Safety-State Emergency Management Agency | X  |   |
| Public Safety-Missouri State Water Patrol       |  | X   |
| Public Safety-Missouri State Highway Patrol     |  | X   |
| Social Services                                 | X  |   |

During our testing we also noted other circumstances which indicated inventory procedures were not carefully or properly performed. One such instance at the Department of Corrections revealed that a vehicle on the equipment records had been disposed of in July 1997, but this vehicle had not been removed from the records as of June 30, 1999. The physical inventory sheet for fiscal year 1999 and 1998 inventory count results indicated that this vehicle had been physically verified in both years. We noted similar circumstances in our testing of the departments of Elementary and Secondary Education, Higher Education, Agriculture, Insurance, and Mental Health. Each of these departments' equipment records had not been properly adjusted for one or more assets which had been disposed of at least one year prior to our review.

**Equipment acquired by some departments through lease purchase agreements is not recorded on the equipment records in accordance with state policy or generally accepted accounting principles.**

Fixed asset items acquired through lease purchase agreements should be capitalized at the inception of the agreement in an amount determined by the criteria of Financial Accounting Standards Board (FASB) Statement 13, *Accounting for Leases*, which is the lesser of the present value of the minimum lease payments or the fair value of the leased property. Our review revealed that some of the departments do not properly record or value assets acquired through capital leases in their equipment records.

Our review of procedures for recording equipment acquired through lease purchase agreements involved inquiries of personnel of the sixteen executive departments and review of items selected for testing which were acquired through lease purchase agreements. That survey revealed the following results:

- ! Some equipment acquired through lease purchase agreements was not recorded on the departments' equipment records even though the assets met the applicable criteria for capitalization.
- ! Some equipment acquired through lease purchase agreements was recorded on the departments' equipment records at the inception of the lease; however, the amount recorded on the equipment records reflected the total of the lease payments instead of the present value of the lease payments.
- ! Some equipment acquired through lease purchase agreements was not recorded on the departments' equipment records until all of the lease payments had been made on the asset. In addition, these assets were not reported to the OA for inclusion in the state's comprehensive annual financial report.

In recent years, the departments have increased leasing activities; however, it appears that the leased assets are not always properly accounted for in accordance with state policy or generally accepted accounting principles.

**Executive Department Surveys - Departments are experiencing a record keeping burden because of the state capitalization threshold for equipment assets.**

The purpose of our survey was to obtain the number of equipment items and total dollar value of the equipment broken down into six dollar value ranges. We reviewed the surveys for mathematical accuracy and compared the amounts to equipment values reported to the OA for inclusion in the state's comprehensive annual financial report. We noted discrepancies in some of the survey responses and investigated various large differences. *(The final survey results are presented in Appendices A, B, and C)*

As shown on the pie charts on Appendix A, a large number of equipment items represent only a small portion of the equipment dollar value. For example, equipment with values between \$250 and \$1,000 make up 66% of the number of items over \$250 but only 13% of the total dollar value of items over \$250.

While it is important for some of these assets to be tracked due to their sensitive nature or susceptibility to theft, many of these items could be eliminated from the fixed asset record if the capitalization threshold was raised to \$1,000.

In addition to tracking the large volume of assets between \$250 and \$1,000, the departments also track numerous items below the \$250 threshold that they consider to be sensitive or susceptible to theft. Our survey indicated that the departments currently track 139,317 equipment items under the \$250 threshold. These assets represent 25% of the number of assets tracked by the departments but only 2% of the value.

Chapter seven, Property Items Under the Dollar Value Threshold, in the guide *Accounting for Fixed Assets in State Departments* and Section 4 of 15 CSR 40-2.031 require that the departments "...shall identify its sensitive items, implement appropriate procedures for adequate control, and perform annual inventories." Sensitive items are defined as property items with a cost under \$250 which are considered attractive or easily pilfered. Each department is charged with the responsibility of ensuring that controls are adequate over the assets they determine to be sensitive.

We surveyed the sixteen departments regarding their procedures for assessing the sensitive nature of equipment that costs less than \$250. Our survey revealed that the Department of Higher Education, the Department of Economic Development - Division of Professional Registration, the Department of Public Safety - State Emergency Management Agency, and the Department of Mental Health - Central Office do not record any items under \$250 on their fixed asset records and do not consider any items below \$250 to be sensitive. Departments that identified sensitive items had implemented procedures to ensure the items were tagged and accounted for in the fixed asset records except for the Department of Economic Development - Division of Finance. The Division of Finance tagged sensitive items but maintained a separate log of those items instead of recording the items in their fixed asset records. We also noted there was a significant difference in the criteria used by the departments to determine if an item was sensitive, as follows:

- ! The Department of Transportation records all assets which cost \$100 or more.
- ! The Department of Corrections records all assets which cost \$100 or more except for furniture.
- ! The Department of Labor and Industrial Relations does not record any asset which costs less than \$50; however, assets between \$50 and \$250 may be recorded as sensitive items if the assets are considered susceptible to loss or theft or have a high level of desirability for personal use.
- ! The Department of Social Services does not record any asset which costs less than \$100; however, assets between \$100 and \$250 may be recorded as sensitive items if the items are considered susceptible to loss or theft or have a high level of desirability for personal use.
- ! The remaining departments do not have a minimum dollar value for determining sensitive items; however, assets costing less than \$250 may be recorded as sensitive items if the items are considered susceptible to loss or theft or have a high level of desirability for personal use.

## **Overall Conclusions**

Section 34.125, RSMo 1994, directs each state department to keep an inventory of nonexpendable property of fixed assets in its possession. Each department is responsible for identifying and tracking nonexpendable property by make, model, serial number, and acquisition cost. A property tag is to be attached to each asset and the department must ensure the proper use and retention of the assets. Finally, the State Auditor is responsible for prescribing the form for the inventory of nonexpendable property and the minimum value of assets that are required to be accounted for as nonexpendable property.

The guide *Accounting for Fixed Assets in State Departments* issued by the State Auditor states,

"The importance of having a complete and accurate accounting of fixed assets cannot be emphasized too strongly. Adequate accounting procedures and records for fixed assets are essential for financial reporting and the protective custody of government property. ... The responsibility of stewardship involved in safeguarding such a large public investment is of the utmost importance to sound financial administration, and this responsibility can be effectively discharged only through adequate fixed asset accounting policies and procedures."

15 CSR 40-2.031(2) further states,

"Each department shall establish and maintain a system of control for fixed assets. As part of these responsibilities, a department should periodically review its system and adjust or modify the level of control to correct deficiencies."

The guide and the CSR provide further information regarding the identification of capitalizable assets and fixed assets with a sensitive nature. In addition, information regarding the responsibility for and the format and maintenance of the fixed asset accounting systems are discussed.

As noted throughout this report, significant deficiencies have been noted in the departments' systems of control for fixed assets. Some departments' fixed asset records appear to be significantly deficient and contain many inaccurate entries. Many of these inaccurate entries exist because the departments have not carefully designed controls for fixed assets to ensure that transactions are properly recorded. We also noted that several departments' physical inventory procedures are not performed in a timely manner or carefully enough to detect inaccurate information in the fixed asset records. The departments are likely experiencing some of these problems because the current system requires that a large number of small dollar items be tagged and maintained on inventory. As a result, the time spent by departments to maintain fixed asset records is concentrated heavily on small dollar items. In addition, it appears the lack of a centralized accounting system for fixed assets contributes to the deficiencies we noted in our review. The departments began using the state's new SAM II accounting system in July 1999. This system includes a program for recording and accounting for equipment assets. If used correctly by the departments, this system should provide increased accuracy in the accounting for the state's fixed assets.

To help address the concerns noted, the State Auditor's Office will change the CSR to raise the capitalization threshold for fixed asset equipment items from \$250 to \$1,000. When approved, the increase in the capitalization threshold should ease some of the record keeping burden but still provide adequate information for financial reporting purposes. However, the departments should continue to identify and account for sensitive type equipment items below the \$1,000 threshold.

This report is intended for the information of the management of the state of Missouri. However, this report is a matter of public record and its distribution is not limited.

# AUDIT REPORT

Office Of The  
State Auditor Of Missouri  
Claire McCaskill

May 2000

The State Auditor conducted a financial and compliance audit of the Children's Trust Fund Board for the two years ended June 30, 1999. The State Auditor issued an unqualified opinion on the board's financial statements. In addition, the audit did not note any material instances of noncompliance nor any material weaknesses in internal controls. The State Auditor conducts this regular audit as a voluntary service as requested by the Children's Trust Fund Board.

The Children's Trust Fund Board was established by state statute to provide child abuse and neglect public awareness programs throughout the state. Under statutory provisions, any individual or corporation may designate a part or all of his/her income tax refund to be contributed to the Children's Trust Fund. Additional funding is derived from contributions made directly to the Children's Trust Fund, fees on marriage licenses, certified copies of marriage licenses, vital records, and federal grants.

The board is empowered to enter into contracts with public or private agencies, schools, or qualified individuals to establish community-based educational and service programs focused on the prevention of child abuse and neglect. The programs include crisis care, home visiting, counseling, and support groups. The board also provides public education about the problem of child abuse and neglect and how Missouri citizens can contribute to prevention efforts.

Program disbursements of \$1.6 and \$1.8 million were distributed to recipient programs in fiscal years 1999 and 1998 respectively. A complete listing of recipient programs and other financial schedules outlining appropriations and expenditures of the Children's Trust Fund are available in this report.

## FINANCIAL SECTION

## State Auditor's Reports

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

**INDEPENDENT AUDITOR'S REPORT ON  
THE FINANCIAL STATEMENTS**

Honorable Mel Carnahan, Governor  
and  
Members of the Children's Trust Fund Board  
and  
Bill Heberle, Executive Director  
Jefferson City, MO 65102

We have audited the accompanying financial statements of the Children's Trust Fund and the general fixed assets account group of the Children's Trust Fund Board as of and for the years ended June 30, 1999, and 1998. These financial statements are the responsibility of the board's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with generally accepted auditing standards and Government Auditing Standards, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

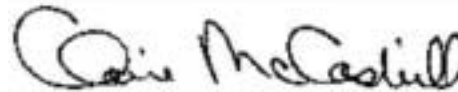

In our opinion, the financial statements referred to in the first paragraph present fairly, in all material respects, the financial position of the Children's Trust Fund and the general fixed assets account group of the Children's Trust Fund Board as of June 30, 1999, and 1998, and the results of its operations for the years then ended in conformity with generally accepted accounting principles.

In accordance with *Government Auditing Standards*, we also have issued our report dated January 18, 2000, on our consideration of the board's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grants.

Our audit was made for the purpose of forming an opinion on the financial statements, taken as a whole, that are referred to in the first paragraph. The accompanying financial information listed as supplementary data in the table of contents is presented for purposes of additional analysis. Such information has been subjected to the auditing procedures applied in the audit of the financial statements and, in our opinion, is fairly presented in all material respects in relation to the financial statements taken as a whole.

The accompanying History, Organization, and Statistical Information is presented for informational purposes. This information was obtained from the board's management and was not subjected to the auditing procedures applied in the audit of the financial statements referred to above.

An integral part of the board's funding comes from federal awards. Those federal awards are reported on in the State of Missouri Single Audit Report issued by the State Auditor's office. The single audit is conducted in accordance with the provisions of Office of Management and Budget Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*.

**Missouri State Auditor**

**INDEPENDENT AUDITOR'S REPORT ON COMPLIANCE  
AND ON INTERNAL CONTROL OVER FINANCIAL REPORTING**

Honorable Mel Carnahan, Governor  
and  
Members of the Children's Trust Fund Board  
and  
Bill Heberle, Executive Director  
Jefferson City, MO 65102

We have audited the financial statements of the Children's Trust Fund Board as of and for the years ended June 30, 1999, and 1998, and have issued our opinion thereon dated January 18, 2000. We conducted our audit in accordance with generally accepted auditing standards and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States.

**Compliance**

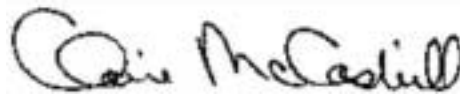

As part of obtaining reasonable assurance about whether the financial statements of the Children's Trust Fund Board are free of material misstatement, we performed tests of the board's compliance with certain provisions of laws, regulations, contracts, and grants, noncompliance with which could have a material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no material instances of noncompliance that are required to be reported under *Government Auditing Standards*.

**Internal Control Over Financial Statement Reporting**

In planning and performing our audit of the financial statements of the Children's Trust Fund Board, we considered the board's internal control over financial reporting in order to determine our auditing procedures for the purpose of expressing our opinion on the financial statements and not to provide assurance on the internal control over financial reporting. Our consideration of the internal control over financial reporting would not necessarily disclose all matters in the internal control over financial reporting that might be material weaknesses. A

material weakness is a condition in which the design or operation of one or more of the internal control components does not reduce to a relatively low level the risk that misstatements in amounts that would be material to the financial statements being audited may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions. We noted no matters involving the internal control over financial reporting and its operation that we consider to be material weaknesses.

This report is intended for the information of the management of the Children's Trust Fund Board and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

A handwritten signature in dark ink, appearing to read "Claire McCaskill". The signature is fluid and cursive, with the first name "Claire" written in a larger, more prominent script than the last name "McCaskill".

| Dispositions           | <u>(2,403)</u>          |
| BALANCE, June 30, 1999 | <u><u>\$ 47,596</u></u> |

The accompanying Note to the Supplementary Data is an integral part of this statement.

## Notes to the Financial Statements and Supplementary Data

**CHILDREN'S TRUST FUND BOARD**  
**NOTES TO THE FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA**

Notes to the Financial Statements:

1 Summary of Significant Accounting Policies

A. Reporting Entity and Basis of Presentation

These financial statements present only selected data for the Children's Trust Fund and the General Fixed Asset Account Group of the Children's Trust Fund Board.

Revenues, expenditures, and changes in fund balance are presented in Exhibit B for the Children's Trust Fund. Appropriations from this fund are expended by or for the board for restricted purposes.

The "Total (Memorandum Only)" column is presented as additional analytical data. Because this column does not identify the restrictions that exist by fund or account group, it should be read only with reference to the details of each fund and account group.

Appropriations, presented in Exhibit C, are not separate accounting entities. They do not record the assets, liabilities, and equities of the related funds but are used only to account for and control the board's expenditures from amounts appropriated by the General Assembly.

Expenditures presented for any fund, appropriation, or program may not reflect the total cost of the related activity. Other direct and indirect costs provided by the board and other state agencies are not allocated to the applicable fund or program.

B. Basis of Accounting

The financial statements for the Children's Trust Fund, Exhibits A through B, are presented on the modified accrual basis of accounting which recognizes revenues when available and measurable and expenditures when the related liability is incurred.

The Statement of Appropriations and Expenditures, Exhibit C, is presented on the state's legal budgetary basis of accounting which recognizes expenditures on the encumbrance method. Expenditures include amounts payable or encumbered at June 30 and paid during the lapse period, which ends August 31 for regular appropriations and December 31 for capital improvement appropriations. The authority to expend appropriations ends with the close of the lapse period. However, the General Assembly may authorize reappropriation of the unexpended balances of capital improvement appropriations for the following year. The General Assembly also may authorize biennial capital improvement appropriations, for which the unexpended balances at June 30 of the first year of the two-year period are reappropriated for expenditure during the second year.

C. Fiscal Authority and Responsibility

The board administers transactions in the fund and account group listed below. The state treasurer as fund custodian and the Office of Administration provide administrative control over fund resources within the authority prescribed by the General Assembly.

Children's Trust Fund: Established by Section 210.173, RSMo 1994, to receive gifts, grants, and federal monies for establishing and developing programs to prevent or alleviate child abuse or neglect and for paying the administrative costs of the Children's Trust Fund Board. Appropriations from the fund authorize disbursements as directed by the Children's Trust Fund Board in accordance with the provisions under Sections 210.170 through 210.174, RSMo 1994. Any monies remaining in the fund are perpetually maintained for the purposes of the fund.

General Fixed Assets Account Group: This account group controls the balances, additions, and dispositions of the board's general fixed assets.

D. Employee Fringe Benefits

In addition to the social security system, employees are covered by the Missouri State Employees' Retirement System (MOSERS) (a noncontributory plan) and may participate in the state's health care, optional life insurance, deferred compensation, and cafeteria plans. The optional life insurance and cafeteria plans involve only employee contributions or payroll reductions. Also, the deferred compensation plan involves employee payroll deferrals and a monthly state matching contribution for each participating employee.

The state's required contributions for employee fringe benefits are paid from the same fund as the related payrolls. These contributions are for MOSERS (retirement, basic life insurance, and long-term disability benefits); social security and medicare taxes; health care premiums, and the deferred compensation plan match.

Employee fringe benefits in the financial statement at Exhibit B are the transfers from the Children's Trust Fund for costs related to salaries paid from that fund. Transfers related to salaries are not appropriated by agency and thus are not presented in the financial statement at Exhibit C.

The Governmental Accounting Standards Board's *Codification of Governmental Accounting and Financial Reporting Standards* requires certain disclosures regarding public employee retirement systems and postemployment benefits such as health care and insurance benefits provided to terminated employees. Required disclosures for the state financial reporting entity are included in the State of Missouri Comprehensive Annual Financial Report issued by the Office of Administration.

2 Cash

The balance of the Children's Trust Fund is pooled with other state funds and invested by the state treasurer.

3. Fund Balance Reserve for Trust Principal

In accordance with Section 210.173, RSMo 1994, the Children's Trust Fund maintains a perpetual reserve of \$1 million which is not available for expenditure.

4. Reconciliation of Total Expenditures to Appropriated Expenditures

Expenditures on Exhibit B reconcile to appropriated expenditures on Exhibit C as follows:

|                            | Year Ended June 30, |           |
|----------------------------|---------------------|-----------|
|                            | 1999                | 1998      |
| Expenditures Per Exhibit B | \$ 1,960,540        | 2,186,103 |
| Employee Fringe benefits   | (39,758)            | (36,532)  |
| Expenditures per Exhibit C | \$ 1,920,782        | 2,149,571 |

5. Transfers Out

These amounts were transferred to the General Revenue Fund – State for the Children's Trust Fund's share of the refunds paid back to Missouri taxpayers under Article X, Sections 16 through 24 of the Constitution of Missouri (Hancock Amendment).

Note to the Supplementary Data:

6. General Fixed Assets

General fixed assets, which are recorded as expenditures when acquired, are capitalized at cost in the General Fixed Assets Account Group and are not depreciated.

## History, Organization, and Statistical Information

**CHILDREN'S TRUST FUND BOARD  
HISTORY, ORGANIZATION, AND STATISTICAL INFORMATION**

The Children's Trust Fund Board was established by Section 210.170, RSMo 1994, to provide child abuse and neglect public awareness programs throughout the state. Under the provisions of Section 210.174, RSMo 1994, any individual or corporation may designate a part or all of his/her income tax refund to be contributed to the Children's Trust Fund. Additional funding is derived from contributions made directly to the Children's Trust Fund, fees on marriage licenses, certified copies of marriage licenses, vital records, and federal grants.

The Children's Trust Fund Board has fifteen members. Eleven public members are appointed by the governor with the advice and consent of the Senate. Two members of the Missouri House of Representatives are appointed by the speaker of the House and two members of the Missouri Senate are appointed by the president pro tem of the Senate. Members of the Senate and House of Representatives serve on the Children's Trust Fund Board until their term in the House or Senate expires. Members serve until their successor is appointed. Members serving on the board as of January 2000 were:

| <u>Members</u>                   | <u>City</u>      | <u>Term Expires</u> |
|----------------------------------|------------------|---------------------|
| Richard Dunn, Chairman           | Springfield      | September 2000      |
| Dudley McCarter                  | St. Louis        | September 1998      |
| Richard Goldberg                 | Maryland Heights | September 1997      |
| Reverend Eugene Whelan           | Independence     | September 2000      |
| Linda Ward                       | Kansas City      | September 1997      |
| James Monteleone                 | Town & Country   | September 2002      |
| Duke McVey                       | Jefferson City   | October 2000        |
| Sam Burton                       | Rolla            | September 2001      |
| Kay Lynne Myers                  | Kansas City      | September 2000      |
| Cristy Brouce                    | Raytown          | September 2002      |
| Mildred Jamison                  | Florissant       | September 2002      |
| Representative Emmy McClelland   | Webster Groves   |                     |
| Representative Patrick Dougherty | St. Louis        |                     |
| Senator Harold Caskey            |                  |                     |
| Senator Betty Sims               | St. Louis        |                     |

The board is empowered to enter into contracts with public or private agencies, schools, or qualified individuals to establish community-based educational and service programs focused on the prevention

of child abuse and neglect. The programs include crisis care, home visiting, counseling, and support groups. The board also provides public education about the problem of child abuse and neglect. These programs include crisis care, home visiting, counseling, and support groups. The board also provides public education about the problem of child abuse and neglect and how Missouri citizens can contribute to prevention efforts.

The board may appoint an executive director to perform administrative duties. Sarah Grim was appointed Executive Director in January 1996 and resigned in June 1998. Bill Heberle was appointed Executive Director in November 1998. Four other employees perform various administrative and clerical tasks.

REVIEW  
OF  
DEPARTMENT OF REVENUE  
DIVISION OF TAXATION AND COLLECTION  
SALES AND USE TAX REFUNDS

**From The Office Of State Auditor  
Claire McCaskill**

Report No. 2000-36  
May 12, 2000  
[www.auditor.state.mo.us](http://www.auditor.state.mo.us)

AUDIT REPORT

Office Of The  
State Auditor Of Missouri  
Claire McCaskill

May 2000

**The following areas of concern were discovered as a result of a review conducted by our office of the Department of Revenue, Division of Taxation and Collection, Sales and Use Tax Refunds.**

Missouri state law authorizes the Department of Revenue (DOR), Division of Taxation, to issue sales and use tax refunds due to an overpaid return, or an audited return. During fiscal year ended June 30, 1999, the department disbursed state sales and use tax refunds, including interest, of approximately \$47,609,000. In addition to refunds, an undetermined amount of credits were applied to under payments of taxes during the fiscal year. Since fiscal year 1990, refund amounts have increased more than 400% as noted in the following table.

SALES AND USE TAX REFUNDS

| FISCAL YEAR | TOTAL REFUNDS |
|-------------|---------------|
| 1990        | \$8,960,000   |
| 1991        | 6,897,000     |
| 1992        | 16,463,000    |
| 1993        | 17,333,000    |
| 1994        | 16,388,000    |
| 1995        | 17,455,000    |
| 1996        | 15,424,000    |
| 1997        | 28,520,000    |
| 1998        | 32,774,000    |
| 1999        | 47,609,000    |

We reviewed sales and use tax refunds totaling approximately \$20,855,000 (including interest) for which there was no indication in the files that the vendor was going to return the tax or interest to the original consumer. We find this especially troubling since a questionable windfall for businesses has been created, and unveils a disincentive to charge taxpayers the correct tax amount.

(over)

YELLOW SHEET

Legislation was introduced in the 1997 legislative session that would have prohibited the refund or credit of sales or use tax erroneously collected by a retailer, unless it was demonstrated that all erroneously collected amounts would be refunded to the person that originally paid the tax. However, this provision was not approved by the General Assembly.

We contacted six contiguous states regarding their policies related to returning refunds to the original customer. Each of these states have regulations, state laws, or policies which provide that refunds must be returned to the original customer.

**Based on our review, it appears that much of the increase in refunds during fiscal 1999 was related to country club membership dues, athletic club fees, and changes in rates applicable to food sales, which are relatively new issues.**

Approximately \$13,429,000 (37%) of the \$36,550,000 refunds reviewed were related to sales taxes collected and remitted to the Department of Revenue on membership dues paid to country clubs and fees paid to athletic clubs. These refund applications cited various Administrative Hearing Commission (AHC) decisions. The decisions ruled that country clubs were entitled to a refund of sales taxes collected and remitted to the Department of Revenue on dues paid by membership classes which had voting rights in the club, had an ownership interest in the club, and would receive a distribution of the club's assets in the event of dissolution. Other decisions ruled that athletic clubs were entitled to a refund of sales taxes collected and remitted to the department on fees paid by members. These athletic clubs are not considered places of amusement or recreation, but rather fitness centers where the primary purpose is to improve member health and fitness and , therefore, the membership fees are not subject to sales tax.

Several country clubs which collected and remitted sales taxes on membership dues for the tax-exempt members applied for a refund from the Department of Revenue. To determine if the refund request was valid, the department required the clubs to indicate whether the members met the previously noted conditions required by the Administrative Hearing Commission decision. If the clubs indicated all three conditions were met, the refund was processed. However, the department did not require documentation, such as the bylaws, to verify that all three conditions were met. Failure to require adequate documentation reduces assurance that refunds are issued only to clubs which meet the requirements outlined in the Administrative Hearing Commission decision.

Approximately \$2,685,000 (7%) of the \$36,550,000 refunds reviewed were due to changes in sales tax rates applicable to food sales.

Other common reasons noted for refunds included approximately \$5,394,000 for exempt sales, \$4,806,000 related to taxpayer clerical errors, \$3,924,000 for dual operators, and \$2,177,000 pertaining to quarter-monthly filers.

Of the 266 sales and use tax refunds reviewed for fiscal year 1999, at least 76, totaling approximately \$14 million, indicated a consultant was involved in filing the refund request.

## STATE AUDITOR'S REPORT

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

Honorable Mel Carnahan, Governor  
and  
Quentin Wilson, Director  
Department of Revenue  
and  
Carol Fischer, Director  
Division of Taxation and Collection

We have conducted a review of the Department of Revenue, Division of Taxation and Collection, Sales and Use Tax Refunds. The objectives of this review were to:

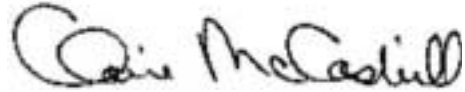

1. Review and evaluate the increase in refunds from fiscal year 1998 to fiscal year 1999.
2. Review and evaluate the basis for refunds paid in fiscal year 1999.
3. Determine whether sales and use tax refunds should have been and were ultimately returned to the original customer.

Our review was made in accordance with applicable generally accepted government auditing standards and included such procedures as we considered necessary in the circumstances. In this regard, we reviewed certain records and documents and interviewed agency personnel. Our review included, but was not necessarily limited to the policies, practices and transactions of fiscal year 1999.

As part of our review, we assessed the department's management controls to the extent we determined necessary to evaluate the specific matters described above and not to provide assurance on those controls. With respect to management controls, we obtained an understanding of the design of relevant policies and procedures and whether they have been placed in operation and we assessed control risk.

Our review was limited to the specific matters described above and was based on selective tests and procedures considered appropriate in the circumstances. Had we performed additional procedures, other information might have come to our attention that would have been included in this report.

The accompanying Management Advisory Report presents our findings and recommendations arising from our review of Sales and Use Tax Refunds.

A handwritten signature in black ink, appearing to read "Claire McCaskill". The signature is fluid and cursive, with the first name "Claire" written in a larger, more prominent script than the last name "McCaskill".

Claire McCaskill  
State Auditor

November 19, 1999 (fieldwork completion date)

The following auditors participated in the preparation of this report:

## MANAGEMENT ADVISORY REPORT

REVIEW OF  
DEPARTMENT OF REVENUE  
DIVISION OF TAXATION AND COLLECTION  
SALES AND USE TAX REFUNDS  
SUMMARY OF FINDINGS

1. Windfalls to Businesses (pages 7-8)

Sales and use tax refunds totaling approximately \$20,855,000 had no indication in the files that the refunds would be returned to the original customer.

2. Food Tax Refunds (pages 8-9 )

Refunds were issued for both over collecting sales tax on food items because the new lower food sales tax rate had not been adopted and for the 3% refund allowed on sales tax collected on qualifying food items.

3. Country Club Membership Dues (pages 9-10 )

The Department of Revenue (DOR) did not always require country clubs to provide documentation to verify that the membership dues for which sales tax refunds were issued met the qualifications outlined in an Administrative Hearing Commission (AHC) decision.

REVIEW OF  
DEPARTMENT OF REVENUE  
DIVISION OF TAXATION AND COLLECTION  
SALES AND USE TAX REFUNDS  
MANAGEMENT ADVISORY REPORT

**Background**

Section 144.190, RSMo 1994, authorizes the Department of Revenue (DOR), Division of Taxation, to issue sales and use tax refunds due to an overpaid return, an amended return, or an audited return. During fiscal year ended June 30, 1999, the DOR disbursed sales and use tax refunds, including interest, of approximately, \$47,609,000 (exclusive of local use tax refunds related to the local use tax that was ruled unconstitutional). In addition to refunds, an undetermined amount of credits were applied to under payments of taxes during the fiscal year. Since fiscal year 1990, refund amounts have increased more than 400% as noted in the following table.

| SALES AND USE TAX REFUNDS |    |               |
|---------------------------|----|---------------|
| FISCAL YEAR               |    | TOTAL REFUNDS |
| 1990                      | \$ | 8,960,000     |
| 1991                      |    | 6,897,000     |
| 1992                      |    | 16,463,000    |
| 1993                      |    | 17,333,000    |
| 1994                      |    | 16,388,000    |
| 1995                      |    | 17,455,000    |
| 1996                      |    | 15,424,000    |
| 1997                      |    | 28,520,000    |
| 1998                      |    | 32,774,000    |
| 1999                      |    | 47,609,000    |

Of the \$47,609,000 sales and use tax refunds issued in fiscal year 1999, we reviewed refunds totaling approximately \$36,550,000 (77%), which included interest payments of approximately \$5,676,000. Interest on refunds is calculated from the date the sales or use taxes were submitted to the DOR.

Based on our review, it appears that much of the increase in refunds during fiscal 1999 was related to country club membership dues, athletic club fees, and food sales, which are relatively new issues.

Approximately \$13,429,000 (37%) of the \$36,550,000 refunds reviewed were related to sales taxes collected and remitted to the DOR on membership dues paid to country clubs and fees paid to athletic clubs. These refund applications cited various Administrative Hearing Commission (AHC) decisions. The

decisions ruled that country clubs were entitled to a refund of sales taxes collected and remitted to DOR on dues paid by membership classes which had voting rights in the club, had an ownership interest in the club, and would receive a distribution of the club's assets in the event of dissolution. Other decisions ruled that athletic clubs were entitled to a refund of sales taxes collected and remitted to DOR on fees paid by members. These athletic clubs are not considered places of amusement or recreation, but rather fitness centers where the primary purpose is to improve member health and fitness and, therefore, the membership fees are not subject to sales tax.

Approximately \$2,685,000 (7%) of the \$36,550,000 refunds reviewed were due to food sales. Effective October 1, 1997, the state sales tax levied on qualifying retail sales of food was reduced from four percent to one percent. State law provided for a refund equal to three percent of all state and local sales and use taxes collected on the qualifying retail sales of food on or after October 1, 1997, and prior to September 30, 1998. The refunds were made without interest, and were only allowed if the taxpayers filed correctly completed claims for refund on or before September 30, 1999.

Other common reasons noted for refunds included approximately \$5,394,000 for exempt sales, \$4,806,000 related to taxpayer clerical errors, \$3,924,000 for dual operators, and \$2,177,000 pertaining to quarter-monthly filers.

Of the 266 sales and use tax refunds we reviewed at least 76, totaling approximately \$14 million, indicated a consultant was involved in filing the refund request.

## **1.**

### **Windfalls to Businesses**

Vendors collect sales and use taxes from their customers and remit the taxes to the Department of Revenue (DOR). Section 144.190, RSMo 1994, authorizes the division to issue sales and use tax refunds due to an overpaid return, an amended return, or an audited return. During fiscal year 1999, the DOR disbursed sales and use tax refunds of approximately \$47,609,000. We reviewed 266 of the refunds issued in fiscal year 1999, totaling approximately \$36,550,000. We noted 128 sales and use tax refunds for various reasons totaling approximately \$20,855,000 (including interest) for which there was no indication in the files that the vendor was going to return the tax or the interest to the original customer. In addition, we reviewed sales and use tax refunds totaling approximately \$2,300,000 for which it was indicated the refunds would be returned to the original customer. There was no documentation that the interest portion of these refunds, totaling approximately \$280,000, would be returned to the original customer; nor was there documentation to ensure, in the majority of the cases, the refund had actually been returned to the customer. Failure by the vendor to return the sales taxes and related interest to the customer results in a windfall for the vendor.

We previously addressed this issue in our audit reports for the two years ended June 30, 1998 and 1994. Legislation was introduced in the 1997 legislative session that would have prohibited the refund or credit of sales or use tax erroneously collected by a retailer, unless it was demonstrated

that all erroneously collected amounts would be refunded to the person that originally paid the tax. However, this provision was not approved by the General Assembly.

We contacted six contiguous states regarding their policies related to returning refunds to the original customer. Each of these states have regulations, state laws, or policies which provide that refunds must be returned to the original customer. Four of the states indicated that if the taxpayers are not the original customers, the taxpayers are required to prove the refunds are distributed to their customers. The other two states indicated that they only give refunds to the original customer.

The division should continue to pursue legislation which would require sales tax refunds and related interest be returned to the original customer. Such a policy would appear to be consistent with the provisions in the contiguous states that we contacted. Legislation should address the situations in which it is not practical or possible to identify the original customer. In these situations it seems reasonable that these monies should be retained by the state and local governments to be used for the benefit of the general public rather than to enrich the vendors that have erroneously collected such taxes.

**WE RECOMMEND** the department pursue legislation which would require sales tax refunds and related interest be returned to the original customer.

### **AUDITEE'S RESPONSE**

*The Department of Revenue (the department) agrees sellers should be required to return sales/use tax refunds to the original purchaser. The department supports legislation including this requirement. However, until such legislation is enacted, the department cannot require a seller requesting a tax refund to provide supporting documentation demonstrating it will pass the refund on to the original purchaser(s).*

|                            |
|----------------------------|
| <b>2. Food Tax Refunds</b> |
|----------------------------|

Section 144.014, RSMo 1998, reduced the state tax levied on qualifying retail sales of food from four percent to one percent effective October 1, 1997. This section also allowed food vendors to receive a three percent refund on sales and use taxes collected on qualifying retail sales of food for a specified period of time. The section specifically states:

"Any person required to collect and remit the sales or use tax on food pursuant to the provisions of this section shall be entitled to a refund from the general revenue fund equal to three percent of all state and local sales and use taxes collected by such person on or after October 1, 1997, and prior to September 30, 1998, and remitted by such person on or before the date when the same becomes due . . . on the retail sales of food as defined in this section. This refund . . . shall be made without interest. Such refund shall be made

only if such person files a correctly completed claim for refund on or before September 30, 1999, accompanied by such information as the director may require. . ."

We reviewed one case in which the taxpayer requested refunds for the same filing periods for both over collecting and remitting sales taxes at the previous four percent tax rate and for the three percent refund allowed by state law. The portion of the refund related to the three percent refund issue was based on the correct amount of qualifying retail sales.

The law does not specifically address whether the three percent refund should be allowed in the event that the taxpayer failed to implement the tax rate reduction. In the situation noted above, the taxpayer received the compensation for adopting the rate reduction, when in fact, the rate collected from the customer had not been reduced for the filing periods in question.

**WE RECOMMEND** that in the future if a similar situation occurs the department at least question whether such payments appear reasonable.

### **AUDITEE'S RESPONSE**

*The department agrees in general those taxpayers consciously deciding not to collect tax on qualifying food at the statutory reduced state rate should not receive the three percent "administrative" refund. The three percent refund was intended to cover business costs for converting operations to the partial exemption on food. However, in the one case cited in this report, the taxpayer had been collecting tax on some of its food sales at the reduced rate. The business filed amended returns after a review of its records revealed other sales were of qualifying food items. In this isolated instance the taxpayer incurred the administrative burden of complying with the law; therefore, the department concluded there was not sufficient legal basis for denying the three percent refund.*

*As always, the department will continue to exercise due diligence where the taxpayer is requesting the three percent refund without having incurred the costs associated with complying with the reduced rate on qualifying food items.*

**3.**

### **Country Club Membership Dues**

Country clubs collect sales taxes on membership dues of certain classes of members and remit the taxes to the DOR. Dues for member classes who have voting rights, own equity in the club, and would receive a distribution of the club's assets upon dissolution are tax-exempt. All other membership dues are taxable per AHC decision, *Bogey, Inc. v. Director of Revenue*, No. 96-002209 RV and other related cases. Several country clubs which collected and remitted sales taxes on membership dues for the tax-exempt members applied for a refund from the DOR. To determine if the refund request was valid, the DOR required the clubs to indicate whether the members met the previously noted conditions required by the AHC decision. If the clubs indicated

all three conditions were met, the refund was processed. However, the DOR did not require documentation, such as the bylaws, to verify that all three conditions were met. Failure to require adequate documentation reduces assurance that refunds are issued only to clubs which meet the requirements outlined in the AHC decision.

**WE RECOMMEND** the department require country clubs requesting refunds for sales taxes on membership dues supply documentation to verify the required conditions exist. In addition, for refunds already paid, the department should review these files to ensure all conditions were met.

### **AUDITEE'S RESPONSE**

*The department requires each refund claimant to provide proof that its refund claim conditions are valid and to substantiate the amount claimed. Additionally, all claimants are required to submit amended returns for each period in which a refund is claimed. The department requested country clubs seeking refunds of sales tax paid on membership dues to respond under oath as to whether conditions cited by the court, including the clubs' membership classifications, members' voting rights, ownership rights and rights upon dissolution of the club, were met. In addition, many clubs provided worksheets and other documentation supporting their claims. Bylaws were requested and received if questions arose as to the validity of any of these refund claims. To request bylaws from taxpayers receiving refunds of the sales tax paid on membership dues where there is no evidence the claims were invalid is unduly burdensome on the taxpayer and contrary to the department's commitment to increase voluntary compliance while simplifying and reducing the cost of compliance.*

This report is intended for the information of the management of the DOR. However, this report is a matter of public record and its distribution is not limited.

# AUDIT REPORT

Office Of The  
State Auditor Of Missouri  
Claire McCaskill

May 2000

**The following findings were noted as a result of an audit conducted by our office of the Office of the State Treasurer.**

-----  
The State Treasurer's Office maintains numerous bank accounts to handle state monies. Due to the volume of activity, and the number and complexity of reconciling items, many of the main operating accounts are normally reconciled daily. However, one of these accounts, the Electronic Receipt/Payment Account, was not being reconciled on a timely basis. A similar condition was noted in our prior report.

The Electronic Receipt/Payment Account is used to process many of the state's electronic transactions, such as wire transfer receipts of federal monies, credit card receipts, direct deposits of payroll checks, and electronic vendor payments. In response to our prior report, the State Treasurer's Office did increase their efforts in reconciling the account for a period of time. During our audit, we noted that the daily bank reconciliations for this account were current at July 23, 1999; however, the reconciliations were not performed again until December 6, 1999 when we discussed the issue with the State Treasurer's Office. The reconciliations were still five and one-half months behind at March 2, 2000.

The June 30, 1999 reconciliation identified approximately \$7,400,000 in reconciling items, one-third of which had been outstanding for more than a month. Many such items require further research to determine what corrections or additional actions are necessary to resolve them. To allow errors and other reconciling items to be identified, researched, and corrected in a timely manner, bank reconciliations should be kept up-to-date.

Certain entities holding unclaimed property for persons they cannot locate are periodically required to send such property, along with available information about the owners, to the State Treasurer's Office. The Unclaimed Property Division (UPD) receives and records the unclaimed property and deposits unclaimed monies to the credit of the Abandoned Fund Account Fund. While the UPD deposits unclaimed funds and enters information about the holders into the UPD's unclaimed property management system database as it is received, the related individual owner information is not always entered in a timely manner.

At June 30, 1999, the UPD had approximately \$3,524,000 in holder reports for which the owner information had not been entered, as compared to approximately \$2,019,000 at June 30, 1998. Some of these reports had been submitted as much as eight months earlier. In addition, as of October 1, 1999 the amount had increased to approximately \$3,821,000. The two main reporting periods during which unclaimed property is remitted to the UPD begin on May 1 and November 1 of each year.

(over)

YELLOW SHEET

The timely entry of owner information on the unclaimed property management system is critical to returning unclaimed funds to the original owners in a timely manner. While the UPD uses many marketing tools to publicize unclaimed funds and to encourage owners to inquire about monies possibly due them, owners can only identify and claim the amounts recorded in their name on the unclaimed property management system. Without the most current data, the value of this marketing is reduced.

As a follow-up to the action taken by the Office of State Treasurer on recommendations made in our report issued for the year ended June 30, 1998. We had recommended:

- The State Treasurer's Office continue to monitor the cash balance of the Abandoned Fund Account Fund and ensure that the necessary transfer is made at least once each fiscal year to reduce the balance to the level required by state law. – **Implemented**
- The State Treasurer's Office ensure that audits and other reviews of the Missouri First Linked Deposit Program are performed on a timely basis. In addition the audits should conform to the State Treasurer's Office's written guidelines. – **Implemented**

## FINANCIAL SECTION

## State Auditor's Reports

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

**INDEPENDENT AUDITOR'S REPORT ON  
THE FINANCIAL STATEMENTS**

Honorable Bob Holden, State Treasurer  
Jefferson City, Missouri 65102

We have audited the accompanying special-purpose financial statements of the various funds of the Office of State Treasurer as of and for the year ended June 30, 1999, as identified in the table of contents. These special-purpose financial statements are the responsibility of the office's management. Our responsibility is to express an opinion on these special-purpose financial statements based on our audit.

We conducted our audit in accordance with generally accepted auditing standards and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the special-purpose financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the special-purpose financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

The accompanying special-purpose financial statements were prepared for the purpose of presenting the financial position, results of operations, and cash flows of the Central Check Mailing Service Revolving Fund; the receipts, disbursements, and changes in cash and investments of the Abandoned Fund Account Fund and the Treasurer's Information Fund; and the appropriations and expenditures of the various funds of the Office of State Treasurer. These special-purpose financial statements are not intended to be a complete presentation of the financial position and results of operations of the various funds of the office.

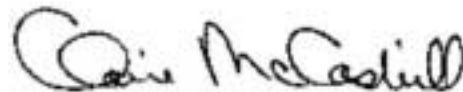

In our opinion, the special-purpose financial statements in Exhibits A through C present fairly, in all material respects, the financial position of the Central Check Mailing Service Revolving Fund as of June 30, 1999 and 1998, and the results of its operations and its cash flows for the years then ended in conformity with generally accepted accounting principles.

In our opinion, the special-purpose financial statements in Exhibits D and E present fairly, in all material respects, the receipts, disbursements, and changes in cash and investments of the Abandoned Fund Account Fund and the Treasurer's Information Fund; and the appropriations and expenditures of the various funds of the Office of State Treasurer as of and for the years ended June 30, 1999 and 1998, in conformity with the comprehensive bases of accounting discussed in Note 1, which are bases of accounting other than generally accepted accounting principles.

In accordance with *Government Auditing Standards*, we also have issued our report dated December 20, 1999, on our consideration of the office's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grants.

Our audit was made for the purpose of forming an opinion on the special-purpose financial statements, taken as a whole, that are referred to in the first paragraph. The accompanying financial information listed as supplementary data in the table of contents is presented for purposes of additional analysis. Such information, except for that presented in Schedule 5, has been subjected to the auditing procedures applied in the audit of the special-purpose financial statements and, in our opinion, is fairly stated in all material respects in relation to the special-purpose financial statements taken as a whole. We did not audit the information presented in Schedule 5 and, accordingly, we express no opinion on it.

The accompanying History, Organization, and Statistical Information is presented for informational purposes. This information was obtained from the office's management and was not subjected to the auditing procedures applied in the audit of the special-purpose financial statements referred to above.

Claire McCaskill  
State Auditor

December 20, 1999 (fieldwork completion date)

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

**INDEPENDENT AUDITOR'S REPORT ON COMPLIANCE  
AND ON INTERNAL CONTROL OVER FINANCIAL REPORTING**

Honorable Bob Holden, State Treasurer  
Jefferson City, Missouri 65102

We have audited the special-purpose financial statements of the Office of State Treasurer as of and for the year ended June 30, 1999, and have issued our report thereon dated December 20, 1999. We conducted our audit in accordance with generally accepted auditing standards and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States.

Compliance

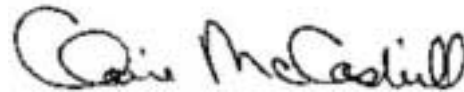

As part of obtaining reasonable assurance about whether the special-purpose financial statements of the Office of State Treasurer are free of material misstatement, we performed tests of the office's compliance with certain provisions of laws, regulations, contracts, and grants, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance.

Internal Control Over Financial Reporting

In planning and performing our audit of the special-purpose financial statements of the Office of State Treasurer, we considered the office's internal control over financial reporting in order to determine our auditing procedures for the purpose of expressing our opinion on the special-purpose financial statements and not to provide assurance on the internal control over financial reporting. However, we noted a certain matter involving the internal control over financial reporting and its operation that we consider to be a reportable condition. Reportable conditions involve matters coming to our attention relating to significant deficiencies in the design or operation of the internal control over financial reporting that, in our judgment, could adversely affect the office's ability to record, process, summarize, and report financial data consistent with the assertions of management in the special-purpose financial statements.

A material weakness is a condition in which the design or operation of one or more of the internal control components does not reduce to a relatively low level the risk that misstatements in amounts that would be material to the special-purpose financial statements being audited may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions. Our consideration of the internal control over financial reporting would not necessarily disclose all matters in the internal control that might be reportable conditions and, accordingly, would not necessarily disclose all reportable conditions that are also considered to be material weaknesses. However, we noted a certain matter involving the internal control over financial reporting and its operation that we consider to be a material weakness, and this matter is presented in the accompanying Management Advisory Report.

This report is intended for the information of the management of the Office of State Treasurer and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

A handwritten signature in black ink, appearing to read "Claire McCaskill". The signature is written in a cursive, flowing style.

Claire McCaskill  
State Auditor

December 20, 1999 (fieldwork completion date)

The accompanying Notes to the Supplementary Data are an integral part of this statement.

## Notes to the Financial Statements and Supplementary Data

OFFICE OF STATE TREASURER  
NOTES TO THE FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

Notes to the Financial Statements:

1. Summary of Significant Accounting Policies

A. Reporting Entity and Basis of Presentation

The accompanying special-purpose financial statements present only selected data for each fund of the Office of State Treasurer.

The Central Check Mailing Service Revolving Fund, presented in Exhibits A through C, is a separate accounting entity, recording all assets, liabilities, equities, revenues, and expenses related to the fund's activities.

Expenses presented for the fund or any program may not reflect the total cost of the related activity. Other direct and indirect costs provided by the office and other state agencies are not allocated to the fund or applicable program.

Receipts, disbursements, and changes in cash and investments are presented in Exhibit D for the Abandoned Fund Account Fund and the Treasurer's Information Fund. Appropriations from these funds are expended by or for the office for restricted purposes.

Appropriations, presented in Exhibit E, are not separate accounting entities. They do not record the assets, liabilities, and equities of the related funds but are used only to account for and control the office's expenditures from amounts appropriated by the General Assembly.

Expenditures presented for each appropriation may not reflect the total cost of the related activity. Other direct and indirect costs provided by the office and other state agencies are not allocated to the applicable fund or program.

B. Basis of Accounting

The financial statements for the Central Check Mailing Service Revolving Fund, Exhibits A through C, are prepared in conformity with generally accepted accounting principles. These statements are presented on the accrual basis of accounting which recognizes revenues when earned and expenses when the related liabilities are incurred.

Fixed assets (equipment) of the Central Check Mailing Service Revolving Fund are recorded at cost and depreciated on a straight-line basis with a useful life of ten years and no salvage value.

The Statement of Receipts, Disbursements, and Changes in Cash and Investments, Exhibit D, prepared on the cash basis of accounting, presents amounts when they are received or disbursed.

The Statement of Appropriations and Expenditures, Exhibit E, is presented on the state's legal budgetary basis of accounting which recognizes expenditures on the encumbrance

method. Expenditures include amounts payable or encumbered at June 30 and paid during the lapse period, which ends August 31 for regular appropriations and December 31 for capital improvement appropriations. The authority to expend appropriations ends with the close of the lapse period. However, the General Assembly may authorize reappropriation of the unexpended balances of capital improvement appropriations for the following year. The General Assembly also may authorize biennial capital improvement appropriations, for which the unexpended balances at June 30 of the first year of the two-year period are reappropriated for expenditure during the second year.

The cash basis of accounting and the budgetary basis of accounting differ from generally accepted accounting principles, which require revenues to be recognized when they become available and measurable or when they are earned and expenditures or expenses to be recognized when the related liabilities are incurred.

#### C. Fiscal Authority and Responsibility

The office administers transactions in the funds listed below. The state treasurer as fund custodian and the Office of Administration provide administrative control over fund resources within the authority prescribed by the General Assembly.

Central Check Mailing Service Revolving Fund: The office receives appropriations from this fund and maintains a proprietary interest in the fund. The State Treasurer is administrator and custodian of the fund and receives funds paid or transferred to the office by state agencies for centralized check mailing services. The initial funding for this fund was provided by a transfer of \$50,000 from the General Revenue Fund - State on October 23, 1978. Appropriations from the fund are used for check mailing service expenses.

Abandoned Fund Account Fund: This fund receives monies from banking or financial institutions, business associations, insurance corporations, utilities, courts and other governmental entities, and proceeds from the sale of abandoned property representing abandoned or unclaimed funds.

This fund is established and governed under Section 447.543.2, RSMo Cumulative Supp. 1999. Under Sections 447.500 through 447.595, RSMo, various financial, business, and governmental entities, unless otherwise exempted, are to remit to the State Treasurer all funds which have been presumed abandoned or unclaimed for the required dormancy period, less any reasonable costs of complying with the law incurred during the required notification or report process. The State Treasurer is to deposit these funds in the Abandoned Fund Account Fund. Claims may be filed at any time and are paid upon proof of an approved claim. At any time when the balance of the fund exceeds one-twelfth of the previous fiscal year's total disbursement from the Abandoned Fund Account Fund, the State Treasurer may, and at least once every fiscal year shall, transfer to the state's General Revenue Fund the balance of the Abandoned Fund Account Fund which exceeds one-twelfth of the previous fiscal year's total disbursement from the Abandoned Fund Account Fund. If any claim or refund reduces the balance of the fund to less than one-twenty-fourth of the previous fiscal year's total disbursement from the Abandoned Fund Account Fund, the State Treasurer shall transfer from the state's General Revenue Fund an amount which is sufficient to restore the balance to one-twelfth of the previous fiscal year's total

disbursement from the Abandoned Fund Account Fund. Appropriations from this fund authorize disbursements for the payment of claims of abandoned funds.

Treasurer's Information Fund: The office receives appropriations from this fund and maintains a proprietary interest in the fund. This fund, established by Section 30.610, RSMo 1994, may receive monies from governmental entities or the general public for the preparation, reproduction, or dissemination of information or publications of the State Treasurer. Appropriations from this fund shall be used to pay for personal service, equipment and other expenses of the office necessary for the preparation, reproduction or dissemination of information or publications of the State Treasurer.

General Revenue Fund-State: The office receives appropriations from this fund and does not maintain a proprietary interest in the fund. Appropriations from the fund are used for the basic operation of the office, including those programs and services that have no other funding source. These appropriations also may be used to initially fund, or to provide matching funds or support for, programs paid wholly or partially from other sources.

Highway Department Fund: The office receives appropriations from this fund and does not maintain a propriety interest in the fund. Appropriations from the fund are used for that portion of the basic operation of the office which relates to the administration of highway department funds.

Worker's Compensation - Second Injury Fund: The office receives appropriations from this fund and does not maintain a proprietary interest in the fund. Appropriations from the fund are used for that portion of basic operations which relate to the administration of Second Injury Fund claims.

D. Employee Fringe Benefits

In addition to the social security system, employees are covered by the Missouri State Employees' Retirement System (MOSERS) (a noncontributory plan) and may participate in the state's health care, optional life insurance, deferred compensation, and cafeteria plans. The optional life insurance and cafeteria plans involve only employee contributions or payroll reductions. Also, the deferred compensation plan involves employee payroll deferrals and a monthly state matching contribution for each participating employee.

The state's required contributions for employee fringe benefits are paid from the same funds as the related payrolls. Those contributions are for MOSERS (retirement, basic life insurance, and long-term disability benefits); social security and medicare taxes; health care premiums; and the deferred compensation plan match.

Transfers related to salaries are not appropriated by agency and thus, are not presented in the financial statement at Exhibit E.

2. Cash and Investments

The balances of the Central Check Mailing Service Revolving Fund, Abandoned Fund Account Fund, and Treasurer's Information Fund are pooled with other state funds and invested by the state treasurer.

3. Reconciliation of Total Disbursements to Appropriated Expenditures

Disbursements on Exhibit D reconcile to appropriated expenditures on Exhibit E as follows:

|                             |    | Year Ended June 30,       |                                    |                           |                                    |

Notes to the Supplementary Data:

4. General Fixed Assets

General fixed assets, which are recorded as expenditures when acquired, are capitalized at cost in the General Fixed Assets Account Group and are not depreciated.

5. Basis of Presentation

The amounts presented in Schedules 4 through 8 represent all funds in the state treasury and all trust funds in the custody of the State Treasurer.

State treasury funds are subjected to appropriation; trust funds are not. The schedules do not include any funds or investments that are not in the custody of the State Treasurer.

6. Cash and Investments

Article IV, Section 15 of the Missouri Constitution establishes the State Treasurer as custodian of all state funds and funds received from the U. S. government. This section further authorizes the State Treasurer to place all such monies on time deposit, bearing interest, in Missouri banking institutions selected by the State Treasurer and approved by the Governor and the State Auditor, or in obligations of the U. S. government or any agency or instrumentality thereof maturing or becoming payable not more than five years from the date of purchase. In addition, the State Treasurer may enter into repurchase agreements maturing and becoming payable within ninety days secured by U. S. Treasury obligations or obligations of U. S. government agencies or instrumentalities of any maturity, as provided by law. The treasurer may also invest in banker's

acceptances issued by domestic commercial banks possessing the highest rating issued by a nationally recognized rating agency and in commercial paper issued by domestic corporations which has received the highest rating issued by a nationally recognized rating agency. Investments in banker's acceptances and commercial paper shall mature and become payable not more than one hundred eighty days from the date of purchase, maintain the highest rating throughout the duration of the investment and meet any other requirements provided by law. The State Treasurer shall prepare, maintain and adhere to a written investment policy which shall include an asset allocation plan limiting the total amount of state money which may be invested in each investment category authorized by law.

### Deposits

The State Treasurer maintains approximately 1,400 bank accounts throughout the state. These accounts include time deposits, collection accounts which are demand deposit accounts for various state agencies, and the state's primary operating accounts which are also demand deposit accounts. Cash balances in the state's operating accounts which are not needed for immediate use are invested.

The State Treasurer's deposits at June 30, 1999 were entirely covered by federal depository insurance or by collateral securities held by custodial banks in the State Treasurer's name.

To protect the safety of state deposits, Sections 30.270 and 110.020, RSMo 1994, require depositories to pledge collateral securities to secure deposits not insured by the Federal Deposit Insurance Corporation.

### Investments

The State Treasurer's investments at June 30, 1999 are listed by type below to give an indication of the level of risk assumed by the state at year-end. All investments are insured or registered, or have collateral held by the State Treasurer or a custodial bank in the state's name.

|                            |    | Carrying<br>Amount   | Fair<br>Value        |
|----------------------------|----|----------------------|----------------------|
| Repurchase agreements      | \$ | 160,578,600          | 160,578,600          |
| U.S. government securities |    | 2,299,678,256        | 2,296,520,743        |
| Commercial paper           |    | 734,288,488          | 734,006,550          |
| Other investments          |    | 10,130               | 46,340               |
| Total Investments          | \$ | <u>3,194,555,474</u> | <u>3,191,152,233</u> |

Investments are recorded at acquisition cost except other investments which are recorded at par. Investments in repurchase agreements are acquired at face value and earn a stated interest rate. Investments in U. S. government securities are acquired at fair value and mature at face value.

## 7. Demand Deposit and Collection Accounts

The demand deposits with Mercantile Bank on Schedule 4 consist of one central demand account in 1999 and 1998. The demand deposits with Central Bank consist of ten central demand accounts in 1999, seven in 1998, 1997 and 1996, and five in 1995. The Lottery Concentration Account was at Central Bank in 1999, 1998, 1997, 1996, and 1995. The Conservation Concentration Account was at Central Bank in 1999, 1998, 1997, and 1996.

The book balances as presented include deposits and transfers in transit of \$0, \$0, \$0, \$0, and \$5,075,083 at June 30, 1999, 1998, 1997, 1996, and 1995 for Central Bank. Bank balances were \$18,081,868 and \$28,187,539 at June 30, 1999 and 1998 for Mercantile Bank and \$32,573,546, \$22,567,839, \$58,791,756, \$34,932,976, and \$20,414,570 at June 30, 1999, 1998, 1997, 1996, and 1995 for Central Bank.

Banking service agreements on the central demand accounts allow the State Treasurer to invest outstanding checks up until the checks clear the bank, thereby investing an amount in excess of book balances. The negative balances at June 30 (Schedule 4) for the appropriated funds demand deposits represent the book balance net of amounts invested.

8. Other Investments

The amounts presented in the appropriated funds as other investments represent investments in corporate common stocks and U.S. Government securities for the Pansy Johnson-Travis Memorial State Gardens Trust Fund that were transferred to the State Treasurer from the previous trustee of the fund.

9. Investments of Other Agencies

Schedules 7 and 8 do not include those funds which are invested directly by other agencies; e.g., the Agricultural Development Fund and the Department of Revenue non-state (local) funds. The State Treasurer does not have investment authority for these funds and is not responsible for the efficiency of the investment of these funds or for the collection and distribution of the interest income.

10. Amount and Yield on Investment Earnings

The amount and yield on investments earnings on Schedule 8 are presented on a cash basis. However, approximate accrued amounts were \$36,028,000, \$44,990,000, \$39,100,000, \$29,200,000, and \$19,900,000 at June 30, 1999, 1998, 1997, 1996, and 1995, respectively, giving approximate yield rates of 5.31 percent, 5.51 percent, 5.37 percent, 5.39 percent, and 5.19 percent for the same corresponding periods on an accrual basis.

## MANAGEMENT ADVISORY REPORT SECTION

Management Advisory Report -  
State Auditor's Current Recommendations

OFFICE OF STATE TREASURER  
SUMMARY OF FINDINGS

1. Bank Reconciliation Procedures (pages 42-44)

The reconciliation of the Electronic Receipt/Payment Account is not being performed timely.

2. Unclaimed Property Procedures (pages 44-45)

The owner information from holder reports has not been entered into the unclaimed property management system database timely.

OFFICE OF STATE TREASURER  
MANAGEMENT ADVISORY REPORT -  
STATE AUDITOR'S CURRENT RECOMMENDATIONS

We have audited the special-purpose financial statements of the Office of State Treasurer as of and for the year ended June 30, 1999, and have issued our report thereon dated December 20, 1999.

The following Management Advisory Report presents our finding and recommendation arising from our audit of the office's special-purpose financial statements. During our audit, we also identified a certain management practice which we believe could be improved. Our audit was not designed or intended to be a detailed study of every system, procedure, and transaction. Accordingly, the findings presented in the following report should not be considered as all-inclusive of areas where improvements may be needed.

|           |                                       |
|-----------|---------------------------------------|
| <b>1.</b> | <b>Bank Reconciliation Procedures</b> |
|-----------|---------------------------------------|

The State Treasurer's Office (STO) maintains numerous bank accounts to handle state monies. Due to the volume of activity, and the number and complexity of reconciling items, many of the main operating accounts are normally reconciled daily. However, one of these accounts, the Electronic Receipt/Payment Account, was not being reconciled on a timely basis. A similar condition was noted in our prior report.

The Electronic Receipt/Payment Account is used to process many of the state's electronic transactions, such as wire transfer receipts of federal monies, credit card receipts, direct deposits of payroll checks, and electronic vendor payments. In response to our prior report, the STO did increase their efforts in reconciling the account for a period of time. During our audit, we noted that the daily bank reconciliations for this account were current at July 23, 1999; however, the reconciliations were not performed again until December 6, 1999 when we discussed the issue with the STO. The reconciliations were still five and one-half months behind at March 2, 2000.

The June 30, 1999 reconciliation identified approximately \$7,400,000 in reconciling items, one-third of which had been outstanding for more than a month. Many such items require further research to determine what corrections or additional actions are necessary to resolve them. To allow errors and other reconciling items to be identified, researched, and corrected in a timely manner, bank reconciliations should be kept up-to-date.

**WE AGAIN RECOMMEND** the STO ensure reconciliations of all bank accounts are done on a timely basis.

**AUDITEE'S RESPONSE**

*The STO is committed to ensuring the timely performance of all bank reconciliations. With the exception of the state's Electronic Receipt/Payment Account ("electronic account"), the STO has routinely and successfully reconciled all state accounts on a timely basis.*

*The STO recognizes that additional measures are necessary to ensure the timely reconciliation of the state's electronic account. Transactions in the electronic account alone increased 10 percent from fiscal year 1998 to fiscal year 1999. In addition, the complexities of the transactions have increased significantly, resulting in a greater number of reconciling items that require research.*

*In July 1999, Missouri's Office of Administration implemented a new statewide accounting system, SAM II. At the same time, the STO implemented a new Y2K-compliant internal accounting system, Fundware. A significant amount of additional time was required by the STO to learn the new processes involved in SAM II, and to determine procedures to balance the old statewide accounting system to the two new systems, SAM II and Fundware.*

*In addition, the SAM II conversion was implemented without automated interfaces in place between systems. As a result, many of the processes that were automated between the old statewide accounting system and the old STO accounting system required manual processing during the period of transition to the new system.*

*During this same time period, all agencies were implementing the transition to SAM II. Many had difficulty obtaining the information necessary from SAM II to accomplish their internal accounting procedures. As a result, the agencies looked to the STO to provide them with the data they could not otherwise obtain. This data was available through Fundware, but required a redirecting of STO resources to obtain and disseminate. All this occurred while the STO was also struggling to balance its own accounts to SAM II.*

*As a function of reconciliation, the STO depends upon outside agencies to supply timely and accurate data on a daily basis in order to accurately balance the accounts held by the STO. Several of those agencies encountered great difficulties in trying to implement their internal interfaces to SAM II. The STO had to dedicate significant resources to researching transactions that were posting incorrectly to SAM II.*

*Following the 1998 audit, which also included a recommendation to ensure that the electronic account was reconciled on a timely basis, the STO successfully implemented procedures to bring the reconciliation of the electronic account up-to-date. The account was timely reconciled through July 23, 1999. However, management changes and difficulties resulting from the transition to a new statewide accounting system and a new internal accounting system strained STO resources and resulted in a lapse in timely reconciliation of the electronic account.*

*Now that the transition to the financial phase of SAM II has been completed, the STO has revisited its previous plan for ensuring the timely reconciliation of the electronic account, and has begun to implement the following measures to ensure compliance with the State Auditor's recommendations. However, the transition to SAM II is not complete, and it is unforeseen what demands the remaining elements of transition will place on STO resources.*

*The audit recommendations specifically address the issue of timely reconciliation of the electronic account. In addition to the long-term measures outlined above, the STO has implemented many of the following measures, and will complete implementation of all measures listed below within three months to ensure compliance with the audit recommendations.*

- 1. The STO recognized that management changes were necessary in order to ensure improved oversight of all accounts. Those changes have been implemented and, as a result, specific attention at the management level is now being given to the electronic account.*
- 2. Reconciliation software has been purchased and will be implemented by the end of June 2000. The software will assist in reconciling all other accounts, thereby freeing up additional resources to research outstanding items and dedicate time to other areas of account reconciliation.*

3. *The duties of the Trust Accounts Coordinator have been reassigned in order to prioritize reconciliation of the electronic account. This is a permanent change in this position's responsibilities designed to bring the electronic account up-to-date, and keep it reconciled in the future.*
4. *The STO is seeking to implement additional electronic interfaces from the Office of Administration SAM II system, which will allow resources currently dedicated to interfacing with the SAM II system to be redirected and used, as necessary, for account reconciliation.*
5. *Interns will be utilized to assist with researching outstanding items, and to provide assistance in other areas to STO staff, thereby freeing up additional resources that can be dedicated to account reconciliation.*

*It is anticipated that reconciliation of the electronic account will be current by May 1, 2000, and that the short-term and long-term measures outlined above will ensure full compliance with the audit recommendations.*

|   |
|---|
| <b>2. Unclaimed Property Procedures</b> |
|---|

Certain entities holding unclaimed property for persons they cannot locate are periodically required to send such property, along with available information about the owners, to the State Treasurer's Office. The Unclaimed Property Division (UPD) receives and records the unclaimed property and deposits unclaimed monies to the credit of the Abandoned Fund Account Fund. While the UPD deposits unclaimed funds and enters information about the holders into the UPD's unclaimed property management system database as it is received, the related individual owner information is not always entered in a timely manner.

At June 30, 1999, the UPD had approximately \$3,524,000 in holder reports for which the owner information had not been entered, as compared to approximately \$2,019,000 at June 30, 1998. Some of these reports had been submitted as much as eight months earlier. In addition, as of October 1, 1999 the amount had increased to approximately \$3,821,000. The two main reporting periods during which unclaimed property is remitted to the UPD begin on May 1 and November 1 of each year.

The timely entry of owner information on the unclaimed property management system is critical to returning unclaimed funds to the original owners in a timely manner. While the UPD uses many marketing tools to publicize unclaimed funds and to encourage owners to inquire about monies possibly due them, owners can only identify and claim the amounts recorded in their name on the unclaimed property management system. Without the most current data, the value of this marketing is reduced.

**WE RECOMMEND** the STO enter owner information in a timely manner.

**AUDITEE'S RESPONSE**

*The two major functions of the Unclaimed Property Division are: 1) receipt and entry of unclaimed property, and 2) handling of inquiries and disbursement to unclaimed property owners. These two functions must compete for the same personnel resources.*

*The STO\Unclaimed Property Division has experienced a sizeable increase in volume due to heightened awareness of the unclaimed property laws and increased national attention on states' efforts to return unclaimed property to the rightful owners. In fiscal year 1999, the Unclaimed Property Division entered over 180 percent more owners and handled over 1500 percent more inquiries than fiscal year 1998, with the same size staff.*

*Coupled with the increased volume of remitted funds anticipated due to the changes in the Unclaimed Property law under H.B. 1510 (see below), the resources of the Unclaimed Property Division may ultimately be inadequate to address the rapid growth in owner information being reported. However, the STO is committed to exhausting every resource before requesting additional FTEs, and has a plan in place to maximize existing resources through the use of new technology.*

*The STO is fully committed to ensuring that owner information is entered in a timely manner. In 1998, H.B. 1510 was passed and signed into law. The abandonment period for most types of property was changed from seven years to five years, effective January 1, 2000. Companies will remit owners for three reporting periods in May and November 2000, effectively tripling the amount of owner information reported.*

*The STO is addressing the increased demands on the Unclaimed Property Division's resources by utilizing technology. The STO has implemented an electronic reporting function which allows holders to submit their information on diskette. The diskette reporting requires much less time to upload to the unclaimed property management system than to manually key. This, along with increased automation in the claims process, should help the division shift additional resources to the entry of owner information.*

*The STO plans to use several methods to encourage companies to remit owners on diskette reports. The owner backlog will depend on the number of reports received on diskette and the amount of publicity unclaimed property receives statewide and nationally. The STO fully intends to manage resources to maximize the amount of money returned on a timely basis to the rightful owners.*

*The STO expects to have the owner backlog reduced to 90 days by July 1, 2000, and to be fully compliant with the audit recommendations, as of that date. However, as noted above, the issue of seeking additional FTEs to address the increasing demands on the Unclaimed Property Division, due to increased national awareness and changes in the law, may need to be revisited in the future.*

*This report is intended for the information of the management of the Office of State Treasurer and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.*

## Follow-Up on State Auditor's Prior Recommendations

OFFICE OF STATE TREASURER  
FOLLOW-UP ON STATE AUDITOR'S PRIOR RECOMMENDATIONS

This section reports follow-up action taken by the Office of State Treasurer on recommendations made in the Management Advisory Report (MAR) of our report issued for the year ended June 30, 1998. The prior recommendation which has not been implemented is repeated in the current MAR.

1. Bank Reconciliations

The Electronic Receipt/ Payment Account was not reconciled on a timely basis.

Recommendation:

The STO ensure reconciliations of all bank accounts are done on a timely basis.

Status:

Not implemented. The daily reconciliations were performed through July 23, 1999, but were not performed again until December 1999. See MAR No. 1.

2. Abandoned Fund Account Fund Transfers

The transfer of excess balances from the Abandoned Fund Account Fund to the state's General Revenue Fund was not performed as required by state law.

Recommendation:

The STO continue to monitor the cash balance of the Abandoned Fund Account Fund and ensure that the necessary transfer is made at least once each fiscal year to reduce the balance to the level required by state law.

Status:

Implemented.

3. Missouri First Linked Deposit Program

Audits and other reviews of deposits and loans related to several components of the Missouri First Linked Deposit Program were not being performed on a timely basis or in accordance with written procedures.

Recommendation:

The STO ensure that audits and other reviews of the Missouri First Linked Deposit Program are performed on a timely basis. In addition, the audits should conform to the STO's written guidelines.

Status:

Implemented.

## STATISTICAL SECTION

History, Organization, and  
Statistical Information

## OFFICE OF STATE TREASURER HISTORY, ORGANIZATION, AND STATISTICAL INFORMATION

The Office of State Treasurer is an elective office as provided in the Missouri Constitution. The duties of the State Treasurer as defined by Article IV Section 15 are to be the custodian of all state funds; to determine the amount of state monies not needed for current operating expenses; and to invest such monies in interest bearing time deposits, in Missouri banking institutions selected by the State Treasurer and approved by the Governor and State Auditor, in short-term U. S. government securities, or in certain allowable commercial paper and banker's acceptances.

The Office of State Treasurer operates in four major functional areas: 1) accounting and banking services; 2) disbursements and records; 3) investments and deposit programs; and 4) unclaimed property.

The accounting and banking services area: 1) maintains a fund accounting system for the purpose of allocating investment interest to funds; 2) maintains ledger controls on fund balances and appropriations to assure that no check is issued that exceeds the lawful appropriated balances; 3) controls receipt of state monies collected by fee agents and state agencies and deposited in local banks throughout the state; 4) reconciles bank activity to receipt and disbursement activity reflected on the state books; and 5) determines the amount of state monies not needed for current operating expenses.

The disbursements and records area provides processing support to other departments of the State Treasurer's office, as follows: 1) confirms daily disbursements with the bank as certified by the Office of Administration; 2) provides storage and retrieval of state checks; and 3) controls and processes outlawed checks and processes and verifies claims for replacement checks.

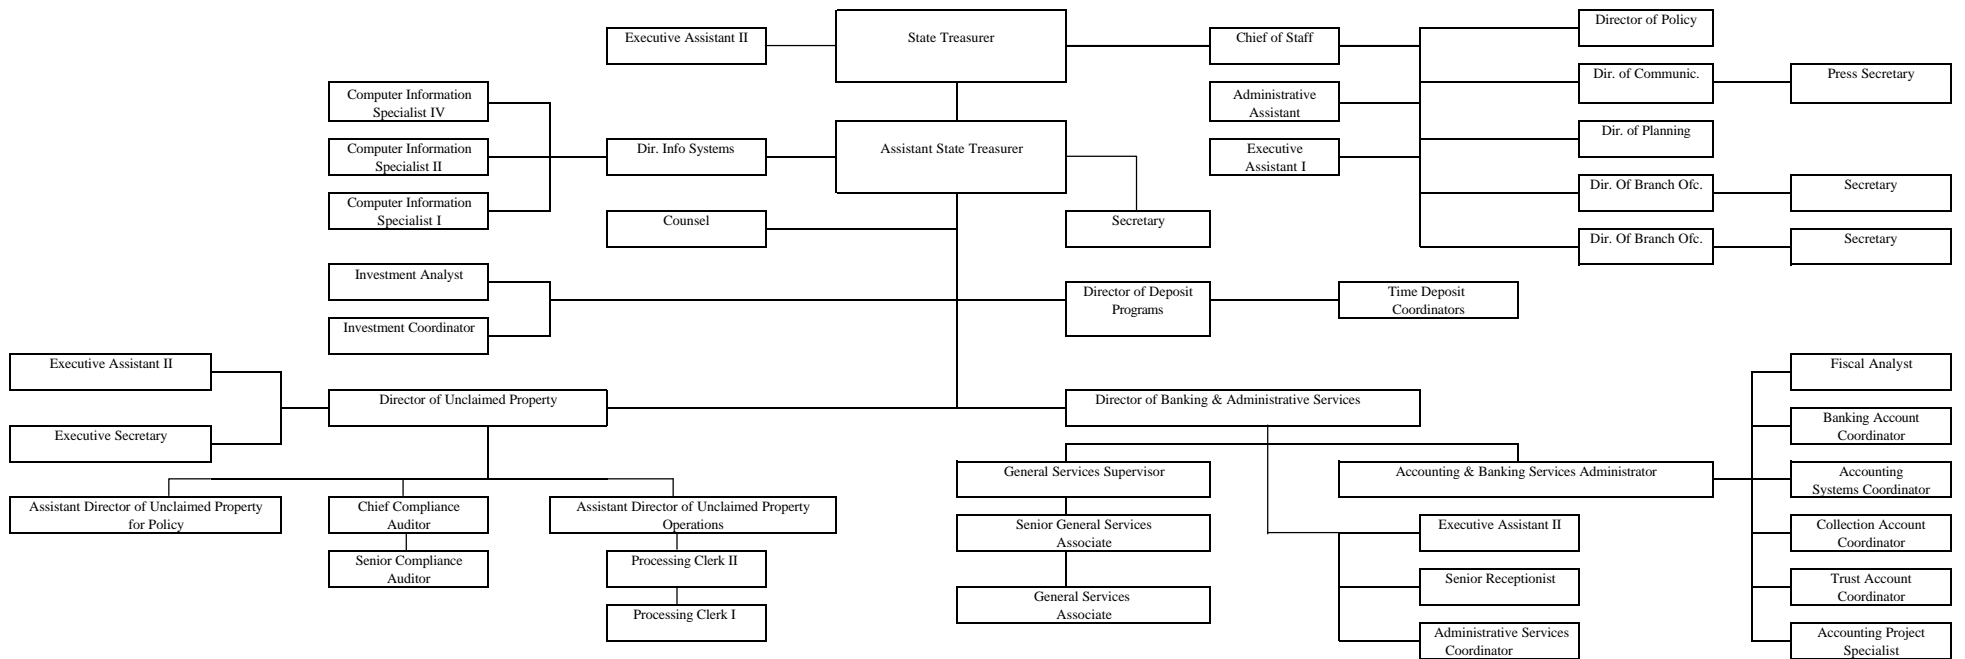

The investments area places state monies not needed for current operating expenses in interest-bearing time deposits, U.S. government and agency securities, commercial paper, banker's acceptances, and repurchase agreements. This area also administers the State Treasurer's statutory linked deposit program and monitors and accounts for the collateralization of state funds.

The Unclaimed Property Section administers Missouri's Unclaimed Property Act (Chapter 447 RSMo). The Unclaimed Property Section is responsible for: 1) ensuring unclaimed property is reported; 2) receiving and recording reports of unclaimed property; 3) depositing unclaimed funds to the Abandoned Fund Account Fund; 4) maintaining custody and safekeeping of abandoned or unclaimed physical property; and 5) processing owner claims for abandoned funds or physical property.

On January 13, 1997, Bob Holden was inaugurated for his second term as the forty-second Treasurer of the state of Missouri. Bob Holden's term will expire in January 2001.

As of June 30, 1999, the office had forty-five full-time and six part-time employees. An organization chart follows.

# AUDIT REPORT

Report No. 2000-34  
May 12, 2000  
[www.auditor.state.mo.us](http://www.auditor.state.mo.us)

Office Of The  
State Auditor Of Missouri  
Claire McCaskill

May 2000

**The following findings were noted as a result of an audit conducted by our office of the General Assembly – Senate.**

---

The Senate does not have written job descriptions for many support staff employment positions and does not periodically evaluate many support staff employees. The Senate support staff personnel policy does not address how leave should be requested, approved, and documented, and these employees are not required to prepare time sheets. There is no personnel policy for senators' personal staff and there are not centralized leave records for these employees.

There is no segregation of duties over the payroll function, with the Senate payroll clerk handling all payroll duties. In addition, personnel files are not complete and various problems were noted pertaining to accumulated leave and the related records.

The Senate has not established a written procurement policy. Also, during the three years ended June 30, 1999, the Senate authorized the purchase and delivery of over \$150,000 in postage stamps to the various senators to be used for official business. No controls have been implemented to ensure the postage stamps are used properly or that any unused stamps are returned. In addition, the Senate printed calendars for distribution by most of the senators at a cost totaling \$21,750 for the three years ended June 30, 1999.

During the audit period, the Senate sold used office furniture and equipment items with an original acquisition cost of approximately \$52,000 to senators, their staff, or outside parties for approximately \$6,800. The Senate has not established a policy on how to value these items for sale. It was recommended that the Senate consider turning all used assets being disposed of over to State Surplus Property.

---

**Most of the findings reported had also been reported in the previous audit of the Senate (covering the three years ended June 30, 1993) with the exception of the following:**

Our previous audit noted the Senate did not reconcile its manual postage meter usage log to the computer log attached to the postage meter, and the balance of postage on the postage meter on account at the post office appeared to be excessive based on the amount of postage used annually.

(over)

YELLOW SHEET

We recommended the manual log be reconciled to the computer log to ensure the postage meter usage was properly recorded to each senator's allowance. Furthermore, we recommended that the postage balances be monitored in all postage accounts. The Senate did implement these recommendations.

Also noted in the previous audit report, we found documentation of prior approval was not found for all out-of-state trips. Administration Committee policy in the Senate required prior approval for all out-of-state travel. It was recommended that the Senate document prior approval of out-of-state travel in the committee's minutes. This recommendations has also been implemented.

## FINANCIAL SECTION

## State Auditor's Reports

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

**INDEPENDENT AUDITOR'S REPORT ON  
THE FINANCIAL STATEMENTS**

Members of the Senate  
Jefferson City, Missouri 65102

We have audited the accompanying special-purpose financial statements of the various funds of the Senate as of and for the years ended June 30, 1999, 1998, and 1997, as identified in the table of contents. These special-purpose financial statements are the responsibility of the Senate's management. Our responsibility is to express an opinion on these special-purpose financial statements based on our audit.

We conducted our audit in accordance with generally accepted auditing standards and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the special-purpose financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the special-purpose financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

The accompanying special-purpose financial statements were prepared for the purpose of presenting the receipts, disbursements, and changes in cash and investments of the Senate Revolving Fund, and the appropriations and expenditures of the various funds of the Senate and are not intended to be a complete presentation of the financial position and results of operations of the various funds of the Senate.

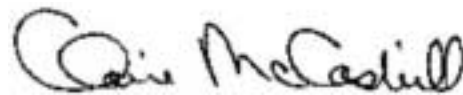

In our opinion, the special-purpose financial statements referred to in the first paragraph present fairly, in all material respects, the receipts, disbursements, and changes in cash and investments of the Senate Revolving Fund, and the appropriations and expenditures of the various funds of the Senate as of and for the years ended June 30, 1999, 1998, and 1997, in conformity with

the comprehensive bases of accounting discussed in Note 1, which are bases of accounting other than generally accepted accounting principles.

In accordance with *Government Auditing Standards*, we also have issued our report dated October 22, 1999, on our consideration of the Senate's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grants.

Our audit was made for the purpose of forming an opinion on the special-purpose financial statements, taken as a whole, that are referred to in the first paragraph. The accompanying financial information listed as supplementary data in the table of contents is presented for purposes of additional analysis. Such information has been subjected to the auditing procedures applied in the audit of the special-purpose financial statements and, in our opinion, is fairly stated in all material respects in relation to the special-purpose financial statements taken as a whole.

The accompanying History, Organization, and Statistical Information is presented for informational purposes. This information was obtained from the Senate's management and was not subjected to the auditing procedures applied in the audit of the special-purpose financial statements referred to above.

Claire McCaskill  
State Auditor

October 22, 1999 (fieldwork completion date)

**Missouri State Auditor**

**INDEPENDENT AUDITOR'S REPORT ON COMPLIANCE  
AND ON INTERNAL CONTROL OVER FINANCIAL REPORTING**

Members of the Senate  
Jefferson City, Missouri 65102

We have audited the special-purpose financial statements of the Senate as of and for the years ended June 30, 1999, 1998, and 1997, and have issued our report thereon dated October 22, 1999. We conducted our audit in accordance with generally accepted auditing standards and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States.

Compliance

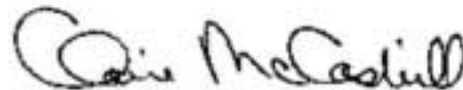

As part of obtaining reasonable assurance about whether the special-purpose financial statements of the Senate are free of material misstatement, we performed tests of the Senate's compliance with certain provisions of laws, regulations, contracts, and grants, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance.

Internal Control Over Financial Reporting

In planning and performing our audit of the special-purpose financial statements of the Senate, we considered the Senate's internal control over financial reporting in order to determine our auditing procedures for the purpose of expressing our opinion on the special-purpose financial statements and not to provide assurance on the internal control over financial reporting. However, we noted certain matters involving the internal control over financial reporting and its operation that we consider to be reportable conditions. Reportable conditions involve matters coming to our attention relating to significant deficiencies in the design or operation of the internal control over financial reporting that, in our judgment, could adversely affect the Senate's ability to record, process, summarize, and report financial data consistent with the assertions of management in the special-purpose financial statements.

A material weakness is a condition in which the design or operation of one or more of the internal control components does not reduce to a relatively low level the risk that misstatements in amounts that would be material to the special-purpose financial statements being audited may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions. Our consideration of the internal control over financial reporting would not necessarily disclose all matters in the internal control that might be reportable conditions and, accordingly, would not necessarily disclose all reportable conditions that are also considered to be material weaknesses. However, we noted certain matters involving the internal control over financial reporting and its operation that we consider to be material weaknesses, and these matters are presented in the accompanying Management Advisory Report.

This report is intended for the information of the management of the Senate and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

A handwritten signature in dark ink, appearing to read "Claire McCaskill". The signature is fluid and cursive, with the first name "Claire" and last name "McCaskill" clearly distinguishable.

The accompanying Note to the Supplementary Data is an integral part of this statement.

## Notes to the Financial Statements and Supplementary Data

GENERAL ASSEMBLY AND SUPPORTING FUNCTIONS  
SENATE  
NOTES TO THE FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

Notes to the Financial Statements:

1. Summary of Significant Accounting Policies

A. Reporting Entity and Basis of Presentation

The accompanying special-purpose financial statements present only selected data for each fund of the Senate.

Receipts, disbursements, and changes in cash and investments are presented in Exhibit A for the Senate Revolving Fund. Appropriations from this fund are expended by or for the Senate for restricted purposes.

Appropriations, presented in Exhibit B, are not separate accounting entities. They do not record the assets, liabilities, and equities of the related funds but are used only to account for and control the Senate's expenditures from amounts appropriated by the General Assembly.

Expenditures presented for each appropriation may not reflect the total cost of the related activity. Other direct and indirect costs provided by the Senate and other state agencies are not allocated to the applicable fund or program.

B. Basis of Accounting

The Statement of Receipts, Disbursements, and Changes in Cash and Investments, Exhibit A, prepared on the cash basis of accounting, presents amounts when they are received or disbursed.

The Statement of Appropriations and Expenditures, Exhibit B, is presented on the state's legal budgetary basis of accounting which recognizes expenditures on the encumbrance method. Expenditures include amounts payable or encumbered at June 30 and paid during the lapse period, which ends August 31 for regular appropriations and December 31 for capital improvement appropriations. The authority to expend appropriations ends with the close of the lapse period. However, the General Assembly may authorize reappropriation of the unexpended balances of capital improvement appropriations for the following year. The General Assembly also may authorize biennial capital improvement appropriations, for which the unexpended balances at June 30 of the first year of the two-year period are reappropriated for expenditure during the second year.

The cash basis of accounting and the budgetary basis of accounting differ from generally accepted accounting principles, which require revenues to be recognized when they become available and measurable or when they are earned and expenditures or expenses to be recognized when the related liabilities are incurred.

C. Fiscal Authority and Responsibility

The Senate administers transactions in the funds listed below. The state treasurer as fund custodian and the Office of Administration provide administrative control over fund resources within the authority prescribed by the General Assembly.

Senate Revolving Fund: This fund was established by Section 21.235, RSMo 1994, to receive funds paid or transferred to the Senate for printing, duplicating, postage, computer services, surplus property sales, refunds from vendors, personal reimbursements, or any other goods or services for which a fee is charged. Expenditures are authorized by appropriation and by the Senate Administration Committee. The unexpended balance exceeding \$5,000 at the end of the biennium is transferred to the General Revenue Fund-State.

General Revenue Fund-State: The Senate receives appropriations from this fund and does not maintain a proprietary interest in the fund. Appropriations from the fund are used for the basic operation of the Senate, including those programs and services that have no other funding source. These appropriations also may be used to initially fund, or to provide matching funds or support for, programs paid wholly or partially from other sources.

D. Employee Fringe Benefits

In addition to the social security system, employees are covered by the Missouri State Employees' Retirement System (MOSERS) (a noncontributory plan) and may participate in the state's health care, optional life insurance, deferred compensation, and cafeteria plans. The optional life insurance and cafeteria plans involve only employee contributions or payroll reductions. Also, the deferred compensation plan involves employee payroll deferrals and a monthly state matching contribution for each participating employee.

The state's required contributions for employee fringe benefits are paid from the same funds as the related payrolls. Those contributions are for MOSERS (retirement, basic life insurance, and long-term disability benefits); social security and medicare taxes; health care premiums; and the deferred compensation plan match.

Transfers related to salaries are not appropriated by agency and thus are not presented in the financial statement at Exhibit B.

2. Cash

The balance of the Senate Revolving Fund is pooled with other state funds and invested by the state treasurer.

3. Transfers to General Revenue Fund-State

In accordance with Section 21.235, RSMo 1994, the unexpended balance of the Senate Revolving Fund not exceeding \$5,000 is exempt from the provisions of Section 33.080, RSMo 1994. That statute states the state treasurer will make a biennial transfer of unexpended funds to the state's General Revenue Fund. The amount presented for the year ended June 30, 1998, represents the excess balance over \$5,000, and the fund's proportional share of fiscal year 1996 and 1995 refunds required by Article X, Section 18 of the Missouri Constitution. The amounts presented for the years ended June 30, 1999 and 1997, represent fiscal year 1997 refunds required by Article X, Section 18 of the Missouri Constitution and an adjustment made to correct a previous transfer, respectively.

4. Reconciliation of Total Disbursements to Appropriated Expenditures

Disbursements on Exhibit A reconcile to appropriated expenditures of the Senate Revolving Fund on Exhibit B as follows:

|                                   |    | Year Ended June 30, |          |               |
|-----------------------------------|----|---------------------|----------|---------------|
|                                   |    | 1999                | 1998     | 1997          |
| DISBURSEMENTS PER EXHIBIT A       | \$ | 1,966               | 107,668  | 1,001         |
| Lapsed period expenditures - 1997 |    | 0                   | (30,060) | 30,060        |
| Transfers                         |    | (1,966)             | (77,608) | (1,001)       |
| EXPENDITURES PER EXHIBIT B        | \$ | <u>0</u>            | <u>0</u> | <u>30,060</u> |

5. Other Collections

As part of hosting the 1996 Annual Meeting of the National Conference of State Legislatures (NCSL) in St. Louis, the Missouri General Assembly established the Missouri Host State Committee (Committee) to raise funds necessary to cover the projected expenses of the meeting. The NCSL acted as the fiscal agent of the Committee and in that capacity received all revenues and paid all expenses related to the meeting.

In fiscal year 1995, the Missouri General Assembly approved a joint appropriation to cover the projected in-state expenses of both the Senate and House of Representatives, (ie. staff payroll, travel, supplies, phone charges, rentals, etc.) related to conducting and hosting the meeting. These expenses were to be reimbursed by the NCSL from any remaining funds after all other expenses of the annual meeting had been paid.

After the conclusion of the meeting and the finalization of the Committee's responsibilities in hosting the meeting, it was determined Senate staff had incurred expenses totaling \$228,035. This amount was reimbursed by the NCSL and received during the year ended June 30, 1997. Of this amount, \$47,541 was deposited into the Senate Revolving Fund and the remaining \$180,494 was transmitted to the General Revenue Fund-State. The monies turned over directly to the General Revenue Fund-State are not presented in the financial statements.

Note to the Supplementary Data:

6. General Fixed Assets

General fixed assets, which are recorded as expenditures when acquired, are capitalized at cost in the General Fixed Assets Account Group and are not depreciated.

## MANAGEMENT ADVISORY REPORT SECTION

Management Advisory Report -  
State Auditor's Current Recommendations

GENERAL ASSEMBLY AND SUPPORTING FUNCTIONS  
SENATE  
SUMMARY OF FINDINGS

1. Personnel Policies (pages 21-23)

The Senate does not have written job descriptions for many support staff employment positions and does not periodically evaluate many support staff employees. The Senate support staff personnel policy does not address how leave should be requested, approved, and documented and these employees are not required to prepare time sheets. There is no personnel policy for senators' personal staff and there are no centralized leave records for these employees.

2. Payroll Records and Procedures (pages 23-26)

Payroll duties are not properly segregated and personnel files are not always complete. Leave records are not maintained for some senate support staff and leave records are not submitted to the payroll clerk in a timely manner. Some employees have been allowed to retain and accumulate a significant amount of annual leave in excess of the leave policy limits, while other employees were allowed to accrue negative annual, sick, and compensatory leave balances.

3. Expenditures (pages 26-28)

The Senate has not established a written procurement policy. A significant amount of postage stamps were purchased and delivered to the various senators without controls in place to ensure they were used for official business. Approximately \$21,750 was spent printing calendars for senators to send to friends and constituents.

4. Sale of Surplus Property (page 28)

Used office furniture and equipment is sold to senators, their staff, and outside parties for significantly less than the original requisition costs, instead of surplusizing it for use by state agencies.

GENERAL ASSEMBLY AND SUPPORTING FUNCTIONS  
SENATE  
MANAGEMENT ADVISORY REPORT -  
STATE AUDITOR'S CURRENT RECOMMENDATIONS

We have audited the special-purpose financial statements of the Senate as of and for the years ended June 30, 1999, 1998, and 1997, and have issued our report thereon dated October 22, 1999.

The following Management Advisory Report presents our findings and recommendations arising from our audit of the Senate's special-purpose financial statements. During our audit, we also identified certain management practices which we believe could be improved. Our audit was not designed or intended to be a detailed study of every system, procedure, and transaction. Accordingly, the findings presented in the following report should not be considered as all-inclusive of areas where improvements may be needed.

|           |                           |
|-----------|---------------------------|
| <b>1.</b> | <b>Personnel Policies</b> |
|-----------|---------------------------|

The Senate has two groups of employees. Senate support staff work for the Senate overall. Research analysts, print shop employees, accounting staff, maintenance employees, and the Senate carpenter are examples of senate support staff. Senators' personal staff work exclusively for a senator. Attorneys and secretaries are examples of senators' personal staff. The following concerns were noted in our review of the Senate's personnel policies:

- A. The Senate does not have written job descriptions to document the responsibilities and qualifications for many Senate support staff employment positions. In addition, we noted written performance appraisals are not prepared periodically to evaluate the performance of many support staff employees.

Job descriptions are necessary to ensure that individuals are aware of their duties and responsibilities and are qualified for the position for which they are hired. In addition, job descriptions can be used as objective criteria in the evaluation of potential employees. Written performance appraisals can lead to improvement in employee performance, and may be used to evaluate employees for salary increases, promotions, and other personnel actions.

- B. The Senate has a personnel policy addressing the accrual, use, and lapsing of annual leave, sick leave, and compensatory time for support staff; however, the policy does not address how the use of leave should be requested, approved, and documented (ie. leave slips). In addition, support staff are not required to prepare time sheets documenting hours worked and/or leave taken.

Proper control over payroll requires documentation, such as time sheets or leave slips, signed by the employees and approved by their supervisors, to provide evidence of time worked and/or leave taken each month.

- C. There is no personnel policy for senators' personal staff and there is no centralized record of leave earned and taken by personal staff. Each senator is responsible for maintaining time sheets and/or leave records for their employees. Upon termination or at other times throughout the year, each senator decides what amount, if any, of annual leave or overtime to pay their personal staff. During our review, we noted several extra payments ranging from \$200 to \$3,500 to senators' personal staff for accumulated leave or overtime. The only documentation provided to the Senate authorizing this extra compensation is a letter from the senator.

A written personnel policy for personal staff employees is necessary to provide assurance employees are treated equitably and to prevent misunderstandings. In addition, without centralized records, the Senate cannot ensure that employees' annual leave, sick leave, and compensatory time balances are accurate. Centralized leave records also aid in determining final compensation for employees leaving Senate employment.

Conditions B. and C. were similarly noted in the prior report.

**WE RECOMMEND** the Senate:

- A. Prepare written job descriptions that establish the responsibilities and qualifications for all support staff positions. In addition, written performance appraisals should be prepared for each support staff employee on a periodic basis.
- B. Revise the personnel policy for support staff to provide guidance as to how the use of leave should be requested, approved, and documented (ie. leave slips). In addition, support staff should be required to prepare monthly time sheets documenting hours worked and/or leave taken.
- C. Establish a written personnel policy for senators' personal staff. In addition, the payroll records for all Senate employees should be centralized, with personal staff required to submit time sheets or leave slips.

**AUDITEE'S RESPONSE**

- A. *With the exception of some of the professional staff, the Senate does not maintain written job descriptions for many support staff positions. As support staff openings arise, an evaluation is done to determine the skills or qualifications needed to fulfill the responsibilities of the particular job being filled. New support staff are made aware of their responsibilities and how they are expected to fulfill them when hired. Written performance*

*appraisals can be useful if developed and administered properly. The identification of appropriate performance dimensions for each job and the establishment of appropriate performance standards for each dimension is key to the development of accurate performance measures. The Senate agrees to review current policy for potential improvements in employee development and performance measurement.*

*B&C. Senators do their own staffing. Senators establish the working hours, duties, salary, and any leave accrual rates for their employees. Therefore, it has not been practical for us to maintain leave records for this group of employees.*

*Accumulated leave which is to be paid upon termination is generally documented with a letter from the senator with the stipulation that supporting documentation be available upon request. Any accumulated leave reimbursement is limited to the maximum that could have been accrued by a support staff employee with comparable state service.*

*The Senate typically does not allow overtime payments. Previously when such payments were allowed they were required to be documented with a letter with the stipulation that supporting documentation be available upon request.*

*As to extra payments made to senators' salaried personal staff, the overtime reimbursements noted by your staff took place in 1996 and were for one senator's staff. The other extra payments noted in your review can be classified as either corrections or adjustments. The corrections were typically a result of salary not being adjusted when a change was to take place (i.e., a new rate was not correctly entered on the payroll when it should have taken effect). The adjustments were relatively minor fluctuations in pay authorized by the senator on his employee authorization form; some were increases while some were decreases.*

*The Senate recognizes the importance of the consistent interpretation and application of agency personnel policies across employee groups. With the upcoming implementation of the HR/Personnel phase of SAM II, we plan to perform a thorough review of our current personnel policies and procedures for both support staff and senators' personal staff during the upcoming interim.*

## **2.**

### **Payroll Records and Procedures**

A. There is no segregation of duties to provide necessary internal controls over the payroll function. The Senate payroll clerk handles all payroll duties including payroll preparation, record keeping, timekeeping, disbursing payroll checks, distributing employee W-2s, and maintaining the personnel files. While the Secretary of the Senate and the President Pro Tem review and approve the payroll processed, this does not appear to be a sufficient independent review of the payroll function considering the various duties performed by the payroll clerk.

A proper segregation of duties provides a means of establishing controls over assets, thus minimizing the risk for loss, theft, or misuse of funds. If segregation of duties is not possible, the comparison of the payroll disbursements to the payroll requisition by an independent individual would provide another supervisory review to minimize the risk for loss, theft, or misuse of funds.

- B. Personnel files maintained by the payroll clerk are not complete. The personnel files do not contain all employee authorizations of withholdings and deductions (ie. W-4 forms, forms for insurance deductions, etc.) or signed payroll transaction records.

Complete personnel files should be maintained to adequately document each individual's employment status and pay information, including authorization of withholdings and deductions, and to avoid possible errors and misunderstandings.

- C. Senate support staff are required to maintain records of leave and compensatory time earned, accumulated, and used. These records are submitted to the payroll clerk who posts them to the employee's accumulated leave records. During our review of these records, we noted the following concerns:

- 1) Leave records are not maintained for the Senate Administrator, the Director of Operations, or the Secretary of the Senate. Without these records, the Senate cannot adequately monitor leave taken and would be unable to determine the amount of leave to be paid upon termination.
- 2) Leave records for many support staff are not submitted to the Senate payroll clerk in a timely manner (ie. monthly) as required by the Senate's leave policy. According to Senate personnel, records for some employees have not been submitted and updated for approximately three years; therefore, complete and accurate accumulated leave balances are not being maintained.
- 3) The Senate has established a leave policy whereby employees are not allowed to accumulate annual leave in excess of the maximum amount which can be earned in two years, and does not allow for carryover of more than that amount. However, at June 30, 1999, a number of support staff employees had accumulated annual leave that exceeded the maximum allowed by that policy. We noted 23 employees with leave exceeding the limit by a total of 3,366 hours. For one employee, the annual leave balance exceeded the limit by 837 hours.

As a result, the Senate is not in compliance with its policy regarding the accumulated annual leave limits. Allowing the accumulated leave limits to be exceeded could result in additional costs to the state.

- 4) The Senate has allowed employees to accrue negative balances for annual leave, sick leave, and compensatory leave. At June 30, 1999, one employee had a negative annual leave balance totaling 91 hours, two employees had negative sick leave balances totaling 594 hours, and two employees had negative compensatory leave totaling 9 hours. The employees accruing negative sick leave and negative compensatory leave had accrued annual leave they were not required to take.

The Senate's leave policy requires that leave be earned prior to the time it is taken. All available leave should be used, rather than allowing employees to accrue negative leave balances. Should an employee require leave in excess of their balances, it appears the employee should be placed on leave without pay status.

Complete and accurate accumulated leave records, updated timely, allow for leave balances to be adequately monitored to ensure employees are not incurring a negative leave balance and employees are not accumulating leave in excess of the maximum balance allowed. In addition, such leave records provide support for the amount of accumulated leave to be paid to an employee upon termination.

Conditions similar to those noted above were also noted in the prior report.

**WE RECOMMEND** the Senate:

- A. Adequately segregate duties related to the payroll function. At a minimum, an adequate independent review of the duties performed by the payroll clerk should be performed on a periodic basis.
- B. Maintain complete personnel files, including employee authorization of withholdings and deductions and a record of all authorized payroll transaction records.
- C. Ensure all employees submit leave records on a timely basis and maintain complete and accurate accumulated leave records. In addition, leave balances should be monitored to ensure the established leave policies are being followed.

**AUDITEE'S RESPONSE**

- A. *We believe our payroll function has a more than sufficient independent review and approval process. In addition to the Secretary of Senate and President Pro Tem's formal review and approval of the payroll, the Administrator and the Assistant Director of General Operations review the payroll prior to it being submitted. Furthermore, each month the accounting staff reconciles the employees' payroll authorizations with the current earnings register. (Started 1/99).*

*We agree that the lack of segregation of duties of the payroll clerk has been less than optimal. Revisions in our payroll procedures were already planned for the interim to accommodate SAM II, Phase II. Effective immediately, another staff person will assist the payroll clerk by comparing the checks with the requisition and then distributing the checks to alleviate any perceived weakness in control.*

- B. With regard to the personnel files, the exceptions noted resulted from a change in our payroll processing procedures and a back log of filing which has since been updated. Since going on-line with our payroll processing, some of the input documents which were formerly hard copy with signature lines are not longer used. Currently, information is entered directly on-line and the resulting output documents once received are filed. We will review our processing procedures for possible changes to improve our documentation trail.*
- C. We will reinforce the importance of the timely submission of leave reports for all employees during the interim. We will also make an effort to clarify any questions which may exist or arise with regard to the handling of certain leave situations.*

|                        |
|------------------------|
| <b>3. Expenditures</b> |
|------------------------|

During our review of expenditures, we noted the following concerns:

- A. The Senate manages its own purchasing functions. Section 34.010, RSMo 1994, exempts legislative departments from the procurement and bidding requirements which apply to most state agencies. While it appears most of the purchases reviewed were handled in an appropriate manner, the Senate has not established a written procurement policy.

Formal bidding procedures for major purchases provide a framework for economical management of state resources and help ensure fair value is received by contracting with bidders offering the best service and quality for the lowest cost. Competitive bidding helps ensure all parties are given an equal opportunity to participate in the Senate's business. Various bidding approaches are appropriate, based on dollar amount and type of purchase. Whichever approach is used, complete documentation should be maintained of all bids received and reasons noted why the bid was selected. A written bid policy would clarify the Senate's intentions and provide employees with a policy to follow.

- B. During the three years ended June 30, 1999, the Senate passed resolutions authorizing the Senate Administrator to purchase and deliver postage stamps to the various senators at a total cost of \$151,665, or an average of \$4,460 per senator. These resolutions required that the stamps be used for official business.

Senators have access to the Senate postage machine and receive a yearly allowance for meter postage. The postage machine provides a means to control the use of postage

stamps. However, there are no controls implemented to ensure the postage stamps purchased and distributed to the senators are used properly or that any unused stamps are returned to the Senate Administrator to be given to the new senator coming into office. The Senate does not keep a record of whether senators turn in stamps, or if so, how many. Therefore, it is difficult for the Senate to determine the disposition or use of any unused stamps.

- C. The Senate print shop printed calendars for distribution by most of the senators each year as follows:

| <u>Year Ended June 30,</u> | <u>Calendars Printed</u> |
|----------------------------|--------------------------|
| 1997                       | 20,325                   |
| 1998                       | 20,025                   |
| 1999                       | 18,450                   |

The Director of Purchasing estimated the material cost for the calendars for the three years ending June 30, 1999, totaled approximately \$21,750. This does not include the labor and postage costs that were incurred during the printing and mailing of these calendars.

While the cost of these calendars was less than that noted in the prior audit, it appears the benefits associated with providing these items may not merit the costs involved. The Senate has a responsibility of ensuring state resources are used for the benefit of the general public.

Similar conditions were also noted in the prior report.

**WE AGAIN RECOMMEND** the Senate:

- A. Develop a written procurement policy detailing bid requirements.
- B. Use the postage machine whenever possible and the use of postage stamps should be kept to a minimum. In addition, the Senate should maintain a log documenting the number of stamps returned by senators when they leave office.
- C. Discontinue the printing of calendars at state expense.

**AUDITEE'S RESPONSE**

- A. *Although exempt from state purchasing laws, we take our procurement and bidding responsibilities very seriously. We will look at developing written procurement procedures during the upcoming interim.*

- B. *We agree that the purchase of postage stamps for senators should be kept to a minimum due to the inherent lack of control over their use. This distribution of postage stamps continues due to the amount of correspondence sent from district offices.*

*Though a permanent record of stamps returned by senators leaving office is not kept, we do note the number of stamps received and recycle as many as possible (quantity of new stamps purchased reduced by the number of stamps returned) in the next stamp distribution. We agree that effective immediately a log will be kept documenting the number of stamps returned by senators when they leave office.*

- C. *The current Administration Committee has continued to follow the tradition of printing a limited number of calendars for distribution by senators that depict features of Missouri and its history. The Committee has felt that the calendars provide a useful service to citizens at a fairly minimal cost.*

|                                    |
|------------------------------------|
| <b>4. Sale of Surplus Property</b> |
|------------------------------------|

The Senate allows the sale of surplus property including used office furniture and equipment through the Senate Administrator's office. During the three years ended June 30, 1999, the Senate sold fixed assets with an original acquisition cost of approximately \$52,000 to senators, their staff, or outside parties for approximately \$6,800. The average age of these assets was eight years. Many of the purchases were to senators buying some of their office furniture or equipment when they left office. In addition, other senators purchased older items which were being replaced with new items. For example, we noted two computers with an average age of 3.25 years and a total original cost of \$2,378 were sold to a senator for approximately \$575. The Senate has not established a policy on how to value these items for sale and it may not be handling the disposition of these assets in the most cost efficient manner.

Although the extent of property sales to senators, their staff, and outside parties was less than that noted in the prior audit, the Senate should consider using State Surplus Property for disposing of all used assets. This procedure would allow the items to be used by state agencies or, if sold, would provide more assurance that fair value is obtained and all parties are given an equal opportunity to acquire these assets.

This condition was also noted in prior reports.

**WE AGAIN RECOMMEND** the Senate consider turning all used assets being disposed of over to State Surplus Property.

**AUDITEE'S RESPONSE**

*The Senate utilizes State Surplus Property on a regular basis for the disposition of idle/outdated assets and will continue to do so. The Administration Committee recently directed the Senate Administrator to cease the sale of surplus property to sitting senators.*

This report is intended for the information of the management of the Senate and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

## Follow-Up on State Auditor's Prior Recommendations

GENERAL ASSEMBLY AND SUPPORTING FUNCTIONS  
SENATE  
FOLLOW-UP ON STATE AUDITOR'S PRIOR RECOMMENDATIONS

This section reports follow-up action taken by the Senate on recommendations made in the Management Advisory Report (MAR) of our report issued for the three years ended June 30, 1993. The prior recommendations which have not been implemented, but are considered significant, have been repeated in the current MAR. Although the remaining unimplemented recommendations have not been repeated, the Senate should consider implementing these recommendations.

1. Payroll Procedures

- A. Neither the Senate support staff nor the senators' personal staff maintained time sheets showing hours worked and leave taken.
- B. The Senate had no policy for the senators' personal staff, and therefore, no record of leave earned and taken by personal staff.
- C.1. No leave records were maintained for the Senate Administrator, the Director of Operations, or the Secretary of the Senate. In addition, leave records for some employees were not turned in for posting on a timely basis.
- 2. Some support staff were allowed to accumulate annual leave in excess of established limits.
- 3. Some support staff had negative annual and sick leave balances.
- D. The Senate did not have a written policy regarding the employment of related personnel. In addition, the Senate did not maintain a list of related personnel.

Recommendation:

- A. Require all employees to maintain and submit time sheets of actual hours worked and leave taken.
- B. Establish written policies for annual, compensatory, and sick leave for senators' personal staff, and maintain records of leave earned and taken.
- C.1. Require all employees to submit monthly leave reports to the payroll clerk on a timely basis.
- 2&3. Follow established policies on the accrual of leave.

- D. Establish a written policy regarding the employment and supervision of related parties. In addition, the Senate should identify current related employees and review for evidence of incompatible job assignments.

Status:

A&B. Not implemented. See MAR No. 1.

C. Not implemented. See MAR No. 2.

- D. Partially implemented. The Senate still does not have a formal policy regarding the employment of related personnel; however, we noted no instances where an employee supervised a relative or where there was some other incompatible job assignment. Although not repeated in the current MAR, our recommendation remains as stated above.

2. Postage

- A. The Senate did not reconcile its manual postage meter usage log to the computer log attached to the postage meter.
- B. The Senate purchased over \$141,610 of stamps during the three years ended June 30, 1993, which were delivered to each senator to be used for official business. There were no controls over the usage of these stamps.
- C. The balance of postage on the postage meter or on account at the post office appeared to be excessive based on the amount of postage used annually.

Recommendation:

- A. Reconcile the manual log to the computer log to ensure postage meter usage is properly recorded to each senator's allowance.
- B. Use the postage machine whenever possible. The use of postage stamps should be kept to a minimum. In addition, the Senate should maintain a log listing the number of stamps returned by senators when they leave office.
- C. Monitor postage balances in all postage accounts to ensure only reasonable balances are maintained.

Status:

A&C. Implemented

B. Not implemented. See MAR No. 3.

3. Expenditures and Purchasing Procedures

- A. A written bid policy had not been established and instances noted where significant expenditures were made without bids being obtained.
- B. No written contract could be located to support \$128,000 in legal services.
- C. The Senate Administration Committee did not obtain detailed plans when pre-approving individual renovation projects. In addition, bids were not obtained for the renovation work.
- D. The Senate obtained phone credit cards from the old long distance carrier rather than the new carrier which had been awarded the state contract.

Recommendation:

- A. Develop a written bid policy detailing bid requirements.
- B. Ensure all consulting projects are supported by written contracts specifying duties to be performed and compensation to be paid.
- C. Require detailed budgets to be submitted for all renovation projects prior to approval by the committee, and obtain bids for the related work.
- D. Utilize the long-distance carrier awarded the state contract.

Status:

- A. Not implemented. A written bid policy has still not been established. See MAR No. 3.
- B. Partially implemented. We noted one consulting project which was not supported by a written contract; however, a resolution was adopted by the applicable joint committee specifying the initiation of the agreement, length of the agreement, and compensation. A copy of the resolution was forwarded to the consultant. Based on our review, it appears that billings for services rendered during the audit period were made in accordance with this resolution. Although, not repeated in our current MAR, our recommendation remains as stated above.
- C. Partially implemented. Detailed budgets were not obtained prior to approval; however, we noted that most renovations were either bid, the state contract was used, or a state agency performed the renovation. In addition, the actual costs incurred for these

renovations were comparable with the estimated costs previously approved by the Administrative Committee. Although, not repeated in our current MAR, our recommendation remains as stated above.

D. Implemented.

4. Administration Committee

- A. In 1992, additional staff were assigned to two senators not in leadership positions. There was no documentation in the Administrative Committee minutes authorizing these senators to hire additional staff and exceed their personal service allowance.
- B. Administration Committee policy required prior approval for all out-of-state travel. Documentation of prior approval was not found for all out-of-state trips.

Recommendation:

- A. Formally approve any additional staff allowed. Such approval should document why additional staff is needed. The salaries of additional staff should be added to the senator's personal service allowance to document compliance with the committee's decisions.
- B. Document prior approval of out-of-state travel in the minutes.

Status:

A&B. Implemented.

5. Use of State Resources

The Senate print shop printed calendars and Christmas cards for various senators at the state's expense.

Recommendation:

The Senate not provide or print Christmas cards and calendars at state expense. Additionally, the Senate should determine if any reimbursement to the state is necessary.

Status:

Partially implemented. Christmas cards are no longer printed; however, the Senate still spent approximately \$22,000, not including labor or postage, to print calendars during the current audit period. See MAR No. 3.

6. Sale of State Property

- A. Senators and their staff were allowed to purchase used office furniture and equipment through the Senate Administrator's office at prices significantly below the original acquisition cost.
- B. The Senate sold to local businesses in the Jefferson City area used typesetting equipment without advertising the sales. In addition, documentation of phone bids received for the equipment was not retained.

Recommendation:

The Senate consider turning used assets over to State Surplus Property.

Status:

Partially implemented. It appears the Senate has been turning more of its used assets over to State Surplus Property; however, senators, their staff, and others are still being allowed to purchase other used items at prices significantly below the original cost. See MAR No. 4.

## STATISTICAL SECTION

History, Organization, and  
Statistical Information

GENERAL ASSEMBLY AND SUPPORTING FUNCTIONS  
SENATE  
HISTORY, ORGANIZATION, AND STATISTICAL SECTION

Legislative power in Missouri is vested by Article III, Section 1 of the 1945 Constitution in the General Assembly, more commonly known as the legislature, composed of the Senate and the House of Representatives.

The Senate consists of thirty-four members who are elected for four-year terms. Senators from odd-numbered districts are elected in presidential election years. Senators from even-numbered districts are chosen in the "off-year" elections. Each senator must be at least thirty years of age, a qualified voter of the state for three years, and of the district he represents for one year. The lieutenant governor is president and presiding officer of the Senate. In his absence, the president pro tem, who is elected by the Senate members, presides. The Senate convenes annually on the first Wednesday following the first Monday in January and adjourns on May 30 with no consideration of bills after 6:00 p.m. on the first Friday after the second Monday in May.

Senate leadership positions are classified as either leadership or committee chairman. Senators in leadership positions include the president pro tem and the majority and minority floor leaders. Effective January 1, 1998, the assistant minority floor leader position receives the same allotments as a committee chairman position. In addition to their normal clerical hire, the president pro tem, majority floor leader, minority floor leader, the senior member of each party, and the chairman of the Appropriations Committee are allowed to hire an administrative assistant. The president pro tem is authorized to hire a secretary for his administrative assistant.

Senators received salaries as follows:

| <u>Positions</u>       |    | <u>Year Ended June 30,</u> |             |             |
|------------------------|----|----------------------------|-------------|-------------|
|                        |    | <u>1999</u>                | <u>1998</u> | <u>1997</u> |
| President pro tem      | \$ | 31,580                     | 30,136      | 29,302      |
| Floor leaders          |    | 30,580                     | 29,140      | 28,302      |
| All remaining senators |    | 29,080                     | 27,640      | 26,802      |

Senators were authorized per diems and mileage reimbursement as follows:

| <u>Effective Dates</u>              | <u>Per Diem</u> | <u>Mileage Rate</u> |
|-------------------------------------|-----------------|---------------------|
| July 1, 1996 - December 31, 1997    | \$35.00         |                     |
| January 1, 1998 - December 31, 1998 | 65.60           |                     |
| January 1, 1999 - December 31, 1999 | 68.80           |                     |
| July 1, 1996 - June 30, 1997        |                 | \$0.280             |
| July 1, 1997 - June 30, 1998        |                 | 0.285               |
| July 1, 1998 - June 30, 1999        |                 | 0.295               |

Each senator is paid a per diem each day the senator is in attendance at the legislative session. In addition, senators are reimbursed for each mile traveled when commuting to and from Jefferson City for each week the legislature is in session.

Senators receive various annual allowances to be utilized in the performance of their official duties. These allowances are established by the Administration Committee and are subject to the limitations imposed by the appropriation authorizing these expenditures. Maximum allowances have been set by category of expense with the provision that total expenditures for each senator do not exceed the maximum total allowance. In addition, with approval of the Administrative Committee, senators may spend over the maximum allowance by category or in total, carry unused allowances to subsequent years. The annual allowances for the year ended December 31, 1998 were as follows:

| Allowance                      | Leadership<br>Positions | Committee<br>Chairman<br>Positions | All<br>Remaining<br>Senators |
|--------------------------------|-------------------------|------------------------------------|------------------------------|
| Maximum allowance by category: |                         |                                    |                              |
| Personal service               | \$ 93,035               | 83,747                             | 76,581                       |
| Home office expense            | 7,200                   | 7,200                              | 7,200                        |
| Postage                        | 27,500                  | 27,500                             | 27,500                       |
| Travel                         | 4,800                   | 4,800                              | 4,800                        |
| Office expense                 | 2,000                   | 2,000                              | 2,000                        |
| Maximum Total Allowance        | \$ 108,521              | 96,705                             | 89,922                       |

The personal service allowance is used to pay the salaries of the senators' capitol and district staff. Expenses to maintain a district office, such as rent, telephone charges, and answering services are charged against the home office expense allowance. This postage allowance is primarily used to pay the cost of mailing newsletters. In addition, various senators received by senate resolution postage stamps totaling \$71,825, \$31,840, and \$48,000 during the fiscal years ended June 30, 1999, 1998, and 1997, respectively. Travel expenses incurred in connection with the duties of a state senator are reimbursable from the travel allowance and each senator is allowed to make office purchases of \$2,000 per year without being cleared through the Administration Committee. Each senator has a credit card for telephone calls regarding senate business when not at their capitol office.

The Senate determines its own rules and procedures, and rules may not be dispensed without at least one day's notice and only by a vote of at least a majority of the Senate. However, a rule may be suspended for a special purpose by a vote of a two-thirds majority of the members. This suspension shall remain only until the Senate proceeds to the consideration of business other than that for which the rule was suspended. The Senate is required to keep a daily journal (or record) of its proceedings. At the end of the session, the journals are bound by the Office of the Secretary of State.

The Senate receives appropriations for various commissions and committees as follows:

- A. The Missouri Commission on Interstate Cooperation (MCIC) was created by Chapter 16, RSMo 1994. The commission was repealed by statute in 1995; however, the Senate continues to receive appropriations to pay legislators' dues of professional organizations, approximating \$250,000 a year. The commission does not have a formal committee, rather it consists of two commissioners in which MCIC disburses approximately \$3,000 a year for both commissioners to attend annual Commission on Uniform State Law meetings.
- B. The Joint Committee on Administrative Rules (JCAR) was created by Section 536.037, RSMo Cumulative Supp. 1999. This committee is composed of five members each from the House of Representatives and Senate. The members are appointed by the president pro tem of the Senate and speaker of the House of Representatives for the respective bodies. The function of JCAR is to review all rules promulgated by state agencies after January 1, 1976, except rules promulgated by the Public Service Commission and the Labor and Industrial Labor Relations Commission.
- C. The Joint Committee on Public Employee Retirement (JCPER) was created by Section 21.553, RSMo 1994. The committee is composed of six members each from the House of Representatives and the Senate. The members are appointed by the president pro tem of the Senate and speaker of the House of Representatives for the respective bodies. The function of JCPER is to make a continuing study and analysis of all state and local government retirement systems, devise a standard reporting system for public employee retirement systems, determine the need for changes in statutory law, and make recommendations necessary to provide adequate retirement benefits to state and local government employees.
- D. The Joint Committee on Capital Improvements and Lease Oversight (JCCILO) was created by Concurrent Resolution No. 8 of the 84th General Assembly. This committee is composed of five members each from the House of Representatives and the Senate. The members are appointed by the president pro tem of the Senate and speaker of the House of Representatives for the respective bodies. The function of JCCILO is to review the design intent, scope, bids, contracts, and other pertinent information on capital improvement projects that may affect current capital spending and the development of future capital and/or operating appropriations.
- E. The Joint Committee on Economic Development Policy and Planning (JCEDPP) was created by Section 620.602, RSMo 1994. The committee is composed of five members each from the House of Representatives and the Senate. The members are appointed by the president pro tem of the Senate and speaker of the House of Representatives for the respective bodies. The function of the JCEDPP is to review the annual report produced by the Department of Economic Development, and plan, develop, and evaluate a long-term economic development policy for the state to ensure the state's competitive status with other states. This committee received no appropriations in fiscal years 1999 and 1998. This section of law expired on July 1, 1999.
- F. The Joint Committee on Health Care Policy and Planning (JHCPP) was created by Section 191.825, RSMo 1994. The committee is composed of five members each from the House of Representatives and the Senate. The members are appointed by the president pro tem of the

Senate and the speaker of the House for the respective bodies. The functions of JCHCPP are as follows: to monitor the effect of legislative action on health care services, analyze and develop policy proposals to improve the delivery of health care services, make recommendations for changes in the management or organization of the state agencies which provide or regulate the delivery of health care services, and develop health care plans for spending. This section of law is due to expire on December 31, 1999.

Five members of the Senate are appointed by the president pro tem to serve on the Administration Committee. This committee has sole control of all financial obligations and business affairs of the Senate. The committee employs an administrator. The administrator has general supervisory capacity over employees who prepare the Senate budget, maintain the accounting records, acquire machinery and supplies, control inventory, maintain the physical plant, prepare the payroll, coordinate renovation projects, pay bills, and provide objective, nonpartisan research to all members of the Senate.

The Senate has 34 senators and approximately 219 full-time employees.

GENERAL ASSEMBLY  
AND SUPPORTING FUNCTIONS

HOUSE OF REPRESENTATIVES

THREE YEARS ENDED JUNE 30, 1999

**From The Office Of State Auditor  
Claire McCaskill**

Report No. 2000-33  
May 12, 2000  
[www.auditor.state.mo.us](http://www.auditor.state.mo.us)

# AUDIT REPORT

Office Of The  
State Auditor Of Missouri  
Claire McCaskill

May 2000

**The following findings were noted as a result of an audit conducted by our office of the General Assembly - House of Representatives.**

---

Improvements were noted in the operations and procedures of the House of Representatives during the three years ended June 30, 1999. All the recommendations made in the previous audit of the House (covering the three years ended June 30, 1993) had been either fully or substantially implemented.

Current findings included:

- The personnel files of central staff employees did not contain any performance appraisals as required by House policy.
- There was not a policy regarding the employment and supervision of related parties. It was noted that a supervisory employee directly supervised two close relatives.
- During a review of the expenses accounts, we noted certain incidental or miscellaneous items claimed and reimbursed which may not follow guidelines established by the House. Also a limit has not been set on the number or dollar value that can be reimbursed for such things as memberships or subscriptions.

It appears the House policy needs to be more specific as to what incidental or miscellaneous items are reimbursable. In addition, the House should consider revising its policy to limit the number or amount of additional memberships and subscriptions that will be reimbursed to a representative.

In its responses to the related recommendations, the House indicated that it agrees performance appraisals lead to improvement in employee performance and are useful management tools. During the period covered by the audit, the House had discontinued the old "check-the-box" performance instrument and worked on developing a much improved appraisal instrument. All department directors, supervisors, and central staff have been evaluated under the new system. In addition, the House responded that new or revised related-party and expense account reimbursement policies have recently been adopted to address the concerns noted.

## FINANCIAL SECTION

## State Auditor's Reports

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

**INDEPENDENT AUDITOR'S REPORT ON  
THE FINANCIAL STATEMENTS**

Members of the House of Representatives  
Jefferson City, Missouri 65102

We have audited the accompanying special-purpose financial statements of the various funds of the House of Representatives as of and for the years ended June 30, 1999, 1998, and 1997, as identified in the table of contents. These special-purpose financial statements are the responsibility of the House's management. Our responsibility is to express an opinion on these special-purpose financial statements based on our audit.

We conducted our audit in accordance with generally accepted auditing standards and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the special-purpose financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the special-purpose financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

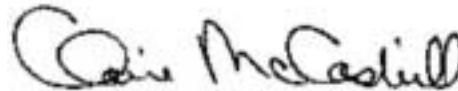

The accompanying special-purpose financial statements were prepared for the purpose of presenting the receipts, disbursements, and changes in cash and investments of the House of Representatives Revolving Fund; and the appropriations and expenditures of the various funds of the House of Representatives and are not intended to be a complete presentation of the financial position and results of operations of the various funds of the House.

In our opinion, the special-purpose financial statements referred to in the first paragraph present fairly, in all material respects, the receipts, disbursements, and changes in cash and investments of the House of Representative Revolving Fund; and the appropriations and expenditures of the various funds of the House of Representatives as of and for the years ended June 30, 1999, 1998, and 1997, in conformity with the comprehensive bases of accounting discussed in Note 1, which are bases of accounting other than generally accepted accounting principles.

In accordance with *Government Auditing Standards*, we also have issued our report dated December 3, 1999, on our consideration of the House's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grants.

Our audit was made for the purpose of forming an opinion on the special-purpose financial statements, taken as a whole, that are referred to in the first paragraph. The accompanying financial information listed as supplementary data in the table of contents is presented for purposes of additional analysis. Such information has been subjected to the auditing procedures applied in the audit of the special-purpose financial statements and, in our opinion, is fairly stated in all material respects in relation to the special-purpose financial statements taken as a whole.

The accompanying History, Organization, and Statistical Information is presented for informational purposes. This information was obtained from the House's management and was not subjected to the auditing procedures applied in the audit of the special-purpose financial statements referred to above.

A handwritten signature in dark ink, appearing to read "Claire McCaskill". The signature is fluid and cursive, with the first name "Claire" being more prominent than the last name "McCaskill".

Claire McCaskill  
State Auditor

December 3, 1999 (fieldwork completion date)

The following auditors participated in the preparation of this report:

**INDEPENDENT AUDITOR'S REPORT ON COMPLIANCE  
AND ON INTERNAL CONTROL OVER FINANCIAL REPORTING**

Members of the House of Representatives  
Jefferson City, Missouri 65102

We have audited the special-purpose financial statements of the House of Representatives as of and for the years ended June 30, 1999, 1998, and 1997, and have issued our report thereon dated December 3, 1999. We conducted our audit in accordance with generally accepted auditing standards and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States.

Compliance

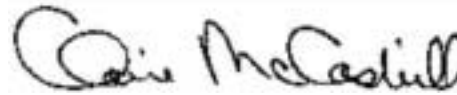

As part of obtaining reasonable assurance about whether the special-purpose financial statements of the House of Representatives are free of material misstatement, we performed tests of the House's compliance with certain provisions of laws, regulations, contracts, and grants, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance.

Internal Control Over Financial Reporting

In planning and performing our audit of the special-purpose financial statements of the House of Representatives, we considered the House's internal control over financial reporting in order to determine our auditing procedures for the purpose of expressing our opinion on the special-purpose financial statements and not to provide assurance on the internal control over financial reporting. Our consideration of the internal control over financial reporting would not necessarily disclose all matters in the internal control over financial reporting that might be material weaknesses. A material weakness is a condition in which the design or operation of one or more of the internal control components does not reduce to a relatively low level the risk that misstatements in amounts that would be material to the special-purpose financial statements being audited may occur and not be detected within a timely period by employees in the normal course of performing

their assigned functions. We noted no matters involving the internal control over financial reporting and its operation that we consider to be material weaknesses.

This report is intended for the information of the management of the House of Representatives and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

A handwritten signature in black ink, reading "Claire McCaskill". The signature is written in a cursive, flowing style.

| Balance, June 30, 1999 | \$ 5,769,393                  | 35,801   | 5,805,194 |

The accompanying Note to the Supplementary Data is an integral part of this statement.

## Notes to the Financial Statements and Supplementary Data

GENERAL ASSEMBLY AND SUPPORTING FUNCTIONS  
HOUSE OF REPRESENTATIVES  
NOTES TO THE FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

Notes to the Financial Statements:

1. Summary of Significant Accounting Policies

A. Reporting Entity and Basis of Presentation

The accompanying special-purpose financial statements present only selected data for each fund of the House of Representatives.

Receipts, disbursements, and changes in cash and investments are presented in Exhibit A for the House of Representatives Revolving Fund. Appropriations from this fund are expended by or for the House for restricted purposes.

Appropriations, presented in Exhibit B, are not separate accounting entities. They do not record the assets, liabilities, and equities of the related funds but are used only to account for and control the House's expenditures from amounts appropriated by the General Assembly.

Expenditures presented for each appropriation may not reflect the total cost of the related activity. Other direct and indirect costs provided by the House and other state agencies are not allocated to the applicable fund or program.

B. Basis of Accounting

The Statement of Receipts, Disbursements, and Changes in Cash and Investments, Exhibit A, prepared on the cash basis of accounting, presents amounts when they are received or disbursed.

The Statement of Appropriations and Expenditures, Exhibit B, is presented on the state's legal budgetary basis of accounting, which recognizes expenditures on the encumbrance method. Expenditures include amounts payable or encumbered at June 30 and paid during the lapse period, which ends August 31 for regular appropriations and December 31 for capital improvement appropriations. The authority to expend appropriations ends with the close of the lapse period. However, the General Assembly may authorize reappropriation of the unexpended balances of capital improvement appropriations for the following year. The General Assembly also may authorize biennial capital improvement appropriations, for which the unexpended balances at June 30 of the first year of the two-year period are reappropriated for expenditure during the second year.

The cash basis of accounting and the budgetary basis of accounting differ from generally accepted accounting principles, which require revenues to be recognized when they become available and measurable or when they are earned and expenditures or expenses to be recognized when the related liabilities are incurred.

C. Fiscal Authority and Responsibility

The House administers transactions in the funds listed below. The state treasurer as fund custodian and the Office of Administration provide administrative control over fund resources within the authority prescribed by the General Assembly.

House of Representatives Revolving Fund: This fund was established by Section 21.232, RSMo 1994, to receive funds paid or transferred to the House of Representatives for printing, duplicating, surplus property sales, refunds from vendors, personal reimbursements, or any other service for which a fee is charged. Expenditures are authorized by appropriation of the General Assembly and by the House of Representatives' Operations Committee. The unexpended balance exceeding \$5,000 at the end of the biennium is transferred to the General Revenue Fund-State.

General Revenue Fund-State: The House receives appropriations from this fund and does not maintain a proprietary interest in the fund. Appropriations from the fund are used for the basic operation of the House, including those programs and services that have no other funding source. These appropriations also may be used to initially fund, or to provide matching funds or support for, programs paid wholly or partially from other sources.

D. Employee Fringe Benefits

In addition to the social security system, employees are covered by the Missouri State Employees' Retirement System (MOSERS) (a noncontributory plan) and may participate in the state's health care, optional life insurance, deferred compensation, and cafeteria plans. The optional life insurance and cafeteria plans involve only employee contributions or payroll reductions. Also, the deferred compensation plan involves employee payroll deferrals and a monthly state matching contribution for each participating employee.

The state's required contributions for employee fringe benefits are paid from the same funds as the related payrolls. Those contributions are for MOSERS (retirement, basic life insurance, and long-term disability benefits); social security and medicare taxes; health care premiums; and the deferred compensation plan match.

Transfers related to salaries are not appropriated by agency and thus are not presented in the financial statement at Exhibit B.

2. Cash

The balance of the House of Representatives Revolving Fund is pooled with other state funds and invested by the state treasurer.

3. Reconciliation of Total Disbursements to Appropriated Expenditures

Disbursements on Exhibit A reconcile to appropriated expenditures of the House of Representatives Revolving Fund on Exhibit B as follows:

|                                 | Year Ended June 30, |               |               |
|---------------------------------|---------------------|---------------|---------------|
|                                 | 1999                | 1998          | 1997          |
| DISBURSEMENTS PER EXHIBIT A     | \$ 37,105           | 54,783        | 39,209        |
| Lapse period expenditures:      |                     |               |               |
| 1999                            | 895                 | 0             | 0             |
| 1998                            | 0                   | (1,142)       | 1,142         |
| 1997                            | 0                   | 0             | (1,599)       |
| Accounts payable, June 30, 1997 | 0                   | (626)         | 626           |
| Transfers                       | (1,107)             | (29,597)      | 0             |
| EXPENDITURES PER EXHIBIT B      | \$ <u>36,893</u>    | <u>23,418</u> | <u>39,378</u> |

4. Transfers to General Revenue Fund-State

In accordance with Section 21.232, RSMo 1994, the unexpended balance of the House of Representatives Revolving Fund not exceeding \$5,000 is exempt from the provisions of Section 33.080, RSMo 1994. That statute provides that the state treasurer will make a biennial transfer of unexpended funds to the state's General Revenue Fund. The transfer amount presented for the year ended June 30, 1998, represents the excess balance over \$5,000, and the fund's proportional share of fiscal year 1996 and 1995 refunds required by Article X, Section 18 of the Missouri Constitution. The transfer amount presented for the year ended June 30, 1999, represents fiscal year 1997 refunds required by Article X, Section 18 of the Missouri Constitution.

Note to the Supplementary Data:

5. General Fixed Assets

General fixed assets, which are recorded as expenditures when acquired, are capitalized at cost in the General Fixed Assets Account Group and are not depreciated.

## MANAGEMENT ADVISORY REPORT SECTION

Management Advisory Report -  
State Auditor's Current Recommendations

GENERAL ASSEMBLY AND SUPPORTING FUNCTIONS  
HOUSE OF REPRESENTATIVES  
SUMMARY OF FINDINGS

1. Personnel Matters (pages 21-22)

Performance appraisals have not been prepared for central staff in accordance with House policy. The House does not have a policy regarding the employment and supervision of related parties.

2. Expense Reimbursements (pages 22-23)

The House should clarify its expense account reimbursement policy regarding incidental and miscellaneous expenses and consider limiting the number of memberships and subscriptions, which will be reimbursed.

GENERAL ASSEMBLY AND SUPPORTING FUNCTIONS  
HOUSE OF REPRESENTATIVES  
MANAGEMENT ADVISORY REPORT -  
STATE AUDITOR'S CURRENT RECOMMENDATIONS

We have audited the special-purpose financial statements of the House of Representatives as of and for the years ended June 30, 1999, 1998, and 1997, and have issued our report thereon dated December 3, 1999.

The following Management Advisory Report presents our findings and recommendations arising from our audit of the House's special-purpose financial statements. During our audit, we also identified certain management practices, which we believe could be improved. Our audit was not designed or intended to be a detailed study of every system, procedure, and transaction. Accordingly, the findings presented in the following report should not be considered as all-inclusive of areas where improvements may be needed.

|           |                          |
|-----------|--------------------------|
| <b>1.</b> | <b>Personnel Matters</b> |
|-----------|--------------------------|

- A. The House of Representatives' Administrative Manual provides that all new central staff employees are to be evaluated by their supervisor at the end of a six-month probationary period. In addition, performance appraisals are to be completed annually on the anniversary date of each employee's employment. However, the personnel files we reviewed of central staff employees did not contain any performance appraisals for the three years of the audit period; therefore, it is apparent the House has not complied with this policy.

Written performance appraisals can lead to improvement in employee performance and are useful in evaluating employees for salary increases, promotions, and other personnel actions. Performance appraisals may also be used as documentation and support in the decision to terminate an employee.

It should be noted that in September 1999, the House of Representatives instituted a new performance appraisal system, and it appears efforts have recently been made to remind supervisors of the need to prepare the appraisals on a timely basis.

- B. The House of Representatives does not have a policy regarding the employment and supervision of related parties. During our review, we noted that a supervisory employee directly supervises two close relatives. This individual's position requires him to interview prospective candidates and make recommendations in regard to the hiring of employees, to evaluate staff performance, and to approve time sheets. When related personnel supervise one another or if related employees work with financial operations, there is increased potential for problems or misappropriation.

The House of Representatives has a nepotism policy which prohibits the hiring of any person related to any representative within the fourth degree by blood or marriage; however, this policy relates only to the employment of relatives related to a representative and does not take into consideration the family relationship between employees.

A formal policy should be established to address the employment and supervision of individuals who are related to each other.

**WE RECOMMEND** the House of Representatives:

- A. Ensure written employee performance appraisals are prepared in accordance with House policy.
- B. Establish and adopt a written related party policy which restricts related employees from directly supervising each other and/or working with financial operations.

**AUDITEE'S RESPONSE**

- A. *The House of Representatives agrees that performance appraisals lead to improvement in employee performance and are useful management tools. To this end, the House has committed over two years to a complete revision of its performance appraisal program for central staff. During this revision period the old performance instrument, a "check-the-box" form, was discontinued. This period coincided with the audit period. Concurrently with the audit period, supervisors attended OA training on collaborative goals setting and techniques for coaching to improve employee performance. Also at the same time, the content and form of performance appraisal documents was changed to an "essay" system, and automated. The new system was implemented at the management level during the audit period (May and June 1999), and subsequently evaluated for its application to central staff. It was then implemented during the fall of 1999 for all central staff employees. All department directors, supervisors, and central staff have been evaluated under the new system.*
- B. *The House of Representatives has recently adopted a written, related-party policy, which restricts related employees from directly supervising each other as well as expands the House nepotism policy to include family relationships between employees.*

|                                  |
|----------------------------------|
| <b>2. Expense Reimbursements</b> |
|----------------------------------|

According to House policy, representatives are allowed to pay for expenses out-of-pocket, request reimbursement on their expense account, and receive reimbursement in accordance with the limits imposed on their \$1,000 monthly expense allowance. All transactions are subject to internal review procedures and approval of the Chief Clerk.

House policy allows for reimbursement of travel, meals, lodging, equipment, telephone charges, postage, district office space and staff, office supplies, and other incidental or miscellaneous expenses. The incidental or miscellaneous expenses are defined as picture frames, flags, and expenses that generally conform to State of Missouri Travel Regulations as published by the Office of Administration. Expenses allowed by the State Travel Regulations include telephone charges, postage, small emergency supplies, and other incidental expenses that are reasonable and related to state business. Items such as clothing, plants, pictures, decorative items, and alcoholic beverages are specifically prohibited.

During our review of the expense accounts, we noted certain incidental or miscellaneous items claimed and reimbursed which may not follow the guidelines described above. These items included gifts to a foreign delegation, various books and magazine subscriptions, and caucus dues. Some other questionable items were claimed but not reimbursed after review by the House. We also noted that the House policy has not set a limit on the number or dollar value that can be reimbursed for such things as memberships or subscriptions.

It appears the House policy may need to be more specific as to what incidental or miscellaneous items are reimbursable. In addition, the House should consider revising its policy to limit the number or amount of additional memberships and subscriptions that will be reimbursed to a representative.

**WE RECOMMEND** the House of Representatives review its expense account reimbursement policy regarding incidental or miscellaneous expenses and consider revising the policy to clarify what expenses will or will not be reimbursed. While reviewing the policy, the House should consider revising the policy to limit the number or dollar amount of memberships and subscriptions that will be reimbursed to a representative.

### **AUDITEE'S RESPONSE**

*The House has recently adopted a revision to its expense account reimbursement policies detailing the purpose of the expense account, allowable, limited and non-allowable reimbursements, travel, mailings, leasing and subscription services. Limits have been established for memberships and guidelines established for allowable subscriptions.*

This report is intended for the information of the management of the House of Representatives and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

## Follow-Up on State Auditor's Prior Recommendations

GENERAL ASSEMBLY AND SUPPORTING FUNCTIONS  
HOUSE OF REPRESENTATIVES  
FOLLOW-UP ON STATE AUDITOR'S PRIOR RECOMMENDATIONS

This section reports follow-up action taken by the House of Representatives on recommendations made in the Management Advisory Report (MAR) of our report issued for the three years ended June 30, 1993. Although the partially implemented recommendation has not been repeated, the House of Representatives should consider implementing this recommendation.

1. Expenditures and Purchasing Procedures

- A. The House's bid policy required bids to be obtained for all purchases in excess of \$2,000. Bids were not solicited for some purchases meeting this requirement. In addition, the bid policy did not address purchases less than \$2,000.
- B. Written contracts could not be located related to outside legal services.
- C. Some equipment purchased and received did not meet the bid specifications.
- D. An instance was noted where the purchase order issued for a piece of equipment was for considerably more than the original price quote. In addition, the interest rate charged on the lease purchase related to this equipment was unreasonable.

Recommendation:

The House of Representatives:

- A. Ensure current bid policies are followed or reasons for deviations from the policy are documented and develop a written policy detailing purchasing requirements for purchases less than \$2,000.
- B. Ensure all legal services are supported by written contracts specifying duties to be performed and compensation to be paid.
- C. Review equipment purchased to ensure it complies with the bid specification.
- D. Monitor all transactions to ensure the proper price and a reasonable rate of interest are paid.

Status:

A&B. Implemented.

C&D. No similar transactions were noted during the current audit period.

2. Sale of Property

Representatives and their staff were allowed to purchase used office furniture and equipment at amounts significantly below the original cost.

Recommendation:

The House of Representatives consider turning idle assets over to State Surplus Property.

Status:

Implemented.

3. Sick Leave Policy

House employees earned 16 hours of sick leave per month, rather than the 10 hours earned by most state employees. As a result, the accumulated sick leave reported for terminating House employees for retirement purposes exceeded the amounts authorized by state law.

Recommendation:

The House of Representatives amend its sick leave policy so House employees earn the standard 10 hours of sick leave per month. Regardless, accumulated sick leave certified to the retirement system should be reported on a 10 hour per month accrual basis.

Status:

Implemented.

4. Use of State Resources

Representatives were given a \$600 monthly allowance to cover travel expenses, office expenses, district personnel, etc. Reimbursement claims were noted for Christmas cards and various advertisements that did not appear to be for necessary state business.

Recommendation:

The House of Representatives discontinue these practices. Additionally, the House of Representatives should review all expense accounts to determine if reimbursements to the state are necessary.

Status:

Partially implemented. The House has discontinued the practice of reimbursing claims for Christmas cards and advertisements that do not appear to be related to state business;

however, the House did not review prior expenses to determine if any reimbursements to the state were necessary. Although, not repeated in the current MAR, our recommendation remains as stated above.

## STATISTICAL SECTION

History, Organization, and  
Statistical Information

GENERAL ASSEMBLY AND SUPPORTING FUNCTIONS  
HOUSE OF REPRESENTATIVES  
HISTORY, ORGANIZATION, AND STATISTICAL SECTION

Legislative power in Missouri is vested by Article III, Section 1 of the 1945 Constitution in the General Assembly, more commonly known as the legislature. The legislature is composed of the Senate and the House of Representatives.

The House of Representatives consists of 163 members elected for two-year terms at each general election. The House of Representatives convenes annually on the first Wednesday following the first Monday in January and adjourns on May 30 with no consideration of bills after 6:00 p.m. on the first Friday after the second Monday in May.

Each representative must be at least twenty-four years of age, a qualified voter of the state for two years, and of the district he/she represents for one year. The speaker of the House of Representatives is the presiding officer.

Representatives received salaries as follows:

| <u>Positions</u>                  | <u>Year Ended June 30,</u> |             |             |
|-----------------------------------|----------------------------|-------------|-------------|
|                                   | <u>1999</u>                | <u>1998</u> | <u>1997</u> |
| Speaker of the house              | \$ 31,580                  | 30,104      | 29,303      |
| Speaker pro tem and floor leaders | 30,580                     | 29,140      | 28,303      |
| All remaining representatives     | 29,080                     | 27,640      | 26,803      |

Representatives were authorized to receive per diems and mileage reimbursement as follows:

| <u>Effective Dates</u>              | <u>Per Diem</u> | <u>Mileage Rate</u> |
|-------------------------------------|-----------------|---------------------|
| July 1, 1996 - December 31, 1997    | \$35.00         |                     |
| January 1, 1998 - December 31, 1998 | 65.60           |                     |
| January 1, 1999 - June 30, 1999     | 68.80           |                     |
| July 1, 1996 - June 30, 1997        |                 | \$0.280             |
| July 1, 1997 - June 30, 1998        |                 | 0.285               |
| July 1, 1998 - June 30, 1999        |                 | 0.295               |

Members do not receive per diems or statutory mileage allowances during technical sessions; however, mileage expenses are reimbursed from the House of Representatives' contingency funds. Each member is also credited with \$1,000 a month (effective July 1, 1998; previously \$600 a month) to cover the cost of office supplies, district staff salaries, postage, mileage incurred and not paid for by statute, and other incidental expenses. In addition, prior to July 1, 1998, members also received an annual allowance of \$3,000 to cover the costs of printing and postage of legislative mailings to members' constituents. Any amounts exceeding this allowance were charged against the monthly expense allowance. Effective July 1, 1998, this allowance was combined with the members' \$600 account to establish the current \$1,000 account.

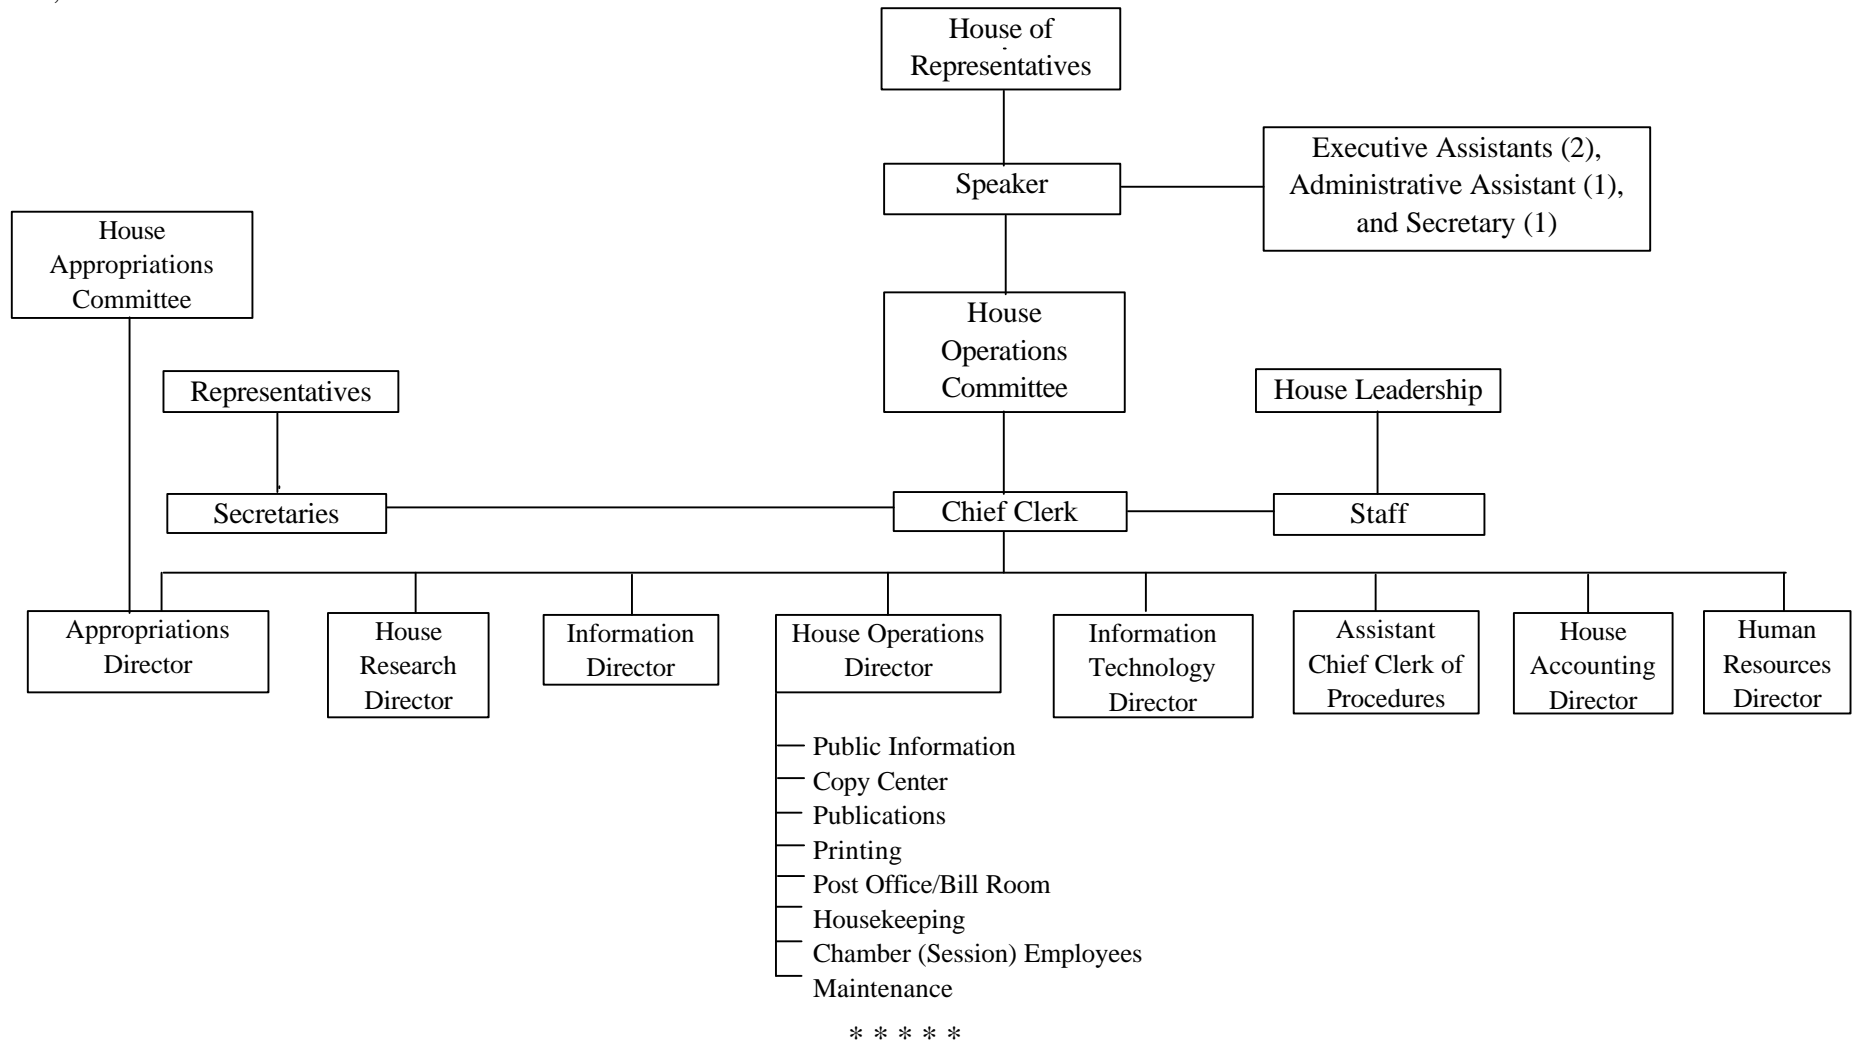

In 1973, the General Assembly was authorized full-time staffing as a result of a 1970 constitutional amendment creating annual legislative sessions.

In 1975, the positions of chief clerk and house administrator were merged into one position, which is currently filled by a full-time chief clerk. The House of Representatives is organized into eight divisions consisting of: appropriations, information technology, accounting, research, human resources, information, operations, and procedures.

The House of Representatives has approximately 105 full-time employees, 156 legislator assistants, and 104 part-time employees.

An organization chart follows.

REVIEW OF THE  
DEPARTMENT OF AGRICULTURE

**From The Office Of State Auditor  
Claire McCaskill**

Report No. 2000-32  
May 11, 2000  
[www.auditor.state.mo.us](http://www.auditor.state.mo.us)

# AUDIT REPORT

Office Of The  
State Auditor Of Missouri  
Claire McCaskill

May 2000

**The following problems were discovered as a result of a review conducted by our office of the Department of Agriculture.**

---

As noted in our three previous audits, the Department of Agriculture has established several bank accounts outside the state treasury. The monies were deposited into bank accounts to fund various conferences, process payments to exhibitors at the state fair, and facilitate the operation of the AgriMissouri Market at the state fair. The audit noted seven bank accounts with deposits to these accounts totaling more than \$294,000 annually. The department has no authority to open accounts outside the state treasury. Constitutional and statutory provisions require state funds to be held and disbursed by the State Treasurer. By maintaining program funds outside the state treasury, the department increases the risk that monies may be misused. Problems were noted regarding these various accounts.

- Cash collected for registration fees and the monies used for change at the 1998 Governor's Conference on Agriculture were not deposited to the bank account resulting in a shortage of at least \$1,713. Control weaknesses such as untimely depositing, not reconciling receipt records to deposits, not recording all receipts to the registration system, and a lack of supervision allowed this shortage to occur and remain undetected until our audit.
- The annual Governor's Conference on Agriculture is funded in part by donations. The department actively solicits these contributions, and according to department records, totaled \$19,400 during fiscal year 1999. Many of the companies and organizations on the list of contributors are licensed, inspected, and/or regulated by the department. Actively soliciting donations from these companies gives the appearance of, and may result in, a potential conflict of interest.
- Receipts records related to the AgriMissouri Market bank account were not adequate. One person was primarily responsible for preparing and making deposits, preparing and signing checks, and performing bank reconciliations. This person was also responsible for contacting and placing orders with companies, computing retail prices, tracking product inventory, and settling with companies after the fair by returning unsold products and issuing checks for products sold. Because of the minimal supervision and inadequate controls and records, the department has no assurance all monies received were deposited and payments to companies were appropriate.

(over)

YELLOW SHEET

The Agriculture Development Fund (ADF) was established with Rural Rehabilitation Program assets of the United States Department of Agriculture (USDA). An agreement between the USDA Farmers Home Administration and the Missouri Department of Agriculture requires the funds to be used for direct or indirect assistance to Missouri farmers. Assistance programs include interest rebates, loans, loan guarantees, and scholarships. On June 30, 1999, the ADF balance totaled approximately \$4.2 million and approximately 1,590 loans and loan guarantees were outstanding. We noted some concerns with the administration of the fund and the related programs.

- One crop and livestock loan recipient is the daughter of a Department of Agriculture employee who serves as an ADF loan representative. Although the recipient appears to have met all award criteria and employees were aware of the relationship, the department did not clearly document the relationship in the applicant's file.
- In one instance, the department awarded a \$500 scholarship to an applicant who reported no family farm income, although family farm income is required for participation. While the department indicated information was obtained to resolve questions as to eligibility, this additional information was not documented in the applicant's file.
- In another case, a \$20,000 alternative agricultural enterprise loan to an applicant for a retail hog venture was noted which does not appear to meet the department's criteria for an alternative agricultural enterprise. Additionally, the use agreement with the USDA prohibits the purchase of conventional livestock.
- No written agreement exists with the custodial bank for the fund's investments.

The purpose of the Livestock Enforcement Program is to ensure the control of livestock diseases in Missouri. Livestock enforcement officers may issue citations to those suspected of violating animal health regulations. The citations are reviewed by the Enforcement Officer Supervisor and State Veterinarian, the appropriate fine determined, and a letter sent to the offender. The offender is given the option of paying the fine by a specified date or appearing at an administrative hearing to contest the citation. Our review revealed that some citations are not reviewed on a timely basis. Additionally, the numerical sequence and ultimate disposition of citations are not accounted for properly.

The Missouri Department of Agriculture, Division of Weights and Measures did not perform some of its required inspections of commercial scales and petroleum dispensing meters at service stations.

The department has not formally evaluated its vehicle needs despite obtaining significant funding to replace a portion of its vehicle fleet, vehicle usage logs are not prepared for some vehicles, and the assignment of department vehicles to specific employees appears unnecessary or inefficient in some cases.

## STATE AUDITOR'S REPORT

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

Honorable Mel Carnahan, Governor  
and  
John Saunders, Director  
Department of Agriculture

We have conducted a review of the Department of Agriculture, excluding the Missouri State Fair and the State Milk Board, which are reported on separately. The scope of our review included, but was not necessarily limited to, the year ended June 30, 1999. The objectives of this review were to:

1. Review management practices and financial information for compliance with applicable constitutional provisions, statutes, regulations and administrative rules as we deemed necessary or appropriate in the circumstances.
2. Review the efficiency and the effectiveness of certain management practices.
3. Review certain revenues received and certain expenditures made by the department.

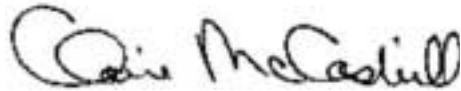

Our review was made in accordance with applicable generally accepted government auditing standards and included such procedures as we considered necessary in the circumstances. In this regard, we reviewed the department's revenues, expenditures, rules, regulations, and other pertinent procedures and documents and interviewed department personnel.

As part of our review, we assessed the Department of Agriculture's management controls to the extent we determined necessary to evaluate the specific matters described above and not to provide assurance on these controls. With respect to management controls, we obtained an understanding of the design of relevant policies and procedures and whether they have been placed in operation and we assessed control risk.

Our review was limited to the matters described above and was based on selective tests and procedures considered appropriate in the circumstances. Had we performed additional procedures, other information might have come to our attention that would have been included in this report.

The accompanying History, Organization, and Statistical Information is presented for informational purposes. This information was obtained from the department's management and was not subjected to the procedures applied in the review of the Department of Agriculture.

The accompanying Management Advisory Report presents our findings and recommendations arising from our review of the Department of Agriculture.

A handwritten signature in black ink, appearing to read "Claire McCaskill". The signature is fluid and cursive, with the first name "Claire" written in a larger, more prominent script than the last name "McCaskill".

Claire McCaskill  
State Auditor

October 13, 1999 (fieldwork completion date)

The following auditors participated in the preparation of this report:

## MANAGEMENT ADVISORY REPORT SECTION

REVIEW OF THE  
DEPARTMENT OF AGRICULTURE  
SUMMARY OF FINDINGS

1. Missing Funds and Conference Receipting Procedures (pages 6-8)

Cash collected for registration fees and the funds used for change at the 1998 Governor's Conference on Agriculture (GCA) were not deposited to the bank account established for these funds resulting in a shortage of at least \$1,713. Registration fees of the GCA were not always promptly deposited to the bank account, receipt amounts were not always reconciled to the amounts deposited, and fees collected were not always recorded on the registration system.

2. Unauthorized Bank Accounts (pages 8-10)

The Missouri Department of Agriculture (MDA) maintains various bank accounts outside the state treasury. The method for soliciting donations to the Governor's Conference on Agriculture may constitute a conflict of interest. Records and procedures related to the AgriMissouri Market bank account were not adequate.

3. Receipt Procedures (pages 10-11)

The duties of handling and accounting for receipts are not properly segregated. The various license, inspection, and registration documents of some divisions of the department are not accounted for and reconciled to the related receipts.

4. State Vehicles (pages 11-13)

Vehicle usage logs are not prepared for some vehicles, the department has not formally evaluated its vehicle needs, and the assignment of department vehicles appears inefficient.

5. Division of Animal Health Livestock Enforcement Program (pages 13-14)

Citations issued to persons in violation of Missouri health laws are not reviewed on a timely basis. Additionally, citations issued are not accounted for properly.

6. Agriculture Development Fund (pages 14-16)

The MDA has not established procedures for identification and approval of assistance applications from relatives of MDA employees. Some program recipients did not appear to meet the qualification criteria. No written agreement exists with the custodial bank regarding the investments of the fund.

7. Division of Weights and Measures Inspections (page 16)

The MDA did not perform some of its required inspections of scales and petroleum dispensing meters at service stations.

REVIEW OF THE  
DEPARTMENT OF AGRICULTURE  
MANAGEMENT ADVISORY REPORT

|  |
|--|
| <b>1. Missing Funds and Conference Receipting Procedures</b> |
|--|

The Missouri Department of Agriculture (MDA) handles the receipts and disbursements for the annual Governor's Conference on Agriculture (GCA). The MDA has a bank account for processing the receipts and disbursements of the GCA. The 1998 GCA was held December 13 through December 15, 1998. Department records indicate registration fees collected for participants of the 1998 GCA totaled approximately \$52,000. Pre-registration payments were received by mail prior to the conference, walk-in registration payments were received at the conference, and invoice payments from sponsoring agencies were received after the conference. Amounts collected from GCA participants were recorded on a computerized registration system. Our review of the registration fee records and bank deposits revealed missing funds and control weaknesses.

- A. We compared the receipt listing produced by the registration system (which details receipt transactions for the time period November 9, 1998, through May 3, 1999) for the 1998 GCA to the corresponding bank deposits (various dates ranging from November 12, 1998, through May 10, 1999) and noted that at least \$1,413 of registration fees were not deposited. The monies that are missing appear to represent cash receipts for walk-in registration fees collected at the conference and recorded but not deposited. In several instances, checks or money orders were deposited but not recorded and apparently substituted for recorded cash receipts collected at the conference. Additionally, \$300 in cash from the GCA bank account which was used for change at the conference was not redeposited. These missing funds went undetected due to various internal control weaknesses as discussed below.
- B.1. Registration fees were not always deposited timely and intact. For example, receipts totaling \$7,454 and with receipt dates ranging from December 11, 1998 through January 21, 1999, were not deposited until January 26, 1999. This deposit consisted of receipts received prior to, during, and subsequent to the conference. Cash receipts totaling \$1,413 and receipted during this same time period were not deposited.
- 2. With the exception of the January 26, 1999 deposit discussed above, the MDA procedure is to compare the receipt listing to the actual monies collected, photocopy the check or money order receipts, and retain the bank deposit receipt, deposit slip, copies, and receipt listing together to support the deposit. For this January 26, 1999 deposit, only the bank deposit receipt was retained and there was no documented evidence that actual monies collected were compared to the receipt listing and deposit.

3. No receipt slip or other evidence of the transmittal of registration fees from one person to another is prepared. As a result, there is a breakdown in the audit trail and accountability over these funds.
4. Registration collections totaling approximately \$2,000 were not recorded on the MDA's registration system. Many of these payments were apparently received after the conference from agencies making payment from MDA invoices for the conference participants from the agencies.
5. Receipt slip numbers are not accounted for properly. While reviewing the receipt records we noted unexplained gaps in the receipt slip numbers and an instance where the same receipt slip number was used twice.

Supervision of the GCA receipting and depositing procedures was not adequate. Although the conference records provide the necessary information, no one independent of the receipting, recording, and depositing processes reconciled the composition of deposits back to the initial receipt records or ensured that all the usual records were prepared and retained. This comparison could be performed by the person that prepares the monthly bank reconciliation for the conference account. Had such independent procedures been performed, the discrepancies could have been detected in a timely manner.

To ensure that registration fees are properly handled, the MDA should ensure the collections are deposited daily or when accumulated collections exceed \$100. Additionally, the MDA should ensure all receipts and their method of payment are accurately recorded and reconciled to the amounts and composition of monies deposited, all appropriate documentation is maintained, evidence of transmittals are prepared, and receipt slip numbers are accounted for fully.

**WE RECOMMEND** the MDA:

- A. Work with law enforcement officials regarding restitution of the missing monies and any criminal prosecution considered necessary.
- B. Deposit receipts intact daily or when accumulated receipts exceed \$100, reconcile the amount and composition of monies transmitted and deposited to the receipt listing and deposit, prepare receipt documents as evidence of monies transmitted, record all monies received, and account for prenumbered receipt slips. In addition, the MDA needs to ensure that improved and independent supervision of these functions is implemented.

**AUDITEE'S RESPONSE**

*The department concurs with recommendations A and B. New receipts processing procedures addressing each issue cited in recommendation B were developed and implemented for the 1999 Governor's Conference on Agriculture. Regarding recommendation A, the department has*

*completed an internal investigation, has consulted with legal counsel to determine appropriate action, and has requested an independent external investigation.*

**2.**

**Unauthorized Bank Accounts**

As similarly noted in our three previous audits, the MDA has established several checking and money market accounts outside of the state treasury. Donations and registration fees were paid to the MDA for the purpose of organizing conferences regarding agricultural issues. These monies were deposited into bank accounts to fund the Governor's Conference on Agriculture (GCA), the Agriculture Buffet, and the AgriExpo 2000 Conference. During fiscal year 1999, monies deposited into the GCA and Agriculture Buffet bank accounts totaled approximately \$107,785 and \$3,250, respectively. Monies deposited into the AgriExpo 2000 Conference bank account during early 2000 totaled approximately \$5,675. Several bank accounts also exist to process payments to exhibitors participating in the steer, barrow, and lamb carcass shows held each year at the Missouri State Fair. Monies deposited into these bank accounts for the 1999 Fair totaled approximately \$96,627, \$44,865, and \$16,986, respectively. In addition, a bank account has been established to facilitate the operation of the AgriMissouri Market at the Missouri State Fair. Sales receipts, operational costs, and payments to companies for their products sold are processed through this bank account. Monies totaling approximately \$18,865 were deposited into this bank account for the 1999 Fair. The following items were noted regarding these accounts.

- A. The MDA has no authority to open bank accounts outside the state treasury. Article IV, Section 15, of the Missouri Constitution and Section 30.240, RSMo 1994, require state funds to be held and disbursed by the state treasurer. Furthermore, by maintaining program funds outside the state treasury, the department increases the risk that state monies may be misused.
- B. As noted above, the annual GCA is funded in part by donations from various agriculture-related companies and organizations. While organizing the conference each year, the MDA actively solicits these contributions. According to department records, contributions totaling \$19,400 were received during the year ended June 30, 1999. We examined the list of contributors and noted that many of the companies and organizations are licensed, inspected, and/or regulated by the department. Actively soliciting donations from these companies gives the appearance of, and may result in, a potential conflict of interest.
- C. Monies deposited into the AgriMissouri Market bank account primarily result from product sales. Disbursements from the account relate to costs of operating the market and payments to companies for their products sold. Other than documentation of a cash count performed at the end of each day, no records of receipts (such as prenumbered receipt slips, daily receipt logs, or cash register tapes) are prepared to support each day's sales amount. Each day at closing, a cash count is to be performed and documented. However, department records did not contain this cash count documentation for some days during

the 1998 Fair or any days during the 1999 Fair. Monies are generally deposited the following day.

While several department employees work in the market during the fair and have access to cash receipts, one individual is primarily responsible for preparing and making deposits, preparing and signing checks, and performing month-end bank reconciliations. This individual is also primarily responsible for contacting companies, placing orders with the companies, computing retail prices, tracking the product inventory, and settling with the companies after the fair by returning unsold products and paying for products sold. Supervision of these procedures was minimal. Because of the minimal supervision, and inadequate receipt records and control systems in place, the department has no assurance all monies received are deposited and that payments to companies are appropriate.

The establishment of these various bank accounts and the department's failure to implement adequate internal controls and supervision procedures lessens the assurance that monies received and disbursed are adequately accounted for and increases the possibility of the loss or misuse of funds.

The department needs to clarify its role in organizing these events. If these are legitimate department functions, the department should seek legislative authority for handling the funds. In addition, needed funding should be requested through the appropriations process. However, if these are not departmental functions, the MDA coordination and management should cease.

**WE AGAIN RECOMMEND** the MDA:

- A. Close all bank accounts outside the state treasury. The balances remaining in any of these accounts should be deposited to the state treasury or transferred to the appropriate entity. The department should review how to best account for these programs through the state treasury if they are to be continued.
- B. Discontinue the practice of soliciting contributions from entities which are licensed, regulated, and/or inspected by the MDA.
- C. Implement adequate records and supervision procedures for the AgriMissouri Market.

**AUDITEE'S RESPONSE**

*The department believes strongly that the conferences and activities identified by the State Auditor serve an appropriate public policy interest. However, in light of the State Auditor's recommendations, alternative methods for handling funds for these events are being established. All of the outside accounts will be closed by August 31, 2000. The department is seeking additional appropriation authority that will allow any balances or future revenues to be deposited into the state treasury per the State Auditor's recommendations. In addition, the department's fiscal staff are*

*implementing new procedures to ensure that appropriate record keeping and supervision procedures are in place for the next AgriMissouri Market in August 2000.*

### **3. Receipt Procedures**

Each of the programs within the various divisions of the MDA is responsible for collecting its own revenues, transmitting these revenues to the fiscal office or Department of Revenue for deposit, and preparing and maintaining the accounting records. Receipts for the year ended June 30, 1999, totaled approximately \$14.4 million. Because each division establishes its own procedures there is a lack of standardization in handling receipts.

- A. We noted a lack of segregation of duties in various divisions. The duties of record keeping and custody of receipts are not always adequately segregated. One individual generally handles the receipts, prepares the revenue transmittals, and maintains the accounting records. In some divisions, this same individual also performs the functions of billing for services, monitoring past due accounts, and processing of refunds.

To protect against possible loss or misuse of funds, internal controls should provide reasonable assurance through segregation of duties that all transactions are accounted for properly. Failure to adequately segregate these functions increases the potential for misappropriation of funds and the concealment of this misappropriation. As noted in prior audit reports, adequate segregation of duties could possibly be achieved by the MDA by establishing a centralized receiving location. Alternatively, if the MDA chooses to continue to receive collections at the divisions, proper segregation could be achieved by assigning the receipt and transmittal responsibilities to an employee within each division with no responsibilities for posting payments to the accounting records, preparing billings, monitoring past due accounts, or processing of refunds.

- B. The various license, inspection, and registration documents of the divisions of the MDA are not always accounted for and reconciled to the related receipts. The numerical sequence of plant pest inspection reports are not accounted for properly. Blocks of reports are assigned to the inspectors but the numerical sequence of reports issued are not accounted for and reconciled to the related receipts. Additionally, feed licenses, seed permits, pesticide licenses, and product registration forms issued are not reconciled to the related receipts.

To provide assurance that receipts are proper and complete, the MDA should ensure that inspection reports are accounted for and reconciled to the related receipts. Additionally, licenses, product registrations, and permits issued should be reconciled to the related receipts to provide assurance that these receipts are properly recorded and handled.

**WE RECOMMEND** the MDA:

- A. Review the internal controls and procedures in the various divisions and ensure the duties of receiving and transmitting receipts are adequately segregated from the duties of posting payments to the accounting records, preparing billings, monitoring past due accounts, and processing of refunds. If adequate segregation of duties cannot be achieved, there should be periodic independent supervisory reviews of records and reconciliations.
- B. Account for plant pest inspection reports issued and reconcile these reports to the related revenues. Additionally, the MDA should reconcile pesticide and feed licenses, seed permits, and product registration forms to the related revenues.

**AUDITEE'S RESPONSE**

*The department concurs with recommendations A and B. Although we believe that our receipts have been adequately protected, our fiscal staff are implementing new procedures to ensure segregation of duties for cash receipts and providing supervisory review of records and reconciliations per the State Auditor's recommendations. These procedures are expected to be finalized and implemented by the end of calendar year 2000.*

**4.**

**State Vehicles**

The MDA maintains a fleet of 226 vehicles for use by both field and central office employees. The vehicles are assigned to the various divisions and the Director's Office. The vehicles are assigned as follows:

|                 |            |
|-----------------|------------|
| Field employees | 177        |
| Jefferson City  | 49         |
| Total           | <u>226</u> |

Of the 49 vehicles assigned to Jefferson City, 32 are assigned to division vehicle pools, 13 are assigned to specific employees (including nine vehicles that are also used by the assigned employee for personal commuting), and four are specialized vehicles. The MDA has received appropriations totaling approximately \$1.3 million for significant replacement of many of the vehicles in its fleet for the year ending June 30, 2000. We reviewed the use and applicable documentation for the vehicles and noted the following concerns.

- A. Vehicle usage logs are not maintained for some vehicles. No vehicle usage logs are maintained for the pool vehicles of the Grain Inspection and Warehousing, and Animal Health divisions, and no vehicle usage records are maintained for vehicles assigned to specific employees in the Market Development division, Animal Health division, and the

Director's Office. Additionally, the vehicle usage documentation, where maintained, varies among the various divisions and the Director's Office. Vehicle usage for personally assigned vehicles is documented on weekly field activity reports while usage of pool vehicles is maintained on vehicle operation records which lack an indication of the purpose of each trip.

Vehicle usage logs documenting the date, destination, purpose of the trip, and mileage should be maintained for all vehicles and periodically reviewed to ensure vehicles are properly used for business purposes. The MDA should establish standard and consistent documentation for recording vehicle usage throughout the department.

- B. Despite the substantial appropriation discussed above and the replacement of a significant number of vehicles, the MDA has not formally evaluated the vehicle needs of the department or determined the most effective allocation of vehicles among its employees.

The MDA does not have a centralized vehicle pool. Each division and the Director's Office maintains pool vehicles and monitors the assignment and use of these vehicles. While some of the pool vehicles are used as replacements for field personnel when their assigned vehicle is inoperable, many pool vehicles are not regularly used.

Some vehicles are assigned specifically to central office staff who have job assignments which appear to require little or no regular business travel. These vehicles apparently are often used primarily for commuting between the MDA and the personal residences of the employees. We noted the total monthly mileage for two vehicles specifically assigned to central office staff was frequently less than 750 miles.

To more efficiently utilize its fleet of vehicles the MDA should consider establishing a centralized vehicle pool to help eliminate unnecessary vehicles while more efficiently using the remaining pool vehicles and should assign specific vehicles only to those employees whose positions require regular business travel. In addition, the MDA needs to periodically review vehicle needs and assignments, especially prior to the purchase of a significant number of replacement vehicles.

Similar conditions have been noted in our two previous audit reports.

**WE RECOMMEND** the MDA:

- A. Require standard usage logs be completed and maintained for all state vehicles. The logs should include beginning and ending odometer readings, purpose of the trip, person making the trip, destination and date of travel. The ending mileage reported should be reconciled on a periodic basis to the vehicle odometer readings.

- B. Review and determine the vehicle needs of the department. Consideration should be given to establishing a central vehicle pool to reduce the number of vehicles needed and evaluate the needs of central office employees for assignment to specific vehicles.

### **AUDITEE'S RESPONSE**

*The department concurs with recommendations A and B. Vehicle logs are currently maintained for nearly all the department's vehicles. The department is implementing procedures to ensure that vehicle logs are maintained for the remaining vehicles. Given the diverse and widespread responsibilities of the department we are reviewing both individual and overall vehicle needs, including the State Auditor's recommendation to establish a central vehicle pool. Any fleet management procedures that are revised as a result of this review will be implemented by the end of calendar year 2000.*

|   |
|---|
| <b>5. Division of Animal Health Livestock Enforcement Program</b> |
|---|

The purpose of the Livestock Enforcement Program is to ensure the control of livestock diseases in Missouri. Livestock enforcement officers may issue citations to those suspected of violating animal health regulations. If a citation is issued, the citations are reviewed by the Enforcement Officer Supervisor and State Veterinarian (who is also the Director of the Division of Animal Health). After they determine the appropriate fine for the violation, a letter is sent to the offender informing him or her of the amount. The offender is given the option of paying the fine by a specified date or appearing at an administrative hearing to contest the citation.

Our review of the program revealed the following deficiencies.

- A. Some citations have not been processed in a timely manner. We noted four citations had been outstanding more than one year. For three of these citations, the fines had been assessed and letters had been sent to the violators; however, the deadline for paying the fines had lapsed and the MDA had taken no further action to collect the fines or bring the cases to administrative hearings. The other citation had been misfiled and the MDA had not reviewed the case. This citation was located after we brought this to the division's attention.

To ensure the livestock enforcement program is fulfilling its intended purpose and is adequately enforcing citations issued, the department should develop procedures to process citations on a timely basis.

A similar condition was noted in our prior audit report.

- B. The MDA does not adequately account for the numerical sequence of citations issued. The MDA records the disposition of the citations on an issuance log. However, we noted

several citations that were not recorded on the issuance log. The MDA investigated these citations upon our request and found some of the citations had been voided or dismissed.

Without a proper accounting for the numerical sequence and ultimate disposition of citations, the MDA cannot be assured all citations issued are properly processed. Properly maintained logs would account for of all citations as well as the ultimate disposition of each document.

**WE RECOMMEND** the MDA:

- A. Develop procedures to process all citations on a timely basis.
- B. Ensure records are maintained to account for the numerical sequence and ultimate disposition of all citations issued.

**AUDITEE'S RESPONSE**

*The department concurs and has already made efforts to implement these recommendations. The supervisor of the Livestock Enforcement Program has been directed to work closely with the Attorney General's office to review and ensure the timely implementation of the following citation policies:*

- *Record Keeping*
- *Fine Assessment*
- *Administrative Hearing Procedures*
- *Final Disposition*

*As of January 2000, quarterly citation logs are being sent to each enforcement officer for verification.*

|  |
|--|
| <b>6. Agriculture Development Fund</b> |
|--|

The Agriculture Development Fund (ADF) was established with Rural Rehabilitation Program assets of the United States Department of Agriculture (USDA). An agreement between the USDA Farmers Home Administration and the MDA requires the funds to be used for direct or indirect assistance to Missouri farmers. The specific assistance programs developed by the MDA, and approved by the USDA, to assist Missouri farmers are interest rebates and loan guarantees for crop and livestock projects; interest rebates for farm mechanics projects; loans for alternative agricultural enterprises; grants for FFA chapters and 4-H clubs; and college scholarships to high school seniors. On June 30, 1999, the ADF balance totaled approximately \$4.2 million and approximately 1,590 loans and loan guarantees were outstanding. We noted the following concerns with the administration of this fund and the related programs.

- A. The MDA has not established procedures for identification and approval of applications from relatives of MDA employees. The MDA does not require applicants to disclose in their applications any relatives working for the MDA. We noted one crop and livestock loan recipient is the daughter of an MDA ADF loan representative. Although the recipient appears to have met all award criteria and employees of the MDA were aware of the relationship, the MDA did not clearly document the relationship in the applicant's file. Additionally, although the MDA had indicated to us that applications from any related parties require additional approval from the division director, we noted no documentation for this applicant indicating the division director was made aware of and approved the application. The MDA should consider requiring applicants to disclose any related MDA employees in the application to ensure that related applicants are identified and disclosed, and require appropriate reviews of the application to ensure that no undue influence is exercised over the award process and each applicant is judged equitably.
- B. We noted two program recipients who do not appear to be qualified participants based on the award criteria of the MDA, and the MDA did not maintain documentation explaining why it considered the recipient qualified despite the apparent disqualification.
- 1) In one instance, the MDA awarded a \$500 scholarship to an applicant who reported no family farm income, although family farm income is required for participation. The MDA indicated that it had approved the loan after contacting the applicant and learning the applicant had reported no farm income because the farm had suffered a financial loss. However, the MDA had not documented this information in the applicant's file.
  - 2) In another case, we noted a \$20,000 alternative agricultural enterprise loan to an applicant for a retail hog venture which does not appear to meet the MDA's criteria for an alternative agricultural enterprise. Additionally, the use agreement with USDA prohibits the purchase of conventional livestock.

To ensure equitable treatment among applicants, the MDA should require each recipient to fully meet all of its eligibility criteria or maintain explanatory documentation to support the decision to exempt the applicant from the criteria.

- C. Many of the assets of the ADF are invested by a local bank in government securities based on recommendations of the MDA's investment advisory committee. The MDA has no written agreement with the bank for these services. A written agreement, signed by the parties involved, should specify the role of the bank in investment acquisitions and custody, clarify the MDA's rights and responsibilities, and provide protection to both parties.

**WE RECOMMEND** the MDA:

- A. Require applicants for ADF programs to disclose any relationships to MDA employees and obtain approval from the division director for any applications from related parties.
- B. Require each recipient to fully meet all of its eligibility criteria or maintain explanatory documentation to support the decision to exempt the applicant from the criteria.
- C. Execute a written agreement with the local bank regarding the ADF's investments.

**AUDITEE'S RESPONSE**

*The department concurs and the recommendations have been implemented.*

|  |
|--|
| <b>7. Division of Weights and Measures Inspections</b> |
|--|

The MDA inspects and tests commercial measuring and weighing devices to ensure the devices are accurate, properly installed and maintained, and suitable for their intended use. We reviewed the MDA's reports of its inspections performed and noted that inspections were sometimes not performed with the required frequency.

- A. Inspections of some of the measuring devices for petroleum dispensers at service stations were only performed once during the year ending December 31, 1998. The MDA's inspection reports indicate that one or no inspections were performed for many stations in 1998 for three regions of the state covering 19 counties. The MDA indicated the inspectors assigned to those regions had long absences due to illness and it was unable to reassign inspectors to those regions. Section 414.072, RSMo 1994, requires the MDA to test and inspect these devices at least every six months.
- B. We noted the commercial scales at approximately 480 businesses, or about 5 percent of the total businesses requiring inspection, were not inspected during the year ending December 31, 1998. Of these 480 businesses, 253 were located in regions of the state assigned to three inspectors. Approximately 22 percent of the inspections assigned to these three inspectors were not performed. The MDA indicated that turnover or reassignments in these three inspector positions contributed to the delinquencies. The MDA is required by 2 CSR 90-21.025 to inspect all commercial weighing and measuring devices annually.

To ensure the accuracy of petroleum dispensers and commercial scales, the MDA should perform inspections of these devices with the frequencies required by state law and regulation.

**WE RECOMMEND** the MDA inspect and certify commercial weighing and measuring devices as frequently as required by state law and regulation.

**AUDITEE'S RESPONSE**

*The department concurs and has implemented procedures to ensure timely inspections.*

This report is intended for the information of the management of the Department of Agriculture and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

## STATISTICAL SECTION

## History, Organization, and Statistical Information

## DEPARTMENT OF AGRICULTURE HISTORY, ORGANIZATION, AND STATISTICAL INFORMATION

The Department of Agriculture was created in 1933 by an act of the legislature to replace the Missouri State Board of Agriculture. The Reorganization Act of 1974 had little impact on the department, extending its authority to cover LP-gas and motor fuel inspections. The State Milk Board was assigned to the department as a vehicle for budgeting appropriations and, accordingly, is not included herein. The Agricultural and Small Business Development Authority was created by State Law in 1981, and its governing body consists of members who are residents of this state are appointed by the Governor with the advice and consent of the Senate.

Operating under the director, the department's divisions are charged with enforcing state laws regulating the handling and marketing of agribusiness products, as well as protecting producers, processors, distributors, and consumers of food and fiber and promoting Missouri's agricultural economy.

The following are the various responsibilities of the Office of Director, the five divisions of the department, and the Agricultural and Small Business Development Authority:

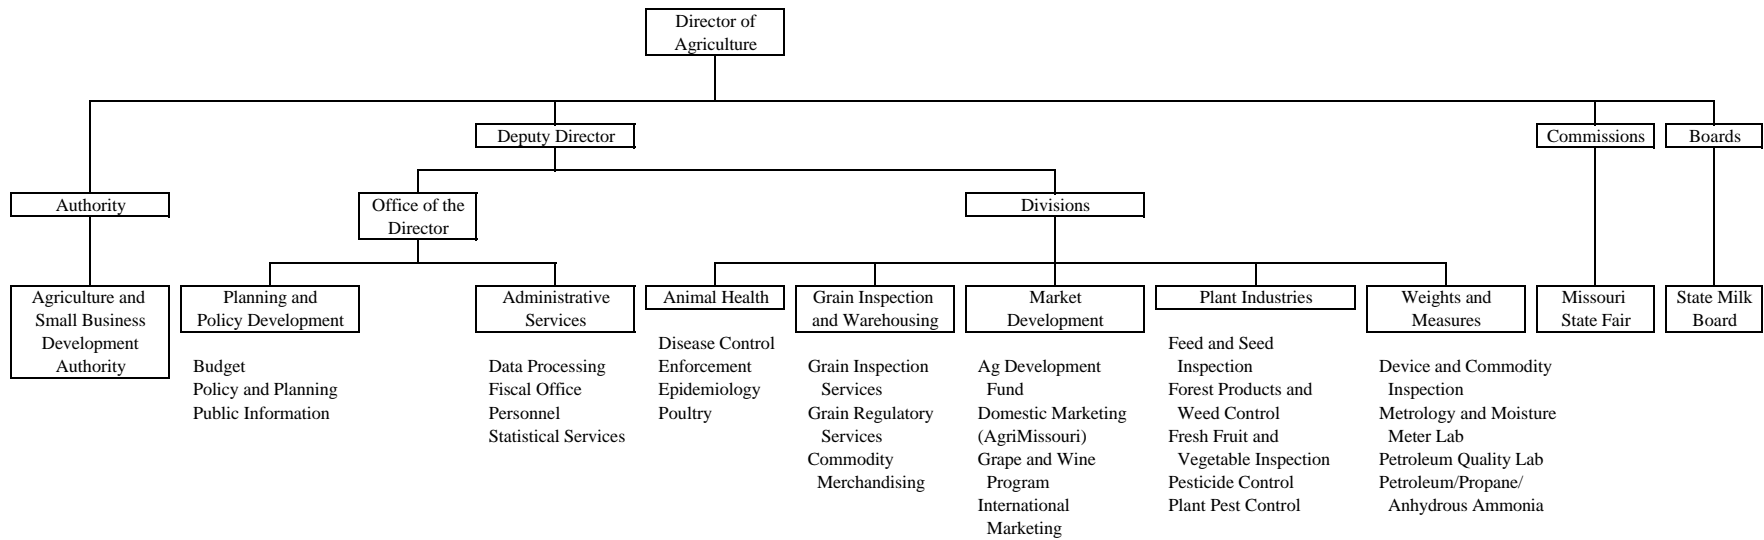

1. The Office of the Director determines department policy, assigns duties among departmental units, obtains financial and personnel resources to discharge department responsibilities, and monitors departmental performance.
2. The Division of Animal Health, directed by the state veterinarian, administers the laws and regulations pertaining to livestock and poultry health and sanitation.
3. The Division of Grain Inspection and Warehousing is responsible for the enforcement of the Missouri grain dealers and grain warehouse laws and U.S. Grain Standards Act. The Grain Inspection Program serves as a disinterested third-party which, upon request, will determine the grade, weight, and protein content of grain for any interested party. The Grain Regulatory Services Program oversees the regulation of the storage, purchase and sale of grain in Missouri. Additionally, the division administers the commodity checkoff programs.
4. The Division of Market Development is responsible for obtaining maximum participation in domestic and international markets for Missouri agricultural products. The programs of this division are expected to improve the economic well-being of Missouri's agriculture agribusiness industry. The division also administers the Agriculture Development Fund Program which provides youth and youth development programs, scholarships, as well as loans and grants for the betterment of rural agriculture.
5. The Division of Plant Industries is responsible for all plant disease surveillance and quarantines. The division administers regulations concerning the use of pesticides, herbicides, and other chemical products, and is responsible for fruit and vegetable inspection, feed and seed inspection, and treated timber and Johnson grass programs.

6. The Division of Weights and Measures maintains surveillance of commercial weighing and measuring devices to ensure accuracy and fair dealing in the exchange of commodities. The division carries out its duties through small-scale inspection, large-scale inspection, commodities inspection, grain moisture meter inspection, motor fuel inspections and testing, and the Liquefied Petroleum Gas Authority.
7. The Agricultural and Small Business Development Authority issues tax-free bonds to lenders who make low-interest loans to farmers and small businesses and administers the animal Waste Treatment System Loan program, the Single-Purpose Animal Facilities Loan Guarantee program, the Missouri Value-Added Grant program, and the Missouri Value-Added Loan Guarantee program.

John L. Saunders serves as director of the department. The department employed approximately 460 full-time employees as of June 30, 1999. An organization chart follows.

Note: Commodity Council Assessments - Based on changes to RSMo 275.350, checkoff funds collected by the various commodity councils are no longer considered state funds and are to be administered by the state Department of Revenue (DOR) and accounted for within a DOR account. As a result, fiscal year 1999 expenditures exclude commodity assessment distributions now processed through the DOR.

Note: Commodity Council Assessments - Based on changes to RSMo 275.350, checkoff funds collected by the various commodity councils are no longer considered state funds and are to be administered by the state Department of Revenue (DOR) and accounted for within a DOR account. As a result, fiscal year 1999 expenditures exclude commodity assessment distributions now processed through the DOR.

TWENTY-FIRST JUDICIAL CIRCUIT

MUNICIPAL DIVISIONS

TWO YEARS ENDED JUNE 30, 1999

**From The Office Of State Auditor  
Claire McCaskill**

Report No. 2000-31  
May 4, 2000  
[www.auditor.state.mo.us](http://www.auditor.state.mo.us)

AUDIT REPORT

Office Of The  
State Auditor Of Missouri  
Claire McCaskill

May 2000

The following audit report presents our findings and recommendations for certain municipal divisions of the Twenty-First Judicial Circuit. During our audit, we identified accounting records, controls, and certain management practices which we believe could be improved. The municipal divisions in which specific findings and recommendations were noted are listed below:

|                                 |                    |

## FINANCIAL SECTION

## State Auditor's Reports

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

**INDEPENDENT AUDITOR'S REPORT ON  
THE FINANCIAL STATEMENTS**

Presiding Judge  
and  
Municipal Judges  
Twenty-First Judicial Circuit

We have audited the accompanying special-purpose financial statements of the various municipal divisions (other than the city of University City Municipal Division as of and for the years ended June 30, 1999 and 1998) of the Twenty-First Judicial Circuit as of and for the years ended June 30, 1999 and 1998, as identified by municipality in the table of contents. These special-purpose financial statements are the responsibility of the municipal divisions' management. Our responsibility is to express an opinion on these special-purpose financial statements based on our audit.

Except as discussed in paragraph four, we conducted our audit in accordance with generally accepted auditing standards and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the special-purpose financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the special-purpose financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

The accompanying special-purpose financial statements were prepared for the purpose of presenting the receipts, disbursements, and changes in cash of the municipal divisions of the Twenty-First Judicial Circuit and are not intended to be a complete presentation of the financial position and results of operations of the municipal divisions.

Prenumbered bond forms or receipt slips were not issued for bond monies collected by the police department for the city of Eureka Municipal Division. In addition, bonds were sometimes refunded in cash by the municipal division. As a result, we were unable to satisfy ourselves by appropriate audit tests or other means as to bond receipts and disbursements beyond amounts recorded in the municipal division's records for the years ended June 30, 1999 and 1998.

In our opinion, except for the effects, if any, on the financial statements of the matter discussed in the preceding paragraph, the special-purpose financial statements referred to in the first paragraph present fairly, in all material respects, the receipts, disbursements, and changes in cash of the municipal divisions (other than the city of University City Municipal Division as of and for the years ended June 30, 1999 and 1998) of the Twenty-First Judicial Circuit as of and for the years ended June 30, 1999 and 1998, in conformity with the comprehensive basis of accounting discussed in Note 1, which is a basis of accounting other than generally accepted accounting principles.

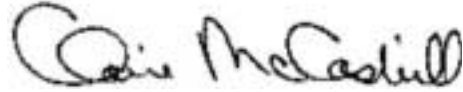

We also had planned to audit the accompanying special-purpose financial statement of the city of University City Municipal Division as of and for the years ended June 30, 1999 and 1998. This special-purpose financial statement is the responsibility of the municipal division's management.

Internal controls and accounting records of the city of University City Municipal Division were inadequate. Amounts shown as received on the court's cash register did not always match the amounts transmitted to the city for deposit. Adjustments were made to cash register entries without proper support. Also, records accounting for the numerical sequence and ultimate disposition of each traffic ticket issued by the police department were not maintained. As a result, we were unable to satisfy ourselves by appropriate audit tests or other means as to receipts and disbursements of fines, court costs, and bonds for the years ended June 30, 1999 and 1998. In addition, we were unable to assure ourselves of the amount of cash bonds held in trust at June 30, 1999 and 1998.

Because of the effects of the matters discussed in the preceding paragraph, the scope of our work was not sufficient to enable us to express, and we do not express, an opinion on the special-purpose financial statement of the city of University City Municipal Division as of and for the years ended June 30, 1999 and 1998.

In accordance with *Government Auditing Standards*, we also have issued our report dated November 24, 1999, on our consideration of the municipal divisions' internal controls over financial reporting and on our tests of their compliance with certain provisions of laws, regulations, contracts, and grants.

The accompanying History, Organization, and Statistical Information is presented for informational purposes. This information was obtained from the municipal divisions' management and was not subjected to the auditing procedures applied in the audit of the special-purpose financial statements referred to above.

A handwritten signature in dark ink, appearing to read "Claire McCaskill". The signature is fluid and cursive, with the first name "Claire" written in a larger, more prominent script than the last name "McCaskill".

Claire McCaskill  
State Auditor

November 24, 1999 (fieldwork completion date)

**Missouri State Auditor**

**INDEPENDENT AUDITOR'S REPORT ON COMPLIANCE  
AND ON INTERNAL CONTROL OVER FINANCIAL REPORTING**

Presiding Judge  
and  
Municipal Judges  
Twenty-First Judicial Circuit

We have audited the special-purpose financial statements of the various municipal divisions (other than the city of University City Municipal Division as of and for the years ended June 30, 1999 and 1998) of the Twenty-First Judicial Circuit as of and for the years ended June 30, 1999 and 1998, and have issued our report thereon dated November 24, 1999. That report expressed a qualified opinion on the special-purpose financial statements of the city of Eureka Municipal Division for the years ended June 30, 1999 and 1998. Except as discussed in the report on the financial statement of the municipal division referred to in the preceding sentence, we conducted our audit in accordance with generally accepted auditing standards and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States.

We also had planned to audit the special-purpose financial statement of the city of University City Municipal Division as of and for the years ended June 30, 1999 and 1998, and have issued our report thereon dated November 24, 1999. In that report we did not express an opinion on the special-purpose financial statement.

Compliance

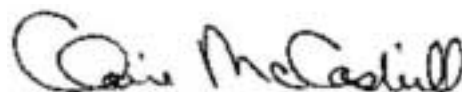

As part of obtaining reasonable assurance about whether the special-purpose financial statements of the various municipal divisions of the Twenty-First Judicial Circuit are free of material misstatement, we performed tests of the municipal divisions' compliance with certain provisions of laws, regulations, contracts, and grants, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no material instances of noncompliance that are required to be reported under *Government Auditing Standards*. However, we noted certain other instances of noncompliance which are presented in the accompanying Management Advisory Report.

## Internal Control Over Financial Reporting

In planning and performing our audit of the special-purpose financial statements of the various municipal divisions of the Twenty-First Judicial Circuit, we considered the municipal divisions' internal controls over financial reporting in order to determine our auditing procedures for the purpose of expressing our opinion on the special-purpose financial statements and not to provide assurance on the internal controls over financial reporting. However, we noted certain matters involving the internal controls over financial reporting and their operation that we consider to be reportable conditions. Reportable conditions involve matters coming to our attention relating to significant deficiencies in the design or operation of the internal controls over financial reporting that, in our judgment, could adversely affect the municipal divisions' ability to record, process, summarize, and report financial data consistent with the assertions of management in the special-purpose financial statements.

A material weakness is a condition in which the design or operation of one or more of the internal control components does not reduce to a relatively low level the risk that misstatements in amounts that would be material to the special-purpose financial statements being audited may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions. Our consideration of the internal controls over financial reporting would not necessarily disclose all matters in the internal controls that might be reportable conditions and, accordingly, would not necessarily disclose all reportable conditions that are also considered to be material weaknesses. However, we noted certain matters involving the internal controls over financial reporting and their operation that we consider to be material weaknesses, and these matters are presented in the accompanying Management Advisory Report.

This report is intended for the information of the management of the various municipal divisions of the Twenty-First Judicial Circuit and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

Claire McCaskill  
State Auditor

November 24, 1999 (fieldwork completion date)

## Notes to the Financial Statements

TWENTY-FIRST JUDICIAL CIRCUIT  
MUNICIPAL DIVISIONS  
NOTES TO THE FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies

A. Reporting Entity and Basis of Presentation

The accompanying special-purpose financial statements present only selected data for the funds administered by seven municipal divisions of the Twenty-First Judicial Circuit of the state of Missouri. The remaining municipal divisions of the Twenty-First Judicial Circuit are reported on separately.

Receipts, disbursements, and changes in cash are presented for each municipal division. The operating costs of each division are paid by the respective municipality and are not included in these financial statements.

The municipal division is responsible for cash bonds posted until case disposition allows appropriate disbursement. Bond monies relating to pending cases, whether in the custody of the city or the municipal division, are included in these financial statements.

B. Basis of Accounting

The Statements of Receipts, Disbursements, and Changes in Cash are prepared on the cash basis of accounting; accordingly, amounts are recognized when they are received or disbursed. This basis of accounting differs from generally accepted accounting principles, which require revenues to be recognized when they become available and measurable or when they are earned and expenditures or expenses to be recognized when the related liabilities are incurred.

C. Fiscal Authority and Responsibility

The municipal divisions account for fines and court costs resulting from prosecution of violations of municipal ordinances before the municipal judge or received through the traffic violations bureau, as well as cash bonds posted. Municipal violations could include traffic offenses, both moving and nonmoving; parking meter and overtime parking offenses; and other violations for which amounts are received by the municipal divisions and remitted to the city treasury. The municipal divisions also may account for restitutions received and disbursed through the divisions.

2. Cash

Section 479.080, RSMo 1994, requires municipal divisions to deposit fines and court costs into the city treasury at least monthly. Some divisions maintain bank accounts into which fines and court costs are deposited and later remitted to the city treasury. Other divisions do not maintain bank accounts, transmitting fines and court costs directly to the city treasury. Escrow bank accounts for bond monies received may be maintained by the city or the municipal division.

At June 30, 1999 and 1998, all bank account balances reported for the municipal divisions of the Twenty-First Judicial Circuit were entirely covered by federal depositary insurance.

3. Disbursements to State

The municipal divisions collect various amounts that must be remitted to the state of Missouri. These amounts include the judgment for the Motorcycle Safety Trust Fund; and the surcharges for the Crime Victims' Compensation and Services to Victims Funds, and the Peace Officer Standards and Training Commission Fund. The state's portions of these amounts are deposited into the city treasury for all municipal divisions. Amounts remitted by the cities to the state are not included in the financial statements.

4. City of Eureka

Bonds posted by defendants for the city of Eureka Municipal Division are deposited directly into the city treasury. A check is immediately written to the defendant for the amount of the bond and held until the disposition of the case. The amount of checks being held by the city at year end could not be readily determined. The financial statements present the bank balance as of June 30, 1999 and 1998.

In addition, these checks are sometimes endorsed by the defendant back to the city to be used to pay fines and costs assessed. Amounts in excess of the fines and costs assessed are then refunded to the defendant in cash. The amounts refunded to defendants in cash could not be readily determined. The refund amount reflected in the financial statements would include the entire amount of the original check, less the amount the Court Clerk indicated was applied for fines and costs.

5. City of Frontenac

The city of Crystal Lakes Park contracts with the city of Frontenac Municipal Division to collect all monies for its court. The receipts and disbursements of the city of Crystal Lakes Park Municipal Division are included in the city of Frontenac Municipal Division's financial statements.

6. City of University City

Bonds posted by defendants for the city of University City Municipal Division are transmitted directly to the city Finance Department for deposit to the city treasury. The amounts held by the city at year-end could not be determined and, therefore, are not included in the financial statements.

## MANAGEMENT ADVISORY REPORT SECTION

Management Advisory Report -  
State Auditor's Current Recommendations

TWENTY-FIRST JUDICIAL CIRCUIT  
MUNICIPAL DIVISIONS  
MANAGEMENT ADVISORY REPORT -  
STATE AUDITOR'S CURRENT RECOMMENDATIONS

We have audited the special-purpose financial statements of the various municipal divisions (other than the city of University City Municipal Division as of and for the years ended June 30, 1999 and 1998) of the Twenty-First Judicial Circuit as of and for the years ended June 30, 1999 and 1998, and have issued our report thereon dated November 24, 1999. That report expressed a qualified opinion on the special-purpose financial statements of the city of Eureka Municipal Division for the years ended June 30, 1999 and 1998.

We also had planned to audit the special-purpose financial statement of the city of University City Municipal Division as of and for the years ended June 30, 1999 and 1998, and have issued our report thereon dated November 24, 1999. In that report we did not express an opinion on the special-purpose financial statement.

The following Management Advisory Report presents our findings and recommendations arising from our procedures related to the municipal divisions' special-purpose financial statements. During those procedures, we also identified certain management practices which we believe could be improved. Our procedures were not designed or intended to be a detailed study of every system, procedure, and transaction. Accordingly, the findings presented in the following report should not be considered as all-inclusive of areas where improvements may be needed.

|           |   |
|-----------|---|
| <b>1.</b> | <b>City of Clarkson Valley Municipal Division</b> |
|-----------|---|

Receipt slips are not obtained for court monies transmitted to the city. To provide assurance all monies have been transmitted and allow reconciliation of municipal division transmittals to city records, a receipt slip should be obtained from the city for each transmittal of court monies.

**WE RECOMMEND** the city of Clarkson Valley Municipal Division obtain receipt slips for all monies transmitted to the city.

**AUDITEE'S RESPONSE**

*The Court Clerk responded that the City Clerk will begin immediately to acknowledge at the bottom of the daily balance form her receipt of the cash and checks represented.*

- A. Prenumbered receipt slips are not issued by the Court Clerk for some monies received. While monies received through the mail are recorded in the Court's receipt ledger, receipt slips are not issued for these payments. To adequately account for all receipts and ensure all receipts are properly deposited in the city treasury, a prenumbered receipt slip should be issued for all monies received and the numerical sequence of receipt slips should be accounted for properly.
- B. Bond monies are not retrieved from the police department and deposited on a timely basis. Twice a week the Court Clerk retrieves bond money from the police department and transmits the money directly to the city treasury. For those tested, the average transmitted amount was approximately \$600. To adequately safeguard bond receipts and reduce the risk of loss or misuse of funds, transmittals should be made daily or when accumulated receipts exceed \$100.

This condition was also noted in our two prior reports.

**WE RECOMMEND** the city of Creve Coeur Municipal Division:

- A. Issue prenumbered receipt slips for all monies received.
- B. Transmit bond monies daily or when accumulated receipts exceed \$100.

**AUDITEE'S RESPONSE**

*The Court Clerk provided the following responses:*

- A. *This procedure has already been implemented based on comments made by the auditors at the exit interview. Prenumbered one-write receipt slips are written for every payment received (both through the mail and those made in person). For those cases paid through the mail, only the defendant's that pay by money order or cashier's checks are mailed receipt slips (as done in the past). For all other payments received through the mail, the receipt slips are attached to the case file since the defendant can refer to their canceled check for proof of payment and postage is not a budgeted item for this purpose.*
- B. *Arrangements have been made with the police department to implement this recommendation immediately.*

A. During our review, we noted the following concerns relating to bonds:

- 1) Bond forms issued by the police department serve as the receipt slip to the defendant. However, these bond forms are not prenumbered. To properly account for all bond receipts, prenumbered receipt slips or bond forms should be issued for all bonds and their numerical sequence accounted for properly.
- 2) The police department accepts cash, checks, and money orders for bonds. Bond forms issued by the police department do not indicate the method of payments received. To ensure all bond monies are deposited intact, the method of payment for all bond monies received should be indicated on the bond forms. The composition of bond forms issued should be reconciled to the composition of transmittals and deposits.
- 3) The Court Clerk does not issue receipt slips to the police department for bonds turned over to the court. To adequately account for all receipts, prenumbered receipt slips should be issued for all monies received and the numerical sequence should be accounted for properly.
- 4) Refund checks for the full amount of the bond are prepared at the time a bond is received and are held by the Court Clerk pending court disposition. During court, the Court Clerk refunds the full amount of the bond to the defendant. If the bond refund check is to be applied to the fines and court costs, the defendant endorses the check over to the court and receives any refund in cash. This procedure of cashing bond refund checks does not allow fines and court costs to be transmitted intact.

To ensure fines and court costs are transmitted intact, the court should discontinue the practice of cashing bond refund checks. To accomplish this, the court should issue the refund checks only for the amount of the difference between the fines and court costs due and the total bond posted. The amounts applied toward the fines and court costs should be separately transferred from the bond account to the city treasury.

- 5) The court does not maintain a bond ledger on a current basis. The court has not consistently recorded the disposition of bonds received, and does not prepare a monthly listing of open items (liabilities).

To ensure proper accountability over open cases and ensure monies held in trust by the court are sufficient to meet liabilities, the disposition of all bonds should be

recorded in the bond ledger, and monthly listings of open items (liabilities) should be prepared by the court and reconciled to the bond ledger.

- 6) Outstanding checks have remained in the city's bond account in excess of one year, with one check being outstanding since July 1991. Outstanding checks should be periodically reviewed to determine if the payees can be readily located and if there is a need to reissue the checks. If payees cannot be located, Sections 447.550 through 447.585, RSMo 1994, which relate to unclaimed property, should be used to disburse these monies.
- 7) The municipal division has not implemented adequate procedures to follow up on bonds held for more than one year. As of June 30, 1999, the balance of the city's bond account included bond receipts totaling \$9,047 which have been held for at least one year.

An attempt should be made to determine the proper disposition of these bonds. A review should be made of any bonds posted by persons who failed to make the required court appearance to determine if the bonds should be forfeited and monies paid over to the city treasury as provided by Section 479.210, RSMo 1994. For those bonds which are held on closed cases and remain unclaimed, Section 447.550 through 447.585, RSMo 1994, which relate to unclaimed property, should be used to disburse these monies.

Conditions similar to 1) thru 6) were also noted in our two prior reports.

B. During our review, we noted the following concerns relating to receipts:

- 1) Monies collected are not transmitted to the city on a timely basis. Transmittals are generally made once a week and average approximately \$2,000. To adequately safeguard receipts and to reduce the risk of loss or misuse of funds, transmittals should be made daily or when accumulated receipts exceed \$100.
- 2) The municipal division accepts cash, checks, and money orders for fines and court costs. Receipt slips issued by the court do not always indicate the method of payment received. To ensure receipts are transmitted intact, the method of payment received should be indicated on the receipt slips. The composition of receipt slips issued should be reconciled to the composition of transmittals.
- 3) Checks and money orders are not restrictively endorsed upon receipt. To reduce the risk of loss or misuse of funds, checks and money orders should be restrictively endorsed immediately upon receipt.

Similar conditions were also noted in our two prior reports.

- C. The municipal division accepts cash, checks, and money orders for payment of restitution. Monies collected for restitution are disbursed to the appropriate party in the form received from the defendant. No documentation is maintained of these disbursements. In addition, we noted instances where receipt slips were not issued for all restitution receipts. We also noted instances where voided restitution receipt slips were not properly retained.

To adequately account for all restitution payments and to ensure all receipts are properly disbursed to the appropriate parties, all payments received should be deposited and disbursements made by check. Also, receipt slips should be issued for all monies received and voided receipt slips should be retained.

This condition was also noted in our prior report.

- D. In our report issued in 1997, we had a total of 13 recommendations to improve the controls and record keeping of the city of Eureka Municipal Division. During our current audit, we determined that only 2 of the 13 recommendations were fully implemented. The Municipal Judge and the Court Clerk need to ensure all of the recommendations made in this report are implemented.

**WE RECOMMEND** the city of Eureka Municipal Division:

- A.1. Request the police department issue prenumbered receipt slips or bond forms for all bond monies received and account for the numerical sequence.
2. Request the police department to indicate the method of payment on each bond form issued. The Court Clerk should reconcile the composition of bond forms issued to the composition of monies transmitted and deposited.
3. Issue prenumbered receipt slips to the police department for bonds transmitted to the court.
4. Issue separate checks to defendants for the amounts of the bond refunds and to the city for the amount of fines and court costs after case disposition is determined. In addition, the practice of cashing bond refund checks out of other court collections should be discontinued.
5. Maintain a bond ledger on a current basis and reconcile this ledger to a monthly listing of open items (liabilities).
6. Periodically review outstanding checks to determine if the payees can be located and if the checks can be reissued. If payees cannot be located, the monies should be disbursed to the state's Unclaimed Property Section in accordance with state law.

7. Implement adequate procedures to follow up on bonds being held and dispose of them in accordance with state law.
- B.1. Transmit receipts intact daily or when accumulated receipts exceed \$100.
2. Record the method of payment on all receipt slips issued and ensure someone at the city reconciles the composition of receipt slips issued to the composition of monies transmitted.
3. Restrictively endorse all checks and money orders immediately upon receipt.
- C. Deposit all monies received by the court and make all disbursements by check. In addition, receipt slips should be issued for all monies received and voided receipt slips should be retained.
- D. Ensure the recommendations made in this report are implemented.

### **AUDITEE'S RESPONSE**

*The Court Clerk provided the following responses:*

- A.1. *We will do this when we reorder bond forms. This will be done within three months.*
2. *We will add this when we reorder bond forms. This will be done within three months.*
3. *We will begin issuing prenumbered receipt slips to the police department. This will be done within three months.*
4. *We do not think we can implement this recommendation. We are comfortable with our current procedures. We will, however, investigate this matter.*
5. *We will begin maintaining a bond ledger on a current basis and will attempt to prepare a monthly listing of open items. This will be done within three months.*
6. *We will follow up on old outstanding checks. This will be done within three months.*
7. *We will send out letters and attempt to properly dispose of these bonds. This will be done within three months.*
- B.1. *We will transmit monies on a more timely basis. This will be done within three months.*
- B.2,3,  
& C. *We have implemented these recommendations.*

- D. *We will implement these recommendations in the next three months, except for recommendation A.4.*

|  |
|--|
| <b>4. City of Frontenac Municipal Division</b> |
|--|

The duties of receiving, recording, and depositing bond, fine, and court cost monies collected by the municipal division are not adequately segregated. While the City Finance Director performs the bond account bank reconciliation, the Court Clerk performs all other accounting duties. To safeguard against possible loss or misuse of funds, internal controls should provide reasonable assurance that all transactions are accounted for properly and assets are adequately safeguarded. Since this is an office of one employee and proper segregation of duties cannot be achieved, at a minimum, there should be a documented independent comparison of receipt slips issued to amounts deposited or transmitted.

A similar condition was also noted in our prior report.

**WE AGAIN RECOMMEND** the city of Frontenac Municipal Division establish a documented periodic review of municipal division records by an independent person.

**AUDITEE'S RESPONSE**

*The Court Clerk responded that as of March 2000, the Finance Officer will perform monthly checks on all court deposits and the general ledger sheets to ensure the amounts coincide with the court records.*

|   |
|---|
| <b>5. City of Richmond Heights Municipal Division</b> |
|---|

- A. Bond monies are not deposited intact or when accumulated receipts exceed \$100. During a cash count conducted on August 2, 1999, we noted approximately \$2,000 on hand. In addition, the Court Clerk had cashed a \$300 personal check out of bond receipts.

Bonds collected after regular office hours are collected by the police department. A receipt slip is issued and the bond money is placed in a lock box to be picked up and deposited by the Court Clerk approximately two times a week. The Court Clerk then receipts the bond monies in a one-write ledger and deposits the monies. To adequately safeguard bond receipts and reduce the risk of loss or misuse of funds, transmittals should be made intact daily or when accumulated receipts exceed \$100. Furthermore, the cashing of personal checks out of court receipts should be prohibited.

- B. The municipal division accepts cash, checks, and money orders for fines and court costs. Receipt slips issued by the court do not indicate the method of payments received. In addition, there is no independent comparison of the composition of receipt slips issued to the composition of monies transmitted to the city.

To provide assurance all monies received have been properly transmitted, the method of payment should be accurately recorded for all monies received, and the composition of receipt slips issued should be compared to the composition of transmittals to the city.

- C. Neither the police department nor the municipal division account for the numerical sequence or ultimate disposition of traffic and parking tickets and housing code violations.

Without a proper accounting for the numerical sequence and disposition of all tickets, violations, and complaint forms, the police department and the municipal division cannot be assured that all documents issued were properly submitted to the court for processing. A log listing the documents assigned, each document issued in numerical sequence, the date issued, and the violator's name and the ultimate disposition would help ensure all documents issued were submitted to the municipal division for processing, properly voided, or not prosecuted.

A similar condition was noted in our prior report.

- D. Crime Victims Compensation (CVC) and Peace Officers Standards and Training Commission (POSTC) fees are collected and turned over to the city. However, the city remits the state's share of these collections every two months. Section 595.045.5, RSMo Cumulative Supp. 1999, requires 95 percent of the CVC fee to be paid monthly to the state. POSTC fees should also be disbursed monthly to the state.

**WE RECOMMEND** the city of Richmond Heights Municipal Division:

- A. Ensure bond monies collected by the police department are deposited by the Court Clerk daily. The municipal division should deposit bond monies intact and discontinue the practice of cashing personal checks out of bond monies.
- B. Record the method of payment on all receipt slips issued by the Court Clerk and reconcile the composition of receipt slips issued to the composition of transmittals.
- C. Work with the police department to ensure adequate records are maintained to account for the numerical sequence and ultimate disposition of all traffic and parking tickets, housing code violations, and complaint forms issued.
- D. Request the city to properly remit CVC and POSTC fees to the state in accordance with state law.

## **AUDITEE'S RESPONSE**

*The Municipal Judge, the Court Clerk, and the City Finance Director provided the following responses:*

- A. The city's court division has implemented the State Auditor's recommendation and is depositing bond monies daily Monday through Friday. As the court division does not have normal work hours on Saturday or Sunday any bond monies collected after Friday at 6:00 p.m. and before Monday at 8:30 a.m. are deposited on the first Monday morning after receipt. All bond monies collected are deposited intact.*
- B. The city's court division has implemented the State Auditor's recommendation effective the first week of April 2000 and is recording the method of payment on all receipt slips. The following business day an accounting clerk in the finance division balances all daily receipts from the previous day to a computer-generated report which indicates method of payment.*
- C. As violation notice books are assigned to each officer, it is the responsibility of the officer to review all tickets within the assigned books for verification of sequential numbering. The officer then signs a violation book assignment sheet and notes any irregularities. A computer-generated listing from the municipal court program is being produced quarterly to identify gaps in ticket numbers in order to track missing numbers.*
- D. The city's court division has implemented the State Auditor's recommendation and is submitting these fees in a more timely manner.*

|  |
|--|
| <b>6. City of University City Municipal Division</b> |
|--|

- A. The municipal division enters fine and court cost monies received into a cash register. The cash register prepares a detail tape which shows the fine and cost amount collected for each case number and a summary tape which shows the total amount of fines and costs collected each day. From the summary tape, the daily deposit is prepared which is given to the city finance department for deposit into a city bank account. A transmittal form to support the amount transmitted to the city is also prepared from the summary tape and given to the city finance department. We noted the following concerns with the receipt tape and transmittal forms:
  - 1) The daily summary cash register tapes are not reconciled to the transmittal forms. We noted numerous instances where the amount of receipts on the cash register tape did not reconcile to the amount transmitted to the city for deposit. In a few cases, hand written adjustments were made to the summary tape to reconcile it to

the transmittal form; however, explanations for the adjustments were not documented.

In total, for the fiscal year ended June 30, 1999, we noted apparent collections of \$2,682 on the court's cash register tapes that were not transmitted to the city. These possible missing funds went undetected throughout the audit period due to numerous internal control weaknesses, little or no independent review, and a lack of adequate record keeping.

- 2) The assistant court clerks are allowed to make negative adjustments to the detail cash register tapes. Many of these negative adjustments to the detail cash register tapes were not supported and could not be explained by court personnel. For the month of April, 1999, we noted total negative adjustments of \$3,985. Of this amount, \$3,090 did not appear reasonable or was not supported on the detail tape. These negative adjustments reduced the amount the cash register indicated as receipted for the day, and thus the amount required to be transmitted to the city. There was no documentation on the detail tape to indicate that these negative adjustments had been reviewed and approved by the Court Clerk.
- 3) The numerical sequence of all receipt numbers according to the cash register tape was not accounted for properly. We noted instances in which there were gaps in the cash register receipt numbers. To properly account for fines and cost receipts, the numerical sequence of all receipt numbers should be accounted for properly.

To adequately account for court fines and costs monies received, the amount shown as received on the summary cash register tape should be reconciled with the amount transmitted to the city for deposit. In addition, the detail cash register tape should be reviewed for unusual items. The Court Clerk should review and approve negative adjustments to ensure that adjustments made are proper and account for the numerical sequence of all receipt numbers.

- B. Bonds posted with the police department are transmitted to the Court Clerk, who in turn transmits the money to the city's finance department for deposit to the city's General Revenue Fund bank account. Bond monies held by the city are segregated on the city records by use of a specific account number. Monthly listings of open items (liabilities) are prepared by the city's finance department. During our review, we noted the following concerns relating to bonds:

- 1) The open items list prepared at June 30, 1999 indicated the total of the open items was \$33,614 more than the balance of bonds in the bond account. In addition, neither the city nor the court reconcile the open items list to records of active bonds on a monthly basis. Reconciliation of open items is necessary to ensure

accountability over open cases and to ensure monies held in trust are sufficient to meet liabilities.

- 2) Bonds collected by the police department are not transmitted to the Court Clerk on a timely basis. Bonds are transmitted to the Court Clerk approximately once a week. During a cash count conducted on August 16, 1999, we noted \$3,700 of bond monies were being held in a lock box by the police department. To adequately safeguard bond receipts and reduce the risk of loss or misuse of funds, transmittals should be made daily or when accumulated receipts exceed \$100.
- 3) Prenumbered bond forms issued by the police department serve as the receipt slip to the defendant. However, the original copies of voided bond forms were not retained. To account for all monies received, copies of voided bond forms should be retained.

C. During our review, we noted the following concerns related to tickets issued by the police department and other city departments:

- 1) Neither the police department nor the municipal division account for the numerical sequence or ultimate disposition of tickets or complaints issued for violations of municipal ordinances. The police department does have a computer system where they enter traffic and parking tickets issued. The computer has the capability to list the tickets in numerical sequence. However, no one reviews this for missing ticket numbers. Furthermore, complaints are not entered into the computer system, the police department does not maintain a copy of complaints issued, and the court does not file complaints numerically.
- 2) Neither the housing, planning, and development department nor the court account for all tickets issued for housing code violations. The department does not issue prenumbered tickets. In addition, this department is receiving payments for fines without issuing prenumbered receipts slips. These payments are then transmitted to the court for processing. Without issuing prenumbered tickets, the court and the department cannot ensure a proper accounting of tickets issued. Without issuing prenumbered receipt slips, the department and the court cannot properly account for monies received.
- 3) Neither the sanitation department nor the court account for the numerical sequence or ultimate disposition of tickets or complaints issued for all violations issued by the sanitation department.
- 4) The police department submits a list of traffic tickets turned over to the court. There is no documentation that the list is compared to the tickets given to the court to ensure that the listing is accurate. The Court Clerk should ensure they have a

complete listing of all tickets received from the police department and sign the list to indicate her review and approval.

Without a proper accounting of the numerical sequence and disposition of tickets and complaints, the police department, the housing, planning, and development department, the sanitation department, and the court cannot be assured that all documents issued were properly processed. A log listing each ticket or complaint in numerical order, the date issued, the violator's name, and the ultimate disposition would ensure all tickets and complaints issued have been submitted to the court for processing, properly voided, or not prosecuted.

- D.1. We noted numerous instances in which the municipal division could not readily locate parking tickets issued or paid. Parking tickets are filed by the date paid, and are entered on the computer or recorded in a log of parking tickets received, noting the date they were paid. As a result, no cross reference exists between the parking tickets issued by the police department and the parking ticket files maintained by the court. Such a cross reference is necessary to ensure that all parking tickets issued by the police department have been turned over to the court for processing.
- 2. The municipal division does not have a listing of unpaid parking tickets due to the court and has not established adequate procedures to follow-up on unpaid parking tickets. A listing of unpaid parking tickets is necessary to facilitate monitoring of amounts due to the court, provide information to the Municipal Judge, and provide increased accountability over amounts due to the court. The court should institute additional procedures to collect amounts owed. In addition, the court should consider implementing procedures for writing off old uncollectible parking tickets.
- E. The Municipal Judge does not sign the dockets after dispositions are recorded. To ensure the proper disposition of all cases has been entered in the court records, the disposition of each case should be noted and the Municipal Judge should sign the court dockets.
- F. While a schedule of fines and court costs to be collected at the traffic violations bureau (TVB) for certain offenses is available, there was no schedule to assess a penalty for late payment of parking tickets. We noted various amounts assessed for late penalties. The court should prepare a schedule for late penalties and consistently assess these amounts.
- G. Checks and money orders are not restrictively endorsed upon receipt. To reduce the risk of loss or misuse of funds, checks and money orders should be restrictively endorsed immediately upon receipt.
- H. The court maintains a computerized docket of all receipts and accounts receivable due to the court. However, payments received are not always posted to this computerized record. Current financial records are necessary to facilitate monitoring of amounts due the

court, provide information to the Municipal Judge, and provide increased accountability over amounts due to the court.

- I. The municipal division or the city finance department does not properly disburse the state's portion of the crime victims compensation (CVC) fee on cases for which it is collected. Based on our review of city records as of June 30, 1999, there was \$10,500 of CVC fees that had been collected but not properly remitted to the state. Section 595.045, RSMo Cumulative Supp. 1999, requires 95 percent of such fees be paid to the state at least monthly.

Conditions similar to B., C., D., and E. were also noted in our prior reports.

**WE RECOMMEND** the city of University City Municipal Division:

- A.1. Along with the city, review the situation and take any necessary legal action to recover funds determined to be missing. In the future, the municipal division should reconcile summary cash register receipt tapes to the amount transmitted to the city for deposit and promptly investigate any differences.
2. Provide for review and approval of negative adjustments by the Court Clerk to ensure they are reasonable.
3. Account for the numerical sequence of cash register receipt numbers.
- B.1. Reconcile the monthly listing of open items prepared by the city finance department to the court's records of active bonds.
2. Request the police department transmit bond receipts daily or when accumulated receipts exceed \$100.
3. Retain all copies of voided bond forms.
- C. Work with all departments to ensure records are maintained to account for the numerical sequence and ultimate disposition of all tickets and complaints issued. In addition, the municipal division should ensure the listing of tickets and complaints issued is reviewed and any missing documents are accounted for properly. The Court Clerk should sign the listing of tickets to indicate her review and approval of the listing.
- D.1. Maintain parking ticket files, or a log, which would enable parking tickets to be located by parking ticket number.
2. Establish adequate procedures to collect parking fines owed the court and write off uncollectible amounts.

- E. Require the judge's signature on the court dockets and ensure the disposition of all cases is noted on the court dockets.
- F. Prepare a schedule of late penalties and assess late penalty fees consistently.
- G. Restrictively endorse all checks and money orders immediately upon receipt.
- H. Ensure all amounts received and accounts receivable amounts are properly posted to the computer receipt docket.
- I. Ensure CVC fees collected are remitted to the state in accordance with state law. In addition, the municipal division should determine the amount of unremitted CVC fees due to the state and make the appropriate payment.

### **AUDITEE'S RESPONSE**

*The Assistant City Manager provided the following responses:*

- A.1. *We agree. The clerk of the municipal court ensures daily balance summary cash receipts are reconciled to the transmittal forms. Regarding unaccounted for funds, the city will promptly begin an investigation into this matter.*
- 2. *We agree. The clerk of the municipal court now reviews and approves all negative adjustments made by court clerk assistants to ensure they are reasonable.*
- 3. *We agree. The clerk of the municipal court accounts for the numerical sequence of all receipts issued by the new software program.*
- B.1. *The finance department will work with the clerk of the municipal court to reconcile on a monthly basis the cash bond list to the court's records of active bonds. An immediate reconciliation of these records will occur to resolve the discrepancies between the active bond list and the balance of bonds in the bonds account. This will be done within six months.*
- 2. *The police department now transmits bond receipts daily.*
- 3. *All copies of voided bond forms are being retained.*
- C. *We agree. The police, housing, and sanitation departments are tracking all tickets going to and from the court division. In addition, the clerk of the municipal court signs the listing of tickets to indicate her review and approval of the listing.*

- D.1. *We agree. A new parking ticket system will be established within a year that will track all tickets issued and allow for the parking tickets to be located by ticket number.*
- 2. *We will continue to improve our process for collecting parking tickets.*
- E. *We agree. This recommendation has been implemented.*
- F. *We agree. A schedule of late penalties will be prepared within a month and we will consistently assess late penalty fees.*
- G. *We agree. All checks and money orders are being restrictively endorsed upon receipt.*
- H. *We agree. The clerk of the municipal court now ensures all amounts received on accounts receivable amounts are properly posted to the computer receipt docket.*
- I. *We agree. All CVC fees collected are now remitted to the state in accordance with state law. In addition, any CVC unremitted fees due the state shall be remitted to the state in accordance with state law within one month.*

|           |  |
|-----------|--|
| <b>7.</b> | <b>City of Winchester Municipal Division</b> |
|-----------|--|

- A. Court receipts are not transmitted to the city treasury on a timely basis. The Court Clerk transmits receipts approximately twice per week with the average transmittal totaling approximately \$447. To adequately safeguard receipts and reduce the risk of loss or misuse of funds, monies should be transmitted daily or when accumulated receipts exceed \$100.
- B. The Municipal Judge does not sign all court dockets after case dispositions are recorded. To ensure the proper disposition of all cases has been entered in the court records, the judge should review each court docket and sign the docket to indicate approval of the recorded disposition.

A condition similar to A. was noted in our prior report.

**WE RECOMMEND** the city of Winchester Municipal Division:

- A. Transmit receipts intact daily or when accumulated receipts exceed \$100.
- B. Ensure that the judge reviews and signs all court dockets after the final disposition has been recorded.

**AUDITEE'S RESPONSE**

*The Municipal Judge, Court Clerk, and City Administrator provided the following responses:*

- A. Due to the small size of our office staff, it is not always possible for us to maintain the segregation of duties when creating the deposits and transporting them to the bank, if it is done on a daily basis. Because of part-time personnel, vacation, sick leave, etc., there are times when we have only been able to deposit the funds twice during the week. We will endeavor to transmit the receipts daily or when accumulated receipts exceed \$100.*
- B. The Court Clerk will ensure that the Judge reviews and signs all court dockets after the final disposition has been recorded each court night.*

This report is intended for the information of the management of the various municipal divisions of the Twenty-First Judicial Circuit and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

## Follow-Up on State Auditor's Prior Recommendations

TWENTY-FIRST JUDICIAL CIRCUIT  
MUNICIPAL DIVISIONS  
FOLLOW-UP ON STATE AUDITOR'S PRIOR RECOMMENDATIONS

This section reports follow-up action taken by the municipal divisions of the Twenty-First Judicial Circuit on recommendations made in the Management Advisory Report (MAR) of our reports issued for the two years ended June 30, 1996, and June 30, 1994. The prior recommendations which have not been implemented, but are considered significant, have been repeated in the current MAR. Although the remaining unimplemented recommendations have not been repeated, the municipal divisions should consider implementing these recommendations.

1. City of Clarkson Valley Municipal Division

- A.1. Bond forms issued by the Ballwin police department served as the receipt slip to the defendant; these bond forms were not prenumbered.
- 2. The municipal division bond account required two signatures for all disbursements; however, the checks were sometimes signed in advance by the Mayor.
- B. Receipt slips issued by the court did not always indicate the correct method of payment received.
- C. Monies collected were not transmitted intact on a timely basis.
- D. The municipal division did not include all cases on the court docket.

Recommendation:

The municipal division:

- A.1. Request the Ballwin police department to issue prenumbered receipt slips or bond forms for all bond monies received and account for the numerical sequence.
- 2. Discontinue the practice of signing checks in advance.
- B. Indicate the correct method of payment on each receipt slip issued, and reconcile the composition of receipt slips issued to the composition of monies transmitted.
- C. Transmit receipts intact daily or when accumulated receipts exceed \$100.
- D. Include all cases on the court docket as required by state law.

Status:

A-D. Implemented.

2. City of Creve Coeur Municipal Division

- A.1. Bond monies were not retrieved from the police department and deposited on a timely basis.
- 2. The municipal division did not maintain a running balance in the checkbook register for the bond account.
- 3. Monthly listings of open items (liabilities) were not reconciled to the bank balance and retained.
- 4. Old outstanding checks totaling \$1,866 had remained in the city's bond bank account in excess of one year.

B. Receipt slips were not obtained for court monies transmitted to the city.

Recommendation:

The municipal division:

- A.1. Transmit bond monies daily or when accumulated receipts exceed \$100.
  - 2. Maintain a running balance of the bond account in the checkbook register.
  - 3. Prepare a monthly listing of open items (liabilities) and reconcile it to the bank balance.
  - 4. Periodically review outstanding checks to determine if the payees can be located and if the checks can be reissued. If payees cannot be located, the monies should be disbursed to the state's Unclaimed Property Section in accordance with state law.
- B. Obtain receipt slips for all monies transmitted to the city.

Status:

A.1. Not implemented. See MAR No. 2.

A.2-3.

& B. Implemented.

A.4. Not implemented. Although not repeated in our current MAR, our recommendation remains as stated above.

3. City of Eureka Municipal Division

- A.1. Bond forms issued by the police department served as the receipt slip to the defendant. The bond forms were not prenumbered.
- 2. Bond forms issued by the police department did not indicate the method of payments received. The composition of bond forms issued was not reconciled to the composition of transmittals and deposits.
- 3. The Court Clerk did not issue receipt slips to the police department for cash bonds turned over to the court.
- 4. Refund checks for the full amount of the bond were prepared in advance at the time a bond was received and were held by the Court Clerk pending court disposition. The Court Clerk made cash refunds to the defendant on court night.
- 5. The Court Clerk did not maintain a bond ledger.
- 6. Outstanding checks totaling \$1,740 had remained in the city's bond account in excess of one year.
- B.1. Monies collected were not transmitted on a timely basis.
- 2. Receipt slips issued by the court did not indicate the method of payments received. The composition of receipt slips issued was not reconciled to the composition of transmittals.
- 3. Voided receipt slips were not retained.
- 4. Checks and money orders were not restrictively endorsed upon receipt.
- 5. The duties of receiving, recording, and transmitting fine and court cost monies collected by the municipal division were not adequately segregated.
- C. The Municipal Judge did not sign court dockets after case dispositions were recorded.
- D. Monies collected for restitution were disbursed to the appropriate party in the form received from the defendant, resulting in cash disbursements.

Recommendation:

The municipal division:

- A.1. Request the police department to issue prenumbered receipt slips or bond forms for all bond monies received and account for the numerical sequence.
  2. Request the police department to indicate the method of payment on each bond form issued. The Court Clerk should reconcile the composition of receipt slips issued to the composition of monies transmitted and deposited.
  3. Issue prenumbered receipt slips to the police department for cash bonds transmitted.
  4. Issue separate checks to the defendant for the amount of the bond refund and to the city for the amount of fines and court costs after case disposition is determined. In addition, the practice of cashing bond refund checks out of other cash collections should be discontinued.
  5. Maintain a bond ledger indicating date and amount of receipt and date and method of disbursement for all bonds received.
  6. Periodically review outstanding checks to determine if the payees can be located and if the checks can be reissued. If payees cannot be located, the monies should be disbursed to the state's Unclaimed Property Section in accordance with state law.
- B.1. Transmit receipts intact daily or when accumulated receipts exceed \$100.
  2. Record the method of payment on all receipt slips issued and ensure someone at the city reconciles the composition of receipt slips issued to the composition of monies transmitted.
  3. Retain all voided receipt slips.
  4. Restrictively endorse all checks and money orders immediately upon receipt.
  5. Establish a documented periodic review of municipal division records by an independent person.
- C. Require the Municipal Judge to review all court dockets for propriety and sign the dockets.
  - D. Deposit all monies received by the court and make all disbursements by check.

Status:

A,B.1-4,  
&D. Not implemented. See MAR No. 3.

B. 5.  
&C. Implemented.

4. City of Frontenac Municipal Division

- A.1. The Court Clerk did not account for the numerical sequence of all police department receipt slips.
- 2. Receipt slips issued by the court did not indicate the method of payments received.
- B. The duties of receiving, recording, and depositing/transmitting bond, fine, and court cost monies collected by the municipal division were not adequately segregated.
- C. Neither the police department nor the municipal division accounted for the numerical sequence of tickets issued.

Recommendation:

The municipal division:

- A.1. Account for the numerical sequence of all police department receipt slips.
- 2. Record the method of payment on all receipt slips issued and reconcile the composition of receipt slips issued to the composition of monies deposited.
- B. Establish a documented periodic review of municipal division records by an independent person.
- C. Work with the police department to account for the numerical sequence of tickets issued and investigate any gaps in the numerical sequence.

Status:

A&C. Implemented.

B. Not implemented. See MAR No. 4.

5. City of Richmond Heights Municipal Division

- A. Neither the police department nor the court maintained a record of summonses assigned to officers.
- B. Outstanding checks totaling \$427 were in the municipal division's bank account in excess of one year.
- C. The Municipal Judge had not issued a court order to formally establish the TVB.
- D. The Municipal Judge did not sign the docket after dispositions were recorded.

Recommendation:

The municipal division:

- A. Maintain a log of summonses assigned to officers.
- B. Periodically review outstanding checks to determine if the payees can be located and if the checks can be reissued. If payees cannot be located, the monies should be disbursed to the state's Unclaimed Property Section in accordance with state law.
- C. Issue a court order to formally establish the TVB.
- D. Require the judge's signature on the court dockets.

Status:

- A. Not implemented. See MAR No. 5.
- B. Not implemented. Although not repeated in our current MAR, our recommendation remains as stated above.

C&D. Implemented.

6. City of University City Municipal Division

- A.1. The open items list prepared at June 30, 1994 indicated the total of the open items was \$926 more than the balance of bonds that was in the bond account. The Court Clerk did not reconcile the open items list to records of active bonds on a monthly basis. The June 30, 1994, balance of bonds in the bond account included bond receipts totaling \$7,694 which had been held in excess of one year.
- 2. Bonds collected by the police department were not transmitted to the Court Clerk on a timely basis.

3. Bond forms issued by the police department which served as the receipt slip to the defendant, were not prenumbered.
- B. Neither the police department nor the court accounted for the numerical sequence or ultimate disposition of tickets or complaints issued for all violations of municipal ordinances.
- C. The municipal division could not readily locate parking tickets issued or paid.
- D. The composition of the receipt slips issued was not reconciled to the composition of transmittals.
- E. Receipts were not always transmitted to the city on a timely basis.
- F. The municipal judge did not sign the dockets after dispositions were recorded.
- G. A court order to formally establish the TVB could not be located by city or court personnel.

Recommendation:

The municipal division:

- A.1.a. Reconcile the monthly listing of open items prepared by the finance department to the court's records of active bonds. In addition, the reason for the apparent \$926 shortage should be investigated by reviewing all open bonds on the open items list. In the event cash is determined to be insufficient to meet bond liabilities, the court will need to review this matter with the city to determine the proper resolution.
- b. Dispose of unclaimed bonds in accordance with state law.
2. Request the police department to transmit bond receipts daily or when accumulated receipts exceed \$100.
3. Request the police department issue prenumbered receipt slips or bond forms for all bond monies received and account for their numerical sequence.
- B. Work with the police department to ensure records are maintained to account for the numerical sequence and ultimate disposition of all tickets and complaints issued. In addition, the municipal division should ensure the listing of tickets and complaints issued is reviewed and any missing documents are accounted for properly.

- C. Maintain parking ticket files, or a log, which would enable parking tickets to be located by parking ticket number.
- D. Reconcile the composition of receipts issued to the composition of transmittals.
- E. Enter all receipts on the cash register immediately upon receipt.
- F. Require the judge's signatures on the court dockets and ensure the disposition of all cases is noted on the court dockets.
- G. Issue a court order to formally establish the TVB.

Status:

A.1.a.,  
A.2.,B,  
C&D. Not implemented. See MAR No. 6.

A.1.b.,E,  
F&G. Implemented.

A.3. Partially implemented. The police department issues prenumbered bond forms; however, voided bond forms are not retained. See MAR No. 6.

7. City of Winchester Municipal Division

- A.1. The June 30, 1996, balance in the municipal division's bond account included bond receipts totaling \$2,755 which had been held in excess of one year.
- 2. Bond forms issued by the Ballwin police department served as the receipt slip to the defendant; these bond forms were not prenumbered.
- B. Monies collected for fines and court costs were not transmitted on a timely basis.
- C. The duties of receiving, recording, and depositing/transmitting bond, fine, and court cost monies collected by the municipal division were not adequately segregated.
- D. Neither the police department nor the court accounted for the numerical sequence of tickets or summonses issued.

Recommendation:

The municipal division:

- A.1. Forfeit any bonds for persons who failed to make the required court appearance, and attempt to locate those defendants who have a cash bond due back to them and remit the bond amount. Any bond monies remaining unclaimed should be remitted to the state in accordance with state law. Procedures should be established to routinely follow-up on cash bonds remaining on hand over a period of time.
- 2. Request the police department issue prenumbered receipt slips or bond forms for all bond monies received.
- B. Transmit receipts intact daily or when accumulated receipts exceed \$100.
- C. Establish a documented periodic review of municipal division records by an independent person.
- D. Work with the police department to account for the numerical sequence of all tickets and summonses issued and investigate any gaps in the numerical sequence.

Status:

A,C,  
& D. Implemented.

B. Not implemented. See MAR No. 7.

## STATISTICAL SECTION

History, Organization, and  
Statistical Information

TWENTY-FIRST JUDICIAL CIRCUIT  
MUNICIPAL DIVISIONS  
HISTORY, ORGANIZATION,  
AND STATISTICAL INFORMATION

Organization

The Twenty-First Judicial Circuit is composed of St. Louis County. The Honorable Robert Cohen serves as Presiding Judge. This report includes seven of the eighty-two municipal divisions within the Twenty-First Judicial Circuit.

The municipal divisions are governed by Chapter 479, RSMo 1994, and by Supreme Court Rule No. 37 titled "Ordinance Violations and Traffic Violations Bureau (TVB)." Section 479.050, RSMo 1994, provides that each municipal division may establish a TVB in which fines and costs are collected at times other than during court and transmitted to the city treasury.

Operating Costs

The operating costs and court salaries of each municipal division are paid by the respective municipality.

Municipal Division Organization, Personnel, and Caseload Information

1. City of Clarkson Valley

The Court Clerk is responsible for recording transactions as well as handling collections. The city of Ballwin police department collects bond monies. The police department transmits any bond collections to the Court Clerk twice weekly. Fines and court costs collected are transmitted by the Court Clerk directly to the City Clerk for deposit into the city treasury weekly. Bond monies are transmitted weekly by the Court Clerk to the City Clerk for deposit into a municipal division bank account pending disposition. Court is held once a month. A TVB has been established to receive payments of fines and court costs at times other than during court.

Personnel

|                 |                 |
|-----------------|-----------------|
| Municipal Judge | Rene' E. Lusser |
| Court Clerk     | Donna Guentz*   |

\* Donna Guentz retired December 31, 1999 and Susan Pritchard was hired as Court Clerk in January 2000.

| Number of cases filed | 1,742                      | 1,510       |

## 2. City of Creve Coeur

The Court Clerk and Deputy Court Clerk are responsible for recording transactions as well as handling collections. The police department collects bond monies. The police department transmits bond collections to the Court Clerk approximately twice a week. The Deputy Court Clerk transmits fines, court costs, and bonds directly to the city finance department daily for deposit to the city treasury. Bond monies are deposited in a city bank account pending disposition. Court is held three times a month. A TVB has been established to receive payments of fines and court costs at times other than during court.

## 3. City of Eureka

### Organization

The Court Clerk is responsible for recording transactions as well as handling collections. The police department collects bond monies. Bond monies are placed in a safe by the police department. The Court Clerk retrieves the bond monies from the safe daily. Fines and court costs collected are transmitted by the Court Clerk directly to the City Clerk's office approximately weekly for deposit into the city treasury. Bond monies are transmitted by the Court Clerk directly to the City Clerk's office several times a month for deposit in a city bank account pending disposition. Court is held twice a month. A TVB has been established to receive payments of fines and court costs at times other than during court.

| Number of tickets issued | 1,838                      | 2,077       |

4. City of Frontenac

Organization

The Court Clerk is responsible for recording transactions as well as handling collections. The police department collects bond monies when the Court Clerk is not available. Bond monies are placed in a lock box by the police department. The Court Clerk retrieves and deposits the bond monies daily. Fines and court costs collected are deposited by the Court Clerk into the city treasury approximately twice a week. Bond monies are deposited daily by the Court Clerk in a municipal division bank account pending disposition. Court is held once a month. A TVB has been established to receive payments of fines and court costs at times other than during court.

Personnel

|                 |                  |
|-----------------|------------------|
| Municipal Judge | Tom W. DePriest* |
| Court Clerk     | Leesa Ross**     |

\*James F. McMullin served as Judge from April, 1998 to June, 1998 and Michael M. Frank served as Judge until April, 1998.

\*\* Leesa Ross became Assistant City Clerk on February 14, 2000, and Tina Flowers was appointed as Court Clerk.

FORTY-FOURTH JUDICIAL CIRCUIT

CITY OF MANSFIELD, MISSOURI

MUNICIPAL DIVISION

PERIOD APRIL 1 TO AUGUST 31, 1999, AND  
TWO YEARS ENDED MARCH 31, 1999

**From The Office Of State Auditor  
Claire McCaskill**

Report No. 2000-30  
May 4, 2000  
[www.auditor.state.mo.us](http://www.auditor.state.mo.us)

AUDIT REPORT

Office Of The  
State Auditor Of Missouri  
Claire McCaskill

May 2000

**During our audit of the Forty-Fourth Judicial Circuit, City of Mansfield, Missouri, Municipal Division, we identified the following problems.**

The City of Mansfield Municipal Division accepts cash, checks, and money orders for payment of fines, court costs, and bonds. The Court Clerk is responsible for receiving, recording, and depositing court monies as well as preparing disbursements and reconciling bank statements. Prenumbered receipt slips are issued for monies received, and deposits are made into a municipal court bank account.

Court records indicate \$3,898 was collected by the court but not deposited into the court bank account. In addition, \$64 cash was reported stolen on August 8, 1999 in a break-in at city hall. As a result, undeposited receipts total \$3,962.

The monies that are missing appear to represent cash receipts which were received between July 1998 and June 1999 and recorded but not deposited. The cash percentage of deposits decreased approximately 20 percent during July 1998 through June 1999.

Two receipt books containing a total of 300 municipal court receipts could not be located by the court. We located 84 duplicate copies of these receipt slips. It appears that receipt slips were issued from these two receipt books at the same time other receipt books were in use. The "missing receipt books" included court monies that were received but not deposited into the court's bank accounts. The use of these additional receipt books helped to conceal the misappropriation. Because 216 receipt slips are still missing, it appears likely additional monies have been misappropriated.

Information gathered during our review has been provided to the Wright County Prosecuting Attorney and Sheriff.

The duties of receiving, recording, depositing, and disbursing court receipts are not adequately segregated. The Court Clerk performs all of the duties related to the collection and disbursement of fines, court costs, and bonds. Neither the Judge nor other personnel independent of the cash custody and record-keeping functions provide any supervision or review of the work performed by the Court Clerk.

Receipt slips are not deposited on a timely basis. Receipts were deposited approximately once or twice a month. To adequately safeguard receipts and to reduce the risk of loss or misuse of funds, deposits should be made intact daily or when accumulated receipts exceed \$100.

Fines and court costs are not disbursed monthly to the state and city treasury. As of August 1999 the former court clerk had not disbursed fines and court costs to the city since September 1998. Crime Victim's Compensation (CVC) and Police Officer Standards and Training Commission (POSTC) fees have not been turned over to the state since February 1999. State law requires 95 percent of the CVC to be paid monthly to the state. POSTC fees should also be disbursed monthly to the state.

## FINANCIAL SECTION

## State Auditor's Reports

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

**INDEPENDENT AUDITOR'S REPORT ON  
THE FINANCIAL STATEMENTS**

Presiding Judge  
Forty-Fourth Judicial Circuit  
and  
Municipal Judge  
Mansfield, Missouri

We had planned to audit the accompanying special-purpose financial statement of the city of Mansfield Municipal Division of the Forty-Fourth Judicial Circuit as of and for the period April 1 to August 31, 1999, and the years ended March 31, 1999 and 1998, as identified in the table of contents. This special-purpose financial statement is the responsibility of the municipal division's management.

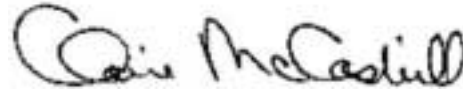

The accompanying special-purpose financial statement was prepared for the purpose of presenting the receipts, disbursements, and changes in cash of the city of Mansfield Municipal Division of the Forty-Fourth Judicial Circuit and is not intended to be a complete presentation of the financial position and results of operations of the municipal division.

As a result of internal control weaknesses, inadequate records, and evidence of fraud, we were unable to satisfy ourselves by appropriate audit tests or other means as to receipts and disbursements of fines, court costs, and bonds for the period April 1 to August 31, 1999, and the years ended March 31, 1999 and 1998.

Because of the effects of the matters discussed in the preceding paragraph, the scope of our work was not sufficient to enable us to express, and we do not express, an opinion on the special-purpose financial statement of the city of Mansfield Municipal Division as of and for the period April 1 to August 31, 1999, and the years ended March 31, 1999 and 1998.

In accordance with Government Auditing Standards, we also have issued our report dated December 9, 1999, on our consideration of the municipal division's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grants.

The accompanying History, Organization, and Statistical Information is presented for informational purposes. This information was obtained from the municipal division's management and was not subjected to auditing procedures.

A handwritten signature in dark ink, appearing to read "Claire McCaskill". The signature is fluid and cursive, with the first name "Claire" written in a larger, more prominent script than the last name "McCaskill".

Claire McCaskill  
State Auditor

December 9, 1999 (fieldwork completion date)

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

**INDEPENDENT AUDITOR'S REPORT ON COMPLIANCE  
AND ON INTERNAL CONTROL OVER FINANCIAL REPORTING**

Presiding Judge  
Forty-Fourth Judicial Circuit  
and  
Municipal Judge  
Mansfield, Missouri

We had planned to audit the special-purpose financial statement of the city of Mansfield Municipal Division of the Forty-Fourth Judicial Circuit as of and for the period April 1 to August 31, 1999, and the years ended March 31, 1999 and 1998, and have issued our report thereon dated December 9, 1999. In that report we did not express an opinion on the special-purpose financial statement; as a result of internal control weaknesses, inadequate records, and evidence of fraud, we were unable to satisfy ourselves by appropriate audit tests or other means as to receipts and disbursements of fines, court costs and bonds for the periods indicated above. However, we were able to perform certain procedures regarding the municipal division's compliance with legal provisions and internal control, and these procedures are discussed below.

Compliance

As part of our attempts to obtain reasonable assurance about whether the special-purpose financial statement of the city of Mansfield Municipal Division of the Forty-Fourth Judicial Circuit is free of material misstatement, we performed tests of the municipal division's compliance with certain provisions of laws, regulations, contracts, and grants, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our procedures, and accordingly, we do not express such an opinion. The results of our tests disclosed material instances of noncompliance that are required to be reported under Government Auditing Standards and which are presented in the accompanying Management Advisory Report. We also noted certain other instances of noncompliance which are presented in that report.

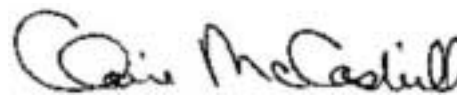

Internal Control Over Financial Reporting

In planning and performing our procedures related to the special-purpose financial statement of the city of Mansfield Municipal Division of the Forty-Fourth Judicial Circuit, we considered the municipal division's internal controls over financial reporting. Our consideration was performed in connection with our attempts to determine whether an opinion could be expressed on the special-purpose financial statement and not to provide assurance on the internal control over financial reporting. However, we noted certain matters involving the internal control over financial reporting

and its operation that we consider to be reportable conditions. Reportable conditions involve matters coming to our attention relating to significant deficiencies in the design or operation of the internal control over financial reporting that, in our judgement, could adversely affect the municipal division's ability to record, process, summarize, and report financial data consistent with the assertions of management in the special-purpose financial statement.

A material weakness is a condition in which the design or operation of one or more of the internal control components does not reduce to a relatively low level the risk that misstatements in amounts that would be material to the special-purpose financial statement may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions. Our consideration of the internal control over financial reporting would not necessarily disclose all matters in the internal control that might be reportable conditions and, accordingly, would not necessarily disclose all reportable conditions that are also considered to be material weaknesses. However, we noted certain matters involving the internal control over financial reporting and its operation that we consider to be material weaknesses, and these matters are presented in the accompanying Management Advisory Report.

This report is intended for the information of the management of the city of Mansfield Municipal Division of the Forty-Fourth Judicial Circuit and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

A handwritten signature in black ink, appearing to read "Claire McCaskill". The signature is fluid and cursive, with the first name "Claire" written in a larger, more prominent script than the last name "McCaskill".

The accompanying Notes to the Financial Statement are an integral part of this statement.

## Notes to the Financial Statement

FORTY-FOURTH JUDICIAL CIRCUIT  
CITY OF MANSFIELD, MISSOURI  
MUNICIPAL DIVISION  
NOTES TO THE FINANCIAL STATEMENT

1. Summary of Significant Accounting Policies

A. Reporting Entity and Basis of Presentation

The accompanying special-purpose financial statement presents only selected data for the funds administered by the city of Mansfield Municipal Division of the Forty-Fourth Judicial Circuit of the state of Missouri.

Receipts, disbursements, and changes in cash are presented for the municipal division. The operating costs of the division are paid by the city of Mansfield and are not included in the financial statement.

The municipal division is responsible for cash bonds posted until case disposition allows appropriate disbursement. Bond monies relating to pending cases in the custody of the municipal division are included in the financial statement.

B. Basis of Accounting

The Statement of Receipts, Disbursements, and Changes in Cash is prepared on the cash basis of accounting; accordingly, amounts are recognized when they are received or disbursed. This basis of accounting differs from generally accepted accounting principles, which require revenues to be recognized when they become available and measurable or when they are earned and expenditures or expenses to be recognized when the related liabilities are incurred.

C. Fiscal Authority and Responsibility

The municipal division accounts for fines and court costs resulting from prosecution of violations of municipal ordinances before the municipal judge or received through the traffic violations bureau, as well as cash bonds posted. Municipal violations could include traffic offenses, both moving and nonmoving; parking offenses; and other violations for which amounts are received by the municipal division and remitted to the city treasury. The municipal division also may account for restitutions received and disbursed through the division.

2. Cash

Section 479.080, RSMo 1994, requires municipal divisions to deposit fines and court costs into the city treasury at least monthly. The division maintains a bank account into which fines, court costs, and bonds are deposited and later remitted to the city treasury.

At August 31, 1999 and March 31, 1999 and 1998, the bank account balance reported for the city of Mansfield Municipal Division of the Forty-Fourth Judicial Circuit was entirely covered by federal depositary insurance.

3. Missing Funds

Fines, court costs, and bonds totaling at least \$3,962 which court records indicate were received by the municipal division but not deposited, are included in receipts and are presented as unaccountable disbursements on the financial statement for the period April 1 to August 31, 1999, and the year ended March 31, 1999.

## MANAGEMENT ADVISORY REPORT SECTION

## Executive Summary

FORTY-FOURTH JUDICIAL CIRCUIT  
CITY OF MANSFIELD, MISSOURI  
MUNICIPAL DIVISION  
EXECUTIVE SUMMARY

Cash receipts for fines, court costs and bonds totaling at least \$3,898 were received and not deposited during the period April 1, 1998 through June 30, 1999. Two receipt books used during this period cannot be located and court monies had not been remitted to the city since September 1998, which helped to conceal the misappropriation of funds.

These misappropriations could have been prevented or detected on a more timely basis if adequate oversight and reviews had been performed and internal controls, as noted in the prior Management Advisory Report (MAR) and repeated in the current MAR, had been established.

Bradford E. Ellsworth currently serves as the Municipal Judge of the city of Mansfield. Angela Turney was appointed Court Clerk in January 1998, and in April 1998 she was also appointed City Clerk. Angela left employment in August 1999. She was responsible for receiving, recording, depositing, and disbursing monies and preparing bank reconciliations.

**Management Advisory Report -  
State Auditor's Current Recommendations**

FORTY-FOURTH JUDICIAL CIRCUIT  
CITY OF MANSFIELD, MISSOURI  
MUNICIPAL DIVISION  
MANAGEMENT ADVISORY REPORT-  
STATE AUDITOR'S CURRENT RECOMMENDATIONS

We had planned to audit the special-purpose financial statement of the city of Mansfield Municipal Division of the Forty-Fourth Judicial Circuit as of and for the period April 1 to August 31, 1999, and the years ended March 31, 1999, and 1998, and have issued our report thereon dated December 9, 1999. In that report, we did not express an opinion on the special-purpose financial statement; as a result of internal control weaknesses, inadequate records, and evidence of fraud, we were unable to satisfy ourselves by appropriate audit tests or other means as to receipts and disbursements of fines, court costs, and bonds for the period indicated above.

The following Management Advisory Report presents our findings and recommendations arising from our procedures related to the municipal division's special-purpose financial statement. During those procedures, we also identified certain management practices which we believe could be improved. Our procedures were not designed or intended to be a detailed study of every system, procedure, and transaction. Accordingly, the findings presented in the following report should not be considered as all-inclusive of areas where improvements may be needed.

|           |                      |
|-----------|----------------------|
| <b>1.</b> | <b>Missing Funds</b> |
|-----------|----------------------|

The city of Mansfield Municipal Division accepts cash, checks, and money orders for payment of fines, court costs, and bonds. The Court Clerk is responsible for receiving, recording, and depositing court monies as well as preparing disbursements and reconciling bank statements. Prenumbered receipt slips are issued for monies received, and deposits are made into a municipal court bank account.

Court records indicate the following monies that were collected by the court but not deposited into the court bank account:

|  | Period April 1<br>to June 30,<br>1999 | Year Ended<br>March 31, 1999 | Total |
|--|---------------------------------------|------------------------------|-------|
| Fines, court costs, and<br>bonds not deposited | \$ 1,442                              | 2,456                        | 3,898 |

In addition, \$64 cash was reported stolen on August 8, 1999 in a break-in at city hall. As a result, undeposited receipts total \$3,962.

The monies that are missing appear to represent cash receipts which were received between July 1998 and June 1999, and were recorded but not deposited. The cash percentage of deposits decreased approximately 20 percent during the period July 1998 through June 1999.

Two receipt books containing a total of 300 municipal court receipts could not be located by the court. We located 84 duplicate copies of these receipt slips. It appears that receipt slips were issued from these two receipt books at the same time other receipt books were in use. The “missing receipt books” included court monies that were received but not deposited into the court’s bank accounts. The use of these additional receipt books helped to conceal the misappropriation. Because 216 receipt slips are still missing, it appears likely additional monies have been misappropriated.

Lack of internal controls, inadequate segregation of duties, and little or no independent review, as discussed in the remainder of the Management Advisory Report (MAR), allowed this misappropriation to go undetected.

Information gathered during our review has been provided to the Wright County Prosecuting Attorney and Sheriff.

**WE RECOMMEND** the municipal division, along with the city, work with law enforcement officials regarding any criminal prosecution and to obtain restitution of the missing funds.

**AUDITEES RESPONSE:**

*The Municipal Judge and Court Clerk responded:*

*We agree to cooperate with law enforcement officials regarding any criminal prosecution and to obtain restitution of the missing funds. A public office is a public trust. All current city officials are committed to recovery of any and all funds wrongfully withheld or taken.*

|  |
|--|
| <b>2. Accounting Controls and Procedures</b> |
|--|

- A. The duties of receiving, recording, depositing, and disbursing court receipts are not adequately segregated. The Court Clerk performs all of the duties related to the collection and disbursement of fines, court costs, and bonds. Neither the Judge nor other personnel independent of the cash custody and record-keeping functions provide any supervision or review of the work performed by the Court Clerk.

To safeguard against possible loss or misuse of funds, internal controls should provide reasonable assurance that all transactions are accounted for properly and assets are adequately safeguarded. Internal controls would be improved by segregating the duties of receiving and depositing court monies from recording receipts. If proper segregation of duties cannot be achieved, at a minimum, there should be a documented supervisory review of the bank reconciliations and a comparison of court receipt slips issued to amounts deposited.

- B. Beginning in July 1998, receipt slips were not issued or retained for some monies received. In addition, the numerical sequence of receipt slips was not accounted for properly. Some receipt slips were not issued in order and other receipt slips were backdated.

To adequately account for all monies received, receipt slips should be issued for all monies as they are received, and the composition of receipt slips should be reconciled to the composition of bank deposits. In addition, receipt slips should be issued in order.

- C. Receipts were not deposited on a timely basis. Receipts were deposited approximately once or twice a month. To adequately safeguard receipts and to reduce the risk of loss or misuse of funds, deposits should be made intact daily or when accumulated receipts exceed \$100.
- D. The municipal division allowed defendants to make partial payments on fines and costs. However, procedures had not been established to properly account for partial payments received and balances due. Defendants were required to sign a payment agreement form to document the amounts due and establish a payment schedule. However, partial payments received were not always documented on the payment agreement forms. In addition, cases with balances due were not maintained on a balance due docket or other summary listing which can be reviewed by the Judge on a periodic basis.

Periodic supervisory review of balances due and adequate documentation of partial payments received are necessary to ensure that all amounts due are collected or that appropriate follow up action is taken.

- E. Monthly listings of open items (liabilities) were not prepared and reconciled to the available cash balance. Monthly open items listings should be prepared and reconciled to the available cash balance to ensure proper accountability over open cases and ensure monies held in trust are sufficient to meet liabilities.
- F. Fines and court costs were not disbursed monthly to the state and city treasury. As of August 1999 the former court clerk had not disbursed fines and court costs to the city since September 1998. Crime Victim's Compensation (CVC) and Police Officer Standards and Training Commission (POSTC) fees had not been remitted to the state since February 1999. Section 479.080, RSMo 1994, requires fines and court costs be transmitted at least monthly to the city treasury. Section 595.045.5, RSMo Cumulative Supp. 1999, requires 95 percent of the CVC to be paid monthly to the state. POSTC fees should also be disbursed monthly to the state.
- G. Some case files selected for review could not be located. Supreme Court Administrative Rule 8 requires all municipal ordinance case files be maintained ~~three~~ years after the date of filing and all financial records be maintained for five years or upon completion of an audit. Retention of applicable records is necessary to properly account for all municipal monies received.
- H. The final disposition was not adequately documented in many of the case files we reviewed. In addition, the Municipal Judge did not review individual court dockets to ensure approval of the disposition of cases handled through the Traffic Violations Bureau (TVB). To ensure the proper disposition of all cases, case files should be updated to reflect all activity, and the Municipal Judge should review each court docket and sign the docket to indicate approval of the recorded disposition.

- I. The Court Clerk did not file a monthly report with the city of all cases heard in court. Section 479.080.0, RSMo 1994, requires the Court Clerk to prepare a monthly listing of all cases heard in court or prepaid at the TVB, including all fines and court costs collected, to be verified by the clerk or Municipal Judge and filed with the city's governing body.

**WE RECOMMEND** the municipal division:

- A. Adequately segregate the duties of receiving, recording, depositing, and disbursing court receipts. At a minimum, there should be a documented supervisory review of the reconciliation between receipts and deposits.
- B. Issue receipt slips for all monies received and reconcile the composition of receipt slips issued to the composition of bank deposits. In addition, receipt slips should be issued in order.
- C. Deposit receipts intact daily or when accumulated receipts exceed \$100.
- D. Establish a balance due docket or other summary listing which can be reviewed by the Municipal Judge on a periodic basis, and ensure adequate documentation is maintained of partial payments received.
- E. Prepare monthly open items listings and reconcile these listings to monies held in trust.
- F. Ensure fines and court costs are transmitted to the state and the city treasury at least monthly.
- G. Retain all case files in accordance with Supreme Court Administrative Rule 8.
- H. Ensure the case disposition is adequately documented in all case files and require the Municipal Judge to review and sign all court dockets to indicate approval of all recorded dispositions.
- I. Prepare monthly reports of court actions, including fines and costs collected, and file these with the city's governing body in accordance with state law.

**AUDITEES RESPONSE:**

*The Municipal Judge and Court Clerk Responded:*

- A. *The City Clerk will begin reviewing bank reconciliations and comparing receipts to deposits. This will be in place by September 1, 2000.*
- B, C &  
F-I. *This has been implemented.*
- D. *The Court Clerk will add summary information to the payment docket. This will be in place*

*by May 19, 2000.*

- E. The Court Clerk is currently keeping an open bond list and will begin reconciling this to the bank account. This will be in place by September 1, 2000.*

This report is intended for the information of the management of the City of Mansfield Municipal Division of the Forty-Fourth Judicial Circuit and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

## Follow-Up on State Auditor's Prior Recommendations

FORTY-FOURTH JUDICIAL CIRCUIT  
CITY OF MANSFIELD, MISSOURI  
MUNICIPAL DIVISION  
FOLLOW-UP ON STATE AUDITOR'S PRIOR RECOMMENDATIONS

This section reports follow-up action taken by the city of Mansfield Municipal Division on recommendations made in the Management Advisory Report (MAR) of our report on the Forty-Fourth Judicial Circuit Municipal Divisions issued for the two years ended March 31, 1995. The prior recommendations which have not been implemented, but are considered significant, have been repeated in the current MAR.

City of Mansfield Municipal Division

- A.1. Receipt slips were not consecutively numbered and did not bear the court's or police department's names.
- 2. Receipt slips did not consistently indicate the method of payment received.
- 3. Receipts were not always deposited in a timely manner.
- B. The Municipal Judge did not sign the court dockets after case dispositions were recorded.
- C. The Crime Victim's Compensation (CVC) fee was charged on nonmoving traffic violations.
- D. The court did not charge the Independent Living Center (ILC) Fund fees on drug-related traffic offenses.

Recommendation:

- A.1. Issue official prenumbered receipt slips and account for the numerical sequence.
- 2. Indicate the method of payment on all receipt slips issued and reconcile total cash, checks, and money orders received to bank deposits.
- 3. Deposit receipts intact daily or when accumulated receipts exceed \$100.
- B. Require the Municipal Judge's signature on the court dockets.
- C. Discontinue collecting CVC fees on nonmoving traffic violations in accordance with state law.
- D. Assess and collect the ILC fee in accordance with state law.

Status:

- A.1. Partially implemented. Receipt slips are prenumbered, however, the numerical sequence is not accounted for. See MAR No. 2.

- A.2. Partially implemented. The method of payment is indicated on receipt slips; however beginning in July 1998, receipt slips were not issued or retained for all monies received and reconciled to bank deposits. See MAR No. 2.
- A.3,  
& B. Not implemented. See MAR No. 2.
- C. Based on statutory changes effective July 1, 1997, CVC fees are to be collected on all cases including non-moving traffic violations.
- D. Based on statutory changes effective July 1, 1997, the ILC fee is no longer required to be collected by municipal divisions.

## STATISTICAL SECTION

History, Organization, and  
Statistical Information

FORTY-FOURTH JUDICIAL CIRCUIT  
CITY OF MANSFIELD, MISSOURI  
MUNICIPAL DIVISION  
HISTORY, ORGANIZATION,  
AND STATISTICAL INFORMATION

The city of Mansfield Municipal Division is one of six municipal divisions within the Forty-Fourth Judicial Circuit, which includes Douglas, Ozark, and Wright counties. The Honorable John G. Moody serves as Presiding Judge.

The municipal division is governed by Chapter 479, RSMo 1994, and by Supreme Court Rule No. 37 titled "Ordinance Violations and Traffic Violations Bureau (TVB)." Section 479.050, RSMo 1994, provides that each municipal division may establish a TVB in which fines and costs are collected at times other than during court and transmitted to the city treasury.

Operating Costs

The operating costs and court salaries of the municipal division are paid by the municipality.

Organization

The Court Clerk is responsible for recording transactions and handling collections and disbursements. Fines, court costs, and bonds are deposited into a court bank account and are paid by check to the city treasury and the state periodically. Court is held once a month. A TVB has been established to receive payment of fines and court costs at times other than during court.

Personnel

|                         |                       |
|-------------------------|-----------------------|
| Municipal Judge         | Bradford E. Ellsworth |
| City Clerk/Court Clerk* | Angela Turney         |

\* Angela Turney terminated employment in August 1999. Betty Dean was hired as City Clerk/Court Clerk in August 1999. Linda Elliott was hired as Court Clerk in September 1999.

CITY OF GAINESVILLE, MISSOURI

YEAR ENDED SEPTEMBER 30, 1999

**From The Office Of State Auditor  
Claire McCaskill**

Report No. 2000-29  
April 27, 2000  
[www.auditor.state.mo.us](http://www.auditor.state.mo.us)

# AUDIT REPORT

Office Of The  
State Auditor Of Missouri  
Claire McCaskill

April 2000

**Some problems were discovered as a result of an audit conducted by our office in response to the request of petitioners from the City of Gainesville, Missouri.**

---

The city improperly claimed and received reimbursement of approximately \$22,000 from a federal grant to which it was not entitled.

The city received federal assistance from the U.S. Department of Justice under the COPS program for three additional full time officers which increased the number of city officers to four.

In February 1999, the city received reimbursement totaling \$43,393 for the period April 1997 through December 1998. During this period, the city employed only two or three officers (including the original officer) but included the salary of the original officer in the reimbursement request. Because the grant agreement required the city to fund 100 percent of the first officer, excess disbursements of approximately \$22,000 were claimed.

City ordinance 97-301 requires all purchases over \$100 to be bid. The City Clerk indicated that a \$500 threshold is used, rather than the \$100 requirement. Although the city did solicit bids for some purchases, bids were either not solicited or bid documentation was not retained in some instances. Examples include \$26,928 for asphalt, \$26,462 for trash service, \$2,600 for a sewer pump and basin, \$1,938 for surveying, \$1,872 for health insurance, and \$1,410 for water tower inspection and treatment. In addition, the city did not document the proposals received for auditing services.

The city returned funds reserved for the repair of the city's gazebo to an original donor without the consent of all donors. The Mayor and the board of Aldermen do not always review related invoices and supporting documentation prior to signing checks and some invoices did not contain an indication of receipt of goods or services. Mileage or maintenance logs are not maintained for any of the vehicles and equipment owned by the city.

The city purchased a sewer pump and basin for \$2,600 for a citizen to use at his home and allowed the citizen to reimburse the city for the purchase. By purchasing the item in this manner, the citizen may have received it at special city prices and avoided paying sales tax. The city should not allow such expenditures to be incurred using its sales tax-exempt status. Doing so violates the terms of the city's sales tax exemption letter. A similar comment was made by the city's auditor during the previous annual audit.

(over)

Board minutes are not always prepared for closed meetings. Documentation of notice for several of the board meetings could not be located and board minutes were not always signed by the City Clerk and Mayor. The city has not established a formal policy regarding public access to city records.

YELLOW SHEET

Budgets were not prepared in accordance with statutory requirements and the city approved expenditures in excess of budgeted amounts.

The city has not published semi-annual financial statements as required by state law. Section 79.160, RSMo 1994, requires the Board of Aldermen to prepare and publish semi-annual financial statements.

An annual maintenance plan for city streets has not been prepared. A formal maintenance plan should be prepared in conjunction with the annual fiscal budget and include a description of the roads to be worked on, the type of work to be performed, an estimate of the quantity and cost of materials needed, the dates such work could begin, the amount of labor required to perform the work, and other relevant information.

Procedures have not been established to ensure expenditures are properly allocated among the various funds benefiting from the expenditures and to ensure restricted revenues are expended only for their intended purposes. The city pays wage and retirement benefit expenses from the general fund, street fund, water fund, and sewer fund. In addition, the city pays health insurance and worker's compensation benefit expenses from the general fund only. No documentation is available to support the method of allocation used. A similar comment was made by the city's auditor during the previous annual audit.

Law enforcement training fees are not accounted for separately or maintained in a separate fund.

The city maintains twenty-nine bank accounts. Except for separate accounts for Sewerage System Revenue Fund, Bond Reserve Fund, Replacement and Extension Fund, and Sinking Fund accounts required by the revenue bond covenants, it appears that the remaining bank accounts could be consolidated to help simplify the city's records and reduce the number of accounts that must be monitored and controlled. A similar comment was made by the city's auditor during the previous annual audit.

The city does not reconcile the total gallons of water billed to customers to the gallons of water pumped. The City Collector prepares monthly utility cards for each customer which reports the number of gallons billed and the maintenance supervisor records meter readings of the city's four water wells, so information is available to perform such reconciliations. A formal review of the city's water and sewer rates has not been performed since 1986.

The city's ordinances are not complete and up-to-date, and ordinances have not been established in all instances where needed.

Controls over receipts of the municipal court are not adequate. Neither the police department nor the municipal division adequately accounts for the numerical sequence and ultimate disposition of parking and traffic tickets issued. Records of convictions on traffic offenses are not always forwarded to the Missouri State Highway Patrol. Court costs due to the state are not disbursed on a timely basis and have not been remitted for the Peace Officer Standards and Training Commission fees. Accounts receivable records are not adequately maintained.

CITY OF GAINESVILLE, MISSOURI

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

To the Honorable Mayor  
and  
Members of the Board of Aldermen  
City of Gainesville  
Gainesville, Missouri 65655

The State Auditor was petitioned under Section 29.230, RSMo, to audit the city of Gainesville, Missouri. Our audit of the city included, but was not limited to, the year ended September 30, 1999. The objectives of this audit were to:

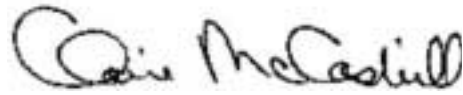

1. Perform procedures we deemed necessary to evaluate the petitioners' concerns.
2. Review compliance with certain constitutional provisions, statutes, ordinances, and attorney general's opinions as we deemed necessary or appropriate in the circumstances.
3. Review certain management practices which we believe could be improved.

Our audit was made in accordance with generally accepted government auditing standards and included such procedures as we considered necessary in the circumstances. We also reviewed board minutes, city policies and ordinances, and various city financial records.

Our audit was limited to the specific matters described above and was based on the selective tests and procedures considered appropriate in the circumstances. Had we performed additional procedures, other information might have come to our attention which would have been included in this report.

The accompanying History and Organization is presented for informational purposes. This information was obtained from the city and was not subjected to the auditing procedures applied in the audit of the city.

The accompanying Management Advisory Report presents our findings and recommendations arising from our audit of the city of Gainesville, Missouri.

A handwritten signature in black ink, appearing to read "Claire McCaskill". The signature is fluid and cursive, with the first name "Claire" written in a larger, more prominent script than the last name "McCaskill".

Claire McCaskill  
State Auditor

December 28, 1999 (fieldwork completion date)

The following auditors participated in the preparation of this report:

|                     |                     |
|---------------------|---------------------|
| Director of Audits: | Karen Laves, CPA    |
| Audit Manager:      | David Holtmann, CPA |
| In-Charge Auditor:  | Pam Crawford, CPA   |
| Audit Staff:        | Amy Fast            |

## HISTORY AND ORGANIZATION

CITY OF GAINESVILLE, MISSOURI  
HISTORY AND ORGANIZATION

The city of Gainesville is located in Ozark County. The city was incorporated in 1896 as a fourth-class city. The population of the city in 1990 was 716.

The city government consists of a mayor and a six-member board of aldermen. The six board members are elected for two-year terms. The mayor is elected for a two-year term, presides over the board of aldermen, and votes only in the case of a tie. The Mayor, Board of Aldermen, and other principal officials at September 30, 1999 were:

| <u>Elected Officials</u>             | <u>Term Expires</u> | <u>Actual Compensation for the Year Ended September 30, 1999</u> | <u>Bond</u> |
|--------------------------------------|---------------------|--|-------------|
| B. F. McClendon, Mayor               | April 2000          | \$ 2,653   | \$          |
| Laurie J. Miller, Alderwoman         | April 2000          | 0  |             |
| Frank Skeeter Stevens, Alderman      | April 2000          | 0  |             |
| Donnis Taylor, Alderwoman            | April 2000          | 0  |             |
| Gary W. Simmons, Alderman            | April 2001          | 0  |             |
| Betty L. Hickey (Zamora), Alderwoman | April 2001          | 0  |             |
| Steve Neal, Alderman (1)             | April 2001          | 0  |             |
| <u>Other Principal Officials</u>     |                     |  |             |
| David Ford, City Clerk               |                     | 11,470   | 125,000     |
| Anna Whisnant, Deputy City Clerk     |                     | 6,481  |             |
| Alta Young, City Collector           |                     | 12,205   | 3,000       |
| Butch Winslow, Police Chief          |                     | 16,334   |             |

(1) Steve Neal passed away in September 1999. Ves Phelan was appointed to the Board of Aldermen in November 1999.

Assessed valuation and tax rate information for 1999 and 1998 are as follows:

ASSESSED VALUATION

|                   | <u>1999</u>      | <u>1998</u>      |
|-------------------|------------------|------------------|
| Real estate       | \$ 4,762,700     | 4,382,578        |
| Personal property | 1,396,608        | 1,143,160        |
| Total             | <u>6,159,308</u> | <u>5,525,738</u> |

TAX RATE PER \$100 ASSESSED VALUATION

|              |         |      |
|--------------|---------|------|
| General Fund | \$ 0.47 | 0.47 |
|--------------|---------|------|

The city also has the following sales tax; rate is per \$1 of retail sales:

|         | <u>Rate</u> | <u>Expiration Date</u> |
|---------|-------------|------------------------|
| General | 0.01        | None                   |

A summary of the financial activity for the city of Gainesville for the year ended September 30, 1999, is presented on the next page.

Year Ended September 30, 1999

|                                     | General<br>Fund   | Water<br>Fund | Sewer<br>Fund  | Street<br>Fund | Park<br>Fund  | Total          |
|-------------------------------------|-------------------|---------------|----------------|----------------|---------------|----------------|

## MANAGEMENT ADVISORY REPORT

CITY OF GAINESVILLE  
SUMMARY OF FINDINGS

1. Community Oriented Policing Services (COPS) Grant (page 10)

The city improperly claimed and received reimbursement of approximately \$22,000 from a federal grant to which it was not entitled.

2. Expenditures (pages 10-13)

Bids were either not solicited or bid documentation was not retained for some expenditures. The city has contracted with the same trash service company since 1972 without soliciting proposals from any other providers. City streets were paved without the approval of the board at a cost of \$26,928. The city returned funds reserved for the repair of the city's gazebo to an original donor without the consent of all donors. The Mayor and the Board of Aldermen do not always review related invoices and supporting documentation prior to signing checks and some invoices did not contain an indication of receipt of goods or services. Mileage or maintenance logs are not maintained for any of the vehicles and equipment owned by the city. Christmas bonuses were paid to various city officials and employees and items were purchased through the city for the personal use of a citizen.

3. Board Meetings and Records (pages 13-14)

Board minutes are not always prepared for closed meetings. Documentation of notice for several of the board meetings could not be located and board minutes were not always signed by the City Clerk and Mayor. The city has not established a formal policy regarding public access to city records.

4. Budgeting, Planning and Published Financial Statements (pages 14-15)

Budgets were not prepared in accordance with statutory requirements and the city approved expenditures in excess of budgeted amounts. Semi-annual financial statements are not published. An annual maintenance plan for city streets has not been prepared.

5. Restricted Revenues (pages 15-16)

The allocation of some expenditures from restricted funds is not documented, and a separate accounting for law enforcement training fees has not been established.

6. Accounting Controls and Procedures (pages 16-17)

The city maintains an excessive number of bank accounts. The City Clerk also serves as City Treasurer. Some individuals authorized to sign checks are not bonded.

7. Water and Sewer System Procedures (pages 17-19)

The number of gallons of water billed to customers is not reconciled to the gallons of water pumped by the city. A formal review of the city's water and sewer rates has not been performed since 1986. Sufficient funds have not been transferred to the bond replacement account. Special arrangements made with the lessee of the city's airport hanger were not made in writing. The city's maintenance supervisor is responsible for collection of water and sewer hook-up fees, but is not bonded.

8. Ordinances (pages 19-21)

The city's ordinances are not complete and up-to-date, and ordinances have not been established in all instances where needed.

9. Personnel Records and Policies (pages 21-22)

The city has not formalized its personnel policy in writing. Retirement and health insurance benefits are provided for only one of eight full time employees. Time sheets are not prepared for all city employees.

10. Property Records (page 22)

The city does not maintain complete records to account for all property owned by the city.

11. Municipal Court (pages 23-24)

Controls over receipts are not adequate. Neither the police department nor the municipal division adequately accounts for the numerical sequence and ultimate disposition of parking and traffic tickets issued. Records of convictions on traffic offenses are not always forwarded to the Missouri State Highway Patrol. Court costs due to the state are not disbursed on a timely basis and have not been remitted for the Peace Officer Standards and Training Commission fees. Accounts receivable records are not adequately maintained.

CITY OF GAINESVILLE  
MANAGEMENT ADVISORY REPORT

|           |  |
|-----------|--|
| <b>1.</b> | <b>Community Oriented Policing Services (COPS) Grant</b> |
|-----------|--|

The city received federal assistance from the U.S. Department of Justice under the COPS program for three additional full time officers which increased the number of city officers to four. Since March 1995, the city has received grant awards totaling \$91,815. Under the grant provisions, the city was required to provide 25 percent of the cost of employing the additional officers until the grant expires on March 31, 2000, in addition, to continuing to provide 100 percent of the cost of employing the original officer.

In February 1999, the city received reimbursement totaling \$43,393 for the period April 1997 through December 1998. During this time period, the city employed only two or three officers (including the original officer) but included the salary of the original officer in the reimbursement request. Because the grant agreement required the city to fund 100 percent of the first officer, excess disbursements of approximately \$22,000 were claimed.

The Board of Aldermen should contact the applicable federal grantor agency to resolve this issue. In addition, the city should ensure future compliance with all federal regulations.

**WE RECOMMEND** the Board of Aldermen consult with the grantor agency to resolve this issue. In addition, the Board of Aldermen should ensure future compliance with all federal regulations and only claim reimbursement for allowable costs.

**AUDITEE'S RESPONSE**

*We agree with the recommendation and will follow up with the U.S. Department of Justice.*

|           |                     |
|-----------|---------------------|
| <b>2.</b> | <b>Expenditures</b> |
|-----------|---------------------|

- A. City ordinance 97-301 requires all purchases over \$100 to be bid. The City Clerk indicated that a \$500 threshold is used, rather than the \$100 requirement. Although the city did solicit bids for some purchases, bids were either not solicited or bid documentation was not retained in some instances. Examples include \$26,928 for asphalt, \$26,462 for trash service, \$2,600 for a sewer pump and basin, \$1,938 for surveying, \$1,872 for health insurance, and \$1,410 for water tower inspection and treatment. In addition, the city did not document the proposals received for auditing services.

Formal bidding procedures for major purchases provide a framework for economical management of city resources and help ensure the city receives fair value by contracting with the lowest and best bidders. Competitive bidding helps ensure all parties are given an opportunity to participate in the city's business. Bids can be handled by telephone quotation, by written quotation, by sealed bid, or by advertised sealed bid. Various

approaches are appropriate, based on dollar amount and type of purchase. Whichever approach is used, complete documentation should be maintained of all bids received and reasons noted why the bid was selected.

- B. The city has contracted with the same trash service company since 1972. In December 1998, the city entered into an additional five year franchise agreement for these services without soliciting proposals from any other providers. During the year ended September 30, 1999, the city paid the trash service company \$26,462 (See Part A. above).

We contacted two other local trash services that indicated they were interested in competing for the city's business. The businesses contacted offered lower rates to nearby cities of a similar size, than those being charged by the city's current trash service. Considering the exclusive nature of this contract, the city should ensure all parties are given the opportunity to participate in the city's business. Competitive bidding helps ensure the city receives fair value by contracting with the lowest and best bidders.

- C. Mayor McClendon and Alderman Stevens signed a contract with an asphalt company to pave city streets on April 20, 1999, without board approval. Since the work had been completed and the asphalt company demanded payment, the board met in an emergency session on July 2, 1999, to approve the contract and authorize payment to the asphalt company totaling \$26,928. (See part A. above)

City business should be approved by the board prior to the work beginning.

- D. The city received donations from various citizens six to eight years ago to maintain a gazebo constructed on county property. The city returned the remaining monies, which totaled approximately \$850, to one of the original donors in September 1999, at the donor's request.

These monies were public funds placed in the trust of the city to be used for repairs to the gazebo. The city had no basis for returning the money without the consent of all of the original donors. The city should ensure all funds entrusted for a specific purpose are utilized for their intended use. At a minimum, the city should have required a written agreement with the original donor to ensure the monies would be utilized for repairs to the gazebo.

- E. The City Clerk prepares and signs checks. In addition, the Mayor and a member of the board also sign the checks; however, the Mayor and Board of Aldermen do not review the related invoices or supporting documentation prior to signing the checks. To ensure all expenditures are properly reviewed and approved, the board should designate the Mayor or a board member to review the related invoices before the checks are signed.
- F. Receipt of goods or services is not always indicated on the invoice prior to an expenditure being approved for payment. The documentation of the receipt of goods or services is necessary to ensure the city actually received the items or services being paid.
- G. The city does not maintain mileage or maintenance logs for any of the seven (7) vehicles and equipment owned by the city. Mileage logs are necessary to document appropriate use of the vehicles and to support gasoline charges. The mileage and maintenance logs

should include the purpose and destination of each trip, the daily beginning and ending odometer readings, and the operation and maintenance costs. These logs should be reviewed by a supervisor to ensure vehicles and equipment are used only for city business, are being properly utilized, and help identify vehicles and equipment which should be replaced. Information on the logs should be reconciled to gasoline purchases and other maintenance charges.

- H. The Mayor and all city employees received a \$43 Christmas bonus in December 1999. The bonuses appear to represent additional compensation for services previously rendered and violate Article III, Section 39 of the Missouri Constitution. Attorney General's Opinion No. 72, 1955 to Pray, states, "...a government agency deriving its power and authority from the Constitution and laws of the state would be prohibited from granting extra compensation in the form of bonuses to public officers after the service has been rendered."
- I. The city purchased a sewer pump and basin for \$2,600 for a citizen to use at his home and allowed the citizen to reimburse the city for the purchase. (See Part A. above) By purchasing the item in this manner, the citizen may have received it at special city prices and avoided paying sales tax. The city should not allow such expenditures to be incurred using its sales tax-exempt status. Doing so violates the terms of the city's sales tax exemption letter. A similar comment was made by the city's auditor during the previous annual audit.

**WE RECOMMEND** the Board of Aldermen:

- A. Revise or follow the city ordinance regarding formal bidding policies and procedures, including documentation requirements regarding the bids or quotes received and justification for the bid selected.
- B. Ensure proposals are solicited for trash services from all providers in the future.
- C. Ensure contracts are approved by the board.
- D. Maintain funds entrusted to the city for their specific purpose.
- E. Designate the Mayor or a board member to review all supporting invoices before the checks are signed.
- F. Ensure the receipt of goods or services is indicated on invoices prior to approving them for payment.
- G. Maintain mileage and maintenance logs for all city vehicles and equipment.
- H. Discontinue paying Christmas bonuses to the Mayor and employees.
- I. Prohibit individuals from purchasing items for personal use through the city and with the city's sales tax exemption.

**AUDITEE'S RESPONSE**

A,B,

*F,H*

*& I. We agree with these recommendations.*

*C. We are working to open the lines of communication between all of the board members.*

*D. We agree with the recommendation and will ensure written agreements are entered into in the future regarding restricted monies.*

*E. We are currently reviewing all invoices.*

*G. The police department is currently maintaining vehicle logs. We will develop logs for our other vehicles.*

*Mayor McClendon and Alderman Stevens provided a separate response for Part C:*

*C. The board had given approval up to \$30,000 for paving roads. We completed the project for several thousand dollars less.*

|                                      |
|--------------------------------------|
| <b>3. Board Meetings and Records</b> |
|--------------------------------------|

A. The Board of Aldermen frequently hold closed meetings. Minutes are not always prepared to document matters discussed in closed meetings, and it is not clear that the final disposition is made public. Section 610.021, RSMo Cumulative Supp. 1999, requires certain matters discussed in closed session to be made public upon final disposition. In addition, closed session minutes are necessary to document and record official board decisions and actions affecting city government and the public, and to ensure compliance with the Sunshine Law.

B. Documentation that proper notice was given for several of the Board of Aldermen meetings held could not be located.

State law requires all public governmental bodies to give advance notice of meetings either through the news media or posting notice of the meeting. The notice is to include the time, date, and place of the meeting, as well as the tentative agenda. To document compliance, the city clerk should document the date, time, and location the notice was posted and retain this with the minutes.

C. The board minutes are prepared by the City Clerk, but some minutes were not signed. The board minutes should be signed by the City Clerk as preparer and by the Mayor to provide an independent attestation that the minutes are a correct record of the matters discussed and actions taken during the board's meetings. A similar comment was made by the city's auditor during the previous annual audit.

D. The city does not have a formal policy regarding public access to city records. A formal policy would establish guidelines for the city to make the records available to the public. This policy should establish a person to contact, provide an address to mail requests for access to records, and establish a cost to provide copies of public

records. Section 610.023, RSMo Cumulative Supp. 1999, lists requirements for making city records available to the public.

**WE RECOMMEND** the Board of Aldermen:

- A. Ensure minutes are prepared for all closed meetings, and the final disposition of applicable matters discussed at closed meetings is made public.
- B. Retain adequate supporting documentation to demonstrate that the board provided proper notice for each of its meetings.
- C. Ensure the board minutes are signed by the preparer and Mayor or a designated member of the board to attest to their accuracy.
- D. Establish formal written policies and procedures regarding public access to city records.

**AUDITEE'S RESPONSE**

*We agree with these recommendations.*

|   |
|---|
| <b>4. Budgeting, Planning, and Published Financial Statements</b> |
|---|

- A. The budgets for the years ended September 30, 2000 and 1999 do not include a budget message, actual (or estimated for years not yet ended) revenues and expenditures for the two preceding budget years, or the beginning and the estimated ending available resources. The budgets showed only anticipated revenue and expenditure activity. Section 67.010, RSMo 1994, requires the preparation of an annual budget which shall present a complete financial plan for the ensuing budget year.

A complete and well-planned budget, in addition to meeting statutory requirements, can serve as a useful management tool by establishing specific cost expectations for each area. A budget can also provide a means to effectively monitor actual costs by periodically comparing budgeted amounts to actual expenditures. A complete budget should include separate revenue and expenditure estimations, and include the beginning available resources and a reasonable estimate of the ending available resources. The budget should also include a budget message and comparisons of actual revenues and expenditures for the two preceding years.

- B. Actual expenditures exceeded budgeted expenditures for the General Fund for the years ended September 30, 1999 and 1998, by \$5,846 and \$36,298, respectively. In addition, actual expenditures exceeded budgeted expenditures for the Park Fund for the year ended September 30, 1998, by \$2,407.

Section 67.040, RSMo 1994, indicates a political subdivision shall not increase the total amount authorized for expenditure from any fund, unless the governing body adopts a resolution documenting the reasons making the increase necessary and approves or adopts a resolution or ordinance to authorize the expenditures.

- C. The city has not published semi-annual financial statements as required by state law. Section 79.160, RSMo 1994, requires the Board of Aldermen to prepare and publish semi-annual financial statements. These financial statements are to include a statement of receipts and expenditures and indebtedness of the city for the preceding six month period. In addition, Section 79.165, RSMo 1994, states the city cannot legally disburse funds until the financial statement is published.
- D. An annual maintenance plan for city streets has not been prepared. A formal maintenance plan should be prepared in conjunction with the annual fiscal budget and include a description of the roads to be worked on, the type of work to be performed, an estimate of the quantity and cost of materials needed, the dates such work could begin, the amount of labor required to perform the work, and other relevant information. The plan should be included in the budget message and be approved by the board. In addition, a public hearing should be held to obtain input from the city residents.

A formal maintenance plan would serve as a useful management tool and provide greater input into the overall budgeting process. Such a plan provides a means to more effectively monitor and evaluate the progress made in the repair and maintenance of streets throughout the year.

**WE RECOMMEND** the Board of Aldermen:

- A. Prepare budgets that contain all information as required by state law.
- B. Periodically compare year-to-date expenditures with budgeted amounts to monitor the city finances and to ensure actual expenditures do not exceed budgeted amounts.
- C. Publish semi-annual financial statements as required by state law.
- D. Prepare a formal maintenance plan for city streets at the beginning of the fiscal year and periodically update the plan throughout the year. In addition, the board should review the progress made in the repair and maintenance of streets to make appropriate decisions on future projects.

**AUDITEE'S RESPONSE**

*We agree with these recommendations.*

|                               |
|-------------------------------|
| <b>5. Restricted Revenues</b> |
|-------------------------------|

- A. Procedures have not been established to ensure expenditures are properly allocated among the various funds benefitting from the expenditures and to ensure restricted revenues are expended only for their intended purposes. The city pays wage and retirement benefit expenses from the general fund, street fund, water fund, and sewer fund. In addition, the city pays health insurance and worker's compensation benefit expenses from the general fund only. No documentation is available to support the method of allocation used. A similar comment was made by the city's auditor during the previous annual audit.

Time sheets are prepared by some employees, indicating the total hours worked. However, no documentation is maintained to separately indicate the number of hours related to streets, water and sewer, or other activities.

Allocation of expenses is necessary for the city to ensure the water and sewer rates are sufficient to cover the cost of providing the service without generating profits to subsidize other city services. Furthermore, the uses of state motor vehicle-related revenues, are limited by state law for specified purposes. Therefore, documentation and proper allocation of expenses is useful for both management and compliance purposes.

- B. Law enforcement training fees are not accounted for separately or maintained in a separate fund. During the year ended September 30, 1999, the city received approximately \$72 in training fees and identified no training-related expenses. Section 590.140, RSMo Supp. 1999, requires law enforcement training fees to be used only for the training of law enforcement officers. The city should determine law enforcement training fees collected and transfer the fees to a separate fund or maintain a separate accounting of the funds to ensure the fees are used in accordance with state law.

**WE RECOMMEND** the Board of Aldermen ensure all allocations of expenditures are supported by adequate documentation and establish a separate accounting for law enforcement training fees to ensure compliance with the Missouri Constitution and state law.

#### **AUDITEE'S RESPONSE**

*We agree with these recommendations.*

|  |
|--|
| <b>6. Accounting Controls and Procedures</b> |
|--|

- A. The city maintains twenty-nine bank accounts. Except for separate accounts for Sewerage System Revenue Fund, Bond Reserve Fund, Replacement and Extension Fund, and Sinking Fund accounts required by the revenue bond covenants, it appears that the remaining bank accounts could be consolidated to help simplify the city's records and reduce the number of accounts that must be monitored and controlled. A similar comment was made by the city's auditor during the previous annual audit.
- B. The City Clerk also serves as the City Treasurer, and this individual is responsible for most of the record keeping duties of the city. These duties include preparing invoices for payment, preparing and co-signing checks, performing bank reconciliations, and preparing monthly financial reports. Neither the board nor other personnel independent of the cash custody and record keeping functions provide adequate supervision or an independent review of the work performed by the City Clerk. A similar comment was made by the city's auditor during the previous annual audit.

Attorney General's Opinion No. 24, 1955 to Dodds, concluded that in a fourth-class city the holding of the positions of City Clerk, City Treasurer, and City Collector, or any two of these three offices, by the same person at the same time would be incompatible. This situation does not allow the segregation of duties necessary for

a proper evaluation and review of financial transactions. The current procedures jeopardize the system of independent checks and balances intended by state law.

To safeguard against possible loss or misuse of funds, internal controls should provide reasonable assurance that all transactions are accounted for properly and assets are adequately safeguarded. Internal controls could be improved by segregating duties to the extent possible. If proper segregation of duties is not feasible, the Board of Aldermen should, at a minimum, require someone having no access to cash and no record keeping responsibilities receive and review the bank statements and bank reconciliations.

- C. The City Clerk, the Mayor, and one of the Aldermen are authorized to sign checks; however, the City Clerk and City Collector are the only city officials that are bonded. In addition, the deputy City Clerk occasionally collects city receipts in the absence of the City Collector. The City Clerk indicated the city had a blanket bond to cover all employees and board members; however, the city's bonding company confirmed that only the City Collector and City Clerk were bonded. Failure to bond all persons with access to assets exposes the city to risk of loss.

**WE RECOMMEND** the Board of Aldermen:

- A. Consider consolidating the city's twenty-nine bank accounts.
- B. Provide for an adequate segregation of duties or the performance of independent reconciliations and reviews of the accounting records.
- C. Obtain bond coverage for all persons with access to city assets.

**AUDITEE'S RESPONSE**

*We agree with these recommendations.*

|   |
|---|
| <b>7. Water and Sewer System Procedures</b> |
|---|

- A. The city does not reconcile the total gallons of water billed to customers to the gallons of water pumped. The City Collector prepares monthly utility cards for each customer which reports the number of gallons billed and the maintenance supervisor records meter readings of the city's four water wells, so information is available to perform such reconciliations.

During July 1999 through October 1999, the gallons of water pumped exceeded the total gallons billed by 10,496,820 gallons, or 49 percent. The city's maintenance supervisor indicated that he believed the loss was due to local fire departments filling fire trucks, water used at the city park and airport hanger where water meters are not read, and water used at some local businesses where the water meters are buried under asphalt.

To help detect significant water loss on a timely basis and to help ensure all water usage is properly billed, the city should reconcile the total gallons of water pumped to the gallons of water billed on a monthly basis and investigate significant differences. The Public

Service Commission generally recommends investigation if water usage not billed exceeds 15 percent.

- B. The city has not performed a formal review of the adequacy of the water and sewer rates since 1986. The city's audited financial statements show an operating loss of approximately \$80,000 in the Water and Sewer Funds during the year ending September 30, 1998.

City ordinance 86-421 requires water and sewer user charges to be reviewed every two years. Water and sewer fees are user charges which should cover the cost of providing the related services, but rates should not be set at a level which results in excessive fund balances. The city should perform a detailed review of its water and sewer costs, including depreciation and debt service costs, and set rates to cover the total costs of operation.

- C. Revenue bond covenants and city ordinance 86-421 require the bond replacement account to be funded in the amount of \$5,000 annually from the operation and maintenance account. The balance of the bond replacement account at September 30, 1999, should be \$80,612. While the city has sufficient funds in other water and sewer accounts the balance in the bond replacement account was only \$10,102. The city should make appropriate transfers and ensure future funding requirements are made. A similar comment was made by the city's auditor during the previous annual audit.

- D. The city does not perform monthly reconciliations of total amounts billed, payments received, and amounts remaining unpaid for water and sewer services.

Monthly reconciliations are necessary to ensure that all accounting records balance, transactions have been properly recorded, and any errors or discrepancies are detected on a timely basis. Complete documentation of the reconciliation should be retained to support conclusions and any corrections made, and to facilitate independent reviews.

- E. The city leases its airport hanger to a local citizen for \$1,200 annually. A water meter is maintained which monitors water used inside the airport hanger; however, this individual's meter is not normally read by the maintenance department, and water and sewer usage is not billed. The Mayor indicated special arrangements were made with this individual to not pay for water and sewer use. A meter reading on November 4, 1999, showed 15,110 gallons of water usage since the last documented meter reading performed by the maintenance department in April 1999. The city does not have a written lease agreement with this individual addressing this arrangement or lease payments.

The city should review the propriety of this special water and sewer usage arrangement and document the basis for this arrangement. Any billing arrangements which differ from the city's standard rates and procedures should be supported by written agreements between the applicable parties. In addition, lease agreements should be supported by written agreements between the applicable parties.

- F. Although the maintenance supervisor is responsible for collection of water and sewer hook-up fees, this individual is not bonded. Failure to bond city employees that handle monies exposes the city to the risk of loss.

**WE RECOMMEND** the Board of Aldermen:

- A. Compare the gallons of water pumped to the gallons billed on a monthly basis and investigate significant differences.
- B. Review water and sewer rates periodically to ensure revenues are sufficient to cover all costs of providing this service.
- C. Transfer sufficient funds to the bond replacement account as required by the bond covenants and city ordinance.
- D. Perform monthly reconciliations of the amounts billed to amounts collected and delinquent accounts.
- E. Review the special arrangements made with airport hanger lessee, and enter into written lease agreements.
- F. Consider obtaining bond coverage for the maintenance supervisor.

**AUDITEE'S RESPONSE**

- A. *We agree that these differences need to be investigated and corrected.*
- B. *We will review the water and sewer rates and take appropriate action.*
- C-F. *We agree with these recommendations.*

|                      |
|----------------------|
| <b>8. Ordinances</b> |
|----------------------|

- A. Many of the city's ordinances are old and outdated. The city maintains an index of all ordinances passed by the city; however, several ordinance numbers are not included, several ordinances included on the index were missing, and ordinance numbers are not assigned consecutively. In addition, several ordinances have not been signed and/or dated by the Mayor. Section 79.130, RSMo 1994, states "no bill shall become an ordinance until it shall have been signed by the mayor or person exercising the duties of the mayor's office, or shall have been passed over the mayor's veto".

Since the ordinances represent legislation passed by the Board of Aldermen to govern the city and its residents, it is important that the city's ordinances be maintained in a complete, well-organized, and up-to-date manner.

- B. The city has not adopted ordinances to establish the compensation and duties of all of the city's elected officials and the City Clerk. Sections 79.270 and 79.290, RSMo 1994, require the compensation and duties of city officials and employees to be set by ordinance.
- C. During our review of salary and expenses paid to the Mayor, the following concerns were noted:

1. The city has not updated the ordinance related to the salary and expenses of the Mayor. During the year ended September 30, 1999, the Mayor was paid \$2,653. In addition, the Mayor received an expense allowance of \$100 per month. Documentation was not required to support the expense allowance and it was not reported on the Mayor's W-2 forms for 1999 and 1998.

City ordinance 63, dated April 10, 1973, established the annual salary of the Mayor at \$1,200 and reimbursement for all expenses. In addition, Internal Revenue Code (IRC) Ruling 12-110 specifically requires expense allowances that are not accounted for to the employer to be considered gross income. To comply with the IRC, all compensation paid to city officials/employees should have the required payroll taxes withheld and be properly reported.

2. The Mayor receives a cost of living raise annually. Article VII, Section 13 of the Missouri Constitution states that compensation to municipal officers shall not be increased during a term of office. In addition, Section 79.270, RSMo 1994, states that the salary of a municipal officer shall not be changed during the time for which he was elected or appointed.

- D. The city has not prepared ordinances to document the approved tax levy for each year. In addition, the Board of Aldermen has not held public hearings on the city's proposed property tax rates. Section 94.210, RSMo 1994, states the board of aldermen shall fix the annual rate of tax levy by ordinance for each tax year. Section 67.110, RSMo 1994, requires each governing body to hold at least one public hearing prior to approval of the proposed tax rates at which citizens may be heard. This section also provides guidance on what information is to be included at the public hearing.

**WE RECOMMEND** the Board of Aldermen:

- A. Ensure a complete and up-to-date set of ordinances is maintained. This would include passing new ordinances where appropriate and required.
- B. Establish the duties and compensation of all city officials and employees by ordinance as required by statute.
- C.1. Ensure city ordinances outlining officials' salaries are properly updated and wages are properly reported on the Mayor's W-2 forms. In addition, the city should file amended W-2's to include expense allowances.
2. Ensure the salaries of the city's elected officials are not changed during their term of office.
- D. Hold public hearings on proposed property tax rates, and establish the annual tax levy by ordinance as required by law.

**AUDITEE'S RESPONSE**

*A&B. We agree our ordinances need to be reviewed and updated.*

*C&D. We agree with these recommendations.*

**9.****Personnel Records and Policies**

- A.1. The city has not formalized its personnel policy in writing. Although a city ordinance outlines personnel policies pertaining to vacation leave, additional areas to be addressed in a personnel policy may include other benefits offered to employees such as retirement and health benefits, hiring and firing procedures; description of job duties and qualifications for various positions; regular work hours and official holidays; maintenance of attendance records; and fringe benefits.

A comprehensive personnel policy manual would provide guidance and control for the effective and consistent management of the city's employees.

2. The city provides retirement and health insurance benefits to only one of eight full time employees. The retirement contract requires the city to provide retirement benefits to all eligible employees that work over 1,500 hours per year. Additionally, since health insurance is only provided to one full time employee, the benefit could be considered taxable for income purposes.

To ensure equitable treatment of all employees, the city should establish formal guidelines for providing retirement and health insurance benefits to all eligible employees.

- B. The City Clerk, Maintenance Supervisor, Police Chief, and police officers do not prepare time sheets. Time sheets are necessary to document hours actually worked, substantiate payroll expenditures, and provide the board with a method to monitor hours worked. In addition, a portion of the police officers' salaries are reimbursed to the city from the federal government through a COPS FAST grant. The grant requires payroll expenditures to be supported by time and attendance records.

To support payroll expenditures and ensure compliance with grant requirements, the city should require all employees to prepare detailed time sheets which are reviewed and approved by a supervisor.

**WE RECOMMEND** the Board of Aldermen:

- A.1. Prepare and maintain a personnel policy manual to provide documentation of the city's procedures and policies.
2. Establish formal guidelines for providing retirement and health insurance benefits to all eligible employees.
- B. Require all city employees to prepare time sheets which are approved by a supervisor.

**AUDITEE'S RESPONSE**

- A. *The city agrees with the recommendation. We are in the process of defining the specific duties of each employee, and will address other areas related to employment in the future.*
- B. *We agree with the recommendation.*

**10.**

**Property Records**

The city does not maintain complete records to account for all property owned by the city. Property records should be maintained on a perpetual basis, accounting for property acquisitions and dispositions as they occur. The record should include a detailed description of the assets including the name, make and model numbers, an asset identification number, the physical location of the assets, and the date and method of disposition of the assets when disposed of. In addition, all property items should be identified with a tag or other similar device, and the city should conduct annual inventories.

Adequate general fixed asset records are necessary to secure better internal control and safeguard city assets which are susceptible to loss, theft, or misuse, and provide a basis for determining proper insurance coverage required on city property.

**WE RECOMMEND** the Board of Aldermen ensure property records are maintained which include all pertinent information for each asset such as tag number, description, cost, acquisition date, location, and subsequent disposition. Additionally the city should properly tag, number, or otherwise identify all applicable city property and conduct an annual inventory.

**AUDITEE'S RESPONSE**

*We agree with the recommendation.*

**11.**

**Municipal Court**

- A.1. The Court Clerk accepts cash, checks, and money orders for the payment of fines, court costs, and bonds. The Court Clerk does not consistently record the method of payment on receipt slips. To ensure receipts are deposited intact, the method of payment should be indicated on all receipt slips. The composition of receipt slips issued should be reconciled to the composition of deposits.
2. Receipt slips are not always issued on a timely basis nor are the proceeds transmitted to the city intact or on a timely basis. For example, two money orders totaling \$90 and dating back to 1994 and 1995 were not issued a receipt slip and transmitted to the city until September 1999. The deputy court clerk indicated she had found these two receipts in old court files. To adequately safeguard receipts and reduce the risk of loss, theft, or misuse of funds, deposits and transmittals should be made intact daily or when accumulated receipts exceed \$100.
3. Checks and money orders are not restrictively endorsed until deposits are prepared by the city. To reduce the risk of loss or misuse of funds, checks and money orders should be restrictively endorsed immediately upon receipt.

- B. Neither the police department nor the municipal division maintains adequate records to account for parking and traffic tickets issued and their ultimate disposition. Without a proper accounting of the numerical sequence and ultimate disposition of parking and traffic tickets, the police department and the municipal division cannot be assured all tickets issued are submitted to the court for processing.

During the audit, nine of the tickets selected for review could not be located. Since tickets and supporting documentation could not be reviewed, the court can not determine the disposition of these tickets and whether they were properly reflected in the records. All municipal court records should be adequately retained in accordance with Supreme Court Administration Rule 8.

- C. The Court Clerk indicated that he had not forwarded the required records of convictions on traffic offenses to the Missouri State Highway Patrol (MSHP) for several years. Section 302.225, RSMo Cumulative Supp. 1999, requires any plea or finding of guilty on traffic violations under the laws of the state, county, or municipal ordinance to be forwarded to the MSHP within ten days of the conviction date.
- D. Court costs which are due to the state are transmitted to the city. The city does not always disburse these monies to the state on a timely basis. Court costs collected in February 1997 through February 1998 were not disbursed to the state until February 1998, and court costs collected in March 1998 through December 1998 were not disbursed to the state until January 1999. Sections 595.045.3, 476.053, and 561.035, RSMo Cumulative Supp. 1999, require applicable collections to be remitted at least monthly to the state Department of Revenue.

Conditions similar to Parts A-D. were also noted in our prior audit report of the municipal division.

- E. The municipal division has not remitted Peace Officer Standards and Training Commission (POST) fees to the state. The city has collected \$45 in POST fees during the two years ending September 30, 1999. Section 590.140, RSMo Cumulative Supp. 1999, requires collections of POST fees to be remitted at least monthly to the state Department of Revenue.
- F. The court allows defendants to make partial payments on fines and court costs. The court does not maintain adequate control records to account for total amounts owed to the court. Without adequate accounts receivable records, the court cannot effectively monitor and collect monies owed to the court.

**WE RECOMMEND** the Municipal Division:

- A.1. Record the method of payment on all receipt slips issued and reconcile the composition of receipt slips issued to the composition of deposits.
2. Transmit fines and costs to the city daily or when accumulated receipts exceed \$100.
3. Restrictively endorse all checks and money orders immediately upon receipt

- B. Work with the police department to account for the numerical sequence and ultimate disposition of all parking and traffic tickets and retain all records as required by Supreme Court Administrative Rule 8.
- C. Forward records of convictions on traffic offenses to the MSHP as required by state law. In addition, court files should be reviewed for applicable tickets that should be forwarded to the MSHP.
- D&E. And the city ensure court costs are remitted monthly to the state in accordance with state law.
- F. Maintain adequate account receivable records including signed payment agreements and a control ledger. Periodically the control ledger balance should be reconciled to the balances on the individual payment agreements.

**AUDITEE'S RESPONSE**

*A,B*

*& F. We agree with these recommendations.*

*C&D. This has been implemented.*

*E. We are in the process of turning over these monies.*

This report is intended for the information of the city's management and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

\* \* \* \* \*

TWENTY-SECOND JUDICIAL CIRCUIT

ST. LOUIS CITY, MISSOURI

CIRCUIT CLERK FUND

SIX MONTHS ENDED DECEMBER 31, 1998

AND YEAR ENDED JUNE 30, 1998

**From The Office Of State Auditor  
Claire McCaskill**

Report No. 2000-28  
April 25, 2000  
[www.auditor.state.mo.us](http://www.auditor.state.mo.us)

AUDIT REPORT

Office Of The  
State Auditor Of Missouri  
Claire McCaskill

April 2000

**During our audit of the Twenty-Second Judicial Circuit, St. Louis City, Missouri, Circuit Clerk Fund, we identified certain management practices which we believe could be improved. This audit reflects the audit period ending December 31, 1998, the end of the prior Circuit Clerk's term.**

**These audit findings are in addition to those noted in an earlier report which uncovered a theft in the Circuit Clerk's office. The employee who committed the theft has subsequently been terminated, prosecuted, pleaded guilty and paid full restitution.**

**The earlier report (Report No. 99-39) noted discrepancies between receipt records for cash bonds, monies deposited into the Finance Department's bank account, and other supporting bond records. Cash bonds of at least \$9,300 were taken and receipt records were altered to conceal the shortages. All thefts reported in our earlier audit occurred prior to January 1, 1999.**

-----

Criminal Division – Cashier's Office

The Criminal Division's safe was not always locked during the day. The numerical sequence of receipt slips was not accounted for properly, several unexplained changes were made to receipt slips and receipts were not always deposited timely. Some accounting duties were not adequately segregated, adequate information on payments received was not always entered on the computer and reconciliations between receipt slips issued and payments posted on the computer were not always performed. Monthly bank reconciliation procedures were inadequate. An independent reconciliation of receipts, disbursements, and transfers posted to the general ledger was not performed. An open-items listing was not prepared for some items, the Criminal Division had \$107,757 in unidentified monies and the bond open-items listing at December 31, 1998, included numerous old bonds.

Costs for Criminal Cases

A listing of accrued costs and restitution was not maintained and some monies were not disbursed properly. Criminal costs billings were not sent on a timely basis, nor was the city reimbursing appropriate criminal cost bills. Crime Victim's Compensation judgments were not collected from defendants assigned to St. Louis City's Medium Security Institution (MSI). The court did not prorate partial payments received on court costs.

Child Support Department

Receipts were not posted to the cash control records timely, nor were they deposited daily. Deposit report totals were not agreed to bank deposits or monies on hand. Bank reconciliations had not been prepared timely. Some accounting duties were not adequately segregated or reviewed by a supervisor. The cash balance exceeded the open-items listing by \$281,000 at December 31, 1998 and open-items listings for the Parent Locator and Dissolution bank accounts were not prepared. Listings of held payments were not periodically reviewed. Adjustments totaling \$32,890 were made to the November 1998 bank reconciliation for duplicate checks that were issued and cashed.

### Missing Records

Various accounting records maintained by the Child Support Department including deposit reports, check registers, and canceled checks for September 1998 to December 1998 were missing. In addition, various accounting records prepared by the Criminal Division including the June 30, 1998, open-items lists, deposit slips, deposit records, canceled checks and case files were missing.

### Civil Division

The open-items listing was not accurate and was not periodically reconciled to the applicable cash and investment balance. Computer records and manual records for each case did not always agree and case files did not include some pertinent financial information. Controls over the Cashier's drawers were not adequate and the name of the payor was not entered for each receipt. A printout of non-posted transactions was not periodically printed and reviewed and the mail log was not reconciled to the receipts entered for the day. Disbursements to the city were not always made timely and the court was holding old outstanding checks. Correction forms were not prenumbered and documentation was not maintained in the case files to support changes to the computer. Sixteen checks could not be located and returned checks were not always voided on the computer timely. There was no supervisory review of the disbursements prepared by the Assistant Finance Manager.

### Costs for Civil Cases

Upon case closure, civil case files are sent through various departments in the Circuit Clerk's Office and then sent to the Taxing Department. The Taxing Department calculates which charges are due on the case. The taxing information is entered on the inside back cover of each case to summarize charges and disbursements of the case. Once the charges have been taxed, the case file is sent to the File Room.

If the filing fees are equal to or greater than the charges taxed and the plaintiff was ordered to pay court costs, the court costs are applied to the applicable funds for distribution and a refund check is issued, if necessary. For most cases, if the filing fee is less than the charges or the defendant was ordered to pay courts costs, a billing is generated by the Taxing Department and sent to the applicable party. However, monies on hand were not disbursed or refunded until all costs were collected from the proper party.

The court was holding over \$8.5 million on cases that had already been finalized or on which additional costs were still due. In addition, second bills for costs due were not sent and court costs were not applied and disbursed on a timely basis. Records were not maintained to document total amounts due to the court and the court did not have procedures to review accrued costs, prorate amounts collected, and write off amounts deemed uncollectible.

**The current Circuit Clerk has provided responses throughout the report which are in agreement with our audit's recommendations.**

## FINANCIAL SECTION

## State Auditor's Reports

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

**INDEPENDENT AUDITOR'S REPORT ON  
THE FINANCIAL STATEMENTS**

Presiding Judge and Court en banc  
and  
The Circuit Clerk of the  
Twenty-Second Judicial Circuit  
St. Louis City, Missouri

We have audited the special-purpose financial statements of the Circuit Clerk Fund of the Twenty-Second Judicial Circuit, St. Louis City, Missouri, as of and for the six months ended December 31, 1998, and as of and for the year ended June 30, 1998, as identified in the table of contents. These special-purpose financial statements are the responsibility of the judicial circuit's management. Our responsibility is to express an opinion on these financial statements based on our audit.

Except as discussed in paragraphs four and five, we conducted our audit in accordance with generally accepted auditing standards and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the special-purpose financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the special-purpose financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

The accompanying special-purpose financial statements were prepared for the purpose of presenting the receipts, disbursements, and changes in cash and investments of the Circuit Clerk Fund of the Twenty-Second Judicial Circuit, St. Louis City, Missouri, and are not intended to be a complete presentation of the financial position and results of operations of the Circuit Clerk Fund.

As discussed in Note 4 to the financial statements, there was evidence of fraud in the Criminal Division. Also, the internal control procedures and accounting records of the Circuit Clerk's Criminal Division were not adequate. As noted in our report on our Special Review of the Circuit Criminal Division - Finance Department - Cash Bond Deposits, Report No. 99-39, we found evidence of fraud concerning bond monies received by the Finance Department. Also, the Circuit Clerk's - Criminal

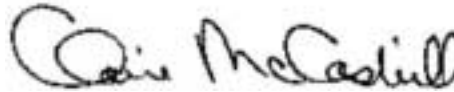

Division - Finance Department did not always account for the numerical sequence of receipt slips and duties were not adequately segregated. As a result, we were unable to satisfy ourselves by appropriate audit tests or other means as to the receipts and disbursements of the Criminal Division beyond amounts recorded in the Criminal Division's records for the six months ended December 31, 1998, and the year ended June 30, 1998.

Internal controls and accounting records of the Child Support Division for the six months ended December 31, 1998, were inadequate. The December 1998 bank reconciliation was not completed until December 1999 and duties were not adequately segregated. The accounting records were not adequately maintained and certain deposit reports, check registers, and canceled checks could not be located or recreated. As a result, we were unable to satisfy ourselves by appropriate audit tests or other means as to the receipts and disbursements of the Child Support Division beyond amounts recorded in the Child Support Division's records for the six months ended December 31, 1998.

In our opinion, except for the effects, if any, on the financial statements of the matters discussed in the preceding two paragraphs, the special-purpose financial statements referred to in the first paragraph present fairly, in all material respects, the receipts, disbursements, and changes in cash and investments of the Circuit Clerk Fund of the Twenty-Second Judicial Circuit, St. Louis City, Missouri, as of and for the six months ended December 31, 1998, and as of and for the year ended June 30, 1998, in conformity with the comprehensive basis of accounting discussed in Note 1, which is a basis of accounting other than generally accepted accounting principles.

In accordance with *Government Auditing Standards*, we also have issued our report dated August 19, 1999, on our consideration of the Office of the Circuit Clerk's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grants.

The accompanying History, Organization, and Statistical Information is presented for informational purposes. This information was obtained from the State Courts Administrator's office, St. Louis City, and the Twenty-Second Judicial Circuit and was not subjected to the auditing procedures applied in the audit of the special-purpose financial statements referred to above.

**INDEPENDENT AUDITOR'S REPORT ON COMPLIANCE  
AND ON INTERNAL CONTROL OVER FINANCIAL REPORTING**

Presiding Judge and Court en banc  
and  
The Circuit Clerk of the  
Twenty-Second Judicial Circuit  
St. Louis City, Missouri

We have audited the special-purpose financial statements of the Circuit Clerk Fund of the Twenty-Second Judicial Circuit, St. Louis City, Missouri, as of and for the six months ended December 31, 1998, and for the year ended June 30, 1998, and have issued our report thereon dated August 19, 1999. That report expressed a qualified opinion on the special-purpose financial statements. Except as discussed in that report, we conducted our audit in accordance with generally accepted auditing standards and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States.

Compliance

As part of obtaining reasonable assurance about whether the special-purpose financial statements of the Circuit Clerk Fund of the Twenty-Second Judicial Circuit, St. Louis City, Missouri, are free of material misstatement, we performed tests of the judicial circuit's compliance with certain provisions of laws, regulations, contracts, and grants, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no material instances of noncompliance that are required to be reported under *Government Auditing Standards*. However, we noted certain other instances of noncompliance which are presented in the accompanying Management Advisory Report.

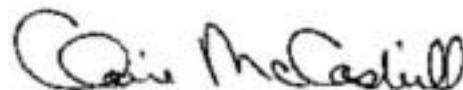

Internal Control Over Financial Reporting

In planning and performing our audit of the special-purpose financial statements of the Circuit Clerk Fund of the Twenty-Second Judicial Circuit, St. Louis City, Missouri, we considered the judicial circuit's internal control over financial reporting in order to determine our auditing procedures for the purpose of expressing our opinion on the special-purpose financial statements and not to

provide assurance on the internal control over financial reporting. However, we noted certain matters involving the internal control over financial reporting and its operation that we consider to be reportable conditions. Reportable conditions involve matters coming to our attention relating to significant deficiencies in the design or operation of the internal control over financial reporting that, in our judgement, could adversely affect the judicial circuit's ability to record, process, summarize, and report financial data consistent with the assertions of management in the special-purpose financial statements.

A material weakness is a condition in which the design or operation of one or more of the internal control components does not reduce to a relatively low level the risk that misstatements in amounts that would be material to the special-purpose financial statements being audited may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions. Our consideration of the internal control over financial reporting would not necessarily disclose all matters in the internal control that might be reportable conditions and, accordingly, would not necessarily disclose all reportable conditions that are also considered to be material weaknesses. However, we noted certain matters involving the internal control over financial reporting and its operation that we consider to be material weaknesses, and these matters are presented in the accompanying Management Advisory Report.

This report is intended for the information of the management of the Office of Circuit Clerk, Twenty-Second Judicial Circuit, St. Louis City, Missouri, and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

A handwritten signature in dark ink, appearing to read "Claire McCaskill". The signature is fluid and cursive, with the first name "Claire" written in a larger, more prominent script than the last name "McCaskill".

The accompanying Notes to the Financial Statements are an integral part of this statement.

## Notes to the Financial Statements

TWENTY-SECOND JUDICIAL CIRCUIT  
ST. LOUIS CITY, MISSOURI  
CIRCUIT CLERK FUND  
NOTES TO THE FINANCIAL STATEMENTS

1. Significant Accounting Policies

A. Reporting Entity and Basis of Presentation

The accompanying special-purpose financial statements present only selected data for the Circuit Clerk Fund, Twenty-Second Judicial Circuit, St. Louis City, Missouri.

Receipts, disbursements, and changes in cash and investments are presented for the Circuit Clerk Fund administered by the Office of the Circuit Clerk, Twenty-Second Judicial Circuit, St. Louis City, Missouri. The operating costs of the office are paid directly from appropriations authorized by the St. Louis City Board of Aldermen and the state of Missouri, and are not included in these financial statements.

The "Total (Memorandum Only)" column is presented as additional analytical data. Because this column does not identify the restrictions that exist by fund, it should be read only with reference to the details of each fund.

B. Basis of Accounting

The Statements of Receipts, Disbursements, and Changes in Cash and Investments for the Circuit Clerk Fund, Office of the Circuit Clerk, Twenty-Second Judicial Circuit, St. Louis City, Missouri, are prepared on the cash basis of accounting; accordingly, amounts are recognized when they are received or disbursed. This basis of accounting differs from generally accepted accounting principles, which require revenues to be recognized when they become available and measurable or when they are earned and expenditures or expenses to be recognized when the related liabilities are incurred.

C. Fiscal Authority and Responsibility

The Office of the Circuit Clerk, Twenty-Second Judicial Circuit, St. Louis City, Missouri, includes the transactions of the circuit divisions, associate circuit divisions, and the juvenile office.

The Circuit Clerk has been charged with the responsibility of administering the transactions of the circuit divisions, associate circuit divisions and juvenile office.

The Office of the Circuit Clerk, Twenty-Second Judicial Circuit, St. Louis City, Missouri, administers transactions within the Circuit Division (Circuit Clerk) Fund. These

transactions include receipts and disbursements of the civil, child support, criminal, garnishment, and special interest accounts for the circuit and associate circuit divisions. The civil account includes transactions for the courthouse restoration account, family court account, juvenile office, refund accounts, restricted accounts and investments.

## 2. Cash and Investments

Section 483.310, RSMo Cumulative Supp. 1999, authorizes circuit courts to place their funds in savings deposits in banks and savings and loan associations or in U.S. Treasury bills.

Cash includes both deposits and investments. In accordance with Statement No. 3 of the Governmental Accounting Standards Board, *Deposits with Financial Institutions, Investments (Including Repurchase Agreements), and Reverse Repurchase Agreements*, disclosures are provided below regarding the risk of potential loss of deposits and investments. For the purposes of these disclosures, deposits with financial institutions are demand, time, and savings accounts, including certificates of deposit and negotiable order of withdrawal accounts, in banks and savings institutions. Investments are securities and other assets acquired primarily for the purpose of obtaining income or profit.

### Deposits

The Circuit Clerk's deposits at December 31, 1998 and June 30, 1998, were entirely covered by federal depositary insurance or by collateral securities held by the Federal Reserve in the Circuit Clerk's name.

However, because of significantly higher bank balances at certain times during the year, uninsured and uncollateralized balances existed at those times although not at year-end.

To protect the safety of deposits, Section 110.020, RSMo 1994, requires depositaries to pledge collateral securities to secure deposits not insured by the Federal Deposit Insurance Corporation.

### Investments

The Circuit Clerk's only investments of the various funds at December 31, 1998, were repurchase agreements with reported amounts of \$1,337,316, which approximated fair value.

These investments represent uninsured and unregistered investments for which the securities were held by the Federal Reserve in the Circuit Clerk's name.

The Circuit Clerk's only investment at June 30, 1998, was a U.S. Treasury bill with a reported amount of \$101,454 (which approximated fair value). The investment was held by the court's custodial bank in the Circuit Clerk's name.

3. Transfers

Transfers during the year were as follows:

|  | <u>Civil<br/>Account</u> | <u>Criminal<br/>Account</u> | <u>Garnishment<br/>Account</u> | <u>Special<br/>interest<br/>Account</u> |
|--|--------------------------|-----------------------------|--------------------------------|---|
| Cash transferred to Special<br>Interest Account: |                          |                             |                                |   |
| Six months ended December 31, 1998               | \$ (248,784)             | (6,327)                     | (4,162)                        | 259,273                                 |
| Year ended June 30, 1998                         | \$ (530,523)             | (39,824)                    | 0                              | 570,347                                 |

4. Missing Funds

The State Auditor's report "Special Review of the Circuit Criminal Division - Finance Department - Cash Bond Deposits," Report No. 99-39, for the time period July 1, 1997 through December 31, 1998, noted a misappropriation of at least \$9,300 in the Criminal Division - Finance Department. These monies are not included in the receipts and disbursements on the financial statements.

5. Criminal Division Monies Held in Civil Account

Criminal Account monies totaling \$885,000 are included in the Civil Account cash balances. This money is currently being held in certificates of deposit which are included in the Civil Account balance.

## MANAGEMENT ADVISORY REPORT SECTION

Management Advisory Report -  
State Auditor's Current Recommendations

TWENTY - SECOND JUDICIAL CIRCUIT  
ST. LOUIS CITY, MISSOURI  
CIRCUIT CLERK FUND  
SUMMARY OF FINDINGS

1. Criminal Division - Cashier's Office (pages 22-28)

The Criminal Division's safe was not always locked during the day. The numerical sequence of receipt slips was not accounted for properly, several unexplained changes were made to receipt slips and receipts were not always deposited timely. Some accounting duties were not adequately segregated, adequate information on payments received was not always entered on the computer and reconciliations between receipt slips issued and payments posted on the computer were not always performed. Monthly bank reconciliation procedures were inadequate. An independent reconciliation of receipts, disbursements, and transfers posted to the general ledger was not performed. An open-items listing was not prepared for some items, the Criminal Division had \$107,757 in unidentified monies and the bond open-items listing at December 31, 1998, included numerous old bonds.

2. Costs for Criminal Cases (pages 29-33)

A listing of accrued costs and restitution was not maintained and some monies were not disbursed properly. Criminal costs billings were not sent on a timely basis, nor was the city reimbursing appropriate criminal cost bills. Crime Victim's Compensation judgments were not collected from defendants assigned to St. Louis City's Medium Security Institution (MSI). The court did not prorate partial payments received on court costs.

3. Child Support Department (pages 34-41)

Receipts were not posted to the cash control records timely, nor were they deposited daily. Deposit report totals were not agreed to bank deposits or monies on hand. Bank reconciliations had not been prepared timely. Some accounting duties were not adequately segregated or reviewed by a supervisor. The cash balance exceeded the open-items listing by \$281,000 at December 31, 1998 and open-items listings for the Parent Locator and Dissolution bank accounts were not prepared. Listings of held payments were not periodically reviewed. Adjustments totaling \$32,890 were made to the November 1998 bank reconciliation for duplicate checks that were issued and cashed. Manual records of control totals were not maintained to compare to the computer records and some monthly reports were not printed timely. Adequate information was not provided to the city to allow for the proper disbursement of the non IV-D record-keeping fee.

4. Computer Operations and Controls (pages 41-43)

Passwords were not kept confidential. Access to certain programs and data files were not adequately restricted and change reports were not generated.

5. Missing Records (page 43)

Various accounting records maintained by the Child Support Department and Criminal Division were missing.

6. Civil Division (pages 44-52)

The open-items listing was not accurate and was not periodically reconciled to the applicable cash and investment balance. Computer records and manual records for each case did not always agree and case files did not include some pertinent financial information. Controls over the Cashier's drawers were not adequate and the name of the payor was not entered for each receipt. A printout of non-posted transactions was not periodically printed and reviewed and the mail log was not reconciled to the receipts entered for the day. Disbursements to the city were not always made timely and the court was holding old outstanding checks. Correction forms were not prenumbered and documentation was not maintained in the case files to support changes to the computer. Sixteen checks could not be located and returned checks were not always voided on the computer timely. There was no supervisory review of the disbursements prepared by the Assistant Finance Manager.

7. Costs for Civil Cases (pages 53-56)

The court was holding over \$8.5 million on cases that had already been finalized or on which additional costs were still due. In addition, second bills for costs due were not sent and court costs were not applied and disbursed on a timely basis. Records were not maintained to document total amounts due to the court and the court did not have procedures to review accrued costs and write off amounts deemed uncollectible.

8. Certified Copies Department (pages 56-58)

Controls over copy monies received were inadequate.

9. Garnishment Office (pages 58-60)

Garnishment disbursements were not always made on a timely basis. Monthly open-items listings did not agree to the bank balance and old outstanding checks were being held.

10. Special Interest Account (pages 60-61)

Bids were not always solicited nor was bid documentation always retained for expenditures made from the Special Interest Account.

11. Juvenile Office (pages 61-64)

Accounting duties over accrued costs were not adequately segregated.

TWENTY-SECOND JUDICIAL CIRCUIT  
ST. LOUIS CITY, MISSOURI  
CIRCUIT CLERK FUND  
MANAGEMENT ADVISORY REPORT -  
STATE AUDITOR'S CURRENT RECOMMENDATIONS

We have audited the special-purpose financial statements of the Office of Circuit Clerk, Twenty-Second Judicial Circuit, St. Louis City, Missouri, as of and for the six months ended December 31, 1998, and as of and for the year ended June 30, 1998, and have issued our report thereon dated August 19, 1999. That report expressed a qualified opinion on the special-purpose financial statements.

The following Management Advisory Report presents our findings and recommendations arising from our audit of the office's special-purpose financial statements. During our audit, we also identified certain management practices which we believe could be improved. Our audit was not designed or intended to be a detailed study of every system, procedure, and transaction. Accordingly, the findings presented in the following report should not be considered as all-inclusive of areas where improvements may be needed.

|  |
|--|
| <b>1. Criminal Division - Cashier's Office</b> |
|--|

The Circuit Criminal Division accepts checks, money orders, and cash payments of fines, court costs, bonds, and restitution. There were normally four clerks in the office during the audit period. Three of these clerks served as cashiers, in addition to performing their regular duties as bookkeeper, cashier supervisor, and assistant finance manager. The Criminal Division handled receipts totaling approximately \$881,000 and \$1,826,000 for the six months ended December 31, 1998, and the year ended June 30, 1998, respectively.

A. Monies received are recorded on a manual one-write receipt system. Each cashier has a separate cash drawer and individual, unique codes are used to access the drawers. At the end of the day, each cashier balances their drawer to the receipts recorded on the one-write receipt ledger. The cashier's supervisor recounts the money and agrees the cash composition of receipts to the one-write ledger and prepares the deposit. Monies to be deposited are placed in envelopes and stored in a combination safe until the security officers arrive to pick up the deposit the next day. We noted the following concerns:

- 1) The door to the safe is frequently left open throughout the day. The cashier's supervisor and assistant finance manager are not always in the room to watch over the safe contents. Various court employees pass through the Cashier's Office each day. The safe should be locked at all times to ensure that cash is adequately safeguarded.
- 2) The numerical sequence of prenumbered receipt slips was not accounted for properly. We noted several receipt numbers which were not shown as used or

voided. Cashiers also frequently change information entered on receipt slips through the use of "white-out", carbon paper, or other means. Explanations of these changes were not adequately documented in the receipt records.

To ensure all monies receipted are properly handled, the numerical sequence of receipt slips should be accounted for properly and any changes made to receipt slips should be done by issuing a new receipt slip and voiding and retaining the old receipt slip. Any unusual problems in recording transactions should be clearly documented and thoroughly explained.

- 3) The supervisor was to perform a reconciliation to compare the daily one-write pages to the daily deposit. We noted numerous differences between the daily one-write pages and deposit totals which were not adequately documented or explained in the accounting records. In addition, the cashier supervisor frequently changed the payment information entered on receipt slips from cash to money order and vice-versa. Complete documentation of the reconciliation performed, and any necessary corrections, should be retained to support conclusions and any corrections made to facilitate independent reviews.
- 4) Receipts were not always deposited in a timely manner. We noted several instances where monies received were not deposited for three to four business days. The average daily collections between July 1, 1998 and December 31, 1998, totaled approximately \$6,600, half of which was cash.

To adequately safeguard receipts and reduce the risk of loss, theft, or misuse of funds, receipts should be deposited intact daily or when accumulated receipts exceed \$100.

B. The following concerns were noted regarding supervision and segregation of duties:

- 1) The bookkeeper is responsible for receiving payments, recording cash transactions, issuing and canceling warrants, generating and recording disbursement vouchers, reconciling receipts to deposits, maintaining open-items listings, and making adjustments to accounting records. In addition, there is no independent reconciliation between receipts, disbursements, and transfers posted to the general ledger accounts by the bookkeeper and totals recorded on the cash control records, one-write receipt ledgers, and disbursement vouchers.
- 2) The Criminal Division uses the Regional Justice Information System (REJIS) to track court costs assessed, amounts paid, and amounts due to the court for each criminal case. Warrants are also issued through the REJIS system. The duties for entering case payment information and issuing and canceling warrants are not adequately segregated. Cashiers record receipts in case files and the supervisor, assistant supervisor, and bookkeeper, who also frequently function as cashiers,

enter payment information on the REJIS system from the case files. In addition, when a payment is made by a defendant with an outstanding warrant, the cashiers can cancel the outstanding warrant on the REJIS system. The receipt slip number, amount paid, and the balance due do not have to be recorded on REJIS to cancel the warrant.

Cashiers should not have access to change or enter payment information to the computer system. At a minimum, the Circuit Clerk should designate an employee with no receipt handling responsibilities to reconcile payments recorded on the computer system to payments recorded in the one-write receipt ledgers.

- 3) Payments recorded on the REJIS system are not reconciled to payments recorded in the one-write receipt ledgers. To ensure all payments are recorded accurately on the computer, the department should agree payments recorded on the REJIS system to receipts recorded in the receipt ledgers.

The activity posted to the REJIS system serves as the case history. To ensure all payments are accounted for properly and can be reconciled to the receipt ledger and all case files are accurate and complete, the court should record the receipt slip number and amount paid to the REJIS system. The court should then complete and document the reconciliation on a timely basis.

To safeguard against possible loss or misuse of funds, internal controls should provide reasonable assurance that all transactions are accounted for properly and assets are adequately safeguarded. Proper segregation of duties helps to provide this assurance. If proper segregation of duties cannot be achieved, at a minimum, there should be a documented independent supervisory review.

- C. Monthly bank reconciliation procedures were inadequate. A reconciliation between the bank statement and the general ledger and cash control records was not performed. Instead, bank transactions were only reconciled with bank deposit slips and the check register prepared by the Data Processing Department. We noted several large differences between the bank statement and transactions recorded in the cash control records and general ledger, which were not investigated or reconciled. In addition, numerous errors were made by the bookkeeper when posting receipts and disbursements to the various accounting records. For example, daily receipt totals recorded in the one-write ledgers were often incorrectly posted to the receipts journal. Also, some check sequences and voided check sequences were never recorded in the disbursement journal or transfer journal. Adequate bank reconciliations would help ensure such errors are identified and corrected.

Accurate, complete bank reconciliations are necessary to ensure all monies are accounted for properly, accounting records are correct and to identify errors on a timely basis.

D. The Criminal Division deposits bond monies, restitution payments, court costs, and other monies it receives into one checking account. A general ledger is maintained to account for balances of monies held in trust by the court. The reconciled bank account balance at December 31, 1998, was \$847,522.

- 1) Approximately \$107,757 in unidentified monies is accounted for in the "Miscellaneous" general ledger liability account and has been held in the checking account for the past several years. In addition, the general ledger liability account balances are not periodically reconciled with the cash balance. At December 31, 1998, total liabilities exceeded the cash balance by \$42,643. Listings of open items should be prepared monthly and reconciled to the checking account balances to provide assurance that all records are in balance and sufficient funds are available to cover liabilities. Monies due to other parties should be distributed accordingly. Sections 447.500 through 447.585, RSMo Cumulative Supp. 1999 (which relate to unclaimed property), should be used to disburse any unidentified or unclaimed monies.
- 2) An open-items listing associated with collected partial payments held in trust is not prepared and consequently is not reconciled to the cash balance. When the Criminal Division - Finance Department receives a significant payment of fines and court costs, the amount paid is disbursed that same month. However, if a defendant makes a small payment on the fines and costs, the payment remains on deposit until another significant payment is made, the costs are paid in full, or the court determines the costs will probably not be collected.

To ensure that there is sufficient cash to cover all liabilities for open cases, accurate and complete open-items listings should be prepared monthly and reconciled to the cash balance.

- 3) The bond open-items listing at December 31, 1998, included numerous old bonds, some which had been held over fifteen years. Current procedures require sureties to physically appear to apply for a bond refund. The Finance Department is currently reviewing open bonds in the bond ledger to ensure they are open. Some old unclaimed bonds have been identified as closed and disbursed but many still remain open in the bond ledger. A review should be made of any bonds posted by persons who failed to make the required court appearance to determine if the bonds should be forfeited and monies paid over to the city treasury as provided by Section 479.210, RSMo 1994. For those bonds which cannot be forfeited and remain unclaimed, Section 447.595, RSMo 1994, requires bonds remaining unclaimed for one year after disposition of the case be turned over to the state's Unclaimed Property Section.

These conditions were noted in our prior report.

**WE RECOMMEND** the Circuit Clerk:

- A.1. Ensure the Criminal Division's safe remains locked at all times.
- 2. Ensure the numerical sequence of all receipt slips issued is accounted for properly. In addition, void and retain incorrectly written receipt slips and thoroughly document any changes to the receipt records.
- 3. Ensure a documented reconciliation of receipts slips issued to monies deposited is performed by someone independent of cash receiving or recording functions. All differences should be investigated in a timely manner and their resolution documented.
- 4. Deposit receipts intact daily or when accumulated receipts exceed \$100.
- B. Provide for adequate segregation of duties and ensure that independent reconciliations and reviews of accounting records are performed. In addition, ensure the receipt slip number and amount paid is included for all receipts recorded into the computer and receipts recorded on REJIS are reconciled to receipts recorded in the one-write receipt ledgers.
- C. Prepare complete and accurate bank reconciliations. In addition, ensure transactions recorded in various accounting records agree with information recorded in source documents (such as the one-write ledger and check reports).
- D. Prepare and maintain a separate open-items listing for each general ledger account and reconcile balances to bank and book balances. In addition, all monies currently held in the old checking account should be identified and properly disbursed, if possible. Unclaimed bonds should be disposed of in accordance with state law. Any monies that cannot be identified should be disbursed to the State Treasurer's Unclaimed Property Section in accordance with state law.

**AUDITEE'S RESPONSE**

- A.1. *We agree. We will establish a written policy that the safe will remain locked at all times. A newly created supervisor position will perform spot checks of the safe to ensure compliance with the new policy. We will require the supervisor to document in her weekly report when the spot checks were performed and the results. In addition, we will establish a written policy that no one other than assigned finance personnel will be allowed in the Criminal Cashier's Office.*

*Our goal is to immediately implement these changes.*

- A.2. *We agree. In May 1999, the Criminal Finance Department automated the receipting of criminal monies. The computerized cashiering system will address the problem of changing or altering the information on the receipt slip. The Criminal Cashier Supervisor (CCS) will be responsible for the accounting of the pre-numbered computer generated receipt slips. The computer program retains all void transactions. The cashiers cannot void a transaction and they do not have access to the stored information on voids. Only the Assistant Finance Manager and the Receipting Supervisor (RS) can void a transaction, and neither of these managers ever directly handles receipts. The RS will be responsible for reconciling the voids and reporting weekly to the Finance Director the use of voids.*

*The computer program will be able to report, at desired intervals, the number of voids and who created the void. The void report and other reports will be reviewed by the Finance Director and be part of the Finance Director's monthly report to the Circuit Clerk.*

*This plan of action is dependent upon anticipated computer programming enhancements. When these enhancements will be implemented is dependent upon several circumstances, the availability of funds and the priority assigned to these enhancements in relationship to other planned computer changes. Therefore, we cannot give a date by which this goal will be met, but we anticipate implementation of this plan within one year.*

- A.3. *We agree. The RS will reconcile the computerized deposit report to the daily deposit slip. The reconciliation will include the comparison of the composition of the deposit report to the deposit slip. All differences will be documented or explained in the accounting records by the CCS.*

*Our goal is to have these fully implemented within six months.*

- A.4. *We agree. The RS will be responsible for ensuring that deposits are made daily and intact. In addition, the Bookkeeping Department will document the timeliness of deposits when the general ledger is reconciled.*

*The Bookkeeping Department's reorganization is part of the general reorganization of the Finance Department. As a result of the plan, Bookkeeping has a new supervisor and three newly assigned employees. It will take several months for Bookkeeping to overcome a backlog of work and the initial learning curve to become a cohesive and effective team. Therefore, our goal is to have this part of the plan implemented within six months.*

- B. *We agree. After the discovery of the missing bond monies, we segregated the Bookkeeper's duties. Currently, no cashier who receipts money has any bookkeeping function. Under the current system, there is a supervisor who presently supervises the three cashiers and is responsible for the receiving and depositing of cash and checks. Employees who do not report to either the CCS or the RS, do all bookkeeping functions.*

*Additionally, as part of the new automated system, the receipting of payments by the cashier creates by automation a minute entry of the payment into the REJIS case management system for that particular criminal case. The computerized criminal cashier system transmits payment minutes to REJIS nightly. The REJIS minute entry now includes the computerized receipt number and the amount paid.*

*These automated changes have been fully implemented. We are continuing to monitor this change to assure that it is functioning as planned. We continue to review accounting duties to ensure there is proper segregation.*

- C. *We agree. During our recent reorganization of the Finance Department, we expanded the responsibilities of the Bookkeeping Department. The Bookkeeping Department will be responsible for preparing bank reconciliations for all bank accounts. In addition, their duties will include ensuring the transactions recorded in the various accounting records agree with information recorded in source documents.*

*Given the state of the Bookkeeping Department, as discussed above, our goal is to have these changes fully implemented within one year.*

- D. *We agree. The computerized cashiering system has the ability of maintaining an open-items list for receipts after May 1999. We are in the process of making the system fully operational, adding the disbursement information and functionality to the open-items list. There are two other impediments to implementing this recommended action. First, as discussed in the general response that follows, the integrity of the records prior to May 1999 is questionable. As such, the office must be reasonably certain that the party identified in the record is entitled to the funds indicated by the records. Second, as the fiduciary, the Circuit Clerk not only has to be reasonably certain that the correct person and amount has been identified, the Circuit Clerk needs to take all appropriate measures to locate the payees so that the office can reissue the checks. Once the office knows who is owed what, and that the identified payees cannot be located, the office will properly disburse the unclaimed monies as required by state law.*

*Our goal is to have this policy fully implemented within one year for cases initiated after 1999. It is not possible to give a date for achievement of this goal with respect to cases filed prior to 1999, as we need to determine the extent of the problem and then prepare a plan of action to correct the deficiencies.*

Also, see "General Response to Findings in Criminal Finance" beginning on page 62.

## 2.

## Costs for Criminal Cases

- A. A listing of accrued costs and restitution owed to the court is not maintained by the Circuit Clerk and monitoring procedures related to accrued costs are not adequate. By not adequately monitoring accrued costs, these costs could remain uncollected and might eventually result in lost revenue.

A complete and accurate listing of accrued costs would allow the Circuit Clerk to more easily review the amounts due to the court and to take appropriate steps to ensure amounts owed are collected on a timely basis.

- B. Fees and fines collected by the Circuit Clerk were not remitted in a timely manner. Section 488.023, RSMo Cumulative Supp. 1999, requires the Circuit Clerk to remit all fees collected monthly.

Each month, totals recorded on the one-write receipt ledgers are used to calculate the amounts due to the state, city, and Board of Education. These collections are then supposed to be remitted around the fifteenth of the next month. Monthly collections due to the State of Missouri, the City of St. Louis, and the St. Louis City Board of Education, based on selected months reviewed, averaged approximately \$17,200, \$13,200, and \$9,600, respectively. Though remittances of some fees and fines are made each month, the balances owed to each of these entities at December 31, 1998, amounted to five to eight times the average monthly remittance. As illustrated in the table below, balances began to accumulate in fiscal year 1995 and have remained relatively constant over the past two years.

| Date              | State |         | City |        | Board of Education |
|-------------------|-------|---------|------|--------|--------------------|
| June 30, 1995     | \$    | 31,592  | \$   | 294    | \$ 3,455           |
| June 30, 1996     |       | 139,197 |      | 53,774 | 50,089             |
| June 30, 1997     |       | 125,645 |      | 43,886 | 86,615             |
| June 30, 1998     |       | 125,559 |      | 59,967 | 91,850             |
| December 31, 1998 |       | 126,142 |      | 59,250 | 81,590             |

We identified several months in 1997 and 1998 where only a portion of fees and fines collected were remitted to the state, city, and Board of Education. In addition, based on the change in the balances from 1995 to 1996, it is likely some fees collected prior to the audit period were also not fully disbursed. At December 31, 1998, monies collected from these prior periods were still held in the Circuit Clerk's Criminal Division checking account.

- C. Section 550.020, RSMo 1994, allows for the reimbursement of costs in criminal cases from the state when the defendant is sentenced to imprisonment in the penitentiary. Section

550.030, RSMo 1994, allows for the reimbursement of costs in criminal cases from the county when the defendant is sentenced to imprisonment in the county jail.

- 1) The Criminal Division had not submitted criminal cost billings for the court costs to the state on a timely basis. During our review, we noted as of May 24, 1999, the division had not prepared the billings from March 1999. Section 33.120, RSMo Cumulative Supp. 1999, requires all bills of costs be submitted to the state's Office of Administration within two years of the date of judgement and sentence. Failure to bill these costs on a timely basis could result in lost revenue to the city.
- 2) Criminal cost bill reimbursements are not properly disbursed. When the Criminal Division sends a cost bill to the state for a defendant sentenced to the penitentiary, the state sends a cost reimbursement check directly to the Circuit Clerk's Office. The Circuit Clerk's Office transmits the entire check to the city without providing the information necessary for the city to allocate and disburse these monies to the appropriate parties.

In addition, an inventory of the Criminal Division's safe contents performed on April 14, 1999, uncovered a check for \$14,430 dated August 24, 1998, addressed to the St. Louis City Treasurer. This was a remittance from the State of Missouri for court costs billed to the state by the Circuit Clerk. The Assistant Finance Manager indicated the check was not turned over to the city because he believed that the amount billed to the state was incorrect and needed to be investigated.

- 3) The Criminal Division sends a criminal cost bill to the St. Louis City Comptroller's Office when a defendant is sentenced to St. Louis City's Medium Security Institution (MSI). However, the court never receives any reimbursement from the city.

Costs reimbursed by the state or billed to the city include clerk fees allowed by Section 483.530, RSMo Cumulative Supp. 1999, and court reporter fees allowed by Section 485.120, RSMo 1994. Clerk fees should be disbursed in accordance with Section 488.023, RSMo Cumulative Supp. 1999, which states that clerk fees shall be paid over by the responsible clerk not less frequently than monthly, with 80 percent of the fees paid to the director of the Missouri Department of Revenue (DOR), and 20 percent of the fees paid into the city treasury. Section 485.120, RSMo 1994, states court reporter fees should be paid back to the DOR. The Circuit Clerk's Office could not determine the amount of such fees billed directly to the city and never paid.

Since the city is retaining all criminal cost bill reimbursements from the state and is also not reimbursing the court for criminal costs billed for defendants sentenced to MSI, this results in a loss of revenue for the state.

Conditions 2. and 3. were also noted in our prior report.

- D. The Criminal Division does not collect Crime Victims' Compensation (CVC) judgments from defendants assigned to MSI. Section 595.045, RSMo Cumulative Supp. 1999, requires the court to enter a judgment against the defendant of \$68 for the conviction of a class A or B felony, \$46 for a class C or D felony, and \$10 for certain misdemeanors.

When a defendant is sentenced to a state prison, the state Department of Corrections collects the CVC judgment from the defendant and remits the monies to the Circuit Clerk. These monies are then remitted to the DOR. However, procedures have not been established to require MSI to collect and remit such judgments to the court.

Failure to establish procedures for the collection of CVC judgments from defendants assigned to MSI results in a loss of revenue to the state, noncompliance with the judge's orders, and an inequity to those defendants who do make payments.

This condition was also noted in our prior report.

- E. Judges sometimes allow defendants to make partial payments of fines and court costs. If the court receives a significant payment of fines and court costs, the amount paid is disbursed that same month. However, when making these disbursements, there are no set procedures as to which costs will be paid first and the amount paid is not prorated among the various costs. In addition, the court reviews felony case files with accrued costs once a year to determine uncollectibility and at that time, any monies still being held on that case are disbursed. Again, when making those disbursements, monies held are not prorated among the various costs. The court does not periodically review misdemeanor case files with accrued costs to determine uncollectibility.

For any partial payments received, the court should prorate the amount paid among the various costs. If it appears unlikely the remaining amounts owed will be collected, a court order should be obtained to allow the balance of monies held in the case to be prorated among the various costs. Old inactive case balances increase the volume of cases which must be monitored and controlled, putting a greater burden on personnel resources. In addition, failure to prorate available monies when it is unlikely the balance will be collected, deprives the state and city of the use of those monies.

This condition was also noted in our prior report.

**WE RECOMMEND** the Circuit Clerk:

- A. Maintain a complete listing of accrued costs and restitution and establish procedures to routinely follow-up and pursue timely collection.

- B. Ensure all fees and fines collected are remitted monthly in accordance with state law. In addition, verify and disburse all monies collected in prior periods due to the state, city, and Board of Education.
- C.1. Submit criminal cost billings to the state on a timely basis.
- 2. Provide St. Louis City with the information necessary to allow the Treasurer and Comptroller to allocate and disburse criminal cost reimbursements received from the state. In addition, the Circuit Clerk's Office should identify similar fees from prior years and ensure those additional amounts are properly disbursed. Ensure remittances from the State of Missouri for reimbursement of court costs are turned over to the city treasurer upon receipt.
- 3. Develop a system to monitor criminal costs billed to the city, including all past billings, and work with the city to ensure those criminal costs are disbursed to the appropriate parties, including the state.
- D. Establish procedures to ensure the collection of CVC judgments due from defendants sentenced to MSI and disburse these funds as required by state law.
- E. Prorate any partial payments received among the various costs. In addition, identify those cases which contain uncollectible additional court costs and obtain a court order to close those cases.

### **AUDITEE'S RESPONSE**

- A. *We agree. The computerized cashiering system has the ability to track accrued costs and restitution. We will establish procedures and guidelines for monitoring the accrued costs. With additional software development, the current system can act as an automated probation officer for financial compliance with a defendant's term of probation. The system can be designed to generate a notice to a defendant on probation that the defendant owes money, and if a payment is not receipted notify and place the defendant on a docket for a court appearance in advance of the expiration of that defendant's term of probation. The judges have been advised of this potential automation capability and we await their direction as to whether this is a function they would like to have available.*

*Our goal is to have this change fully implemented within one year from the date the judges indicate they would want to use this tool.*

- B. *We agree. Improvements have been made relative to monthly disbursements of fines and fees collected. As part of the reorganization of the Finance Department, a new department has been created, the Disbursement Department. The Disbursement Department is to disburse all monies received by the Circuit Clerk's Office on a timely basis. As in most*

*changes, we anticipate modifications to procedures which will become apparent as the office evaluates the department's experiences. Naturally, it will take time for the newly created department to develop cohesiveness and experience. Given these factors, our goal is to be current with payments within nine months.*

*C.1. We agree. The office intends to use automation as the lasting solution to the issues raised by the State Auditor. We are currently exploring ways to automate the compilation of costs once a case has been disposed. This process is made more difficult in criminal finance, because of the differences between the two computer systems used in the criminal courts; the REJIS case management system and the Karpel criminal finance system. As such, we anticipate implementing this plan within one year. In the interim, the office will redouble its efforts to timely compile these costs. Until the process is handled through automation, the Criminal Cashiers' office will calculate the costs and submit the proposed bills to the Assistant Finance Manager for review. Following the Assistant Manager's review, the request for payment will be sent to the judiciary and the Circuit Attorney's office for their respective approval, and thereafter submitted to the state for payment. At the time of this response, the office is current with its billing to the state.*

*C.2. We agree that checks received from the state that are payable to the city should be transmitted to the city on a timely basis. However, to eliminate the possibility of a delay in transmitting these checks to the city we will pursue with the state the option of having the checks sent directly to the city.*

*Until the procedures are changed, the Director of Finance will receive and record all reimbursement checks from the state which are payable to the City of St. Louis. The check will then be given to the Assistant Finance Manager so that he can prepare the Receipt Coding Form (RCF). After the RCF is prepared, the Director of Finance will review and approve the RCF. An intra-office carrier will hand deliver the check and the RCF to the City Treasurer's Office for deposit. The Director of Finance will compare the date stamped RCF to our receipt records so that the office can ensure the timely delivery of checks to the City of St. Louis.*

*Our goal is to have this policy fully implemented within nine months.*

*C.3. The office will ensure that its statutory obligation in submitting the bills referenced is met.*

*D. We agree. We will establish procedures for collecting Crime Victim's Compensation judgements from defendants assigned to MSI.*

*Given the fact that the accomplishment of this goal will require cooperation with outside agencies, we cannot state when this goal will be met.*

- E. *We agree. The computerized cashiering system is planned to have the ability of disbursing partial payments on a monthly basis. We are currently working with the system's designer to make this function fully operational.*

*Our goal is to have this policy fully implemented within one year, assuming the office has the funding to complete the work and the personnel to operate the system.*

Also, see "General Response to Findings in Criminal Finance" beginning on page 62.

### **3. Child Support Department**

The Child Support Department was divided into two sections until September 1998:

Parent Locator: Cases where child support rights had been assigned to the state of Missouri or where the Missouri Division of Child Support Enforcement (DCSE) was providing support enforcement services (Title IV-D). Receipts handled by the Parent Locator Department totaled approximately \$5,713,000 and \$31,380,000 for the six months ended December 31, 1998, and for the year ended June 30, 1998, respectively.

Dissolution and Uniform Support: Cases where child support was ordered to be paid through the court and reciprocal child support cases with other states. Receipts handled by the Dissolution and Uniform Support Department totaled approximately \$567,000 and \$3,402,000 for the six months ended December 31, 1998, and for the year ended June 30, 1998, respectively.

The Missouri Automated Child Support System (MACSS) was installed in September 1998 to record and manage the receipt and distribution of all child support payments. Prior to this, the Regional Justice Information System (REJIS) was used as the Child Support Department's accounting system. Receipts handled after the conversion to MACSS totaled approximately \$10,739,000 through December 31, 1998.

- A. Child support payments are batched shortly after they are received. Each batch total must be recorded to MACSS, which assigns a batch control number. Clerks then record individual receipts within the batch to the computer. The sum of the individually recorded receipts must reconcile to the batch total for the receipts to be recognized in the cash balance in MACSS. Deposit reports are generated the next day and are to list all individual receipts composing the reconciled batches. The individual receipts that are related to unreconciled batches are stored in the computer and a "Cash on Hand" report must be requested from the computer to view these. Our review of receipting and depositing procedures noted the following concerns:

- 1) Child support monies were not always recorded to the cash control records on a timely basis and reconciled to batch totals. Receipts were frequently not recorded to the system for two or three days after the batch date. An estimated \$152,000 in receipts batched in December were not recorded to the system until January 1999, resulting in an understatement of the December 31, 1998, system cash balance. Approximately \$83,000 of this was batched on December 30 and December 31, 1998. These receipts were not deposited and related checks prepared until they were recorded in January.

In addition, approximately \$12,000 remained unreconciled for weeks or months after payments were recorded and checks were issued to recipients. One batch, dated October 6, 1998, was not reconciled until July 1999. These monies were deposited into the bank despite their status as unreconciled, but they were not included in the system cash balance. The MACSS monthly system receipt total is the sum of deposit reports generated, not the sum of receipts recorded to the system. If a batch of receipts is not included on a daily deposit report, even though it has been deposited, MACSS will not recognize this batch in the system cash balance.

Bank deposits are to be reconciled to the MACSS reported receipt totals when the monthly bank reconciliations are prepared. The department does not perform any reconciliation of monies received with the reported receipt total to identify and account for unrecorded or unreconciled receipts. The MACSS monthly receipt total should be compared with reports of recorded receipts and unreconciled batches to ensure the system provides a complete and accurate total of receipts.

- 2) We noted thirty-four of sixty-three deposits made in September and October 1998 were not timely. Lags between batch dates and deposit dates ranged from three to ten business days.

Also, daily deposit reports often did not include all batches entered for the applicable day. For example, the deposit report generated on September 15, 1998, did not include four batches received the previous day. These four batches were excluded from that day's deposit, and were recorded, reconciled, and deposited at a later date.

- 3) The Child Support Department does not always agree deposit report totals to monies on hand for deposit. We noted several instances in September and October 1998 where actual amounts deposited differed from amounts recorded on deposit slips and deposit reports. In one instance, the actual monies deposited exceeded the reported deposit total by \$47,254. The daily deposit reports generated excluded several batches receipted that day. These batches, however,

were included in the bank deposit, resulting in an additional credit appearing on the bank statement. Someone independent of receipt and recording duties should compare monies on hand for deposit with deposit report totals and validated deposit slips to ensure monies received by the department are properly deposited.

To ensure receipts are accounted for properly, all receipts should be recorded to cash control records on a timely basis and receipts per the cash control records should be reconciled to bank deposits. In addition, to adequately safeguard child support receipts and reduce the risk of loss, theft, or misuse of funds, receipts should be deposited intact daily or when accumulated receipts exceed \$100. The department should account for batch numbers when the deposit is prepared to ensure all receipts are properly recorded. Batches which have not been recorded to the system should be deposited and promptly recorded the next working day.

- B. Bank reconciliations have not been prepared on a timely basis since MACSS was implemented in September 1998. The December 1998 bank reconciliation was not completed until December 1999. Bank reconciliations should be prepared on a monthly basis to ensure all accounting records are in balance, transactions have been properly recorded, and any errors or discrepancies are detected on a timely basis.
- C.1. The duties of receiving, recording, depositing and disbursing monies are not always adequately segregated. The assigned job duties of the Child Support Department allow for adequate segregation of duties. However, due to the new computer program and increasing work loads, these controls sometimes broke down. The supervisor would enter receipts into the computer system and reconcile the deposits when the clerks were behind. In addition, adequate reconciliations of receipt information to deposits is not performed by the overall division supervisor.

A similar condition was also noted in our prior audit.

- 2. The MACSS system allows access to “back out” a receipt. A receipt can be backed out for several reasons, such as worker error or a bad check received. When the receipt is “backed out” after having been posted to the case payment history, a negative amount and the date of back out will appear on the case payment history. In addition, the amount is deducted from the system cash balance. When a receipt is “backed out” before having been posted to the case payment history, the amount is simply never added to the system cash balance. Three people in the Child Support Department have access to back out receipts; however, no supervisory review of back outs is conducted.
- 3. Updates made on the computer for payees are not properly reviewed. The same employees entering payments on the system can make changes to the payee's name or address on the computer. Disbursements are automatically made to the payee named on the computer. To ensure the updates made on the computer are proper, someone

independent of the receipting process and independent of entering updates on the computer should periodically review changes made to payees on the computer.

A similar condition was also noted in our prior audit.

4. Five individuals in the Child Support Department have access to issue "demand checks". Demand checks are issued for such things as checks voided from the inactive parent locator and dissolution accounts, or if a check does not print clearly. There is no supervisory review of demand checks issued, and supporting documentation for the checks is not retained in the case files.

To adequately safeguard assets, the cash custody and record-keeping functions should be segregated where possible. Good internal controls over assets require the segregation of duties when possible or, at a minimum, periodic reviews or reconciliations by an individual other than the one maintaining the records to limit the possibility of undetected errors and the loss or misuse of funds.

- D.1. The open-items balance generated by MACSS is not reconciled to the cash balance on a periodic basis. At December 31, 1998, the system cash balance exceeded the open-items balance by approximately \$281,000. This difference appears to have resulted from monies transferred from another account which do not appear in the open-items balance.
2. The Child Support Department relies on the MACSS system to correctly process payments and issue checks to child support recipients. After money is received, the system issues checks to recipients when the support payments are due, not immediately upon receipt of the payment. When child support is prepaid, monies are held in the court's bank account and disbursed when they become due. Payments are also held if a current address is not available for a recipient, proper case information was not included on the payment received, or if the case has not been established on the system by the DCSE. The increasing number of payments being held in the account resulted in the December 31, 1998 cash balance increasing by over 200% during the last six months of calendar year 1998. The department does not periodically review listings of held payments to ensure that monies held in the account are being distributed when due.
3. An open-items listing for the Parent Locator and Dissolution accounts was not prepared on a regular basis. The reconciled bank balances at December 31, 1998, were \$134,441 in the Parent Locator account and \$1,115 in the Dissolution account. In addition, at December 31, 1998, old outstanding checks totaling \$91,784 had remained in the Parent Locator bank account in excess of one year. Due to the conversion to MACSS, both accounts have been inactive since September 1998.

An open-items listing for all accounts should be prepared and reconciled to the cash balances to ensure accounting records are in balance and that sufficient funds are available for the payment of liabilities. Complete documentation of reconciliations should be prepared and retained to support

conclusions and any corrections made to facilitate independent reviews. In addition, outstanding checks and held payment listings should be periodically reviewed to determine if the payees can be readily located and if there is a need to reissue the checks. If any payees cannot be located or monies remain unidentified, Sections 447.500 through 447.585, RSMo Cumulative Supp. 1999 (which relates to unclaimed property), should be used to disburse these monies.

Similar conditions were also noted in our prior report.

- E. Adjustments totaling \$32,890 were made to the November 1998 bank reconciliation for checks that were issued with the same identification numbers and were cashed twice by the recipients. The court indicated duplicate checks were issued at various times throughout the period of September 1, 1998 to December 31, 1998. The court could not provide a list of check numbers, payees, amounts or case numbers of the items that cleared the bank twice. In addition, other adjustments were made on the November 1998 bank reconciliation for checks and deposits clearing the bank at amounts different than recorded on the books, as well as other miscellaneous bank credits and debits. These adjustments totaled approximately \$66,000. The court has not been scanning their bank statements and following up on these adjustments monthly. Without timely follow up actions, the court could possibly not be able to recoup any monies lost due to these errors.

All instances of duplicate checks clearing the bank should be identified and the monies recouped from the appropriate party. In addition, the court should scan the monthly bank reconciliations and investigate the miscellaneous debits and credits timely.

- F. The court depends on the MACSS computer system to provide complete and accurate financial data. The Child Support Department does not maintain manual records of control totals for voids, back out receipts, deposits, or checks printed to verify with the computer reports generated by the system. During our review, we also noted various reports such as the Receipts Posted report, Disbursements Register, Deposits Register, Cash On Hand report, Voided Check report, and Back Out Register were not printed on a monthly basis.

Due to the design of the MACSS computer system, it is vital that the court print these reports promptly on the first day of every month, before new receipts are entered. These reports were run at our request, but we were unable to completely reconcile the information since they were not printed the first of every month. Without the above reports printed on the correct day, and in the absence of manual control totals, we were unable to fully reconcile receipts to deposits for September and October 1998.

- G. The non IV-D record-keeping fee was not properly disbursed from October through December 1998. Checks were printed weekly for this fee in the Child Support Department, and were to be turned over to the city treasurer. The Child Support Department transmitted the checks to the city without providing the information necessary

for the city to allocate and disburse these monies to the appropriate fund. Since all necessary information was not provided to the city, these checks were returned to the court by the city.

Failure to adequately perform basic accounting procedures and reconciliations, and establish proper controls, severely lessens the Child Support Department's ability to adequately account for monies received and disbursed and hampers the office's ability to function efficiently. Timely action should be taken to correct these various deficiencies.

**WE RECOMMEND** the Circuit Clerk:

- A.1. Post all receipts to cash control records on a timely basis and reconcile the composition of receipts to bank deposits. In addition, reconcile monthly system receipt totals with totals of receipts posted and unreconciled batches.
2. Deposit receipts intact daily or when accumulated receipts exceed \$100, and establish procedures to account for all batch numbers assigned.
3. Require someone independent of cash receipting or recording functions to reconcile monies on hand for deposit with reported deposit totals and validated deposit slips.
- B. Prepare monthly bank reconciliations on a timely basis.
- C. Adequately segregate duties or ensure independent, documented reviews of the records are performed. In addition, ensure documentation supporting changes to the system is retained in the case files.
- D. Prepare listings of liabilities and reconcile to the cash balances on a monthly basis. Any differences should be investigated and explained on the reconciliations. The court should also review the listing of held checks on a periodic basis and ensure payments are being distributed when due, and attempt to notify those individuals with payments being held for non-current addresses. Procedures to routinely follow up and reissue any old outstanding checks should be adopted. If the payees cannot be located, the monies should be disposed of through the applicable statutory provisions.
- E. Identify instances of duplicate checks clearing the bank, and establish procedures to recoup any monies lost. In addition, procedures should be established to monitor checks and ensure duplicate checks are not issued. The court should also review the monthly bank statements in a timely manner, investigating differences between bank amounts and book amounts, and miscellaneous credits and debits, and ensure follow up actions are taken timely.
- F. Ensure all monthly reports are printed the first day of every month. In addition, manual records of control totals for voids, back out receipts, deposits and checks printed should

be maintained and reconciled monthly with the computer reports to ensure the accuracy of the information.

- G. Provide St. Louis City with the information necessary to allow the Treasurer and Comptroller to allocate the non IV-D record-keeping fee.

### **AUDITEE'S RESPONSE**

- A.1. *We agree. We will review the current process being employed by the staff. We will reduce to writing those procedures which we will continue to follow and we will make certain the procedures will result in the reconciliation of the daily cash control record to the bank deposit. Also, we will establish procedures for reconciling the monthly system totals to the totals of receipts posted and unreconciled batches.*

*Our goal is to have this policy fully implemented within six months.*

- A.2. *We agree. The Child Support Supervisor will be responsible for ensuring that deposits are made daily and intact. In addition, the Bookkeeping Department will document the timeliness of deposits when the bank reconciliation is prepared.*

*Our goal is to have this policy fully implemented within six months.*

- A.3. *We agree. The Bookkeeping Department will be responsible for ensuring the deposit report totals agree with the monies on hand and with the deposit slip.*

*Our goal is to have this policy fully implemented within six months.*

- B. *We agree. The current administration was advised that the child support system (MACSS) would not be able to operate with two separate bank accounts. Thus, the current administration was prevented from opening a new bank account in January 1999. A true reconciliation of the account for transactions in 1999 could not be completed until the account was reconciled for transactions done in 1998. Given the volume of checks issued monthly (nearly 18,000), we cannot reconcile the account without computer assistance. For a number of months the office was unable to use a computer for marking the checks, due to problems outside the control of this office.*

*The issues cited in the audit which result from not reconciling the account monthly are not unique to this office. The problem is shared by all large circuits throughout the state. The Office of the State Courts Administrator (OSCA) has been involved in assisting offices throughout the state in reconciling child support accounts.*

*In December 1999, because this process was taking too long, the Circuit Clerk authorized the office's Internal Auditor to begin reconciling the account. Since that date, the Internal*

*Auditor, working jointly with OSCA accountants, has reconciled the Child Support account through September 1999. The office is pursuing differences until they are resolved and will not simply “plug” differences to finish the process of reconciliation. This office is pursuing the appropriate party, when possible, for full reimbursements resulting from any errors discovered in the process. The office anticipates being current with reconciling the bank account for Child Support by the end of May 2000. The Internal Auditor is training the Bookkeeping Department personnel to reconcile the account until the time the office is no longer involved in the process of receipting and disbursing child support payments.*

- C. *We agree. We will review the current assigned duties of each employee in Child Support, to determine whether any further segregation of duties is necessary. If we cannot adequately segregate the duties, the Child Support Supervisor and the Director of Finance will perform a documented review of the Child Support records.*

*Our goal is to have this policy fully implemented within six months.*

- D. *We agree. We will establish procedures for reconciling the cash balance to the listing of liabilities. The Bookkeeping Department will be responsible for performing this duty. MACSS, by automation, withholds payments in excess of the amount of normal child support due during a particular time period. The recommendation reference to “held checks” assumedly refers to those funds which are held on account for that particular recipient in the MACSS system, as the office currently timely deposits all checks received. To the extent that these computer generated holds are due to a bad address, the office will develop procedures to use every reasonable effort to obtain a valid address for that payee. If the computer generated holds are caused for other reasons, the office will notify MACSS personnel to determine whether MACSS personnel will release the held funds, or whether the funds are being held due to a program error.*

*Our goal is to have this policy fully implemented within six months.*

- E. *We agree. We have now established procedures to monitor the issuing of checks from MACSS to ensure that duplicate checks are not released. The Circuit Clerk has no control of the MACSS system to initiate program changes to eliminate the possibility of producing either identical duplicated checks or checks with duplicate check numbers made payable to different payees. Nevertheless, we are working to identify any previously unknown duplicate checks, and we are exploring options for reimbursement for whatever funds that may have been improperly disbursed.*

*In February 1999 when identical duplicate checks were discovered, the office stopped payment on the second check. The office later paid on duplicate checks cashed by third parties (e.g. grocery stores), once the office knew that the recipient had other money due that recipient against which the office could offset.*

*The office has also discussed the issue of reimbursement with the Division of Child Support Enforcement to determine if there may be any claim of liability made against the MACSS software designer for unrecoverable losses. Furthermore, the office references its response to Recommendation B for issues raised regarding reconciliation of the child support account.*

- F. We agree. We will establish procedures and guidelines for reconciling manual control totals for voids, back out receipts, deposits and checks printed to the computerized reports. In addition, we will ensure all necessary monthly reports are printed on the first day of every month.*

*Our goal is to have this policy fully implemented within six months.*

- G. We agree. We are currently submitting the required information to the city.*

#### **4. Computer Operations and Controls**

- A. The Child Support Department started utilizing the Missouri Automated Child Support System (MACSS) in September 1998. We noted passwords which restrict employee access to MACSS computer files are not kept confidential. In addition, several of the department's employees have access to system features which are not necessary to perform their regular job duties. A unique password should be assigned to each user, and these passwords should be kept confidential to prevent unauthorized access to computer files. In addition, passwords should adequately restrict the capabilities of the respective user to only those duties the user has been authorized to perform.
- B. The Criminal Division Finance Department enters payment information on the REJIS computer system, which links the information with the case minutes that are also maintained on the REJIS computer system.

Access to certain programs and data files are not adequately restricted on the REJIS system. Although each employee of the Finance Department is assigned their own password that must be entered before they can access the system, one employee usually logs onto the computer in the morning and does not log off the computer until the end of the work day. Other employees can then make changes to computer information without having to log on themselves. The system indicates the initials of the person who makes each entry, based on the password of the person who logged onto the computer at the beginning of the day. Thus, if someone else makes an entry, the initials of the employee who originally accessed the system is shown.

Failure to require each employee to log on and make entries under their own unique password could allow unauthorized changes to be made in the programs and/or data files without being detected. To establish individual responsibility, as well as help preserve the

integrity of computer programs and data files, access to this information through the individual passwords should be enforced and should be limited to those individuals who need it.

- C. Change reports, which reflect changes to financial records and court minutes, are not generated. Inadequate segregation of duties over computer access, along with the weaknesses identified above with passwords, allows changes to be made to the computer systems without supervisory review. The capability to make changes to the financial records and court minutes without a periodic supervisory review of those changes increases the possibility that unauthorized changes could be made to programs and/or data files without the changes being detected.

To preserve the integrity of computer programs and data files, all changes should be identified by user and change reports should be reviewed by a supervisor.

**WE RECOMMEND** the Circuit Clerk:

- A&B. Ensure unique passwords are assigned to each employee, passwords remain confidential, and the passwords are used to restrict access to specific computer programs and data files to authorized individuals.
- C. Consider generating periodic change reports. In addition, the Circuit Clerk should ensure that the change reports are received by the proper personnel and all changes are promptly reviewed and any unusual items are investigated.

### **AUDITEE'S RESPONSE**

*We agree.*

*Our goal is to have these policies fully implemented within nine months.*

## **5. Missing Records**

Various accounting records maintained by the Child Support Department, including deposit reports, check registers and canceled checks for September 1998 to December 1998, were missing. In addition, various accounting records prepared by the Criminal Division, including the June 30, 1998, open-items lists, deposit slips, deposit records, canceled checks and case files were missing.

Retention of accounting records is essential to establishing accountability for the Circuit Clerk's financial activity and in demonstrating compliance with state law. Effective control of records requires all documents and records be safeguarded against loss due to fire, theft, or misplacement,

be accessible to the appropriate court employees and outside officials, and upon reasonable request, be accessible to the public.

**WE RECOMMEND** the Circuit Clerk ensure all records of the Circuit Court are properly retained and available for review.

### **AUDITEE'S RESPONSE**

*We agree. In the past, the office had numerous personnel in various locations acting in bookkeeping functions. Supervision of the accuracy and timeliness of bookkeeping was nearly impossible to monitor. Active and inactive financial records were spread out at the various locations in the courthouses.*

*An additional bonus of creating the Bookkeeping Department is one central location for all financial records. The office is in the process of collecting all current financial records for placement in this area. Bookkeeping is filing for future use current financial records that are being created and/or received. The office's priority is to ensure that the financial records from 1999 forward are complete and available.*

*Our goal is to have this policy fully implemented in twelve months.*

*The task of assembling past financial records will be cumbersome. There are rooms full of records in storage throughout the three courthouses and off site at the Globe Building. A review of these files is necessary to determine what if anything needs to be retained.*

*Our goal is to have this policy fully implemented within eighteen months.*

**6.**

### **Civil Division**

All circuit and associate level civil cases are initially filed in the Civil Cashier's Office. Except for garnishment cases which are handled by a separate office, the Cashier's Office is responsible for collecting all monies on civil cases and maintaining the related financial records. The Finance Department is responsible for reconciling the bank accounts, maintaining the open items lists and general oversight of the Cashier's Office. Receipts handled by the Cashier's Office totaled approximately \$2,930,000 and \$7,765,000 for the six months ended December 31, 1998, and the year ended June 30, 1998, respectively. The Circuit Clerk maintains several bank accounts for these monies:

**Refund Account:** All money received by the Cashier's Office for cases filed before January 1, 1998, was deposited and is disbursed through this account. The amount remaining in the Refund Account represents court fee deposits and monies placed in the registry of the court that have not been specified to go into a separate account.

Refund Account II: All money received by the Cashier's Office for cases filed after January 1, 1998, was deposited and disbursed through this account. The amount remaining in the Refund Account II represents court fee deposits and monies placed in the registry of the court that have not been specified to go into a separate account. This account was opened in March 1998, and all monies collected for 1998 cases prior to March 1998, were transferred from the Refund Account to this account. This account was then closed into the Refund Account in April 1999, and the Refund Account III was opened in January 1999 for cases filed after January 1, 1999.

Certificates of Deposit and Treasury Bills: The court invests some excess civil monies from the various refund accounts in Certificates of Deposit and U.S. Treasury Bills to obtain a higher rate of interest.

Restricted Accounts: These represent accounts established for monies placed in the registry of the court that have been specified to earn interest for the parties involved in the civil case.

A. A monthly open-items (liabilities) listing, indicating those cases on which there is an open balance of fees collected, was not consistently prepared. The Finance Department printed an open-items listing as of March 31, 1999, for the Refund Account and Refund Account II. The open-items listing included approximately 125,000 cases and totaled over \$10,250,000, while monies on hand at March 31, 1999, was approximately \$9,950,000. During further review of this open-items listing, we noted the following concerns:

- 1) When a case is filed, an initial deposit is paid to the court, and most of this deposit is held by the court pending disposition of the case. However, the court disburses certain court costs, including the Court Automation, Family Court, Law Library and Courthouse Restoration fees the same month the case is filed. The balance shown on the open-items listing for many cases includes these fees, even though they have already been disbursed. In addition, during our review of twenty-five cases on the open-items listing, we noted four cases where the balance shown on the open-items listing was incorrect because various modifications had been made to the balance. The open-items listing also included many cases filed by the City Collector, even though these court costs are manually taxed and disbursed monthly.

Including those court costs that have already been disbursed but not deducted from the open-items balance overstates the total open items.

- 2) Occasionally a judge will order additional money to be deposited with the court on civil cases, including cash bonds, registry deposits and guardian ad litem costs. The court holds these monies in the Refund Accounts until the judge issues a payout order. However, the court's open-items listing does not include these monies.

- 3) The open-items listings are not reconciled to the Circuit Clerk's applicable cash and investment balances on a periodic basis. Periodic listings of open items should be reconciled to monies held in trust by the court to ensure proper accountability over open cases and ensure monies held in trust by the court are sufficient to meet liabilities.

A periodic listing of open-items, along with appropriate reconciliations to bank and book balances, is an essential tool in ensuring that all records are in balance and that sufficient assets exist to cover the liabilities. To help prevent possible misappropriations of funds and to ensure that liabilities are ultimately distributed to the proper parties, an accurate and updated listing of all liabilities should be maintained and reconciled to the cash balance.

Similar conditions were also noted in our prior report.

- B. The Circuit Court uses a computer system to track the financial aspects, docketing, and minutes of all civil cases filed. The computer system has various fields to indicate the plaintiff's name, date and amount paid, date the monies are applied to court costs, user ID, each court cost taxed to the case, balance, and payee, date, amount and check number on the refund check. The manual case files also include the date paid, the amount of the plaintiff's initial deposit, and the costs taxed to the case. We noted the following problems when comparing the information in the manual case files to the computer financial information:

- \* For some cases reviewed, the computer indicated law library, courthouse restoration and court automation fees had been disbursed twice or indicated that these fees had not been disbursed, when it is the court's policy to disburse these monies monthly. The manual case files indicated that these fees had been charged to the case, but they rarely indicated whether the amounts had been disbursed.
- \* Some cases had negative balances on the computer when the court was actually holding monies for these cases. This was due to the way the court presents additional costs paid out-of-pocket by the plaintiff.
- \* The computer indicated monies were still being held for many cases filed by the City Collector, although it is the court's procedure to disburse these monies the same month they are collected. The manual case files indicated that the proper fees had been charged to the case, but did not indicate whether the amounts had been disbursed.
- \* Modifications for cashier errors can be made to the computer system to reflect monies collected or additional costs taxed to the case. Special coding is used to indicate these modifications; however, documentation was not always retained in

the manual case file or on the computer to indicate the reasons for the modifications.

- \* Bills were not always sent to all the responsible parties who owed court costs. We found a few instances where two defendants were to split the court cost fifty/fifty, but only one defendant was billed for 100% of the costs. In addition, on at least one case, a bill was sent to the petitioner when the judge had waived the court costs.
- \* A few instances were noted where the balance on the computer did not agree to the case balance on the open-items listing. Based on the information in the manual case file, the open-items listing appeared correct.

The court does not have a complete history of the financial transactions for each case. The computer contains some of the information and the manual case files contain other information. A supervisory review is not conducted to ensure that the computer information and manual case file agree. A final transaction summary is not printed to document that all monies have been collected and disbursed. In addition, the civil case files do not include the transaction numbers or dates of payments made on fines and court costs and dates of disbursements. While the case minutes are printed and included in the front of the manual case file, these minutes do not include any additional entries that are made by the Taxing Department.

To ensure accurate financial records are maintained, the computer information should be agreed to the manual case files and a final transaction summary should be printed to document that all monies have been properly handled. In addition, the amounts collected, transaction numbers, dates of payment, amounts disbursed, and check numbers and dates of disbursement should be recorded in the manual case file. All minutes should be included in the manual case file to indicate the current status of the case.

- C. Payments received by the Cashier's Office are entered into a computerized receipting system. There are four cashiers who enter payments into the computer. Cashiers have separate drawers and separate cashier numbers and passwords they enter to use their drawer. At day's end, cashiers balance their drawer with a computer report of transactions entered that day. Our review noted the following concerns:

- 1) The cashier drawers can be locked, unlocked, and opened with a key. This allows the cashiers access to their drawers without ringing in a transaction. To restrict access to the cash drawers, the cashiers should only be allowed to open their cash drawers when a transaction has been rung into the computer and money is collected.

- 2) The cashiers can enter information for a receipt into the computer system, and then exit the system without actually "posting" the information. The computer stores the information and assigns a transaction number to it. A printout of the "non-posted" transactions is not periodically run. A printout should be periodically run and scanned by a supervisor to ensure the non-posted entries appear proper and to account for the numerical sequence of transaction numbers.
- 3) The amount of payment is entered into the computer along with the case number for each receipt. However, the name of the person making the payment is not always entered into the computer. To enable receipt entries to be more easily reconciled to checks and money orders received, the name of the person making the payment should be entered on the computer.

A similar condition was also noted in our prior report.

- 4) The cashiers open the mail receipts, record the receipts on a mail log and enter the transactions into the computerized financial system. The mail log is not reconciled to the receipts entered for the day. Furthermore, the duties of receiving and recording mail receipts were not adequately segregated.

To safeguard against possible loss or misuse of funds, internal controls should provide reasonable assurance that all transactions are accounted for properly and assets are adequately safeguarded. Internal controls would be improved by segregating the duties of opening the mail and keeping the mail log from recording the mail receipts on the computer. If proper segregation of duties cannot be achieved, at a minimum there should be a supervisory review of the work performed on mail receipts, and the mail log should be independently reconciled to the list of computer receipts daily.

- D. Several types of court fees have not been distributed to the appropriate funds on a timely basis. As of December 31, 1998, the court had not disbursed notary fees, copy monies, and dissolution fees since December 1995. Fees for transcripts, liens, computer reports, and marriage waivers were also not disbursed during the audit period, and the court did not have documentation of when these fees were last disbursed. The following is a list of the type and amount of fees that were received but not disbursed, during the time period of May 1996 to December 31, 1998:

| <u>Type of Fee</u>       | <u>Amount</u>     |
|--------------------------|-------------------|
| Copy Monies              | \$ 167,284        |
| Dissolution Fees         | 24,458            |
| Transcripts              | 9,450             |
| Computer Reports         | 29,186            |
| Marriage Waivers         | 10,679            |
| Notary Fees              | 21,607            |
| Liens                    | 993               |
| Total Undistributed Fees | \$ <u>263,657</u> |

Sections 488.023 and 483.550, RSMo Cumulative Supp. 1999, provide for the distribution of court fees to the city, state and other funds, and require fees to be distributed monthly.

A similar condition was also noted in our prior report.

- E. At December 30, 1998, old outstanding checks totaling approximately \$17,000 have remained in the Cashier's Refund Account in excess of one year. Some checks dated as far back as December 1995. The Cashier's Refund Account also had \$557 in reconciling items that were incorrectly deducted from the bank account, which date back to July 1994. These reconciling items were caused by checks that cleared the bank twice or cleared the bank for more than the amount written. The court should ensure that all reconciling items are investigated and resolved in a timely manner.

Outstanding checks should be periodically reviewed to determine if the payees can be readily located and if there is a need to reissue the checks. If the payees cannot be located, the amounts should be disposed of in accordance with Sections 447.500 through 447.595, RSMo Cumulative Supp. 1999, as applicable. The bank statements should be reviewed closely and any mistakes should be examined and disposed of in a timely manner.

A similar condition was noted in our prior report.

- F. The Cashier's Office uses a standard correction form prepared by the cashiers to initiate changes to data in the accounting system.
- 1) The correction forms are not prenumbered. Without a proper accounting for the numerical sequence of changes requested, the cashiers cannot be assured that all documents completed were properly submitted for processing.

- 2) When correcting items on the computer system, documentation was not maintained in the case file nor on the computer system to document the reason for the change. Supporting documentation for all changes should be maintained and reviewed periodically by someone independent to ensure that only authorized individuals are making the changes to data and to ensure the changes appear proper.
- G.1. The Finance Department could not locate sixteen selected checks, nine of which had been indicated as void on the court's records. The failure to retain voided checks increases the risk that misuse of funds will not be detected.
2. The department has several checks a month that are returned by the Post Office as undeliverable. These checks are immediately voided and defaced; however, the court does not void the checks on the computer system in a timely manner. We noted time delays of up to three months between the date the check was returned and voided, and the date the check was voided on the computer system. Checks should be voided on the computer system immediately to ensure accurate accounting records.
- H. There is no supervisory review of the disbursements prepared by the Assistant Finance Manager. One person prepares the check requests to the city and the state and no one else independently reviews the requests to ensure the payees and the amounts appear proper. To reduce the risk of misuse of funds, there should be an independent review of disbursements.

**WE RECOMMEND** the Circuit Clerk:

- A. Periodically prepare an open-items listing and ensure all balances listed are actually open items and that the listing does not include fees that have already been disbursed. The court should also maintain a record of monies held for cash bonds, registry deposits and guardian ad litem costs. The open-items listings should be periodically reconciled to the balance of applicable civil monies held.
- B. Record in the manual case file the date, amount, and transaction number for monies collected, and the date, amount, and check number of disbursements. In addition, a final financial summary from the computer should be included in the manual case file and should be reconciled to information in the case file. All minute entries should also be included in the case file to properly reflect the current status of the case.
- C.1. Allow access to the cash drawers only when a transaction is rung into the computer and money is collected.
2. Periodically run a printout of non-posted cashiers' transactions and ensure someone independent accounts for the numerical sequence of transaction numbers.

3. Require the cashiers to enter the name of the person making the payment for each receipt entry on the computer.
  4. Segregate the duties of receiving and recording the mail receipts. In addition, the mail log should be reconciled to the receipt records daily.
- D. Disburse all court fees monthly to the city and state as required by state law.
- E. Reissue old outstanding checks to any payees who can be located. If the payees cannot be located, the monies should be disposed of through the applicable statutory provisions. The Circuit Clerk should consult with the State Treasurer's Office regarding the proper disposition of unclaimed funds. In addition, procedures to routinely follow up and reissue any old outstanding checks should be adopted. In addition, the Finance Department should review the bank statements monthly and investigate and resolve any reconciling items in a timely manner.
- F.1. Issued prenumbered correction forms and account for the numerical sequence.
2. Maintain supporting documentation for all changes to the computer system and ensure periodic independent review of these changes.
- G.1. Issue stop payment orders, attempt to locate, and void these missing checks. All voided checks should be properly defaced and retained.
2. Ensure returned checks are voided on the computer system in a timely manner.
- H. Perform an independent review to ensure the disbursements appear proper.

### **AUDITEE'S RESPONSE**

- A. *We agree. The problem cited with the open-items list has been cited in previous audits. As such, the new administration in January 1999 established a second open-items list for cases filed after January 1, 1999, hereafter referred to as Company II. The office continues to maintain an open-items list for cases filed prior to January 1, 1999, hereinafter referred to as Company I.*

*An additional accountant has been hired to review the civil open-items lists and to identify the validity of each liability represented on the list. Due to the size of Company I's open-items list, which is approximately \$10,200,000, it will take many months to identify the problems with this open-items list. Once we have identified the problems, we can develop a more realistic plan and time frame for correcting the open items, to the extent that it is possible to correct the records. The Bookkeeping Department will be responsible for*

*reconciling the open items for Company I and II to the balance of applicable civil monies held.*

*Our goal is to have this plan fully implemented within one year for Company II's open-items list. With respect to Company I's open-items list, it is not possible to state a time frame for attainment of this goal. We need to determine the extent of the problem to know how long it will take to make all possible corrections to the deficiencies found.*

- B. We agree. As noted in the response above, the additional accountant will identify the problems with the open items. Part of this project will be to review the computerized general ledger and manual case file and to make any necessary corrections. A proposal to place in each case file, at the time of final disposition, a computer generated financial statement of the case is currently being reviewed for its feasibility.*

*Our goal is to have this plan fully implemented within one year for Company II's open-items list. With respect to Company I's open-items list, it is not possible to state a time frame for attainment of this goal. We need to determine the extent of the problem to know how long it will take to make all possible corrections to the deficiencies found.*

- C.1. We agree. We will review this issue for possible automation or hardware solutions to restrict access to the cash drawers.*

*Our goal is to review this issue in six months for possible solutions.*

- C.2. We agree. We will work with the system's designers to design a computerized report of all cashier transactions, voiding those for which no money is actually receipted. The Supervisor of the Civil Cashier's Office will account for the numerical sequence of the computerized transaction numbers.*

*We will work with the system's designer to make the non-posted cashiers' transactions print out with the daily counter report.*

*Our goal is to have this policy fully implemented within one year.*

- C.3. We agree. We will request the system's designer to make the name field on the computer a required field.*

*Our goal is to have this policy fully implemented within nine months.*

- C.4. We agree. We have now segregated the duties of receiving and recording the mail receipts. We will reconcile the mail log to the receipts recorded daily.*

*Our goal is to have this policy fully implemented within six months.*

- D. *We agree. Improvements have been made relative to monthly disbursements of court fees to the city and state. As part of the overall reorganization of the Finance Department, the Disbursement Department was created to disburse all monies received by the Circuit Clerk's Office on a monthly basis.*

*Our goal is to have this policy fully implemented within one year.*

- E. *We agree. The Circuit Clerk has the fiduciary responsibility to take all reasonable steps to make certain that the records accurately reflect who is owed what amount. Once that determination has been made, as the fiduciary, the Circuit Clerk must take all reasonable steps to locate the payees so that the office can reissue the checks to the payees. Once the office is sure the record is accurate and all reasonable efforts to locate the proper payee have been made, and a payee still cannot be located, then the office will properly disburse the unclaimed monies as required by state law. In addition, we will establish procedures to routinely follow up and reissue any old outstanding checks. The Bookkeeping Department will be responsible for following up and reissuing any old outstanding checks.*

*Our goal is to have this policy fully implemented within one year for cases filed after January 1999. We are unable to state a date by which we will accomplish this goal with respect to cases filed prior to 1999.*

- F.1. *We agree. Pre-numbered forms will be used for corrections to the computerized general ledger.*

*Our goal is to have this policy fully implemented within six months.*

- F.2. *We agree. The Bookkeeping Department will be responsible for maintaining supporting documentation for all financial adjustments to the computer records. The Director of Finance will review all changes.*

*Our goal is to have this policy fully implemented within six months.*

- G.1. *We agree. The Bookkeeping Department will be responsible for ensuring the proper accounting for all voided checks.*

*Our goal is to have this policy fully implemented within six months.*

- G.2. *We agree. The Bookkeeping Department will be responsible for voiding returned checks on the computer system on a timely basis.*

*Our goal is to have this policy fully implemented within six months.*

- H. *Currently, the Assistant Finance Manager prepares the check requests to the city and the state. The Director of Finance reviews and approves the requests. After the Disbursement Department is fully operational, this department will be responsible for disbursing all civil fees to the city and the state.*

*Our goal is to have this policy fully implemented within six months.*

Also, see "General Response to Findings in Civil Finance and Garnishment" beginning on page 63.

## **7. Costs for Civil Cases**

Upon case closure, civil case files are sent through various departments in the Circuit Clerk's Office and then sent to the Taxing Department. The Taxing Department calculates which charges are due on the case. The taxing information is entered on the inside back cover of each case to summarize charges and disbursements of the case. Once the charges have been taxed, the case file is sent to the File Room.

If the filing fees are equal to or greater than the charges taxed and the plaintiff was ordered to pay court costs, the court costs are applied to the applicable funds for distribution and a refund check is issued, if necessary. For most cases, if the filing fee is less than the charges or the defendant was ordered to pay court costs, a billing is generated by the Taxing Department and sent to the applicable party. If and when the additional charges are received, all costs are then distributed. However, on Chapter 517 Landlord cases, even if the defendant was ordered to pay costs, as long as the filing fees are equal to or greater than the charges taxed, the plaintiff's filing fees are applied to the court costs for distribution and a refund check is issued, if necessary. Effective for **all** cases sent to the Taxing Department after July 28, 1998, the plaintiff's filing fees are to be applied to the charges taxed as long as the filing fees are equal to or greater than the charges, regardless of which party was ordered to pay court costs.

Our review of the above procedures noted the following concerns:

- A. According to a printout provided by the court's computer service, the court was holding over \$8.5 million at June 2, 1999, on cases that had already been finalized. These cases were finalized as far back as the late 1980's and either contain initial deposit balances insufficient to cover all costs charged on the case or the defendant was ordered to pay the court costs. In cases finalized before July 28, 1998, where the defendant was ordered to pay court costs, except Chapter 517 Landlord cases, the court does not refund the plaintiff's filing fee until the defendant pays the court costs in full.

As noted earlier, the court implemented procedures on July 28, 1998, to apply the plaintiff's deposit to court costs. However, the court was holding \$523,460 at June 30, 1999, on cases that were finalized between August 1, 1998 and May 30, 1999.

Section 514.060, RSMo 1994, states that "In all civil actions, or proceedings of any kind, the party prevailing shall recover his costs against the other party, except in those cases in which a different provision is made by law." In addition, Attorney General's Opinion No. 420, 1971 to Paden, concluded that "Even though the deposit was made by the plaintiff and the costs taxed against the defendant, the plaintiff must look to the defendant for recovery."

The court should consider either using the plaintiff's initial deposit when the costs are assessed against the defendant on all cases, or refund the plaintiff's initial deposit when the costs are assessed against the defendant.

A similar condition was also noted in our prior report.

B. Accrued court costs occur when costs assessed against a case exceed the amount deposited for the case, or the court costs were assessed against the defendant.

- 1) The Circuit Clerk does not adequately pursue the collection of accrued court costs. When such costs occur, the Circuit Clerk's office sends a statement to the appropriate party requesting payment. The court does not send second billings on cases unless the plaintiff calls and complains about not receiving a refund of the filing fee. No additional follow-up action is taken.

Inadequate procedures for the collection of accrued court costs may result in lost revenues. In addition, Section 546.870, RSMo 1994, requires the clerk to issue executions on amounts not collected at the end of each term.

- 2) Individual accrued court cost receivable balances are maintained by the Circuit Clerk on the computer financial system for each case; however, a receivables list was not maintained from July 1997 to December 1998, to summarize total amounts due to the court. A receivables list was not part of the regular computer reports, and special programming was needed to generate a receivables list.

A control account would assist the court in ensuring the accrued court cost records remain intact and in verifying the postings of collections and amounts due. A listing of accrued court cost receivable balances should be reconciled periodically to the control account. Furthermore, Section 483.550.5, RSMo Cumulative Supp. 1999, requires the Circuit Clerk to make periodic reports of delinquent court costs as may be required by the Office of State Courts Administrator.

To maximize revenues, the Circuit Clerk should maintain a listing of accrued costs and periodically follow up on accrued costs. An accrued cost listing would allow the Circuit

Clerk to more easily review the amounts owed to the court and take appropriate steps to follow up on initial billings to ensure all amounts owed are collected on a timely basis.

- C. Many of the funds held on deposit in the civil account are for old cases which contain deposits insufficient to cover all court costs charged in the case. If it appears unlikely the remaining amounts owed will be collected, a court order should be obtained to allow the balance in the case to be prorated among the various costs. Attorney General's Opinion No. 26, 1973 to Osborne, concluded that "If, when liability has been established, accrued costs cannot be collected in full, charges not having any statutory priority or not allocated under court rule should be prorated."

Old, inactive case balances increase the volume of cases which must be monitored and controlled, putting a greater burden on personnel resources. In addition, failure to prorate available monies when it is unlikely the balance will be collected, deprives the state and city of the use of those monies.

**WE RECOMMEND** the Circuit Clerk:

- A. Consider either using the plaintiff's initial deposit to pay out court cost assessed against the defendant on all cases or refund the plaintiff's initial deposit when the costs are assessed against the defendant.
- B. Maintain a listing of, and periodically follow up on accrued costs. In addition, the court should send out second billings on costs that remain unpaid after a certain period of time.
- C. Identify those cases which contain uncollectible additional court costs and obtain a court order to close those cases by paying out monies in accordance with legal provisions or opinions.

**AUDITEE'S RESPONSE**

- A. *We will use the plaintiff's initial deposit to cover all costs assessed on the case. In addition, we will perform analysis to determine whether the initial deposit is sufficient to cover the cost of activity of civil cases. If the cost is determined to be insufficient, we will request the court en banc to increase the filing deposit.*

*Our goal is to have this policy fully implemented within one year.*

- B. *We agree that a listing of accrued costs should be maintained and periodic follow up should be performed. We will work with the system's designers to design a computerized report of accrued costs.*

*We will send a second billing on costs that remain unpaid. If thereafter, payment in full has not been received, then the office will take all measures to meet its statutory obligation.*

*This goal will require a computer enhancement, and when and if the goal can be achieved is dependent upon the Clerk's office having the funds and staff available to initiate and operate the planned system changes. Our goal is to have this policy fully implemented within one year.*

- C. *We will establish procedures and guidelines for identifying cases where the deposit is insufficient to cover all court costs assessed on the case. We will request our legal counsel to review this matter to determine how uncollectible court costs should be handled.*

*Our goal is to have this policy fully implemented within one year.*

Also, see "General Response to Findings in Civil Finance and Garnishment" beginning on page 63.

## **8.**

### **Certified Copies Department**

The Certified Copies Department makes copies of civil case files when requests are received. Requests can be made in person, over the phone, or through the mail. A request form is filled out by either the customer or an employee in the Certified Copies Department. The Certified Copies Department indicates the cost of the copies on this request form. The Certified Copies Department does not maintain records of how much was received by them and forwarded to the Civil Cashier's Office and how much should have been entered by the Cashier's Office. However, copy receipts entered by the Cashier's Office averaged about \$52,000 each year, which includes monies for copies made by the Certified Copies Department and the Child Support Department.

The Certified Copies Department sometimes prepares the copies while the customer waits and sometimes the customer will have to return at a later date to pick up the copies, depending on the size of the job and the availability of employees in the Certified Copies Department. The Certified Copies Department only handles payments made by company check or money order. If the person is paying with cash, the Certified Copies Department gives the customer the request form and the customer takes the cash and the request form to the Cashier's Office to pay. During our review of the procedures for handling copy receipts, we noted the following concerns:

- A. The Certified Copies Department does not account for the numerical sequence of prenumbered request forms used as receipt slips. In addition, a reconciliation between request forms returned by the Cashier's Office and request forms on file with the Certified Copies Department is not performed.

To account for all copy monies received, someone independent of handling the copy receipts should account for the numerical sequence of the request forms and reconcile payments shown on the request forms to payments entered for copies in the Cashier's Office.

- B. The Certified Copies Department does not transmit company checks and money orders received in the mail to the Cashier's Office on a timely basis. The supervisor of the Certified Copies Department indicated checks and money orders are transmitted to the Cashier's Office approximately twice a week. To adequately safeguard receipts and reduce the risk of loss or misuse of funds, transmittals should be made intact daily or when accumulated receipts exceed \$100.
- C. When the court makes copies for other government agencies, there is no charge. However, the Certified Copies Department did not always indicate why a request for copies was not charged. Many of the requests that were not charged did not indicate the name of the government agency receiving the copies.

Without an explanation for why some copying jobs were not charged, the court cannot determine that all requests that were documented as "no charge" were valid.

- D. Checks and money orders received through the mail are not restrictively endorsed immediately upon receipt. Instead, the endorsement is applied when the money is turned over to the Civil Cashier's Office. In addition, a listing of mail receipts is not maintained to reconcile with monies transmitted to the Civil Cashiers Office.

To reduce the risk of loss or misuse of funds, all checks and money orders should be restrictively endorsed immediately upon receipt. A listing of mail receipts is necessary to ensure all money orders have been recorded and can be reconciled to monies transmitted.

Conditions similar to A., B., and C. were also noted in our prior report.

**WE RECOMMEND** the Circuit Clerk:

- A. Require someone independent of handling the copy receipts to periodically account for the numerical sequence of the request forms and reconcile payments shown on the request forms to payments entered for copies in the Cashier's Office.
- B. Transmit receipts intact daily or when accumulated receipts exceed \$100.
- C. Require appropriate information and the reasons for not charging for copies be documented on all request forms as applicable.

- D. Restrictively endorse checks and money orders immediately upon receipt and prepare a list of mail receipts when the mail is opened. In addition, someone independent should reconcile the mail listings to monies transmitted.

**AUDITEE'S RESPONSE**

- A. *We agree. The Bookkeeping Department will account for the numerical sequence of the request forms and reconcile payments shown on the request forms to the payments received in the Civil Cashier's Office.*

*We will also consider automating the Certified Copies Department to make it easier to account for the pre-numbered request forms to ensure that all monies are properly handled.*

*Our goal is to have this policy fully implemented within one year.*

- B. *We agree. The Certified Copies Department will transmit checks and money orders received to the Civil Cashier's Office on a daily basis.*

*We will also consider having the Civil Cashier's Office receive directly all mail receipts for copies to provide better accountability of monies received.*

*Our goal is to have this policy fully implemented within one year.*

- C. *We agree. We will require that the Certified Copies Department document the name of the individual or government agency receiving the copies and the reason for not charging for copies.*

*Our goal is to have this policy fully implemented within nine months.*

- D. *We agree. Until the procedure change affecting which department will receive mail receipts for copies, the Certified Copies Department will restrictively endorse all checks and money orders immediately upon receipt.*

*Our goal is to have this policy fully implemented within nine months.*

|                              |
|------------------------------|
| <b>9. Garnishment Office</b> |
|------------------------------|

The Garnishment Office is responsible for the collection and disbursement of garnishments. Receipts handled by the Garnishment Office totaled approximately \$2,206,000 and \$3,292,000 for the six months ended December 31, 1998, and the year ended June 30, 1998, respectively.

- A. Disbursements are not made immediately after the ten day holding period as established by "local order" Rule No. 82.3.1. Our review of receipts noted the average number of days between receipt and disbursement was almost thirteen days. The number of days between receipt and disbursement ranged between zero and thirty-one days. In addition, at April 30, 1999, the Garnishment Office was holding \$2,162 that had been held over two months.

The Garnishment Supervisor indicated the reason for the delays is due to the inability to find the case files. She indicated the judge requires the Garnishment Office to have the case file before monies are disbursed.

To ensure victims receive their restitution according to the court rules and to ensure timely processing of garnishment payments, garnishments should be disbursed immediately after the ten day holding period.

- B. Monthly open-items listings are prepared by the Garnishment Office; however, the listings are not reconciled to the bank account balance. The total identified open items at December 31, 1998, exceeded the balance in the bank account at that date by approximately \$73,300. The difference between the open-items listings and the balance in the bank account appears to fluctuate each month.

The monthly listing of open items should be reconciled to the bank balance to ensure proper accountability over garnishment monies.

- C. At December 31, 1998, old outstanding checks totaling \$5,828 had remained in the garnishment bank account in excess of one year.

Outstanding checks should be periodically reviewed to determine if the payees can be readily located and if there is a need to reissue the checks. If the payees cannot be found, Sections 447.550 through 447.585, RSMo Cumulative Supp. 1999, which relate to unclaimed property, should be followed to disburse these monies.

Similar conditions were also noted in our prior report.

**WE AGAIN RECOMMEND** the Circuit Clerk:

- A. Disburse monies immediately after the ten day holding period according to local orders. The court should consider reconstructing case files that cannot be found so disbursements can be made in a more timely manner.
- B. Investigate and resolve differences between the monthly open-items listings and the balances in the bank account. The open-items listings should be reconciled to the balance in the bank account on a monthly basis.

- C. Reissue old outstanding checks to any payees who can be located. If the payees cannot be located, the monies should be disposed of through the applicable statutory provisions. In addition, procedures to routinely follow up and reissue any old outstanding checks should be adopted.

### **AUDITEE'S RESPONSE**

- A. *We agree that monies should be disbursed immediately after the ten day holding period. We have now established procedures for reconstructing case files that cannot be found so that we can disburse garnishment monies in a more timely basis.*

*Also, see response to MAR No. 2.B. on the reorganization of the Finance Department. The Disbursement Department will be responsible for ensuring that garnishment monies are disbursed in accordance with the local rule.*

*Our goal is to have this policy fully implemented within three months.*

- B. *We agree. It is our intention to resolve the differences between the open-items list and the reconciled bank balance. The difference between the open-items list and the reconciled bank balance continues to fluctuate. We believe that there are computer program errors in the system and we will continue to work with the system's designers to identify and correct the problems with the computerized garnishment system.*

*Our goal is to have this policy fully implemented within eighteen months.*

- C. *We agree. The Circuit Clerk has the fiduciary responsibility to take all reasonable steps to make certain that the records accurately reflect who is owed what amount. Once that determination has been made, as the fiduciary, the Circuit Clerk must take all reasonable steps to locate the payees so that the office can reissue the checks to the payees. Once the office is sure the record is accurate and all reasonable efforts to locate the proper payee have been made, and a payee still cannot be located, then the office will properly disburse the unclaimed monies as required by state law. In addition, we will establish procedures to routinely follow up and reissue any old outstanding checks. The Bookkeeping Department will be responsible for following up and reissuing any old outstanding checks.*

*Our goal is to have this policy fully implemented within one year for cases filed after January 1999. We are unable to state a date by which we will accomplish this goal with respect to cases filed prior to 1999.*

Also, see "General Response to Findings in Civil Finance and Garnishment" beginning on page 63.

**10.**

### **Special Interest Account**

The Circuit Clerk maintains a special interest bank account to deposit interest earned from unrestricted court deposits and to make payments for purchases in accordance with Section 483.310.2, RSMo Cumulative Supp. 1999. During the period of July 1, 1997 to December 31, 1998, the court spent approximately \$168,000 from this account. Our review noted bids were not always solicited for major purchases nor was bid documentation always retained. We noted the following four items purchased for which documentation of bids was not available:

| <u>Item</u>   | <u>Amount</u> |
|---|---------------|
| Printing cash payment receipt book, envelopes, and Local Rules of the Court | \$9,787       |
| Printing Chapter 517 summons  | 7,647         |
| Consulting Services   | 30,438        |
| Paper Shredding   | 3,131         |

According to Circuit Clerk personnel, the printing jobs were not bid because they were considered emergency purchases. However, there was no documentation to explain why an emergency purchase was necessary in this situation.

Bidding procedures for major purchases provide a framework for economical management of court resources and help assure the court that it receives fair value by contracting with the lowest and best bidder. In addition, competitive bidding ensures all parties are given an equal opportunity to participate in public business. Documentation of bids should include at a minimum, a listing of vendors from whom bids were requested, a copy of the request for proposals, the newspaper publication notice when applicable, the bids received, the basis and justification of awarding the bid, and documentation of all discussions with vendors.

This condition was also noted in our prior report.

**WE AGAIN RECOMMEND** the Circuit Clerk solicit bids for all major purchases and retain appropriate documentation of these bids. In situations where bids cannot be taken, the reasons for not taking bids should be documented and retained.

### **AUDITEE'S RESPONSE**

*We agree that whenever possible competitive bidding should be used for all major purchases. We will establish a formal bidding and purchasing policy for purchases using special interest funds to address the concerns noted by the State Auditor.*

*Our goal is to have this policy fully implemented within six months.*

**11.**

### **Juvenile Office**

The Circuit Clerk's Juvenile Office receives payments for filing fees and court costs on cases concerning adoption and termination of parental rights. Receipts handled by the Juvenile Office totaled approximately \$52,000 and \$110,600 for the six months ended December 31, 1998, and the year ended June 30, 1998, respectively. Accounting duties are not adequately segregated. One court clerk prepares the court cost bills, receives monies, and records receipts. Further, there is no documented independent review of accrued cost files.

To safeguard against possible loss or misuse of funds, internal controls should provide reasonable assurance that all transactions are accounted for properly and assets are adequately safeguarded. At a minimum, there should be a documented review and comparison made by an independent person of the receipt slips issued to amounts transmitted to the Civil Cashier's Office for deposit and to payments recorded in the case files.

**WERECOMMEND** the Circuit Clerk adequately segregate the duties of billing, collecting and recording court cost payments. At a minimum, there should be a documented supervisory review of the various supporting records.

### **AUDITEE'S RESPONSE**

*We agree. We are in the process of automating the Juvenile Office with a computerized cashiering system similar to what is used for the Civil Cashier's Office. As part of automating the Juvenile Office, we will attempt to segregate the accounting duties as much as possible with a limited number of staff. If we cannot adequately segregate the accounting duties, the Receipting Supervisor and the Assistant Finance Manager will perform a documented review of the accounting records.*

*Our goal is to have this policy fully implemented within one year.*

### **AUDITEE'S GENERAL RESPONSES**

#### **General Response to Findings in Criminal Finance**

*It has been an overall goal of the current administration to improve the professionalism and accuracy of the Finance Department. To fully respond to the findings and recommendations of this audit, which Circuit Clerk Favazza requested, it is necessary to state a candid evaluation of the state of the office's financial controls as of December 31, 1998.*

*In addition to the numerous and serious issues that have historically plagued the Circuit Clerk's office, as is discussed below, there were concerns regarding the handling of money by non-*

*finance employees. In January 1999, the office discovered several courtroom clerks in the Municipal Court Building who were receipting cash payments in courtrooms without any controls. In one such incident, a courtroom clerk accepted a cash payment from a bondsman without issuing a receipt or counting the money, and then placing the money in her unsecured desk drawer.*

*There were many internal issues of poor controls within the Finance Department itself. The department was not automated in the area of criminal finance. All record keeping, such as it was, was done manually. As of December 1998, there was no listing of the financial liability the office owes to others, hereinafter referred to as open items. At best, the office maintained source documents from which such a list could be created. Among these source documents are the McBee sheets, the Bond Ledger, and individual payment sheets that are supposed to be kept in each criminal case file folder. Neither the McBee sheets or the Bond Ledger can be assumed to be accurate (the McBee sheets contain numerous changes, and the Bond Ledger total does not agree with the total for bonds in the General Ledger). Given the sheer number of criminal case files involved, estimated at tens of thousands, it is impracticable to manually review each case file and extract the file's payment sheet, assuming the information on the payment sheet is more accurate than the other source documents. As such, no accurate open-items list for funds collected prior to 1999 can be created. Absent an accurate open-items list for funds collected prior to 1999, there is no way to determine how much money the office should have. In short, the records prior to 1999 are not reliable, and there is no true point of reference from which an accurate accounting can begin.*

*Given these factors, the current administration decided to separate itself from previous administrations by starting new records for business conducted after December 31, 1998. In an effort to immediately effect change, the office began an open-items list starting on the first day of business in January 1999 on Microsoft Excel. Despite the efforts to accurately maintain this list, because its production was done in the same manner as records kept on paper, by hand, there is no reason to assume the open-items list is any more accurate than any other records maintained by the same personnel. Financial records are only as good as those who prepare and check their accuracy, therefore it was determined that without delay the office would begin an all out effort to automate the Criminal Finance office.*

*Efforts to automate the Criminal Finance office were well under way by the time the auditors discovered a theft in the Criminal Finance office, which occurred prior to the current administration. Shortly after the discovery of the theft, the receipting functions of the new criminal finance system went on line. Since May 1999, the office has been operating the new automated system in parallel with the manual system. The office will continue to operate both systems until we have confidence that the automated system is functioning properly.*

*Since May 1999, the Finance Department has undergone numerous personnel changes in upper level management. By the end of 1999, the Finance Department had a new Finance Director, who came to the office from the State Auditor's office, and a new Assistant Finance Manager,*

*who came to the office from the auditor section of the office of the Comptroller of the City of St. Louis. Several other management changes have been made. The result of these changes is a department that is professionally managed. The new team of managers has developed a plan to reorganize the Finance Department. Implementation of this plan awaits the reassignment of personnel whose work will be performed by the Family Support Payment Center.*

*Even with a more professional and better organized staff, the office needs to move forward in automating Criminal Finance (refining the receipting functions, and further developing disbursement functions). An accurate automation system is essential to insure the integrity of the Clerk's financial records. These ongoing automation changes will continue so long as the office has the personnel to operate them and funds available to pay for them.*

*There are several current issues which may jeopardize the progress of automation. First, there is a bill pending in the Missouri Legislature, sponsored by Senator John Schneider of Florissant, Missouri which will transfer from the Circuit Clerk to the Presiding Judge all data processing personnel. If the Circuit Clerk does not control the data processing personnel, then the Circuit Clerk cannot institute the planned changes in automation.*

*Second, the judges of this circuit, believing they have the authority, have attempted to reduce the Circuit Clerk's budget for Fiscal Year 2001. At issue in the budget are funds included to continue automation changes in the Finance Department, in civil, criminal and garnishment. The Circuit Clerk's version of the Circuit Clerk's budget has been submitted for the City's consideration. Should the approved budget not include funds for ongoing automation and changes to automation, then the Circuit Clerk will not be able to institute the plan of action to respond to the issues raised by the audit which would best be addressed through automation.*

### **General Response to Findings in Civil Finance and Garnishment**

*Although the financial records in Civil Finance have been automated for years, previous administrations did not rely on the automated records and to some extent tried to account for Civil Finance by manually created records. In December 1998, prior to the new administration taking office, the new administration held discussions regarding the state of the automated systems for Civil Finance. From those discussions, and with the help of an outside accounting firm, it was discovered that the automated systems were unable to balance. Computer program changes were ordered to take effect on January 1, 1999, which were meant to address the issues discovered.*

*Throughout the first six months of 1999, the office engaged and relied on the accounting services of the accounting firm, Lopata, Flegel and Associates (Lopata). On Lopata's advice, new bank accounts were established and separate records were created beginning January 1, 1999. Through Lopata's direct work with the Circuit Clerk, in conjunction with outside computer programmers, numerous ongoing computer programming changes were made which resulted in more accurate financial records. The office continues to evaluate the accuracy of*

*the open-items list as it relates to the civil general ledger, and anticipates that further changes to computer programming will be necessary to correct remaining inaccuracies in this area.*

*In addition, the office is exploring computer options to include financial transactions which occur at the juvenile court. These transactions and the interrelationship of special cases (the Leggett cases) and garnishment continue to create inaccuracies in the civil general ledger. Further investigation of computer programming and additional enhancements are planned to address these on going challenges.*

*Garnishment transactions continue to remain a problem because the amount of difference between the open-items list and cash on deposit continues to fluctuate. The system used for garnishment transactions is one of the oldest computer programs operated by the office. The office continues to discuss options regarding the best way to address this area of finance. As part of the groundwork for that discussion, the Circuit Clerk directed the office's Internal Auditor to review garnishment transactions during the past year.*

*One conclusion the Internal Auditor came to involves a rumored transfer of funds to civil investments. The Internal Auditor determined that there is no basis to conclude that any money was transferred from the garnishment account into civil "investments." The rumored transfer of \$40,000 to \$50,000 from garnishment does not appear to be true. Thus, the difference between the total of current open items and the cash on deposit, which ranges between \$60,000 to \$70,000, cannot be explained even in part by a phantom transfer of funds. The State Auditor's review of the records and process raised several questions which are being further reviewed by the Finance Department in conjunction with the computer programmers.*

*This report is intended for the information of the management of the Office of the Circuit Clerk, Twenty-Second Judicial Circuit, St. Louis City, Missouri, and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.*

## Follow-Up on Prior Recommendations

TWENTY-SECOND JUDICIAL CIRCUIT  
ST. LOUIS CITY, MISSOURI  
CIRCUIT CLERK FUND  
FOLLOW-UP ON PRIOR RECOMMENDATIONS

This section reports follow-up action taken by the Office of the Circuit Clerk, Twenty-Second Judicial Circuit, St. Louis City, Missouri, on applicable recommendations made in the Management Advisory Report (MAR) of our report for the entire circuit for the two years ended June 30, 1996; our special review of the Circuit Criminal Division - Finance Department; our special review of Circuit Civil Division - Cashier's Office - Chapter 517 Landlord Case Initial Deposits; and Kerber, Eck, and Braekel's (KEB) report of the Circuit Clerk Fund for the year ended June 30, 1997. The prior recommendations which have not been implemented, but are considered significant, have been repeated in the current MAR. Although the remaining unimplemented recommendations have not been repeated, the office should consider implementing these recommendations.

TWENTY-SECOND JUDICIAL CIRCUIT  
ST. LOUIS CITY, MISSOURI,  
TWO YEARS ENDED JUNE 30, 1996

Finding Nos. 1 and 13 from this report relate to the Probate Division and the Juvenile Division, respectively. These divisions were not within the scope of the current audit.

2. Circuit Clerk's Civil Division - Cashier's Office

- A. The balance of initial filing fee deposits shown on the open-items listing for each case included the Court Automation, Family Court, Law Library and Court Restoration fees, even though those fees had already been disbursed. In addition, one case was noted where the balance on the open-items listing included a refund that had already been made to the plaintiff. Also, the open-items listing did not include cash bonds, registry deposits, and guardian ad litem costs deposited.
- B.1. The cashiers only had to enter their cashier code number to enter payments into the computer and to open their cash drawer; no separate password was required.
  - 2. Access to the cashiers' cash drawer keys was not restricted.
  - 3. The name of the person making payment was not usually entered into the computer.
  - 4. Some receipt entries that were noted as voids on the reconciliations of the daily computerized receipt reports were not actually voided off the computer system. In addition, one receipt entry that was noted as a void on the reconciliation was not voided off the computer system on a timely basis.

- C. The Child Support Division of the Circuit Clerk's Office used the same series of prenumbered manual receipt slips used by the Cashier's Office. However, receipt slip series were not always assigned to the two departments in sequential order and the Purchasing Department did not maintain a log to document the series of receipt slips that were assigned to each office. In addition, the Cashier's Office did not account for the numerical sequence of the prenumbered manual receipt slips issued or ensure all were entered into the Cashier's computerized receipting system.
- D. No one at the court reconciled amounts recorded for various miscellaneous receipt categories with supporting records maintained by other divisions or agencies.
- E. The court did not always record restricted accounts' interest earned and service charges in the ledger maintained for restricted accounts.
- F. There were several months where the Cashier's Office was not disbursing fees and costs due to the city and state monthly. In addition, there were several types of court fees totaling approximately \$87,000 as of November 1996, that had not been distributed to the appropriate funds on a timely basis.
- G. At June 30, 1996, old outstanding checks totaling approximately \$19,000 had remained in the Cashier's Refund Account in excess of one year.

Recommendation:

The Circuit Clerk:

- A. Continue to follow up on correcting the open-items listing. The court should ensure all balances listed are actually open items and that the listing does not include fees that have already been disbursed. The court should maintain a record of monies held for cash bonds, registry deposits and guardian ad litem. Accurate open-items listings should be prepared periodically and reconciled to the balance of civil monies held.
- B.1. Restrict access to the cash drawers by requiring cashiers to enter their own password before payments can be entered on the computer and cash drawers opened.
  - 2. Ensure the cashiers lock their cash drawer and take their key whenever they are going to be away from the area.
  - 3. Request the cashiers to enter the name of the person making the payment for each receipt entry on the computer.

4. Ensure someone independent of the receipting process reviews all receipt entries that are noted as voids on the daily receipt report reconciliation to ensure they appear proper and have been voided on the court's computer system.
- C. Ensure someone independent of the receipting process accounts for the numerical sequence of all manual receipt slips issued and ensures all manual receipt slips are entered into the Cashier's computerized receipting system. In addition, the Purchasing Department should assign receipt slips in numerical sequence and maintain a log of receipt slips assigned to each office.
- D. Ensure someone independent of the receipting process periodically agrees records of payments sent to the Cashier's Office maintained by other departments to the Cashier's Office receipt records.
- E. Ensure all interest earned and service charges are recorded in the ledger maintained for the restricted accounts.
- F. Disburse all court fees monthly to the city and state as required by state law.
- G. Reissue old outstanding checks to any payees who can be located. If the payees cannot be located, the monies should be disposed of through the applicable statutory provisions. The Circuit Clerk should consult with the State Treasurer's Office regarding the proper disposition of unclaimed funds. In addition, procedures to routinely follow up and reissue any old outstanding checks should be adopted.

Status:

A., B.3.

& F. Not implemented. See MAR No. 6.

B.1., 2.,

4. & C. Implemented.

- D. Partially implemented. The Writs Department agrees their records of notary fees, marriage waivers and mechanic's liens, but the Certified Copies Department does not agree their records to the Cashiers Office. See MAR No. 8.
- E. Partially implemented. We noted only a few instances where the interest earned was not recorded. Although not repeated in the current MAR, our recommendation remains as stated above.

- G. Partially implemented. The court turned over \$67,174 in old outstanding checks to the city in January 1998 for checks dated July 1994 to December 1996, but at December 31, 1998, they had several checks that were over one year old. See MAR No. 6.

3. Costs for Civil Cases

- A. The court was holding over \$6 million, at October 31, 1996, on cases that had already been finalized. Except in certain types of cases, when costs were assessed against the defendant, the court did not refund the plaintiff's filing fee until the defendant paid the court costs in full. In addition, the court did not prorate available monies on which uncollectible additional court costs were due. The court did not send second billings on cases unless the plaintiff called and complained about not receiving a refund of the filing fee.
- B. The time between when the case was finalized and the application of costs and/or the sending of fee bills appeared excessive.

Recommendation:

The Circuit Clerk:

- A. Consider either using the plaintiff's initial deposit to apply out court costs assessed against the defendant on all cases or refund the plaintiff's initial deposit when the costs are assessed against the defendant. In addition, the court should send out second billings on costs that remain unpaid after a certain period of time. Also, the court should identify those cases which contain uncollectible additional court costs and obtain a court order to close those cases by paying out costs in accordance with the legal provisions or opinions.
- B. Ensure a billing is sent on a timely basis after the disposition of each case on which additional monies are owed, and ensure that court costs are distributed on a timely basis.

Status:

- A. Partially implemented. The court adopted a new policy on July 28, 1998, to apply the plaintiff's initial deposit to court costs no matter who was assessed costs, as long as the deposit was sufficient to cover the costs. However, this policy was not always followed. In addition, the court did not take action to pay out available monies on old closed cases which contain uncollectible additional court costs. See MAR No. 7.
- B. Implemented.

4. Circuit Clerk's Certified Copies Department

- A. Copy request forms used by the Certified Copies Department were not prenumbered. In addition, no one ensured all payments recorded on the request forms by the Certified Copies Department were entered into the computer in the Cashier's Office.
- B. The Certified Copies Department did not transmit company checks and money orders to the Cashier's Office on a timely basis.
- C. The cost for copies and the date paid was not always documented on the copy request form. In addition, the Certified Copies Department did not always indicate why a request for copies was not charged a fee or include the name of the government agency receiving the free copies.

Recommendation:

The Circuit Clerk:

- A. Issue prenumbered request forms for copies and require someone independent of handling the copy receipts to periodically account for the numerical sequence of the request forms and reconcile payments shown on the request forms to payments entered for copies in the Cashier's Office.
- B. Transmit receipts intact daily or when accumulated receipts exceed \$100.
- C. Always document the charge and the date paid for copies on the request form. In addition, appropriate information and the reasons for not charging for copies should be documented on all request forms as applicable.

Status:

- A. Partially implemented. The Certified Copies Department issues prenumbered request forms for copies, but no one independent of the handling of the receipts accounts for the numerical sequence. Payments shown on request forms are not reconciled to payments received by the Cashier's Office. See MAR No. 8.
- B. Not implemented. While the Certified Copies Department no longer collects money on walk-ins, they do receive checks and money orders from mail-ins. These checks and money orders are not endorsed immediately and at times are held by the department for an extended period of time. See MAR No. 8.
- C. Partially implemented. Charges and paid date are documented on the white copies of the request forms. However, appropriate information or reasons for not charging for copies is still not always being documented. See MAR No. 8.

5. Circuit Clerk's Garnishment Office

- A. Disbursements were not made immediately after the ten day holding period established by “Local Order” Rule No. 82.B.1. In addition, at September 30, 1996, the Garnishment Office was holding \$8,096 that had been held over two months.
- B. The monthly open-items listings prepared by the Garnishment Office were not reconciled to the bank account balance. The total identified open items at June 30, 1996, exceeded the balance in the bank account at that date by approximately \$63,000.
- C. At June 30, 1996, old outstanding checks totaling \$3,826 had remained in the garnishment bank account in excess of one year.

Recommendation:

The Circuit Clerk:

- A. Disburse monies immediately after the ten day holding period according to local orders. The court should consider reconstructing case files that cannot be found so disbursements can be made in a more timely manner.
- B. Investigate and resolve differences between the monthly open-items listings and the balances in the bank account. The open-items listings should be reconciled to the balance in the bank account on a monthly basis.
- C. Reissue old outstanding checks to any payees who can be located. If the payees cannot be located, the monies should be disposed of through the applicable statutory provisions. In addition, procedures to routinely follow up and reissue any old outstanding checks should be adopted.

Status:

- A., B.  
& C. Not implemented. See MAR No. 9.

6. Circuit Clerk’s Child Support Department

- A. The duties of receiving, recording, and depositing Parent Locator monies were not adequately segregated.
- B. Updates made on the computer for payees was not properly reviewed by someone independent.
- C. The duties of processing some disbursements was not adequately segregated.

- D. The Child Support Department occasionally received checks and money orders that had been returned undeliverable by the Post Office. The checks were not locked in the vault, but were left on employees' desks so anyone walking by had access to these checks. No record was maintained to indicate the amount of monies that were on the desks.
- E. At June 30, 1996, old outstanding checks totaling \$96,568 had remained in the Parent Locator bank account in excess of one year. Old outstanding checks totaling \$992 had remained in the Dissolution bank account in excess of one year.

Recommendation:

The Circuit Clerk:

- A. Properly segregate duties in the Parent Locator Department among available employees and/or establish a documented periodic review of receipt records and deposits by an independent person.
- B. Ensure someone independent of the receipting process and independent of entering updates on the computer periodically reviews changes made to payees on the computer to ensure they are proper.
- C. Segregate the duties of entering payments on the computer, distributing checks, and entering information in the check register for the 999-9999 and 777-7777 checks.
- D. Ensure checks returned by the Post Office are locked in the vault. In addition, a log should be maintained of checks in the vault and the disposition of each check should be documented on the log. Someone independent of this process should review the disposition of these checks periodically.
- E. Reissue old outstanding checks to any payees who can be located. If the payees cannot be located, the monies should be disposed of through the applicable statutory provisions. In addition, procedures to routinely follow up and reissue any old outstanding checks should be adopted.

Status:

A., B.,  
& E. Not implemented. See MAR No. 3.

C.&D. Implemented.

7. Circuit Clerk's Juvenile Office

- A. There was no supervisory review of disbursements.
- B. Receipts were not transmitted to the Cashier's Office on a timely basis.
- C. The balance shown on the open-items listing for some open cases did not agree to the balance shown in the case file.
- D. The Juvenile Office did not record checks received for transfer of jurisdiction costs that were made payable to another court in their receipt ledger, but simply forwarded these checks to the applicable court.

Recommendation:

The Circuit Clerk:

- A. Perform an independent review to ensure the disbursements appear proper.
- B. Transmit receipts to the Cashier's Office daily or when accumulated receipts exceed \$100.
- C. Ensure accurate open-items listings are prepared. These open-items listings should be used to reconcile to the balance of civil monies held.
- D. Record all checks received for transfer of jurisdiction costs in the receipt ledger and indicate the name of the court the check was mailed to and the date the check was mailed. In addition, the Juvenile Office should maintain a copy of the check.

Status:

- A., B.  
& C. Implemented.
- D. Not implemented. However, this fee is no longer collected by the Juvenile Office.

8. Circuit Clerk's Criminal Division

- A.1. When transmitting criminal cost bill reimbursements to the city, the Circuit Clerk did not provide the information necessary for the city to allocate and disburse the monies to the appropriate parties.
- 2. The Criminal Division sent a criminal cost bill to the St. Louis City Comptroller's Office when a defendant was sentenced to St. Louis City's Medium Security Institution (MSI). However, the court never received any reimbursement from the city.

- B. The Criminal Division did not collect Crime Victims' Compensation (CVC) judgments from defendants assigned to MSI.
- C.1. An open-items listing associated with collected partial payments held in trust was not prepared and consequently was not reconciled to the cash balance.
  - 2. If the court received a significant payment of fines and court costs, the amount paid was disbursed that same month. However, when making these disbursements, there were no set procedures as to which costs would be paid first and the amount paid was not prorated among the various costs. In addition, the court reviewed felony case files with accrued costs once a year to determine uncollectibility and at that time, any monies still being held on that case were disbursed. Again, when making those disbursements, monies held were not prorated among the various costs. The court did not periodically review misdemeanor case files with accrued costs to determine uncollectibility.
- D. The bookkeeper did not agree the amount of overpayment stamped on the payment sheet to the receipt ledger to ensure the overpayment was valid prior to issuing a refund.

Recommendation:

The Circuit Clerk:

- A. 1. Provide St. Louis City with the information necessary to allow the Treasurer and Comptroller to allocate and disburse criminal cost reimbursements received from the state, including the state's portion of such fees identified above for fiscal years 1996 and 1995, totaling \$88,505. In addition, the Circuit Clerk's Office should identify similar fees from prior years and ensure those additional amounts are properly disbursed.
  - 2. Develop a system to monitor criminal costs billed to the city, including all past billings, and work with the city to ensure those criminal costs are disbursed to the appropriate parties, including the state.
- B. Establish procedures to ensure the collection of CVC judgments due from defendants sentenced to MSI and disburse these funds as required by state law.
- C.1. Prepare open-items listings monthly for partial payments and reconcile this to the balance in the partial payment account.
  - 2. Prorate any partial payments received among the various costs. In addition, identify those cases which contain uncollectible additional court costs and obtain a court order to close those cases by paying out costs on a prorated basis.
- D. Require the bookkeeper to agree overpayments stamped on the payment sheets to a

receipt recorded in the receipt ledger before refunds are made.

Status:

A.1., 2.,

B.

&C.2. Not implemented. See MAR No. 2.

C.1. Not implemented. See MAR No. 1.

D. Implemented.

9. Circuit Clerk's Bond Controls and Procedures

A. Bond forms issued by the Bonding Department were not prenumbered. In addition, a log of all bonds posted was not maintained.

B. The Bonding Department did not always indicate the type of bond posted on the Special Affidavit of Qualifications of Surety. In addition, for several bonds reviewed, the type of bond indicated on the Special Affidavit of Qualifications of Surety did not agree to the type of bond indicated on the bond form.

C. Errors were made by the Finance Department when posting bond receipts and disbursements to the various accounting records.

D.1. The bond open-items listings were not reconciled to the balance in the bond account. The total identified open items at June 30, 1996, exceeded the balance in the bond account at that date by \$315,670. In addition, the Finance Department also had a "miscellaneous" general ledger account where the prior bookkeeper added voided checks and "stop payment" checks, instead of adding these back to the appropriate general ledger account from which they were disbursed. The Finance Department did not know how much of the "miscellaneous" account related to bonds.

2. The bond open-items listing at June 30, 1996 was inaccurate.

3. The bond open-items listing at June 30, 1996, included numerous old bonds, some which had been held over fifteen years.

Recommendation:

The Circuit Clerk:

A. Ensure the Criminal Division-Bonding Department issues prenumbered bond forms for all

bonds. In addition, a log of bonds should be maintained by the Criminal Division, including the bond number, and the numerical sequence of the bond forms should be accounted for by someone independent of the bonding process. In addition, someone independent of the bonding process should periodically trace all full cash bonds or 10% cash bonds recorded in the bond log to a receipt recorded in the Finance Department's receipt ledger.

- B. Record the type of bond posted on the Special Affidavit of Qualifications of Surety and ensure that agrees to the type of bond recorded on the bond form.
- C. Ensure all bond receipts and disbursements are properly posted to the various accounting records.
- D. Investigate and resolve differences between the open-items listings and the balances in the bond account. Any identified shortage should be investigated and resolved. Accurate open-items listings should be prepared periodically and reconciled to the balance in the bond account. Unclaimed bonds should be disposed of in accordance with state law.

Status:

- A. Partially implemented. New software was installed in the Bonding Department and they began issuing prenumbered bond forms in November 1998. Although not repeated in the current MAR, our recommendation remains as stated above.
- B. Implemented.
- C. Not implemented. See MAR No. 1.
- D. Not implemented. See MAR No. 2, of the Special Review of the Circuit Criminal Division - Finance Department - Cash Bond Deposits and See MAR No. 1.

10. Circuit Clerk's Banking Arrangements

- A. The Circuit Clerk could possibly have earned a higher rate of return on some deposited monies.
- B. At June 30, 1996 and June 30, 1995, \$100,000 and \$186,421 of the Circuit Clerk's deposits exceeded the Federal Deposit Insurance Corporation (FDIC) coverage and was not secured by additional pledged collateral. We also noted bank balances exceeded the amount of collateral security pledged at various other times during the audit period by as much as \$3.2 million.

Recommendation:

The Circuit Clerk:

- A. Transfer more court funds into higher yielding accounts.
- B. Monitor total amounts on deposit to ensure amounts pledged as collateral are sufficient.

Status:

- A. Not implemented. Although not repeated in the current MAR, our recommendation remains as stated above.
- B. Not implemented. The Circuit Clerk's bank accounts were only under-collateralized one month during the fiscal year ended June 30, 1998. Although not repeated in the current MAR, our recommendation remains as stated above.

11. Circuit Clerk's Special Interest Account

- A. Bids were not always solicited for major purchases nor was bid documentation always retained.
- B. The court did not always transfer interest earned on some of their unrestricted accounts to the special interest account on a timely basis.

Recommendation:

The Circuit Clerk:

- A. Solicit bids for all major purchases and retain appropriate documentation of these bids. In situations where bids cannot be taken, the reasons for not taking bids should be documented and retained.
- B. Transfer \$160,941 to the special interest account. In addition, the court should determine whether there was any other interest earned between July 1, 1992 and June 30, 1994 that was not transferred to the special interest account and then transfer this to the special interest account. Also, transfer interest earned on all unrestricted deposits periodically to the special interest account to be used for expenditures of the Circuit Clerk's Office or turned over to the city treasury in accordance with state law.

Status:

- A. Not implemented. See MAR No. 10.
- B. Implemented.

12. Circuit Clerk's Personnel Procedures

- A. Leave recorded on some employees' time sheets, absence reports, and leave accrual records did not agree. In some cases, the required absence reports were missing. Also, one employee had accrued negative annual leave and sick leave balances instead of having pay docked as required by the Circuit Clerk's written policy on leave.
- B. The Personnel Office did not maintain proper records of overtime worked by Circuit Clerk employees.

Recommendation:

The Circuit Clerk:

- A. Ensure leave recorded on the daily sign in sheets, monthly time sheets, and absence reports agree to the leave accrual records.
- B. Follow established procedures to ensure records of overtime worked and compensatory time earned and taken are maintained by the Personnel Office.

Status:

A.&B. Not implemented. Although not repeated in the current MAR, our recommendations remain as stated above.

## SPECIAL REVIEW OF THE CIRCUIT CRIMINAL DIVISION - FINANCE DEPARTMENT

### 1. Missing Funds

Accounting records indicated more cash was received than was deposited. Some cash received which was recorded was not deposited; and some money orders and checks received were not recorded but deposited in place of cash taken. It appears approximately \$25,000 was misappropriated.

Recommendation:

The Circuit Clerk work with law enforcement officials regarding restitution of the missing monies and any criminal prosecution considered necessary.

Status:

Restitution could not be collected due to the death of a former clerk.

### 2. Receipt Controls and Procedures

- A. Receipt slips issued by the court did not always indicate the method of payments received. In addition, the composition of receipt slips issued was not reconciled to the composition of deposits, and the department allowed employees and judges to cash personal checks from court receipts.
- B. No one accounted for the numerical sequence of the prenumbered receipt slips. Numerous receipt numbers were not shown as used, or voided and there were also numerous other receipt slips that had been voided and many receipt slips where information had been changed through the use of correction fluid.
- C.1. When Case Processing personnel recorded payments on the computer system, only a statement that “fine and/or court costs were paid” was recorded; the receipt slip number and the amount paid was not recorded.
  - 2. Access to the REJIS computer system was not properly restricted.
  - 3. Payments recorded on the REJIS computer system were not reconciled to payments recorded in the one-write receipt ledgers.
- D. The duties of receiving monies, recording payments, and depositing monies were not adequately segregated.
- E. The Finance Department was not printing daily totals from the cash register for use in reconciling to money collected.
- F. Numerous case files could not be located by court personnel.

Recommendation:

The Circuit Clerk ensure:

- A. The method of payment is recorded on all receipt slips issued and the composition of receipt slips is reconciled to bank deposits. In addition, the court should discontinue cashing personal checks from judges, and any discrepancies between the composition of receipts and deposits should be investigated and explanations for the differences documented.
- B. The numerical sequence of all receipt slips issued is accounted for, new receipt slips are issued when receipt information needs to be changed, and the old receipt slips are voided.
- C.1. The receipt slip number and amount paid is included for all receipts recorded into the computer.

2. Each employee accesses the computer system with their unique password.
  3. Receipts recorded on REJIS are reconciled to receipts recorded in the one-write receipt ledgers and any changes made to the computer case files after the reconciliation is performed are reviewed.
- D. The duties of receiving and depositing monies are segregated from the duties of posting and modifying payments on REJIS, and canceling warrants on REJIS.
- E. All receipts are maintained in the locked cash register drawers. In addition, daily totals of receipts recorded on the cash register should be printed and reconciled to money in the register.
- F. All court records are retained in accordance with Supreme Court Administrative Rule 8.

Status:

A.&E. Implemented.

B., C.

& D. Not implemented. See MAR No. 1.

F. Not implemented. See MAR No. 5.

SPECIAL REVIEW OF THE CIRCUIT CIVIL DIVISION - CASHIER'S OFFICE -  
CHAPTER 517 LANDLORD CASE INITIAL DEPOSITS

Missing Funds

A misappropriation of at least \$10,352 occurred during the period July 1, 1994 through May 17, 1996. Some cash payments for initial deposits on Chapter 517 landlord cases were recorded but the cash was not deposited. Some checks and money orders that were received from the Certified Copies Department were not recorded, but deposited in place of the cash taken from the deposits on Chapter 517 landlord cases. In addition, the Cashier's Office did not immediately receipt checks when received from the Certified Copies Department. Not only did the Certified Copies Department not receive a receipt slip at the time the checks were transmitted, the department kept no record of the amounts collected and transmitted to the Cashier's Office.

Recommendation:

The Circuit Clerk continue to work with the St. Louis City Circuit Attorney and the St. Louis City Police Department regarding any criminal prosecution and restitution of the missing monies. In addition, the Certified Copies Department should obtain a receipt from the Cashier's Office immediately upon transmitting copy monies and ensure the receipt agrees to the amount of monies collected and transmitted.

Status:

Partially implemented. The individuals involved were prosecuted and sentenced to one year probation with suspended imposition of sentence, which has been completed. Restitution was collected in full by the court. Procedures in the Certified Copies Department are still not adequate. See MAR No. 8.

KEB's REPORT ON THE CIRCUIT CLERK FUND  
YEAR ENDED JUNE 30, 1997

1. Cash Receipts Journal

Management was unable to provide the detailed cash receipts journals for the month of July 1996, and it was determined that retrieval of this information from the computer system could not be performed.

Recommendation:

Procedures should be developed to safeguard all financial records of the Circuit Clerk's Office and all daily printed cash receipt reports should be retained and accounted for on a daily and monthly basis. In addition, the computer program for recording cash receipts should be modified to allow for the identification of unique batches so that retrieval of information will match reports of original entry.

Status:

Not implemented. See MAR No. 5.

2. Bank Reconciliations

The cash balance per the cash book did not agree to the bank reconciliation for the Criminal and Civil Departments due to transfers between the funds not being recorded. In addition, in all departments it was noted that management was not reviewing monthly bank reconciliations.

Recommendation:

In order to properly report cash, the cash book and the bank reconciliation should agree. In addition, any transfers between funds should be properly recorded as due to and due from the various department's accounts in each department's cash book. Management should also review and initial each bank reconciliation to monitor the resolution of all reconciling items. Furthermore, management should ensure that reconciling items that appear on subsequent bank reconciliations are promptly identified, investigated and accounted for appropriately.

Status:

Partially implemented. The Civil Cashiers' Office implemented this recommendation, however, the Criminal Cashiers' Office has not. In addition, the December 1998 bank reconciliation for the Child Support Account was not completed until December 1999. See MAR Nos. 1 and 3.

3. Outstanding Checks

The list of outstanding checks on the bank reconciliation for the Civil Department was shown as a range of checks with one dollar amount. In addition, a check for approximately \$25,000 was

listed as outstanding, but had been voided in December 1995. In addition, cash account reconciliations for several other departments indicated that some checks had been outstanding as long as four years.

Recommendation:

All check numbers and amounts should be shown individually on the outstanding check list to easily identify items that have not cleared the bank and voided checks should be properly processed and removed from the outstanding check list. Procedures should also be developed to periodically review old outstanding checks to determine if the payee can be located and to properly dispose of unclaimed funds in accordance with state law. Finally, since the Circuit Clerk's office processes a large number of checks, a more computerized system should be used for bank reconciliations to gain efficiencies from data already entered into the various systems.

Status:

Not implemented. Although not repeated in the current MAR, the recommendation remains as stated above.

4. Voided Checks

Several blank checks for the active Dissolution Department bank account were included with the checks that had cleared the bank. The checks were considered voided, but were not marked in a manner to indicate they had been voided.

Recommendation:

Voided checks should be marked or mutilated in a way so that the checks cannot be easily stolen and presented for payment.

Status:

Implemented.

5. Canceled Checks

Canceled checks returned with the bank statement were filed in numeric sequence rather than being kept numerically by the month cleared. In addition, since a large volume of checks clear the bank on a daily basis, the bank uses a separate piece of paper called a lot slip to indicate the checks which clear the bank on a given day and only a total is indicated on the bank statement for these lot slips. The lot slips included with the bank statement were not kept together by month and stored in a secure location.

Recommendation:

Lot slips should be kept together by month, by account and stored with the bank statement. In addition, in order to reduce time in the bank reconciliation process, canceled checks should be kept together by month cleared by bank account and not refiled in numeric order.

Status:

Not implemented. Although not repeated in the current MAR, the recommendation remains as stated above.

6. Recording Cash Receipts as of Date Received

Mail cash receipts of the Child Support Account were not being recorded based on the actual receipt date. Child Support personnel were two days behind in receipting collections.

Recommendation:

Cash receipts should be recorded as of the date funds are received. This will allow for a more accurate accounting of cash within the department.

Status:

Not implemented. See MAR No. 3.

7. Interest Income

Management sometimes transferred the principal portions of investments to the special interest account at the time investments were purchased rather than when the interest was actually earned.

Recommendation:

Interest should be transferred into the Special Interest Account at the maturity date of the investment or when the interest is actually received. Principal amounts available to be invested should not be reduced, but rather used to purchase other investments such as certificates of deposit to maintain principal balances.

Status:

Implemented.

8. Restricted Accounts

Some case files within the Civil Account Restricted Accounts lacked proper authorization for the establishment of and for the disbursement of funds from these accounts. Differences were also noted between the final disbursement amount and the bank balance due to service charges incurred.

Recommendation:

All disbursements should be properly authorized as well as documentation supporting establishment of these restricted accounts be included in the case file as required. Adequate controls should be established to ensure all restricted accounts are disbursed at the proper amount.

Status:

Implemented.

9. Controls over Cash Receipts

In the Criminal Department checks were not deposited until a case number could be identified and a list of undeposited checks was not properly kept to determine when or if a check was deposited.

Recommendation:

All checks received should be deposited intact daily regardless of whether a case number can be identified. Additionally, a list or copy of unidentified checks should be maintained and used to identify the proper case number on a timely basis.

Status:

Not implemented. See MAR No. 1.

10. Authorized Signers

One investment account had a previous Circuit Clerk who was still listed in its database and whose name appeared on certain types of transactions.

Recommendation:

This situation should be corrected as soon as possible.

Status:

Implemented.

11. Taxing

Several errors were noted in the amounts taxed by the Taxing Department. In addition, the breakdown of costs incurred did not agree in total to the amount of fees charged.

Recommendation:

Procedures should be developed by the Taxing Department to correctly charge cases for fees incurred and to insure the breakdown for fees agrees to the amount charged.

Status:

Not implemented. See MAR No. 6.

12. Double Entry Accounting System

All of the accounts under the Circuit Clerk's control did not post activity to a general ledger or financial system. Financial information was not being captured in a method that allowed for a detailed listing of accounts and activity. In the current system, many manual reports would have to be accumulated to present this financial information.

Recommendation:

A double entry accounting system should be put in place to capture all of the activity under the Clerk's control. All of the accounts under the Clerk's control should be included and reconciled on a monthly basis.

Status:

Not implemented. Although not repeated in the current MAR, the recommendation remains as stated above.

13. Open-Item Listings

Various operating accounts did not reconcile open-item listings of monies held for others to the cash and investments in the bank.

Recommendation:

The Circuit Clerk's office review and reconcile, on a monthly basis, the open-items listing by operating account to the cash and investment balances. Old outstanding items should be reviewed and followed up on as necessary.

Status:

Not implemented. See MAR Nos. 1, 3, 6 and 9.

14. MSI Criminal Cost Bills

The Criminal Division sent a criminal cost bill to the St. Louis City Comptroller's Office when a defendant was sentenced to the St. Louis City's Medium Security Institution (MSI). However, the court never received any reimbursement from the city.

Recommendation:

The Clerk should review procedures to determine if the Clerk is able to receive reimbursement from the city in accordance with state approved regulations.

Status:

Not implemented. See MAR No. 2.

15. Criminal Division Collection of CVC

The Criminal Division did not collect Crime Victims' Compensation (CVC) judgements from defendants assigned to MSI as required by Section 595.045, RSMo 1994.

Recommendation:

The Clerk's office should establish procedures for the collection of the CVC judgements from defendants assigned to MSI.

Status:

Not implemented. See MAR No. 2.

16. Review of Refunds of Overpayments- Criminal Division

The voucher amount to refund overpayments was not agreed to the overpayment amount in the partial payment ledger.

Recommendation:

A supervisor should compare the voucher amount to the payment ledger in addition to the amount in the case file.

Status:

Implemented.

17. Pledged Securities

The collateral security pledged by the Circuit Clerk's depository banks as of June 30, 1997 was insufficient in one bank by \$4,992. In addition, one banking institution maintained pledged collateral in the name of the City of St. Louis rather than the Circuit Clerk.

Recommendation:

The Circuit Clerk should routinely monitor amounts on deposit and pledged collateral amounts to ensure proper collateral by the banking institutions. In addition, all pledged collateral should be in the name of the Circuit Clerk.

Status:

Partially implemented. At December 31, 1998, and June 30, 1998, the collateral security pledged by the Circuit Clerk's depository banks was sufficient, although it was noted that one bank's collateral security pledged was insufficient at times during the year ended June 30, 1998. Although not repeated in the current MAR, the recommendation remains as stated above.

## STATISTICAL SECTION

History, Organization, and  
Statistical Information

TWENTY-SECOND JUDICIAL CIRCUIT  
 ST. LOUIS CITY, MISSOURI  
 HISTORY, ORGANIZATION, AND STATISTICAL INFORMATION

Organization

The Twenty-Second Judicial Circuit includes only St. Louis City. The circuit consists of twenty-four circuit judges, one of whom serves as presiding judge, and seven associate circuit judges.

In addition to the judges, the personnel of the Twenty-Second Judicial Circuit, St. Louis City, Missouri includes a circuit clerk, twenty-six court reporters, a court administrator, a jury supervisor, a juvenile officer, and approximately 480 other court employees. Approximately 189 of these employees work under the supervision of the Circuit Clerk.

The Circuit Clerk is elected for a four-year term. The Circuit Clerk's Office plans, assigns, coordinates, and supervises the operation and administration of the circuit court presided over by the circuit judges. Duties of the Circuit Clerk include: docketing, clerical tasks, documentation of court matters, accounting and recording, receipting and disbursing funds through the circuit and associate circuit divisions, and administering the operations of the court.

Operating Costs

The operating expenses of the various courts are paid by St. Louis City. The salaries of full-time court personnel, except for the bailiffs, are paid by the State of Missouri. The salaries of the Circuit Clerk are paid jointly by the State of Missouri and St. Louis City.

Expenditures paid by St. Louis City for the Twenty-Second Judicial Circuit for fiscal year ends June 30, 1999 and 1998, were obtained from the St. Louis City Comptroller's Office and are presented as follows:

|                      |    | Year Ended June 30, |                       |                     |                       |
|----------------------|----|---------------------|-----------------------|---------------------|-----------------------|

# AUDIT REPORT

Office Of The  
State Auditor Of Missouri  
Claire McCaskill

April 2000

**The following areas of concern were discovered as a result of an audit conducted by our office of the Department of Higher Education, State Guaranty Student Loan Program.**

---

The Department of Higher Education contracts with a loan program servicer to maintain records, process loans and claims, and collect on defaulted loans guaranteed through the Federal Family Education Loans program.

The reauthorization by the federal government of the Higher Education Act, in October 1998, replaced preclaims assistance and supplemental preclaims assistance with a single activity, default aversion assistance. Default aversion assistance consists of the activities of a guaranty agency that are designed to prevent defaults by borrowers who are at least 60 days delinquent.

The Department of Higher Education has experienced some difficulties in implementing the default aversion billing process and errors have caused some loans to be billed more than once. Contributing to this problem was the fact that, prior to the issuance of its final regulations on October 29, 1999, the U. S. Department of Education twice issued preliminary guidance to guaranty agencies that changed the method for calculating default aversion fees. To ensure default aversion fees are not under or over billed, the Department of Higher Education should consult with the U.S. Department of Education and ensure they are properly calculating the fees. In addition, they should ensure no duplicate billing occurs.

The final regulations included a prohibition against conflicts stating that an outside entity to whom a guaranty agency contracts may not perform default aversion activities and hold or service a loan, or collect on a defaulted loan within three years of the claim payment date. Although the department has entered into a contract with an entity other than its loan servicing contractor to perform default aversion activities, as of December 22, 1999, the Department of Higher Education had not assigned accounts to the new contractor. Allowing the loan servicer to continue providing preclaims assistance while servicing and collecting on the same loans appears to violate the provision against conflicts.

To ensure the collection of all default aversion fees, the Department of Higher Education should contact the U.S. Department of Education to determine if the department is eligible to receive default aversion fees when the loan program servicer performs some of the default aversion assistance activities.

## FINANCIAL SECTION

## State Auditor's Reports

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

**INDEPENDENT AUDITOR'S REPORT ON  
THE FINANCIAL STATEMENTS**

Honorable Mel Carnahan, Governor  
and  
The Coordinating Board for Higher Education  
and  
Dr. Kala M. Stroup, Commissioner  
Department of Higher Education  
Jefferson City, Missouri 65109

We have audited the accompanying financial statements of the State Guaranty Student Loan Program of the Department of Higher Education as of and for the year ended June 30, 1999, as identified in the table of contents. These financial statements are the responsibility of the program's management. Our responsibility is to express an opinion on these financial statements based on our audit.

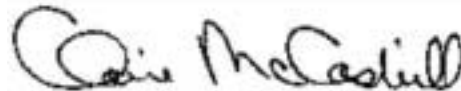

We conducted our audit in accordance with generally accepted auditing standards and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to in the first paragraph present fairly, in all material respects, the financial position of the State Guaranty Student Loan Program as of June 30, 1999, and the results of its operations for the year then ended in conformity with generally accepted accounting principles.

In accordance with *Government Auditing Standards*, we also have issued our report dated December 22, 1999, on our consideration of the program's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grants.

The accompanying History, Organization, and Statistical Information is presented for informational purposes. This information was obtained from the program's management and was not subjected to the auditing procedures applied in the audit of the financial statements referred to above.

An integral part of the program's funding comes from federal awards. Those federal awards are reported on in the State of Missouri Single Audit Report issued by the State Auditor's office. The single audit is conducted in accordance with the provisions of Office of Management and Budget Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*.

A handwritten signature in black ink, appearing to read "Claire McCaskill".

Claire McCaskill  
State Auditor

December 22, 1999 (fieldwork completion date)

**Missouri State Auditor**

**INDEPENDENT AUDITOR'S REPORT ON COMPLIANCE  
AND ON INTERNAL CONTROL OVER FINANCIAL REPORTING**

Honorable Mel Carnahan, Governor  
and  
The Coordinating Board for Higher Education  
and  
Dr. Kala M. Stroup, Commissioner  
Department of Higher Education  
Jefferson City, Missouri 65109

We have audited the financial statements of the State Guaranty Student Loan Program of the Department of Higher Education as of and for the year ended June 30, 1999, and have issued our report thereon dated December 22, 1999. We conducted our audit in accordance with generally accepted auditing standards and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States.

Compliance

As part of obtaining reasonable assurance about whether the financial statements of the State Guaranty Student Loan Program are free of material misstatement, we performed tests of the program's compliance with certain provisions of laws, regulations, contracts, and grants, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no material instances of noncompliance that are required to be reported under *Government Auditing Standards*. However, we noted an instance of other noncompliance which is presented in the accompanying Management Advisory Report.

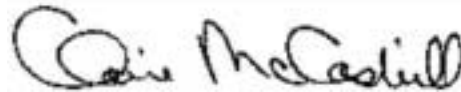

Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements of the State Guaranty Student Loan Program, we considered the program's internal control over financial reporting in order to determine our auditing procedures for the purpose of expressing our opinion on the financial statements and not to provide assurance on the internal control over financial reporting.

Our consideration of the internal control over financial reporting would not necessarily disclose all matters in the internal control over financial reporting that might be material weaknesses. A material weakness is a condition in which the design or operation of one or more of the internal control components does not reduce to a relatively low level the risk that misstatements in amounts that would be material to the financial statements being audited may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions. We noted no matters involving the internal control over financial reporting and its operation that we consider to be material weaknesses.

This report is intended for the information of the management of the State Guaranty Student Loan Program and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

A handwritten signature in black ink, reading "Claire McCaskill". The signature is written in a cursive, flowing style.

## Notes to the Financial Statements

DEPARTMENT OF HIGHER EDUCATION  
STATE GUARANTY STUDENT LOAN PROGRAM  
NOTES TO THE FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies

A. Reporting Entity and Basis of Presentation

The accompanying financial statements present only selected data for each fund of the State Guaranty Student Loan Program of the Department of Higher Education.

The State Guaranty Student Loan Fund, Federal Student Loan Reserve Fund, Guaranty Agency Operating Fund, Restricted Reserve Fund, Restricted Interest Fund, and the Automated Transfer of Money (ATOM) Fund, presented in Exhibits A and B, are separate accounting entities, recording all assets, liabilities, equities, revenues, and expenses related to the funds' activities.

Expenses presented for any fund or program may not reflect the total cost of the related activity. Other direct and indirect costs provided by the department and other state agencies are not allocated to the applicable fund or program.

The "Total (Memorandum Only)" column is presented as additional analytical data. Because this column does not identify the restrictions that exist by fund, it should be read only with reference to the details of each fund.

Appropriations, presented in Exhibit C, are not separate accounting entities. They do not record the assets, liabilities, and equities of the related fund but are used only to account for and control the department's expenditures from amounts appropriated by the General Assembly for the fiscal year.

Expenditures presented for each appropriation may not reflect the total cost of the related activity. Other direct and indirect costs provided by the department and other state agencies are not allocated to the applicable fund or program.

B. Basis of Accounting

The financial statements for the State Guaranty Student Loan Fund, Federal Student Loan Reserve Fund, Guaranty Agency Operating Fund, Restricted Reserve Fund, Restricted Interest Fund, and the ATOM Fund, Exhibits A and B, are prepared in conformity with generally accepted accounting principles. The statements are presented on the modified accrual basis of accounting which recognizes revenues when they become both measurable and available to pay current liabilities and expenditures when the related liability is incurred.

Employees earn a specified number of vacation leave hours monthly, depending on the number of years employed. Accrued vacation leave cannot exceed the number of hours earned in two years. Compensatory time is accrued as it is earned by eligible employees under the Fair Labor Standards Act.

Employees earn ten hours of sick leave monthly, with no limit on the number of hours that may be accrued. Since accrued sick leave is not paid to employees upon their termination, no related liability appears in the financial statements.

The Statement of Appropriations and Expenditures, Exhibit C, is presented on the state's legal budgetary basis of accounting which recognizes expenditures on the encumbrance method. Expenditures include amounts payable or encumbered at June 30 and paid during the lapse period, which ends August 31. The authority to expend appropriations ends with the close of the lapse period. However, the General Assembly may authorize reappropriation of the unexpended balances of capital improvement appropriations for the following year. The General Assembly also may authorize biennial capital improvement appropriations, for which the unexpended balances at June 30 of the first year of the two-year period are reappropriated for expenditure during the second year.

The budgetary basis of accounting differs from generally accepted accounting principles, which require revenues to be recognized when they become available and measurable or when they are earned and expenditures or expenses to be recognized when the related liabilities are incurred.

#### C. Fiscal Authority and Responsibility

The department administers transactions in the funds listed below. The state treasurer as fund custodian and the Office of Administration provide administrative control over fund resources within the authority prescribed by the General Assembly except for the ATOM Fund, which is controlled entirely by the department.

##### State Guaranty Student Loan Fund:

This fund was established by Section 173.120, RSMo 1994, to receive all funds appropriated to it by the General Assembly, and all charges, gifts, grants, and requests from federal, private, or other sources made for the purpose of assisting students in financing their education. On October 7, 1998, the U.S. congress enacted the Higher Education Amendments (HEA) of 1998. The new legislation resulted in the elimination of the State Guaranty Student Loan Fund and required the creation of two new funds: the Guaranty Agency Operating Fund and the Federal Student Loan Reserve Fund. The legislation became effective retroactively on October 1, 1998. On that date, the assets, liabilities, and fund balance of the State Guaranty Student Loan Fund were transferred to the Guaranty Agency Operating Fund and the Federal Student Loan Reserve Fund.

Federal Student Loan Reserve Fund: This fund was created pursuant to the provisions of the HEA of 1998 that requires guaranty agencies to account for transactions related to claim payment and default aversion activities in a separate fund. The legislation provides that the fund is the property of the United States government and may only be used to pay claims to lenders and to pay default aversion fees to the Guaranty Agency Operating Fund.

Guaranty Agency Operating Fund: This fund was created pursuant to the provisions of the HEA of 1998 that requires guaranty agencies to account for operating revenues and expenditures in a separate fund. The legislation provides that the fund is the property of the guaranty agency and may be used to pay for the operations of the Federal Family Education Loan Program (FFELP) and other student assistance activities.

Restricted Reserve Fund: As described in Note 5 to the financial statements, this fund was established to comply with the requirements of the Balanced Budget Act of 1997 that amended the Higher Education Act of 1965. This fund represents monies which are restricted for eventual payment to the U.S. Treasury. Revenues include monies which the department earns on the investments of the reserve.

Restricted Interest Fund: This fund represents interest earned on the restricted reserve fund. Interest monies are to be used solely for default prevention activities.

ATOM Fund: The department serves as an escrow agent by disbursing student loan funds to schools on behalf of participating lenders. Revenues include guarantee fees charged to the lender and monies which the department earns on investment of the fund.

#### D. Employee Fringe Benefits

In addition to the social security system, employees are covered by the Missouri State Employees' Retirement System (MOSERS) (a noncontributory plan) and may participate in the state's health care, optional life insurance, deferred compensation, and cafeteria plans. The optional life insurance and cafeteria plans involve only employee contributions or payroll reductions. Also, the deferred compensation plan involves employee payroll deferrals and a monthly state matching contribution for each participating employee.

The state's required contributions for employee fringe benefits are paid from the same funds as the related payrolls. Those contributions are for MOSERS (retirement, basic life insurance, and long-term disability benefits); social security and medicare taxes; health care premiums; and the deferred compensation plan match.

Employee fringe benefits in the financial statements at Exhibits A and B are the transfers from the State Guaranty Student Loan Fund and Guaranty Agency

Operating Fund for costs related to salaries paid from those funds. Transfers related to salaries are not appropriated by agency and thus are not presented in the financial statements at Exhibit C.

The Governmental Accounting Standards Board's *Codification of Governmental Accounting and Financial Reporting Standards* requires certain disclosures regarding public employee retirement systems and postemployment benefits such as health care and life insurance benefits provided to retired employees. Required disclosures for the state financial reporting entity are included in the State of Missouri Comprehensive Annual Financial Report issued by the Office of Administration.

## 2. Cash and Investments

The balances of the State Guaranty Student Loan Fund, Federal Student Loan Reserve Fund, Guaranty Agency Operating Fund, Restricted Reserve Fund, and the Restricted Interest Fund are pooled with other state funds and invested by the state treasurer.

Amounts in the ATOM Fund represent cash and investments which are in the custody of the department. The department has determined that a checking account and repurchase agreement are appropriate types of accounts and investments for its needs.

### Deposits

The carrying amount of the ATOM Fund's deposits was \$146 which was also the bank balance.

The ATOM Fund's deposits at June 30, 1999, were entirely covered by federal depository insurance or by collateral securities held by the program's custodial bank in the department's name.

### Investments

The ATOM Fund's investment at June 30, 1999, was a repurchase agreement with a carrying amount of \$251,875 and a bank balance and market value of \$1,139,014.

Of the reported amount at June 30, 1999, \$251,875 represents investments that were insured or registered or for which the securities were held by an independent bank in the department's name.

## 3. Due from Federal Government - Reinsurance

This amount represents defaulted loan claims to be reimbursed by the U.S. Department of Education (USDE) at June 30, 1999, net of amounts due to the USDE for refunds of claims previously reimbursed, collections on defaulted loans, including administrative wage garnishments, collections on rehabilitated loans, and amounts received for loans paid in full through consolidation. The amount reimbursed by USDE for defaulted loan claims is

considered to be "reinsurance" to the DHE since the agency has already purchased the defaulted loan from the lender, "insuring" the lender against further loss. Except for refunds of claims previously reimbursed, which are fully refundable to the USDE, federal regulations allow the DHE to retain a percentage of amounts collected. The percentages retained vary according to the type of collection and the reinsurance rate effective at the time of the claim payment. The difference between amounts collected and the DHE retention is due to the USDE, and is offset against amounts due to the agency from the USDE for reinsurance on defaulted loans.

For loans disbursed prior to October 1, 1993, the reinsurance agreement between the Coordinating Board for Higher Education (CBHE) and the Secretary of the USDE provides for reinsurance claims to be paid at 100 percent if the net default rate of the loan program is less than 5 percent of the total amount of loans in repayment at the end of the preceding federal fiscal year. For loans disbursed between October 1, 1993, and September 30, 1998, the reinsurance agreement between the CBHE and the Secretary of the USDE provides for reinsurance claims to be paid at 98 percent if the net default rate of the loan program is less than 5 percent of the total amount of loans in repayment at the end of the preceding federal fiscal year. For loans disbursed on or after October 1, 1998, the reinsurance agreement between the CBHE and the Secretary of the USDE provides for reinsurance claims to be paid at 95 percent if the net default rate of the loan program is less than 5 percent of the total amount of loans in repayment at the end of the preceding federal fiscal year. If the net default rate exceeds 5 percent, USDE reimbursements for reinsurance are reduced. The following default rates occurred for the Missouri Student Loan Program:

| <u>June 30,</u> | <u>Default Rate (%)</u> |
|-----------------|-------------------------|
| 1999            | 2.85                    |
| 1998            | 3.59                    |
| 1997            | 4.08                    |
| 1996            | 3.17                    |

4. Deferred Federal Advances

This amount represents advances from the USDE to supplement the fund balance which backs the department's loan guarantees. The USDE may require that the advances be repaid whenever the fund balance is determined adequate to back current outstanding loan guarantees. As of June 30, 1999, the principal amount was \$1,874,831.

5. Due to Federal Government

The Balanced Budget Act of 1997 amended the Higher Education Act of 1965 to require the U.S. Secretary of Education to recall approximately \$1 billion in funds from guaranty agencies. Under this provision, guaranty agencies are required to deposit a portion of their funds into restricted accounts for eventual transfer to the U.S. Treasury. The deposits into the restricted accounts are to be made in equal annual installments within 90 days after the beginning of federal fiscal years 1998 through 2002. All funds in the restricted accounts will

be transferred to the U.S. Treasury on September 1, 2002. The DHE estimates that approximately \$32,000,000 of its funds will be recalled. The following schedule represents deposits that have been or will be made to the restricted reserve fund:

| <u>Fiscal<br/>Year</u> | <u>Deposit<br/>Amount</u> | <u>Cumulative<br/>Amount</u> |
|------------------------|---------------------------|------------------------------|
| 1998                   | \$ 6,484,334              | \$ 6,484,334                 |
| 1999                   | 6,484,334                 | 12,968,668                   |
| 2000                   | 6,484,334                 | 19,453,002                   |
| 2001                   | 6,484,334                 | 25,937,336                   |
| 2002                   | 6,484,334                 | 32,421,670                   |

The HEA of 1998 requires guaranty agencies to return additional reserve funds to the federal government. The law requires guaranty agencies to return an additional \$85,000,000 in fiscal year 2002, \$82,500,000 in fiscal year 2006, and \$82,500,000 in fiscal year 2007. The amount to be returned by the Missouri State Guaranty Student Loan Program has not been determined.

#### 6. Funding Sources

The HEA of 1998 significantly changed the sources and amounts of revenue available to guaranty agencies to finance expenditures of the Guaranty Agency Operating Fund and the Federal Student Loan Reserve Fund. The legislation assigned funding sources that were available in previous years to a specific fund or in some cases, totally eliminated a funding source. The following table summarizes the distribution of previous funding sources:

| <u>Funding Source:</u>  | <u>Guaranty Agency<br/>Operating Fund</u> | <u>Federal Student Loan<br/>Reserve Fund</u> |
|-------------------------|---|--|
| Guarantee fees          |   | X  |
| Federal reimbursements: |   |  |
| Administrative expense  |   |  |
| allowance (1)           | N/A                                       | N/A  |
| Reinsurance             |   | X  |
| Supplemental preclaims  |   |  |
| assistance (1)          | N/A                                       | N/A  |
| Interest income         | X   | X  |
| Loan recoveries         | X   |  |
| Miscellaneous           | X   | X  |

(1) The HEA of 1998 eliminated these funding sources.

In addition, the HEA created new funding sources for each fund. A table representing the distribution of the new funding sources and a brief description of each funding source follows:

| <u>Funding source:</u>   | <u>Guaranty Agency<br/>Operating Fund</u> | <u>Federal Student Loan<br/>Reserve Fund</u> |
|--|---|--|
| Loan processing and<br>Issuance fee                              | X   |  |
| Account maintenance<br>fee                                       | X   |  |
| Default aversion fee   | X   |  |
| Transfer of Secretary's<br>Equitable Share of<br>Loan Recoveries |   | X  |

7. Federal Reimbursements - Administrative Expense Allowance

This amount represents USDE allowances to the DHE for administering the loan program. Payments are computed quarterly and equal .85 percent of loans guaranteed during the quarter. As described in Note 6, the HEA of 1998 eliminated this funding source.

8. Federal Reimbursements – Loan Processing and Issuance Fee

This amount represents an administrative fee paid by the USDE to the DHE that equals .65 percent of loans originated during the quarter. Payments are computed quarterly based on amounts reported to the National Student Loan Data System (NSLDS).

9. Federal Reimbursements – Account Maintenance Fee

This amount represents an administrative fee paid by the USDE to the DHE that equals .12 percent of outstanding loans. Payments are computed quarterly based upon amounts reported on the quarterly federal 1130 report and to the NSLDS.

10. Federal Reimbursements - Supplemental Preclaims Assistance (SPA)

Prior to the HEA of 1998, guaranty agencies with a reinsurance agreement with the USDE were required to provide SPA on accounts that were delinquent at least 120 days. The USDE paid the DHE one percent of the total unpaid principal and accrued interest on the loan as of the date the lender submitted a Request for Collection Assistance (RCA), the beginning of the preclaims assistance. As described in Note 6, the HEA of 1998 eliminated this funding source.

11. Guarantor Servicer Fees

The DHE contracts with a guarantor servicer to provide accounting records, billings, application processing, loan maintenance, default aversion, claims services, and collection services. Expense and equipment expenditures of the State Guaranty Student Loan Fund and Guaranty Agency Operating Fund, as presented in Exhibit B, include guarantor servicer fees of \$ 1,090,602 and \$ 3,033,208, respectively, for the year ended June 30, 1999.

In addition, the guarantor servicer performs collection activities on defaulted accounts for 120 days after default claim paid date. The servicer retains a portion of the amount collected as a collection fee. Expense and equipment expenditures of the State Guaranty Student Loan Fund and Guaranty Agency Operating Fund, as presented in Exhibit B, include guarantor servicer commission fees of \$ 331,516 and \$ 743,102, respectively.

12. Supplemental Preclaims Assistance Fees

The DHE contracts with a company to provide default prevention procedures. Supplemental preclaims assistance fees of \$ 92,555 and \$ 173,769 for the year ended June 30, 1999 are included in the expense and equipment expenditures of the State Guaranty Student Loan Fund and Guaranty Agency Operating Fund, respectively, as presented in Exhibit B.

13. Collection Agency Fees

The DHE contracts with several collection agencies for collection services. The collection agencies keep a portion of collections as commission fees.

14. Operating Transfers

A. Default Aversion Fee

The DHE collects a fee for preventing delinquent borrowers from defaulting. The DHE is eligible to collect a one-time fee on each loan where a lender files a Request for Collection Assistance (RCA) with the guaranty agency. The fee is calculated as 1 percent of the delinquent loan balance and may be transferred no more frequently than monthly from the Federal Student Loan Reserve Fund to the Guaranty Agency Operating Fund. Transfers in to the Guaranty Agency Operating Fund, as presented in Exhibit B, include default aversion fees of \$ 755,899 for the year ended June 30, 1999. If the DHE collects the fee on a loan that subsequently defaults, the DHE must rebate 1 percent of the loan balance at the time of claim payment to the Federal Student Loan Reserve Fund.

B. Secretary's Equitable Share of Loan Recoveries

The Secretary's Equitable Share of Loan Recoveries is transferred from the Guaranty Agency Operating Fund to the Federal Student Loan Reserve Fund since all collections on defaulted loans are deposited in the Guaranty Agency Operating Fund upon receipt. Transfers in to the Federal Student Loan Reserve Fund, as presented in Exhibit B, include \$15,146,108 of secretary's equitable share of collections.

15. Appropriations Exercised by Other State Agencies

The Missouri General Assembly made appropriations from the State Guaranty Student Loan Fund and the Guaranty Agency Operating Fund for the loan program's proportionate share of the department's rental payments. These appropriations are administered by the Office of Administration, Division of Facilities Management.

16. Contingent Receivable

During fiscal years 1988 and 1989, the DHE used a total of \$4,088,370 for scholarships and legal costs relating to the scholarships from the State Guaranty Student Loan Fund. These expenditures were reported in the State Single Audit Report for the two years ended June 30, 1989. In March 1993, the United States Department of Education (USDE) issued an audit determination of this report stating that the total \$4,088,370 had been improperly spent and that the State Guaranty Student Loan Fund must be reimbursed. The DHE appealed this determination in July 1993; however, the USDE ruled in April 1994 that the appeal was denied. As of June 30, 1999, a general revenue appropriation and the related reimbursement to the State Guaranty Student Loan Fund have not been made. Governor Carnahan sent a July 7, 1995, letter to Education Secretary Richard Riley to resolve the requirement. However, a formal response has not been received from the U.S. Department of Education.

17. Federal Direct Student Loan Program

The Omnibus Budget Reconciliation Act of 1993 (Public Law 103-66) created the Federal Direct Student Loan Program (FDSLP) whereby the federal government, rather than private lending institutions, will fund loans to all eligible students attending participating postsecondary educational institutions beginning July 1, 1994 for the 1994-95 academic year. Participation by the education institutions is strictly voluntary. Originally, the federal government had planned a five-year phase-in period for the FDSLP, which operates parallel to and competes directly with the Federal Family Education Loan Program (FFELP), administered by the DHE. Currently, no legislation has been passed nor is pending to cap or repeal the FDSLP, or to limit the FFELP. Instead, the Clinton Administration and the U.S. Department of Education have expressed the desire for both federal student loan programs to co-exist, allowing postsecondary schools to choose which program to utilize. To date, the FDSLP comprises about 30 percent of the student loan volume in Missouri.

18. Escheatment Funds

The loan program servicer maintains an escheatment account which includes old outstanding checks and payments which cannot be made because of insufficient information. These funds are the property of the State Guaranty Student Loan Program and totaled \$ 84,219 at June 30, 1999. These monies are not included in the financial statements.

19. Reconciliation of Total Expenditures to Appropriated Expenditures

Total expenditures for the State Guaranty Student Loan Fund, Federal Student Loan Reserve Fund and Guaranty Agency Operating Fund on Exhibit B reconcile to appropriated expenditures on Exhibit C as follows:

|   |    | <u>Year Ended June 30,</u><br><u>1999</u> |
|---|----|---|
| TOTAL STATE GUARANTY STUDENT LOAN FUND,<br>FEDERAL STUDENT LOAN RESERVE FUND, AND<br>GUARANTY AGENCY OPERATING FUND<br>EXPENDITURES PER EXHIBIT B | \$ | 61,721,859                                |
| Refunds of claims paid  |    | 5,034                                     |

## MANAGEMENT ADVISORY REPORT SECTION

Management Advisory Report -  
State Auditor's Current Recommendations

DEPARTMENT OF HIGHER EDUCATION  
STATE GUARANTY STUDENT LOAN PROGRAM  
MANAGEMENT ADVISORY REPORT -  
STATE AUDITOR'S CURRENT RECOMMENDATIONS

We have audited the financial statements of the State Guaranty Student Loan Program of the Department of Higher Education as of and for the year ended June 30, 1999, and have issued our report thereon dated December 22, 1999.

The following Management Advisory Report presents our finding and recommendation arising from our audit of the program's financial statements.

|                                    |
|------------------------------------|
| <b>Default Aversion Assistance</b> |
|------------------------------------|

The Department of Higher Education (DHE) contracts with a loan program servicer to maintain records, process loans and claims, and collect on defaulted loans guaranteed through the Federal Family Education Loans (FFEL) program. Under the terms of the contract, the loan program servicer is also responsible for providing preclaims assistance on loans that are between 50 to 70 days delinquent. The DHE contracts with another company to provide supplemental preclaims assistance (SPA) on loans that are at least 120 days delinquent. Prior to the reauthorization of the Higher Education Act (HEA), effective October 7, 1998, the DHE received a SPA fee on delinquent loans that were cured in accordance with 34 CFR Part 682.404.

The reauthorization of the HEA replaced preclaims assistance and SPA with a single activity, default aversion assistance. Default aversion assistance consists of the activities of a guaranty agency that are designed to prevent defaults by borrowers who are at least 60 days delinquent. The default aversion activities are similar to activities previously performed for preclaims assistance and SPA. Final regulations governing default aversion activities were issued by the USDE on October 29, 1999 with an effective date of July 1, 2000.

- A. The reauthorization legislation eliminated the SPA fee but allowed the DHE to receive default aversion fees for performing default aversion activities on delinquent loans in response to a lender's request for default aversion assistance. The DHE, in conjunction with its loan servicer, developed a default aversion billing process to implement the new legislation retroactive to October 7, 1998.

The DHE has experienced some difficulties in implementing the default aversion billing process. Prior to the issuance of its final regulations on October 29, 1999, the USDE twice issued preliminary guidance to guaranty agencies that changed the method for calculating default aversion fees. The DHE attempted to revise its billing processes to implement the new guidance but made errors that caused some loans to be billed more than once. According to the final regulations issued by the USDE, a guaranty agency may bill for a default aversion fee only once for each loan.

To ensure default aversion fees are not under or over billed, the DHE should consult with the USDE and ensure they are properly calculating the fees. In addition, they should ensure no duplicate billing occurs.

- B. The final regulations issued by the USDE on October 29, 1999 also included a prohibition against conflicts stating that any outside entity with whom a guaranty agency contracts may not perform default aversion activities and hold or service a loan, or collect on a defaulted loan within three years of the claim payment date. Although the DHE has entered into a contract with an entity other than its loan servicing contractor to perform default aversion activities, as of December 22, 1999, the DHE had not assigned accounts to the new contractor. The DHE's loan servicer is continuing to provide preclaims assistance until the new contract is implemented.

Allowing the loan servicer to continue providing preclaims assistance while servicing and collecting on the same loans appears to violate the prohibition against conflicts. According to USDE personnel, because the DHE elected to retroactively implement the default aversion fee billings, the DHE should implement all of the default aversion activities rules including the prohibition against allowing a single entity to perform default aversion assistance and service or collect on the same loans. As of June 30, 1999, the loan program servicer did not perform collection activities on the loans for which it provided default aversion activities because those loans did not have time to default. However, the DHE has not established procedures to ensure that the loan program servicer does not perform collection activities on those loans in the future.

To ensure the collection of all default aversion fees, the DHE should contact the USDE to determine if the DHE is eligible to receive default aversion fees when the loan program servicer performs some of the default aversion assistance activities.

**WE RECOMMEND** the DHE:

- A. Consult with the USDE and establish procedures to ensure default aversion billings are accurate and complete. In addition, adjustments should be made to correct the duplicate billings.
- B. Resolve the issue concerning the prohibition against conflicts with the USDE.

**AUDITEE'S RESPONSE**

- A. *The DHE has been diligently working with its loan servicer to refine and enhance its default aversion billing and assignment processes. During January and February 2000, the DHE participated in meetings conducted at its loan servicer's headquarters in Jacksonville, Florida and is currently participating in weekly conference calls dedicated to the resolution of default aversion issues. It should also be noted that the DHE detected the duplicate*

*billing problem early in the process and brought it to the loan servicer's attention. The DHE continues to test its default aversion billing statements for further evidence of duplicate billing problems. A manual adjustment for amounts overbilled will be made on the next default aversion billing statement. We will clarify any remaining issues with the USDE during their upcoming technical assistance visit in April 2000. We expect to have these issues resolved by the next audit.*

- B. The DHE has discussed the issue with its loan servicer and is in the process of identifying any loans that were billed for a default aversion fee and have subsequently defaulted. Once these loans are identified, the DHE will determine whether its loan servicer is currently collecting on the loan. If so, these loans will be reassigned to one of the DHE's other collection agencies for collection. In the future, all defaulted loans for which the DHE collected a default aversion fee and the loan servicer performed preclaim activities will be assigned to one of the DHE's collection agencies for collection. We will also discuss this issue with the USDE during their upcoming technical assistance visit in April 2000. We expect to have these issues resolved by the next audit.*

This report is intended for the information of the management of the State Guaranty Student Loan Program of the Department of Higher Education and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

## Follow-Up on State Auditor's Prior Recommendations

DEPARTMENT OF HIGHER EDUCATION  
STATE GUARANTY STUDENT LOAN PROGRAM  
FOLLOW-UP ON STATE AUDITOR'S PRIOR RECOMMENDATIONS

This section reports follow-up action taken by the State Guaranty Student Loan Program of the Department of Higher Education on recommendations made in the Management Advisory Report (MAR) of our report issued for the year ended June 30, 1998.

Reconciliation of Federal Reports

The DHE contracts with a loan program servicer to manage aspects of this program. The loan program servicer is responsible for providing data used to compile monthly (1189) and quarterly (1130) reports submitted by the DHE to the United States Department of Education. The DHE did not reconcile applicable sections of the 1130 reports to the 1189 reports.

Recommendation:

The DHE establish and implement procedures to reconcile the 1189 and 1130 reports and maintain documentation of the reconciliations.

Status:

Implemented.

## STATISTICAL SECTION

History, Organization, and  
Statistical Information

DEPARTMENT OF HIGHER EDUCATION  
STATE GUARANTY STUDENT LOAN PROGRAM  
HISTORY AND ORGANIZATION

In 1978, the Missouri General Assembly created the Missouri Student Loan Program (MSLP) to administer the Federal Family Education Loan Program (FFELP) in the state of Missouri on behalf of the Coordinating Board for Higher Education (CBHE). The CBHE has statutory authority to oversee the MSLP and to act as the guaranty agency for the FFELP. In this capacity, the CBHE, acting through the MSLP, guarantees loans made to students by eligible lending institutions.

During the first state fiscal year of operations, the CBHE guaranteed \$15,524,850 in FFELP loans to 7,289 borrowers. In contrast, as of June 30, 1999, the cumulative volume of loans guaranteed was \$3,408,945,174, representing 1,241,523 in FFELP loans. Included in this total is \$1,751,907,981 in outstanding loans.

The FFELP was created by the Higher Education Act of 1965, which is reauthorized by Congress every five years. There are currently four types of loans available to eligible borrowers under the FFELP:

Subsidized Federal Stafford Loan  
Unsubsidized Federal Stafford Loan  
Parent Loan for Undergraduate Students (PLUS)  
Federal Consolidation Loan

Subsidized Federal Stafford Loans are need-based loans available to eligible undergraduate and graduate students. Generally, the federal government pays interest on the loan as long as the borrower is enrolled at least half-time and during the borrower's six-month grace period and authorized deferment periods.

Unsubsidized Federal Stafford Loans have the same terms and conditions as subsidized Federal Stafford Loans except that they are not need-based, and the borrower is responsible for all interest payments.

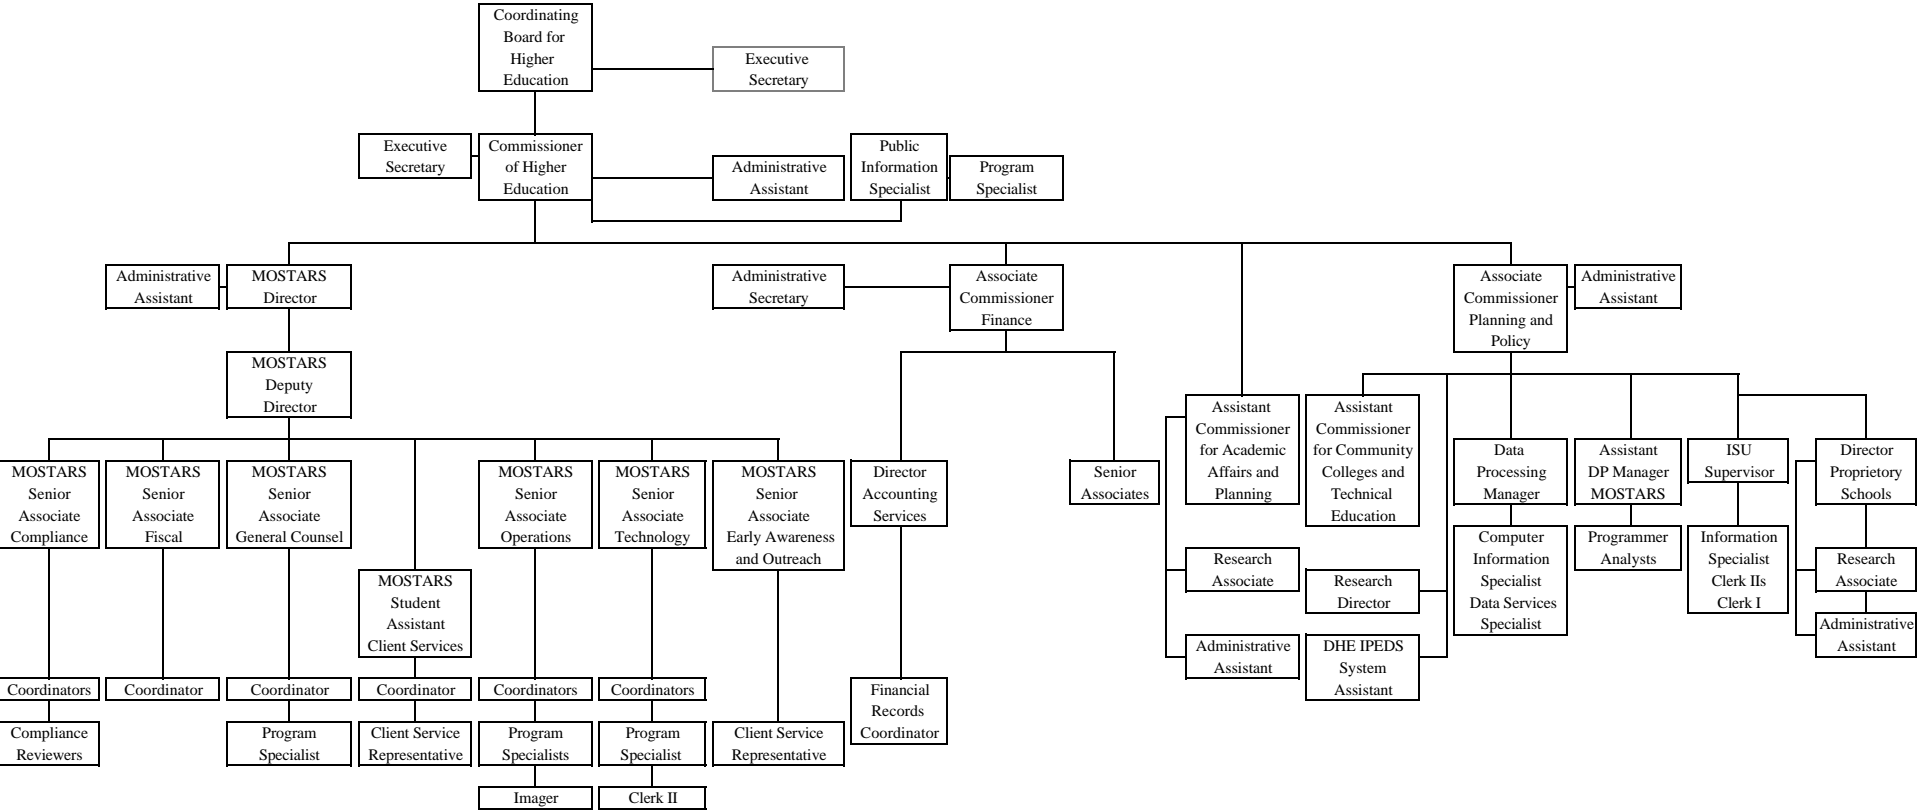

Parent Loans for Undergraduate Students allow parents to borrow guaranteed loans for dependent students. PLUS borrowers are responsible for all interest, and repayment generally begins within 60 days from the time the loan is fully disbursed.

Federal Consolidation Loans are available to borrowers who wish to combine existing student loans into one new loan. Generally, this results in lower monthly payments but higher total interest costs.

In August 1995, the department established the Automated Transfer of Money (ATOM) fund in an effort to aid schools by streamlining the delivery of Missouri student loan funds. By serving as an escrow agent, the department disburses student loan funds to schools on behalf of the participating lenders. As of June 30, 1999, the cumulative volume of disbursements to schools was 329,954

disbursements totaling \$542,312,511. Currently, there are approximately 90 participating lenders and over 400 schools that receive the loan disbursements.

In October 1997, the CBHE approved a new organizational structure to combine the administration of the Missouri grant, scholarship, and federal loan programs into one student assistance area. The new division was named Missouri Student Assistance Resource Services (MOSTARS). MOSTARS was created as a “one stop shop” which, in coordination with high school counselors and college and university financial aid offices, will provide resource and information to ensure that Missouri citizens have an opportunity to finance postsecondary education. MOSTARS employs approximately fifty-one full-time equivalent employees.

CITY OF HOLLAND, MISSOURI  
YEAR ENDED DECEMBER 31, 1999

**From The Office Of State Auditor  
Claire McCaskill**

Report No. 2000-26  
April 20, 2000  
[www.auditor.state.mo.us](http://www.auditor.state.mo.us)

# AUDIT REPORT

Office Of The  
State Auditor Of Missouri  
Claire McCaskill

April 2000

**Some problems were discovered as a result of an audit conducted by our office in response to the request of petitioners from the City of Holland, Missouri.**

---

The city had not prepared a budget for the year 2000 as of January 14, 2000. In addition, the budgets prepared by the city for the years ended December 31, 1999 and 1998, did not comply with Chapter 67 of the Missouri statutes (budget law). The city only prepares a budget for the general fund and the water and sewer fund. Neither of these budgets included projected ending balances, actual (or estimated for years not yet ended) revenues and expenditures for the two preceding budget years, or a budget message. In addition, the Board of Aldermen does not perform periodic comparisons between budgeted and actual expenditures. To better inform citizens and to ensure the city's budgets reflect the restrictions placed on the city funds, the city should prepare budgets for each fund and monitor actual expenditures compared to budgeted expenditures.

The city's most recent audit is for the year ended December 31, 1997. State law requires the city to obtain annual audits of the combined water and sewer system, and the cost of the audits is to be paid from the revenues received from the system. In addition, annual audits are required by the city's combined water and sewer system bond covenants.

The city has not published semi-annual financial statements as required by state law and has not submitted an annual financial report to the State Auditor's Office since 1997.

The City Clerk is more than a year behind in recording total billings and payments for the water and sewer system in the control ledger. As a result, monthly reconciliations of total billings, payments received, and amounts remaining unpaid cannot be performed.

Monthly reconciliations are necessary to ensure that all accounting records balance, transactions have been properly recorded, and any errors or discrepancies are detected on a timely basis. Complete documentation of the reconciliations should be retained to support conclusions and any corrections made and to facilitate independent reviews.

The City Clerk does not reconcile meter deposit records to the balance in the bank account. The city has failed to establish a reserve account as required by bond covenants. The city did not solicit proposals when selecting an engineering contractor for the city's water project. In addition, the city does not reconcile the total gallons of water billed to customers to the gallons of water pumped.

The City Clerk also serves as the City Treasurer and the City Collector contrary to an Attorney General Opinion. Controls over cash receipts and disbursements are not adequate. In addition, the city has not prepared or maintained property records.

(over)

YELLOW SHEET

The City Clerk's duties include collecting and depositing property tax receipts. The City Clerk did not make a detailed report to the Board of Aldermen summarizing the various property tax amounts collected during the year. In addition, a detailed monthly report of delinquent taxes should be submitted to the board by the City Clerk. State law requires reports to be submitted to the board of aldermen indicating the amount of taxes collected and taxes remaining delinquent. In addition, the City Clerk is not charging penalties on delinquent taxes.

The two city employees do not prepare time sheets or maintain records of vacation and sick leave. The city has not adopted ordinances to establish the compensation and duties of each employee. In addition, the Water Supervisor is also the elected City Marshall and he was paid \$23,400 for his duties as Water Supervisor. This arrangement is not in compliance with state law which states that an elected or appointed official is to be paid only for the position he was elected or appointed to serve. The city does not have written agreements with the City Attorney and City Judge.

The city receives state motor vehicle-related revenues and deposits them into the General Fund. Article IV, Section 30 of the Missouri Constitution, requires that motor vehicle-related receipts apportioned by the state of Missouri be expended for street-related purposes only including policing, signing, lighting, and cleaning of roads and streets. The city has not established a separate fund or separate accounting for these receipts and disbursements and does not monitor the use of these funds to ensure compliance with the Missouri Constitution.

The city's ordinances are not complete and up-to-date. Board minutes are not signed by the Mayor.

In the City of Holland municipal court, receipts are not always deposited intact or timely and formal bank reconciliations are not performed. The numerical sequence and ultimate disposition of all traffic tickets is not accounted for properly and complaint forms used are not prenumbered.

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

To the Honorable Mayor  
And  
Members of the Board of Aldermen  
City of Holland  
Holland, Missouri 63853

The State Auditor was petitioned under Section 29.230, RSMo, to audit the city of Holland, Missouri. Our audit of the city included, but was not limited to, the year ended December 31, 1999. The objectives of this audit were to:

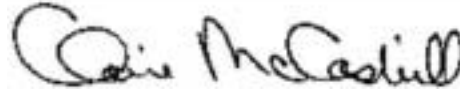

1. Perform procedures we deemed necessary to evaluate the petitioners' concerns.
2. Review compliance with certain constitutional provisions, statutes, ordinances, and attorney general's opinions as we deemed necessary or appropriate in the circumstances.
3. Review certain management practices which we believe could be improved.

Our audit was made in accordance with generally accepted government auditing standards and included such procedures as we considered necessary in the circumstances. We also reviewed board minutes, city policies and ordinances, and various city financial records.

Our audit was limited to the specific matters described above and was based on the selective tests and procedures considered appropriate in the circumstances. Had we performed additional procedures, other information might have come to our attention which would have been included in this report.

The accompanying History and Organization is presented for informational purposes. This information was obtained from the city and was not subjected to the auditing procedures applied in the audit of the city.

The accompanying Management Advisory Report presents our findings and recommendations arising from our audit of the city of Holland, Missouri.

A handwritten signature in black ink, appearing to read "Claire McCaskill". The signature is written in a cursive, flowing style.

Claire McCaskill  
State Auditor

January 14, 2000 (fieldwork completion date)

## HISTORY AND ORGANIZATION

# CITY OF HOLLAND, MISSOURI HISTORY AND ORGANIZATION

The city of Holland, incorporated in 1903 as a fourth-class city, is located in Pemiscot County. The population in 1990 was 234. The city government consists of a mayor, and a four-member Board of Aldermen. The four board members are elected from two wards for two-year terms. The mayor is elected for two years, presides over the Board of Aldermen, and votes only in the case of a tie. The mayor, Board of Aldermen, and other principal officials at December 31, 1999 were:

## MANAGEMENT ADVISORY REPORT

CITY OF HOLLAND, MISSOURI  
SUMMARY OF FINDINGS

1. Water and Sewer System (pages 9-11)

The City Clerk has not kept up to date records of total charges and payments for the water and sewer system and, therefore, monthly reconciliations of total charges, payments received, and amounts remaining unpaid cannot be performed. The City Clerk does not reconcile meter deposit records to the balance in the bank account. The city has failed to establish a reserve account as required by bond covenants. The city did not solicit proposals when selecting an engineering contractor for the city's water project. In addition, the city does not reconcile the total gallons of water billed to customers to the gallons of water pumped.

2. Accounting Records and Procedures (pages 11-13)

The City Clerk also serves as the City Treasurer and the City Collector contrary to an Attorney General Opinion. Controls over cash receipts and disbursements are not adequate. In addition, the city has not prepared or maintained property records.

3. Property Tax Procedures (pages 13-14)

The City Collector does not prepare annual reports of tax collections and delinquent taxes, and penalties are not assessed on delinquent taxes.

4. Budgets and Financial Reporting (pages 14-15)

Budgets do not meet statutory requirements. The city does not publish financial statements, submit annual financial reports to the State Auditor's office, or obtain annual audits.

5. Payroll and Personnel Procedures (pages 15-16)

The two city employees do not prepare time sheets or maintain records of vacation and sick leave. The city has not adopted ordinances to establish the compensation and duties of each employee. In addition, the Water Supervisor is also the elected City Marshall and he was paid \$23,400 for his duties as Water Supervisor. This arrangement is not in compliance with state law which states that an elected or appointed official is to be paid only for the position he was elected or appointed to serve. The city does not have written agreements with the City Attorney and City Judge.

6. Ordinances and Minutes (pages 16-17)

The city's ordinances are not complete and up-to-date. Board minutes are not signed by the Mayor.

7. Street Monies (pages 17-18)

The city has not established a separate fund or accounting of the state motor vehicle-related revenues to ensure funds are spent in accordance with the Missouri Constitution. An annual maintenance plan for city streets has not been prepared.

8. Municipal Court Division (pages 18-19)

Formal bank reconciliations are not always performed. Receipts are not deposited intact or timely and receipt slips are not issued in numerical sequence. The numerical sequence and ultimate disposition of all traffic tickets is not accounted for properly and complaint forms used are not prenumbered.

CITY OF HOLLAND, MISSOURI  
MANAGEMENT ADVISORY REPORT

|           |                               |
|-----------|-------------------------------|
| <b>1.</b> | <b>Water and Sewer System</b> |
|-----------|-------------------------------|

The city provides water and sewer services to its residents. Water meters are read on approximately the twentieth of each month and customers are billed on the last day of the month. Payments are due by the tenth of the following month. Our review of these billing practices and related procedures identified the following concerns:

- A. The City Clerk is more than a year behind in recording total billings and payments for the water and sewer system in the control ledger. As a result, monthly reconciliations of total billings, payments received, and amounts remaining unpaid cannot be performed.

Monthly reconciliations are necessary to ensure that all accounting records balance, transactions have been properly recorded, and any errors or discrepancies are detected on a timely basis. Complete documentation of the reconciliations should be retained to support conclusions and any corrections made and to facilitate independent reviews.

- B. The city collects refundable water meter deposits, which are deposited into the water meter account. The city clerk maintains a card file of meter deposits paid and records deposits refunded or applied to final bills. However, the city clerk does not reconcile the balances on these cards to the balance in the account. At December 31, 1999, meter deposits recorded on the meter cards plus interest earned on this account in 1999 and 1998 totaled \$2,892 while the bank account balances totaled \$3,300.

The meter deposit cards should be reconciled to the balance in the bank account monthly to ensure records are in balance and all meter deposits are accounted for properly.

- C. The city has not established the required reserve account for their water and sewer system bonds. The water and sewer system bond covenant for the bonds dated September 1, 1997, requires the city to establish a Bond Reserve Fund in which the city is to deposit \$700 yearly until the total balance equals \$7,000. At December 31, 1999, the balance should be \$1,400. Although at December 31, 1999, the city had not established the required fund, the cash balance of the water and sewer fund was \$33,555.

The failure of the city to establish and adequately fund the required account could allow the bondholders to take legal action to force compliance.

- D. During 1998 the city entered into a contract for engineering services related to the water project. The contract indicates fees for these services will be \$44,000. The city paid approximately \$36,000 for engineering fees during the year ended December 31, 1999 for this project. The city did not solicit proposals from other engineers. The Mayor indicated the engineering firm was selected because they had done a good job previously on the sewer project.

Sections 8.289 and 8.291, RSMo 1994, provide that when obtaining engineering services for any capital improvement project, at least three highly qualified firms should be considered. The firms should be evaluated based on specific criteria including experience and technical competence, capacity and capability of the firm to perform the work in question, past record of performance, and the firm's proximity to and familiarity with the area in which the project is located.

- E. The city does not reconcile the total gallons of water billed to customers to the gallons of water pumped. To help detect any significant water loss on a timely basis and to help ensure all water usage is properly charged, the city should monthly prepare and maintain records of the total gallons of water pumped and reconcile them to the gallons of water charged. Significant differences should be investigated.

**WE RECOMMEND** the Board of Aldermen:

- A. Require the City Clerk to keep records of charges and payments up to date and perform monthly reconciliations of the amounts charged to amounts collected and delinquent accounts.
- B. Require the City Clerk to reconcile the meter deposits recorded on the customer cards to the balance in the account each month.
- C. Maintain the required reserve bank account.
- D. Solicit and document proposals for professional services.
- E. Compare the gallons of water pumped to the gallons billed on a monthly basis. Any differences should be investigated.

**AUDITEE'S RESPONSE**

- A. *We are working on getting these records up-to-date.*
- B. *We will implement.*
- C. *We will establish the required bond reserve account.*

- D. *We selected our engineering firm based on our past positive experience with the firm. We will clearly document our decisions in the future.*
- E. *We will implement.*

|   |
|---|
| <b>2. Accounting Records and Procedures</b> |
|---|

- A. The same individual has been appointed as both the City Clerk and the City Collector. She also serves as the City Treasurer. She collects all receipts, maintains receipt and disbursement records, makes bank deposits, signs checks, and serves as secretary to the board. Neither the board nor other personnel independent of the cash custody and record-keeping functions provide adequate supervision or review of the work performed by the City Clerk.

Attorney General's Opinion No. 24, 1955 to Dodds, concluded that in a fourth-class city the holding of the positions of City Clerk, City Treasurer, and City Collector, or any two of these three offices, by the same person at the same time would be incompatible. One person holding all of these offices does not allow the separation of duties necessary for a proper evaluation and review of financial transactions. The current procedures jeopardize the system of independent checks and balances intended by state law.

- B. Receipts are not deposited, intact on a timely basis. Deposits are only made approximately twice a month. Varying amounts of cash are withheld from deposits to use as a change fund. In addition, the City Clerk cashes the employees' payroll checks from cash water receipts. While the City Clerk does indicate the method of payment on water bill stubs, no reconciliation is performed between the composition indicated on the water bills stubs and the bank deposits. To adequately safeguard receipts and reduce the risk of loss, or misuse of funds, deposits should be made on a daily basis or when accumulated receipts exceed \$100, the change fund should be maintained at a constant amount, checks should not be cashed from city receipts, and the composition of receipts per the water bill stubs should be reconciled to the amount deposited.
- C. The City Clerk maintains a balance for each account, but does not always perform and/or document a formal bank reconciliation. Monthly bank reconciliations are necessary to ensure that accounting records are in agreement with the bank and errors are detected on a timely basis. Without proper documentation, there is little assurance that these reconciliations have been performed.
- D. Supporting documentation was not available for a disbursement of \$57 paid to the City Clerk's son for cleaning the water tanks. In addition, no supporting documentation was maintained for disbursements of \$493 made to other contract employees for various work performed related to the water operation. All disbursements should be supported by paid receipts, contracts, or invoices to

ensure the obligation was actually incurred and the disbursement represents an appropriate use of public funds.

- E. The city has not prepared or maintained permanent, detailed property records for general fixed assets, including the cost of land, buildings, equipment, and furniture owned by the city. In addition, the city has not prepared and maintained permanent, detailed property records for the water and sewer system. Also, annual physical inventories are not performed.

Property records are necessary to ensure accountability for all items purchased and owned and for determining the proper amount of insurance coverage.

To develop appropriate records and procedures for fixed assets, the city needs to undertake a comprehensive review of all property owned by the city. Assets should be counted, tagged for specific identification, and recorded by description and serial number in a detailed property ledger at historical cost or estimated historical cost if the original value is not available. The city should properly record all fixed asset transactions and ensure the accuracy of the recorded fixed assets. Periodically, the city should take physical counts of its assets and compare to the detailed records.

**WE RECOMMEND** the Board of Aldermen:

- A. Consider appointing separate individuals to the positions of City Clerk, City Collector, and City Treasurer. If this is not possible, at a minimum, procedures for an adequate independent review of the record keeping functions should be established.
- B. Ensure monies are deposited intact, daily or when accumulated receipts exceed \$100, the change fund is maintained at a constant amount and the practice of cashing employee payroll checks is discontinued. Detailed receipt records should be reconciled to bank deposits.
- C. Ensure monthly bank reconciliations are performed and documented.
- D. Ensure all disbursements are supported by paid receipts and/or invoices which contain an adequate description of the goods or services received.
- E. Establish property records for general fixed assets and the fixed assets of the water and sewer system that include all pertinent information for each asset, such as tag number, description, cost, acquisition date, location, and subsequent disposition. In addition, annual physical inventories should be performed.

**AUDITEE'S RESPONSE**

- A. *The board will begin a formal review at the monthly meeting.*

- B. *We have started making deposits weekly. We will discuss maintaining our change fund at a constant amount. We have discontinued cashing personal checks. We will attempt to perform this reconciliation.*
- C. *We have implemented this procedure.*
- D. *We will implement this procedure.*
- E. *We will implement.*

|    |                                |
|----|--------------------------------|
| 3. | <b>Property Tax Procedures</b> |
|----|--------------------------------|

- A. The City Clerk's duties include collecting and depositing property tax receipts. The City Clerk did not make a detailed report to the Board of Aldermen summarizing the various property tax amounts collected during the year. In addition, a detailed monthly report of delinquent taxes should be submitted to the board by the City Clerk.

Sections 79.310, 94.320, and 94.330, RSMo 1994, require reports to be submitted to the board of aldermen indicating the amount of taxes collected and taxes remaining delinquent. The board is to examine and approve the lists and charge the tax collector with the collection of the delinquent taxes. Section 94.330, RSMo 1994, also provides that the board may declare worthless any and all personal delinquent taxes which they may deem uncollectible.

Monthly and annual reports which comply with state law would help provide assurance taxes have been properly collected, written off, or determined to be delinquent.

- B. The City Clerk is not charging penalties on delinquent taxes. Section 140.100.1, RSMo 1994, provides a penalty of two percent per month up to a maximum of 18 percent per year for each delinquent tax bill.

**WE RECOMMEND** the Board of Aldermen:

- A. Require the City Clerk prepare monthly and annual reports of property taxes collected and delinquent taxes in accordance with state law.
- B. Ensure the penalty for the collection of delinquent property taxes is charged in accordance with state law.

**AUDITEE'S RESPONSE**

- A. *We have implemented.*

B. *We will implement.*

|   |
|---|
| <b>4. Budgets and Financial Reporting</b> |
|---|

- A. The city had not prepared a budget for the year 2000 as of January 14, 2000. In addition, the budgets prepared by the city for the years ended December 31, 1999 and 1998, did not comply with Chapter 67 of the Missouri statutes (budget law). The city only prepares a budget for the general fund and the water and sewer fund. Neither of these budgets included projected ending balances, actual (or estimated for years not yet ended) revenues and expenditures for the two preceding budget years, or a budget message. In addition, the Board of Aldermen does not perform periodic comparisons between budgeted and actual expenditures. To better inform citizens and to ensure the city's budgets reflect the restrictions placed on the city funds, the city should prepare budgets for each fund and monitor actual expenditures compared to budgeted expenditures.
- B. The city has not published semi-annual financial statements as required by state law. Section 79.160, RSMo 1994, requires the Board of Aldermen to prepare and publish semi-annual financial statements. In addition, Section 79.165, RSMo 1994, states the city cannot legally disburse funds until the financial statement is published.
- C. The city's most recent audit is for the year ended December 31, 1997. Section 250.150, RSMo 1994, requires the city to obtain annual audits of the combined water and sewer system, and the cost of the audits is to be paid from the revenues received from the system. In addition, annual audits are required by the city's combined water and sewer system bond covenants.

In addition to being required by state law and the city's bond covenants, annual audits of city funds would help ensure city financial transactions have been properly recorded.

- D. The city has not submitted an annual financial report to the State Auditor's Office since 1997. Section 105.145, RSMo 1994, requires political subdivisions to file an annual report of the financial transactions of the political subdivision with the State Auditor's Office.

**WE RECOMMEND** the Board of Aldermen:

- A. Prepare annual budgets in compliance with state law, make periodic comparisons between budgeted and actual expenditures, and prepare a separate budget for each fund.
- B. Require semi-annual financial statements be prepared and published.

- C. Obtain annual audits as required by state law and the city's bond covenants.
- D. Submit annual reports of financial transactions to the State Auditor's Office as required by state law.

**AUDITEE'S RESPONSE**

- A. *We are working on our year 2000 budget. We will review the statutes and try to comply with statutory provisions.*
- B. *We will implement.*
- C. *We will discuss this problem with our CPA firm or obtain a new firm that will perform our audit on a timely basis.*
- D. *Our CPA firm performs this task. We will ensure it is done on a timely basis.*

|           |   |
|-----------|---|
| <b>5.</b> | <b>Payroll and Personnel Procedures</b> |
|-----------|---|

- A. The city has one full-time and one part-time employee. City employees do not prepare time sheets. Time sheets are necessary to document hours actually worked, substantiate payroll expenditures and the allocation of payroll expenditures to the various funds, and to provide the board with a method to monitor hours worked. To support payroll expenditures, the city should require all employees prepare detailed time sheets.
- B. Records of vacation and sick leave earned and used are not maintained. City ordinance 23.170 requires records of vacation leave allowance and use be kept. Adequate documentation of leave time earned and used is necessary to ensure that leave time is not abused.
- C. The city has not adopted ordinances to establish the compensation and duties of the Water Supervisor and the City Clerk. Sections 79.270 and 79.290, RSMo 1994, require the compensation and duties of city officials and employees to be set by ordinance.
- D. During the year ended December 31, 1999, the city paid the elected City Marshall \$23,400 in compensation for duties as the Water Supervisor. Section 105.454, RSMo 1994, states that no elected or appointed official of any political subdivision, serving in an executive capacity, shall perform any service for such political subdivision for any consideration other than the compensation provided for the performance of his official duties.

- E. Payments for services were made without current written agreements. For the year ended December 31, 1999, the city paid the Municipal Judge \$1,800 and the City Attorney \$1,200 without current written contracts.

Formal written contracts should clearly define the services to be rendered and compensation for these services to ensure that city expenditures are reasonable and proper.

**WE RECOMMEND** the Board of Aldermen:

- A. Require city employees to prepare detailed time sheets.
- B. Maintain records of vacation and sick leave.
- C. Establish the duties and compensation of all city officials and employees by ordinance as required by statute.
- D. Comply with state laws relating to compensation of city officials. The City Marshal should either quit his employment as water supervisor or resign from the position of City Marshal.
- E. Ensure all contracts are in writing and approved by the Board of Aldermen.

**AUDITEE'S RESPONSE**

- A&B. We will work on developing a time reporting system that will include sick leave and vacation time.*
- C. We will implement.*
- D. We will review this situation again and discuss with our legal counsel.*
- E. We will implement.*

|                                  |
|----------------------------------|
| <b>6. Ordinances and Minutes</b> |
|----------------------------------|

- A. The city's ordinances are not complete and up-to-date. It appears some of the city's ordinances are missing while others are old and outdated. In addition, ordinances have not been adopted in some instances where required. For example, the city has not adopted ordinances to establish the compensation and duties of city officials, current meter deposit amounts, city stickers, and merchant licenses. In addition, the city has not prepared ordinances to document the approved tax levy for each year as required by Section 94.210, RSMo 1994.

Since ordinances represent legislation which has been passed by the Board of Aldermen to govern the city and its residents, it is important that the ordinances be maintained in a complete and up-to-date manner.

- B. The board minutes are prepared and signed by the City Clerk, but the minutes are not signed by the Mayor. The board minutes should be signed by the Mayor to provide an independent attestation that the minutes are a correct record of the matters discussed and actions taken during the board's meetings.

**WE RECOMMEND** the Board of Aldermen:

- A. Ensure a complete and up-to-date set of ordinances is maintained. This would include passing new ordinances where appropriate and required.
- B. Ensure board minutes are signed by the Mayor to attest to their completeness and accuracy.

**AUDITEE'S RESPONSE**

- A. *The Board of Aldermen has discussed these issues in meetings which are documented in the board meeting minutes. However, we will pass formal ordinances in regard to these issues.*
- B. *We will do this.*

|                         |
|-------------------------|
| <b>7. Street Monies</b> |
|-------------------------|

- A. The city receives state motor vehicle-related revenues and deposits them into the General Fund. Article IV, Section 30 of the Missouri Constitution, requires that motor vehicle-related receipts apportioned by the state of Missouri be expended for street-related purposes only including policing, signing, lighting, and cleaning of roads and streets. The city has not established a separate fund or separate accounting for these receipts and disbursements and does not monitor the use of these funds to ensure compliance with the Missouri Constitution.

During the year ended December 31, 1999, the city deposited \$9,617 in state motor vehicle-related receipts into the General Fund, and spent only \$3,301 for street lighting, policing, and signing.

To ensure compliance with the Missouri Constitution, the city should maintain a separate fund or separate accounting of motor vehicle-related receipts and ensure these receipts are used only for the purposes allowed by the constitution. The unspent balance of street revenues should be accounted for separately along with future receipts.

- B. An annual maintenance plan for city streets has not been prepared. A formal maintenance plan should be prepared in conjunction with the annual fiscal budget and include a description of the streets to be worked on, the type of work to be performed, an estimate of the quantity and cost of materials needed, the dates such work could begin, the amount of labor required to perform the work, and other relevant information. The plan should be included in the budget message and be approved by the board. In addition, a public hearing should be held to obtain input from the city residents.

A formal maintenance plan would serve as a useful management tool and provide greater input into the overall budgeting process. Such a plan provides a means to continually and more effectively monitor and evaluate the progress made in the repair and maintenance of streets throughout the year.

**WE RECOMMEND** the Board of Aldermen:

- A. Establish a separate fund or accounting of the state motor vehicle-related revenues to ensure funds are spent in accordance with the Missouri Constitution.
- B. Prepare a formal maintenance plan for city streets at the beginning of the fiscal year and periodically update the plan throughout the year. In addition, the board should review the progress made in the repair and maintenance of streets to make appropriate decisions on future projects.

**AUDITEE'S RESPONSE**

- A. *We have not been tracking these expenditures, but we will begin to properly account for these expenditures.*
- B. *We have no plans at this time for street maintenance.*

|                                    |
|------------------------------------|
| <b>8. Municipal Court Division</b> |
|------------------------------------|

- A. We noted the following concerns relating to receipts:
- 1) Monthly formal bank reconciliations are not performed for the municipal division's bank account. Monthly bank reconciliations are necessary to ensure the bank account is in agreement with the accounting records and to detect errors on a timely basis.
  - 2) Receipts are not always deposited intact or timely and receipt slips are not always issued in numerical sequence. To adequately safeguard receipts and reduce the risk of loss or misuse of funds, deposits should be made intact daily or when accumulated receipts exceed \$100 and receipt slips should be issued in numerical sequence.

- B. Neither the police department nor the municipal court division adequately account for all traffic tickets and complaint forms issued and the ultimate disposition. In addition, complaint forms used are not prenumbered.

Without a proper accounting of the numerical sequence and ultimate disposition of complaint forms and traffic tickets, the police department and the municipal division cannot be assured all tickets and complaint forms issued are submitted to the court for processing.

Conditions similar to A. and B. were also noted in our prior report of the Holland Municipal Court Division for the two years ended December 31, 1997.

**WE RECOMMEND** the city of Holland Municipal Court Division:

- A.1. Prepare monthly bank reconciliations.
- 2. Deposit receipts intact daily or when accumulated receipts exceed \$100 and issue receipt slips in numerical sequence.
- B. Work with the police department to account for the numerical sequence and ultimate disposition of all traffic tickets and complaint forms assigned and issued.

**AUDITEE'S RESPONSE**

- A. *We will implement.*
- B. *We will maintain a complete ticket log and order prenumbered complaint forms.*

This report is intended for the information of the city's management and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

\* \* \* \* \*

THIRTY-FIRST JUDICIAL CIRCUIT

CITY OF BATTLEFIELD, MISSOURI

MUNICIPAL DIVISION

TWO YEARS ENDED JUNE 30, 1999

**From The Office Of State Auditor  
Claire McCaskill**

Report No. 2000-25  
April 19, 2000  
[www.auditor.state.mo.us](http://www.auditor.state.mo.us)

AUDIT REPORT

Office Of The  
State Auditor Of Missouri  
Claire McCaskill

April 2000

**During our audit of the Thirty-First Judicial Circuit, City of Battlefield, Missouri, Municipal Division, we identified the following problems.**

---

Cash receipts for fines, court costs, and bonds totaling at least \$11,524, were received and not deposited during the period July 1, 1995 through August 6, 1999. Some receipts were not properly recorded, court monies were not remitted to the city and state, and "adjustments" were periodically made so records would reconcile to bank statements, all of which helped to conceal the misappropriation of funds.

The misappropriations could have been prevented or detected on a more timely basis if adequate oversight and review had been performed and internal controls, as noted in the prior audit report had been established.

Earl Whitehead serves as the Municipal Judge of the City of Battlefield. Joy Sparkman was appointed Court Clerk in March 1995 and resigned in August 1999. She was responsible for receipting, recording, and depositing monies, preparing disbursements, and reconciling bank statements for the court account.

Prenumbered receipt slips are issued for monies received, and court monies are periodically deposited into a municipal court bank account. Receipt slips showing the mode of payment as cash were issued, but the cash was not deposited. Some receipts were not recorded on the ledger maintained by the former Court Clerk of receipts and checks and "adjustments" were periodically made so the balance would reconcile with the bank statement and help conceal the cash shortage. In addition, cases were omitted from the monthly report and deposit information was incorrectly reported on the monthly report to help conceal the shortage.

Information gathered during our review has been turned over to the Greene County Prosecuting Attorney and the Greene County Sheriff's Department.

The duties of receiving, recording, and depositing monies collected by the municipal division are not adequately segregated. The Court Clerk performs all of these duties. Neither the judge nor other personnel independent of the cash custody and record-keeping functions provide any supervision or review of the work performed by the Court Clerk.

(over)

YELLOW SHEET

We noted the following concerns during our review of the court's cash receipt procedures:

- Prenumbered receipt slips are not issued for all monies received.
- A receipt book containing the duplicate or carbon copy of 200 receipt slips written between August 1998 and May 1999, could not be located by the court. In addition, several case files could not be located.
- Receipt slips do not always indicate the method of payment (cash, checks, or money order). In addition, receipt slips are not reconciled to bank deposits.
- Receipts are not always deposited timely.

Monthly listings of open items were not always prepared by the former court clerk. While lists were prepared for some months, the lists were not complete and accurate. As a result, the municipal division cannot ensure the amounts held for open bonds and the amounts turned over to the city and the state each month are proper.

Neither the police department nor the municipal division maintains adequate records to account for the numerical sequence and ultimate disposition of all traffic tickets issued.

The municipal division allows defendants to make partial payments on fines and court costs. Cases with balances due are not maintained on a balance due docket or other summary listing which can be reviewed by the Municipal Judge on a periodic basis.

The Court Clerk is responsible for monthly disbursements of Crime Victims Compensation and Peace Officer Standards and Training Commission fees to the state; however, there were several instances when the state's portion of Crime Victims Compensation and Peace Officer Standards and Training Commission fees were not remitted on a timely basis.

## FINANCIAL SECTION

## State Auditor's Reports

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

**INDEPENDENT AUDITOR'S REPORT ON  
THE FINANCIAL STATEMENT**

Presiding Judge  
Thirty-First Judicial Circuit  
and  
Municipal Judge  
Battlefield, Missouri

We had planned to audit the accompanying special-purpose financial statement of the city of Battlefield Municipal Division of the Thirty-First Judicial Circuit as of and for the years ended June 30, 1999 and 1998, as identified in the table of contents. This special-purpose financial statement is the responsibility of the municipal division's management.

The accompanying special-purpose financial statement was prepared for the purpose of presenting the receipts, disbursements, and changes in cash of the city of Battlefield Municipal Division of the Thirty-First Judicial Circuit and is not intended to be a complete presentation of the financial position and results of operations of the municipal division.

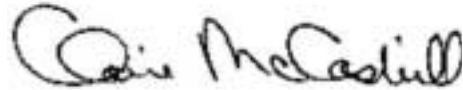

As a result of internal control weaknesses, inadequate records, and evidence of fraud, we were unable to satisfy ourselves by appropriate audit tests or other means as to receipts and disbursements of fines, court costs, and bonds for the years ended June 30, 1999 and 1998.

Because of the effects of the matters discussed in the preceding paragraph, the scope of our work was not sufficient to enable us to express, and we do not express, an opinion on the special-purpose financial statement of the city of Battlefield Municipal Division as of and for the years ended June 30, 1999 and 1998.

In accordance with Government Auditing Standards, we also have issued our report dated December 2, 1999, on our consideration of the municipal division's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grants.

The accompanying History, Organization, and Statistical Information is presented for informational purposes. This information was obtained from the municipal division's management and was not subjected to auditing procedures.

A handwritten signature in dark ink, appearing to read "Claire McCaskill". The signature is fluid and cursive, with the first name "Claire" written in a larger, more prominent script than the last name "McCaskill".

Claire McCaskill  
State Auditor

December 2, 1999 (fieldwork completion date)

The following auditors participated in the preparation of this report:

|                     |                      |

**Missouri State Auditor**

**INDEPENDENT AUDITOR'S REPORT ON COMPLIANCE  
AND ON INTERNAL CONTROL OVER FINANCIAL REPORTING**

Presiding Judge  
Thirty-First Judicial Circuit  
and  
Municipal Judge  
Battlefield, Missouri

We had planned to audit the special-purpose financial statement of the city of Battlefield Municipal Division of the Thirty-First Judicial Circuit as of and for the years ended June 30, 1999 and 1998, and have issued our report thereon dated December 2, 1999. In that report, we did not express an opinion on the special-purpose financial statement; as a result of internal control weaknesses, inadequate records, and evidence of fraud, we were unable to satisfy ourselves by appropriate audit tests or other means as to receipts and disbursements of fines, court costs, and bonds for the periods indicated above. However, we were able to perform certain procedures regarding the municipal division's compliance with legal provisions and internal control, and these procedures are discussed below.

Compliance

As part of our attempts to obtain reasonable assurance about whether the special-purpose financial statement of the city of Battlefield Municipal Division of the Thirty-First Judicial Circuit is free of material misstatement, we performed tests of the municipal division's compliance with certain provisions of laws, regulations, contracts, and grants, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our procedures, and accordingly, we do not express such an opinion. The results of our tests disclosed material instances of noncompliance that are required to be reported under Government Auditing Standards and which are presented in the accompanying Management Advisory Report. We also noted certain other instances of noncompliance which are presented in that report.

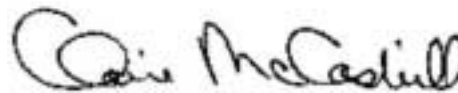

Internal Control Over Financial Reporting

In planning and performing our procedures related to the special-purpose financial statement of the city of Battlefield Municipal Division of the Thirty-First Judicial Circuit, we considered the municipal division's internal controls over financial reporting. Our consideration was performed in connection with our attempts to determine whether an opinion could be expressed on the special-purpose financial statement and not to provide assurance on the internal control over financial

reporting. However, we noted certain matters involving the internal control over financial reporting and its operation that we consider to be reportable conditions. Reportable conditions involve matters coming to our attention relating to significant deficiencies in the design or operation of the internal control over financial reporting that, in our judgement, could adversely affect the municipal division's ability to record, process, summarize, and report financial data consistent with the assertions of management in the special-purpose financial statement.

A material weakness is a condition in which the design or operation of one or more of the internal control components does not reduce to a relatively low level the risk that misstatements in amounts that would be material to the special-purpose financial statement may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions. Our consideration of the internal control over financial reporting would not necessarily disclose all matters in the internal control that might be reportable conditions and, accordingly, would not necessarily disclose all reportable conditions that are also considered to be material weaknesses. However, we noted certain matters involving the internal control over financial reporting and its operation that we consider to be material weaknesses, and these matters are presented in the accompanying Management Advisory Report.

This report is intended for the information of the management of the city of Battlefield Municipal Division of the Thirty-First Judicial Circuit and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

A handwritten signature in dark ink, appearing to read "Claire McCaskill". The signature is fluid and cursive, with the first name "Claire" being more prominent than the last name "McCaskill".

Claire McCaskill  
State Auditor

The accompanying Notes to the Financial Statement are an integral part of this statement.

## Notes to the Financial Statement

THIRTY-FIRST JUDICIAL CIRCUIT  
CITY OF BATTLEFIELD, MISSOURI  
MUNICIPAL DIVISION  
NOTES TO THE FINANCIAL STATEMENT

1. Summary of Significant Accounting Policies

A. Reporting Entity and Basis of Presentation

The accompanying special-purpose financial statement presents only selected data for the funds administered by the city of Battlefield Municipal Division of the Thirty-First Judicial Circuit of the state of Missouri.

Receipts, disbursements, and changes in cash are presented for the municipal division. The operating costs of the division are paid by the city of Battlefield and are not included in the financial statement.

The municipal division is responsible for cash bonds posted until case disposition allows appropriate disbursement. Bond monies relating to pending cases in the custody of the municipal division are included in the financial statement.

B. Basis of Accounting

The Statement of Receipts, Disbursements, and Changes in Cash is prepared on the cash basis of accounting; accordingly, amounts are recognized when they are received or disbursed. This basis of accounting differs from generally accepted accounting principles, which require revenues to be recognized when they become available and measurable or when they are earned and expenditures or expenses to be recognized when the related liabilities are incurred.

C. Fiscal Authority and Responsibility

The municipal division accounts for fines and court costs resulting from prosecution of violations of municipal ordinances before the municipal judge or received through the traffic violations bureau, as well as cash bonds posted. Municipal violations could include traffic offenses, both moving and nonmoving; parking offenses; and other violations for which amounts are received by the municipal division and remitted to the city treasury. The municipal division also may account for restitutions received and disbursed through the division.

2. Cash

Section 479.080, RSMo 1994, requires municipal divisions to deposit fines and court costs into the city treasury at least monthly. The division maintains a bank account into which fines, court costs, and bonds are deposited and later remitted to the city treasury.

At June 30, 1999 and 1998, the bank account balance reported for the city of Battlefield Municipal Division of the Thirty-First Judicial Circuit was entirely covered by federal depositary insurance.

3. Missing Funds

Fines, court costs, and bonds totaling at least \$7,874 which court records indicate were received by the municipal division but not deposited, are included in receipts and are presented as unaccountable disbursements on the financial statement for the years ended June 30, 1999 and 1998.

## MANAGEMENT ADVISORY REPORT SECTION

## Executive Summary

THIRTY-FIRST JUDICIAL CIRCUIT  
CITY OF BATTLEFIELD, MISSOURI  
MUNICIPAL DIVISION  
EXECUTIVE SUMMARY

Cash receipts for fines, court costs, and bonds totaling at least \$11,524, were received and not deposited during the period July 1, 1995 through August 6, 1999. Some receipts were not properly recorded, court monies were not remitted to the city and state, and “adjustments” were periodically made so records would reconcile to bank statements, all of which helped to conceal the misappropriation of funds.

The misappropriations could have been prevented or detected on a more timely basis if adequate oversight and review had been performed and internal controls, as noted in the prior Management Advisory Report (MAR) and repeated in the current MAR, had been established.

Earl Whitehead serves as the Municipal Judge of the city of Battlefield. Joy Sparkman was appointed Court Clerk in March 1995 and resigned in August 1999. She was responsible for depositing monies, preparing disbursements, and reconciling bank statements for the court account.

**Management Advisory Report -  
State Auditor's Current Recommendations**

THIRTY-FIRST JUDICIAL CIRCUIT  
CITY OF BATTLEFIELD, MISSOURI  
MUNICIPAL DIVISION  
MANAGEMENT ADVISORY REPORT-  
STATE AUDITOR'S CURRENT RECOMMENDATIONS

We had planned to audit the special-purpose financial statement of the city of Battlefield Municipal Division of the Thirty-First Judicial Circuit as of and for the years ended June 30, 1999, and 1998, and have issued our report thereon dated December 2, 1999. In that report, we did not express an opinion on the special-purpose financial statement; as a result of internal control weaknesses, inadequate records, and evidence of fraud, we were unable to satisfy ourselves by appropriate audit tests or other means as to receipts and disbursements of fines, court costs, and bonds for the period indicated above.

The following Management Advisory Report presents our findings and recommendations arising from our procedures related to the municipal division's special-purpose financial statement. During those procedures, we also identified certain management practices which we believe could be improved. Our procedures were not designed or intended to be a detailed study of every system, procedure, and transaction. Accordingly, the findings presented in the following report should not be considered as all-inclusive of areas where improvements may be needed.

|           |                      |
|-----------|----------------------|
| <b>1.</b> | <b>Missing Funds</b> |
|-----------|----------------------|

The city of Battlefield Municipal Division accepts cash, checks, and money orders for payment of fines, court costs, and bonds. The Court Clerk is responsible for the receipting, recording, and depositing of court monies. Prenumbered receipt slips are issued for monies received, and court monies are periodically deposited into a municipal court bank account.

Cash receipts totaling \$11,524 that were collected by the court from July 1, 1995, thru August 6, 1999 were not deposited into the municipal division bank account as shown below:

|                     | Period<br>July 1, 1999 to<br>August 6, 1999 | Year Ended June 30, |       |       |       |        |
|---------------------|---|---------------------|-------|-------|-------|--------|
|                     |   | 1999                | 1998  | 1997  | 1996  | Total  |
| Cash received       | 304   | 7,345               | 8,727 | 6,030 | 4,824 | 27,230 |
| Less cash deposited | 168   | 3,992               | 4,206 | 3,146 | 4,194 | 15,706 |
| Undeposited cash    | 136   | 3,353               | 4,521 | 2,884 | 630   | 11,524 |

Receipt slips showing the mode of payment as cash were issued, but the cash was not deposited. Some receipts were not recorded on the ledger maintained by the former Court Clerk, of receipts and checks and "adjustments" were periodically made so the balance would reconcile with the bank statement and help conceal the cash shortage. In addition, cases were omitted from the monthly report and deposit information was incorrectly reported on the monthly report to help conceal the shortage.

A receipt book containing the duplicate or carbon copy of 200 receipt slips written between August 1998 and May 1999 could not be located by the municipal division. Carbon copies of all

but 22 of these receipt slips were located in the case files; however, the missing 22 receipt slips could represent additional missing monies.

In addition, receipt slips totaling \$2,963 were written, but the method of payment was not indicated on the receipt slips. Because some or all of these receipts could have been cash receipts, additional cash may have been misappropriated.

These missing funds were not detected on a timely basis due to numerous internal control weaknesses, little or no independent review, and a lack of adequate record keeping.

Information gathered during our review has been turned over to the Greene County Prosecuting Attorney and the Greene County Sheriff's Department.

**WE RECOMMEND** the municipal division take the necessary action to recover the missing funds and work with law enforcement officials regarding any criminal prosecution.

### **AUDITEE'S RESPONSE**

*The Municipal Judge and Court Clerk responded:*

*We will take whatever action necessary to recover the missing funds and prosecute the person responsible.*

|  |
|--|
| <b>2. Accounting Controls and Procedures</b> |
|--|

- A. The duties of receiving, recording, and depositing monies collected by the municipal division are not adequately segregated. The Court Clerk performs all of these duties. Neither the Judge nor other personnel independent of the cash custody and record-keeping functions provide any supervision or review of the work performed by the Court Clerk.

To safeguard against possible loss or misuse of funds, internal controls should provide reasonable assurance that all transactions are accounted for properly and assets are adequately safeguarded. Since this is currently an office of one employee and proper segregation of duties cannot be achieved, at a minimum, there should be a documented independent comparison of receipt slips issued to amounts deposited and an independent review of bank statements and reconciliations. Any unusual items or discrepancies should be investigated.

- B. We noted the following concerns during our review of the court's cash receipt procedures:
1. Prenumbered receipt slips are not issued for all monies received. Receipt slips were not issued for payments of some fines and costs totaling approximately \$15,000. In addition, the original copies of voided receipt slips are not always retained. To properly account for all receipts and ensure all receipts are properly deposited, prenumbered receipt slips should be issued for all monies received and the numerical sequence of receipt slips should be accounted for properly. In

addition, copies of voided receipt slips should be properly defaced and maintained.

2. A receipt book containing the duplicate or carbon copy of 200 receipt slips written between August 1998 and May 1999, could not be located by the court. In addition, several case files could not be located. Retention of court records is necessary to properly account for all municipal monies received. Supreme Court Administrative Rule 8 requires that all financial records be maintained for five years or upon completion of an audit, and that all municipal ordinance case files be maintained for three years after the date of filing.
3. Receipt slips do not always indicate the method of payment (cash, checks, or money order). In addition, receipt slips are not reconciled to bank deposits. To adequately account for cash receipts and ensure all receipts are deposited, the method of payment should be indicated on the receipt slips, and the composition of receipt slips should be reconciled to the composition of bank deposits.
4. Receipts are not always deposited timely. Monies are usually deposited into the municipal division account approximately two to three times a month; however, during June 1999, there was only one deposit of \$2,326. To adequately safeguard receipts and reduce the risk of loss or misuse of funds, deposits should be made intact daily or when accumulated receipts exceed \$100.

- C. Monthly listings of open items were not always prepared by the former court clerk. While lists were prepared for some months, the lists were not complete and accurate. As a result, the municipal division cannot ensure the amounts held for open bonds and the amounts turned over to the city and the state each month are proper.

A monthly listing of open items is necessary to ensure accountability over open cases and to ensure monies held in trust by the municipal division are sufficient to meet liabilities.

- D. During our review we noted the following concerns related to bonds:

1. Police officers occasionally collect bond monies; however, these officers are not bonded. Failure to properly bond all persons with access to assets exposes the municipal division to risk of loss.
2. The police department does not issue official prenumbered receipt slips for all bond money received. In addition, the receipt slips issued are not issued in numerical order. To adequately account for all bond monies, official prenumbered receipt slips should be issued for all bonds received by the police department and the numerical sequence should be accounted for properly.

- E. Neither the police department nor the municipal division maintains adequate records to account for traffic tickets issued. The police department did maintain a copy of the tickets; however, the tickets were not in numerical order, nor did the tickets indicate the disposition. Without a proper accounting of numerical sequence and disposition of traffic tickets, the police department and the court cannot be assured that all traffic tickets issued were properly submitted to the court for processing. A log listing the traffic ticket, the date issued, and the violator's name would ensure all traffic tickets were properly submitted to

the court for processing, properly voided, or not prosecuted. A record of the ultimate disposition of each traffic ticket should also be maintained to ensure all traffic tickets have been accounted for properly.

- F. The municipal division allows defendants to make partial payments on fines and court costs. The Court Clerk maintains an accounts receivable ledger indicating the name, offense, case number, amount due, and any payments made. Some individuals with balances due were not included in the ledger, and the ledger was not always updated in a timely manner to reflect payments received. In addition, cases with balances due are not maintained on a balance due docket or other summary listing which can be reviewed by the Municipal Judge on a periodic basis.

Periodic supervisory review of balances due and adequate documentation of partial payments received are necessary to ensure that all amounts due are collected or that appropriate follow up action is taken.

- G. The Court Clerk is responsible for monthly disbursements of Crime Victims Compensation (CVC) and Peace Officer Standards and Training Commission (POSTC) fees to the state; however, there were several instances when the state's portion of CVC and POSTC fees were not remitted on a timely basis. In addition, four checks totaling \$675 written to the state for CVC fees during 1997 were never sent to the state. Section 595.045.5, RSMo Cumulative Supp. 1998, requires 95 percent of the CVC fee to be paid monthly to the state. POSTC fees should also be disbursed monthly to the state.
- H. The Municipal Judge and the Prosecuting Attorney do not initial or sign the case file to document their approval of an amendment or dismissal of a ticket. To ensure the proper disposition of all cases has been entered in the court records, the Municipal Judge or the Prosecuting Attorney should sign all amended and dismissed case files.

Conditions similar to parts B, C, and D.2. were also noted in our prior audit report.

**WE RECOMMEND** the municipal division:

- A. Adequately segregate the duties of receiving, recording, and depositing court receipts. At a minimum, establish a documented periodic review of municipal division records by an independent person.
- B.1. Issue receipt slips for all monies received and retain all copies of voided receipt slips.
  - 2. Ensure all records are properly retained in accordance with Supreme Court Administrative Rule 8.
  - 3. Indicate the method of payment on each receipt slip issued and reconcile the composition of receipt slips to bank deposits.
  - 4. Deposit receipts intact daily or when accumulated receipts exceed \$100.
- C. Prepare monthly listings of open items and reconcile the listing to the monies held in trust by the municipal division.

- D.1 Request the city consider obtaining bond coverage for all persons handling court monies.
- 2. Work with the police department to ensure prenumbered receipt slips are issued for all bonds received, and the numerical sequence of all receipt slips is accounted for properly.
- E. Work with the police department to ensure records are maintained to account for the numerical sequence and ultimate disposition of all traffic tickets issued.
- F. Establish a balance due docket or other summary listing which can be reviewed by the Municipal Judge on a periodic basis, and ensure adequate documentation is maintained of partial payments received.
- G. Disburse CVC and POSTC fees in accordance with state law.
- H. Require the Municipal Judge's or the Prosecuting Attorney's signature on amended and dismissed cases.

### **AUDITEE'S RESPONSE**

*The Municipal Judge and Court Clerk responded:*

- A. *We will work with the city to establish a better segregation of duties. In addition, I will review the bank reconciliation and the monthly report to ensure their accuracy. We will implement these procedures immediately.*

*B&C. These recommendations have been implemented.*

- D.1.*
- & 2. The police officers no longer collect bond money.*

- E. *We are currently maintaining a list of all ticket numbers and accounting for the numerical sequence of all tickets issued. We will continue to work closely with the police department to account for all tickets.*

- F. *We will begin preparing a monthly summary of cases with balances due and the activity associated with those cases. This will be implemented for the April 12, 2000 court date and will reflect activity for the last three months.*

- G. *CVC and POSTC fees are now being sent to the state on a monthly basis. We will request the \$675 from the city and pay this balance due to the State's CVC Fund. This will be implemented by July 1, 2000.*

- H. *This recommendation has been implemented.*

This report is intended for the information of the management of the city of Battlefield Municipal Division of the Thirty-First Judicial Circuit and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

## Follow-Up on State Auditor's Prior Recommendations

THIRTY-FIRST JUDICIAL CIRCUIT  
CITY OF BATTLEFIELD, MISSOURI  
MUNICIPAL DIVISION  
FOLLOW UP ON STATE AUDITOR'S PRIOR RECOMMENDATIONS

This section reports follow-up action taken by the city of Battlefield Municipal Division on recommendations made in the Management Advisory Report (MAR) of our report on the Thirty-First Judicial Circuit Municipal Divisions issued for the two years ended June 30, 1995. The prior recommendations which have not been implemented, but are considered significant, have been repeated in the current MAR.

City of Battlefield Municipal Division

- A.1. Receipts were not always deposited intact.
  - 2. The numerical sequence of receipt slips was not accounted for properly and the original copy of issued and voided receipt slips was not retained.
  - 3. Receipt slips were not issued for some monies received.
- B. Bond forms issued by the police department served as the receipt slip to the defendant; however, these bond forms were not prenumbered.
- C. Monthly listings of open items were not prepared.
- D. The court assessed the \$5 CVC fee, the \$2 LET fee, and the \$1 POSTC fee on cases dismissed by the court and on nonmoving traffic violations.

Recommendation:

The city of Battlefield Municipal Division:

- A.1. Deposit receipts intact and reconcile total receipt slips issued to bank deposits.
  - 2. Retain copies of issued or voided receipt slips.
  - 3. Issue prenumbered receipt slips for all monies received and account for the numerical sequence.
- B. Request the police department issue prenumbered receipt slips or bond forms for all bond monies received and account for the numerical sequence.
- C. Prepare monthly listing of open items (liabilities) and reconcile these listings to monies held in trust.
- D. Discontinue charging the \$5 CVC, \$2, LET, and \$1 POSTC fees on dismissed cases and nonmoving traffic violations, as required by state law.

Status:

A-C. Not implemented. See MAR No. 2.

D. Implemented.

## STATISTICAL SECTION

History, Organization, and  
Statistical Information

THIRTY-FIRST JUDICIAL CIRCUIT  
CITY OF BATTLEFIELD, MISSOURI  
MUNICIPAL DIVISION  
HISTORY, ORGANIZATION,  
AND STATISTICAL INFORMATION

The city of Battlefield Municipal Division is one of eight municipal divisions within the Thirty-First Judicial Circuit, which includes Greene county. The Honorable Henry W. Westbrooke, Jr. currently serves as Presiding Judge.

The municipal division is governed by Chapter 479, RSMo 1994, and by Supreme Court Rule No. 37 titled "Ordinance Violations and Traffic Violations Bureau (TVB)." Section 479.050, RSMo 1994, provides that each municipal division may establish a TVB in which fines and costs are collected at times other than during court and transmitted to the city treasury.

Operating Costs

The operating costs and court salaries of the municipal division are paid by the municipality.

Organization

The Court Clerk is responsible for recording transactions as well as handling collections and disbursements. Fines, court costs, and bonds are deposited into a court bank account and are transmitted by check to the city treasury and state periodically. Court is held once a month. A TVB has been established to receive payment of fines and court costs at times other than during court.

**AUDIT OF SEPARATION AND RETENTION CONTRACTS ENTERED INTO BY  
PUBLIC INSTITUTIONS OF HIGHER EDUCATION**

**From The Office Of State Auditor  
Claire McCaskill**

**Report No. 2000-24  
April 19, 2000**

*Some contracts placed the universities at risk for nonperformance or contained provisions that appeared excessive or unwarranted compared to similar contracts in Missouri.*

**PERFORMANCE AUDIT**

Office Of The  
State Auditor of Missouri  
Claire McCaskill

April 2000

**While most separation and retention contracts for departing college or university officials contained reasonable provisions, some contracts placed the universities at risk for nonperformance or contained other provisions that appeared excessive or unwarranted compared to similar contracts in Missouri.**

The State Auditor's Office audited separation and retention contracts for college and university officials who occupied the position of president, chancellor, vice president, or head coach of major sports. The purpose of the audit was to determine if colleges and universities were consistent in the types of contracts they entered into with these high-ranking officials. Additionally, our objective was to determine if college and university governing boards and regents properly considered their responsibilities to the institutions, students, and taxpayers when signing agreements with these departing officials.

We included all 13 Missouri (4-year degree) public institutions of higher education. We reviewed 14 contracts for departing officials at 7 of the universities during the period January 1995 through October 1999.

We concluded that most of the colleges and universities were consistent in the types of contracts they signed. Most were buyout contracts for uncompleted terms of existing contracts and these buyout contracts contained reasonable and similar provisions.

At Central Missouri State University (CMSU), a continuing employment contract subsequent to the president's resignation (worth over \$600,000) contains provisions that represent improper compensation and perquisites. These included:

- ☐ Contract language that favors the president in all disputes.
- ☐ An extended leave of absence without a stated purpose or required duties.
- ☐ Transfer of university property to the president and his wife.
- ☐ Unrestricted use of a university automobile and the right to purchase the vehicle at the end of the term for a substantial discount.
- ☐ Benefits for the president's wife who is not an employee of the university.
- ☐ Unrestricted use of the travel and expense budget.

Board officials at CMSU stated that the state of Missouri cannot attract and recruit top-level talent if it fails to recognize that the price for such talent is adequate compensation and proper reward. They stated that the ordinary prudent man might find the salary and benefits accorded the president generous, but the ordinary prudent man does not have the skills and capacities to successfully run and expand a multimillion-dollar enterprise. Instead, if fully informed, the prudent man would understand the Board's position that the benefits of retaining the president far outweigh the dollar costs. This perspective on compensation is pervasive throughout the contract provisions and is the justification for providing questionable benefits and compensation at taxpayers' expense.

At the University of Missouri-Columbia, (MU) a consulting contract worth \$500,000 with the former men's basketball coach does not contain adequate provisions to protect the university against nonperformance. There were no termination and penalty clauses. This contract also provides advance payments of up to 2 years for services not yet provided which put the university at risk if the coach does not perform his duties.

At Southeast Missouri State University (SEMO), an employment contract with the former president contains provisions for reimbursing reasonable and necessary expenses for the chancellor's spouse (who is not an employee) for travel when she participates in the event, unlimited reasonable and necessary travel expenses for the former president, and establishing residence in Ohio.

Since Boards of Governors and Regents have sole authority over compensation of university officials, these contracts demonstrate the need to exercise restraint in agreeing to terms that do not clearly state the duties to perform or may provide excessive or improper compensation or perquisites.

**CLAIRE C. McCASKILL**  
Missouri State Auditor

Honorable Mel Carnahan  
and  
Members of the General Assembly

We audited the separation and retention contracts for university and college officials in the position of president, chancellor, vice president, or head coach of major sports programs. The objective of the audit was to determine if university and college boards of governors and regents properly considered their fiduciary responsibilities to the universities, colleges, students, and taxpayers when signing agreements with these departing officials.

We concluded that most of the contracts we reviewed were properly entered into and contained reasonable provisions. However, for some contracts, we concluded that these contracts either did not contain proper clauses to protect the university or contained clauses that were extravagant or unreasonable.

A handwritten signature in black ink that reads "Claire McCaskill".

Claire McCaskill  
State Auditor

March 22, 2000 (fieldwork completion date)

The following auditors participated in the preparation of this report:

Director of Audits: William D. Miller, CIA  
Audit Manager: Gregory A. Slinkard, CPA, CIA  
Audit Staff: Dan Reeb

## **RESULTS**

### **Some Separation and Retention Contracts Entered into with College or University Officials Contained Provisions that Appeared Excessive Compared to Similar Contracts in Missouri**

Most termination and retention (post-employment) contracts for high-ranking officials of state-funded colleges or universities appeared reasonable and justified in regard to their intended purposes. However, we questioned certain provisions in some contracts reviewed because they included provisions that were not reasonable and/or they did not adequately protect the university from nonperformance.

We attributed the cause for these provisions to:

- ❑ The desire of institution officials to retain, in some capacity, the services of highly respected officials after their retirement from a position previously held with the institution.
- ❑ The relationships between the departing officials and the institutions allowed an element of trust to displace common contract provisions, influence contract negotiations, and, in one instance, provide benefits not seen in other contracts we reviewed.

These institutions are vulnerable to not receiving services contracted for and/or funds used for these contracts are not available for other purposes. In addition, these contracts could establish unfavorable precedents for future contracts.

### **Audit Procedure**

Recent separation and retention contracts with high-ranking administrators or head coaches of major sports programs of state-funded colleges and universities have raised concerns about the value of these contracts to the institutions, their students, and Missouri taxpayers. We focused the audit on termination/separation/consultant contracts or agreements entered into with outgoing officials in the position of president, chancellor, vice president or head coaches of major sports programs.

All 13 Missouri (4-year degree) public institutions of higher education were included in the audit that covered the period from January 1995 to October 1999. Seven of the 13 institutions provided 14 contracts for review. Officials at the remaining six institutions indicated that there were not any contracts or agreements with former officials within the scope of this audit.

### **Role of Governing Boards of Institutions of Higher Education**

In the state of Missouri, each state-funded college or university is under the general control and management of its governing board. By statute, the governing board of each individual state college or university has the power to appoint and remove the president and other employees of the college or university, assign their powers and duties, and fix their compensation. (*See Appendix IV, page 23, for applicable state statutes*).

The state of Missouri's decentralized approach of granting sole authority on employment matters to each state institution's governing board differs from some other states, including the state of Kansas. That state has a centralized state-level board of regents that has oversight responsibilities related to the employment policies of the individual state-funded universities and appoints and establishes the salary of the university president. Because there is no direct state oversight of the governing boards in Missouri, it is very important for the governing board of each college or university to exercise a high level of fiduciary responsibility to the institution, students, and taxpayers they serve.

### **Benchmarks Used in Evaluating the Contracts**

The Association of Governing Boards of Colleges and Universities (AGB) provides guidance for public and private college and university governing boards. AGB is a national organization providing university and college presidents, board chairs, and individual trustees of both public and private institutions with guidance needed to enhance their effectiveness. State higher education officials referred us to AGB as an organization where a governing board could obtain guidance in structuring professional services contracts for college or university officials.

AGB states that a governing board of a public college or university is held to a higher standard of decision-making than a private corporate board and few of the decisions are more closely scrutinized than executive compensation. In a 1994 survey, AGB found most contracts included provisions on salary and routine fringe benefits. We considered relevant information obtained from the AGB during the audit of these contracts. (*See Appendix V, page 24, for list of common provisions the AGB noted in presidential contracts.*)

In addition to relevant guidelines obtained from AGB, the common provisions found in the 14 contracts reviewed were considered in evaluating the individual contracts. (*See Appendix V, page 24, for list of common provisions we found in Missouri contracts.*)

### **Analysis of Contracts Reviewed**

During the review of the provisions in the 14 contracts provided, most appeared to be reasonable and justified. In 11 of the 14 contracts, none of the provisions appeared to be unreasonable. (*See Appendix III, page 22, for list of 14 contracts reviewed.*)

Five contracts were termination contracts that did not provide retention of services for the departing college or university official. In each instance, the applicable college or university paid the administrator or head coach the remainder of their contract, either in a lump sum amount

or by continuing monthly payments up to the expiration date of the contract. The payments represented a reasonable value for the remaining portion of the contract.

Nine contracts were separation contracts where the services of the retiring/resigning administrator or head coach were retained in some capacity. Of these nine contracts, five retained the official as a consultant, three provided for the official to resume the responsibilities of a tenured professor, and one provided for the official to remain in the employ of the university (in a tenured professor status for pay purposes), with his primary duties involving consulting and fund-raising services.

A discussion of three contracts with provisions that either did not protect the university from nonperformance, or contained provisions that were excessive in comparison to similar contracts in Missouri follows.

## **CONTRACT WITH FORMER PRESIDENT, CENTRAL MISSOURI STATE UNIVERSITY**

In December 1998, the Board of Governors of CMSU entered into a professional services contract with the president of the university, allowing him to resign as president effective August 1, 1999, and continue employment with the university performing various duties, including consulting and fund-raising. According to CMSU officials, the former president served as president of the university for 14 years prior to resigning.

The December 1998 contract replaced an employment contract entered into with the president in June 1998, in which he agreed to serve as university president for 3 additional years through June 30, 2001. According to university officials, the two primary purposes of the December 1998 contract were to maintain rapport with individuals who provide endowments to the university and to assist during the transition between university presidents.

The new contract covers the period from August 1, 1999 to November 1, 2002. The former president was allowed to take accumulated vacation leave from August 1, 1999 to November 1, 1999.

The December 2, 1998 termination and continuing employment contract contains provisions that could not be deemed reasonable or justifiable. The former president's duties in his new position appear to be substantially less than his duties as president of the university.

In discussions with the Board and in a subsequent memorandum, the Board presented their perspective on compensation for this president. They stated that the state of Missouri cannot attract and recruit top-level talent if it fails to recognize that the price for such talent is adequate compensation and proper reward. They stated that it is a public higher education industry standard to provide for adequate severance, as a way of assuring that the university president can devote his full energies to the institution and not have to worry during his employment about how he will provide for himself and his family after his obligations to the institution are satisfied.

The Board stated that at the time of the negotiations the Board consisted of six members, three of who were past chief executive officers of private corporations. With this composition they believed they were familiar with issues surrounding compensation of chief executive officers (CEO). They stated that the ordinary prudent man might find the salary and benefits accorded the president generous, but the ordinary prudent man does not have the skills and capacities to successfully run and expand a multimillion-dollar enterprise. Instead, if fully informed, the prudent man would understand the Board's position that the benefits of retaining the president far outweigh the dollar costs. This perspective on compensation is pervasive throughout the contract provisions and is the cause for providing questionable benefits and compensation at taxpayers' expense.

## Contract Interpretation and Disputes

A provision of the contract states the contract is to be liberally construed and to the benefit and favor of the former president. A provision similar to this was not found in any of the other Missouri contracts reviewed. This provision puts the university at a disadvantage if disagreements were to arise over the interpretation of any of the contract provisions. For example, this provision would favor the former president if there were any disagreements regarding whether the former president and his spouse were entitled to an annual travel and entertainment expense allowance.

|  |
|--|
| Contract<br>favors<br>President in<br>disputes |
|--|

University officials initially said the “liberally construed” provision was to cover unintended omissions from the merging of the president’s June 22, 1998 employment contract into the December 2, 1998 termination and continuing employment contract. However, the officials conceded the provision applied to the entire December 1998 contract. In response to our inquiry about this provision, the Board stated, “if omitting this language would lessen the concerns of the State Auditor, the president and the Board would likely mutually agree to strike it.” This provision should not have been a part of this contract and it should be stricken because it is not proper, not because it would lessen the concerns of the State Auditor.

## Leave of Absence

The contract provided that beginning November 2, 1999, the former president would be allowed to take a 1-year paid leave of absence at his current salary rate then in force and including all other employment benefits. Although CMSU officials indicated the former president would likely be involved in activities benefiting the university during this period, he is under no legal obligation to perform any services during this 12-month period.

The purpose of the leave of absence is not disclosed in the contract provisions. Several of the contracts from other institutions included in our review include provisions allowing a paid leave of absence before the retained services were to begin. However, all of these other contracts contain a provision explaining the purpose for the leave of absence (e.g. to allow the administrator to prepare for resuming a professorship).

CMSU officials indicated this paid leave of absence dates back to a 1990 contract which included a provision stating “In the event of voluntary separation from the presidency, the President will be entitled to severance leave with 1-month’s compensation for each year of service up to a maximum of 1-year’s (12 months) salary, at the then current salary, contingent upon continued employment with the institution in another capacity.” All employment contracts with the former president since 1990 had similar provisions, including the June 1998 employment contract. When compared to contracts from other institutions,

this leave of absence (severance) provision is overly generous since we did not note a similar provision in any of the other contracts reviewed.

According to information provided by CMSU officials, the total salary and benefit costs related to this 1-year leave of absence are in excess of \$330,000.

### **Transfer of Property and Equipment**

The contract grants the former president ownership of university-owned personal property upon severance from the university—a benefit also given to his spouse in the event of his death. The personal property includes a notebook computer, which is to be upgraded annually; all office equipment machinery, including computers and printers; and telephone equipment in use in his university office or the president’s private residence as of the date of the contract; and all cell phones in possession or use by the president, including the car phone.

President  
retains  
university  
property

State regulation 15 CSR 40-2.031 requires that all personal property obtained or controlled by a state institution, whether obtained by purchase, donation, or other means, are to be used for state business and not for personal benefit. Equipment valued above \$1,000 is tracked as inventory.

University officials said they allowed the equipment to be transferred as personal property to the president and his wife because they believed that the equipment would not have any value by the time the contract expired. According to the Board, these items were not to be construed as gifts, but that with the passage of time they would ultimately become “used up”. Since the notebook computer will be upgraded annually it is reasonable to assume that it would have market value. University officials also indicated that while other institutions of higher education may not include provisions of this nature in similar contracts, they contended that the granting of property items of this nature to top administrators upon their retirement is a common practice of colleges and universities in this state. Regardless of whether this is accurate, this does not justify the university’s actions in this matter.

### **Use of Automobile**

The president was given unrestricted use of the current automobile he was driving as university president, including maintenance, fuel and lubricants, even during the first year when he is on the paid leave of absence. The president was also given the option to replace the automobile with a new model equivalent before the expiration of the contract. Upon the president’s retirement, or surrender of employment, he, or his wife in the case of his death, will be allowed to purchase the automobile from the Board for the price of the original acquisition cost, minus the sum of \$1,000 per month for each month the automobile was placed in use. Based on this provision, if a new automobile were to be purchased for \$40,000, as was the current vehicle, and provided to the former president for

President can  
purchase  
university car  
at discount

his use for 3 years before his retirement, it could be subsequently purchased by him upon retirement for \$4,000 (\$40,000 minus \$1,000 X 36 months). In our opinion, this is not a reasonable provision and represents additional compensation.

Use of an automobile is a common benefit afforded top officials at a college or university. Consistent procedures and safeguards are necessary when dealing with university provided fixed assets. It is questionable whether this benefit should have been continued for the president in his new role, particularly since there are no requirements for the president to perform any duties during the leave of absence. Furthermore, in our opinion, it is not reasonable or prudent to allow the president or his wife to purchase the automobile at a substantial discount.

### **Entertainment Expenses**

The president and his wife were provided an entertainment and travel expense fund totaling \$76,968 for the first year under the contract, which was the president's 1-year leave of absence. This amount included \$19,350 for entertainment and special expenses and \$26,650 for travel by his spouse. The remainder was a "gross up" of 48 percent for tax equalization purposes and to take into account joint tax liabilities.

|  |
|--|
| President's<br>spouse<br>receives travel<br>expenses |
|--|

University officials said \$76,968 is provided to allow the president and his spouse to carry out the fund-raising activities expected of them. It was further stated that the president's new position has an additional travel budget for the occasions when the Board would direct him to travel.

It is unclear why the Board believes such funds are necessary during a period of time in which the former president has no required duties. There are no requirements for the funds to be used for business purposes. Nor are there any requirements for the president to account for the use of these funds. According to the Board, the travel and entertainment provisions are payable on a 1-time only basis and are to be spread over the 3-year contract period. The Board stated that they assume, and the president and his wife have assured them, that the funds will be used for university purposes. While it is assumed the funds would be used as the university intended, there were no procedures or contractual safeguards to ensure the funds were used as intended. The lack of accountability for the use of university funds is not reasonable and cannot be justified. Since the spouse was not an employee of the university, is not a party to the contract, and has no official duties, it is not reasonable to conclude that paying her travel expenses is in the best interests of the taxpayers. The Board believes that the president's wife is an integral part of a team and that the expenses are justified.

|   |
|---|
| No<br>requirement to<br>use travel<br>funds for<br>business |
|---|

### **Physical Examinations**

The contract provides for an annual physical examination for both the president and his wife. Additionally, although not stated in the contract, the physical examinations are to be provided by the Mayo Clinic in Rochester, Minnesota. Considering the cost of transportation and the inclusion of the spouse in this benefit, we believe this contract provision is not reasonable or prudent. CMSU officials estimated that the cost of the physical examination for the president under this contract in calendar year 2000 was \$2,000. This amount includes \$579 in travel expenses. In 1999, his expenses were \$2,800, which included \$1,053 for use of the university airplane. Although the contract provided the benefit to the spouse, she opted to pay her own expenses in 2000. This benefit is far more generous than the health benefits provided to faculty and employees of the university.

Physical  
exams at  
Mayo Clinic

There are other contract provisions ranging from investments, life insurance, and benefits for the spouse, including legal expenses, that are equally questionable. Since the spouse is not an employee of the institution, all of the benefits bestowed to her are not reasonable. These provisions are not typical of provisions found in most other State of Missouri contracts. According to information provided by CMSU, the cost of salary and benefits for the last 3 years of the new contract total over \$620,000.

Should spouse  
receive  
benefits?

### **CMSU Response**

*We, the current members of the Board of Governors of Central Missouri State University, read your judgments and characterizations of our actions in the matter of the former president's contract with a great deal of disappointment. We would like to correct several statements made in the draft which we believe are factually incorrect and to make some additional comments.*

*The audit report states, "The Board stated that they assumed that the President and his wife had assured that the funds will be used for University purposes... The lack of accountability for the use of University funds is unreasonable and cannot be justified". Additional criticism is implied or stated throughout the document because the Board relied on representations made by the former president, without further written contractual protections. Since we have relied on the former president to manage a multi-million dollar enterprise for us for over 14 years without incident it would be reasonable for us to believe that we could trust him to manage his travel and entertainment allowance. While serving as president, he had unilateral signature authority over many thousands of dollars. Should the Board now be faulted for placing their faith in a man who for 14 years demonstrated his integrity by impeccably serving the best interests of the institution?*

*We would like the general public to know and understand that as an informed Board, we have always tried our utmost to act in the best interests of the University, the students, and the taxpayers of Missouri. We believe that every aspect of this contract, while it may personally benefit the president, also has a tangible benefit to the University, our students, and the taxpayers.*

*The former president's services are worth something, although the State Auditor may disagree with us as to exactly how much. It cannot be denied, however, that if the former president were to have left this University, he could have applied his fund-raising talents to the benefit of another institution, and could have received a handsome salary for such employment. In the private sector, to prevent such a thing from occurring, a valued departing CEO would be paid a severance in exchange for a covenant not to compete so that a talent as special as the former president's could not be recruited by the competition to benefit from his expertise, monetary philanthropic connections, and beneficial relationships cultivated over 14 years.*

*It cannot be disputed that the former president, working as a team with his wife, was instrumental in raising in excess of \$20 million for the foundation over the last 14 years. It is also true that the former president's wife is neither an employee nor a party to the contract at issue, nor does she have official duties, but she has also, undeniably, played a large part in raising these millions. As an alumna of the institution, in her own right she has many contacts and knows many friends of the University; her unique and special qualities have opened many doors for the University.*

*We believe the Auditor's conclusion that to provide the former president with funds to pay his wife's travel expenses is not in the best interests of the taxpayers is both erroneous and shortsighted, and is contrary to Rule 11 of the state travel regulations which permit payment of travel expenses to spouses and non-employees. (We refer to the State of Missouri Travel Regulations issued by the Office of Administration, which state at Rule 11: "State employees and officials may be reimbursed for travel expenses incurred for other employees or non-employees provided that the business reason necessary for doing so is indicated... Reimbursement for spouse expenses at an official business function requires a written justification pre-approved by the Commissioner of Administration. In our case, we believe that the Rule would imply Board approval should be sought, which is specifically why the former president's wife is mentioned in the contract). **STATE AUDITOR'S NOTE:** Information provided to the state auditor by the Office of Administration indicates pre-approval of spousal expenses pursuant to 1 CSR 10-11.010(11) has been limited to relocation expenses with only a few exceptions during the last 20 years.*

*The Auditor's application of this unwarranted negative judgmental standard also fails to acknowledge the general presumption that a professional fundraiser of the sort that the former president could be, outside of the University, would usually be accompanied by his spouse, particularly when she can add a level of comfort to female donors and prospects. Further, a professional fundraiser would be customarily accorded telephones, office staff, transportation, and other perquisites to accomplish the task at hand. Under established audit standards, including those applied by our outside auditors, the firm of Deloitte & Touche, all these costs of fund raising are considered reasonable valid expenses of the University, despite the fact that the State Auditor has seemingly applied a contrary audit judgment and ignores the state's own rules.*

*The State Auditor, we believe, has disparately devoted more subjective judgmental criticism to CMSU's contract than it has to other similar documents analyzed in the audit.*

*For example, the former president served the University for 14 years, and was given a 3-year contract with an approximate value of \$620,000. After only 3 years of service, SEMO created the position of Chancellor and then awarded its new Chancellor a 3-year contract with a value in excess of \$700,000. Yet, the Auditor devotes more than five pages of criticism to CMSU, while SEMO, with a very similar contract, receives less than one page! Given the State Auditor's public negative judgments rendered against CMSU in the press, even before this report was completed, we feared we would not be treated objectively. We resent the fact that we have already been portrayed by the Auditor in the press as acting in an "unbelievable" fashion. However, we understand that this matter has become a political football, which is being tossed about to appease an influential member of the Senate. It is highly inappropriate for elected officials to harm CMSU in their quest to elevate their political careers or to settle personal grudges.*

*Benefits extended long term to the former president by this Board and prior Boards have been characterized as "questionable," "not reasonable," "overly generous since we did not notice similar provisions in any of the other contracts reviewed," and other such negative terms. It would seem that the Auditor has, in some seven plus pages of specific and general criticism, unilaterally and subjectively overridden and superimposed her judgment on more than a decade of careful judgments, negotiations, considerations, and formal actions of Central Missouri State University's Board of Governors/Regents. The fact that the Board has provided benefits to its president that other institutions have not, does not in and of itself make these benefits unreasonable, questionable, or overly generous. Each Board of Governors, by statute, has the legal right and authority to "fix the duration, terms and conditions... and compensation" of the University president, and we think it inappropriate to judge the legitimate exercise of our statutory powers on the measuring stick of what other University Boards have done.*

*In short, we feel that the hindsight and subjective criticism meted out to the Board of Governors for its good-faith efforts to maintain the goodwill and talents of our former president, is unfair and unwarranted, particularly when, as we shared with you, we want and need our new president to have the time to adjust to his new role and local community, and to concentrate on particular internal matters. By entering into the contract with the former president, we felt we would not lose past goodwill, our international programs could continue to flourish, our participation in charter schools could progress, beneficial philanthropic relationships could be developed and maintained, and we could call on him to provide historical information, assistance and guidance to us on other matters. We tried to balance what is important to the institution with the benefits that derived from maintaining the former president's presence at the University, and we still believe these benefits far outweigh the cost. After the next 3 years, the bottom line will prove whether or not this contract was indeed reasonable, prudent, and the best interests of the University, taxpayers, and students. We have full faith that the results will be positive and valuable for Central Missouri State University and the citizens of Missouri.*

## **CONTRACT WITH FORMER COACH, UNIVERSITY OF MISSOURI (MU)**

In April 1999, a separation and consulting contract was entered into between MU and the men's head basketball coach. According to MU officials, this individual served as head basketball coach for 32 years. The contract called for this individual to resign as head basketball coach effective April 1, 1999, and to retire as a university employee in July 1999. The contract further provided that the coach would be retained as a consultant for the university for the period from July 1999 to June 2003. The coach would no longer be an employee of the university but would operate as an independent contractor.

The contract provided for payments totaling \$945,000 to the coach. This amount included payments related to his employment contract, including \$100,000 for the relinquishment of his right to operate a basketball camp, \$195,000 for the relinquishment of some contractual annuity payments, and \$150,000 for the relinquishment of his rights related to a shoe endorsement contract. In addition, the total payments included an annual fee of \$125,000 for the consulting services, or a total of \$500,000 in consulting fees during the 4 years of the agreement. The coach is entitled to an additional annual payment of \$72,360 for health and dental benefits and pension from the university retirement system

MU officials indicated that while the duties related to the consulting services are not well defined, the coach would serve primarily as a fund-raiser for the university. Those officials indicated it is envisioned that the coach will be very involved in raising funds for cancer research and treatment and help MU develop Ellis Fischel hospital into a premier cancer center, offering comprehensive cancer treatment services. They also indicated he would likely be involved in other fund-raising efforts, including those involving the athletic department. Those officials stated that the activities of the coach have been relatively unstructured during the first year of the consulting contract; however, they indicated the activities of the coach would likely be more structured in the future.

### **Contractual Safeguards**

The contract does not contain any contractual safeguards to protect the university's interests and to ensure that services would be provided. The contract lacks a termination clause and penalties if the coach does not perform under the contract.

|  |
|--|
| Lack of<br>termination<br>and penalty<br>clauses |
|--|

University officials stated that if the university did not receive the services contracted for they would sue for breach of contract, which would stop any payments under the contract and allow for recovery of any funds paid out for services not performed.

The performance provisions in the contract are sufficiently vague to allow the chancellor to assign duties to the coach as needed. Since these provisions are vague, a lawsuit for nonperformance might not be successful. In our opinion, the university's chances for winning a lawsuit for breach of contract would substantially improve if there had been a

termination or nonperformance clause in the contract. In such instances, the university would be a defendant rather than a plaintiff, which would then shift the burden of proof in the lawsuit from the university to the coach.

Termination clauses are common in consulting contracts and help provide adequate protection to the university in the event of nonperformance.

### **Advance Payments**

A provision in the contract entitles the coach to a consulting fee of \$125,000 paid in advance (during the first 10 days of July) during each year of the contract. The contract also provides that the coach has the option to receive the fees for the last 2 years of his consulting contract at the beginning of the third year of the 4-year contract. University officials said the coach negotiated the advance payments into the contract and they believed the university's acceptance of this provision resulted in a lower overall cost of the contract. Furthermore, general counsel for the university said if services were not performed the University could sue for breach of contract and recover any funds paid out for services not performed.

|   |
|---|
| Coach to be<br>paid in<br>advance for<br>services |
|---|

As a general practice, most consulting contracts do not provide for full payment until service is performed. In our opinion, this contract provision does not provide a proper safeguard for the university if there is nonperformance. Using the court system to resolve a contract dispute can be costly and would not be necessary if the payments had not been made in advance.

### **MU Response**

*In view of the coach's remarkable 32-year career with the University of Missouri, his outstanding performance, and his proven reliability and trustworthiness, nonperformance and termination clauses, in the judgment of legal counsel, were deemed unnecessary and inappropriate. Performance provisions in the contract were left sufficiently flexible to enable the chancellor to capitalize on unforeseen development opportunities involving the coach. In the unlikely event that terms of the contract are not fulfilled, the University still has available to it sufficient legal avenues to seek redress.*

*The University is confident that the coach will continue to fulfill his obligations to the University of Missouri-Columbia in a satisfactory manner.*

## **CONTRACT WITH FORMER PRESIDENT, SOUTHEAST MISSOURI STATE UNIVERSITY (SEMO)**

On July 1, 1999, the Board of Regents for SEMO entered into a new contract with the then sitting president of the university. The new contract established the position of chancellor and called for the president to assume duties as chancellor (reporting to a new president of SEMO). This contract provides the chancellor an annual salary and annuity benefits of \$95,000 and \$23,000, respectively, for the period from July 1, 1999 to June 30, 2001. He is also entitled to the other fringe benefits offered to faculty members of that institution and he is provided a vehicle owned by the University foundation (a private entity with a separate board of governors) for business uses. The chancellor's contract is automatically renewable on an annual basis. The primary responsibilities of the chancellor are to raise funds for the university and to oversee development of a major campus addition to be built on land donated to the university. Unlike the other two contracts discussed in this report, there were termination clauses in the contract that would provide for removing the chancellor for nonperformance.

### **Residence**

According to the president, the chancellor had decided to move back to Ohio when he made his decision to resign from the presidency. In order for SEMO to continue benefiting from his abilities to raise funds, lobby the U.S. Congress, and work with federal organizations they agreed to the relocation. The SEMO Board of Regents contends that the location of the chancellor's primary residence is not important in the success of performing his duties and believes the results related to this contract have been very effective thus far. According to the president, the chancellor has been involved in raising about \$3 million this year for the university, with other donations/funding pending of over \$18 million for fiscal year 2001.

Distant  
location

In our opinion, the distant location, out of state, for a current employee of the university to perform duties that could be performed on campus gives the impression that the chancellor is irreplaceable and more valuable than other university employees who would not be afforded the same opportunity. It also creates some additional costs for the university. These would include travel expenses between the remote location and the university—expenses that would not be incurred if the chancellor had stayed on campus. This travel would occur approximately 12 times per year.

### **Travel and Entertainment Expenses**

The contract does not list specific dollar amounts for travel and entertainment expenses but requires reimbursement of reasonable and necessary expenses incurred in the performance of his duties as approved by the university. The contract does not place any limits on the maximum amount of expenses. The SEMO Board of Regents indicated the contract did not

specifically include a limit on the expenses because at the time the contract was entered into, the university did not have a good estimate of what those expenses might be. However, the current president indicated an annual budget has been established in the amount of \$25,000 from university funds and \$5,000 from foundation funds to monitor and control the level of these expenses. In addition, although not specified in the contract, the chancellor is required to submit documentation to support any expenses claimed and that documentation is reviewed and approved by the president prior to any reimbursement payments. These internal controls help in managing the contract but would have been better placed as a contract provision.

Among the listed acceptable expenses are country club fees and travel and entertainment expenses for his spouse when she is participating in the event involved. According to the current president, the country club fees are paid by the foundation and are not paid from taxpayer or other university funds. He stated that belonging to such an organization is an effective means of obtaining donations for the university and reducing the overall tuition costs of the students. Regarding the country club dues, it is not relevant that the foundation is paying for them. The university is obligated through the contract to pay for the dues since the foundation is not a party to the contract.

The president also indicated that in the higher education environment, the involvement of a spouse in fund-raising efforts can be very beneficial and that has been the case in certain instances involving the chancellor's spouse. The president stated that the chancellor's wife does not routinely travel with him, but if she does travel and it does not benefit the university, her expenses are not reimbursed. We remain of the opinion that since she is not an employee and not a party to the contract, she should not be paid travel expense.

## **SEMO Response**

### **Residence**

*On May 18, 1999, the Board of Regents received the resignation from the President of the University due to personal reasons. Since the President was just completing the first year of a 3-year contract, this resignation created several problems for the University.*

- 1. The President was given a 3-year contract because the following major initiatives at the University would be undertaken during that 3-year period:*

*The development of the Polytechnic Institute and the construction of the \$8 million Polytechnic building. This is the major expansion of our technical education program which is identified in the Statewide Post-Secondary Technical Education Plan and our Mission enhancement efforts approved by the Coordinating Board for Higher Education and funded by the Governor and General Assembly. Funding for the building will be 80% State and 20% University with private and Federal funding for equipping the laboratories.*

*The development of the \$36 million River Campus facility which will house the School for the Visual and Performing Arts. This facility requires renovation of 50,000 square feet of an historic building and the addition of 100,000 square feet of new facilities to accommodate the academic programs, performing center, and regional museum. Funding for this project will be approximately 50% State, 25% City, and 25% University.*

*A \$25+ million capital campaign was initiated to raise private funding for the River Campus (\$12 million), the Polytechnic building and equipment (\$3 million), and other projects such as scholarships, athletic facilities, and facility enhancements.*

- 2. The Provost (Chief Academic Officer) resigned to take the position of President at the University of North Dakota.*
- 3. Two vacancies in the University Advancement area had occurred or were eminent which would negatively impact the success of the capital campaign, thus negatively impacting the Polytechnic Institute and River Campus projects.*

*A President's leadership and fundraising efforts are vital to successful initiatives and capital campaigns. Major changes to the executive leadership can cause major donors to reconsider their financial support and major initiatives to lose momentum or fail completely. Consequently the Board of Regents had to determine in short order what actions to take to fill the President's position, and to plan for the successful continuation of the \$25 million capital campaign and completion of the Polytechnic and River Campus projects.*

*The Board decided to promote the Executive Vice president (eight years at the University) and employ the resigning President as the Chancellor for the Development of the River Campus and Polytechnic Institute due to his cultivation of private, corporate, and Foundation donors. The base salary of the President was reduced from \$138,250 to \$95,000, and the contract stipulated that the Chancellor could reside in Ohio which was the only terms on which the Chancellor would agree. This would not be a deterrent to responsibilities for the Chancellor since major and potential contributors to the University are located in Florida, Texas, Arizona, California, New York, Ohio, and Illinois as well as in Missouri, and since travel to Washington D.C. was necessary to work with Federal departments and the Missouri delegation to Congress to obtain Federal grants and appropriations. If the Chancellor had resided in Missouri, he would have had to do extensive traveling from the campus.*

*The Board of Regents believes it has fulfilled its fiduciary responsibilities and that the Chancellor's contract was in the best interests of the University, the students, and the taxpayers. There are adequate provisions to monitor the progress of the Chancellor and terminate the contract if performance is not adequate. As mentioned in the report, the Chancellor has been very successful raising funds to date (\$3 million) and the next year looks even better (\$18 million).*

#### *Travel and Entertainment*

*The University agrees that the current contract does allow for the reimbursement of expenses provided by the Foundation and that the University could then be liable if the Foundation does not provide for those expenses. Consequently, the Chancellor's contract will be amended to remove such expense provisions.*

*University policy and procedures provide that all employees may get reimbursed for reasonable and necessary expenses. Since the Chancellor is a University employee, the contract provision regarding reasonable and necessary expenses was probably not needed.*

*All employees and departments are restricted by budgets established by the University. We believe that the established budget limits and the regular University approval process as noted in the report provides prudent budgetary controls and use of funds and do not put the University at risk.*

## **Governing Boards and University Officials Placed Undue Reliance on Trust as an Element of Negotiations.**

A major theme in the contracts discussed in this report relates to the retention of services of key individuals to serve their respective universities in some capacity with salaries and perquisites commensurate to CEOs in the private sector. Meanwhile these corporate type packages lack the basic safeguard protections that a business contract would require. In many cases, these contracts did not have specific duties assigned to the official, did not have nonperformance provisions such as termination clauses, and did not set limits on expenses or require the official to account for expenses.

All of the contracts were silent as to whether they were publicly or privately funded. Our audit determined that all of the contracts were funded with public funds with the exception of three provisions in two contracts. The use of automobiles at CMSU and SEMO and the payment of country club dues at SEMO were privately funded from the foundations that support those universities.

In our opinion, the past services the former president provided to CMSU and the high regard the Board had for this individual had an undue influence on the negotiations related to the new contract and the awarding of benefits not seen in other contracts.

While the Board may trust that the president and his wife will use the funds in a way beneficial to the university, the contract does not require this and, according to the liberal interpretation clause, any dispute over the matter could be found in favor of the president.

As justification for the Board decisions on these benefits, the Board cited a publication from the American Association of State Colleges and Universities called Board and President: Facilitating the Relationship. According to this publication, “The Board assures the president that it recognizes the high risk, total immersion nature of the position, and from the outset of the relationship, the Board provides a graceful way out of the position and into a next career move without fear of financial debilitation. If the president has a spouse the Board determines what role if any the spouse is to have.” Our concern with this approach is that it lacks balance. In our opinion, the Board must be cautious in interpreting the provisions of this publication to ensure that “next career” transition assurances do not include unnecessary expenses and perquisites that are funded by the taxpayers.

This contract also raises concerns about compliance with the Missouri Constitution. The granting of university-owned property to the former president upon his retirement and providing various benefits to his spouse may violate Article III, Section 38(a) of the Missouri Constitution, which prohibits the granting of public funds to private individuals. In addition, it appears the extent of the compensation package provided in this contract may have, at least in part, been given to the former president for past services to the university. If so, this may violate Article III, Section 39(3) of the Missouri Constitution, which prohibits the granting of extra compensation after the

services have been provided. The Board believes that there would not be a violation of the constitution because they do not consider any of the compensation and benefits as remuneration for past services, gifts, or extra compensation. Our concern is that many of the provisions of the contract are provisions from prior employment contracts that carried more responsibilities than the current contract.

According to university officials from CMSU and MU, they trusted the officials to perform the duties they expected even when there were no provisions in the contracts to ensure the duties would be performed.

It is our opinion; the lack of termination and penalty clauses in the MU contract that were discussed earlier in the report were not built into the MU contract because the representatives of the governing board trusted that the coach would perform as intended by the university.

At SEMO, there were termination clauses in the contract that would provide for removing the chancellor for nonperformance. However, although there were internal controls to ensure expenses were proper, these internal controls were not a part of the contract and that could put the university at risk if there were disputes over expenses. The university president stated that since the chancellor is an employee of the university, normal university policies would apply.

## **Conclusion**

We concluded that the majority of separation and retention contracts for the officials included in the scope of our audit were entered into properly. The contracts identified in this report as exceptions demonstrate the need for governing boards to closely adhere to their fiduciary responsibilities for the universities, students, and taxpayers. Regardless of how well the officials under contract perform; there are (i) vulnerabilities built into those contracts that could have been avoided, (ii) benefits that should not have been provided, (iii) additional costs that did not have to be incurred, and (iv) failures to delineate with sufficient specificity the duties to be performed. Since the boards of governors and regents in the State of Missouri have sole responsibility for their respective universities, it is incumbent upon them to ensure that only reasonable compensation and perquisites are granted to departing officials who are retained for other duties.

## **APPENDIX I**

### **OBJECTIVE, SCOPE AND METHODOLOGY**

#### **Objective**

The purpose of the audit was to determine if colleges and universities were consistent in the types of contracts they entered into with presidents, chancellors, vice presidents, or head coaches. Additionally, our objective was to determine if college and university governing boards and regents properly considered their responsibilities to the institutions, students, and taxpayers when signing agreements with these departing officials.

#### **Scope and Methodology**

We requested separation/ termination/consulting contracts from all 13 Missouri (4-year degree) public institutions of higher education. Seven of the 13 institutions responded by sending a total of 14 contracts falling within the audit criteria. The remaining six institutions indicated they did not have any contracts or agreements that met the audit criteria.

We reviewed past state audits of public colleges or universities in Missouri, all applicable Missouri state statutes and the Missouri constitution to determine what authority the board of governors of these institutions have to enter into such contracts and what authority or oversight the state of Missouri has in the matter.

Once the contracts were received, they were reviewed and all key provisions were scheduled. A benchmark of provisions expected to be found in a professional services contract for a high-ranking college or university official was established using information obtained from the AGB and from a review of the 14 Missouri contracts.

The benchmark provisions and general contract management practices were used to distinguish between contract provisions that appeared to be standard practice and contract provisions that appeared to differ from standard practices. Those contracts with questionable provisions were subjected to further review. We interviewed members of the governing boards and/or high-ranking university officials to determine their rationale for entering into the contracts we questioned.

The audit was made in accordance with applicable generally accepted government auditing standards and included such tests of the procedures and records as were deemed appropriate under the circumstances.

## APPENDIX II

### **LIST OF COLLEGES AND UNIVERSITIES CONTACTED**

In September 1999, we sent a letter to the 13 Missouri (4-year degree) public institutions of higher education requesting any termination/separation/consulting contracts or agreements the institution had entered into since January 1, 1995, with top outgoing officials of the institution, including the positions of president, chancellor, vice president and head coaches of major sports programs. The following is a list of the 13 institutions and their response:

| <b>Name</b>                         | <b>Response</b>                 |
|-------------------------------------|---------------------------------|
| Central Missouri State University   | sent contract(s)                |
| Harris Stowe University             | no contracts met audit criteria |
| Lincoln University                  | sent contract(s)                |
| Missouri Southern State College     | sent contract(s)                |
| Missouri Western State College      | no contracts met audit criteria |
| Northwest Missouri State University | no contracts met audit criteria |
| Southeast Missouri State University | sent contract(s)                |
| Southwest Missouri State University | sent contract(s)                |
| Truman State University             | no contracts met audit criteria |
| University of Missouri-Columbia     | sent contract(s)                |
| University of Missouri-Kansas City  | sent contract(s)                |
| University of Missouri-Rolla        | no contracts met audit criteria |
| University of Missouri-St. Louis    | no contracts met audit criteria |

## APPENDIX III

### **LIST OF CONTRACTS REVIEWED**

Seven of the 13 institutions contacted responded by sending 14 contracts matching the criteria of our request letter. The following is a list of the parties to the contract and the nature of the agreement:

| <b>Institution</b>                  | <b>Official</b>                                     | <b>Nature of Agreement</b>                     |
|-------------------------------------|---|--|
| Central Missouri State University   | Retiring President                                  | Termination and continuing employment contract |
| Missouri Southern State College     | Retiring Vice President                             | Consulting contract                            |
| Missouri Southern State College     | Resigning Coach                                     | Termination contract                           |
| University of Missouri System       | Retiring President                                  | Termination contract                           |
| University of Missouri-Columbia     | Retiring Coach                                      | Termination and consulting contract            |
| University of Missouri-Kansas City  | Resigning Chancellor                                | Termination and continuing employment contract |
| University of Missouri-Kansas City  | Resigning Vice Chancellor                           | Termination and consulting                     |
| University of Missouri-Kansas City  | Resigning Executive Vice Provost and Executive Dean | Termination and continuing employment contract |
| University of Missouri – Columbia   | Resigning Chancellor                                | Termination and continuing employment contract |
| Southwest Missouri State University | Resigning Coach                                     | Termination contract                           |
| Southwest Missouri State University | Resigning Coach                                     | Termination contract                           |
| Southeast Missouri State University | Resigning Vice President                            | Termination and consulting contract            |
| Southeast Missouri State University | Resigning President                                 | Retention of Services                          |
| Lincoln University                  | Resigning President                                 | Termination contract                           |

## **APPENDIX IV**

### **BACKGROUND**

We reviewed applicable Missouri state statutes to determine the authority the governing boards of these institutions had to enter into such contracts and what oversight responsibilities the Department of Higher Education might have related to such contracts. In the state of Missouri, each state-funded college or university is under the general control and management of its governing board. By statute and the Missouri constitution the governing board of each individual state college or university has the power to appoint and remove the president and other employees of the college or university, assign their powers and duties and fix their compensation. The applicable statutes regarding the boards' authority are as follows:

MO Const. Art IX Sec 9 (a) and RSMo 172.010 provides that a university (Missouri University) is hereby instituted in this state, the government whereof shall be vested in a board of curators.

Section 174.120, RSMo 1994, provides that each state teachers college shall be under the general control and management of its board of regents.

Sections 172.300 and 174.140, RSMo 1994, provide that the governing board of each institution may appoint and remove, at discretion, the president, deans, professors, instructors and other employees of the state college or university, may fix the duration, terms and conditions of their offices and compensation; may enter into agreements for and make contributions to both voluntary and statutory retirement plans as the board of governors deem proper for persons employed by the state college or university.

The Department of Higher Education currently does not have any oversight responsibilities regarding the compensation provided to top officials of colleges and universities.

## APPENDIX V

### **BENCHMARK PROVISIONS**

In 1994, the Association of Governing Boards of Universities and Colleges (AGB) surveyed 350 member institutions and collected more than 150 college/university presidential contracts. According to the AGB survey, most contracts referenced salary and routine fringe benefits. Some contracts mentioned tenure, sabbaticals, deferred compensation and extra insurance. More detailed contracts dealt with termination, including procedures covering the possibility of a president's long-term illness, arrangements for spouses and outside employment or post-presidential employment.

#### **The AGB found the following provisions in presidential contracts:**

- Statement of duties
- Salary level, including when and how salary will be adjusted
- Fringe benefits
- The use of housing and a car
- Deferred compensation, if applicable
- Arrangements for tenure and a sabbatical
- An entertainment allowance
- Terms of termination
- Performance evaluation
- Post-presidential employment

In addition to reviewing the guidelines provided by the AGB, we examined the provisions included in the 14 contracts we reviewed during this audit. The following contract provisions were found in 2 or more of the 14 contracts reviewed.

- Compensation level (salary or fees) for retained services
- Payout under remaining portion of employment contract
- Provision stating duration of contract
- Statement of duties
- Arrangements for tenure and annual leave
- Retirement benefits (state or the college/university retirement plan)
- Use of college/university-owned automobile
- Use of college/university owned property
- Use of college/university-owned residence
- Moving expenses
- Entertainment allowance
- Special privilege to attend university sporting events and other amenities
- Designation of third party beneficiary in the event of death

## **APPENDIX VI**

### **CENTRAL MISSOURI STATE UNIVERSITY CONTRACT**

# PROFESSIONAL SERVICES CONTRACT

This contract is entered into on this 2<sup>nd</sup> day of December, 1998 by and between the Board of Governors of Central Missouri State University (hereinafter referred to as "the Board") and Dr. Eddie Mayes Elliott (hereinafter referred to as "Dr. Elliott") for the express purpose of setting forth the Board's and Dr. Elliott's mutual understandings about

A) The nature, terms, salary and conditions of Dr. Elliott's continued employment with the Board;

B) The specific benefits, perquisites, privileges, and other compensation payable to Dr. Elliott under this Contract; and

C) The special considerations which will be extended to Dr. Elliott's spouse, Sandra Elliott ("Mrs. Elliott") under this Contract.

WHEREAS Dr. Elliott entered into a contract with the Board to render professional services as Chief Executive Officer of Central Missouri State University for a three year term commencing July 1, 1998 and ending June 30, 2001, which provided for an annual review of compensation and benefits, and for other perquisites; and

WHEREAS Dr. Elliott tendered his resignation as Chief Executive Officer of Central Missouri State University effective August 1, 1999, which the Board formally accepted at its regular meeting on October 28, 1998; and

WHEREAS Dr. Elliott has provided faithful and dedicated leadership to the Central Missouri State University for the past fourteen years and has earned and is therefore entitled to certain benefits upon the cessation of his duties as Chief Executive Officer (hereinafter referred to as "post-CEO service"), and

WHEREAS the Board desires to retain the services and goodwill of Dr. Elliott as a special consultant,

NOW, THEREFORE, BE IT RESOLVED AND AGREED AS FOLLOWS:

## A. Post-CEO Service

1. This Professional Services Contract dated December 2, 1998 is effective on the 1<sup>st</sup> day of August, 1999 and as of that date shall supercede the Professional Services Contract entered into between the parties on June 22, 1998. It is fully intended by the parties that the Professional Services Contract dated June 22, 1998 shall remain in force and effect until July

31, 1999, but nothing contained herein shall be construed or interpreted to nullify or diminish any post-CEO service stipulated benefit vesting upon Dr. Elliott's retirement or resignation from service as Chief Executive Officer due or payable to Dr. Elliott or his spouse Sandra Elliott (Mrs. Elliott) under said Contract dated June 22, 1998 or pursuant to any other document or agreement negotiated with the Board. The applicable post-CEO service provisions of the Professional Services Contract dated June 22, 1998 are hereby expressly incorporated by reference and made a part of this Contract, and it is both parties' expressed intention that all provisions of this Contract be liberally construed and to the benefit and favor of Dr. Elliott.

2. It is acknowledged by the parties that Dr. Elliott is a tenured Professor of Physical Education and Professor of Higher Education and that effective August 1, 1999 he is entitled to exercise the rights set forth in the Faculty Guide, in addition to other rights and benefits stipulated to within this Contract.
3. Effective August 1, 1999, Dr. Elliott shall hold the additional title of "President Emeritus and Distinguished University Fellow" with all customary and traditional rights appertaining thereto.
4. Dr. Elliott will continue on full payroll status using sixty (60) working days and five personal days and be considered as an active employee at the University system from the period starting August 1, 1999 and ending November 1, 1999. On November 2, 1999, Dr. Elliott shall commence a paid one year leave of absence at his current salary rate then in force and effect, including any usual and customary cost of living increases extended to Central Missouri State University employees, and including all other employment benefits such as sick leave and vacation accrual as herein stipulated, and as are currently in force and effect at the time said leave commences, and such other benefits as may be usually and customarily extended to Central Missouri State University employee during said leave.
5. Upon the expiration of Dr. Elliott's leave of absence on November 1, 2000, Dr. Elliott is entitled to the issuance of, and will be issued, a two year full time academic year employment agreement providing full employment benefits and salary placement at the top of the full professor salary maximum rate of pay then in effect at that time, including annual cost of living increments. The nature of this employment commitment shall be duties as assigned by the Board, consulting support for the Board and the University, fund raising for the renovation of Selmo Park, University Liaison for charter schools, legislative support for state and federal teacher initiatives, outreach support for implementation of the statewide mission and/or graduate instruction as appropriate. In addition, Dr. Elliott shall be given an active leadership role in the maintenance and development of international relationships and contacts in furtherance of Central Missouri State University's International Studies Program, and international sites. At all times during the academic year, Dr. Elliott's employment activities shall constitute full time faculty employment to ensure full time retirement credit under MOSERS. Upon Dr. Elliott's completion of these two years of academic employment,

additional contracts for additional academic employment may be negotiated by mutual agreement of the parties.

B. Benefits, perquisites, privileges, and other compensation

1. The Board will provide on an annual basis, for the duration of this Contract, the sum of \$15,000 plus ten per cent of Dr. Elliott's annual salary, paid over twelve monthly installments, for retirement investment purposes. Of this amount, the sum of \$9500 or the maximum allowable under the current tax codes will be paid out on a "pre-tax" basis to a qualified tax sheltered annuity; the remainder will be remitted to TIAA-CREF on an "after-tax" basis.

2. For the duration of this Contract, on an annual basis, Dr. Elliott shall be paid an additional twenty (20) per cent of his base salary in twelve monthly installments for the purpose of purchasing additional discretionary retirement investments; these payments will be taxable earnings as shown on the earnings record of the W-2 form.

3. The Board shall maintain in force and effect the insurance policy referred to as "long term care", or provide a suitable equivalent, until Dr. Elliott reaches the age of 65, or until his retirement, whichever is later. Dr. and Mrs. Elliott own this policy. In addition, the Board will provide Dr. Elliott with an additional monetary adjustment (a "gross up") for so long as the policy is in effect which will compensate him for his tax liability for the value of the insurance premiums paid out on his behalf.

4. The Board will keep in force and effect, or provide a suitable equivalent, the term life insurance policy in the amount of \$250, 000 covering Dr. Elliott, until he reaches the age of 65 or retires, whichever is later.

5. For the duration of this Contract, and for so long as he shall remain an employee, the Board shall provide Dr. Elliott with the use of an automobile, including maintenance, fuel and lubricants therefor. Dr. Elliott will keep the automobile he currently is using on the effective date of this contract, and will, at his option, be entitled to replace the automobile with a new model equivalent one time before October 31, 2002. If, at any time, Dr. Elliott should choose to retire or otherwise surrender his employment with the Board, Dr. Elliott will be permitted to purchase the automobile provided for his use from the Board, for the price of the original acquisition cost, minus the sum of one thousand (\$1000) dollars per month for each month the automobile was placed in use. In the event of Dr. Elliott's death, Mrs. Elliott shall be afforded the opportunity to purchase the automobile under these same terms.

6. At all times while Dr. Elliott is performing services under this Contract, he shall be provided with a suitable office on campus with an annual operating budget of \$15,000, which will be reviewed by the Board for sufficiency on an annual basis. In addition, secretarial support will be provided (outside of the annual operating budget), a computer with current up to date software

compatible with other University equipment and software, printer, facsimile machine, telephone, and such other office equipment as Dr. Elliott may deem necessary. All equipment shall be upgraded annually, and shall from time to time be serviced, repaired, and if necessary, replaced. In addition, the Board shall provide Dr. Elliott with an additional \$10,000 budget to provide discretionary support to the International Program, and such additional funds as he deems necessary for secretarial support. In addition, the desk, chair, and such other complementary office furnishings as are found in the Office of the President at the time of Dr. Elliott's leave will be moved to the new office, where they will remain for his use until such time as they are permanently transferred to the University Archives.

7. All office equipment and machinery, including computers and printers and telephone equipment, in use in Selmo Park or at Dr. Elliott's private residence as of the date of this Contract, shall remain in the possession of, and for the use of Dr. Elliott, and shall from time to time be serviced, repaired, and if necessary, replaced, until Dr. Elliott's duties to the Board and the University cease. Upon Dr. Elliott's severance from the University, all equipment herein described shall become his personal property.

8. All cell phones in possession or use by Dr. Elliott at the time this Contract commences, including the telephone in the automobile provided for Dr. Elliott's use, shall remain with Dr. Elliott, and the Board shall pay all reasonable charges incurred for their use. Upon Dr. Elliott's severance from the University, all telephone equipment herein described shall become his personal property, and thereafter, he shall assume all responsibility for charges incurred.

9. The Board shall purchase a notebook computer for Dr. Elliott's use prior to his leave which will be upgraded annually, and shall from time to time be serviced, repaired, and if necessary, replaced by the Board for the duration of this Contract. Upon Dr. Elliott's severance from the University, the notebook computer shall become his personal property.

10. All amenities, services, benefits and perquisites customarily provided to retired presidents and board members, such as Board of Governors parking stickers, admission tickets to all campus events, library privileges and the like, shall be provided to both Dr. Elliott and Mrs. Elliott. In addition, passes for two guests will be provided, for all campus events, concerts, theater productions, and lectures. Whenever possible, Dr. and Mrs. Elliott will be accorded box seats at the Walton Football Stadium.

11. For the one year period commencing August 1, 1999, the Board shall provide Dr. Elliott with the sum of \$19,350.00 for entertainment and special expenses, and the additional sum of \$26,650.00 for travel by Mrs. Elliott, for a total of \$45,000.00, which will be "grossed up" 48% and augmented to the total sum of \$76,968.00 for tax equalization purposes and to take into account joint tax liabilities. At the close of tax years 1999 and 2000, the gross up and equalization will be recalculated and augmented if necessary to ensure the Elliotts receive the full amount of this benefit. These amounts will be paid as taxable income and will be shown on the earnings record of the W-2 form. The Board encourages the travel and participation of Mrs. Elliott in all Dr. Elliott's endeavors.

12. Dr. Elliott and Mrs. Elliott will each be entitled to an annual physical exam at University expense until age 65, or until President Elliott retires, whichever is later.

13. Upon Dr. Elliott's retirement from full-time employment with the Board, the Board will pay the cost of health insurance premiums for Dr. Elliott and Mrs. Elliott until both parties are eligible for Medicare. In the event of Dr. Elliott's death, the Board will continue to pay Mrs. Elliott's health insurance premiums until she becomes eligible for Medicare.

C. Special considerations accorded Mrs. Elliott.

1. Title or ownership to any personal property which might vest with Dr. Elliott under this Contract will vest with Mrs. Elliott in the event of Dr. Elliott's death.

2. Should Dr. Elliott die while this Contract is in effect, Mrs. Elliott will be afforded reasonable access to University staff and shall be provided with legal counsel to assist her in settling all affairs arising out of this Contract. In addition, she will be provided with assistance in physically transporting, at Board expense, any and all personal property to the location of her choice.

3. In the event of Dr. Elliott's death, Mrs. Elliott shall be entitled to receive all amenities, services, benefits and perquisites customarily provided to retired board members, including parking stickers, admission tickets to all campus events, and such other benefits as Dr. Elliott was entitled to under Section B (10) of this Contract.

D. Other provisions

1. The Board and Dr. Elliott have amicably agreed that in the event a new President of the University has not taken office by August 5, 1999, Dr. Elliott may, at his option, elect to stay on as Chief Executive Officer for a period of time to be mutually agreed upon ("extension of CEO services"). In that event, the effective date of this Contract shall be the first day after Dr. Elliott's extension of CEO services ends. During the period, if any, Dr. Elliott's CEO services are extended, the terms, conditions, and benefits as set forth in the Professional Services Agreement dated June 22, 1998 shall govern, save that the annual compensation and benefits review shall take place at the time said services are extended.

2. In the event that Dr. Elliott's services as CEO are extended by the Board, all dates stipulated in this Contract shall be revised by mutual agreement to reflect the continuation of services and the spirit and intent of this Contract.

3. This Contract shall be governed by, construed and interpreted in accordance with the laws of the State of Missouri. Any action under this Contract shall be brought in Johnson County, Missouri.

4. This Contract shall be modified or amended by mutual agreement of the parties, in writing, either by express amendment or modification or by means as recorded in the Minutes of the Board of Governors of Central Missouri State University.

5. Should any provision or provisions of this Contract become illegal, invalid, null or void by force of law or other means, the remaining provisions of this Contract shall remain in force and effect.

IN WITNESS WHEREOF, the parties have executed this agreement on this 2nd day of December 1998.

## **APPENDIX VII**

### **UNIVERSITY OF MISSOURI CONTRACT**

## INDEPENDENT CONTRACTOR AGREEMENT AND RELEASE

THIS INDEPENDENT CONTRACTOR AGREEMENT is entered into between THE CURATORS OF THE UNIVERSITY OF MISSOURI, a public corporation of the State of Missouri (hereinafter referred to as "University"), and NORMAN E. STEWART (hereinafter referred to as "Stewart").

WITNESSETH:

WHEREAS, the parties entered into an Employment Agreement dated December 3, 1992; and

WHEREAS, the parties entered into an Amendment of said Employment Agreement, dated April 30, 1996; and

WHEREAS, the parties entered into a Second Amendment of said Employment Agreement, dated October 14, 1996; and

WHEREAS, the parties entered into a Third Amendment of said Employment Agreement, dated July 3, 1997; and

WHEREAS, the parties now desire to enter into an Agreement and Release for the purpose of rescinding the above-described Employment Agreement and all amendments thereto, and setting forth new agreements and understandings between them regarding their relationships.

NOW, THEREFORE, in consideration of the above premises and the individual and mutual promises of the parties hereinafter set forth, it is hereby agreed between the parties hereto as follows:

1. Stewart agrees to resign and shall be deemed to have resigned as the Head Men's Basketball Coach at the University of Missouri-Columbia on the execution date of this Agreement and Release. Stewart will remain a full-time employee of the

University until June 30, 1999 at his current annual salary. His duties during this period will be set by the Athletic Director of the University of Missouri-Columbia.

2. Stewart will retire as an employee of the University on July 1, 1999, at which time he will be entitled to receive an annual retirement benefit payment from the University, to be paid in equal monthly installments, less appropriate deductions and withholdings, pursuant to the University of Missouri Retirement, Disability and Death Benefit Plan ("Plan"). Stewart will also be entitled to receive any other benefits set forth in the Plan.

3. University agrees to pay Stewart the amount of One Hundred Thousand Dollars (\$100,000.00) on August 1, 1999, in exchange for the relinquishment by Stewart of his right to operate at any time during the term of this Agreement (date of execution through June 30, 2003) a basketball camp as set forth in his Employment Agreement dated December 3, 1992, and as amended by the Second Amendment to said Employment Agreement dated October 14, 1996; provided, however, that Stewart will be permitted to operate a basketball camp as set forth in his Employment Agreement dated December 3, 1992, and as amended by Second Amendment to said Employment Agreement, with said Second Amendment dated October 14, 1996, during the summer of 1999, but not at any time thereafter during the term of this Agreement (date of execution through June 30, 2003) in the State of Missouri. Stewart will transfer all equipment used by him in the operation of said basketball camp to the University on August 1, 1999, and he will provide the University with a list of all past camp participants and any prospective camp participants at that time.

4. University agrees to pay to Stewart the amount of One Hundred Ninety-five Thousand Dollars (\$195,000.00) on July 1, 1999, in exchange for the relinquishment by

Stewart of his right to receive the annuity payments called for in paragraph "Fourth" of the Second Amendment to his Employment Agreement dated October 14, 1996 and the relinquishment of any other rights Stewart might have under the Employment Agreement as amended prior to the date of this Agreement and Release. All appropriate deductions will be withheld from these payments (meaning this payment and any other annuity payments made in calendar year 1999) as required by law.

5. University agrees to pay to Stewart Seventy-five Thousand Dollars (\$75,000.00) in the year July 1, 2000-June 30, 2001, said payment to be payable on July 1, 2000, and Seventy-five Thousand Dollars (\$75,000.00) in the year July 1, 2001-July 30, 2002, said payment to be payable on July 1, 2001, in exchange for the relinquishment by Stewart of his right to receive the payments set forth in paragraph "Fourth" of the Third Amendment to his Employment Agreement, dated July 3, 1997, and the relinquishment of any other rights Stewart might have under the Employment Agreement as amended prior to the date of this Agreement and Release.

6. It is agreed that the University will retain Stewart as a "Special Consultant to the Chancellor of the University of Missouri-Columbia" for the period July 1, 1999 to June 30, 2003. Stewart's services shall be to provide consultation for the method and process of accomplishment and final results of development projects and participation in said projects for the University of Missouri-Columbia. In exchange for his consulting services, Stewart will be paid an annual fee of One Hundred Twenty-five Thousand Dollars (\$125,000.00) to be paid annually in advance (for example, the payment for July 1, 1999 through June 30, 2000 to be made during the first ten (10) days of July 1999). At Stewart's option, he will be entitled to receive the payment due for the period July 1, 2002 to June 30, 2003 during the first ten (10) days of July 2001. It is agreed that in

providing these services to the University, Stewart is serving in the capacity of an independent contractor and not as an employee of the University. Stewart agrees that he is not serving in the capacity of an employee of the University in providing these services and will be solely responsible for the payment of any taxes due and owing in connection with his receipt of the consulting fees set forth herein, and will indemnify and hold the University harmless and reimburse the University for any amounts it may be required to pay as a result of a determination that the University should have carried out appropriate employee withholding and of Stewart's failure to meet his tax obligations in connection with the fees paid to him hereunder.

7. It is agreed that if Stewart dies before the payments are made to him as called for in paragraphs 3, 4, 5 and 6 of this Agreement and Release, these payments will be made to such individuals designated by Stewart, and who will provide any remaining services to be provided under this Agreement and Release at the times said payments are designated to be paid herein. The University reserves the right to obtain a policy of insurance on the life of Stewart in order to fund the payments called for in paragraphs 3, 4, 5 and 6 of this Agreement and Release.

8. Stewart agrees that except as otherwise provided herein, the University is released from any and all of its obligations to him as set forth in the Employment Agreement, dated December 3, 1992, the Amendment to said Employment Agreement, dated April 30, 1996, the Second Amendment to said Employment Agreement, dated October 14, 1996, and the Third Amendment to said Employment Agreement, dated July 3, 1997, and the University has no further obligations to Stewart except as otherwise set forth herein.

9. The parties agree that this Agreement and Release can be supplemented

or amended by the mutual agreement of the parties or their respective representatives reduced to writing.

IN WITNESS WHEREOF, the undersigned have executed this Agreement and Release on the 1 day of April, 1999.

## **APPENDIX VIII**

### **SOUTHEAST MISSOURI STATE UNIVERSITY CONTRACT**

## EMPLOYMENT AGREEMENT

THE BOARD OF REGENTS FOR SOUTHEAST MISSOURI STATE UNIVERSITY (herein called "Employer"), and DALE NITZSCHKE, presently residing at Wildwood, Cape Girardeau, Missouri 63701, (herein called "Chancellor") agree:

1) **EMPLOYMENT.** In consideration of the mutual promises contained in this agreement, and of the salary and other compensation to be paid, Employer hereby employs Chancellor to serve as the Chancellor of Southeast Missouri State University, and Chancellor accepts such employment, on the terms set out in this Agreement.

2) **TERM.** The term of this Agreement shall begin on July 1, 1999 and end June 30, 2001. Thereafter, this agreement shall be automatically renewed from year to year unless otherwise terminated as provided herein.

3) **DUTIES.** Chancellor is employed to serve as the Chancellor of Southeast Missouri State University. He shall perform all duties which may be required by law and the provisions of this agreement, and all duties incident to the office of Chancellor for the Development of the River Campus and Polytechnic Institute of the University, together with such other duties as may be properly assigned to him. He shall devote substantially his entire time, attention and energies to the duties of his office. Chancellor may devote reasonable amounts of time for personal, charitable and professional activities provided that such activities do not interfere with the performance of duties under this agreement. Chancellor shall not render services of any professional nature to or for any other person or entity (either with or without compensation) without the prior consent of Employer.

4) **COMPENSATION.** For all services rendered by Chancellor he shall be compensated as follows:

**A) Salary:**

1) For the period beginning July 1, 1999 and ending June 30, 2001, Chancellor shall be paid an annual salary of \$95,000.00.

2) Salary shall be paid in equal periodic installments in accordance with normal pay-roll procedures of Employer and is subject to withholding of taxes and other items required by law or allowed by University policy.

**B) "Fringe" Benefits:** Chancellor shall be entitled to all "fringe" compensation benefits offered to faculty members at Southeast Missouri University, including, without limitation,

life insurance programs, health, medical and hospitalization insurance, sick leave, disability, deferred compensation programs, I.R.C. Section 403, 457, or 125 programs, and similar benefits, but excluding sabbatical leave, except as such benefits may be limited by other provisions of this agreement.

C) Annuity. Employer shall purchase for Chancellor's benefit, and maintain in full force and effect during the period of Chancellor's employment as Chancellor, through TIAA-CREF or such other entity as Chancellor may designate, an annuity contract, to be owned by Chancellor, at a premium cost of \$23,000.00 per year, paid on a quarterly basis. Chancellor is responsible for any taxes which may be due as a result of this annuity.

**5) WORKING FACILITIES, EXPENSES, AND OTHER CONDITIONS OF EMPLOYMENT.**

A) Automobile. An automobile for the business use of Chancellor, including all service and maintenance of the automobile, will be provided at no expense to Chancellor. Liability protection for Chancellor in the use of the automobile in his duties as Chancellor is provided by the Legal Expense Fund of the State of Missouri, up to limits of \$100,000.00 per individual and \$1,000,000.00 per incident. Liability protection for personal use will be provided through commercial liability insurance with limits not less than \$100,000 per person and \$500,000.00 per incident. Any personal use is subject to the restrictions of the Internal Revenue Code.

B) Office and Staff. Chancellor will be provided with a private office at the Cape Girardeau campus of Employer, secretarial staff and other facilities and services as may be suitable and necessary for the proper performance of his duties.

C) Expenses. Employer shall pay, or shall reimburse Chancellor for, reasonable and necessary expenses incurred in the performance of his duties, including country club fees and dues and membership fees in professional, service, and social organizations as approved by Employer. Reimbursable travel and entertainment expense shall include spousal expense when Chancellor's spouse is participating in the event involved.

**D) Residence.**

1) Chancellor will be based in Milford, Ohio, with duties also in Washington, D.C., and in Cape Girardeau, Missouri. Employer will provide reasonable furniture and equipment for Chancellor's use as a supplemental office facility at Chancellor's residence in Milford, Ohio.

2) Employer shall pay for or reimburse Chancellor for reasonable residential expenses associated with his work in Washington, D.C.

While in Cape Girardeau, Missouri, Employer shall provide a place of residence for Chancellor at the residence known as "Wildwood". In addition to occupancy by Chancellor, Employer shall be permitted to use the residence (or allow its use, as may be appropriate), excluding the private apartment provided for Chancellor if Chancellor is in residence, for entertainment of visitors in the interest of the University, faculty events, and other events and purposes appropriate for the purposes of the University. Employer will provide reasonable furniture and furnishings at Wildwood, and will maintain the residence and surrounding grounds in good condition.

**6) VACATIONS AND HOLIDAYS.** Chancellor shall not be entitled to the same holidays and vacation afforded the faculty and staff of the University during the period of employment. Chancellor may sell all accrued but unused vacation time which he may have back to the University on June 30, 1999.

**7) EVALUATION.** Chancellor shall be subject to the evaluation procedures of the University and as may be required by state law. At least annually, as the parties may agree, the parties shall mutually evaluate the status of the University and its goals and long range plans.

**8) TERMINATION.** This Agreement may be terminated as follows:

**A) Death.** The death of Chancellor shall terminate this agreement. In such event, Chancellor's surviving spouse, or if there is no surviving spouse, Chancellor's estate, shall be paid Chancellor's salary for the full month in which Chancellor's death occurs.

**B) Resignation.** Chancellor may resign his employment by tendering his written resignation to Employer not less than thirty (30) days prior to the effective date of resignation.

**C) Non-renewal.** This agreement shall be automatically renewed from year to year, following the expiration date hereof, upon the terms contained herein, unless either party gives notice to the other party of intent not to renew. Notice of non-renewal shall be given in writing not later than 3 months prior to the applicable expiration date.

**D) Termination without cause.** Employer may terminate Chancellor's employment as Chancellor without cause at any time upon 30 days notice. In the event of such termination, however, Chancellor shall continue to be employed in the position of a full professor in an appropriate department at a salary equal to the then current average salary paid full professors at the University, for the period of time necessary for Chancellor to become 100% vested under the Missouri State Employees Retirement System. Termination resulting from inability (if reasonable

accommodation cannot be made) to perform substantially all the duties of Chancellor, due to illness or accident, shall be considered termination without cause. In such event, if Chancellor is also unable to perform substantially all the duties of a full professor (if reasonable accommodation cannot be made) Chancellor shall be entitled to the benefits afforded by the sick leave and disability policies of the University, and no other benefit or payment.

**E) Termination for cause** Employer may terminate this agreement for the following causes:

- 1) Conviction of a felony or misdemeanor.
- 2) Non-compliance with policies established by the Board of Regents.
- 3) Incompetence in the performance of Chancellor's duties.

In the event of termination for cause, Chancellor shall be notified in writing of the grounds for termination, and, within fifteen days after receipt of such notice, may request a hearing before the Board of Regents. A hearing shall be held within fifteen days after receipt of such request. The hearing shall be a closed hearing, unless Chancellor requests a hearing in an open session of the Board of Regents. At such hearing, Chancellor may be represented by counsel, and may present such evidence as Chancellor may desire, either documentary or oral, to support Chancellor's position. The decision of the Board of Regents following such hearing shall be final and binding on all parties.

**F) Termination by operation of law.** This agreement shall be automatically terminated as of the effective date of any legislative action terminating the existence of the University as an independent educational entity of the State of Missouri.

**9) WAIVER OF BREACH.** The waiver by either party of any breach of any provision of this agreement by the other party shall not operate or be construed as a waiver of any subsequent breach.

**10) ENTIRE AGREEMENT.** This agreement constitutes the entire agreement between the parties, and there are no other understandings, agreements, or representations between the parties, express or implied.

**11) GOVERNING LAW.** This agreement shall be deemed to have been executed in the City of Cape Girardeau, Missouri, and is to be construed as a Missouri contract and in accordance with the laws of Missouri.

12) NON-ASSIGNABILITY. This agreement is a contract for personal and professional services, and the benefits of the agreement shall not be pledged or assigned in any way by Chancellor.

13) NOTICES. Any notice required to be given under the terms of this Agreement shall be in writing, and either delivered personally to the other party or mailed, by certified mail, return receipt requested, addressed as follows:

To Chancellor:

Dr. Dale Nitzschke, Chancellor  
Southeast Missouri State University  
One University Plaza  
Cape Girardeau, Missouri 63701

To Employer:

President of the Board of Regents  
Southeast Missouri State University  
One University Plaza  
Cape Girardeau, Missouri 63701

IN WITNESS WHEREOF, The Parties have executed this Agreement in duplicate this  
30<sup>th</sup> day of June 1998.

REVIEW OF  
CAREGIVER SCREENINGS

**From The Office Of State Auditor  
Claire McCaskill**

Report No. 2000-23  
April 12, 2000

AUDIT REPORT

Office Of The  
State Auditor Of Missouri  
Claire McCaskill

April 2000

**The following areas of concern were discovered as a result of a review conducted by our office of Care Giver Screenings.**

Our elderly, children and mentally challenged often do not have the capability to fully protect themselves from abuse and neglect. Various state agencies maintain listings of individuals who have been found to have abused or neglected children, the elderly, or the mentally challenged. We matched individuals on these listings to 1998 employment information and noted instances of illegal, inappropriate, or questionable employment situations. While several state agencies utilize these listings to some degree, no agency has developed an automated match to identify employers who were not performing the required screenings or who employ individuals contrary to guidelines. Except for recent legislation regarding certain child care workers, there currently are no laws which require these state agencies to screen for persons being employed inappropriately or illegally. Instead the laws either require certain employers to perform background checks, or simply state that certain employment situations are illegal. Also, most of the inappropriate or questionable employment situations identified in our report are not currently unlawful.

One of the goals of the Family Care Safety Act, and the Governor's Executive Order 99-05, both enacted in 1999, was to promote family and community safety by allowing access to comprehensive information accumulated by various state agencies.

We also noted that screenings will not require that the history of child and elder care workers be checked against information from other states, and will not require employees in schools to be checked against the listings of abusers. Finally, it will be an onerous task for individuals selecting personal care services to check backgrounds of employees of large providers and providers with high employee turnover.

Additional controls and procedures should be put into place to fully protect the elderly, children, and mentally challenged. These include:

- Placing all disqualified individuals (and their social security number) from the Division of Aging Employee Disqualification Listing, the Department of Mental Health Employee Disqualification Listing, as well as individuals who have been determined to have committed a serious child abuse or neglect incident, in a single abuse registry.

(over)

YELLOW SHEET

- Passing legislation which prohibits these individuals from being employed by care providers and schools.
- Implementing the necessary system improvements to allow for more timely background screening results.
- Requiring care providers and schools to check the abuse registry **prior** to employment of new individuals.
- Developing an automated process to periodically identify all instances of individuals inappropriately working for care providers and schools.
- Developing procedures to remove those individuals from inappropriate workplace settings.
- Developing procedures to aggressively fine and sanction care providers and schools who employ individuals listed on the abuse registry.
- Developing procedures so that family members can more easily and conveniently determine whether a particular care provider or school is employing individuals listed on the abuse registry. Consideration should also be given to what extent information on the registry should be available to the public.
- Requiring the backgrounds of Family Care Safety Registry registrants who have not resided in Missouri for the preceding three years be checked against information in the registrant's former state of residence. In addition, the state should promote the establishment of a national screening system.
- Establishing a fair and consistent appeal process which considers the nature and severity of the incident which resulted in placing an individual in the abuse registry, and the results of any subsequent rehabilitation.
- Passing legislation to clearly allow background information to be disclosed to state agencies responsible for monitoring provider compliance.

## STATE AUDITOR'S REPORT

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

Honorable Mel Carnahan, Governor  
and  
Members of the General Assembly

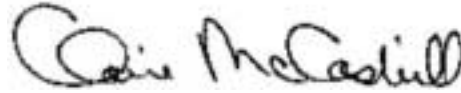

We conducted a review of state agencies' practices and procedures and of state legal provisions regarding care giver screenings. The objectives of this review were:

1. To determine whether persons who have abused the elderly, clients of the Department of Mental Health, and/or children are employed in illegal, inappropriate, or questionable work settings.
2. Review and evaluate various state agencies' compliance with certain executive orders and statutory requirements regarding care giver screenings.
3. Review certain state laws relating to abuse against persons and determine areas of concern needing improvement or clarification.
4. Review certain management controls and practices to determine the propriety and effectiveness of those controls and practices as they relate to care giver screenings.

Our review was made in accordance with applicable generally accepted government auditing standards and included such procedures as we considered necessary in the circumstances. In this regard, we reviewed applicable executive orders, state laws, interviewed or surveyed applicable personnel, and inspected relevant records and reports.

Our review was limited to the specific matters described above and was based on selective tests and procedures considered appropriate in the circumstances. Had we performed additional procedures, other information might have come to our attention that would have been included in this report.

The Comments, Analysis, Conclusions, and Recommendation presented in the report represent the results of our review of care giver screenings.

A handwritten signature in black ink, appearing to read "Claire McCaskill". The signature is fluid and cursive, with the first name "Claire" being more prominent than the last name "McCaskill".

Claire McCaskill  
State Auditor

December 6, 1999 (fieldwork completion date)

## EXECUTIVE SUMMARY

## REVIEW OF CARE GIVER SCREENINGS EXECUTIVE SUMMARY

Our elderly, children, and mentally challenged often do not have the capability to fully protect themselves from abuse and neglect. Various state agencies maintain listings of individuals who have been found to have abused or neglected children, the elderly, or the mentally challenged. We matched individuals on these listings to 1998 employment information and noted instances of illegal, inappropriate, or questionable employment situations. While several state agencies utilize these listings to some degree, no agency has developed an automated match to identify employers who were not performing the required screenings or who employ individuals contrary to guidelines. Except for recent legislation regarding certain child care workers, there currently are no laws which require these state agencies to screen for persons being employed inappropriately or illegally. Instead the laws either require certain employers to perform background checks, or simply state that certain employment situations are illegal. Also, most of the inappropriate or questionable employment situations identified in our report are not currently unlawful.

One of the goals of the Family Care Safety Act, and the Governor's Executive Order 99-05, both enacted in 1999, was to promote family and community safety by allowing access to comprehensive information accumulated by various state agencies. Our review of this legislation and the executive order noted background screenings will not be totally comprehensive. We also noted that screenings will not require that the history of child and elder care workers be checked against information from other states, and will not require employees in schools to be checked against the listings of abusers. Finally, it will be an onerous task for individuals selecting personal care services to check backgrounds of employees of large providers and providers with high employee turnover.

## COMMENTS, ANALYSIS, CONCLUSIONS, AND RECOMMENDATION

REVIEW OF  
CARE GIVER SCREENINGS  
COMMENTS, ANALYSIS, CONCLUSIONS, AND RECOMMENDATION

**COMMENTS AND ANALYSIS**

|           |   |
|-----------|---|
| <b>1.</b> | <b>Data Match and Agency Procedures</b> |
|-----------|---|

Various sections of state law require the Division of Aging (DA) to maintain an Employee Disqualification Listing (EDL) which includes names of persons who have been finally determined by the department, pursuant to Section 660.315, RSMo 1994, to have recklessly, knowingly, or purposely abused or neglected, or to have misappropriated any property or funds of a nursing home resident or in-home services client. Section 660.315.11, RSMo 1994, establishes who will be provided the DA EDL.

There are approximately 700 persons on the DA EDL. Nursing homes and residential care facilities, providers of in-home services under contract with the Department of Social Services (DSS), employers who hire nurses and nursing assistants for temporary or intermittent placement in health care facilities, entities approved to issue certificates for nursing assistants training, hospitals and related health services, and home health and hospice providers are prohibited by state law from employing any person on the DA EDL.

The Department of Mental Health (DMH) maintains a listing of persons who have been administratively determined to have abused or neglected a DMH client under Section 630.167, RSMo Cumulative Supp. 1999. Pursuant to Section 630.167, RSMo Cumulative Supp. 1999, this listing is confidential. There are about 250 persons on this listing. Persons on the listing are disqualified by 9 CSR 10-5.200 from holding any position in any public or private facility or day program operated, funded, or licensed by the DMH or in any mental health facility or program.

The Division of Family Services, under Section 210.145, RSMo 1994, maintains a Central Registry of individuals where the division has found probable cause to believe or a court has substantiated through court adjudication that the individual has committed child abuse or neglect, or the person has pled guilty or has been found guilty of a crime under Sections 565.020, 565.021, 565.023, 565.024, or 565.050, RSMo. The Central Registry of Child Abuse and Neglect (CA/N) contains identifying information on the perpetrators of child abuse and neglect. Pursuant to Section 210.150, RSMo 1994, this listing is confidential.

- A. We obtained the listing of persons on the DA and DMH EDLs. We also obtained a listing of all persons listed in the CA/N for which the incident date was within the last five years. We further limited our selection criteria to the investigation conclusion codes of A (court adjudicated) or B (probable cause or reason to suspect); the severity codes of C (serious/severe), D (permanent injury), or E (fatal); and the categories of abuse of 1

(physical abuse), 2 (neglect), or 6 (sexual maltreatment). Applying that selection criteria to the CA/N, about 16,700 persons were identified, of which approximately 14,350 included a Social Security number of the person. We matched persons from the EDLs and the CA/N against 1998 employment information records and noted the following instances of illegal, inappropriate, or questionable workplaces:

| Employment Area                                | People on each listing<br>employed in the applicable area |        |         |
|--|---|--------|---------|

| Total  | 2,059   | 65     | 38      |

\* Employment is currently prohibited by state law.

\*\* 11 of these are also DMH providers and therefore employment is currently prohibited by state regulation.

In total, we identified thirty-two people that were employed in areas that were prohibited by state law. In addition, many of the 249 individuals listed in the CA/N Registry that were employed in the daycare area are now subject to restrictions under legislation which became effective August 28, 1999. We identified 1,870 instances in which people that abused or neglected the elderly, clients of the DMH, or children, were employed in potentially inappropriate or questionable work settings.

- B. As noted above, approximately 2,350 of the 16,700 persons listed (using our criteria) on the CA/N did not include a social security number. Considering social security numbers will be required in any computer matches to be performed, procedures should be improved to ensure social security numbers are entered for all individuals listed in the CA/N.
- C. State agencies utilize these EDL listings and the CA/N to varying degrees as follows:
  - C The DA performs quarterly checks of employment records for twenty-five percent of the persons on their EDL. Also, during inspections, inspectors review personnel

files on a test basis to determine if providers checked the DA EDL before employment.

- C During inspections of mental health facilities, DMH inspectors review personnel files on a test basis to determine if the provider checked the DMH EDL.
- C The Division of Family Services screens Foster Care providers against the CA/N. Foster Care providers with substantiated instances of child abuse or neglect are sometimes allowed to continue in the Foster Care program if deemed appropriate following a team review or determination of each case. The DFS also has begun screening new registered day care providers against the CA/N and it performed an automated match to screen existing registered day care providers against the CA/N. However, that match did not identify at least 38 instances in which a registered day care provider was listed in the CA/N. A specific cause for these instances being missed by DFS could not be determined. The DFS has no plans to perform periodic matches in the future, but intends to screen for providers in the CA/N at the local level upon completion of a probable cause determination.
- C The Department of Health (DOH) has screened applicants for day care licensure against the CA/N. Also during inspections of day care facilities, inspectors review personnel files on a test basis to determine if the provider checked the CA/N. If an applicant or day care employee is identified as being listed in the CA/N, the DOH reviews each case on an individual basis and, if deemed appropriate, allows the provider or employee to continue providing day care.

Instances of illegal employment noted during our review were referred to the appropriate state agency. While several state agencies utilize these listings to some degree, no agency has developed an automated match to identify providers who were not performing the required screenings or who employ individuals contrary to guidelines. Except for recent legislation regarding certain child care workers, there currently are no laws which require these state agencies to screen for persons being employed illegally. Instead, the laws either require certain providers to perform background checks, or simply state that certain employment situations are illegal. Also, many of the inappropriate or questionable instances identified above are not currently unlawful.

| <b>2. Family Care Safety Act and Executive Order 99-05</b> |
|--|

The Family Care Safety Act, passed by the 90th General Assembly in 1999, requires the DOH establish the Family Care Safety Registry (FCSR) by January 1, 2001. This Act is included in Section 210.900 through 210.936, RSMo Cumulative Supp. 1999. Every child care and elder care worker hired on or after January 1, 2001 must file a registration form with the DOH. Registrants will be screened against criminal records, the CA/N registry, the DA EDL, and foster

parent denials, revocations, and suspensions. The Act also requires the DOH to establish a toll-free telephone service. Persons contemplating placement of an individual in a child or elder care setting may obtain information from the registry regarding individuals registered in the FCSR. Callers may find out only if the individual is in the registry and for what background check they are listed. Under the law, the DOH is required to notify the registrants listed in the FCSR of the name and address of inquirers. The DOH is also required to report to the General Assembly by January 1, 2001 on its recommendations regarding various issues applicable to the FCSR.

On March 31, 1999, the Governor signed Executive Order 99-05. The goal of the Executive Order was to provide Missouri families with a more comprehensive and streamlined access to information on individuals who have a history of abuse and neglect. Under this order, individuals can submit a single form to obtain information related to whether a caregiver is included on either the DA or DMH EDL, the CA/N registry, or has a criminal background. However, due to the state's existing confidentiality laws, the signature of the caregiver must be obtained prior to disclosure of information related to the EDLs and CA/N registry. In addition, two state agencies and one industry association expressed concerns that current screenings take two weeks or longer to complete resulting in substantial delays before an individual could be hired. Another state agency suggested a real-time interface between the various state agencies to allow for more timely background screening results.

Our review on the Family Care Safety Act and Executive Order 99-05 noted the following concerns:

- A. The FCSR will not be a comprehensive listing of potentially inappropriate or abusive individuals identified by state records. Except for some childcare workers, only workers entering employment on or after January 1, 2001 will be entered into the FCSR. As a result, many of the people currently on various listings (noted in part 1 above) would not even be listed in the FCSR. In addition, the Act does not require the Registry to check against individuals listed on the DMH EDL.

One of the goals of the Family Care Safety Act was to promote family and community safety by allowing access to comprehensive information accumulated by various state agencies. Obviously, by not including current care givers within the FCSR, and not checking against individuals who have been determined to have abused clients of the DMH, the goals of the Act cannot be fully achieved.

- B. The FCSR will not check registrants against information from other states. As a result, care workers who are disqualified in other states could come to Missouri and continue in similar employment without detection.

The State of Wisconsin has laws in effect which require that the backgrounds of registrants who have not resided in that state for the preceding three years be checked against information in the registrant's former state of residence. Current caregiver background

screening already requires registrants to disclose addresses for the previous three years.

- C. Under the Act, individuals will be able to check whether potential care givers are listed in the FCSR and use this information in determining their placement decisions. Under the Executive Order, individuals can currently find out whether caregivers are on the C/AN registry or either the DA or DMH EDL, but must obtain the caregiver's signature and approval before obtaining this information. These processes may work well for smaller care providers with low turnover of employees. However, it would be an onerous task to expect individuals selecting personal care services to screen for numerous employees at large care providers, such as a nursing home, large day care provider, or Home Health Agency. Also, staff turnover is often high for these types of employment. It would not appear feasible to expect individuals to constantly check new hires against the FCSR.

The State of Wisconsin may refuse to license, certify or register a care giver who has failed the background check.

- D. The Department of Elementary and Secondary Education (DESE) performs criminal background checks of teachers as required by Section 168.071, RSMo Cumulative Supp. 1999. However, the DESE is not required to screen school district employees against the CA/N, the DA EDL, or the DMH EDL.

Missouri's public schools should at least consider whether individuals who have been found to have abused or neglected children, elders, or the mentally ill should be allowed to work in our public schools.

- E. Another state agency noted the Act allows to disclosure of background information for employment purposes only. The Act does not address whether information can be disclosed to state agencies responsible for monitoring provider compliance. For example, there is no specific allowance for a licensing state agency, such as the DA when inspecting nursing homes, to obtain and have access to information in the FCSR. To avoid any duplication of effort between state agencies, and to help ensure that providers take appropriate action when an employee fails a background check, these state agencies should be allowed access to information in the FCSR.

## **CONCLUSIONS**

Additional controls and procedures should be put into place to fully protect the elderly, children, and mentally challenged. These include:

- C Placing all disqualified individuals (and their social security number) from the DA EDL, the DMH EDL, as well as individuals who have been determined to have committed a serious child abuse or neglect incident, in a single abuse registry.

- C Passing legislation which prohibits these individuals from being employed by care providers and schools.
- C Implementing the necessary system improvements to allow for more timely background screening results.
- C Requiring care providers and schools to check the abuse registry **prior** to the employment of new individuals.
- C Developing an automated process to periodically identify all instances of individuals inappropriately working for care providers and schools.
- C Developing procedures to remove those individuals from inappropriate workplace settings.
- C Developing procedures to aggressively fine and sanction care providers and schools who employ individuals listed on the abuse registry.
- C Developing procedures so that family members can more easily and conveniently determine whether a particular care provider or school is employing individuals listed on the abuse registry. Consideration should be given to what extent information on the registry should be available to the public.
- C Requiring the backgrounds of FCSR registrants who have not resided in Missouri for the preceding three years be checked against information in the registrant's former state of residence. In addition, the state should promote the establishment of a national screening system.
- C Establishing a fair and consistent appeal process which considers the nature and severity of the incident which resulted in placing an individual in the abuse registry, and the results of any subsequent rehabilitation.
- C Passing legislation to clearly allow background information to be disclosed to state agencies responsible for monitoring provider compliance.

### **RECOMMENDATION**

Since many of the conclusions noted above require statutory revisions through additional legislation, **WE RECOMMEND** the General Assembly consider the contents of this report when enacting future legislation that addresses the safety and protection of Missouri's children, elderly, and mentally challenged.

This report is intended for the information of applicable government officials. However, this report is a matter of public record and its distribution is not limited.

Report No. 2000-22  
April 3, 2000

# AUDIT REPORT

Office Of The  
State Auditor Of Missouri  
Claire McCaskill

April 2000

**The following problems were discovered as a result of an audit conducted by our office of the Department of Insurance.**

---

State law provides the director of the Missouri Department of Insurance with the authority to administer Missouri chartered insurance companies requiring rehabilitation or liquidation, commonly referred to as receiverships. At June 30, 1999, there were three Missouri chartered insurance companies in rehabilitation and eleven in liquidation. Many of these receiverships have continued for several years, with three companies in receivership since the 1980's.

For those companies involved in the liquidation process, significant administrative expenses are incurred which decrease the overall assets available at final liquidation. These expenses can include items such as special deputy receiver fees, legal fees, investment fees, payroll, travel, professional services, and office expenses, but do not include payments of claims. Based on reports submitted to the department total administrative expenses for receiverships exceeded \$31 million in 1998.

The Missouri Department of Insurance has established regulations regarding reporting requirements for insurance companies in receivership and, based on the reports submitted by the special deputy receivers or agents, the department tracks administrative costs closely. However, insurance department personnel indicated they only sporadically visit the special deputy receivers and agents to review the accounting records which support these reports. In addition, while audit reports are required for insurance companies in rehabilitation, there is no requirement for independent audits of insurance companies in liquidation. Without performing a review of the accounting records maintained by the special deputy receivers or requiring an audit of these records, the Missouri Department of Insurance has less assurance that the reports submitted to the department are accurate and can be relied upon.

The State Auditor recommends the Missouri Department of Insurance require independent audits for all receiverships or perform other monitoring procedures to ensure the information and reports submitted by the special deputy receivers or agents are accurate.

(over)

YELLOW SHEET

The Missouri Departments of Insurance and Revenue share responsibilities for assessing and collecting premium taxes. The Missouri Department of Insurance maintains delinquent premium tax listings and also receives delinquent tax listings from the Department of Revenue; however, these listings are not reconciled by the department in a timely manner. In addition, the department's delinquent tax listing requires several reconciling items and manual adjustments to agree to the Department of Revenue's delinquent tax listing. The monitoring of delinquent premium taxes needs improvement.

State law requires health maintenance organizations (HMOs) to file various reports with the department. The department's Managed Care Section has developed written procedures outlining what is to be included in the various HMO reports but not how the organization's reports are to be analyzed. Additionally, reports are frequently filed late by the various HMOs and, while the Managed Care Section does follow-up on these delinquent reports, no fine or fee is assessed to the organizations for filing late reports.

Only ten of the thirty organizations filed the quarterly reports due July 15, 1999 by the due date. Fifteen organizations filed the report late and five organizations still had not filed the report as of September 30, 1999. State law provides for a forfeiture fee not to exceed \$100 for each violation.

We noted various concerns regarding insurance examiners' expense accounts, including unreasonable meal claims, inefficient use of automobiles, and unnecessary expenses incurred on non-travel weekends.

Other areas of concern noted in the report included untimely deposits of receipts, the lack of adequate review of supporting documentation for expenditures under a federal insurance counseling service program, the lack of a formal contingency plan for the department's computer system, and the lack of written examination programs for some market conduct examinations.

## State Auditor's Reports

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

**INDEPENDENT AUDITOR'S REPORT ON  
THE FINANCIAL STATEMENTS**

Honorable Mel Carnahan, Governor  
and  
Keith Wenzel, Director  
Department of Insurance  
Jefferson City, Missouri 65102

We have audited the accompanying special-purpose financial statements of the various funds of the Department of Insurance as of and for the years ended June 30, 1999 and 1998, as identified in the table of contents. These special-purpose financial statements are the responsibility of the department's management. Our responsibility is to express an opinion on these special-purpose financial statements based on our audit.

We conducted our audit in accordance with generally accepted auditing standards and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the special-purpose financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the special-purpose financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

The accompanying special-purpose financial statements were prepared for the purpose of presenting the receipts, disbursements, and changes in cash and investments of the General Revenue Fund-Federal, Insurance Examiners Fund, Department of Insurance Dedicated Fund, Trans-National Warranty Accounts, and the Rehabilitation Accounts; the receipts of the General Revenue Fund-State, Worker's Compensation Fund, Second Injury Fund, and the State School Moneys Fund; and the appropriations and expenditures of the various funds of the Department of Insurance and are not intended to be a complete presentation of the financial position and results of operations of the various funds of the department.

In our opinion, the special-purpose financial statements referred to in the first paragraph present fairly, in all material respects, the receipts, disbursements, and changes in cash and

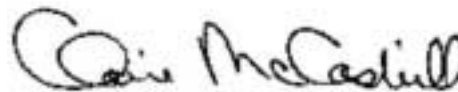

investments of the General Revenue Fund-Federal, Insurance Examiners Fund, Department of Insurance Dedicated Fund, Trans-National Warranty Accounts, and the Rehabilitation Accounts; the receipts of the General Revenue Fund-State, Worker's Compensation Fund, Second Injury Fund, and the State School Moneys Fund; and the appropriations and expenditures of the various funds of the Department of Insurance as of and for the years ended June 30, 1999 and 1998, in conformity with the comprehensive bases of accounting discussed in Note 1, which are bases of accounting other than generally accepted accounting principles.

In accordance with *Government Auditing Standards*, we also have issued our report dated September 20, 1999, on our consideration of the department's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grants.

Our audit was made for the purpose of forming an opinion on the special-purpose financial statements, taken as a whole, that are referred to in the first paragraph. The accompanying financial information listed as supplementary data in the table of contents is presented for purposes of additional analysis. Such information has been subjected to the auditing procedures applied in the audit of the special-purpose financial statements and, in our opinion, is fairly stated in all material respects in relation to the special-purpose financial statements taken as a whole.

The accompanying History, Organization, and Statistical Information is presented for informational purposes. This information was obtained from the department's management and was not subjected to the auditing procedures applied in the audit of the special-purpose financial statements referred to above.

A part of the department's funding comes from federal awards. Those federal awards are reported on in the State of Missouri Single Audit Report issued by the State Auditor's office. The single audit is conducted in accordance with the provisions of Office of Management and Budget Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*.

Claire McCaskill  
State Auditor

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

**INDEPENDENT AUDITOR'S REPORT ON COMPLIANCE  
AND ON INTERNAL CONTROL OVER FINANCIAL REPORTING**

Honorable Mel Carnahan, Governor  
and  
Keith Wenzel, Director  
Department of Insurance  
Jefferson City, Missouri 65102

We have audited the special-purpose financial statements of the Department of Insurance as of and for the years ended June 30, 1999 and 1998, and have issued our report thereon dated September 20, 1999. We conducted our audit in accordance with generally accepted auditing standards and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States.

Compliance

As part of obtaining reasonable assurance about whether the special-purpose financial statements of the Department of Insurance are free of material misstatement, we performed tests of the department's compliance with certain provisions of laws, regulations, contracts, and grants, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no material instances of noncompliance that are required to be reported under *Government Auditing Standards*. However, we noted certain other instances of noncompliance which are presented in the accompanying Management Advisory Report.

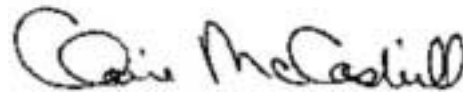

Internal Control Over Financial Reporting

In planning and performing our audit of the special-purpose financial statements of the Department of Insurance, we considered the department's internal control over financial reporting in order to determine our auditing procedures for the purpose of expressing our opinion on the special-purpose financial statements and not to provide assurance on the internal control over financial reporting. However, we noted certain matters involving the internal control over financial reporting and its operation that we consider to be reportable conditions. Reportable conditions involve matters coming to our attention relating to significant deficiencies in the design or operation of the internal

control over financial reporting that, in our judgment, could adversely affect the department's ability to record, process, summarize, and report financial data consistent with the assertions of management in the special-purpose financial statements.

A material weakness is a condition in which the design or operation of one or more of the internal control components does not reduce to a relatively low level the risk that misstatements in amounts that would be material to the special-purpose financial statements being audited may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions. Our consideration of the internal control over financial reporting would not necessarily disclose all matters in the internal control that might be reportable conditions and, accordingly, would not necessarily disclose all reportable conditions that are also considered to be material weaknesses. However, we noted certain matters involving the internal control over financial reporting and its operation that we consider to be material weaknesses, and these matters are presented in the accompanying Management Advisory Report.

This report is intended for the information of the management of the Department of Insurance and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

A handwritten signature in dark ink, appearing to read "Claire McCaskill". The signature is fluid and cursive, with the first name "Claire" written in a larger, more prominent script than the last name "McCaskill".

## Notes to the Financial Statements

DEPARTMENT OF INSURANCE  
NOTES TO THE FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies

A. Reporting Entity and Basis of Presentation

The accompanying special-purpose financial statements present only selected data for each fund of the Department of Insurance.

Receipts, disbursements, and changes in cash and investments are presented in Exhibit A for the General Revenue Fund-Federal, Insurance Examiners Fund, Department of Insurance Dedicated Fund, Trans-National Warranty Accounts, and the Rehabilitation Accounts. Except for the Trans-National Warranty Accounts and the Rehabilitation Accounts, appropriations from these funds are expended by or for the department for restricted purposes. The Trans-National Warranty Accounts and the Rehabilitation Accounts are not subject to appropriations.

The "Total (Memorandum Only)" column is presented as additional analytical data. Because this column does not identify the restrictions that exist by fund, it should be read only with reference to the details of each fund.

Receipts are presented in Exhibit B for the General Revenue Fund-State, Workers' Compensation Fund, Second Injury Fund, and the State School Moneys Fund. Receipts include monies the department collects during its normal activities and remits to the funds. These amounts are not necessarily related to appropriations.

Appropriations, presented in Exhibit C, are not separate accounting entities. They do not record the assets, liabilities, and equities of the related funds but are used only to account for and control the department's expenditures from amounts appropriated by the General Assembly.

Expenditures presented for each appropriation may not reflect the total cost of the related activity. Other direct and indirect costs provided by the department and other state agencies are not allocated to the applicable fund or program.

B. Basis of Accounting

The Statements of Receipts, Disbursements, and Changes in Cash and Investments, Exhibit A, prepared on the cash basis of accounting, present amounts when they are received or disbursed.

The Statement of Receipts, Exhibit B, prepared on the cash basis of accounting, presents amounts when received.

The Statement of Appropriations and Expenditures, Exhibit C, is presented on the state's legal budgetary basis of accounting which recognizes expenditures on the encumbrance method. Expenditures include amounts payable or encumbered at June 30 and paid during the lapse period, which ends August 31 for regular appropriations and December 31 for capital improvement appropriations. The authority to expend appropriations ends with the close of the lapse period. However, the General Assembly may authorize reappropriation of the unexpended balances of capital improvement appropriations for the following year. The General Assembly also may authorize biennial capital improvement appropriations, for which the unexpended balances at June 30 of the first year of the two-year period are reappropriated for expenditure during the second year.

The cash basis of accounting and the budgetary basis of accounting differ from generally accepted accounting principles, which require revenues to be recognized when they become available and measurable or when they are earned and expenditures or expenses to be recognized when the related liabilities are incurred.

#### C. Fiscal Authority and Responsibility

The department administers transactions in the funds listed below. The state treasurer as fund custodian and the Office of Administration provide administrative control over fund resources within the authority prescribed by the General Assembly, except for the Trans-National Warranty Accounts and the Administrative Supervision Accounts which are controlled entirely by the department.

General Revenue Fund-Federal: The department administers a program financed wholly or partially by federal monies maintained in the state treasury in the Department of Insurance's-Federal Fund. These federal funds may be received in advance, when related expenditures are made, or after they are made. Appropriations from this fund authorize the disbursements of the department's federal funds.

Insurance Examiners Fund: This fund is authorized by Sections 374.160 and 374.162, RSMo 1994, to receive all monies paid to the state by insurance companies for the costs incurred by the department in conducting examinations, valuations, or proceedings against such companies. Expenditures, authorized by appropriations, are to be used for the purposes of paying the compensation of insurance examiners and expenses incurred for supervision and support of the examiners. Any unexpended balances in this fund are perpetually maintained for the purposes of the fund.

Department of Insurance Dedicated Fund: This fund is authorized by Section 374.150, RSMo 1994, to receive all fees due the state under the provisions of the insurance laws.

Appropriations from this fund are to be used solely for the payment of expenditures incurred by the department in performing the duties required by law which are not paid for by another source of funds. Any unexpended balances in this fund are perpetually maintained for the purposes of this fund unless the unencumbered balance at the close of the biennium year exceeds two times the total amount appropriated, paid, or transferred to the fund during such fiscal year.

Trans-National Warranty Accounts - The MDI established various accounts to pay claims for an insurance company that had issued vehicle warranty agreements in Missouri but was not licensed to conduct business in the state. These bank accounts were established outside the state treasury and are not state funds.

Rehabilitation Accounts - The MDI established various joint bank accounts and investments outside of the state treasury for the payment of claims and administrative expenses for an insurance company that was placed under rehabilitation by the department. These funds are not state funds.

General Revenue Fund - State: The department does not receive appropriations from this fund and does not maintain a proprietary interest in the fund. Receipts collected by the department and deposited into the General Revenue Fund - State include the following:

- 1) Premium taxes: In accordance with various provisions of Chapter 148, RSMo 1994 and RSMo Cumulative Supp. 1999, insurance companies licensed in the state are required to pay a two percent tax on direct premiums received during the calendar year. The department certifies to the Department of Revenue the amount of premium taxes due together with the amount of quarterly installments to be paid by the insurance companies. The Department of Revenue collects the premium taxes and deposits them into the General Revenue Fund - State. Some premium taxes deposited into the General Revenue Fund - State are not available for general revenue purposes. The provisions of Chapter 148, RSMo 1994 and RSMo Cumulative Supp. 1999, restrict about 50 percent of such premium taxes for distribution to the various school districts in the state.
- 2) Surplus lines taxes: In accordance with various provisions of Chapter 384, RSMo 1994, the department collects and deposits into the General Revenue Fund - State a five percent tax on net premiums for high risk insurance which is underwritten by a surplus lines insurer. The department certifies to the Department of Revenue all penalties and interest due as a result of late payments. The Department of Revenue collects the penalties and interest and deposits them into the General Revenue Fund - State.

Workers' Compensation Fund: In accordance with Section 287.690, RSMo 1994, on October 31 each year, the director of the Division of Workers' Compensation estimates

the amount of revenue required to administer this chapter and determines the rate of tax for the following calendar year based on that estimate as well as the estimated December 31 balance of the fund. The tax, which is imposed upon all insurance companies providing workers' compensation insurance coverage and authorized self-insurers, shall not exceed two percent in lieu of all other taxes on the workers' compensation net deposits, net premiums, or net assessments. The Department of Revenue collects these taxes and deposits them into the Workers' Compensation Fund.

Second Injury Fund: In accordance with Section 287.715.2, RSMo 1994, on October 31 each year, the director of the Division of Workers' Compensation estimates the amount of benefits payable from the Second Injury Fund during the ensuing calendar year and calculates the total amount of the annual surcharge based on that estimate to be imposed upon all workers' compensation policyholders and authorized self-insurers. The surcharge imposed shall be set at and calculated against a percentage of the policyholder's or self-insured's workers' compensation net deposits, net premiums, or net assessments for the previous policy year. The Department of Revenue collects the surcharges and deposits them into the Second Injury Fund.

State School Moneys Fund: Fines and forfeitures imposed and collected by the department under the Missouri Insurance Code are deposited into the State School Moneys Fund.

D. Employee Fringe Benefits

In addition to the social security system, employees are covered by the Missouri State Employees' Retirement System (MOSERS) (a noncontributory plan) and may participate in the state's health care, optional life insurance, deferred compensation, and cafeteria plans. The optional life insurance and cafeteria plans involve only employee contributions or payroll reductions. Also, the deferred compensation plan involves employee payroll deferrals and a monthly state matching contribution for each participating employee.

The state's required contributions for employee fringe benefits are paid from the same funds as the related payrolls. Those contributions are for MOSERS (retirement, basic life insurance, and long-term disability benefits); social security and medicare taxes; health care premiums; and the deferred compensation plan match.

Employee fringe benefits in the financial statements at Exhibit A are the transfers from the Insurance Examiners Fund and the Department of Insurance Dedicated Fund for costs related to salaries paid from those funds. Transfers related to salaries are not appropriated by agency and thus are not presented in the financial statement at Exhibit C.

2. Cash and Investments

The balances of the General Revenue Fund-Federal, Insurance Examiners Fund, and the Department of Insurance Dedicated Fund are pooled with other state funds and invested by the state treasurer.

### Deposits

The department's deposits in the Trans-National Warranty Accounts and the Administrative Supervision Accounts at June 30, 1999 and 1998, were entirely covered by federal depository insurance.

### Investments

The Rehabilitation Accounts' only investment at June 30, 1999 and 1998, was a U.S. Treasury note with a reported amount of \$85,000 (which approximated fair value).

This investment was held by the custodial bank in the name of the insurance company and the department.

### 3. Article X Refunds/Refund Replenishments

Article X, Sections 16 through 24 of the Missouri Constitution establishes a revenue limit for Missouri State Government. Total state revenues exceeded this limit in fiscal years 1997, 1996, and 1995 which triggered income tax refund liabilities under provisions of the Constitution. The Office of Administration calculated the proportional share of the liabilities to be allocated to each fund and transfers were made from Insurance Examiners Fund and the Department of Insurance Dedicated Fund to the state's General Revenue Fund to cover each fund's share of the liabilities.

### 4. State Office Building Rent

The Office of Administration calculated the proportional share of costs for state office building space to be allocated to each fund, and monthly transfers were made from the Insurance Examiners Fund and the Department of Insurance Dedicated Fund to the state's General Revenue Fund to cover each fund's share of the costs.

### 5. Insurance Counseling Contract Costs

The MDI contracted with the Missouri Patient Care Review Foundation to provide insurance counseling services for senior citizens. This expenditure category represents the costs associated with this contract paid from the General Revenue Fund - Federal.

### 6. Office of Information Technology Upgrade

The Missouri General Assembly made appropriations from the Department of Insurance Dedicated Fund for the department's proportionate share of the statewide upgrade, replacement, and improvements to information technology systems. These appropriations are administered by the Office of Administration.

7. Lease Parking

The Missouri General Assembly made appropriations from the Department of Insurance Dedicated Fund for the department's proportionate share of lease parking at the state office buildings in St. Louis and Kansas City. These appropriations are administered by the Office of Administration, Division of Facilities Management.

8. Reconciliation of Total Disbursements to Appropriated Expenditures

Disbursements on Exhibit A reconcile to appropriated expenditures on Exhibit C as follows:

|   |    | Year Ended June 30,                |                                |   |                                    |                                |   |

9. Securities on Deposit

Insurance companies doing business in Missouri are required to deposit securities with the department for the protection of policy holders and creditors in accordance with various provisions of Chapters 354, 376, 379, 381, and 384, RSMo 1994 and RSMo Cumulative Supp. 1999. Only capital securities are required and the requirements are dependent on the type of insurance company.

Securities having a total accepted value of approximately \$268.5 and \$261.9 million at December 31, 1998 and 1997, respectively, were on deposit with the contracted bank. The accepted value is the market value of each security at year-end. These amounts are not included in the financial statements because the department has no ownership interest in them. Missouri domiciled insurance companies sometimes maintain securities on deposit in excess of Missouri requirements to meet the depository requirements of other states in which they do business. Foreign domiciled insurance companies are frequently not required to deposit securities with the department if securities meeting Missouri requirements are on deposit with the applicable state of domicile.

## MANAGEMENT ADVISORY REPORT SECTION

Management Advisory Report -  
State Auditor's Recommendations

DEPARTMENT OF INSURANCE  
SUMMARY OF FINDINGS

1. Receipts (pages 26-27)

Some receipts are not transmitted to the Department of Revenue for deposit on a timely basis and some checks are not restrictively endorsed immediately upon receipt.

2. Examiners' Expense Accounts (pages 27-29)

For the expense accounts reviewed, examiners claimed the maximum meal allowance for every meal even though the department's policy indicates the lesser of the meal allowance rate or actual expenses will be reimbursed. In addition, the examiners sometimes use inefficient travel practices causing additional expenses to be incurred.

3. Federal Grant Expenditures (pages 29-30)

The department is not adequately reviewing the monthly invoices submitted for insurance counseling services for senior citizens and obtaining explanations for items such as overtime hours worked and indirect costs billed.

4. Computer Information Systems (page 30)

The department does not have a formal contingency plan for the computer system.

5. Receiverships (pages 30-31)

Reports are submitted by the special deputy receivers or agents for insurance companies in receivership; however, MDI personnel only occasionally visit the special deputy receivers and agents to review the accounting records which support these reports. In addition, while independent audit reports are required for insurance companies in rehabilitation, there is no requirement for audits of insurance companies in liquidation.

6. Delinquent Taxes (pages 31-33)

The MDI receives a delinquent tax listing from the Department of Revenue; however, these listings are not reconciled with the MDI's delinquent tax listings in a timely manner. In addition, the MDI delinquent tax listing requires several reconciling items and manual adjustments to agree to the Department of Revenue delinquent tax listing.

7. Regulation of Health Maintenance Organizations (pages 33-34)

The MDI has developed written procedures outlining what is to be included in the various health maintenance organization reports but not how the health maintenance organization reports are to be analyzed. Additionally, reports are frequently filed late by the various health maintenance organizations and, while the Managed Care Section does follow-up on these delinquent reports, no forfeiture is assessed to the organizations for filing late reports.

8. Market Conduct Section (page 34)

Written examination programs are sometimes not included in the working papers.

DEPARTMENT OF INSURANCE  
MANAGEMENT ADVISORY REPORT -  
STATE AUDITOR'S RECOMMENDATIONS

We have audited the special-purpose financial statements of the Department of Insurance as of and for the years ended June 30, 1999 and 1998, and have issued our report thereon dated September 20, 1999.

The following Management Advisory Report presents our findings and recommendations arising from our audit of the Department of Insurance's special-purpose financial statements. During our audit, we also identified certain management practices which we believe could be improved. Our audit was not designed or intended to be a detailed study of every system, procedure, and transaction. Accordingly, the findings presented in the following report should not be considered as all-inclusive of areas where improvements may be needed.

|           |                 |
|-----------|-----------------|
| <b>1.</b> | <b>Receipts</b> |
|-----------|-----------------|

The Missouri Department of Insurance (MDI) collects receipts for various fees, licenses, taxes, and other miscellaneous items; however, some receipts are not transmitted to the Department of Revenue (DOR) for deposit on a timely basis. Frequently, checks are held by the Support Services Section until notification is received from another section of the MDI that the check is for the correct amount. If the check is not for the correct amount, it will be returned to the party submitting it. The Support Services Section records checks being held on a "pending check log" and the date the check is eventually transmitted or returned is recorded on the log.

On September 8, 1999, we counted the receipts being held by the Support Services Section and found 163 checks totaling approximately \$460,000 on hand. Forty-five of these checks, totaling approximately \$27,000, were dated between February 5, 1999 and July 31, 1999. Furthermore, only one of these checks had been restrictively endorsed. In addition, the "pending check log" is not kept up to date. Several checks which had already been transmitted or returned still remained on the log.

To adequately safeguard monies and reduce the risk of loss or misuse of funds, checks should be restrictively endorsed immediately upon receipt and transmitted to the DOR on a timely basis.

**WE RECOMMEND** the MDI restrictively endorse checks immediately upon receipt and transmit receipts to the DOR in a timely manner. In addition, the MDI should ensure the "pending check log" is properly updated.

## **AUDITEE'S RESPONSE**

*The department agrees in part and will implement the recommendations to the extent possible. The checks in question are those that are not readily attributable to a specific invoice or are for an incorrect amount. They may be categorized into three areas: (1) those ultimately deposited into the Dedicated Fund, (2) those ultimately deposited into the Exam Fund, and (3) those ultimately deposited into funds (General Revenue and the School Fund) supervised by other departments. The MDI can immediately deposit those funds that go into the Dedicated Fund and reconcile the accuracy of the amounts received post-deposit. There is no appropriation, however, for refund of receipts that exceed the amount due when funds are deposited into the Exam Fund. An appropriation will need to be requested. MDI will work with the other departments on the third category of funds to determine their ability to reconcile receipts post-deposit.*

|                                       |
|---------------------------------------|
| <b>2. Examiners' Expense Accounts</b> |
|---------------------------------------|

The Insurance Examiners Fund was established pursuant to Section 374.162, RSMo 1994, to pay market conduct and financial examiners' salaries and expenses. The fund is reimbursed through payments by insurance companies being examined. These companies subsequently deduct 100 percent of the billing amounts from the premium taxes paid to the state. The MDI computes billings for the companies using the examiners' expense reports, time sheets, and other miscellaneous expense amounts. The MDI adds an additional 15 percent administrative fee to each billing in accordance with Section 374.160(3), RSMo 1994.

Travel expenses are frequently incurred by the examiners since they must travel to the insurance companies to perform the examinations. Travel expenses paid from the Insurance Examiners Fund totaled approximately \$1.64 million and \$1.38 million for fiscal years 1999 and 1998, respectively. The MDI has developed travel policies which are included in the department's policy manual.

A. During our review of all market conduct and financial examiners' expense accounts for the period from April 15, 1999 to May 15, 1999, we noted the following concerns:

1. All examiners claimed the maximum meal allowances every day ranging from \$30 to \$46 per day. It does not appear reasonable that every examiner would always spend the maximum amount.
- 2.a. Two employees working on the same market conduct examination in Des Moines, Iowa drove separate vehicles from Jefferson City on three different occasions and received mileage reimbursements of approximately \$540 each rather than only incurring mileage expenses for one vehicle. Additionally, a third examiner flew from St. Louis to Des Moines, and then rented a vehicle while in Des Moines. His airfare and rental car expenses during this same time period were over \$1,000.

- b. For another market conduct examination in Des Moines, Iowa, one examiner drove from Kansas City, a second examiner drove from Jefferson City, and the third examiner flew from Springfield and then rented a vehicle while in Des Moines. Total mileage, airfare, and rental car costs for this time period totaled over \$3,000.
- c. Two employees working on the same financial examination drove separate vehicles from Kansas City to Springfield on three different occasions and received mileage reimbursements of approximately \$300 each rather than only incurring mileage expenses for one vehicle.

We also reviewed several other months during the audit period and noted similar practices regarding incurring and reporting travel expense. The department's travel policy indicates that the Federal Travel Directory rates will be used as a meal guide; however, the policy also indicates this meal allowance amount is not an entitlement and the lesser of the meal allowance rate or actual expenses will be reimbursed. In addition, the department's travel policies indicate employees traveling to the same location are expected to efficiently use available automobile space. Furthermore, the department's travel policies indicate that employees are expected to exercise the same care in incurring expenses as a prudent person would exercise if traveling on personal business.

The MDI should ensure that employees comply with the department's travel policy and establish adequate controls over business travel to ensure that unnecessary expenses are not incurred or claimed by employees. Any questioned expenses could be denied for reimbursement or the department should request additional documentation to support the charges.

- B. The department's travel policies provide for the examiners to return to their domicile every other weekend. On non-travel weekends, the examiners remain at the job site and are reimbursed for expenses just like normal work days. While in many instances it is more cost effective for the MDI to pay hotel and meal expenses than to pay the necessary expenses for the examiners to return to their domicile, we noted an instance where an examiner remained in Kansas City for the weekend rather than returning to his domicile 114 miles away. The examiner incurred hotel and meal expenses of approximately \$400 while the mileage expense for a round trip between Kansas City and his domicile would have only been approximately \$65.

The MDI should consider changes to the department's travel policies so that examiners would be required to determine if it is more economical to remain at the job site or return to their domicile on non-travel weekends. This would help ensure that unnecessary expenses are not incurred and help reduce examination costs.

Since insurance companies pay for these travel expenses and then receive a credit on their premium taxes thus reducing state revenues, it is especially important for the MDI to ensure expenses are reasonable.

**WE RECOMMEND** the MDI:

- A. Ensure expenses claimed by the examiners are reasonable and in compliance with the department's travel policies.
- B. Consider changes to the department's travel policies so that examiners do not remain at the job site over the weekend when it would be more economical to return to their domicile.

**AUDITEE'S RESPONSE**

- A. *The department agrees and will implement the recommendation. The department is committed to conducting examinations in as cost-effective a manner as possible. We will continue to seek ways to ensure only reasonable expenditures are made.*
- B. *The department will consider changes to the travel policies.*

**3.**

**Federal Grant Expenditures**

The MDI receives a federal grant from the U.S. Department of Health and Human Services, Health Care Financing Administration, which is used to contract with a not-for-profit foundation to provide insurance counseling services for senior citizens. The foundation submits a monthly invoice listing the hours spent by various personnel and the hourly reimbursement rate for the applicable personnel; an amount for materials, equipment, and supplies; and amounts for indirect costs, fringe benefits, and travel. We reviewed the October and November 1998 monthly invoices and noted the following concerns:

- C One employee was billed for 217 work hours for the month of October which would mean the employee would have worked at least 40 hours of overtime.
- C The indirect costs for October and November combined was \$17,826 of the \$47,529 billed (37.5 percent) with no explanation on the invoice or in the contract indicating how the indirect costs were calculated or what expenses they were designed to cover.
- C While mileage costs for October and November totaled \$1,648, the invoices only indicated the total number of miles for the month. No detail was provided to indicate the destination or the purpose of the travel.

While we requested and reviewed documentation to support these expenditures from the foundation, MDI does not adequately review these expenditures and obtain explanations for unusual items. The grant agreement with the Health Care Financing Administration requires the MDI to closely monitor contractor activities and contractor use of grant funds. Without a thorough review of the foundation's invoices, the MDI has less assurance that grant funds are being expended appropriately in compliance with grant requirements.

**WE RECOMMEND** the MDI require the foundation to submit adequate supporting documentation and review this documentation for reasonableness. Any undocumented or unusual items should be investigated and explained before approving invoices for payment.

#### **AUDITEE'S RESPONSE**

*The department agrees and has begun implementation of the recommendation. All grant expenditures will be closely scrutinized by appropriate MDI personnel.*

**4.**

#### **Computer Information Systems**

The department does not have a formal contingency plan for their computer system. As a result, the department has no formally negotiated arrangements for backup facilities in the event of a breakdown or disaster. All functions presently handled through the computer system, which include licensing, consumer complaints, various accounting processes, and many other systems, would have to be handled manually until repair or replacement was achieved. Failure to develop a formal contingency plan and arrangements for backup facilities increases the risk of prolonged down-time of the computer systems.

Development of contingency plans should include plans for a variety of situations, such as both short- and long-term plans for backup hardware, software, facilities, personnel, and power. Involvement of users in contingency planning is important since users will likely be responsible for maintaining at least a portion of the backup under various contingencies.

The major benefit of thorough contingency planning comes from the ability of the department to recover rapidly from disaster or extraordinary situations that might cause considerable loss or disruption to the department. The department's degree of reliance on the computer function justifies the need for contingency plans and periodic review of the plans .

**WE RECOMMEND** the MDI develop formal contingency plans and provide a system for periodic review and testing of the contingency plans.

#### **AUDITEE'S RESPONSE**

*The department agrees and has begun implementation of the recommendation. A large part of the development of a formal contingency plan was completed during Y2K planning activities.*

|                         |
|-------------------------|
| <b>5. Receiverships</b> |
|-------------------------|

Sections 375.1150 to 375.1246, RSMo 1994, provide the director of the MDI with the authority to administer Missouri chartered insurance companies requiring rehabilitation or liquidation, commonly referred to as receiverships. Such companies placed into receivership are under circuit court supervision with the judge appointing the MDI director as receiver. The director may appoint a special deputy receiver or agent. At June 30, 1999, there were three Missouri chartered insurance companies in rehabilitation and eleven in liquidation. Many of these receiverships have continued for several years with three companies in receivership since the 1980s.

For those companies involved in the liquidation process, significant administrative expenses are incurred which decrease the overall assets available at final liquidation. These expenses can include items such as special deputy receiver fees, legal fees, investment fees, payroll, travel, professional services, and office expenses, but do not include payments of claims. Based on reports submitted to the MDI, total administrative expenses for receiverships exceeded \$31 million in 1998, with over \$26 million being incurred by one receivership.

The MDI has established regulations regarding reporting requirements for insurance companies in receivership and based on the reports submitted by the special deputy receivers or agents, the MDI tracks administrative costs closely. However, MDI personnel indicated they only sporadically visit the special deputy receivers and agents to review the accounting records which support these reports. In addition, while audit reports are required for insurance companies in rehabilitation, there is no requirement for independent audits of insurance companies in liquidation. Without performing a review of the accounting records maintained by the special deputy receivers or requiring an audit of these records, the MDI has less assurance that the reports submitted to the MDI are accurate and can be relied upon.

**WE RECOMMEND** the MDI require independent audits for all receiverships or perform other monitoring procedures to ensure the information and reports submitted by the special deputy receivers or agents are accurate.

**AUDITEE'S RESPONSE**

*The department agrees and will begin looking at ways to improve oversight of information and reports from special deputy receivers or agents.*

|                            |
|----------------------------|
| <b>6. Delinquent Taxes</b> |
|----------------------------|

In accordance with the provisions of Chapter 148, RSMo 1994, the MDI certifies to the Department of Revenue (DOR) the amount of premium taxes due together with the amount of the quarterly installments to be made by the insurance companies licensed in Missouri. If the taxes are not paid on the dates specified by statute, they become delinquent. Delinquent tax amounts are used by the MDI when preparing premium tax reconciliations. Although the DOR is responsible for keeping the primary record of delinquent taxes, the MDI's listing serves as a means to monitor collections and delinquencies.

- A. The MDI receives a delinquent tax listing from the DOR monthly. Current MDI procedures are to perform a reconciliation between the DOR and the MDI listings on a quarterly basis; however, these quarterly reconciliations are not being performed in a timely manner. As of September 30, 1999, MDI personnel were still working on the March 31, 1999 reconciliation.

Timely reconciliations are necessary to ensure all taxes are properly collected and recorded, and to ensure delinquent taxes are promptly followed up. Only by performing such reconciliations can the MDI detect and correct errors on a timely basis.

- B. At March 31, 1999, the MDI computerized delinquent tax listing totaled approximately \$5.47 million while the actual delinquent taxes totaled only approximately \$1.44 million. The MDI delinquent tax listing requires several reconciling items and manual adjustments including the following:

- 1) Taxes for 1992 totaling over \$3.5 million that were actually paid are included on the delinquent listing. MDI personnel stated that when reporting requirements changed for some self-insurers from individual to group reporting, the payments were received under the group name and the computer system treated all of the individual self-insurer taxes as delinquent.
- 2) Taxes for 1990 totaling approximately \$440,000 that were never due are included on the delinquent listing. MDI personnel indicated this amount relates to prepayments for 1991 taxes for two insurers who were non-taxable in 1990 but became taxable in 1991, and the computer system treated these prepayments as 1990 delinquent taxes.

It appears that the MDI makes manual adjustments to the delinquent tax totals so that the delinquent tax amounts shown on the premium tax reconciliations are fairly stated. This takes additional time, however, and also increases the possibility that errors would not be discovered, causing delinquent taxes to be overstated and the premium tax reconciliations to be misstated. In addition, all taxes actually delinquent may not be properly identified by the MDI, which could result in a loss of tax monies due to the state.

**WE RECOMMEND** the MDI:

- A. Perform reconciliations between the DOR and the MDI delinquent tax listings in a timely manner.
- B. Correct the computer system and work with the DOR to ensure that the delinquent tax listing is accurate.

**AUDITEE'S RESPONSE**

- A. *The department agrees and will implement the recommendation.*
- B. *The department agrees and has scheduled the computer software for a rewrite.*

|  |
|--|
| <b>7. Regulation of Health Maintenance Organizations</b> |
|--|

Health maintenance organizations (HMOs) established and operated under Chapter 354, RSMo 1994, are entities which provide or arrange for basic and supplemental health care services to enrollees on a prepaid basis. The MDI has licensed 30 such organizations in the state and has also created a Managed Care Section within the MDI to monitor the activities of these organizations. Chapters 354 and 376, RSMo 1994, require these organizations to file various reports with the MDI. During our review of these reports, we noted the following concerns:

- A. The MDI has developed written procedures outlining what is to be included in the various HMO reports but not how the HMO reports are to be analyzed. The various analysts in the Managed Care Section have developed different methods, including checklists, computer reports, and correspondence with the organizations, to document their review of the reports; however, no standard, consistent procedures have been developed.

Documentation of the procedures used in the review process is necessary to ensure that all reports are reviewed using consistent criteria and to ensure that the required information is contained in each report.

- B. Reports are frequently filed late by the various HMOs. Only ten of the thirty organizations filed the quarterly reports due July 15, 1999 by the due date. Fifteen organizations filed the report late and five organizations still had not filed the report as of September 30, 1999. While the Managed Care Section does follow-up on these delinquent reports, no fine or fee is assessed to the organizations for reports that are filed late.

Section 354.444, RSMo Cumulative Supp. 1999, provides for a forfeiture fee not to exceed \$100 for each violation of Sections 354.400 to 354.636, RSMo 1994 and Cumulative Supp. 1999, for which no specific punishment is provided. The MDI should

consider assessing such forfeiture fees to HMOs which do not file statutorily required reports in a timely manner. This would encourage HMOs to file reports on a timely basis and reduce the amount of time necessary for the Managed Care Section to follow-up on reports not filed.

**WE RECOMMEND** the MDI:

- A. Develop standardized, written procedures for the review of health maintenance organizations' reports. These procedures should indicate how the review is to be documented, including the name of the reviewer, date prepared, and the results of the review.
- B. Consider assessing fines or fees to HMOs which do not file statutorily required reports in a timely manner.

**AUDITEE'S RESPONSE**

- A. *The department agrees and has begun the process of developing standardized, written procedures.*
- B. *The department agrees and will consider assessing fines or fees to HMOs which do not file required reports in a timely manner.*

|                                  |
|----------------------------------|
| <b>8. Market Conduct Section</b> |
|----------------------------------|

The Market Conduct Section is responsible for examining various aspects of insurance companies including licensing of agents, sales and advertising policies, underwriting, rate application, cancellations and renewals, consumer complaints, and claims practices. Market conduct examinations are scheduled based on a number of factors including certain issues the Director deems a priority, the number of complaints received for a company, a rapid increase in the number of complaints, shifts in the lines of insurance offered, information obtained from other states, and prior examinations.

Market Conduct Section personnel indicated that they follow procedures set by the National Association of Insurance Commissioners (NAIC) as outlined in the NAIC Market Conduct Examiners Handbook in performing market conduct examinations; however, written examination programs are sometimes not included in the working papers. The NAIC Market Conduct Examiners Handbook states the examiner-in-charge should provide to the other examiners "specific instructions concerning the conduct and purpose of the examination" and "develop audit trail procedures for the examination". Examination programs should be developed for each examination and filed with the working papers. Use of such programs would provide more assurance that all necessary areas have been reviewed and all examination steps have been completed. Without such

programs, there is a greater likelihood that examination objectives and procedures may not be completed.

**WE RECOMMEND** the MDI require the Market Conduct Section utilize formal written examination programs documenting the procedures performed. A copy of the program should be included in the working papers and an indication of the steps performed as well as the examiner performing the steps should be made.

### **AUDITEE'S RESPONSE**

*The department agrees and will implement the recommendation.*

This report is intended for the information of the management of the Missouri Department of Insurance and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

## STATISTICAL SECTION

History, Organization, and  
Statistical Information

DEPARTMENT OF INSURANCE  
HISTORY, ORGANIZATION  
AND STATISTICAL INFORMATION

The Missouri Division of Insurance was created by an act of the Missouri legislature in 1869. With the enactment of the state Omnibus Reorganization Act of 1974, the agency was transferred to the Department of Consumer Affairs, Regulation and Licensing. Constitutional Amendment No. 6, passed in August 1984, changed the name of the Department of Consumer Affairs, Regulation and Licensing, to the Department of Economic Development, effective September 7, 1984. Constitutional Amendment No. 4, passed in August 1990, created a new Department of Insurance (MDI), effective July 1, 1991.

The department operates under the authority of Chapter 374, RSMo. The management and control of the department is vested in a director who is nominated by the governor with the advice and consent of the Senate. Jay Angoff served as Director from February 16, 1993 to October 31, 1998, and A.W. McPherson served as acting Director from November 1, 1998 to May 9, 1999. Keith Wenzel was appointed Director on May 10, 1999, and continues to serve in that capacity.

When the agency was organized in 1869, 51 domestic and 120 foreign insurance companies were licensed in Missouri. As of December 1998, there were 293 domestic and 1,560 foreign insurance companies licensed in Missouri.

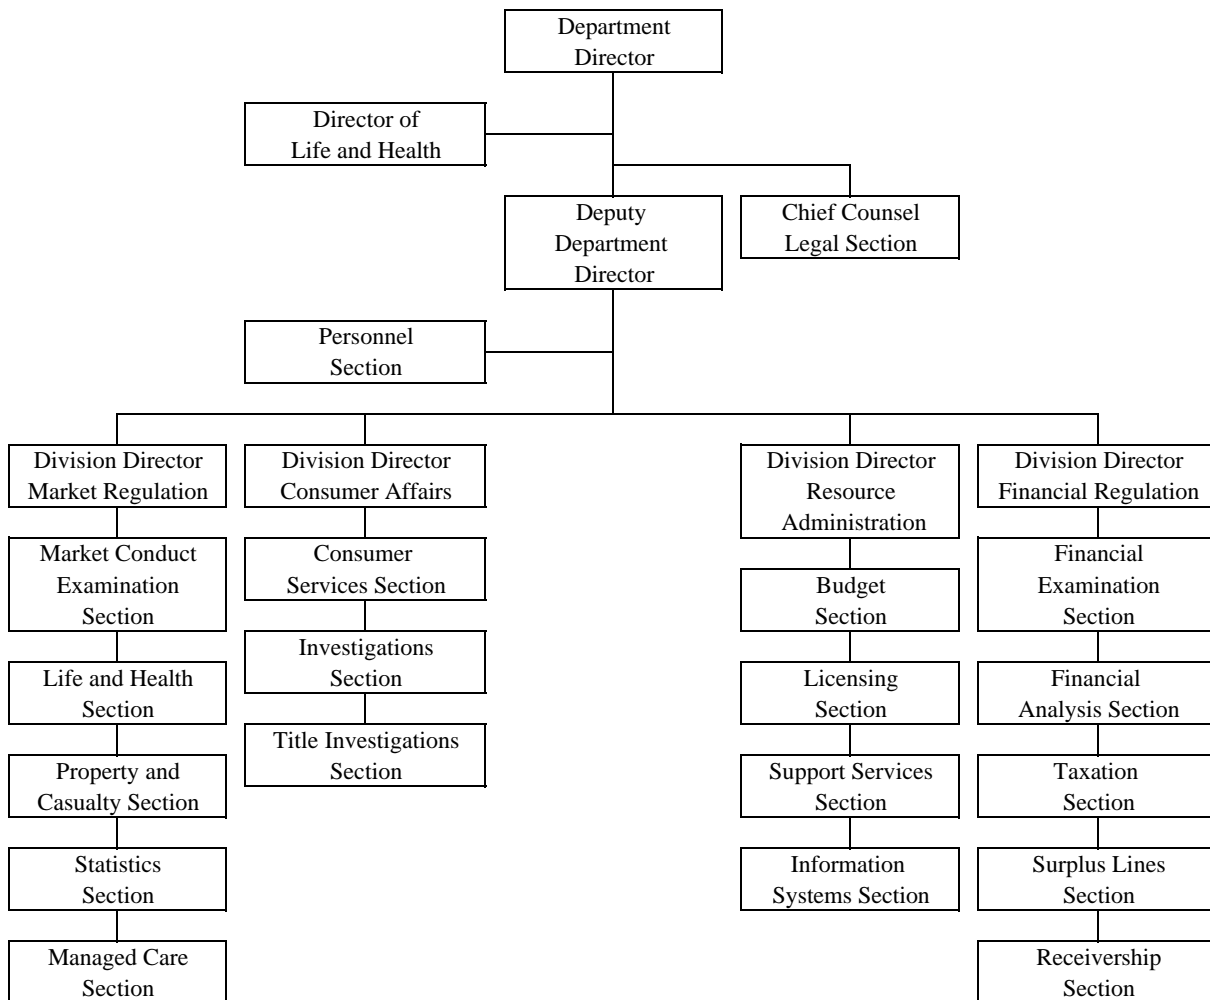

The MDI regulates the insurance industry in the state through enforcement of Chapters 325, 354, and 374 through 385, RSMo. The department regulates and licenses the insurance industry in the state; ensures that the insurance industry is financially sound, trustworthy, competent, and responsive to the insurance-buying public; and ensures that the insurance industry complies with the laws of the state. To fulfill these responsibilities, the department maintains a central office in Jefferson City and branch offices in St. Louis and Kansas City. As illustrated in the following organization chart, the MDI is organized into these functional units: Market Regulation, Financial Regulation, Resource Administration, and Consumer Affairs. The MDI had 209 employees at June 30, 1999.

The following provides a breakdown of the type of companies licensed in the state.

| Type of Company                     | As of December 31, 1998 |              |
|-------------------------------------|-------------------------|--------------|
|                                     | Missouri<br>Domicile    | Foreign      |
| Assessment                          | 2                       | 0            |
| FAIR Plan                           | 1                       | 0            |
| Foreign Fire                        | 0                       | 6            |
| Fraternal Benefit                   | 2                       | 32           |
| Health Maintenance Organization     | 24                      | 7            |
| Health Service Corporation          | 2                       | 0            |
| Life                                | 43                      | 637          |
| Malpractice                         | 2                       | 0            |
| Missouri (Farm) Mutuals             | 42                      | 0            |
| Missouri Mutuals                    | 88                      | 0            |
| Mutual Casualty                     | 7                       | 43           |
| Mutual Fire                         | 0                       | 29           |
| Prepaid Dental Plan                 | 9                       | 6            |
| Reciprocal Inter-Insurance Exchange | 9                       | 10           |
| Reinsurer                           | 0                       | 61           |
| Risk Retention Group                | 0                       | 39           |
| Self-Insured Liability              | 9                       | 0            |
| Stipulated Premium                  | 1                       | 0            |
| Stock Casualty                      | 45                      | 576          |
| Stock Fire                          | 4                       | 100          |
| Title                               | 3                       | 14           |
| Totals                              | <u>293</u>              | <u>1,560</u> |

According to the National Association of Insurance Commissioners (NAIC), for 1998, Missouri ranks tenth nationally in the number of companies incorporated in the state and eighteenth in the amount of premium volume written. The department's budget for fiscal year 1999 ranks seventeenth nationally.

REVIEW OF THE  
DEPARTMENT OF SOCIAL SERVICES  
DIVISION OF YOUTH SERVICES

**From The Office Of State Auditor  
Claire McCaskill**

Report No. 2000-21  
April 3, 2000

# AUDIT REPORT

Office Of The  
State Auditor Of Missouri  
Claire McCaskill

April 2000

**The following problems were discovered as a result of a review conducted by our office of the Department of Social Services, Division of Youth Services.**

---

In recent years the Division of Youth Services has begun developing performance measures through its strategic planning process. However, additional performance measures need to be developed. For example, the Division of Youth Services does not currently measure recidivism rates into adult correctional facilities. Recidivism is the tendency of youth to relapse into delinquent or criminal behavior after their release from the Division of Youth Services. The division prepared a study of recidivism approximately eight years ago matching youth who had been released from the Division of Youth Services with inmates in the Department of Corrections. Since the study was so old, there was no documentation of how the study was conducted and the Division of Youth Services was not even able to locate a copy of the study for us to review.

To help the Division of Youth Services determine if their mission is accomplished and statutory obligations are met, the division tracks recidivism rates for juveniles who recidivate back into the Division of Youth Services. However, recidivism rates into the Department of Corrections are not considered.

As a part of our audit, we reviewed a national study that was published in October 1998. The study included information on new programs that several states were using to evaluate the effectiveness of juvenile programs. These programs included:

- The State of Texas continuously tracks outcomes for their specialized programs that treat committed serious and chronic juvenile offenders and are currently in the process of piecing together a more comprehensive program to include non-state facilities.
- The State of Maryland is including a system-wide recidivism analysis into their program evaluations for all programs, even informal supervision.
- The State of Florida provides annual reports on program accountability measures (measured in recidivism rates and program costs) that include state and locally operated residential, nonresidential, and boot camp programs.
- The State of Ohio has developed a tracking form used to track progress of juvenile offenders during and after their commitment to a juvenile program. This information is entered into a statewide tracking system.

(over)

YELLOW SHEET

An outcome listed in the Division of Youth Services' budget request is to return youth to their families and communities with the necessary skills to live and work within their communities. Without monitoring the recidivism rates into the Department of Corrections, which would be a measure of the long-term success of the division's programs, the Division of Youth Services has less assurance that this outcome is achieved. According to financial information obtained from the division, expenditures of state and federal funds by the division have increased from \$26.5 million in 1995 to over \$52 million in 1999. The State Auditor noted that the establishment of appropriate performance measures are particularly important for state agencies that have experienced such a rapid growth in expenditures.

For \$6.6 million of Juvenile Court Diversion Program costs incurred during fiscal year 1999, the Division of Youth Services did not have standardized procedures in place to monitor local juvenile courts to ensure they were properly submitting reimbursement requests based upon actual expenditures and were accurately reporting the number of at-risk and diverted youth.

State law allows the division to bill local school districts for the cost of educating youth while in the division's custody. The Division of Youth Services is owed approximately \$435,000 in overdue educational services billings, and does not have the authority to bill interest and penalties on and/or withhold from future state distributions for delinquent educational services billings.

## STATE AUDITOR'S REPORT

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

Honorable Mel Carnahan, Governor  
and  
Gary J. Stangler, Director  
Department of Social Services  
and  
Mark D. Steward, Director  
Division of Youth Services  
Jefferson City, Missouri 65102

We have conducted a review of the Department of Social Services, Division of Youth Services (DYS). The scope of our review included, but was not limited to, the two fiscal years ended June 30, 1999. The objectives of this review were to:

1. Review the operation of selected DYS programs.
2. Review selected financial transactions of the DYS.
3. Review certain internal control procedures, legal compliance issues, and management practices to determine the propriety, efficiency, and effectiveness of those procedures and practices.

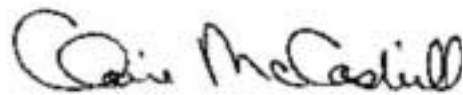

Our review was made in accordance with applicable generally accepted government auditing standards and included such procedures as we considered necessary in the circumstances. In this regard, we reviewed applicable state and federal laws, interviewed applicable personnel, inspected relevant records and reports of the DYS, and reviewed selected studies and reports related to the treatment of juvenile offenders.

As part of our review, we assessed the DYS's management controls to the extent we determined necessary to evaluate the specific matters described above and not to provide assurance on those controls. With respect to management controls, we obtained an understanding of the design of relevant policies and procedures and whether they have been placed in operation and we assessed control risk. In order to assess control risk, we performed tests of controls to obtain evidence regarding the effectiveness of the design and operation of certain policies and procedures.

Our review was limited to the specific matters described above and was based on selective tests and procedures considered appropriate in the circumstances. Had we performed additional procedures, other information might have come to our attention that would have been included in this report.

The accompanying History, Organization, and Statistical Information is presented for informational purposes. This information was obtained from the DYS's management and was not subjected to the procedures applied in the review of the DYS.

The accompanying Management Advisory Report presents our findings and recommendations arising from our review of the DYS.

A handwritten signature in black ink, appearing to read "Claire McCaskill". The signature is fluid and cursive, with the first name "Claire" written in a larger, more prominent script than the last name "McCaskill".

Claire McCaskill  
State Auditor

August 27, 1999 (fieldwork completion date)

The following auditors participated in the preparation of this report:

|                     |                        |

## MANAGEMENT ADVISORY REPORT SECTION

REVIEW OF THE  
DEPARTMENT OF SOCIAL SERVICES  
DIVISION OF YOUTH SERVICES  
SUMMARY OF FINDINGS

1. Recidivism Study (pages 6-7)

The DYS does not monitor the recidivism of youth who were formerly in the custody of DYS and later are committed to the Department of Corrections. In addition, the DYS needs to establish additional objective and quantifiable performance measures to measure the success of DYS programs.

2. Juvenile Court Diversion Program (pages 7-9)

The DYS does not have standardized procedures in place to monitor local juvenile courts to ensure they are properly submitting reimbursement requests based upon actual expenditures and are accurately reporting the number of at-risk and diverted youth.

3. Educational Services Billings (pages 9-10)

The DYS is owed approximately \$435,000 in overdue educational services billings, and does not have the authority to bill interest and penalties on delinquent amounts.

REVIEW OF THE  
DEPARTMENT OF SOCIAL SERVICES  
DIVISION OF YOUTH SERVICES  
STATE AUDITOR'S RECOMMENDATIONS

**1.**

**Recidivism Study**

In recent years the DYS has begun developing performance measures through its strategic planning process. However, additional performance measures need to be developed. For example, the DYS does not currently measure recidivism rates into adult correctional facilities. Recidivism is the tendency of youth to relapse into delinquent or criminal behavior after their release from the DYS. The DYS prepared a study of recidivism approximately eight years ago matching youth who had been released from the DYS with inmates in the Department of Corrections. Since the study was so old, there was no documentation of how the study was conducted and the DYS was not even able to locate a copy of the study for us to review.

The mission of the DYS is to enable youth to fulfill their needs in a responsible manner within the context of and with respect for the needs of the family and the community. Section 219.016.1, RSMo 1994, states the DYS is responsible for “the prevention and control of juvenile delinquency and the rehabilitation of children.” To help the DYS determine if its mission is accomplished and statutory obligations are met, the DYS tracks recidivism rates for juveniles who recidivate back into DYS. For example, the recidivism rate was eleven percent, fourteen percent, and twelve percent for the years ended June 30, 1999, 1998, and 1997, respectively. However, recidivism rates into the Department of Corrections are not considered.

As a part of our audit, we reviewed a national study prepared by the Koch Crime Institute entitled “White Paper Report on the Standardization of Juvenile Offender Program Evaluation” that was published in October 1998. The study included information on new programs that several states were using to evaluate the effectiveness of juvenile programs. These programs included:

- The State of Texas continuously tracks outcomes for its specialized programs that treat committed serious and chronic juvenile offenders and are currently in the process of piecing together a more comprehensive program to include non-state facilities.
- The State of Maryland is including a system-wide recidivism analysis into its program evaluations for all programs, even informal supervision.
- The State of Florida provides annual reports on program accountability measures (measured in recidivism rates and program costs) that include state and locally operated residential, nonresidential, and boot camp programs.

- The State of Ohio has developed a tracking form used to track progress of juvenile offenders during and after their commitment to a juvenile program. This information is entered into a statewide tracking system.

An outcome listed in the DYS's budget request is to return youth to their families and communities with the necessary skills to live and work within their communities. Without monitoring the recidivism rates into the Department of Corrections, which would be a measure of the long-term success of DYS's programs, the DYS has less assurance that this outcome is achieved. The DYS's performance measures should include measures of recidivism of youth released from the DYS's custody and targets for future levels of recidivism. This will give policy makers accurate information on successful juvenile offender programming necessary for effective decision making.

**WE RECOMMEND** the DYS measure the rate of recidivism of youth released from the DYS's custody who are subsequently committed to the Department of Corrections and set targets for future levels of recidivism. Also, the DYS should consider developing additional objective and quantifiable performance measures to measure the success of DYS's programs.

### **AUDITEE'S RESPONSE**

*Over the past couple of years, the division has developed and will continue to develop additional quantifiable measures of success for its programs. We concur that additional quantifiable measures should be developed to further measure the success of our programs.*

**2.**

### **Juvenile Court Diversion Program**

The Department of Social Services, Division of Youth Services (DYS), receives federal funds to operate the Juvenile Court Diversion (JCD) program. The JCD program provides funding for local juvenile courts to operate various treatment programs as an alternative to committing the youth to DYS. These treatment programs include various intervention and monitoring services. Local juvenile courts are to submit reimbursement requests to DYS monthly based on the actual expenditures of the previous month. During the year ended June 30, 1999, the division awarded approximately \$6.6 million in JCD funds to local juvenile courts throughout the state. The DYS tracks the success of the program by monitoring the number of youth served and the number of youth diverted from commitment to DYS. Among other uses, this information is provided to the General Assembly in the division's budget request. Our review of the DYS's monitoring of the JCD program indicated the following areas where improvements are needed:

- A. The DYS allows each of the five regions to determine what monitoring procedures are appropriate for the JCD programs in their region. In all of the regions, this monitoring includes on-site visits to the program and preparing a standardized monitoring form to document the monitoring visit. The objective of this monitoring visit is to determine if the

program is operational and if it is operating in a successful manner. Also, Section 219.041.5, RSMo 1994 states the purpose of these visits is to “examine the facilities, programs, books, and records.” Our review of the procedures for the on-site monitoring visits done by the regions noted the following.

- 1) Although a few of the regions also review financial records which support the monthly reimbursement requests, there are no standard procedures or documentation for this review. An audit conducted by the State Auditor's Office in one of these juvenile courts revealed the following:

- C Original invoices were not available to support expenditures claimed.
- C The juvenile court had not entered into a written contract with a local school district.
- C Payments were made to the judge administering the grant without proper documentation.
- C Reimbursements claimed exceeded actual expenditures.
- C Records to account for JCD funds received and for assets purchased from these funds, were not adequate.

The grant agreement requires the juvenile court to maintain financial records consistent with acceptable accounting practices and sufficient to provide an audit trail. The agreement also requires the court to submit reimbursement requests for actual costs incurred in delivering services during the project period. The DYS indicated it relies on external audits as a review of the fiscal aspects of the program. However, in many counties the JCD program funding is not significant to the overall financial operation of the county. As a result, the JCD funding may receive little or no audit coverage.

To ensure the juvenile courts are submitting reimbursement requests in accordance with their contract and any problems are detected and corrected in a timely manner, DYS should review the supporting documentation for reimbursement requests during monitoring visits.

- 2) None of the regions review case files to determine if the juvenile court properly reported to the DYS the number of at-risk youth and diverted youth that were served by the program. The DYS relies solely on the information provided by the juvenile courts to determine the number of at-risk and diverted youth. To verify the number of at-risk and diverted youth that are reported by the juvenile courts is accurate, DYS should review case files or other records during monitoring visits.

In addition, standardized monitoring procedures should be developed to aid the regions in consistently monitoring JCD programs throughout the state.

- B. According to DYS records, 91% and 89% of youth entering JCD programs were successfully diverted from commitment to DYS during the years ending June 30, 1998 and 1997, respectively. However, the DYS defines a youth as being diverted if they complete the program successfully and are not committed to DYS during the same program year. A youth completing the program one week before the end of the program year would be considered diverted, as long as he was not committed to DYS during the last week of the program year. The DYS indicated it relies on the juvenile courts to track the number of youth diverted, and the juvenile courts have no way to track the youth after the end of the program year. However, the juvenile court provides the names of all youth diverted through the program, but DYS does not track the youth beyond the end of the program year. To determine the effectiveness of this program, it appears necessary to track youth for a more extended period of time.

**WE RECOMMEND** the DYS:

- A. Develop standardized procedures for the regions to follow during monitor visits of JCD programs that include reviewing financial records which support reimbursement requests and other records which support the number of at-risk and diverted youth reported by the juvenile court.
- B. Track diverted youth for extended periods of time and use this data to help measure the success of the JCD program.

**AUDITEE'S RESPONSE**

*We concur with the recommendations.*

|   |
|---|
| <b>3. Educational Services Billings</b> |
|---|

In accordance with Section 163.073, RSMo 1994, the DYS bills local school districts for the cost of educating youth while in the DYS's custody. For the 1997-1998 school year, the DYS billed approximately \$1.5 million to local school districts. Bills are usually sent out to the local school districts in February and are due in 90 days, or usually May. As of August 23, 1999, our review noted the following approximate amounts that were unpaid:

| <u>School Year</u> | <u>Amount<br/>Unpaid</u> |
|--------------------|--------------------------|
| 1997-1998          | \$180,000                |
| 1996-1997          | 221,000                  |

|           |                         |
|-----------|-------------------------|
| 1995-1996 | <u>34,000</u>           |
| Total     | <u><u>\$435,000</u></u> |

Approximately one-half of the unpaid amount is owed by the City of St. Louis School District. Furthermore, we noted only approximately two-thirds of the billings are paid to the DYS by the due date.

The DYS works closely with the school districts on these billings and sends a notice to the local school districts the November before the bills are mailed informing the school districts of the students they will be billed for in February. This is intended to give the school districts time to research the youth they will be billed for to ensure they reside in their school district. The DYS sends out notices of unpaid amounts ninety days after the original billing and periodically sends out any changes made to the school district's bill as a result of youth actually residing in a different school district.

The DYS indicated there is no provision in the statutes to charge any interest or penalties on unpaid amounts for these educational services billings. In addition, there appears to be no provision which authorizes the state to withhold delinquent amounts from future state distributions to be made to these school districts. The DYS also indicated it has been working with their service coordinators to ensure DYS's records accurately list each youth's local school district in an effort to ensure it bills the correct school district the first time. To ensure all monies due to the state are received in a timely manner, DYS should seek legislative changes to mandate interest and penalties on and/or withholdings from future distributions for unpaid educational services billings.

**WE RECOMMEND** the DYS continue to bill unpaid amounts and seek legislative changes to provide for interest and penalties to be charged on and/or withholdings from future distributions for delinquent educational services billings.

### **AUDITEE'S RESPONSE**

*The division will work with the various entities in state government to determine the most appropriate course to pursue.*

This report is intended for the information of the management of the Department of Social Services, Division of Youth Services, and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

## STATISTICAL SECTION

History, Organization, and  
Statistical Information

DEPARTMENT OF SOCIAL SERVICES  
DIVISION OF YOUTH SERVICES  
HISTORY, ORGANIZATION, AND STATISTICAL INFORMATION

The Omnibus State Reorganization Act of 1974 created the Division of Youth Services within the Department of Social Services. Previously the Division of Youth Services had been known as the State Board of Training Schools. During the 1970's, systematic agency planning began which resulted in the de-emphasis of large rural institutions and the establishment of smaller treatment facilities. This enabled geographic regionalization where youth could be served closer to their homes.

During the 1990's, the division continued in the direction of regionalization and the expansion of the continuum of treatment services. An array of community-based services was developed including day treatment, tracking, and case management. The Juvenile Crime Bill was passed in 1995 and included measures for determinate sentencing, granting the division the ability to petition for increased length of stay up to the age of twenty-one, removed the lower age limit for commitment, and provided for the development of dual jurisdiction.

The Division of Youth Services is administered by a director who is appointed by the director of the Department of Social Services. Mark D. Steward has been the director since May 6, 1988. The Division of Youth Services Advisory Board consists of fifteen members appointed by the director of the Department of Social Services. The Division of Youth Services Advisory Board oversees the operation of the division and is charged with the responsibility to advise the director, the legislature, and the general public on all matters pertaining to the operation of the division. Members of the Division of Youth Services Advisory Board as of June 30, 1999, were:

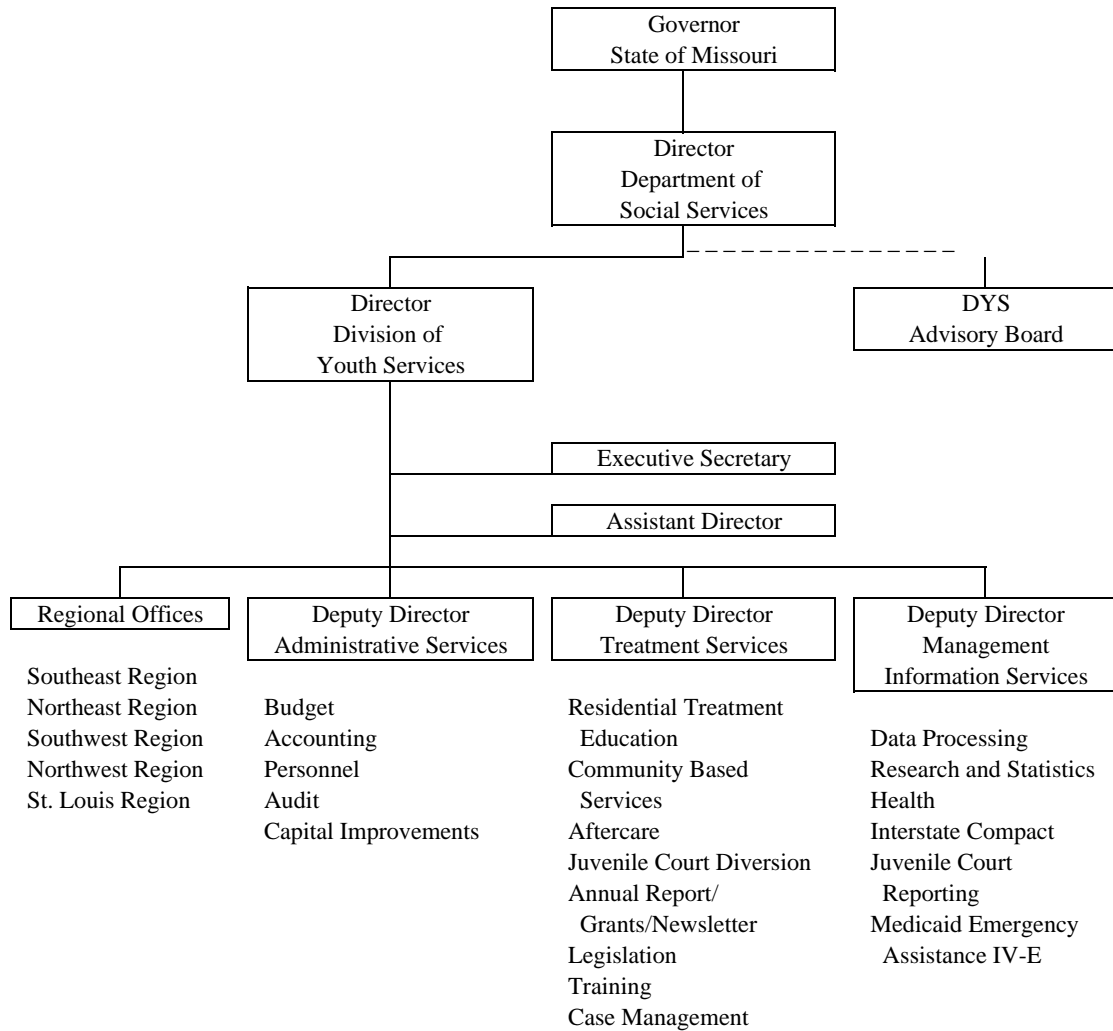

| <u>Member</u>              | <u>Term Expires</u> |
|----------------------------|---------------------|
| Dennis J. Kehm, Chairman   | November 15, 2002   |
| Thelma Neff, Vice-Chairman | September 30, 2001  |
| Sue Barr                   | April 23, 2001      |
| Barbara Eggebrecht         | December 27, 2000   |
| Jack E. Gant               | June 30, 2001       |
| Sherry L. Gant, PhD.       | July 17, 2000       |
| Andrew Jackson Higgins     | September 30, 1999  |
| Walter R. Jacobs           | October 1, 1999     |
| Herman A. Johnson          | May 10, 2000        |
| Peggy Patterson            | March 27, 2002      |
| Lt. James W. Richardson    | July 11, 2001       |
| Almira Sant                | April 23, 2001      |
| William B. Smith           | September 14, 2001  |
| H. Morely Swingle          | June 17, 2003       |
| Joe Z. Satterfield         | October 14, 2003    |
| Debbye Turner, D.V.M.      | Ex-Officio Member   |

The agency provides services to youth committed from the forty-five Judicial Circuit Courts in the state. The services include residential (secure, moderate, and community based) and non-residential (tracking, day treatment, alternative living service, family therapy, and aftercare). All youth receive case management services and are assigned a service coordinator who ensures the assessment, treatment planning, and the coordination, monitoring, and evaluation of services occurs for all youth.

As of June 30, 1999, the division operated twenty-nine residential facilities with a total of 663 beds and eleven non-residential facilities with a total of 225 day treatment slots.

On June 30, 1999, the division employed approximately 1,455 individuals. An organization chart follows:

REVIEW OF INDEPENDENT AUDITS OF  
FIRE PROTECTION DISTRICTS  
IN ST. LOUIS COUNTY

**From The Office Of State Auditor  
Claire McCaskill**

Report No. 2000-20  
March 27, 2000

AUDIT REPORT

Office Of The  
State Auditor Of Missouri  
Claire McCaskill

March 2000

**The annual review of audits of fire protection districts in St. Louis County has been completed. This review covered reports for the year ended December 31, 1998.**

The State Auditor accepted all of the required reports that were received for the year ended December 31, 1998.

For 1998, sixteen of twenty-two districts had increases in their General Fund balances. The aggregate General Fund balance of all districts increased by eight percent in 1998. Since 1991, the General Fund balances of fire districts overall have increased between eight and fifteen percent annually.

The following chart shows recent years' aggregate information.

| General Fund |               |              |               |
|--------------|---------------|--------------|---------------|
|              | Total         | Total        | Total         |
|              | Revenues      | Expenditures | Fund Balances |
| 1991         | \$ 48,915,503 | 44,395,868   | 52,480,031    |
| 1992         | 52,295,317    | 47,537,634   | 57,237,714    |
| 1993         | 53,989,806    | 48,373,722   | 62,853,798    |
| 1994         | 57,135,381    | 51,965,982   | 68,023,197    |
| 1995         | 61,991,961    | 54,654,061   | 75,361,097    |
| 1996         | 68,187,085    | 57,186,465   | 86,361,717    |
| 1997         | 69,942,182    | 62,514,665   | 93,789,234    |
| 1998         | 74,548,435    | 66,937,792   | 101,399,877   |

In previous reviews it was noted that several districts had large General Fund balances in relation to expenditures. Ten districts reserved a portion of their 1998 fund balance for new firehouses, additional equipment, future years' operations and other uses. The following chart shows the total fund balance to General Fund expenditures ratio as well as the ratio of unreserved fund balance to expenditures ratio.

| Robertson                     | 2.19                | 2.19                |
| Spanish Lake                  | 1.05                | 1.05                |
| Valley Park                   | 1.08                | 1.08                |
| West County EMS               | 1.72                | 0.48                |
| West Overland                 | 1.19                | 1.19                |

Since property tax is the main source of revenue, and is received at the end of each year, districts need larger fund balances to provide an adequate cash flow. For those that have reserved a portion of their fund balance, the ratios have decreased; however, thirteen districts still have unreserved fund balances greater than one year's cost of operations. In addition, two districts have cash balances at year end that exceed total expenditures for the year. The fire districts must continue to evaluate the propriety of their tax levies to ensure that excess revenues are not being received and accumulated.

The Ambulance Fund in several districts had significant fund balances compared to expenditures. Ambulance Fund balances in total have increased by 18 percent over the past two years. Of the 18 districts with Ambulance Funds, ten had fund balance to expenditure ratios greater than 1.00. In addition to property tax revenues and interest, many districts collect ambulance fees or contract services fees. Approximately eight percent of total revenues in the Ambulance funds come from these fees.

Dispatching Fund balances in total have increased by 30 percent over the past two years. Of the 22 districts with Dispatch Funds, five had fund balance to expenditure ratios greater than 1.00 and three had ratios greater than 1.50. All of the districts contract dispatching services; however, some do purchase equipment from this fund.

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

Honorable Mel Carnahan, Governor  
and  
Members of the General Assembly  
and  
Boards of Directors of Fire Protection  
Districts in St. Louis County

We have conducted a special review of independent audits of the fire protection districts in St. Louis County as required by Section 321.690, RSMo Cumulative Supp. 1999. The purposes of this review were to:

1. Evaluate the impact of statutory audit requirements and State Auditor's regulations on the effectiveness of financial reporting and auditing for fire protection districts in St. Louis County.
2. Assess the degree of compliance by these districts with statutory audit requirements and the State Auditor's regulations.
3. Bring to the attention of the various fire districts and independent auditors any specifically identifiable reporting deficiencies which should be taken into consideration and corrected in future audit reports.
4. Summarize and evaluate the financial data presented for the various fire districts.
5. Summarize and review the comments for improvement made by the independent auditors for the various districts.

Section 321.690, RSMo Cumulative Supp. 1999, requires all fire protection districts with revenues in excess of \$50,000 annually to cause an audit to be performed on a biennial basis. For those districts with annual revenues of less than \$50,000, the State Auditor may exempt the district from the audit requirement if the appropriate reports are filed.

For those districts for which an audit is required, the district must file a copy of the completed audit report and management letter with the State Auditor within six months after the close of the fiscal year. The audit reports and management letters are reviewed to determine that they are prepared according to guidelines contained within the Code of State Regulations (CSR) (Section 15 CSR 40-4). Any weaknesses noted during the review are communicated to the districts by letter. Should the weaknesses be of a serious enough nature to require the report to be amended, the district is granted a ninety-day period from the date of notification by the State Auditor to correct the report. The State Auditor accepted all of the required reports that were received for the year ended December 31, 1998.

During our review, we considered Section 321.690, RSMo Cumulative Supp. 1999, and 15 CSR 40-4 (which are presented in Appendices B and C), and audit reports submitted to the State Auditor by the various fire districts for the year ended December 31, 1998. In addition, financial data for the year ended December 31, 1997, has been presented for comparative purposes. Because some data presented in the schedules and appendices was compiled from information submitted by the various fire districts and their independent auditors and was not verified by us via additional audit procedures, we express no opinion on the schedules and appendices.

Our review was limited to the specific matters described above and was based on procedures considered appropriate in the circumstances. Had we performed additional procedures, other information might have come to our attention that would have been included in this report.

Some problems were noted in our review of the fire protection district's audit reports and the compliance deficiencies are summarized on Schedule 10. The problems noted included, the failure to submit complete reports with management letters to the State Auditor's office (SAO) by the date required, the failure to submit engagement letters to the SAO, the failure to include some needed compliance recommendations in the management letters, and the lack of complete and adequate footnote disclosures.

To better determine the quality of the fire district audits, we reviewed the supporting working papers of various independent auditors' reports for the year ended December 31, 1998. The information contained in the working papers constitutes the principal record of work the auditor has accomplished and provides evidence for conclusions that he has reached concerning significant matters. Generally Accepted Governmental Auditing Standards (GAGAS) require that a written record of the auditor's work be retained. However, some auditors' working papers need to be improved.

For 1998, sixteen of twenty-two districts had increases in their General Fund balances. The aggregate General Fund balance of all districts increased by eight percent in 1998. Since 1991, the General Fund balances of fire districts overall have increased between eight percent and fifteen percent annually.

The following chart shows recent years' aggregate information.

|      |    | General Fund      |                       |                        |

| 1998 |    | 74,548,435        | 66,937,792            | 101,399,877            |

In previous reviews it was noted that several districts had large General Fund balances in relation to expenditures. Ten districts reserved a portion of their 1998 fund balance for new firehouses, additional equipment, future years' operations and other uses. The following chart shows the total fund balance to General fund expenditures ratio as well as the ratio of unreserved fund balance to expenditures ratio.

### Ratio of Fund Balance to General Expenditures

| Fire District                 | Total<br>Fund Balance | Unreserved<br>Fund Balance |
|-------------------------------|-----------------------|----------------------------|
| Affton                        | 1.41                  | 1.21                       |
| Black Jack                    | 1.08                  | 1.08                       |

| Robertson                     | 2.19                  | 2.19                       |
| Spanish Lake                  | 1.05                  | 1.05                       |
| Valley Park                   | 1.08                  | 1.08                       |
| West County EMS               | 1.72                  | 0.48                       |
| West Overland                 | 1.19                  | 1.19                       |

Since property tax is the main source of revenue, and is received at the end of each year, districts need larger fund balances to provide an adequate cash flow. For those that have reserved a portion of their fund balance, the ratios have decreased; however, thirteen districts still have unreserved fund balances greater than one year's cost of operations. In addition, two districts have cash balances at year end that exceed total expenditures for the year. The fire districts must continue to evaluate the propriety of their tax levies to ensure that excess revenues are not being received and accumulated.

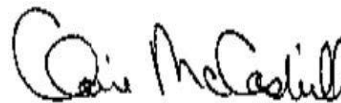

The Ambulance Fund in several districts had significant fund balances compared to expenditures as shown on Schedule 2. Ambulance Fund balances in total have increased by 18 percent over the past two years. Of the 18 districts with Ambulance Funds, ten had fund balance to expenditure ratios greater than 1.00. In addition to property tax revenues and interest, many districts collect ambulance fees or contract services fees. Approximately eight percent of total revenues in the Ambulance Funds come from these fees.

Dispatching Fund balances in total have increased by 30 percent over the past two years. Of the 22 districts with Dispatch Funds, five had fund balance to expenditure ratios greater than 1.00 and three

had ratios greater than 1.50. All of the districts contract dispatching services; however, some do purchase equipment from this fund.

As shown in Appendix A, independent auditors made specific recommendations to improve the overall management of fire districts. Recommendations included concerns regarding segregation of duties, receipts and purchasing procedures, various accounting records, investments, fixed assets, payroll, accounting software, pledged securities, year 2000 issues, insurance, unclaimed property and other various policies and procedures. In addition, recommendations were made concerning budgets and pension plans. Each fire district should review all recommendations and the applicability to their individual district. Consideration should be given by individual districts to have their independent auditor review any areas where risk and citizen concern may be evident.

The State Auditor's office has performed reviews of fire protection districts' annual reports for several years and many improvements have been noted. It appears that the fire protection districts, on the whole, are working to improve the quality of their financial reporting. We solicit from the readers of this report any suggestions for changes or requests for other new information which may be of benefit to those involved with St. Louis County fire protection districts.

Claire C. McCaskill  
State Auditor

November 30, 1999 (fieldwork completion date)

Schedule 10

REVIEW OF INDEPENDENT AUDITS OF FIRE PROTECTION DISTRICTS IN ST LOUIS COUNTY  
SUMMARY OF COMPLIANCE DEFICIENCIES NOTED CONCERNING 15 CSR 40  
YEAR ENDED DECEMBER 31, 1998

| Description of Deficiencies   | Title           | Number of<br>Errors |    | Number of<br>Applicable<br>Reports | Percent |
|---|-----------------|---------------------|----|------------------------------------|---------|
| Engagement letter was not submitted to<br>the State Auditor.                            | 15 CSR 40-4.010 | 13                  |    | 22                                 | 59%     |
| Audit report was not submitted by<br>June 30, 1999.                                     | 15 CSR 40-4.010 | 4                   |    | 22                                 | 18%     |
| Appropriate footnote disclosures were<br>not included.                                  | 15 CSR 40-4.030 | 15                  | *  | 22                                 | 68%     |
| Some needed comments and recommendations<br>were not included in the management letter. | 15 CSR 40-4.030 | 12                  | ** | 22                                 | 55%     |

\* Although the audit reports contained most of the necessary footnotes, we noted various deficiencies regarding appropriate footnote disclosure including the following areas: budget basis, cash and cash equivalents, statutory violations, compensated absences, risk management, component units and Year 2000 issues.

\*\* A problem noted that apparently should have been reported in the management letters included overspending the budgets.

## NOTES TO THE SCHEDULES

REVIEW OF INDEPENDENT AUDITS OF FIRE PROTECTION DISTRICTS  
IN ST. LOUIS COUNTY  
NOTES TO THE SCHEDULES

1. Significant Information

A. General

At December 31, 1998, there were twenty-three fire protection districts in St. Louis County. Districts are required to have a biennial audit performed if revenues exceed \$50,000. The Kinloch Fire Protection District reported receipts of \$23,482; therefore, a biennial audit was not required.

Upon completion of the audit, copies of the report and management letter are to be submitted to the State Auditor for review. Twenty-two audits have been received and reviewed.

B. Schedules

Information included in these schedules was compiled from the audit reports, management letters, questionnaires, etc., received from the St. Louis County fire protection districts.

In analyzing these schedules, some disparity will result due to the different methods of presenting essentially the same information.

Reasons for some problems in comparison are:

- 1) The pension fund is presented differently by the fire districts. Nine districts offer defined contribution plans and seven offer defined benefit plans. Six districts offer both types.
- 2) Some districts may have major bond issues and related capital project funds.
- 3) Some districts collect user fees and others may not.
- 4) Some districts have significant transfers to and from funds which cause disparity in comparison.
- 5) Some districts account for capital improvements and large asset purchases in the General Fund while others have a Capital Projects Fund.

The schedules presented are as follows:

Schedule 1 presents revenues, expenditures, and fund balance for the General Funds in a combined format.

Schedule 2 presents revenues, expenditures, and fund balance for the Ambulance Funds in a combined format.

Schedule 3 presents revenues, expenditures, and fund balance for the Dispatching Funds in a combined format.

Schedule 4 presents additions, deductions, and fund balance for the fiduciary funds (Pension Funds) in a combined format.

Schedule 5 presents revenues, expenses, and fund balance for the Capital Project Funds in a combined format.

Interfund and equity transfers are included in the revenues and expenditure numbers on Schedules 1, 2, 3, 4 and 5. (See Note 7)

Schedule 6 presents the operations of the Debt Service Fund for the year ended December 31, 1998, the amount of bonds outstanding, and the obligations of the districts for 1999.

Schedule 7 presents the General Fixed Asset balances of the districts at December 31, 1998, with comparative totals of general fixed assets at December 31, 1997.

Schedule 8 presents the assessed valuations of the individual fire protection districts as well as tax levies for each of the districts' various funds as reported in the audit reports. Differences were noted in the assessed valuations presented in the audit reports and the amounts submitted by the district to the State Auditor's office. In addition, in 1999, 1998, 1997 and 1996, Mid-County Fire Protection District levied .02 in excess of the General Revenue Fund levy approved by the State Auditor's Office.

Schedule 9 is a listing of the audit fees for each fire protection district. This information was obtained from a questionnaire sent to the districts.

Schedule 10 is a listing of deficiencies noted regarding compliance with State Auditor's regulation 15 CSR 40.

C. Methods of Accounting

All governmental type funds (General Fund, Capital Projects Fund, Special Revenue Fund, Debt Service Fund, etc.) are to be accounted for on the modified accrual basis. The modified accrual basis recognizes revenues in the period in which they become available and measurable. Expenditures are recognized in the accounting period in which the fund liability is incurred.

All proprietary funds and certain fiduciary funds are to be accounted for on the accrual basis. The accrual basis recognizes revenues when they are earned and expenses when they are incurred.

The Pension Fund is an example of a fiduciary fund that is to be accounted for on the accrual basis. In addition, Pension Fund assets (investments held outside the fire district) are to be reported at market value as fund assets on the balance sheet.

All fixed assets acquired or constructed for general governmental purposes are reported as expenditures in the fund that financed the acquisition or construction and are capitalized in the General Fixed Assets Account Group. Purchased fixed assets are capitalized at historical cost or at estimated historical cost if actual historical cost is not available.

Depreciation is usually not provided on general fixed assets; however, the Black Jack Fire Protection District did provide for depreciation over the useful lives of the general fixed assets. The total accumulated depreciation through December 31, 1998, was \$792,787.

#### D. Funds

Fire protection districts may not always have the same number of funds. Funds that a district may have and their intended purpose are as follows:

General Fund: The General Fund is the general operating fund of the district and is used to account for all resources except those accounted for in other funds.

Ambulance Fund: This fund is a special revenue fund which is used to account for the proceeds of a special tax levy which is restricted for ambulance operations. In addition, some districts receive contract revenues and ambulance fees.

Dispatching Fund: This fund is a special revenue fund which is used to account for the proceeds of a special tax levy which is restricted to the purchasing of dispatching services. This is commonly accomplished by means of a contractual agreement with outside entities which provide dispatching services for several districts.

Capital Projects Fund: This fund is used to account for the revenues and expenditures needed to finance the acquisition or construction of capital assets and improvements.

Debt Service Fund: This fund accounts for the accumulation of resources for the payment of general long-term debt principal and interest.

Pension Fund: This fiduciary fund accounts for assets held in trust by the fire district or by an outside agency for the payment of retirement benefits and long-term disability benefits to eligible fire fighters. The fund's primary source of revenue is property taxes. The Pattonville - Bridgeton Terrace Fire Protection District Pension Fund includes Deferred Compensation agency funds as well as pension monies.

## 2. Audit Adjustments

Audit adjustments to the ending fund balance for the various funds at December 31, 1997, were made by the independent certified public accountants for the following fire districts.

| Fire District           | Amount                | Reason   |
|-------------------------|-----------------------|--|
| <u>General Fund</u>     |                       |  |
| Florissant Valley       | \$ <u>(400,472)</u>   | To remove tax receivable amounts not available within 60 days of year-end which were previously recorded as revenues.  |
| <u>Ambulance Fund</u>   |                       |  |
| Florissant Valley       | \$ <u>(27,882)</u>    | To remove tax receivable amounts not available within 60 days of year-end which were previously recorded as revenues.  |
| <u>Dispatching Fund</u> |                       |  |
| Florissant Valley       | \$ <u>(4,401)</u>     | To remove tax receivable amounts not available within 60 days of year-end which were previously recorded as revenues.  |
| <u>Pension Fund</u>     |                       |  |
| Chesterfield            | \$ (2,910,409)        | To adjust for additional pension distributions made in 1997 and included as net assets when the defined benefit plan was converted to a defined contribution plan. |
|                         | <u>462,194</u>        | To adjust for distributions that were mistakenly accounted for in the Pension Trust Fund.  |
| Total                   | \$ <u>(2,448,215)</u> |  |

3. Outstanding Bond Obligations

Schedule 6 shows the revenues, expenditures and fund balance of the fire protection districts' Debt Service Funds. The legal debt limit for a fire protection district is five percent of the fire protection districts' assessed valuation. The reports submitted show that all fire protection districts had debt outstanding that was within their statutory limits. The 1999 obligation amount includes principal and interest amounts due for all districts except Chesterfield which includes only the principal amount due.

4. Independent Audits

During 1998, one independent auditor performed eight audits, one performed three audits, one performed two audits, and nine independent auditors each performed one audit.

5. Compensation Of Directors

|                   |                     |   |
|-------------------|---------------------|---|
| Fenton            | \$ <u>1,017,796</u> | To adjust for prior years appreciation in market value of investments.  |
| Florissant Valley | \$ (68,432)         | To remove tax receivable amounts not available within 60 days of year-end which were previously recorded as revenues. |
|                   | <u>190,512</u>      | To adjust for recording pension investments at market value due to a change in accounting principle.                  |
| Total             | <u>122,080</u>      |   |
| Metro West        | <u>(346,749)</u>    | To remove the unrealized net gain on investments in 1997.   |
| Robertson         | \$ <u>360,444</u>   | To adjust for correction of error related to accounting for benefit payments.   |

The independent audit reports included the names of the principal officeholders during the year ended December 31, 1998 and 1997 and the compensation received by each official in the performance of his or her duty as established by Section 321.190, RSMo 1994. Although there were instances when more than three names would be listed, each of the fire districts had three director positions. When more than three names were listed, it was due to a change in the officials serving on the board.

The following is a list of total compensation paid to directors by each district:

| Total Compensation Paid       |    |        |        |
|-------------------------------|----|--------|--------|
| District                      |    | 1998   | 1997   |
| Affton                        | \$ | 6,900  | 5,383  |
| Black Jack                    |    | 8,450  | 9,550  |
| Chesterfield                  |    | 16,617 | 13,966 |
| Community                     |    | 17,600 | 17,683 |
| Creve Coeur                   |    | 17,600 | 17,600 |
| Eureka                        |    | 7,000  | 7,250  |
| Fenton                        |    | 11,000 | 10,000 |
| Florissant Valley             |    | 17,600 | 17,600 |
| Lemay                         |    | 8,700  | 10,181 |
| Maryland Heights              |    | 12,800 | 10,883 |
| Mehlville                     |    | 16,433 | 17,229 |
| Metro West                    |    | 11,750 | 11,950 |
| Mid-County                    |    | 14,681 | 14,517 |
| Moline                        |    | 17,600 | 17,600 |
| Normandy                      |    | 10,200 | 9,924  |
| Pattonville/Bridgeton Terrace |    | 17,600 | 15,850 |
| Riverview                     |    | 17,117 | 17,600 |
| Robertson                     |    | 17,600 | 15,066 |
| Spanish Lake                  |    | 17,600 | 17,600 |
| Valley Park                   |    | 11,900 | 10,800 |
| West County EMS               |    | 16,208 | 13,150 |
| West Overland                 |    | 17,614 | 17,614 |

6. Kinloch Fire Protection District

The Kinloch Fire Protection District submitted financial information to the State Auditor for the year ended December 31, 1998. Amounts reported by the Kinloch Fire Protection District (on a cash basis of accounting) are as follows:

| (UNAUDITED)                   |              |              |
|-------------------------------|--------------|--------------|
|                               | 1998         | 1997         |
| Cash on hand, January 1, \$   | 2,256        | 805          |
| Cash receipts                 | 23,482       | 28,446       |
| Cash disbursements            | (23,894)     | (26,996)     |
| Cash on hand, December 31, \$ | <u>1,844</u> | <u>2,256</u> |

The assessed valuation and tax levies for 1998 and 1997 are as follows:

|   | 1998        | 1997        |
|---|-------------|-------------|
| Assessed Valuation \$                     | 3,797,109   | 4,319,967   |
| Tax Levies (per \$100 assessed valuation) |             |             |
| Maintenance (General)                     | 0.00        | 0.51        |
| Dispatching                               | <u>0.00</u> | <u>0.03</u> |
| Total \$                                  | <u>0.00</u> | <u>0.54</u> |

7. Interfund Transfers

Various transfers between funds were made during 1998. It appears that the General Fund is supplementing other funds which may impact the financial position reported. The transfers made between the various funds are as follows:

| Year Ended December 31, 1998  |                 |                   |                     |                 |                 |                     |
|-------------------------------|-----------------|-------------------|---------------------|-----------------|-----------------|---------------------|
| District                      | General<br>Fund | Ambulance<br>Fund | Dispatching<br>Fund | Pension<br>Fund | Debt<br>Service | Capital<br>Projects |
| Afton                         | \$ 0            | 0                 | 0                   | 0               | 0               | 0                   |
| Black Jack                    | 16,964          | 0                 | 0                   | 0               | 0               | (16,964)            |
| Chesterfield                  | 0               | 0                 | 0                   | 0               | 0               | 0                   |
| Community                     | 0               | 0                 | 0                   | 0               | 0               | 0                   |
| Creve Coeur                   | 0               | 0                 | 0                   | 0               | 0               | 0                   |
| Eureka                        | (400,000)       | 100,000           | 0                   | 0               | 0               | 300,000             |
| Fenton                        | 0               | 0                 | 0                   | 0               | 0               | 0                   |
| Florissant Valley             | 0               | 0                 | 0                   | 0               | 0               | 0                   |

## APPENDICES

## Appendix A

### REVIEW OF INDEPENDENT AUDITS OF FIRE PROTECTION DISTRICTS IN ST. LOUIS COUNTY SUMMARY OF MANAGEMENT LETTER COMMENTS ISSUED BY AUDITORS IN CONNECTION WITH THE AUDITS OF THE YEAR ENDED DECEMBER 31, 1998

The following is a summary of the various comments contained in those management letters received by the State Auditor for audits of the year ended December 31, 1998. The comments apply to individual fire protection districts unless otherwise noted. The comments extracted from the management letters were not verified by the State Auditor's office via additional audit procedures for accuracy, validity, or completeness.

#### Revenues/Receipts

- C The EMS collection system was not operating effectively or efficiently.
- C Permit and inspections fees were not deposited timely.
- C Amounts which were reimbursed for certain expenses were recorded as miscellaneous income instead of being posted to the expense account originally charged.
- C Ambulance fees were deposited and recorded as miscellaneous income in the general fund.
- C EMS rates have not been evaluated or reviewed for possible revision in recent years.

#### Expenditures/Purchasing

- C An invoice could not be located.
- C The amount transferred from the ambulance fund to the general fund for emergency medical call reimbursement has not been reviewed for possible revision in recent years.

#### Accounting Records

- C The accounting department was unable to supply the Board of Directors with monthly or quarterly financial statements for 1998.
- C Audit adjustments from several years had not been posted to the general ledger.
- C Activity relative to debt service and capital projects were recorded in the general fund instead of establishing separate funds for debt service and capital project transactions.

- C Miscellaneous receipts were maintained manually, separate from the automated system.
- C Lease agreements were not centrally filed, and an executed copy of one lease was not on file.
- C Payments totaling approximately \$11,400 representing fees withheld by the district's collection agency, were not included in the monthly financial statements.
- C Accounting records were not received in a timely manner from their outside accounting service.

#### Investments

- C A district did not meet with their bank regularly regarding the various types of investments, the rate of return on the district's investments, and recommendations to improve this return.

#### Fixed Assets

- C A detailed permanent record of fixed assets was not maintained in seven districts.
- C Corrective action for specific internal control matters relating to the care, custody and control of the fixed assets as noted in previous recommendations has not been taken
- C The fixed asset database is unable to generate reports of additions and deletions for any given previous year. In addition, the database appears to be incomplete for some items, including missing cost figures and dates of purchase.
- C The fixed asset listing has not been updated to reflect all significant assets. In addition, the fixed asset listing was not reconciled to the fixed asset account group balance.
- C Fixed asset records are not summarized into useful and accurate reports. Addition and deletion reports with year end balances were not available.

#### Budgets

- C The correct tax rate was not budgeted for 1998 and revenues collected from a city were omitted. The interim management reports excluded budgetary data for comparisons to actual.
- C The amended 1998 budget did not use the correct beginning budgeted amount. In addition, the budget did not foot in the expenditures area.
- C The 1998 budget was not amended for capital and operating expenditures.
- C The 1998 budget included budgeted interfund transfers; however, the interfund transfers did not net to zero.

- C Actual expenditures exceeded budgeted expenditures in various funds for four districts.
- C Budgeted expenditures were in excess of revenues plus the beginning of the year fund balance for the ambulance special revenue fund. In addition, the ambulance special revenue fund reflected a deficit fund balance at year end.
- C A budget was not prepared for the capital projects fund.
- C A five year budget was not prepared to outline specific needs and replacement of equipment.
- C Financial statements did not reflect budgets for the current year. The ambulance fund was consistently over budget for the past several years including 1998. The district's accountant has not taken an active role in ensuring budgeted results are adequately reported to the Board.

#### Payroll

- C A food allowance paid to firefighters was not reported as income on Form W-2.
- C Bonuses paid to some firefighters for physical achievements were not included on the W-2.
- C Amounts were deposited directly into several employees' 457 accounts, but were not reflected on the payroll records or W-2 forms.
- C The vacation policy for one district did not clearly document how vacation time can be earned or if vacation time can be carried forward into the following year.

#### Policies and Procedures

- C A formal written purchasing policy does not exist.
- C A written accounting procedures manual does not exist.
- C A planning committee was bypassed in executing a contract with a computer company to maintain the district's computer system.

#### Pensions

- C Pension investment activity was not recorded during the year, except for contributions made. Activities not included were investment earnings, employee contributions, benefit payments and administrative expenses.
- C Pension investment account changes due to income earned and market value fluctuations were not recorded.

#### Accounting Software

- C Frequent assistance from the software provider is needed to operate and produce necessary financial reports from a new in-house accounting system. The accounting system allows the input of data affecting several funds, thus unbalancing the fund on an individual basis by posting an incomplete journal entry to each fund. The field to input explanations for journal entries and/or the purpose of the entry is very limited and does not allow for an adequate explanation of the journal entry. The general ledger accounts with posted financial data were deleted from the system after they had a zero balance.

#### Pledged Securities

- C Bank deposits were uninsured or uncollateralized due to a bank error resulting from a bank merger.
- C Deposits held at the district's safekeeping bank were under collateralized by approximately \$78,000.

#### Year 2000

- C Exposures to the Year 2000 (Y2K) syndrome were not fully assessed for two districts.

#### Insurance

- C Insurance needs and requirements have not been discussed in committee. The district's insurance agent's presentation did not include any "contents" coverage for the new computer systems, and it was noted that the coverage on the buildings and contents has not been reviewed for several years and appears inadequate. A public official bond was not executed for one Board member.

#### Unclaimed Property

- C Several checks outstanding for over one year were written off, but had not been turned over to the state under the Unclaimed Property law.

#### Personnel

- C Due to growth, it was suggested that a district consider hiring an additional employee to assist with administrative filing, bookkeeping, and other accounting duties to ensure these functions are completed on a timely basis.

## Appendix B

### Title 15—ELECTED OFFICIALS

#### Division 40—State Auditor Chapter 4—Audits of Fire Protection Districts in St. Louis and Greene Counties

##### 15 CSR 40-4.010 Requirements for Districts

**PURPOSE:** *The state auditor has authority to establish standards and reporting requirements for audits performed on fire protection districts in St. Louis and Greene Counties. This rule sets forth requirements to be met directly by the district.*

(1) The district is responsible for preparing and providing financial information to be included in the audit report. The district shall maintain adequate accounting records for that purpose. These records may be maintained on the bases of accounting deemed appropriate by the district but the records shall provide adequate information to allow the district to report in accordance with generally accepted accounting principles.

(2) The district shall engage an independent auditor to conduct the audit. The state auditor does not recommend, select or approve the district's auditor or the auditor's fee, except as provided in 15 CSR 40-4.010(4). The district is responsible for fulfilling all contractual obligations with the auditor, including payment of all earned fees.

(3) The district shall require from the independent auditor an engagement letter which sets out all essential particulars. A copy of the engagement letter shall be submitted to the state auditor for his/her review before commencement of audit fieldwork. The purpose of this review is to provide reasonable assurance that the district has contractually committed an auditor to provide services to satisfy requirements of 15 CSR 40-4. The contents of this letter should include, but are not limited to:

(A) Period for which the financial statements are audited;

(B) Purpose of the audit;

(C) Scope of the audit, including consideration of the internal control structure and tests of compliance with applicable laws and regulations;

(D) Provisions that the auditor will communicate, in writing, to the district material weaknesses or reportable conditions in the internal control structure, instances of non-compliance with applicable laws and regulations and other areas of possible improvement;

(E) Provision that all workpapers, etc., will be made available to the state auditor for his/her review upon his/her request;

(F) Provision that the auditor will comply with applicable rules issued by the state auditor under 15 CSR 40;

(G) Provision that the auditor will discuss with the district any factors s/he may discover which would prevent him/her from issuing an unqualified opinion on the financial statements and allow the district and the auditor the opportunity to arrive at a resolution acceptable to both;

(H) Statement of the auditor's responsibility for detection of errors, irregularities and illegal acts; and

(I) The estimated cost of the audit and the rates which are the basis for that estimate.

(4) The district must file a copy of the completed audit report with the state auditor within six (6) months after the close of the audit period. If any audit report fails to comply with promulgated rules, the state auditor will notify the district and specify the defects. If the specified defects are not corrected within ninety (90) days from the date of the state auditor's notice to the district, or if a copy of the required audit report has not been received by the state auditor within the specified time, the state auditor will make, or cause to be made, the required audit at the expense of the district.

*Auth: section 321.690, RSMo (Cum. Supp. 1993). \* Original rule filed May 12, 1978, effective Sept. 11, 1978. Amended: Filed Dec. 2, 1985, effective Feb. 13, 1986. Amended: Filed June 14, 1994, effective Nov. 30, 1994.*

*\*Original authority 1977, amended 1981, 1986, 1991, 1993.*

##### 15 CSR 40-4.020 Standards for Auditing and Financial Reporting

**PURPOSE:** *The state auditor has authority to establish standards and reporting requirements for audits performed on fire protection districts in St. Louis and Greene Counties. This rule sets forth standards for the auditing and financial reporting of the district.*

(1) The independent auditor shall meet all requirements of Chapter 326, RSMo. The auditor must be able to demonstrate that s/he meets the independence criteria contained in the code of professional ethics and rules of conduct promulgated by the Missouri State Board of Accountancy.

(2) The independent auditor shall provide to the state auditor reasonable notification of any entrance or exit conferences held with the district. This notification shall be sufficiently

in advance to allow the state auditor to attend the entrance or exit conference at his/her discretion. Upon request, the independent auditor shall provide a draft copy of the audit report and management letter to the state auditor prior to the exit conference.

(3) The audit shall conform to the standards for auditing of governmental organizations, programs, activities and functions as established by the comptroller general of the United States.

(4) The financial statements, supplementary data and accompanying notes shall be presented in conformity with generally accepted accounting principles.

*Auth: section 321.690, RSMo (Cum. Supp. 1993). \* Original rule filed May 12, 1978, effective Sept. 11, 1978. Amended: Filed Dec. 2, 1985, effective Feb. 13, 1986. Amended: Filed June 14, 1994, effective Nov. 30, 1994.*

*\*Original authority 1977, amended 1981, 1986, 1991, 1993.*

##### 15 CSR 40-4.030 Contents of Audit Reports

**PURPOSE:** *The state auditor has authority to establish standards and reporting requirements for audits performed on fire protection districts in St. Louis and Greene Counties. This rule describes required and suggested information to be included in the audit reports.*

(1) Standards for auditing and financial reporting of fire protection districts are given in 15 CSR 40-4.020.

(2) All audit reports shall contain:

(A) A table of contents;

(B) A report on the financial statements;

(C) Combined financial statements and appropriate note disclosures;

(D) Other financial information which includes, but is not limited to, the following:

1. Supplemental schedule of expenditures/expenses by object, if not included in the financial statements;

2. Tax rates and assessed valuation;

3. Schedule of insurance in force which shall include, in addition to other information, the agent for each policy; and

4. Principal officeholders who held office during the period under audit, compensation received by each official in performance of his/her duty and all other compensation or reimbursement of expenses made by the district to each officeholder; and

## Appendix B

(E) A report on the consideration of the internal control structure, a report on the tests of compliance with applicable laws and regulations and a management letter communicating areas of possible improvement not otherwise reported. The required scope of audit for the reports and management letter is set forth in 15 CSR 40-4.040(3). The reports and management letter shall include the findings and recommendations, if any, which the auditor developed during his/her audit and the district's responses to those findings and recommendations. The reports and management letter shall also indicate the nature of previous recommendations and the extent to which the district has implemented those recommendations.

(3) If the district or the auditor deems it appropriate, audit reports may contain or utilize the following:

(A) A history and organization section prepared by the district (unaudited);

(B) Comparative financial data for one (1) or more years; and

(C) Other statements, exhibits, schedules or analyses as deemed necessary or appropriate by the district or the auditor.

*Auth: section 321.690, RSMo (Cum. Supp. 1993). \* Original rule filed May 12, 1978, effective Sept. 11, 1978. Amended: Filed Dec. 2, 1985, effective Feb. 13, 1986. Amended: Filed June 14, 1994, effective Nov. 30, 1994.*

*\*Original authority 1977, amended 1981, 1986, 1991, 1993.*

### 15 CSR 40-4.040 Scope of Audit

**PURPOSE:** *The state auditor has authority to establish standards and reporting requirements for audits performed on fire protection districts in St. Louis and Greene Counties. This rule sets forth the scope of the audit.*

(1) Nothing in the rules promulgated for audits of fire protection districts shall be construed as restricting, limiting or relieving the independent auditor of his/her professional judgment or responsibility.

(2) The audit shall include those tests of the accounting records and other auditing procedures which the independent auditor considers necessary in the circumstances to conform to the standards for auditing of governmental organizations, programs, activities and functions as established by the comptroller general of the United States.

(3) As part of the audit described in section (2), the auditor will obtain an understanding of the internal control structure, assess control risk and report any material weaknesses or reportable conditions. The auditor will also test compliance with applicable laws and regulations and report all material instances of noncompliance. As a part of, or in addition to, audit tests or procedures which may be necessary for the audit, the auditor shall—

(A) Review systems, procedures and management practices, including:

1. Review cash management practices to the extent necessary to determine whether significant improvements appear practicable and economically justifiable;

2. Evaluate the purchasing function to the extent necessary to determine that the district generally receives fair value, for example, bidding of significant purchases; that purchases generally represent items consistent with the function of the district; and that there is not significant likelihood of misuse or misappropriation of the district's resources through the purchasing process;

3. Review fixed asset records and procedures to the extent necessary to determine that fixed assets are properly recorded, physically controlled and in the possession of the district;

4. Review fidelity bond coverages to determine that all persons with access to assets of the district appear covered in sufficient amounts;

5. Evaluate the budgeting practices to the extent necessary to determine whether significant improvements appear practicable and economically justifiable;

6. Review related party transactions;

7. Review evaluate other areas as required by the district; and

8. Review significant areas or matters which come to the attention of the auditor;

(B) The auditor will note areas of possible improvement in the district's systems, procedures and management practices. In evaluating district systems, procedures and management practices, the auditor should consider whether improvements appear practicable and economically justifiable.

(C) Test compliance with applicable laws and regulations, including:

1. Design the audit to provide reasonable assurance of detecting errors, irregularities and illegal acts that could have a direct and material effect on the financial statements;

2. Be aware of the possibility of illegal acts that could have an indirect and material effect on the financial statements; and

3. Test compliance with other legal provisions as s/he deems necessary or appropriate in the circumstances.

(D) Legal provisions which the auditor should consider in his/her audit include, but are not limited to, the following:

1. Article III, Sections 38(a) and 39(3) and Article VI, Section 25, *Constitution of Missouri* limitations on use of funds and credit;

2. Article VI, Section 26, *Constitution of Missouri* limitations on indebtedness without popular vote;

3. Article VI, Section 29, *Constitution of Missouri* application of funds derived from public debts;

4. Article VII, Section 6, *Constitution of Missouri* penalty for nepotism;

5. Chapter 67, RSMo budgetary requirements;

6. Sections 70.210 to 70.230 and Section 432.070, RSMo contracts;

7. Section 105.145, RSMo annual report;

8. Chapter 105, RSMo conflict of interest;

9. Chapter 108, RSMo bond issues;

10. Chapter 321, RSMo fire protection districts;

11. Other applicable portions of the *Constitution of Missouri* and the *Missouri Revised Statutes*;

12. Applicable sections of *Code of State Regulations*; and

13. Other applicable legal provisions.

(4) The auditor shall report on the reviews and examinations required by this rule in a management letter as set forth in 15 CSR 40-4.030 (2)(E).

*Auth: section 321.690, RSMo (Cum. Supp. 1993). \* Original rule filed May 12, 1978, effective Sept. 11, 1978. Amended: Filed Dec. 2, 1985, effective Feb. 13, 1986. Amended: Filed June 14, 1994, effective Nov. 30, 1994.*

*\*Original authority 1977, amended 1981, 1986, 1991, 1993.*

## Appendix C

321.690. 1. In counties of the first classification having a charter form of government and having more than nine hundred thousand inhabitants and in counties of the first classification which contain a city with a population of one hundred thousand or more inhabitants which adjoins no other county of the first classification, the governing body of each fire protection district shall cause an audit to be performed consistent with rules and regulations promulgated by the state auditor.

2. (1) All such districts shall cause an audit to be performed biennially. Each such audit shall cover the period of the two previous fiscal years.

(2) Any fire protection district with less than fifty thousand dollars in annual revenues may, with the approval of the state auditor, be exempted from the audit requirement of this section if it files appropriate reports on its affairs with the state auditor within five months after the close of each fiscal year and if these reports comply with the provisions of section 105.145, RSMo. These reports shall be reviewed, approved and signed by a majority of the members of the governing body of the fire protection district seeking exemption.

3. Copies of each audit report must be completed and submitted to the fire protection district and the state auditor within six months after the close of the audit period. One copy of the audit report and accompanying comments shall be maintained by the governing body of the fire protection district for public inspection at reasonable times in the principal office of the district. The state auditor shall also maintain a copy of the audit report and comment. If any audit report fails to comply with the rules promulgated by the state auditor, that official shall notify the fire protection district and specify the defects. If the defects specified are not corrected within ninety days from the date of the state auditor's notice to the district, or if a copy of the required audit report and accompanying comments have not been received by the state auditor within six months after the end of the audit period, the state auditor shall make, or cause to be made, the required audit at the expense of the fire protection district.

4. The provisions of this section shall not apply to any fire protection district based and substantially located in a county of the third classification with a population of at least thirty-one thousand five hundred but not greater than thirty-three thousand.

THIRTY-FIRST JUDICIAL CIRCUIT

GREENE COUNTY, MISSOURI

TWO YEARS ENDED DECEMBER 31, 1998

**From The Office Of State Auditor  
Claire McCaskill**

Report No. 2000-19  
March 22, 2000

# AUDIT REPORT

Office Of The  
State Auditor Of Missouri  
Claire McCaskill

March 2000

**During our audit of the Thirty-First Judicial Circuit, Greene County, Missouri, we identified certain management practices which we believe could be improved.**

Monthly reconciliations between the receipts, disbursements, cash balances and open-items are not performed for the child support account. A running cash balance is not maintained in the check register. The composition of child support receipts is not reconciled to the composition of deposits. Old outstanding checks are not disbursed in accordance with state law.

At December 31, 1998, outstanding checks over one year old totaling approximately \$32,000 remained in the main child support bank account. In addition, a second child support bank account was maintained with a balance of approximately \$15,600 at December 31, 1998, representing additional outstanding checks dating back to 1983.

The Circuit Division should adopt procedures to routinely follow up on outstanding checks and reissue them if the payees can be located. If the payees cannot be located or identified, these monies should be disposed of in accordance with state law.

The Circuit Division's fee account open-items listing includes some bonds and court deposits that date back to 1989. We noted bonds and court deposits totaling approximately \$414,000 that were received prior to 1997. If it appears unlikely the remaining amounts due will be collected, a court order should be obtained to allow the balance in each case to be prorated among the various court costs as allowed by a 1973 Attorney General's Opinion.

Copy monies are not properly handled and recorded. Photocopy and certified copy fees totaling approximately \$36,000 were deposited into the Circuit Clerk's supply account rather than being turned over to the County Treasurer, and there is no statutory provision for the Circuit Clerk to maintain custody of these fees. Bids were not solicited for some major purchases. These conditions were also noted in the prior audit report but no changes or improvements have been made.

The Greene County Circuit Clerk provided no responses to any of the current recommendations regarding the supply account.

(over)

YELLOW SHEET

The composition of receipts are not reconciled to the composition of deposits by the Associate Division. Some payments are held until the corresponding traffic ticket is received. As a result, some collections were not deposited in a timely manner. Also, receipts are not deposited on a timely basis by the Probate Division.

A law library budget was not prepared for the two years ended December 31, 1998 and 1997. Formal monthly bank reconciliations are not documented and monies are maintained in a noninterest-bearing checking account. Annual physical inventories of books purchased with law library funds are not performed.

## FINANCIAL SECTION

## State Auditor's Reports

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

**INDEPENDENT AUDITOR'S REPORT ON  
THE FINANCIAL STATEMENTS**

Presiding Judge and Court en banc  
and  
The Circuit Clerk of the  
Thirty-First Judicial Circuit  
Greene County, Missouri

We have audited the accompanying special-purpose financial statements of the various funds of the Thirty-First Judicial Circuit, Greene County, Missouri, as of and for the years ended December 31, 1998 and 1997, as identified in the table of contents. These special-purpose financial statements are the responsibility of the judicial circuit's management. Our responsibility is to express an opinion on these special-purpose financial statements based on our audit.

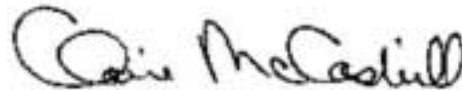

We conducted our audit in accordance with generally accepted auditing standards and the standards applicable to financial audits contained in Government Auditing Standards, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the special-purpose financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the special-purpose financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

The accompanying special-purpose financial statements were prepared for the purpose of presenting the receipts, disbursements, and changes in cash of the various funds of the Thirty-First Judicial Circuit, Greene County, Missouri, and are not intended to be a complete presentation of the financial position and results of operations of the various funds of the judicial circuit.

In our opinion, the special-purpose financial statements referred to in the first paragraph present fairly, in all material respects, the receipts, disbursements, and changes in cash of the various funds of the Thirty-First Judicial Circuit, Greene County, Missouri, as of and for the years ended December 31, 1998 and 1997, in conformity with the comprehensive basis of accounting discussed in Note 1, which is a basis of accounting other than generally accepted accounting principles.

In accordance with Government Auditing Standards, we also have issued our report dated September 28, 1999, on our consideration of the judicial circuit's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grants.

The accompanying History, Organization, and Statistical Information is presented for informational purposes. This information was obtained from the State Courts Administrator's office, Greene County, and the Thirty-First Judicial Circuit and was not subjected to the auditing procedures applied in the audit of the special-purpose financial statements referred to above.

A handwritten signature in dark ink, appearing to read "Claire McCaskill". The signature is fluid and cursive, with the first name "Claire" being more prominent than the last name "McCaskill".

Claire McCaskill  
State Auditor

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

**INDEPENDENT AUDITOR'S REPORT ON COMPLIANCE  
AND ON INTERNAL CONTROL OVER FINANCIAL REPORTING**

Presiding Judge and Court en banc  
and  
The Circuit Clerk of the  
Thirty-First Judicial Circuit  
Greene County, Missouri

We have audited the special-purpose financial statements of various funds of the Thirty-First Judicial Circuit, Greene County, Missouri, as of and for the years ended December 31, 1998 and 1997, and have issued our report thereon dated September 28, 1999. We conducted our audit in accordance with generally accepted auditing standards and the standards applicable to financial audits contained in Government Auditing Standards, issued by the Comptroller General of the United States.

Compliance

As part of obtaining reasonable assurance about whether the special-purpose financial statements of the Thirty-First Judicial Circuit, Greene County, Missouri, are free of material misstatement, we performed tests of the judicial circuit's compliance with certain provisions of laws, regulations, contracts, and grants, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no material instances of noncompliance that are required to be reported under *Government Auditing Standards*. However, we noted certain other instances of noncompliance which are presented in the accompanying Management Advisory Report.

Internal Control Over Financial Reporting

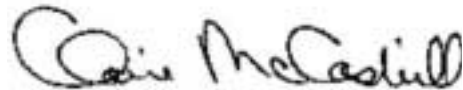

In planning and performing our audit of the special-purpose financial statements of the various funds of the Thirty-First Judicial Circuit, Greene County, Missouri, we considered the judicial circuit's internal control over financial reporting in order to determine our auditing procedures for the purpose of expressing our opinion on the special-purpose financial statements and not to provide assurance on the internal control over financial reporting. However, we noted certain matters involving the internal control over financial reporting and its operation that we consider to be reportable conditions. Reportable conditions involve matters coming to our attention relating to significant deficiencies in the design or operation of the internal control over financial reporting that, in our judgement, could adversely affect the judicial circuit's ability to record, process, summarize,

and report financial data consistent with the assertions of management in the special-purpose financial statements.

A material weakness is a condition in which the design or operation of one or more of the internal control components does not reduce to a relatively low level the risk that misstatements in amounts that would be material to the special-purpose financial statements being audited may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions. Our consideration of the internal control over financial reporting would not necessarily disclose all matters in the internal control that might be reportable conditions and, accordingly, would not necessarily disclose all reportable conditions that are also considered to be material weaknesses. However, we noted certain matters involving the internal control over financial reporting and its operation that we consider to be material weaknesses, and these matters are presented in the accompanying Management Advisory Report.

This report is intended for the information of the management of the Thirty-First Judicial Circuit, Greene County, Missouri, and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

A handwritten signature in dark ink, appearing to read "Claire McCaskill". The signature is fluid and cursive, with the first name "Claire" written in a larger, more prominent script than the last name "McCaskill".

The accompanying Notes to the Financial Statements are an integral part of this statement.

## Notes to the Financial Statements

THIRTY-FIRST JUDICIAL CIRCUIT  
GREENE COUNTY, MISSOURI  
NOTES TO THE FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies

A. Reporting Entity and Basis of Presentation

The accompanying special-purpose financial statements present only selected data for each fund of the Thirty-First Judicial Circuit, Greene County, Missouri.

Receipts, disbursements, and changes in cash are presented for the various funds administered by the Thirty-First Judicial Circuit, Greene County, Missouri. The operating costs of the offices within the circuit are paid directly from appropriations authorized by the Greene County Commission within the judicial circuit and the state of Missouri and are not included in these financial statements.

The “Total (Memorandum Only)” column is presented as additional analytical data. Because this column does not identify the restrictions that exist by fund, it should be read only with reference to the details of each fund.

B. Basis of Accounting

The Statements of Receipts, Disbursements, and Changes in Cash for the Thirty-First Judicial Circuit, Greene County, Missouri, are prepared on the cash basis of accounting; accordingly, amounts are recognized when they are received or disbursed. This basis of accounting differs from generally accepted accounting principles, which require revenues to be recognized when they become available and measurable or when they are earned and expenditures or expenses to be recognized when the related liabilities are incurred.

C. Fiscal Authority and Responsibility

The Thirty-First Judicial Circuit, Greene County, Missouri, includes the transactions of the Circuit Clerk, the Associate Circuit Divisions, the Probate Division, the Juvenile Division, the Family Court Fund, and the Law Library Fund. Each officeholder has been charged with the responsibility of administering transactions in his or her division. The court en banc has appointed the Greene County Treasurer as custodian of the Family Court Fund, and disbursements from this fund are made at the direction of the Family Court Judge. The court en banc has appointed the Greene County Bar Association as law library custodian. The bar association’s treasurer maintains the fund, and a law library committee is responsible for administering the fund’s transactions.

The Thirty-First Judicial Circuit, Greene County, Missouri, administers transactions within the following funds:

Circuit Division Fund: This fund accounts for the transactions of the Circuit Clerk’s office. These transactions include receipts and disbursements of the fee, child support, and supply accounts. These transactions also include receipts and disbursements of some circuit court

cases for which the Circuit Clerk has been named as trustee to invest the assets under Section 483.310, RSMo 1994.

Associate Circuit Division Fund: This fund accounts for the transactions of the three Associate Circuit Divisions. These transactions include receipts and disbursements of court deposits, fees, fines, bonds, and interest.

Probate Division Fund: This fund accounts for the transactions of the Probate Division. These transactions include receipts and disbursements of court deposits, fees, and interest.

Juvenile Division Fund: This fund accounts for the transactions of the Juvenile Office. These transactions include receipts and disbursements of court deposits, fees, reimbursements from the county, and interest.

Family Court Fund: This fund accounts for fees collected on family court cases. These transactions include receipts and disbursements of court fees and interest. Disbursements are legally restricted for services provided by the family court and for reimbursing the State of Missouri for the salaries of the family court commissioners.

Law Library Fund: This fund accounts for transactions of the law library including fees collected from Circuit Division deposits and the related interest income. Disbursements are legally restricted for maintenance of a law library.

## 2. Cash

Section 483.310, RSMo Cumulative Supp.1999, authorizes circuit courts to place their funds in savings deposits in banks and savings and loan associations or in U.S. Treasury bills.

Cash includes both deposits and investments. In accordance with Statement No. 3 of the Governmental Accounting Standards Board, *Deposits with Financial Institutions, Investments (Including Repurchase Agreements), and Reverse Repurchase Agreements*, disclosures are provided below regarding the risk of potential loss of deposits and investments. For the purposes of these disclosures, deposits with financial institutions are demand, time, and savings accounts, including certificates of deposit and negotiable order of withdrawal accounts, in banks, and savings institutions. Investments are securities and other assets acquired primarily for the purpose of obtaining income or profit.

### Deposits

The circuit court's deposits at December 31, 1998 and 1997, were entirely covered by federal depository insurance or by collateral securities held by the circuit court's custodial bank in the circuit court's name.

### Investments

The Associate Circuit Division invests in repurchase agreements. At December 31, 1998 and 1997, the carrying amounts of these investments totaled \$150,000 and \$100,000, respectively (which approximated market).

These investments represent uninsured and unregistered investments for which the securities were held by the dealer bank.

## MANAGEMENT ADVISORY REPORT SECTION

Management Advisory Report -  
State Auditor's Current Recommendations

THIRTY-FIRST JUDICIAL CIRCUIT  
GREENE COUNTY, MISSOURI  
SUMMARY OF FINDINGS

1. Circuit Clerk - Fee Account (pages 17-18)

The composition of receipts are not reconciled to the composition of deposits. Checks totaling \$3,236 have been outstanding for over a year. Open-items totaling approximately \$414,000 have been held over two years with some cases dating back to 1989. Collection procedures are not adequate.

2. Circuit Clerk - Child Support Account (pages 19-20)

Monthly reconciliations between the receipts, disbursements, cash balances and open-items are not performed. A running cash balance is not maintained in the check register. The composition of child support receipts is not reconciled to the composition of deposits. Old outstanding checks are not disbursed in accordance with state law.

3. Circuit Clerk - Supply Account (pages 20-21)

Copy monies are not properly handled and recorded. Photocopy and certified copy fees totaling approximately \$36,000 were deposited into the Circuit Clerk's supply account rather than being turned over to the County Treasurer, and there is no statutory provision for the Circuit Clerk to maintain custody of these fees. Bids were not solicited for some major purchases. The supply account bank statements and invoices were not retained for 1997.

4. Associate Division (pages 22-23)

The composition of receipts are not reconciled to the composition of deposits. Some payments are held prior to receiving the corresponding traffic ticket.

5. Probate Division (page 23)

Receipts are not deposited on a timely basis. Checks totaling \$3,290 have been outstanding for over a year.

6. Law Library (pages 23-24)

A law library budget was not prepared for the two years ended December 31, 1998 and 1997. Formal monthly bank reconciliations are not documented and monies are maintained in a noninterest-bearing checking account. Annual physical inventories of books purchased with law library funds are not performed.

THIRTY-FIRST JUDICIAL CIRCUIT  
GREENE COUNTY, MISSOURI  
MANAGEMENT ADVISORY REPORT  
STATE AUDITOR'S CURRENT RECOMMENDATIONS

We have audited the special-purpose financial statements of the Thirty-First Judicial Circuit, Greene County, Missouri, as of and for the years ended December 31, 1998 and 1997, and have issued our report thereon dated September 28, 1999.

The following Management Advisory Report presents our findings and recommendations arising from our audit of the judicial circuit's special-purpose financial statements. During our audit, we also identified certain management practices which we believe could be improved. Our audit was not designed or intended to be a detailed study of every system, procedure, and transaction. Accordingly, the findings presented in the following report should not be considered as all-inclusive of areas where improvements may be needed.

|           |                                   |
|-----------|-----------------------------------|
| <b>1.</b> | <b>Circuit Clerk -Fee Account</b> |
|-----------|-----------------------------------|

- A. The Circuit Clerk accepts cash, checks, and money orders for the payment of civil and criminal fees. The method of payment is recorded on the computerized receipt listing; however, the composition of recorded receipts is not reconciled to the composition of bank deposits.

To ensure that receipts are deposited intact, the composition of receipts recorded on the receipt listing should be reconciled to the composition of bank deposits.

A similar condition was also noted in our prior report.

- B. At December 31, 1998, the circuit bank account had \$3,236 in outstanding checks that were over a year old. These old outstanding checks create additional and unnecessary record-keeping responsibilities.

The circuit division should adopt procedures to routinely follow up on old outstanding checks and reissue them if the payee can be located. If the payee cannot be located or identified, these monies should be disposed of in accordance with state law.

- C. The Circuit Division's open-items listing includes some bonds and court deposits that date back to 1989. We noted bonds and court deposits totaling approximately \$414,000 that were received prior to 1997. If it appears unlikely the remaining amounts due will be collected, a court order should be obtained to allow the balance in each case to be prorated among the various court costs. Attorney General's Opinion No. 26, 1973 to Osborne, concluded that "If, when liability has been established, accrued costs cannot be collected in full, charges not having any statutory priority or not allocated under court rule should be prorated."

Old inactive case balances increase the volume of cases which must be monitored and

controlled, putting a greater burden on personnel resources. Procedures should be established to ensure that monies on deposit are properly distributed immediately upon final disposition of cases.

- D. The accounts receivable balance at August 30, 1999 totaled \$1,336,206. These accounts receivables represent approximately 15,000 cases where amounts were owed to the court. The Circuit Clerk does not monitor or review the old cases to follow up on uncollectible cases.

Proper and timely follow-up action of amounts due the court helps maximize court revenues. The court should review those cases which are long outstanding and take action to collect any amounts determined to be collectible. In addition, any uncollectible amounts receivable should be written off following review and approval by the Circuit Judge.

**WE RECOMMEND** the Circuit Clerk:

- A. Reconcile the composition of recorded receipts to the composition of bank deposits and retain documentation of these reconciliations.
- B. Establish procedures to routinely follow up on old outstanding checks and reissue them if payees can be located. If payees cannot be located, the monies should be disposed of in accordance with state law.
- C. Along with the Circuit Judge, review the cases on the open items listing and determine the appropriate disposition of inactive cases.
- D. Review those cases which are outstanding and pursue any amounts determined to be collectible. Any amounts determined to be uncollectible should be written off following review and approval by the Circuit Judge.

**AUDITEE'S RESPONSES**

*The Circuit Clerk provided the following responses:*

- A. *The Circuit Clerk did not provide a response.*

*B&C. This has been implemented in 1999.*

- D. *We do not have the authority to enforce the collection of costs. That is left up to the discretion of the litigants.*

Receipts recorded for the Child Support Account were approximately \$18.5 million and \$17.4 million for the years ended December 31, 1998 and 1997, respectively. Our review of the accounting controls for the Child Support Account disclosed the following weaknesses:

- A. The court started using the statewide child support computer system in September 1998. This system generates daily and monthly receipt and disbursement reports, open-items (liabilities) and bank reconciliation reports. However, many of these reports are not printed and reviewed for accuracy by the court. The daily receipt reports are reconciled to daily bank deposits and daily disbursement totals are written in the manual checkbook but a running book balance is not maintained. Monthly summary reports are not printed or reconciled to the deposits and disbursements of the child support bank account. Also, the court has turned over reconciling responsibilities to the Office of State Courts Administrator (OSCA) and the court does not review the reconciliation reports prepared by OSCA for accuracy. Open-items are not printed and reconciled to the cash balance.

Reconciliations between monthly summary reports and bank receipts and disbursements are essential to ensure all child support receipts and disbursements are accurately recorded by the Circuit Clerk. Also, to ensure that receipts and disbursements are properly handled and accurately posted to case payment history reports and that all liabilities for open cases can be traced to the cash balance, open-items listings should be reconciled to the cash balance monthly. Such reconciliations would allow for prompt detection of errors and allow the Circuit Clerk to determine the disposition of any unidentified monies remaining over a period of time.

- B. The Circuit Clerk accepts cash, checks and money orders for the payment of child support. The method of payment is recorded on the computerized receipt listing; however, the composition of recorded receipts is not reconciled to the composition of bank deposits.

To ensure that receipts are deposited intact, the composition of receipts recorded on the receipt listing should be reconciled to the composition of bank deposits.

A similar condition was also noted in our prior two reports.

- C. At December 31, 1998, outstanding checks over one year old totaling approximately \$32,000 remained in the main child support bank account. In addition, a second child support bank account is maintained with a balance of approximately \$15,600 at December 31, 1998, representing additional outstanding checks dating back to 1983. The circuit division should adopt procedures to routinely follow up on outstanding checks and reissue them if the payees can be located. If the payees cannot be located or identified, these monies should be disposed of in accordance with state law.

**WE RECOMMEND** the Circuit Clerk:

- A. Perform monthly reconciliations between the receipts, disbursements, bank reconciliations and open-items. A running cash balance should be maintained in the check register and reconciled to the monthly reconciliation reports.
- B. Reconcile the composition of child support recorded receipts to the composition of bank deposits and retain documentation of these reconciliations.
- C. Establish procedures to routinely follow up on old outstanding checks and reissue them if payees can be located. If payees cannot be located, the monies should be disposed of in accordance with state law.

### **AUDITEE'S RESPONSE**

*The Circuit Clerk responded that the statewide collection system (MACCS) will solve these problems.*

|           |  |
|-----------|--|
| <b>3.</b> | <b>Circuit Clerk -- Supply Account</b> |
|-----------|--|

The Circuit Clerk maintains a supply account for interest earned from investment of court deposits and for copy monies. This account is used for purchases in accordance with Section 483.310.2, RSMo Cumulative Supp. 1999. The following concerns were noted with the supply account:

- A. All employees of the Circuit Clerk's office collect copy monies. Receipt slips are not issued for these copies and a receipt log is not kept of the monies. The duties of recording, depositing, and reconciling copy monies are not adequately segregated. The Deputy Circuit Clerk performs all of these duties.

To properly account for all receipts, prenumbered receipt slips should be issued or receipts should be recorded on a log immediately upon receipt. The method of payment received (cash, check, or money order) should be noted on the receipt slips or receipt log. To ensure all receipts are properly accounted for, an employee should reconcile receipt slips or receipt log amounts, including the composition of receipts, to amounts deposited. Also, to safeguard against possible loss or misuse of funds, internal controls should provide for reasonable assurance that all transactions are accounted for properly and assets are adequately safeguarded. An adequate system of internal controls requires segregation of duties.

- B. The Circuit Clerk collected approximately \$36,000 during the two years ended December 31, 1998, for making photocopies and issuing certified copies. The monies are deposited into the supply account to purchase office supplies. There is no statutory provision for the Circuit Clerk to retain such fees and expend them on supplies for the office.

Section 50.370, RSMo 1994, states that county officials shall at the end of each month pay over to the County Treasurer all fees received during the month.

A similar condition was also noted in our prior two reports.

- C. Bids were not always solicited for various purchases made by the Circuit Clerk, nor was adequate bid documentation always retained. Examples of items purchased for which evidence of bidding could not be located are as follows:

|                    | <u>1998</u>  | <u>1997</u> |
|--------------------|--------------|-------------|
| Office supplies    | \$ 20,042    | \$ 22,144   |
| Office furniture   | 14,507 3,154 |             |
| Computer equipment | 2,009 15,229 |             |

Bidding procedures for major purchases provide a framework for economical management of public resources and help ensure the Circuit Clerk receives fair value by contracting with the lowest and best bidders. Competitive bidding assures all parties are given equal opportunity to participate in court business.

A similar condition was also noted in our prior report.

- D. Bank statements were not retained for the supply account for 1997. Bank statements are necessary to ensure the validity and propriety of receipts, disbursements, and cash balances. Court records should be retained in accordance with Supreme Court Administrative Rule 8. In addition, the vendor invoices were not retained for 1997. Invoices should be maintained to document the disbursement and verify the expenditure.

**WE RECOMMEND** the Circuit Clerk:

- A. Establish procedures to record and account for the copy monies. Also, develop an adequate system of internal controls that requires segregation of duties.
- B. Transmit all photocopy and certified copy monies to the County Treasurer for deposit in the county General Revenue Fund.
- C. Solicit bids for major purchases and retain documentation of bids solicited and the justification for bid awards.
- D. Retain all bank statements and documentation of disbursements.

**AUDITEE'S RESPONSE**

*The Circuit Clerk did not provide a response for the above recommendations.*

|           |                           |
|-----------|---------------------------|
| <b>4.</b> | <b>Associate Division</b> |
|-----------|---------------------------|

- A. The court accepts cash, check, and money order. The method of payment is recorded on the computerized receipt; however, the composition of recorded receipts is not reconciled to the composition of bank deposits.

To ensure that all receipts are properly accounted for and deposited intact, the composition of receipts recorded on the receipt listing should be reconciled to the

composition of bank deposits.

A similar condition was also noted in our prior report.

- B. The court sometimes receives payments on traffic tickets before the Prosecuting Attorney has filed on the ticket; however, the payments are not deposited until the ticket has been filed by the Prosecuting Attorney. If the ticket is never filed or cannot be located, the payment is mailed back to the individual. At September 21, 1999, twenty-seven checks and money orders totaling \$2,346 were on hand.

To adequately safeguard receipts and reduce the risk of loss, theft, or misuse of funds, monies should be deposited immediately upon receipt or when accumulated receipts exceed \$100.

**WE RECOMMEND** the Presiding Circuit Judge ensure the Associate Division:

- A. Reconcile the composition of recorded receipts to the composition of bank deposits and retain documentation of these reconciliations.
- B. Deposit all receipts intact daily or when accumulated receipts exceed \$100.

### **AUDITEE'S RESPONSE**

*The Clerk of the Associate Division provided the following responses:*

- A. *The financial section of the Associate Clerk's Office was told to follow the recommendations of the prior audit to reconcile daily cash and checks to the receipts and deposits. This was apparently not being done on a consistent basis. Presently, we are in compliance with the recommendation and will remain in compliance.*
- B. *The recommendation of the last audit allowed us to keep the money for a time period as long as we kept a daily log, which we did faithfully.*

*We have had a consistent problem receiving our traffic tickets promptly. We receive payments daily for traffic tickets that we do not have. We could receipt money without a case number, but it would require duplicate work to do so. Presently, we are sending the money back with a letter of instructions for the defendants. We were told during the audit process, that this would be acceptable.*

*We are presently working toward the goal of depositing all receipts intact daily to conform to the recommendation and expect to meet this by April 1, 2000.*

|                            |
|----------------------------|
| <b>5. Probate Division</b> |
|----------------------------|

- A. Receipts are not deposited on a timely basis. Deposits are made once a ledger page is filled and on the last day of the month. We noted only six deposits were made during December 1998. The amount of these deposits ranged from \$2,065 to \$3,737.

To adequately safeguard receipts and reduce the risk of loss, theft, or misuse of funds, monies should be deposited daily or when accumulated receipts exceed \$100.

- B. At December 31, 1998, the Probate Division's bank account had \$3,290 in outstanding checks that were over a year old. These old outstanding checks create additional and unnecessary record-keeping responsibilities.

The probate division should adopt procedures to routinely follow up on outstanding checks and reissue them if the payees can be located. If the payees cannot be located or identified, these monies should be disposed of in accordance with state law.

Similar conditions were also noted in our prior report.

**WE AGAIN RECOMMEND** the Probate Division Judge ensure that:

- A. Receipts are deposited daily or when accumulated receipts exceed \$100.
- B. Procedures to routinely follow up and reissue old outstanding checks are adopted. If the payees cannot be located, these monies should be disposed of in accordance with state law.

### **AUDITEE'S RESPONSE**

*The Probate Commissioner and Probate Clerk provided the following responses:*

- A. *We are currently making daily deposits.*
- B. *We will review the relevant statutes and dispose of the outstanding checks in accordance with state law.*

|                       |
|-----------------------|
| <b>6. Law Library</b> |
|-----------------------|

The Springfield Metropolitan Bar Association is the court-appointed custodian of the Law Library Fund, and responsibility for the fund rests with the law library committee appointed by the Presiding Circuit Judge. Law library books are in two locations, the Judicial Courts Building and the Woodruff Building. Our review of the law library noted the following concerns:

- A. A law library budget was not prepared for the years ended December 31, 1998 and 1997. The law library committee makes recommendations to the Circuit Court for the expenditures of law library funds. Section 514.480, RSMo 1994, provides the law library monies shall be applied and expended under the direction and order of the judges of the circuit court. A law library budget would provide a means for the circuit court judges to determine that the law library monies are being spent in compliance with state law.

- B. Formal monthly bank reconciliations are not documented. Bank reconciliations are necessary to ensure accounting records are in agreement with bank records and to identify errors in a timely manner.
- C. Law library monies are maintained in a noninterest-bearing checking account. Bank balances were \$33,674 and \$14,983 at December 31, 1998 and 1997, respectively. To maximize revenues, law library monies should be deposited into an interest-bearing account.
- D. Annual physical inventories of books purchased with law library funds are not performed. Adequate procedures are necessary to maintain control over assets, and to ensure the fixed asset records are accurate, identify any unrecorded additions and deletions, and detect theft of assets.

**WE RECOMMEND** the Circuit Court:

- A. Require that annual budgets be prepared for the law library.
- B. Ensure monthly bank reconciliations are performed and documented.
- C. Consider depositing Law Library Fund monies into an interest-bearing account.
- D. Ensure annual inventories of law library assets are performed, and promptly update property records for any differences identified.

**AUDITEE'S RESPONSE**

*The Treasurer of the Law Library Fund provided the following responses:*

- A. *A budget will be prepared.*
  - B. *The checkbook was balanced to the bank statement on a monthly basis; however, not documented on the back of the bank statement.*
- C&D. This has been implemented.*

This report is intended for the information of the management of the Thirty-First Judicial Circuit, Greene County, Missouri, and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

## Follow-Up on State Auditor's Prior Recommendations

THIRTY-FIRST JUDICIAL CIRCUIT  
GREENE COUNTY, MISSOURI  
FOLLOW-UP ON STATE AUDITOR'S PRIOR RECOMMENDATIONS

This section reports follow-up action taken by the Thirty-First Judicial Circuit, Greene County, Missouri, on recommendations made in the Management Advisory Report (MAR) of our report issued for the two years ended December 31, 1994. The prior recommendations which have not been implemented, but are considered significant, have been repeated in the current MAR.

1.     Circuit Clerk - Fee Account

- A.     The Circuit Clerk's office maintained bank accounts with balances that periodically exceeded the Federal Deposit Insurance Corporation (FDIC) insurance coverage.
- B.     The composition of receipts was not reconciled to the composition of deposits.
- C.     Bank statements were not retained for approximately 22 trust accounts in 1993 and 1994.

Recommendation:

The Circuit Clerk:

- A.     Monitor the balances at each bank and require collateral securities to be pledged for any amount in excess of the FDIC insurance coverage.
- B.     Reconcile the composition of recorded receipts to the composition of bank deposits and retain documentation of these reconciliations.
- C.     Retain all bank statements.

Status:

- A.     Implemented.
- B.     Not implemented. See MAR No. 1.
- C.     Partially implemented. Bank statements were retained for the trust account; however, bank statements were not retained for the supply account during 1997. See MAR No. 3.

2. Circuit Clerk - Child Support Account

- A. The receipt ledger did not effectively account for the numerical sequence of receipt slips issued.
- B. The composition of receipts was not reconciled to the composition of deposits.

Recommendation:

The Circuit Clerk:

- A. Modify the child support receipts ledger to be presented in receipt slip number order, rather than case number order, and account for the numerical sequence of receipt slips issued.
- B. Reconcile the composition of child support recorded receipts to the composition of bank deposits and retain documentation of these reconciliations.

Status:

- A. In September 1998, the court converted to the Statewide Child Support System.
- B. Not implemented. See MAR No. 2.

3. Circuit Clerk - Supply Account

- A. The Circuit Clerk collected fees for making photocopies and issuing certified copies and deposited these monies into the supply account to purchase office supplies. There was no statutory provision for the Circuit Clerk to retain such fees and expend them on supplies for the office.
- B. Bids were not obtained or bid documentation was not retained for some purchases from the supply account.

Recommendation:

The Circuit Clerk:

- A. Transmit all photocopy and certified copy fees to the County Treasurer for deposit in the county General Revenue Fund.

- B. Solicit bids for major purchases and retain documentation of bids solicited and the justification for bid awards.

Status:

A&B. Not implemented. See MAR No. 3.

4. Associate Circuit Divisions:

- A. The composition of receipts was not reconciled to the composition of deposits and court employees were allowed to cash personal checks from court receipts.
- B. The open items listing included many old cases, some that were dismissed, closed, or appeared inactive.
- C. The court held payments received on traffic tickets before the Prosecuting Attorney filed the ticket with the court. Some payments were mailed back to the individual if the ticket was never filed on or could not be located. Documentation was not maintained to indicate payment was ever received.
- D. The Associate Circuit Divisions charged and collected a \$2 sheriff fee for all criminal and traffic cases. There appeared to be no statutory authority to collect this fee.

Recommendation:

The Presiding Circuit Judge ensure the Associate Divisions:

- A. Reconcile the total cash, checks, and money orders received to bank deposits and discontinue the practice of cashing personal checks from court receipts.
- B. Establish procedures to follow up on and properly dispose of open items in a timely manner, including forfeiting bonds to the county schools fund and turning over unclaimed bonds to the state's Unclaimed Property Section, as applicable.
- C. Establish procedures to record payments that are held prior to the filing of the related traffic ticket and to record payments that are returned.
- D. Review the statutory authority for assessing and collecting the \$2 sheriff fee, and take appropriate action.

Status:

A. Partially implemented. The court no longer cashes personal checks; however, composition of receipts is not adequately reconciled to bank deposits. See MAR No. 4.

B-D. Implemented.

5. Probate Division

A. Receipts were not deposited in a timely manner.

B. Checks totaling \$987 had been outstanding for more than one year. Some of these checks were written in 1990.

Recommendation:

The Probate Division Judge ensure that:

A. Receipts are deposited daily or when accumulated receipts exceed \$100.

B. Procedures to routinely follow up and reissue old outstanding checks are adopted. If the payees cannot be located, these monies should be disposed of through the applicable statutory provisions.

Status:

A&B. Not implemented. See MAR No. 5.

6. Juvenile Division

A. Summary records of restitution amounts received and owed from juvenile offenders were not maintained and procedures to follow up on all unpaid amounts were not adequate.

B. The Juvenile Office did not maintain an open-items (liabilities) listing.

Recommendation:

The Circuit Judge - Juvenile Division ensure:

A. Summary records are maintained of restitution amounts received and owed from juvenile offenders and adopt procedures to follow up on all unpaid amounts.

B. Monthly open-items listings are prepared and reconciled to cash balances.

Status:

A&B. Implemented.

## STATISTICAL SECTION

History, Organization, and  
Statistical Information

THIRTY-FIRST JUDICIAL CIRCUIT  
GREENE COUNTY, MISSOURI  
HISTORY, ORGANIZATION,  
AND STATISTICAL INFORMATION

Organization

The Thirty-First Judicial Circuit includes only Greene County.

The Thirty-First Judicial Circuit consists of five circuit judges, three associate circuit judges, two Family Court Commissioners, and a Probate Commissioner. The court en banc consists of all the divisions of the circuit acting collectively. The judges elect by secret ballot, a presiding judge for a two-year term. The court en banc determines questions of policy for the court, promulgates court rules, and designates the assignment of particular judges to specialized types of cases. The presiding judge has supervision of general administrative matters relating to the court, and an administrative staff assists the court.

The court en banc appoints commissioners who must possess the same qualifications as a circuit judge to hear family court cases.

In addition to the judges and commissioners, the personnel of the Thirty-First Judicial Circuit, Greene County, Missouri include a circuit clerk, an associate circuit division clerk, a probate division clerk, forty-eight deputy clerks, five court reporters, twelve secretaries, a chief juvenile officer, fourteen juvenile office secretaries and support staff, thirty-two juvenile detention and group home employees, and a court reporter.

Operating Costs

The operating expenses of the various courts and the juvenile division are paid by Greene County. The salaries of full-time court personnel, except for the bailiffs, are paid by the State of Missouri. The salary of the juvenile officer is paid in part by the State of Missouri and in part by Greene County, while all other juvenile salaries are paid by Greene County. Bailiff salaries are also paid by Greene County.

Expenditures incurred for the Thirty-First Judicial Circuit, Greene County, Missouri, were obtained from Greene County and information provided by the State Courts Administrator's Office and are as follows:

| Year Ended December 31,   |                  |                  |                |                  |                  |                |
|---------------------------|------------------|------------------|----------------|------------------|------------------|----------------|
| 1998                      |                  |                  | 1997           |                  |                  |                |
|                           | State of         | Greene County    |                | State of         | Greene County    |                |
|                           | Missouri -       | Personal         | Expenses       | Missouri -       | Personal         | Expenses       |
|                           | Personal         |                  |                | Personal         |                  |                |

REVIEW OF ARTICLE X  
SECTIONS 16 THROUGH 24  
CONSTITUTION OF MISSOURI

TWO YEARS ENDED JUNE 30, 1999

**From The Office Of State Auditor  
Claire McCaskill**

Report No. 2000-18  
March 22, 2000

AUDIT REPORT

Office Of The  
State Auditor Of Missouri  
Claire McCaskill

March 2000

**The following is a review conducted by our office of Article X, Sections 16 through 24, Constitution of Missouri.**

---

On November 4, 1980, the voters of Missouri passed Constitutional Amendment No. 5, which added Article X, Sections 16 through 24 to the Constitution of Missouri. The amendment, commonly referred to as the Hancock Amendment, requires that no greater portion of Missourians' personal income be used in any future year to fund state government than was the case in fiscal year 1981, except as authorized by a vote of the people.

The State Auditor's Office performs a review of the state's compliance with the provisions of the Hancock Amendment to verify the accuracy of the revenue limit computation performed by the Office of Administration, Division of Budget and Planning (OB-BP). The amount of the refund due to taxpayers for the year ended June 30, 1998 was \$166,740,970. In addition, a total of \$12,102,110 was also due to taxpayers from the prior years of 1995, 1996 and 1997. The state refunded the total of \$178,843,080 to taxpayers in late 1999. The amount of the refund due to taxpayers for the year ended June 30, 1999 is \$98,861,466.

On January 27, 1998, the Missouri Supreme Court entered a final decision in Kelly v. Hanson, et. al., 959 S.W. 2d 107 (Mo. 1998). This decision determined that taxes and other funds collected by the state may not be considered revenue in the context of total state revenue unless they meet a two-part test derived from an earlier judicial definition of revenue: (1) the funds must be received into the state treasury; and (2) the funds must be subject to appropriation.

On June 29, 1999, the Missouri Supreme Court entered a final decision in Conservation Federation of Missouri, et. al., v. Richard Hanson, et. al., 994 S.W. 2d 27 (Mo. Banc. 1999). This decision determined that Article IV, Section 43 (b) prohibits the disbursement of monies specified in that section for the purpose of making the refund required by Article X, Section 18, and that revenue derived from the one-eighth of one percent sales tax imposed by Article IV, Section 43(a) is not includable in total state revenue.

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

Honorable Mel Carnahan, Governor  
and  
Members of the General Assembly  
and  
Richard A. Hanson, Commissioner  
Office of Administration  
Jefferson City, Missouri 65102

We have conducted a review of revenues of the state of Missouri for the years ended June 30, 1999 and 1998, and the application to those revenues of Article X, Sections 16 through 24, of the Constitution of Missouri, more commonly referred to as the Hancock Amendment (included as Appendix). We had previously reported on revenues of the state for the years ended June 30, 1982 through 1997. The amendment, which was adopted by the voters of Missouri on November 4, 1980, limits the growth of state revenues collected in any fiscal year. The objectives of this review were to:

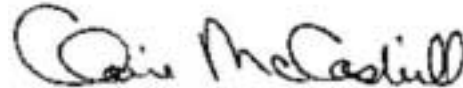

1. Evaluate the formula to calculate the state's revenue limit.
2. Determine the specific items included in total state revenues.
3. Verify the accuracy of the revenue limit computation and comparing that limit to total state revenues.
4. Review the state's overall compliance with the provisions of the amendment.

Our review included only the application of the revenue limit to state revenues and, accordingly, did not include a review of the effects of the amendment on any local governmental unit.

Our review was made in accordance with applicable generally accepted government auditing standards and included such procedures as we considered necessary in the circumstances. In this regard, we held discussions with personnel of the Office of Administration, Division of Budget and Planning (OA, BP), inspected relevant records and reports compiled by that office, and reviewed reports from the statewide accounting system. We reviewed this information to the extent necessary to satisfy ourselves that the following Exhibits and Schedules are fairly stated in all material respects.

Our review was limited to the specific matters described earlier and was based on selective tests and procedures considered appropriate in the circumstances. Had we performed additional procedures, other information might have come to our attention that would have been included in this report.

The following Executive Summary and the Background, Methodology, and Conclusions present our comments, findings, and conclusions concerning the state's overall compliance with the provisions of Article X, Sections 16 through 24, Constitution of Missouri.

A handwritten signature in black ink, reading "Claire McCaskill". The signature is cursive and fluid, with the first name "Claire" and last name "McCaskill" clearly distinguishable.

Claire McCaskill  
State Auditor

February 8, 2000 (fieldwork completion date)

The following auditors participated in the preparation of this report:

Audit Manager: Randy Doerhoff, CPA

## EXECUTIVE SUMMARY

REVIEW OF ARTICLE X, SECTIONS 16 THROUGH 24,  
CONSTITUTION OF MISSOURI  
EXECUTIVE SUMMARY

On November 4, 1980, the voters of Missouri passed Constitutional Amendment No. 5 which added Article X, Sections 16 through 24 to the Constitution of Missouri. The amendment, commonly referred to as the Hancock Amendment, requires that no greater portion of Missourians' personal income (MPI) be used in any future year to fund state government than was the case in fiscal year 1981, except as authorized by a vote of the people.

Exhibit A presents a summary of the calculations of limited total state revenue (TSR) for the years ended June 30, 1999, 1998, 1997, 1996, and 1995. The calculations for years prior to 1998 have been changed to comply with a Supreme Court decision as further explained below.

On January 27, 1998, the Missouri Supreme Court entered a final decision in Kelly v. Hanson, et. al., 959 S.W. 2d 107 (Mo. 1998). This decision determined that taxes and other funds collected by the state may not be considered revenue in the context of TSR unless they meet a two-part test derived from an earlier judicial definition of revenue: (1) the funds must be received into the state treasury; and (2) the funds must be subject to appropriation. Thus, the Hancock Amendment presents unique financial related legal requirements that must be taken into consideration. The items that the Supreme Court specifically ruled on are as follows:

1. The Federal Reimbursement Allowance and the Nursing Facility Reimbursement Allowance tax imposed by the state to pay the state's share of the costs of the Medicaid program is collected by an offset against Medicaid claims and is not directly deposited in the state treasury. As a result, this revenue is not included in TSR.
2. The local use tax imposed by the state under Section 144.748, RSMo, until repealed on May 21, 1996, and distributed to local government is not deposited in the state treasury and is not appropriated. As a result, this revenue is not included in TSR.
3. Revenue from the one dollar portion of the state imposed two dollar admission fee to gaming riverboats that is remitted to the "home dock city or county" and is not deposited in the state treasury, is not included in TSR.
4. Ten percent of the revenue for an adjusted gross receipts tax imposed by the state on gaming riverboats is remitted to the "home dock city or county" and is not deposited in the state treasury. As a result, this revenue is not included in TSR.
5. An adjustment to the revenue limit related to the state assuming certain judicial clerk salaries is appropriate.

On November 24, 1998, the Missouri Court of Appeals, Western District entered a final decision in Kelly v. Hanson, et. al., 984 S.W. 2d 540 (Mo. 1998). The Missouri Court of Appeals, Western District ruled that revenue from the one dollar of the state imposed two dollar admission fee to gaming riverboats is not included in TSR, while the revenue from the payments to the state to recoup public safety and regulatory enforcement costs for gaming riverboats is included in TSR.

The State Auditor's Office (SAO) and OA-BP did not present an issue to the Supreme Court concerning the proper accounting for the effect of tax refunds. However, because the Supreme Court decision indicated that the Hancock provisions in the constitution require the actual receipt of revenue, the amendment presents a cash basis system of accounting. Based on the Court's decision, the SAO has changed the calculation of refunds from an appropriations basis to a cash basis.

On June 29, 1999, the Missouri Supreme Court entered a final decision in Conservation Federation of Missouri, et. al., v. Richard Hanson, et. al., 994 S.W. 2d 27 (Mo. Banc. 1999). This decision determined that Article IV, Section 43(b) prohibits the disbursement of monies specified in that section for the purpose of making the refund required by Article X, Section 18, and that revenue derived from the one-eighth of one percent sales tax imposed by Article IV, Section 43(a) is not includable in TSR.

This decision related to the use of Conservation Fund monies for making refunds under the Hancock Amendment. The General Assembly appropriated a total of approximately \$6 million from the Conservation Fund to be used to pay for refunds due to taxpayers under the Hancock Amendment for fiscal years 1995 and 1996. The Conservation Federation filed suit declaring that moneys in the Conservation Fund may not be used to make these refunds and that the sales tax proceeds are not includable in TSR. The Supreme Court ruled that Article IV, Section 43(b) requires that conservation funds be expended for conservation purposes as specified in that section and using these funds to pay for Hancock refunds is, therefore, unconstitutional.

This decision also related to whether the conservation sales tax should be included in TSR. The Supreme Court noted that the conservation sales tax imposed by Section 42(a) was enacted by a vote of the people in 1976, which was four years before the Hancock Amendment was approved. However, Section 43(b) was adopted contemporaneously with the Hancock Amendment and, therefore, went into effect after the Hancock Amendment's baseline period for TSR, which was fiscal year 1980-81. Thus, this case presents the unique situation that a tax was approved by the voters prior to the Hancock Amendment, but the voter-approved (indeed voter mandated) spending of that revenue was approved after the Hancock Amendment's initial tax and spending ceiling was calculated.

Since the state had already paid refunds to taxpayers for fiscal years 1995, 1996, and 1997, the state has decided not to recalculate TSR for those years. However, starting in fiscal year 1998, the state has excluded the conservation sales tax (and related interest earnings) from TSR in accordance with the Supreme Court decision. In addition, the state will not pay any refunds (for prior years or future years) from the Conservation Fund.

Although we agree with OA-BP's calculation of TSR for 1999 and 1998, we consider a few items open to interpretation, which deal with whether to include or exclude from TSR the monies received by the state for cost reimbursements and recovery costs. These issues are discussed in more depth later in this report.

In December, 1999, two lawsuits were filed in the Cole County Circuit Court. The first case, Flotron v. Carnahan, et. al., 99CV323351, claims that the Supreme Court held in Conservation Federation v. Hanson, 994 S.W. 2d 27 (Mo. Banc. 1999) that all revenue from the conservation sales tax must be removed not only from yearly total state revenues, but also from the baseline calculation for 1981. The second case, Missouri Merchants and Manufacturers Association, et. al. v. State of Missouri et. al., 99CV323530 claims that the state has not included tax credits in the calculation of the revenue limit and TSR.

## NOTE TO THE EXHIBITS

REVIEW OF ARTICLE X, SECTION 16 THROUGH 24  
CONSTITUTION OF MISSOURI  
NOTE TO THE EXHIBITS

Refunds paid for the year ended June 30, 1998, totaled \$178,843,080 which included \$166,740,970 for 1998 plus \$12,102,110 due from the prior years of 1995, 1996, and 1997. Of the amount due from prior years \$12,071,930 related to the court decision that payments to the state to recoup public safety and regulatory enforcement costs for gaming riverboats should be included in total state revenue. The remaining \$30,180 related to various minor adjustments for 1995, 1996, and 1997.

## SCHEDULES

## Schedule 1

## BACKGROUND, METHODOLOGY, AND CONCLUSIONS

REVIEW OF ARTICLE X, SECTIONS 16 THROUGH 24,  
CONSTITUTION OF MISSOURI  
BACKGROUND, METHODOLOGY, AND CONCLUSIONS

The following identifies the various components of the amendment and the application of the amendment to state revenues.

**Formula**

Article X, Section 18(a) of the Constitution of Missouri establishes the revenue limit formula as follows:

$$\begin{array}{lcl} \text{Revenue limit} & = & \frac{\text{TSR in FY 1981}}{\text{CY 1979 Missouri personal income (MPI)}} \quad \times \quad \text{The greater of Missouri for} \\ \text{FY 19XX} & & \text{Personal Income (MPI)} \\ & & \text{in the calendar year (CY)} \\ & & \text{prior to the CY in which} \\ & & \text{appropriations are made} \\ & & \text{for FY 19XX or Average} \\ & & \text{MPI for three CYs} \\ & & \text{preceding FY 19XX.} \end{array}$$

The formula is composed of two principal parts. The first part of the formula, the base year ratio (BYR), is as follows:

$$\frac{\text{TSR in FY 1981}}{\text{CY 1979 MPI}}$$

The application of this ratio to the second part of the formula (future years' MPI) ensures that no greater portion of a future year's personal income will be used to fund state government than was the case at the time of passage of the amendment. The MPI amounts used in the formula for the base year and subsequent years are reported by the U. S. Department of Commerce (DOC).

The OA-BP does not adjust the BYR for changes already made or for future changes or adjustments to this amount by DOC. Article X, Section 17(2) refers to "... total income . . . as defined and officially reported by" DOC. Even though the amendment does not specifically refer to such adjustments, this wording suggests that the BYR should be adjusted whenever CY 1979 MPI is adjusted by DOC. The use of the initial reporting of MPI does provide an unchanging BYR for future years, which provides at least two benefits. First, the state can more easily plan and make appropriate adjustments to stay under the revenue limit. Second, if the initial MPI is subsequently adjusted, retroactive refunds are a possibility. That is, an adjustment to MPI for any prior year (including the base year) could reduce the revenue limit for a prior year below that year's TSR, providing a refund where one previously was not due. Therefore, we find this approach reasonable so long as it is followed consistently.

As with the BYR, the OA-BP uses the MPI first officially published by DOC after the close of the CY to calculate the revenue limit for the applicable fiscal year. For the reasons expressed in the preceding paragraph, we find this approach reasonable so long as it also is followed consistently.

The BYR was calculated by the OA-BP as follows:

$$\frac{2,232.204096}{39,581.0} = .05639584891$$

In its calculations of the revenue limit the OA-BP rounded the BYR to .056395.

Article X, Section 18(b) allows the state to exceed the revenue limit by 1 percent before a refund is due. Therefore, to determine the point at which the refund provision takes effect (the refund threshold) the revenue limit is adjusted upward by 1 percent. However, should TSR exceed the refund threshold, all revenues in excess of the revenue limit are subject to refund.

### **Adjustments**

Article X, Section 18(d) provides that the revenue limit may be adjusted, “. . . if responsibility for funding a program or programs is transferred from one level of government to another, as a consequence of constitutional amendment . . . provided that the total revenue authorized for collection by both state and local governments does not exceed that amount which would have been authorized without such a change.”

The OA-BP has adjusted the revenue limit for the transfer of deputy circuit clerks from the county payroll to the state payroll under Section 483.245, RSMo 1996, which was effective on July 1, 1981. In past years the SAO disagreed with this adjustment because state funding of these salaries was required by statute instead of by consequence of constitutional amendment. In addition, the Judicial Article Amendment was effective on August 3, 1976, which was prior to the time the Hancock Amendment was adopted by the voters on November 4, 1980. The Supreme Court ruled in its decision on January 27, 1998, that an adjustment to the revenue limit for the transfer of deputy circuit clerks from the county payroll to the state payroll is appropriate.

### **Composition of Total State Revenues**

An integral part in applying the provisions of the amendment to state revenues is to determine what constitutes TSR. The amendment does not specify the methodology to be used to determine TSR. Consequently, procedures to calculate TSR have been established and certain decisions as to items that would be either included or excluded have been made, except for items ruled on by the Attorney General or the Missouri courts.

TSR includes all revenues recorded in the Statewide Accounting System for Missouri (SAM) and receipted by the state treasurer, which may only be withdrawn pursuant to an appropriation or which stand appropriated by the Constitution of Missouri. Various funds not in the state treasury are not included in TSR. These funds include university local funds, local sales tax fund collections made by the Department of Revenue, various funds held in trust for inmates, patients, etc., and various quasi-governmental agencies such as the Board of Public Buildings, the Housing Development Commission, the Higher Education Loan Authority, the Health and Educational Facilities Authority, and the state's retirement systems. The Hancock Amendment states the composition of TSR is, “defined in the budget message of the governor for fiscal year 1980-81.” The funds described above were not addressed in the governor's budget message for that year since the funds were not in the state treasury and were not appropriated. Thus, it seems reasonable to conclude that these funds should not be included in TSR.

From the revenue amounts obtained from SAM, certain types of revenues are excluded to arrive at TSR, as defined in Article X, Section 17(1) of the constitution, as follows:

A. Federal Funds

Article X, Section 17 specifically excludes federal funds.

B. Proposition C Sales and Use Tax\Interest

In November 1982, the voters approved Proposition C, which increased the state sales and use tax by 1 percent. Since Proposition C received direct voter approval as provided in Article X, Section 16, the proceeds from the additional 1 percent sales and use tax, including any interest earned on the investment of such taxes, are excluded.

C. Proposition A Gas Tax and License Fee Increases

In April 1987, the voters approved Proposition A, which increased the motor fuel tax by four cents per gallon and increased the annual registration fee for certain motor vehicles, effective July 1, 1987. Since the increase in tax and fees received direct voter approval, these revenues are excluded.

D. Bond Sales

An attorney general opinion concluded that proceeds of the state's general obligation bonds were not to be included in TSR.

E. Lottery

In November 1984, the voters approved Article III, Section 39(b) of the constitution, which authorized the creation of the Missouri State Lottery. This provision states that revenues produced from the conduct of a state lottery shall not be a part of TSR. Since the voters approved the state lottery, all revenue and expenditure refunds related to the state lottery are excluded.

F. Refunds

Refunds received due to the overpayment of obligations by the state, as identified by certain revenue object codes, are excluded.

G. Interagency Sales and Receipts

Since interagency transactions do not generate additional revenue for the state as a whole, interagency sales and receipts, as identified by certain revenue object codes, are excluded.

- H. Soil and Water Sales and Use Tax\Interest  
and
- I. Parks Sales and Use Tax\Interest

In August 1984, the voters approved a one-tenth of 1 percent sales tax for soil and water conservation and state parks. Article IV, Section 47(c) states that the additional revenue provided by the tax shall not be part of TSR. Since the voters approved the sales tax, the sales tax and any interest earned on the investment of the balance in these funds are excluded.

- J. Redeposit of Investment Principal

The redeposit of investment principal is excluded.

- K. Outlawed Checks

Outlawed checks, which are state checks that were not cashed by the payee within the time allowed, are redeposited in the state treasury and are excluded.

- L. Alternative Care Trust Fund

The Alternative Care Trust Fund was established in 1989 under Section 210.560, RSMo 1994. The Division of Family Services uses this fund to account for funds held in trust for the benefit of children who have been placed in the legal custody of the state. The Department of Corrections, Department of Mental Health, and the Division of Veteran's Affairs hold funds in trust for inmates and patients; however, these funds are not in the state treasury and are not included in TSR. Funds held in trust are not state funds since the funds remain the property of the individual. Since the Alternative Care Trust Fund does not account for state funds, it is excluded.

- M. Redeposit of Loan Principal

Redeposits of loan principal are excluded.

- N. Amendment 8 Motor Fuel Tax to Local Governments

In August 1992, the voters approved an amendment to Article IV, Section 30(a) which revised the apportionment of the motor fuel tax. In addition, the amendment provided that beginning July 1, 1993, the net proceeds of fuel taxes allocated to local governments is excluded from TSR. Since the voters approved this revised allocation of the fuel tax, the fuel tax allocated to local governments is excluded.

- O. Bingo

The August 1992 amendment to Article III, Section 39(d) related to gaming activities also applies to bingo games, in that all state revenues derived from the conduct of gaming activities shall be appropriated beginning July 1, 1993, solely for public education and shall not be included in TSR. Section 313.007, RSMo 1994 requires the bingo tax to be deposited in the Bingo Proceeds for Education Fund. The bingo tax, certain fees, and the interest earned on the investment of the fund are excluded from TSR.

P. Riverboat Gambling

In August 1992, the voters approved an amendment to Article III, Section 39(d) of the Missouri Constitution. This constitutional amendment requires that all state gaming revenues must be appropriated for public education and excludes these revenues from TSR.

In 1993, the Missouri General Assembly enacted Senate Bills 10 and 11. This comprehensive gaming legislation established riverboat gaming in the state. This law repealed House Bill 149 related to riverboat gaming which had been enacted by voters as Proposition A in November 1992.

Under Senate Bills 10 and 11, the legislature imposed a 20 percent tax on adjusted gross receipts from gambling games. The state treats 90 percent of this revenue as state gaming revenues under Article III, Section 39(d) and earmarks the revenues to the Gaming Proceeds for Education Fund. The remaining 10 percent of this revenue is allocated to the home dock city or county. Under Article III, Section 39(d) of the Missouri Constitution, the 90 percent portion of the adjusted gross receipts tax is exempted from TSR. The remaining 10 percent portion of the adjusted gross receipts tax is also excluded from TSR because these funds are distributed by the Department of Revenue without deposit in the state treasury and without appropriation.

Under Senate Bills 10 and 11, the legislature also established a Gaming Commission Fund in the state treasury and authorized gaming commission license fees, penalties, administrative fees, reimbursements, and admission fees to be deposited in this fund and expended pursuant to state appropriation for various purposes.

On November 24, 1998, the Missouri Court of Appeals, Western District entered its final decision in Kelly v. Hanson, et. al., 984 S.W. 2d 540 (Mo. App. 1998). The Missouri Court of Appeals, Western District ruled that revenue from the one dollar portion of the state imposed two dollar admission fee that is remitted to the "home dock city or county" is not included in TSR, while the revenue from the payments to the state to recoup public safety and regulatory enforcement costs is included in TSR.

Q. Pansey Johnson-Travis Memorial State Gardens Trust Fund

The state received an endowment in 1987 for the purpose of establishing a memorial state garden. The state is to invest the endowment for 100 years before using the funds to establish the memorial garden. Since the funds cannot be appropriated until 2087, the revenue is excluded from TSR.

R. Canceled Checks

Receipts derived from the redeposit of state checks that have been canceled are excluded.

S. Redeposit of State Funds

The redeposit of state funds for which a state expenditure was originally incurred, such as from closing a petty cash fund and returning the funds to the state treasury, is excluded.

T. Loan Proceeds

The state receives loans or advancements from the federal government, local governments, or private sources, to finance the acceleration of state projects. Since the loans must be repaid in the future, they are excluded.

U. Conservation Sales and Use Tax/Interest

Pursuant to the Supreme Court decision in Conservation Federation of Missouri, et. al., v. Richard Hanson, et. al., 994 S.W. 2d 27 (Mo. Banc. 1999), the revenue derived from the one-eight of one percent conservation sales tax, and any interest earned on the investment of these funds, are excluded.

V. State Employee Expense Reimbursement

The state receives reimbursement from private individuals, firms, partnerships, corporations, etc. for state employee expenses incurred in providing testimony in a court of law, for which the employee has already been reimbursed by a state expense account.

W. Recovery Costs (See Items Open to Interpretation)

Monies received from others for costs incurred by the state or to be incurred by the state are excluded.

X. Cost Reimbursements (See Items Open to Interpretation)

Monies received from other governments for reimbursements of costs incurred by the state are excluded.

Y. State Guaranty Student Loan Fund

Federal legislation in August 1997 made changes in the accounting required for federal education loans. Starting in state fiscal year 1998, the federal government considers all monies in this fund as property of the federal government. As a result, the state excludes the entire fund from TSR as funds held in trust for the federal government.

**Expenditure Refunds**

According to Article X, Section 17(1), total state revenue shall exclude the amount of any credits based on actual tax liabilities. Refunds disbursed due to the excess collection by the state of liabilities owed the state, largely tax refunds, as identified by certain expenditure object codes are excluded. The method used to determine expenditure refunds is not specified in the amendment. Although the OA-BP initially used the appropriation basis to determine expenditures refunds, during fiscal year 1984, the OA-BP changed to the cash basis. The SAO had consistently used the appropriation basis to measure refunds. As a result, a difference existed. However, in its decision of January 27, 1998, the Supreme Court indicated that a cash basis of accounting should be used to determine compliance with the Hancock Amendment. As a result, the SAO changed its calculation of expenditure refunds to the cash basis.

## Cash Management Improvement Act

The state has to enter into an agreement with the federal government which governs the timing of when the state can obtain federal grant monies. If the state holds federal funds longer than needed, the state has to reimburse the federal government for interest earnings. Since the interest was earned on federal funds and has to be returned to the federal government, it is excluded from TSR.

## Unclaimed Property

Under Section 447.543, RSMo Cumulative Supp. 1999, the state receives abandoned funds from various sources (banks, businesses, insurance companies, etc.). These funds are placed in the state Abandoned Fund Account. The rightful owner may receive these funds if properly claimed. The state includes the receipts in TSR. Starting in fiscal year 1998, the state excludes from TSR amounts paid to the rightful owner.

## **Items Open to Interpretation**

The state has excluded from TSR receipts for cost reimbursements since fiscal year 1982 and receipts for recovery costs since fiscal year 1988. The constitution does not specifically mention cost reimbursements and recovery costs. We agreed with such exclusions in prior years because from an accounting standpoint, they may not be considered revenue. However, recent court decisions during 1998 have brought up issues that make it uncertain as to whether these receipts should be excluded. The Supreme Court decision in Kelly v. Hanson, et. al., 959 S.W. 2d 107 (Mo. 1998) on January 27, 1998, indicated the calculation of TSR presents unique financial related legal requirements (as opposed to treatment from an accounting standpoint), when the court determined that funds collected by the state may not be considered revenue in the context of TSR unless the funds are received into the state treasury and the funds are subject to appropriation. Receipts from cost reimbursements and recovery costs meet the Supreme Court's two-part test noted above. In addition, on November 24, 1998, the Missouri Court of Appeals, Western District entered a final decision in Kelly v. Hanson, et. al., 984 S.W. 2d 540 (Mo. App. 1998) which ruled that revenue from the payments to the state to recoup public safety and regulatory enforcement costs for gaming riverboats is included in TSR. These recoupments from the gaming riverboats are coded as cost reimbursements by the state and have been properly included in TSR by the state. However, it is uncertain whether all other revenue from recovery costs and cost reimbursements should be included based on the courts' decisions. Although we have also excluded these receipts in our calculations of TSR, we consider these items open to interpretation and we will continue to review these issues.

This report is intended for the information of the office's management and other applicable state government officials. However, this report is a matter of public record and its distribution is not limited.

## APPENDIX

ARTICLE X, SECTIONS 16 THROUGH 24,  
CONSTITUTION OF MISSOURI  
(ADOPTED NOVEMBER 4, 1980, AMENDED APRIL 2, 1996\*)

TAXATION

**Section 16. Taxes and state spending to be limited--state to support certain local activities--emergency spending and bond payments to be authorized.** Property taxes and other local taxes and state taxation and spending may not be increased above the limitations specified herein without direct voter approval as provided by this constitution. The state is prohibited from requiring any new or expanded activities by counties and other political subdivisions without full state financing, or from shifting the tax burden to counties and other political subdivisions. A provision for emergency conditions is established and the repayment of voter approved bonded indebtedness is guaranteed. Implementation of this section is specified in sections 17 through 24, inclusive of this article.

**Section 17. Definitions.** As used in sections 16 through 24 of Article X:

(1) **“Total state revenues”** includes all general and special revenues, license and fees, excluding federal funds, as defined in the budget message of the governor for fiscal year 1980-1981. Total state revenues shall exclude the amount of any credits based on actual tax liabilities or the imputed tax components of rental payments, but shall include the amount of any credits not related to actual tax liabilities.

(2) **“Personal income of Missouri”** is the total income received by persons in Missouri from all sources, as defined and officially reported by the United States Department of Commerce or its successor agency.

(3) **“General price level”** means the Consumer Price Index for All Urban Consumers for the United States, or its successor publications, as defined and officially reported by the United States Department of Labor, or its successor agency.

**Section 18. Limitation on taxes which may be imposed by general assembly--exclusions--refund of excess revenue--adjustments authorized.** (a). There is hereby established a limit on the total amount of taxes which may be imposed by the general assembly in any fiscal year on the taxpayers of this state. Effective with fiscal year 1981-1982, and for each fiscal year thereafter, the general assembly shall not impose taxes of any kind which, together with all other revenues of the state, federal funds excluded, exceed the revenue limit established in this section. The revenue limit shall be calculated for each fiscal year and shall be equal to the product of the ratio of total state revenues in fiscal year 1980-1981 divided by the personal income of Missouri in calendar year 1979 multiplied by the personal income of Missouri in either the calendar year prior to the calendar year in which appropriations for the fiscal year for which the calculation is being made, or the average of personal income of Missouri in the previous three calendar years, whichever is greater.

(b). For any fiscal year in the event that total state revenues exceed the revenue limit established in this section by one percent or more, the excess revenues shall be refunded pro rata based on the liability reported on the Missouri state income tax (or its successor tax or taxes) annual returns filed following the close of such fiscal year. If the excess is less than one percent, this excess shall be transferred to the general revenue fund.

(c). The revenue limitation established in this section shall not apply to taxes imposed for the payment of principal and interest on bonds, approved by the voters and authorized under the provisions of this constitution.

(d). If responsibility for funding a program or programs is transferred from one level of government to another, as a consequence of constitutional amendment, the state revenue and spending limits may be adjusted to accommodate such change, provided that the total revenue authorized for collection by both state and local governments does not exceed that amount which would have been authorized without such change.

(e).1. In addition to the revenue limit imposed by section 18 of this article, the general assembly in any fiscal year shall not increase taxes or fees without voter approval that in total produce new annual revenues greater than either fifty million dollars adjusted annually by the percentage change in the personal income of Missouri for the second previous fiscal year, or one percent of total state revenues for the second fiscal year prior to the general assembly's action, whichever is less. In the event that an individual or series of tax or fee increases exceed the ceiling established in this subsection, the taxes or fees shall be submitted by the general assembly to a public vote starting with the largest increase in the given year, and including all increases in descending order, until the aggregate of the remaining increases and decreases is less than the ceiling provided in this subsection.

2. The term "new annual revenues" means the net increase in annual revenues produced by the total of all tax or fee increases enacted by the general assembly in a fiscal year, less applicable refunds and less all contemporaneously occurring tax or fee reductions in that same fiscal year, and shall not include interest earnings on the proceeds of the tax or fee increase. For purposes of this calculation, "enacted by the general assembly" shall include any and all bills that are truly agreed to and finally passed within that fiscal year, except bills vetoed by the governor and not overridden by the general assembly. Each individual tax or fee increase shall be measured by the estimated new annual revenues collected during the first fiscal year that it is fully effective. The term "increase taxes or fees" means any law or laws passed by the general assembly after the effective date of this section that increase the rate of any existing tax or fee, impose a new tax or fee, or broaden the scope of a tax or fee to include additional class of property, activity, or income, but shall not include the extension of an existing tax or fee which was set to expire.

3. In the event of an emergency, the general assembly may increase taxes, licenses or fees for one year beyond the limit in this subsection under the same procedure specified in section 19 of this article.

4. Compliance with the limit in this section shall be measured by calculating the aggregate actual new annual revenues produced in the first fiscal year that each individual tax or fee change is fully effective.

5. Any taxpayer or statewide elected official may bring an action under the provisions of section 23 of this article to enforce compliance with the provisions of this section. The Missouri supreme court shall have original jurisdiction to hear any challenge brought by any statewide elected official to enforce this section. In such enforcement actions, the court shall invalidate the taxes and fees which should have received a public vote as defined in subsection 1 of this section. The court shall order remedies of the amount of revenue collected in excess of the limit in this subsection as the court finds appropriate in order to allow such excess amounts to be refunded or to reduce taxes and/or fees in the future to offset the excess monies collected.

**Section 19. Limits may be exceeded, when, how.** The revenue limit of section 18 of this article may be exceeded only if all of the following conditions are met: (1) The governor requests the general assembly to declare an emergency; (2) the request is specific as to the nature of the emergency, the dollar amount of the emergency, and the method by which the emergency will be funded; and (3) the general assembly thereafter declares an emergency in accordance with the specifics of the governor's request by a majority vote for fiscal year 1981-1982, thereafter a two-thirds vote of the members elected to and serving in each house. The emergency must be declared in accordance with this section prior to incurring any of the expenses which constitute the emergency request. The revenue limit may be exceeded only during the fiscal year for which the emergency is declared. In no event shall any part of the amount representing a refund under section 18 of this article be the subject of an emergency request.

**Section 20. Limitation on state expenses.** No expenses of state government shall be incurred in any fiscal year which exceed the sum of the revenue limit established in sections 18 and 19 of this article plus federal funds and any surplus from a previous fiscal year.

**Section 21. State support to local governments not to be reduced, additional activities and services not to be imposed without full state funding.** The state is hereby prohibited from reducing the state financed proportion of the costs of any existing activity or service required of counties and other political subdivisions. A new activity or service or an increase in the level of any activity or service beyond that required by existing law shall not be required by the general assembly or any state agency of counties or other political subdivision, unless a state appropriation is made and disbursed to pay the county or other political subdivision for any increased costs.

**Section 22. Political subdivisions to receive voter approval for increases in taxes and fees--rollbacks may be required--limitation not applicable to taxes for bonds.** (a). Counties and other political subdivisions are hereby prohibited from levying any tax, license or fees, not authorized by law, charter or self-enforcing provisions of the constitution when this section is adopted or from increasing the current levy of an existing tax, license or fees, above that current levy authorized by law or charter when this section is adopted without the approval of the required majority of the qualified voters of that county or other political subdivision voting thereon. If the definition of the base of an existing tax, license or fees, is broadened, the maximum authorized current levy of taxation on the new base in each county or other political subdivision shall be reduced to yield the same estimated gross revenue as on the prior base. If the assessed valuation of property as finally equalized, excluding the value of new construction and improvements, increases by a larger percentage than the increase in the general price level from the previous year, the maximum authorized current levy applied thereto in each or other political subdivision shall be reduced to yield the same gross revenue from existing property, adjusted for changes in the general price level, as could have been collected at the existing authorized levy on the prior assessed value.

(b). The limitations of this section shall not apply to taxes imposed for the payment of principal and interest on bonds or other evidence of indebtedness or for the payment of assessments on contract obligations in anticipation of which bonds are issued which were authorized prior to the effective date of this section.

**Section 23. Taxpayers may bring actions for interpretations of limitations.** Notwithstanding other provisions of this constitution or other law, any taxpayer of the state, county or other political subdivisions shall have standing to bring suit in a circuit court of proper venue and additionally, when the state is involved, in the Missouri supreme court, to enforce the provisions of sections 16 through

22, inclusive, of this article and, if the suit is sustained, shall receive from the applicable unit of government his costs, including reasonable attorneys' fees incurred in maintaining such suit.

**Section 24. Voter approval requirements not exclusive-- self-enforceability.** (a). The provisions for voter approval contained in sections 16 through 23, inclusive, of this article do not abrogate and are in addition to other provisions of the constitution requiring voter approval to incur bonded indebtedness and to authorize certain taxes.

(b). The provisions contained in sections 16 through 23, inclusive, of this article are self-enforcing; provided, however, that the general assembly may enact laws implementing such provisions which are not inconsistent with the purposes of said sections.

\* The 1996 amendment added Section 18(e).

CITY OF EVERTON, MISSOURI

YEAR ENDED JUNE 30, 1999

**From The Office Of State Auditor  
Claire McCaskill**

Report No. 2000-17  
March 16, 2000

# AUDIT REPORT

Office Of The  
State Auditor Of Missouri  
Claire McCaskill

March 2000

**Some problems were discovered as a result of an audit conducted by our office in response to the request of petitioners from the City of Everton, Missouri.**

---

Cash receipts totaling \$837 were missing from three utility deposits made on September 2, 1999. Other receipts totaling \$534 were not deposited, and there is documentation of only \$66 of cash disbursements from these monies. The city paid Marchelle Roe \$3,372 for clerical services from December 1997 to August 1999 while she served the city as the Mayor and as Alderwoman. In addition, she was overpaid \$89 during September when she served as City Clerk. Marchelle Roe purchased some computer equipment for personal use with the city's credit card, and a city computer was stored at Marchelle Roe's personal residence after the Board of Aldermen voted to sell the computer.

In April 1998, Marchelle Roe installed a mobile home and was connected to city water and sewer. City receipt records do not indicate that a hook up fee of \$350 was collected from Marchelle Roe, as required by city ordinance. In addition, she was unable to provide documentation (receipt/canceled check) of payment. The Board of Aldermen should review the situation and ensure the \$350 hook up fee is properly paid and deposited.

Board minutes are not prepared for closed meetings and the Board of Aldermen conducted business during closed meetings that does not appear to meet the requirements of state law. The board minutes of open meetings did not document the related vote and the specific reasons for going into closed session. The Board of Aldermen changed the city's ward boundary, resulting in the legal status of two aldermen positions being questioned. The city appointed an alderman to the board that had not been a resident of the city for one year. Board minutes were not always signed by the City Clerk and Mayor, and the city has not established a formal policy regarding public access to city records.

The city does not have a formal bidding policy, and the Board of Alderman does not always review and approve payment of city expenditures prior to the disbursements being made.

(over)

The city employs one individual for sewer related services. During the year ending June 30, 1999 he

YELLOW SHEET

was paid a salary of \$14,400. The city also paid \$16,661 in contract labor payments to a business owned by this employee for water and street related services, such as gravel hauling, backhoe services, and meter reading services. During our review of this situation we noted the following:

1. There is no documentation that bids or proposals were solicited from other sources for the contract labor payments.
2. Time sheets are not prepared to support salary payments.
3. The city pays the sewer employee a vehicle allowance of \$100 each month for the use of his personal vehicle. No documentation of actual miles driven is prepared to support this allowance.

The city deposits motor-vehicle-related revenues into the general fund, and documentation did not exist to support the allocation of some expenditures from restricted funds.

The city does not reconcile the total gallons of water billed to customers to the gallons of water pumped. A formal review of the city's water and sewer rates is not performed annually.

No independent verification of the tax books is performed, and the City Collector makes all addition and abatements to the tax books without review or approval by the Board of Aldermen. The City Collector does not prepare monthly or annual reports of taxes collected as well as those that remain delinquent, and the city has not adequately pursued the collection of delinquent property taxes.

City budgets did not comply with state law, and semi-annual financial statements were not published as required by law.

CITY OF EVERTON, MISSOURI

## STATE AUDITOR'S REPORT

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

To the Honorable Mayor  
and  
Members of the Board of Aldermen  
City of Everton  
Everton, Missouri 65646

The State Auditor was petitioned under Section 29.230, RSMo, to audit the city of Everton, Missouri. The city had engaged O'Dell & Company, Certified Public Accountants (CPA firm) to perform a financial audit of the city for the year ended June 30, 1999. To minimize any duplication of effort, we reviewed the report and substantiating working papers of the CPA firm. Our audit of the city included, but was not limited to, the year ended June 30, 1999. The objectives of this audit were to:

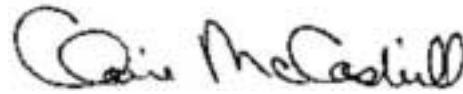

1. Perform procedures we deemed necessary to evaluate the petitioners' concerns.
2. Review compliance with certain constitutional provisions, statutes, ordinances, and attorney general's opinions as we deemed necessary or appropriate in the circumstances.
3. Review certain management practices which we believe could be improved.

Our audit was made in accordance with generally accepted government auditing standards and included such procedures as we considered necessary in the circumstances. We also reviewed board minutes, city policies and ordinances, and various city financial records.

Our audit was limited to the specific matters described above and was based on the selective tests and procedures considered appropriate in the circumstances. Had we performed additional procedures, other information might have come to our attention which would have been included in this report.

The accompanying History and Organization is presented for informational purposes. This information was obtained from the city and was not subjected to the auditing procedures applied in the audit of the city.

The accompanying Management Advisory Report presents our findings and recommendations arising from our audit of the city of Everton, Missouri.

A handwritten signature in black ink, appearing to read "Claire McCaskill". The signature is fluid and cursive, with the first name "Claire" being more prominent than the last name "McCaskill".

Claire McCaskill  
State Auditor

November 19, 1999 (fieldwork completion date)

The following auditors participated in the preparation of this report:

## HISTORY AND ORGANIZATION

# CITY OF EVERTON, MISSOURI HISTORY AND ORGANIZATION

The City of Everton is located in Dade County. It was incorporated in 1892 as a fourth-class city. The population of the city in 1990 was 325.

The city government consists of a mayor and four-member Board of Aldermen. The four board members are elected for two-year terms. The mayor is elected for a two-year term, presides over the Board of Aldermen, and votes only in case of a tie. The Mayor, Board of Aldermen, and other principal officials at June 30, 1999, were:

| <u>Elected Officials</u>           | <u>Term Expires</u> | <u>Actual Compensation for the Year Ended June 30, 1999</u> | <u>Amount Of Bond</u> |
|------------------------------------|---------------------|---|-----------------------|
| Marchelle Roe, Mayor (1)           | April, 2000         | \$ 2,670  | \$ 0                  |
| Bonnie Mallory, Alderwoman (2)     | April, 2001         | 145   | 0                     |
| John Carroll, Alderman (3)         | April, 2001         | 30  | 0                     |
| Nikki Redman, Alderwoman (4)       | April, 2000         | 30  | 0                     |
| Jim Baier, Alderman (5)            | April, 2000         | 40  | 0                     |
| <u>Other Principal Officials</u>   |                     |   |                       |
| Loretta Hudson, City Clerk (6)     |                     | 8,308   | 10,000                |
| Linda Prichard, City Collector (7) |                     | 73  | 10,000                |
| Lee Harmon, Police Chief (8)       |                     | 4,380   | 0                     |
| Tom Pyle, City Attorney (9)        |                     | 1,050   | 0                     |

- (1) Appointed to replace Tom Turner who resigned in February 1999. Roe resigned as Mayor in August 1999 to become City Clerk and Bonnie Mallory was appointed as Mayor. Bonnie Mallory resigned as Mayor in September 1999, and was reappointed as Mayor in January 2000.
- (2) Resigned in August 1999, and Jerry Forsgren was appointed in September 1999.
- (3) Earl Mincks served as Alderman prior to January 1999. John Carroll resigned in January 2000 and James Weaver was appointed.
- (4) Appointed to replace Danny Rowden who resigned in March 1999.
- (5) Appointed to replace Marchelle Roe who resigned in February 1999 to become Mayor. Jim Baier resigned in July 1999 and June Mayfield was appointed in August 1999.
- (6) Resigned in July 1999 and Marchelle Roe was appointed in August. Roe resigned in September 1999, and Stephanie Gillaspy was appointed in October 1999. In November 1999, Stephanie Gillaspy was appointed to the new position of Utility Clerk and Paula Woods was appointed as City Clerk. Stephanie Gillaspy resigned in January 2000 and Marchelle Roe was appointed as Utility Clerk.
- (7) Bonnie Mallory served as City Collector prior to April 1999.
- (8) Resigned in August 1999, and in January 2000 John Dilly was appointed as Police Chief.

(9) Appointed to replace Terri Capuzzi in July 1998.

Assessed valuation and tax rate information for 1999 and 1998 are as follows:

ASSESSED VALUATION

|                      | <u>1999</u>         | <u>1998</u>      |
|----------------------|---------------------|------------------|
| Real Estate          | \$ 767,430          | 749,120          |
| Personal Property    | 309,930             | 275,240          |
| Railroad and Utility | <u>175,135</u>      | <u>191,367</u>   |
| Total                | \$ <u>1,252,495</u> | <u>1,215,727</u> |

TAX RATES PER \$100 ASSESSED VALUATION

|                          |             |      |             |
|--------------------------|-------------|------|-------------|
| General Fund             | \$ 1.00     | 1.00 |             |

| Total                    | <u>1.08</u> |      | <u>1.08</u> |

The city had the following sales tax; rates are per \$1 of retail sales:

|         | <u>Rate</u> | <u>Expiration<br/>Date</u> |
|---------|-------------|----------------------------|
| General | .01         | None                       |

## MANAGEMENT ADVISORY REPORT

CITY OF EVERTON  
SUMMARY OF FINDINGS

1. Undeposited Receipts and Questionable Transactions (pages 10-12)

Cash receipts of \$837 are missing from three deposits of utility monies made on September 2, 1999. Other cash receipts totaling \$534 were also not deposited, and there is documentation of only \$66 of cash disbursements from these monies. The city paid Marchelle Roe \$3,372 for clerical services from December 1997 to August 1999 while she served the city as the Mayor and as Alderwoman. In addition, she was overpaid \$89 during September when she served as City Clerk. Marchelle Roe purchased some computer equipment for personal use with the city's credit card, and a city computer was stored at Marchelle Roe's personal residence after the Board of Aldermen voted to sell the computer. City records do not indicate that a \$350 utility hook-up fee was collected from Marchelle Roe.

2. Board Meetings and Records (pages 12-15)

Board minutes are not prepared for closed meetings and the Board of Aldermen conducted business during closed meetings that does not appear to meet the requirements of state law. The board minutes of open meetings did not document the related vote and the specific reasons for going into closed session. The Board of Aldermen changed the city's ward boundary, resulting in the legal status of two aldermen positions being questioned. The city appointed an alderman to the board that had not been a resident of the city for one year. Board minutes were not always signed by the City Clerk and Mayor, and the city has not established a formal policy regarding public access to city records.

3. Expenditures (pages 15-17)

The city does not have a formal bidding policy, and the Board of Alderman does not always review and approve payment of city expenditures prior to the disbursements being made. Receipt of goods or services is not always indicated on the invoices. The city's sewer employee received \$16,661 for contract work that was not bid, does not prepare a time sheet for salary payments, and receives a monthly vehicle allowance that was not properly reported on his W-2. The city incurred late fees and unreasonable interest charges on a city credit card.

4. Restricted Revenues (pages 17-18)

The city deposits motor-vehicle-related revenues into the general fund, and documentation did not exist to support the allocation of some expenditures from restricted funds.

5. Water and Sewer System Procedures (pages 18-20)

The city does not reconcile the total gallons of water billed to customers to the gallons of water pumped. A formal review of the city's water and sewer rates is not performed annually, and several errors were noted on the city's computerized utility reports. Supporting documentation and approval of credit adjustments posted to the utility system is not maintained.

6. Accounting Controls and Procedures (pages 20-22)

The City Clerk and the former City Collector served in incompatible positions as the City Treasurer and a member of the Board of Alderman, respectively. Receipt slips are not issued for all monies received, and receipts are not recorded until the deposit is made. Checks and money orders are not restrictively endorsed until the deposit is prepared. Deposits are not made on a timely basis, and cash receipts are withheld from deposits to make change and to purchase postage. Some persons authorized to sign checks are not bonded, and checks are sometimes signed in advance. Bank reconciliations are not performed monthly.

7. Property Tax Procedures (pages 22-24)

No independent verification of the tax books is performed, and the City Collector makes all addition and abatements to the tax books without review or approval by the Board of Aldermen. The City Collector does not prepare monthly or annual reports of taxes collected as well as those that remain delinquent. The city has not adequately pursued the collection of delinquent property taxes. The City Collector does not charge the correct penalty on delinquent taxes. Public hearings are not held on the city's proposed property tax rates.

8. Budgets and Financial Reporting (pages 24-25)

Budgets did not comply with the state law, and semiannual financial statements were not published as required by law.

9. Ordinances (page 25)

City ordinances are outdated and the index of ordinances is not current and accurate. The city has not prepared ordinances to document the approved tax levy for each year. Detail of the votes taken by specific board members for proposed ordinances is not maintained in the board minutes.

10. Property Records (pages 26)

The city has not established records to account for all property owned by the city.

CITY OF EVERTON  
MANAGEMENT ADVISORY REPORT

|           |   |
|-----------|---|
| <b>1.</b> | <b>Undeposited Receipts and Questionable Transactions</b> |
|-----------|---|

- A. The city of Everton operates a combined waterworks and sewerage system, and accepts cash, checks, and money orders for payment for water and sewer services. Utility monies are recorded on a computerized utility system; however, city personnel experienced difficulty in operating the system, and as a result, some information was lost and some reports produced by the system were not accurate.

In July 1999 the City Clerk resigned and Mayor Marchelle Roe and several board members performed the duties of City Clerk. On August 31, 1999 Marchelle Roe resigned as Mayor to become City Clerk.

Three deposits made by Marchelle Roe on September 2, 1999, did not include \$837 of cash receipts. These deposits were for water and sewer receipts received in mid July and for the month of August 1999. Marchelle Roe indicated that she was aware of the missing cash when she made the deposits, and advised several board members of the shortage. However, no action was ever taken by the Board of Aldermen to contact law enforcement authorities to investigate the misappropriated funds. Information regarding this matter has been turned over to the Dade County Prosecuting Attorney and the Missouri State Highway Patrol.

In addition, during the 16 month period ending in October 1999 utility collections exceeded deposits by at least \$534. City personnel indicated that cash receipts were sometimes used to purchase postage; however, the city provided postage receipts totaling only \$66.

Because the city's utility records were not complete and accurate, detailed reviews were very time consuming. Therefore, additional amounts may have been withheld from deposits in other months. Because of the control weaknesses, and inadequate record keeping the city has no assurance that undeposited receipts were spent on city business and were not misappropriated.

The city's auditor issued a qualified opinion on the city's financial statements due to a low utility collection rate and incomplete billing records.

- B. Marchelle Roe was appointed to the Board of Aldermen in December 1997 and resigned in February 1998. In April 1998 she was elected to the Board of Aldermen and in February 1999 she was appointed Mayor. In addition to the regular compensation allowed for her duties as Alderwoman and Mayor, \$3,372 was paid to Marchelle Roe from December 1997 to August 1999 for accounting and clerical duties. These services were not bid and supporting documentation could not be located to support these payments. In addition, authorization of this work was not documented in the board minutes except in January 1998.

These payments also represent potential violations of state law. Section 105.454, Supp. 1998, prohibits financial transactions between a city and an officer or employee (or spouse, dependent child, or business and corporate interest of the officer or employee) of that city that involved more than \$1,500 per year or \$500 per transaction unless there had been public notice to solicit proposals and (except for real property) competitive bidding, provided that the bid or offer was the lowest received.

- C. In March 1999, Marchelle Roe purchased some personal computer equipment costing \$530 at a nearby office supply store during a special interest free promotion, and charged it to the city's credit card. Marchelle Roe indicated that her computer equipment was to have been charged to her personal credit card, but was charged to the city's credit card in error. However, according to the office supply store Marchelle Roe did not open a credit card account with them until October 1999. While Marchelle Roe was responsible for reviewing and approving city invoices during this time period, this charge was not removed from the city's bill until October 1999 when the city's auditor brought this to her attention.

While the city had not made any payments toward the purchases, steps should be taken by the city to ensure all credit card purchases are reviewed and approved by the Board of Aldermen.

- D. The April 7, 1999 board minutes indicate the board's intention to sell a city computer that no longer worked. The computer had been periodically used by Marchelle Roe at her personal residence for city business, and was not returned to city hall until October 1999. City property should not be stored at personal residences, and assets should be disposed of on a timely basis when approved by the board.
- E. In April 1998 Marchelle Roe installed a mobile home and was connected to city water and sewer. City ordinance requires a hook up fee of \$350 for all new water and sewer connections. City receipt records do not indicate that a hook up fee of \$350 was collected from Marchelle Roe. In addition, she was unable to provide documentation (receipt/canceled check) of payment. The Board of Aldermen should review the situation and ensure the \$350 hook up fee is properly paid and deposited.
- F. The weekly payroll amounts paid to Marchelle Roe as City Clerk contained numerous calculation errors during the month of September 1999. As a result, she was overpaid approximately \$89. Although an alderman signed and approved her time cards, it does not appear that calculations were checked for accuracy. To ensure payments for salaries are accurate, computations should be recalculated.

**WE RECOMMEND** the Board of Aldermen:

- A. Work with law enforcement officials regarding any criminal prosecution and to obtain restitution of the misappropriated funds. Other cash receipts which may have been used to make cash disbursements should be reviewed and if not accounted for, reimbursement should be obtained. In addition, the board should ensure all monies received are deposited and disbursements made by check.

- B. Refrain from entering into business transactions with city officials unless such services or transactions are properly bid in accordance with state law.
- C. Ensure all credit card purchases are reviewed and approved by the Board of Aldermen.
- D. Establish a policy addressing the timely disposal of assets no longer used by the city.
- E. Review the situation and ensure the \$350 hook up fee is properly paid.
- F. Ensure salary computations are recalculated for accuracy.

**AUDITEE'S RESPONSE:**

- A. *We will take this into consideration. Cash is no longer withheld from receipts for purchases. All purchases are now made by check.*
- B&D. *We will take these recommendations into consideration.*
- C. *This is now being done.*
- E. *We will review this situation.*
- F. *We will review September's payroll.*

|           |                                   |
|-----------|-----------------------------------|
| <b>2.</b> | <b>Board Meetings and Records</b> |
|-----------|-----------------------------------|

- A. The Board of Aldermen frequently hold closed meetings. During our review of closed meetings, we noted the following concerns:
  - 1. Minutes are not prepared to document matters discussed in closed meetings, and it is not clear that the final disposition is made public. Section 610.021, RSMo, Supp. 1999, requires certain matters discussed in closed session to be made public upon final disposition. In addition, closed session minutes are necessary to document and record official board decisions and actions affecting city government and the public, and to ensure compliance with the Sunshine Law.
  - 2. The Board of Aldermen has conducted city business at numerous closed meetings that does not appear to meet the requirements of Section 610.021, RSMo Supp 1999. It is not clear when the board approved an ordinance changing the ward boundary, at a closed or open meeting.

In addition, several appointments to vacant positions on the Board of Aldermen have been made in closed session. The Board of Aldermen indicated that the appointment of Alderwoman Mallory to the position of Mayor in August 1999 was made during a closed session meeting. Members of the board indicated that they believed this was a personnel issue and could be discussed during a closed meeting; however, Attorney General's Opinion No. 184, 1989 to Mathews, concluded that legislative bodies could not close a meeting to discuss prospective

appointments to citizen boards. Furthermore, Attorney General's Opinion No. 77, 1992 to Flotron, concluded that an elected mayor and city council members, even if they are paid, are not employees.

Section 610.021, RSMo, Supp. 1999, allows the city council to close meetings to the extent the meetings relate to certain specified subjects, including litigation, real estate transactions, and personnel. In addition, this law provides that public governmental bodies shall not discuss any other business during the closed meeting which differs from the specific reasons justifying such meeting, record, or vote.

3. The Board of Aldermen often votes to close a portion of a regular open meeting, but board minutes do not always document the related vote and reasons for going into closed session. Section 610.022, RSMo, Supp. 1999, requires the board to vote prior to going into closed session and requires the results of the vote and the reasons for going into closed session to be entered into the minutes.

- B Section 79.060, RSMo 1994 allows the Board of Aldermen by ordinance to divide the city into two wards. As noted in Part A.2. the Board of Aldermen approved an ordinance in July 1999 to change the ward boundary of the City of Everton. Neither the ordinance or the board minutes indicate when the Board of Aldermen intended the boundary change to become effective. Three aldermen and the mayor indicated that the boundary change became effective in July 1999 and one alderman indicated that he believed the new boundary did not become effective until the next municipal election.

As a result of the boundary change, Alderman Carroll elected to the east ward became a resident of the west ward. In addition, in August 1999 Alderman Baier from the west ward resigned and Alderwoman Mayfield was appointed. While Alderwoman Mayfield was a resident of the west ward after the boundary change, she was a resident of the east ward before the change.

If the boundary change was effective in July 1999, then Alderman Carroll no longer resides in the ward he was elected to serve. If the boundary change was not effective in July 1999, then Alderwoman Mayfield did not reside in the ward she was appointed to serve. Section 79.070, RSMo 1994 requires an alderman to be a resident of the ward from which he is elected. However, regardless of when the effective date of the boundary change was to occur, the city has three aldermen living in the same ward. Section 79.060, RSMo 1994 requires two aldermen from each ward.

While Section 79.060, RSMo 1994 allows the Board of Aldermen by ordinance to divide the city into two wards, city officials did not ensure that the change of the city's boundary did not result in the violation of other state laws. To alleviate citizen concern on this issue, and ensure the city's aldermen are legally qualified to serve, the Board of Aldermen should review this situation with an attorney.

- C. Alderman Baier was appointed to the board in March 1999. He had moved to the City of Everton only 5 months earlier, in October 1998. Section 79.070, RSMo 1994, requires an alderman to be an inhabitant and resident of the city for one year prior to becoming an alderman.

- D. The board minutes are prepared by the City Clerk, but some minutes were not signed. The board minutes should be signed by the City Clerk as preparer and by the Mayor to provide an independent attestation that the minutes are a correct record of the matters discussed and actions taken during the board's meetings.
- E. The city does not have a formal policy regarding public access to city records. A formal policy would establish guidelines for the city to make the records available to the public. This policy should establish a person to contact, provide an address to mail requests for access to records, and establish a cost to provide copies of public records.

Section 610.023, RSMo, Supp. 1999, lists requirements for making city records available to the public. In addition, Section 610.026, RSMo, Supp. 1999, allows the city to charge fees for copying public records; however, the fees shall not exceed the city's actual cost of document search and duplication.

**WE RECOMMEND** the Board of Aldermen:

- A. Limit closed meetings to only those purposes specifically allowed by state law. The board should ensure minutes state the specific reasons for going into a closed session and document the related vote, and ensure the final disposition of certain matters discussed at closed meetings is made public. The board should also ensure minutes are prepared for all closed meetings.
- B. Consult legal counsel to determine which aldermen are legally qualified to serve the city.
- C. Prior to appointment ensure candidates for city office possess the statutory qualifications for holding office.
- D. Ensure the board minutes are signed by the preparer and Mayor or a designated member of the board to attest to their accuracy.
- E. Establish written policies and procedures regarding the location of and public access to city records.

**AUDITEE'S RESPONSE:**

- A. *This has been corrected.*
- B. *We will work to resolve this issue.*
- C. *We relied on the advise of an attorney when making this appointment.*
- D. *This is now being done.*
- E. *We will take this into consideration.*

|           |                     |
|-----------|---------------------|
| <b>3.</b> | <b>Expenditures</b> |
|-----------|---------------------|

- A. The city does not have a formal bidding policy. As a result, the decision of whether to solicit bids for a particular purchase is made on an item-by-item basis. During the past year, bids were either not solicited or bid documentation was not retained in some instances. Examples include \$2,023 for gravel, \$1,803 for culverts, and \$1,000 for a fire truck.

Formal bidding procedures for major purchases provide a framework for economical management of city resources and help ensure the city receives fair value by contracting with the lowest and best bidders. Competitive bidding helps ensure all parties are given an opportunity to participate in the city's business. Bids can be handled by telephone quotation, by written quotation, by sealed bid, or by advertised sealed bid. Various approaches are appropriate, based on dollar amount and type of purchase. Whichever approach is used, complete documentation should be maintained of all bids received and reasons noted why the bid was selected.

- B. The Board of Aldermen does not always review and approve the payment of city expenditures prior to the disbursements being made. A financial report is prepared monthly by the City Clerk which includes a detailed listing of all expenditures by fund; however, the expenditures represent the preceding month's activities. In addition, the Board of Aldermen approve a monthly consent agenda which is to represent approval of all recurring bills; however, there is no documentation to indicate which bills are included in the consent agenda.

Expenditures made from city funds should be reviewed and approved by the Board of Aldermen before payment is made to ensure all disbursements represent valid operating costs of the city. In addition, to adequately document the board's review and approval of all disbursements, a complete and detailed listing of bills should be prepared, signed or initialed by the aldermen to denote their approval, and retained with the official minutes.

- C. Receipt of goods or services is not always indicated on the invoice prior to an expenditure being approved for payment. The documentation of the receipt of goods or services is necessary to ensure the city actually received the items or services being paid.

- D. The city employs one individual for sewer related services. During the year ending June 30, 1999 he was paid a salary of \$14,400. The city also paid \$16,661 in contract labor payments to a business owned by this employee for water and street related services, such as gravel hauling, backhoe services, and meter reading services. During our review of this situation we noted the following:

1. There is no documentation that bids or proposals were solicited from other sources for the contract labor payments. To ensure actual or apparent conflicts of interest do not exist, the city should obtain bids for all expenditures made to city employees and other related parties and award the contract to them only if they are the lowest bid.
2. Time sheets are not prepared to support salary payments. Time sheets are necessary to document hours actually worked, substantiate payroll expenditures, and provide the board with a method to monitor hours worked.

3. The city pays the sewer employee a vehicle allowance of \$100 each month for the use of his personal vehicle. No documentation of actual miles driven is prepared to support this allowance. Additional mileage payments totaling \$166 were also paid during the year ended June 30, 1999 for mileage not covered under the monthly allowance. However, there is no documentation to define exactly what vehicle expenses are covered through the monthly allowance. In addition, the vehicle allowance was not properly reported on the employee's W-2.

To ensure proper reimbursement of travel expense, formal guidelines should be established to define those expenses to be covered by employee vehicle allowances. In addition, Internal Revenue Code (IRC) Ruling 12-110 specifically requires expense allowances that are not accounted for to the employer to be considered gross income. To comply with the IRC, all compensation paid to city employees should have the required payroll taxes withheld and be properly reported.

- E. The City purchases office supplies with a city credit card. Although the city appears to have funds to pay for these supplies, only small monthly payments are made. During the year ended June 30, 1999, the city incurred finance charges of \$76 which computes to an interest rate of almost 21 percent. In addition, \$40 in late fees were also incurred.

The amount of interest and late fees paid appears unreasonable. There is no indication in the board minutes that this financing arrangement was approved by the Board of Aldermen, nor is there a written agreement with the office supply company.

All financing arrangements should be in writing and approved by the Board of Aldermen, and the city should ensure all finance charges are reasonable, and invoices are processed timely to prevent the assessment of late fees.

**WE RECOMMEND** the Board of Aldermen:

- A. Establish formal bidding policies and procedures, including documentation requirements regarding the bids or quotes received and justification for the bid selected. .
- B. Review and approve all expenditures of city funds prior to the disbursements being made. In addition, the approval of disbursements should be adequately documented by including a listing of all approved disbursements in the board minutes.
- C. Ensure the receipt of goods or services is indicated on invoices prior to them being approved for payment.
- D.1. Solicit bids for all purchases made from city employees and accept the lowest bid.
  2. Require the sewer employee to prepare time sheets.
  3. Establish guidelines defining those expenses to be covered by the employee vehicle allowance, and ensure all income is properly reported on employee's W-2. In addition, revised W-2's should be issued.

- E. Ensure all financing arrangements are approved by the board and avoid unreasonable interest and late fee charges. The board should consider early payoff of this account.

**AUDITEE'S RESPONSE:**

A &

D.3. *We will take these recommendations into consideration.*

B, C,

&D.2. *These recommendations have been implemented.*

D.1. *We will try to do this.*

E. *We will pay the balance of this account.*

|                               |
|-------------------------------|
| <b>4. Restricted Revenues</b> |
|-------------------------------|

- A. The city receives state motor vehicle-related revenues and deposits them into the General Fund. Article IV, Section 30 of the Missouri Constitution, requires that motor vehicle-related revenues apportioned by the state of Missouri be expended for street-related purposes including policing, signing, lighting, and cleaning of roads and streets. The city has not established a separate fund or separate accounting for those revenues and expenditures and does not monitor the use of these funds to ensure compliance with the Missouri Constitution.

During the four years ended June 30, 1999, state motor vehicle-related revenues totaled \$49,205 compared to total street-related expenditures of \$58,903.

To ensure continued compliance with the Missouri Constitution, the city should establish a separate accounting of motor vehicle-related revenues and ensure these revenues are used only for street-related purposes.

- B. Documentation does not exist to support the allocation of some expenditures to the city's funds. We noted the following examples:

1. The City Clerk's salary is allocated 75% to the Water and Sewer Fund and 25% to the General Fund. The City Clerk is not required to complete a time sheet that documents actual hours worked by activity or fund.
2. Culverts totaling \$1,051 were purchased from the Water and Sewer Fund. While two culverts costing \$287 were installed at the sewer plant the remaining culverts costing \$764 were used for city streets.

The funds of the city are established as separate accounting entities to account for specific activities of the city. Generally accepted accounting principles and various legal restrictions require revenues and expenses associated with specific activities be reflected in the fund established to account for those activities.

Reflecting revenues and expenses in the proper fund is also necessary to accurately determine the results of operations of specific activities, thus, enabling the city to establish the level of taxation and/or user charges necessary to meet all operating costs. User rates should be set to cover costs of producing and delivering the service and not to generate profits to subsidize other services provided by city government.

**WE RECOMMEND** the Board of Aldermen:

- A. Establish a special revenue fund or otherwise account for the motor vehicle-related monies to ensure compliance with applicable legal restrictions.
- B. Develop and implement a reasonable method for allocating common costs between the city's funds.

**AUDITEE'S RESPONSE:**

- A. *We are in the process of correcting this.*
- B. *We will ensure this is implemented in the future.*

|   |
|---|
| <b>5. Water and Sewer System Procedures</b> |
|---|

- A. The city does not reconcile the total gallons of water billed to customers to the gallons of water pumped. The City Clerk prepares monthly reports of the total number of gallons billed to customers and the water department records meter readings of the city's water well, so information is available to perform such reconciliations.

During June 1999 the gallons of water pumped exceeded the total gallons billed by 280,000, or 27 percent. The city's water department contractor indicated that he believed the loss was due to several leaks in water lines and meter problems.

To help detect significant water loss on a timely basis and to help ensure all water usage is properly billed, the city should reconcile the total gallons of water pumped to the gallons of water billed on a monthly basis and investigate significant differences. The Public Service Commission generally recommends investigation if water usage not billed exceeds 15 percent.

- B. The city has not performed a formal review of the adequacy of the water and sewer rates. The city's audited financial statements show an operating loss of \$41,104 and \$33,478 in the Water and Sewer Fund during the years ending June 30, 1999 and 1998, respectively. Water and sewer fees are user charges which should cover the cost of providing the related services, but rates should not be set at a level which results in excessive fund balances. The city should perform a detailed review of its water and sewer costs, including depreciation and debt service costs, and set rates to cover the total costs of operation. A similar recommendation was made by the city's CPA during the annual audit for the year ending June 30, 1999.

- C. The city utilizes a computerized system to prepare bills and record payments of water and sewer utility fees. Meter readings are recorded on a hand-held computer monthly by the water department contractor. The City Clerk then generates and mails the monthly utility bills, generates meter reading and billing reports, receives payments, records the payments on the system, and generates a delinquent listing.

Beginning and ending meter readings did not always agree from month to month. In addition, the billing reports did not always agree to the monthly utility bills. Receipts totaling \$186 were deposited in September 1999, but not recorded on the city's utility system. The City Clerk indicated the computer had lost this information. The city's computer programmer believes these differences are caused by the city using two computers that are not networked, and not properly updating both computers.

To ensure that all payments are recorded on the utility computer system, the utility payment stubs should be periodically reconciled to the payments recorded on the computer and to deposits. To ensure reports generated are accurate, meter reading reports should be reconciled from month to month and billing reports should be reconciled to utility bills.

- D. There is no supporting documentation or independent approval of credit adjustments posted to the utility system. The City Clerk has the ability and authority to post credit adjustments to the computer system without obtaining the approval of anyone else.

To ensure that all credit adjustments are valid and properly approved, someone independent of receipting and recording functions should review all credit adjustments and proper supporting documentation should be maintained of such adjustments.

**WE RECOMMEND** the Board of Aldermen:

- A. Compare the gallons of water pumped to the gallons billed on a monthly basis and investigate significant differences.
- B. Review water and sewer rates periodically to ensure revenues are sufficient to cover all costs of providing this service.
- C. Require the City Clerk to properly update both computer systems or use one computer system exclusively for utilities. In addition, reports should be reviewed by someone independent of the utility system, and utility bill stubs should be reconciled with payments recorded on the computer system.
- D. Require someone independent of the utility system review and approve all credit adjustments and ensure adequate documentation is retained of such adjustments.

**AUDITEE'S RESPONSE:**

- A. *We are working on this.*
- B. *We reviewed the water rates in January 2000 and will review this issue further.*
- C. *We are in the process of implementing this.*

D. *We will try to do this.*

|  |
|--|
| <b>6. Accounting Controls and Procedures</b> |
|--|

- A. The City Clerk also serves as the City Treasurer, and with the exception of the functions related to the collection of property taxes, this individual is responsible for most of the record keeping duties of the city. These duties include receiving and depositing monies, preparing invoices for payment, preparing and co-signing checks, performing bank reconciliations, and preparing monthly financial reports. Neither the board nor other personnel independent of the cash custody and record keeping functions provide adequate supervision or an independent review of the work performed by the City Clerk.

Attorney General's Opinion No. 24, 1955 to Dodds, concluded that in a fourth-class city the holding of the positions of City Clerk, City Treasurer, and City Collector, or any two of these three offices, by the same person at the same time would be incompatible.

In addition, the former City Collector also served as a member of the Board of Aldermen from July 1998 until April 1999. Having a board member serve as City Collector does not allow the separation of duties necessary for a proper evaluation and review of financial transactions. The current procedures jeopardize the system of independent checks and balances intended by state law.

To safeguard against possible loss or misuse of funds, internal controls should provide reasonable assurance that all transactions are accounted for properly and assets are adequately safeguarded. Internal controls would be improved by segregating duties to the extent possible. If proper segregation of duties is not feasible, the Board of Aldermen should, at a minimum, require someone having no access to cash and no record keeping responsibilities receive and review the bank statements and bank reconciliations.

- B. In addition to utility payments and property taxes, the city receives license fees, franchise fees, municipal court monies, and miscellaneous copy fees. Receipt slips are not issued for these monies, and these receipts are not recorded until a deposit is prepared. To help ensure receipts are properly recorded and deposited, prenumbered receipt slips should be issued for all monies received immediately upon receipt. The receipt slips should indicate the method of payment (ie. cash checks, or money orders) and the composition should be reconciled to the bank deposits.
- C. Checks and money orders received are not restrictively endorsed until the deposit is prepared. To reduce the risk of loss or misuse of funds, checks and money orders should be restrictively endorsed immediately upon receipt.
- D. Deposits are not made on a timely basis. Deposits are generally made weekly; however, only one deposit was made during August 1999. In addition, the city clerk withholds cash receipts from deposits to maintain a change fund and to purchase postage. The amount withheld fluctuates during the month depending on the amount of money needed to make purchases or have on hand to make change. To adequately safeguard receipts and reduce the risk of loss or misuse of funds, all deposits should be made intact daily or when

accumulated receipts exceed \$100, a change fund should be established at a preset amount, and all disbursements for postage should be made by check.

- E. The City requires two signatures on all checks issued by the city. The Mayor, Mayor-Protem, or the City Clerk sign the checks. The dual signatures help provide assurance that checks represent payments for legitimate city expenditures. However, Mayor Bonnie Mallory, occasionally presigned blank checks which defeats the controls provided by dual signatures.

In addition, the City Clerk is the only authorized check signer who is bonded. Failure to bond all persons with access to assets exposes the city to risk of loss.

- F. Bank reconciliations are not performed monthly. During the year ending June 30, 1999 the city computerized its accounting records, but failed to record beginning balances in some funds and failed to record several transactions throughout the year. Because monthly bank reconciliations were not performed, these errors went undetected until the city's auditor brought the errors to their attention. Monthly bank reconciliations are necessary to ensure the accounting records are in agreement with the bank records and to help detect errors on a timely basis. These errors were discovered by the city's CPA during the annual audit.

**WE RECOMMEND** the Board of Aldermen:

- A. Provide for an adequate segregation of duties or independent reconciliations and reviews of the accounting records are made.
- B. Require prenumbered receipt slips to be issued for all monies received. In addition, the method of payment should be recorded on the receipt slips and the composition of receipts should be reconciled to deposits.
- C. Ensure checks and money orders are restrictively endorsed immediately upon receipt.
- D. Require that monies be deposited intact daily, establish a change fund at a constant amount and require all disbursements to be made by check.
- E. Discontinue the practice of allowing officers to sign blank checks, and obtain bond coverage for all persons with access to city assets.
- F. Ensure bank reconciliations are prepared monthly for all city accounts.

**AUDITEE'S RESPONSE:**

- A. *We are now establishing segregation among these duties.*
- B. *All monies are now recorded through our cash register.*
- C. *This recommendation has been implemented.*
- D. *Deposits are made twice a week and a change fund of \$130 has been established.*

- E. *We will take this recommendation into consideration.*
- F. *Bank reconciliations are now being performed monthly.*

|                                   |
|-----------------------------------|
| <b>7. Property Tax Procedures</b> |
|-----------------------------------|

- A. Tax books are manually prepared by the City Collector from assessment data received from the county. No independent verification of the tax book information or totals is performed by the City Clerk. The tax book contained several mathematical errors. In addition, the City Collector makes all additions and abatements to the tax books without review or approval by the Board of Aldermen.

Section 94.290, RSMo 1994, requires the city clerk to prepare the tax books and charge the city collector with the full amount of taxes levied. Without this proper segregation of duties between the City Clerk and City Collector, the internal control over this process is weakened. Verification of tax book information and totals is necessary to ensure the amount of taxes charged to the City Collector is complete and accurate. In addition, any changes to the tax books (additions or abatements) should be prepared by the City Clerk, approved by the Board of Aldermen, and charged to the City Collector.

- B. The former City Collector did not prepare monthly or annual reports of taxes collected. The current City Collector prepares a report of taxes collected periodically to receive payment for commissions. A delinquent tax list was prepared by the current City Collector in April 1999 from the records maintained by the former City Collector; however, this list was not complete and the Board of Aldermen did not review and approve the list. In addition, some property tax payments were not recorded in the tax book and some tax receipts were not marked paid by the former City Collector.

Sections 79.310, 94.320, and 94.330, RSMo 1994, require the city collector to prepare monthly and annual reports to the board of aldermen of the amount of taxes collected and to prepare annual lists of delinquent taxes including a detailed list of persons who have not paid. The board is to examine and approve the reports and charge the City Collector to collect the amount of delinquent taxes due.

Monthly and annual reports which comply with state law would help provide assurance taxes have been properly collected, written off, or determined to be delinquent. Such a report would summarize all taxes charged to the City Collector, monthly collections, delinquent credits, abatements and additions, and protested amounts. Without such a report examined by the board, any errors or irregularities that might occur are likely to go undetected.

- C. The city does not adequately monitor or pursue collection of delinquent taxes. Delinquent taxes totaled \$3,264 and dated back to 1992. Several more tax files indicated delinquent taxes which were not included in this amount which dated back to the 1980s. Real estate taxes comprise approximately \$2,740 of the total. The city mails delinquent tax statements in November of each year; however, the city does not conduct sales of real property to collect delinquent taxes on such property, as allowed by state law.

Section 94.330, RSMo 1994, provides that the board of aldermen may declare worthless and abate any and all personal delinquent taxes which they deem uncollectible. Section 140.150, RSMo 1994, provides that all land on which there are delinquent taxes may be offered for sale at public auction, and Section 140.160, RSMo 1994, provides the sale shall not be valid unless initial proceedings are commenced within three years after the delinquency of such taxes.

- D. The City Collector does not charge the correct penalty on delinquent taxes. The City Collector currently charges a one percent penalty per month for delinquent taxes paid. Section 140.100.1, RSMo 1994, currently provides a penalty of two percent per month up to a maximum of eighteen percent per year for each delinquent tax bill.
- E. The Board of Aldermen has not held public hearings on the city's proposed property tax rates. Section 67.110, RSMo 1994, requires each governing body to hold at least one public hearing prior to approval of the proposed tax rates at which citizens may be heard. This section also provides guidance on what information is to be included at the public hearing. A similar comment was made by the city's auditor during the annual audit.

**WE RECOMMEND** the Board of Aldermen:

- A. Require the City Clerk to prepare the current tax books and charge the City Collector with the amount of taxes, or at a minimum, document procedures performed to verify the accuracy of the tax book totals. In addition, the City Clerk should prepare and the Board of Aldermen should approve all tax book additions and abatements.
- B. Require the City Collector to prepare and maintain detailed monthly and annual reports of taxes collected and delinquent taxes. In addition, the reports should be reviewed and approved by the Board of Aldermen.
- C. Adopt policies for the collection of delinquent taxes, including tax sales, and abating uncollectible personal property taxes.
- D. Ensure the penalty for the collection of delinquent property taxes is charged in accordance with state law.
- E. Hold a public hearing on proposed tax rates as required by state law.

**AUDITEE'S RESPONSE:**

- A&E. *We will consider these recommendations.*
- B. *This has been implemented.*
- C. *We will discuss this with the current City Collector.*
- D. *We will work with the City Collector to correct this for the next tax year.*

|           |  |
|-----------|--|
| <b>8.</b> | <b>Budgets and Financial Reporting</b> |
|-----------|--|

- A. The budgets prepared by the city for the years ended June 30, 2000 and 1999, did not comply with Chapter 67 of the Missouri statutes (the budget law). In addition, a budget was not prepared for the park fund. The city's budgets did not include projected ending balances, actual (or estimated for the years not yet ended) revenues and expenditures for the two preceding budget years, or a budget message.

In addition, the board does not periodically compare budgeted and actual revenues and expenditures, and as reported by the city's auditor, actual expenditures exceeded budgeted amounts during the year ended June 30, 1999.

Sections 67.010 to 67.040, RSMo 1994, set specific guidelines as to the format and approval of the annual operating budget. A complete and well-planned budget, in addition to meeting statutory requirements, can serve as a useful management tool by establishing specific cost and revenue expectations for each area of city operations and provide a means to effectively monitor actual costs and revenues.

- B. The city did not publish a semiannual financial statement for the six months ending June 30, 1999 as required by law. In addition, the city's published semi-annual financial statements for the six months ending December 31, 1998 did not include detailed information but only presented total revenues, expenses, and beginning and ending balances for each fund.

Section 79.160, RSMo 1994, requires the Board of Aldermen to prepare and publish, semi-annually, a full and detailed account of the receipts, expenditures, and indebtedness of the city. Accurate and detailed financial statements are necessary to keep the citizens informed of the financial activity and condition of the city. In addition, Section 79.165, RSMo 1994, states the city cannot legally disburse funds until the financial statements are published.

**WE RECOMMEND** the Board of Aldermen:

- A. Prepare annual budgets in compliance with state law, and make periodic comparisons between budgeted and actual expenditures.
- B. Publish detailed semiannual financial statements as required by state law.

**AUDITEE'S RESPONSE:**

- A. *We will begin to compare budgeted expenditures to actual expenditures and will consider preparing annual budgets in compliance with state law.*
- B. *We will take this recommendation into consideration.*

|                      |
|----------------------|
| <b>9. Ordinances</b> |
|----------------------|

- A. Many of the city's ordinances are old and outdated. The city maintains an index of all ordinances passed by the city; however, several ordinance numbers are not included, three ordinances have the same number, and several ordinances are listed two to three times.

In addition, the city has not prepared ordinances to document the approved tax levy for each year. Section 94.210, RSMo 1994, states the board of aldermen shall fix the annual rate of tax levy by ordinance for each tax year.

Since the ordinances represent legislation passed by the Board of Aldermen to govern the city and its residents, it is important that the city's ordinances be maintained in a complete, well-organized, and up-to-date manner. Such items as duties of city officials and the annual tax levies should be set forth in the ordinances to give the taxpayers information on how the city is to be governed.

- B. Section 79.130, RSMo 1994, requires ordinances to be approved by a majority of all the members of the board of aldermen, and the individual votes recorded. However, board minutes do not always include details of the votes taken by specific board member for proposed ordinances to ensure ordinances are properly approved.

**WE RECOMMEND** the Board of Aldermen:

- A. Ensure a complete and up-to-date set of ordinances is maintained. This would include passing new ordinances where appropriate and required.
- B. Document votes taken by specific board members on proposed ordinances in the board minutes.

**AUDITEE'S RESPONSE:**

- A. *We are in the process of updating city ordinances.*
- B. *This has been implemented.*

|                             |
|-----------------------------|
| <b>10. Property Records</b> |
|-----------------------------|

The city has not established records to account for all property owned by the city. Although the financial statements presented in the most recent CPA audit report, include approximately \$1.6 million in assets the city does not maintain their own asset records. In addition, in June 1999 the city realized it did not have insurance coverage on its water tower valued at \$150,000. Adequate general fixed asset records are necessary to provide a basis for determining proper insurance coverage required on city property, and to secure better internal control and safeguard city assets which are susceptible to loss, theft, or misuse.

The property records should be maintained on a perpetual basis, accounting for property acquisitions and dispositions as they occur. The records should include a detailed description of the assets including the name, make and model numbers, an asset identification number, the physical location of the assets, and the date and method of disposition of the assets when disposed of. In addition, all property items should be identified with a tag or similar device.

**WE RECOMMEND** the Board of Aldermen establish property records which include all pertinent information for each asset, such as tag number, description, cost, acquisition date,

location, and subsequent disposition. Additionally the city should properly tag, number, or otherwise identify all applicable city property and conduct an annual inventory.

**AUDITEE'S RESPONSE:**

*We will contact our CPA and work to prepare an inventory list.*

This report is intended for the information of the city's management and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

MISSOURI OFFICE OF PROSECUTION SERVICES

FOUR YEARS ENDED JUNE 30, 1999

**From The Office Of State Auditor  
Claire McCaskill**

Report No. 2000-16  
March 13, 2000

# AUDIT REPORT

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

Prosecutors Coordinators Training Council  
and  
Missouri Office of Prosecution Services  
and  
Honorable Jeremiah W. (Jay) Nixon, Attorney General  
Jefferson City, Missouri 65012

Since I served on the Prosecutors Coordinators Training Council during part of the period covered by this audit, I believe there is a question regarding independence if I was to also serve as auditor for this agency.

Therefore, the following audit report on the Prosecutors Coordinators Training Council, Missouri Office of Prosecution Services for the years ended June 30, 1999, 1998, 1997, and 1996, has been prepared by Evers and Company, Certified Public Accountants and Consultants.

Sincerely,

A handwritten signature in cursive script that reads "Claire McCaskill".

Claire McCaskill  
State Auditor

# **MISSOURI OFFICE OF PROSECUTION SERVICES**

Jefferson City, Missouri

## INDEPENDENT AUDITORS' REPORT

**Prosecutors Coordinators Training Council**  
and  
**Missouri Office of Prosecution Services**  
and  
**Honorable Jeremiah W. (Jay) Nixon, Attorney General**  
Jefferson City, Missouri 65102

We have audited the accompanying special-purpose financial statements of the various funds of the **Missouri Office of Prosecution Services** as of and for the years ended June 30, 1999, 1998, 1997 and 1996, as identified in the Table of Contents. These special-purpose financial statements are the responsibility of the office's management. Our responsibility is to express an opinion on these special-purpose financial statements based on our audit.

We conducted our audit in accordance with generally accepted auditing standards and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the special-purpose financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the special-purpose financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

The accompanying special-purpose financial statements were prepared for the purpose of presenting the receipts, disbursements, other financing sources (uses), and changes in cash and investment and the appropriations and expenditures of the General Revenue Fund-Federal, Missouri Office of Prosecution Services Fund and Missouri Office of Prosecution Services Revolving Fund of the Missouri Office of Prosecution Services and are not intended to be a complete presentation of the financial position and results of operations of the various funds of the office.

In our opinion, the special-purpose financial statements referred to in the first paragraph present fairly, in all material respects, the receipts, disbursements, other financing sources (uses), and changes in cash and investments and the appropriations and expenditures of the General Revenue Fund-Federal, Missouri Office of Prosecution Services Fund, and Missouri Office of Prosecution Services Revolving Fund of the Missouri Office of Prosecution Services as of and for the years ended June 30, 1999, 1998, 1997 and 1996, in conformity with the comprehensive basis of accounting discussed in Note 1, which is a basis of accounting other than generally accepted accounting principles.

The Missouri Office of Prosecution Services has not presented the disclosures required by Governmental Accounting Standards Board (GASB) Technical Bulletin 98-1, Disclosures about Year 2000 Issues, as amended by GASB Technical Bulletin 99-1, that the GASB has determined are necessary to supplement, although not be a part of, the basic financial statements. In addition, we do not provide assurance that the office is or will become year 2000-compliant, that the office's year 2000 remediation efforts will be successful in whole or in part, or that parties with which the office does business are or will become year 2000-compliant.

In accordance with *Government Auditing Standards*, we also have issued our report dated October 1, 1999, on our consideration of the office's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grants.

Our audit was made for the purpose of forming an opinion on the special-purpose financial statements, taken as a whole, that are referred to in the first paragraph. The accompanying financial information listed as supplementary data in the Table of Contents is presented for purposes of additional analysis. Such information has been subjected to the auditing procedures applied in the audit of the special-purpose financial statements and, in our opinion, is fairly stated in all material respects in relation to the special-purpose financial statements taken as a whole.

The accompanying History, Organization, and Statistical Information is presented for informational purposes. This information was obtained from the office's management and was not subjected to the auditing procedures applied in the audit of the special-purpose financial statements referred to above.

The accompanying Notes to the Financial Statements are an integral part of this statement.

## **NOTES TO THE FINANCIAL STATEMENTS**

**OFFICE OF ATTORNEY GENERAL  
MISSOURI OFFICE OF PROSECUTION SERVICES**

**NOTES TO THE FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA  
For the Four Years Ended June 30, 1999, 1998, 1997 and 1996**

---

**NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES:**

**A. Reporting Entity and Basis of Presentation**

The accompanying special-purpose financial statements present only selected data for each fund of the Missouri Office of Prosecution Services.

Receipts, disbursements, other financing sources (uses), and changes in cash and investments are presented in Exhibit A for the General Revenue Fund-Federal, Missouri Office of Prosecution Services Fund and Missouri Office of Prosecution Services Revolving Fund. Appropriations from these funds are expended by or for the office for restricted purposes.

The "Total (Memorandum Only)" column is presented as additional analytical data. Because this column does not identify the restrictions that exist by fund, it should be read only with reference to the details of each fund.

Appropriations, presented in Exhibit B, are not separate accounting entities. They do not record the assets, liabilities, and equities of the related funds but are used only to account for and control the office's expenditures from amounts appropriated by the General Assembly.

Expenditures presented for each appropriation may not reflect the total cost of the related activity. Other direct and indirect costs provided by the office and other state agencies are not allocated to the applicable fund or program.

**B. Basis of Accounting**

The Statements of Receipts, Disbursements, Other Financing Sources (Uses), and Changes in Cash and Investments, Exhibit A, prepared on the cash basis of accounting, present amounts when they are received or disbursed.

The Statements of Appropriations and Expenditures, Exhibit B, are presented on the state's legal budgetary basis of accounting which recognizes expenditures on the encumbrance method. Expenditures include amounts payable or encumbered at June 30 and paid during the lapse period, which ends August 31 for regular appropriations and December 31 for capital improvement appropriations. The authority to expend appropriations ends with the close of the lapse period. However, the General Assembly may authorize reappropriation of the unexpended balances of capital improvement appropriations for the following year. The General Assembly also may authorize biennial capital improvement appropriations, for which the unexpended balances at June 30 of the first year of the two-year period are reappropriated for expenditure during the second year.

**OFFICE OF ATTORNEY GENERAL  
MISSOURI OFFICE OF PROSECUTION SERVICES**

**NOTES TO THE FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA  
For the Four Years Ended June 30, 1999, 1998, 1997 and 1996**

---

**NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES: (Cont'd.)**

**B. Basis of Accounting (Cont'd.)**

The cash basis of accounting and the budgetary basis of accounting differ from generally accepted accounting principles, which require revenues to be recognized when they become available and measurable or when they are earned and expenditures or expenses to be recognized when the related liabilities are incurred.

**C. Fiscal Authority and Responsibility**

The office administers transactions in the funds listed below. The State Treasurer as fund custodian and the Office of Administration provide administrative control over fund resources within the authority prescribed by the General Assembly.

General Revenue Fund-Federal: The office administers several programs financed wholly or partially by federal monies maintained in the state treasury in the Office of Attorney General's Federal Account. These federal funds may be received in advance, when related expenditures are made, or after they are made. Appropriations from this fund authorize the disbursement of the office's federal monies.

Missouri Office of Prosecution Services Fund: This fund was established pursuant to Section 56.765.2, RSMo Cum. Supp. 1998, to assist prosecuting attorneys in their efforts against criminal activity in the state. Court fees are assessed by courts in the state and are deposited into the fund. Expenditures are authorized by appropriation, and balances remaining in the fund are perpetually maintained for the purpose of the fund.

Missouri Office of Prosecution Services Revolving Fund: This fund was established during fiscal year 1998 pursuant to Section 56.765.4, RSMo Cum. Supp. 1998, to receive moneys from registration fees, federal and state grants or any other source in connection with the purpose of the Missouri Office of Prosecution Services. Expenditures are authorized by appropriation, and balances remaining in the fund are perpetually maintained for the purpose of the fund.

**OFFICE OF ATTORNEY GENERAL  
MISSOURI OFFICE OF PROSECUTION SERVICES**

**NOTES TO THE FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA  
For the Four Years Ended June 30, 1999, 1998, 1997 and 1996**

---

**NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES: (Cont'd.)**

**D. Employee Fringe Benefits**

In addition to the social security system, employees are covered by the Missouri State Employees' Retirement System (MOSERS) (a noncontributory plan) and may participate in the state's health care, optional life insurance, deferred compensation, and cafeteria plans. The optional life insurance and cafeteria plans involve only employee contributions or payroll reductions. Also, the deferred compensation plan involves employee payroll deferrals and, beginning January 1, 1996, a monthly state matching contribution for each participating employee.

The state's required contributions for employee fringe benefits are paid from the same funds as the related payrolls. Those contributions are for MOSERS (retirement, basic life insurance, and long-term disability benefits); social security and medicare taxes; health care premiums; and the deferred compensation plan match.

Employee fringe benefits in the financial statements at Exhibit A are the transfers from the Missouri Office of Prosecution Services Fund for costs related to salaries paid from that fund. Transfers related to salaries are not appropriated by agency and thus are not presented in the financial statement at Exhibit B.

**NOTE 2 - OPERATING TRANSFERS OUT:**

The transfer out amounts include the Missouri Office Of Prosecution Services Fund's proportional share of fiscal year 1997, 1996, and 1995 refunds required by Article X, Section 18 of the Missouri Constitution. These refunds were:

|             | Year Ended June 30, |                 |
|-------------|---------------------|-----------------|
|             | 1999                | 1998            |

## INDEPENDENT AUDITOR'S REPORT ON COMPLIANCE AND ON INTERNAL CONTROL OVER FINANCIAL REPORTING

**Prosecutors Coordinators Training Council**  
and  
**Missouri Office of Prosecution Services**  
and  
**Honorable Jeremiah W. (Jay) Nixon, Attorney General**  
Jefferson City, Missouri 65102

We have audited the special-purpose financial statements of the **Missouri Office of Prosecution Services** as of and for the years ended June 30, 1999, 1998, 1997, and 1996, and have issued our report thereon dated October 1, 1999. We conducted our audit in accordance with generally accepted auditing standards and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States.

### Compliance

As part of obtaining reasonable assurance about whether the special-purpose financial statements of the Missouri Office of Prosecution Services are free of material misstatement, we performed tests of the office's compliance with certain provisions of laws, regulations, contracts, and grants, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance.

### Internal Control Over Financial Reporting

In planning and performing our audit of the special-purpose financial statements of the Missouri Office of Prosecution Services, we considered the office's internal control over financial reporting in order to determine our auditing procedures for the purpose of expressing our opinion on the special-purpose financial statements and not to provide assurance on the internal control over financial reporting. Our consideration of the internal control over financial reporting would not necessarily disclose all matters in the internal control over financial reporting that might be material weaknesses. A material weakness is a condition in which the design or operation of one or more of the internal control components does not reduce to a relatively low level the risk that misstatements in amounts that would be material to the special-purpose financial statements being audited may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions. We noted no matters involving the internal control over financial reporting and its operation that we consider to be material weaknesses.

This report is intended for the information of the audit committee, management and federal awarding agencies and pass-through entities and is not intended to be and should not be used by anyone other than these specified parties.

## **HISTORY and ORGANIZATION**

**OFFICE OF ATTORNEY GENERAL  
MISSOURI OFFICE OF PROSECUTION SERVICES**

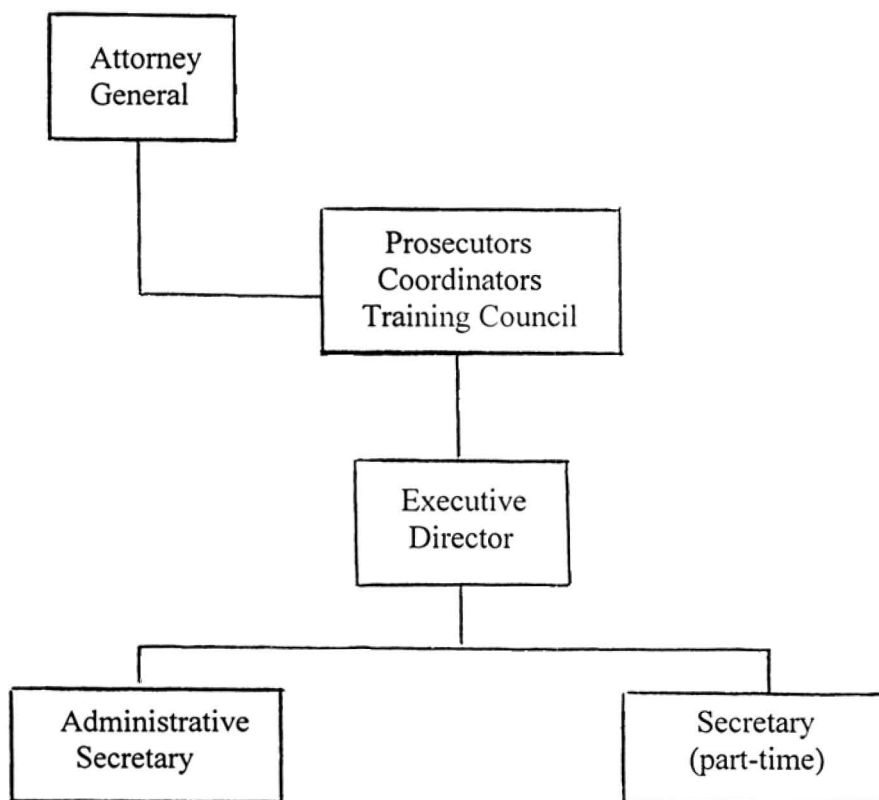

**HISTORY AND ORGANIZATION**

---

The Missouri Office of Prosecution Services was established pursuant to Section 56.750, RSMo "as an autonomous entity in the Missouri attorney general's office." Certain oversight responsibilities for the office are given to the Prosecutors Coordinators Training Council, of which the attorney general or his designee is a member. The primary purpose of this office is to assist the prosecuting attorneys in the state through training and other means in their efforts against criminal activity.

Elizabeth L. Ziegler served as Executive Director during the four years ended June 30, 1999, and continues in this position.

As of June 30, 1999, the Missouri Office of Prosecution Services employed two full-time employees and one part-time employee. An organization chart follows:

REVIEW OF THE  
FRANCIS HOWELL R-III SCHOOL DISTRICT  
ST. CHARLES COUNTY, MISSOURI

**From The Office Of State Auditor  
Claire McCaskill**

Report No. 2000-15  
March 9, 2000

AUDIT REPORT

Office Of The  
State Auditor Of Missouri  
Claire McCaskill

March 2000

The following problems were discovered as a result of an audit conducted by our office of the Francis Howell School District, St . Charles, Missouri.

-----  
**During the two years ended June 30, 1999, the district received and spent over \$6 million in basic state aid to which it was not entitled.** This was caused by an error in the reporting of the district's average daily attendance data to the Department of Elementary and Secondary Education and an entitlement calculation error.

The district's attendance system records full-day attendance for kindergarten students. Because kindergarten students attend only one-half of each day, the district must divide the recorded attendance hours for kindergarten students in half before calculating the average daily attendance and reporting it to the Department of Elementary and Secondary Education. For the 1997-98 school year, the district failed to divide the kindergarten attendance hours in half.

**The district does not have written policies and procedures governing the reporting of attendance data to the Department of Elementary and Secondary Education.** Written policies and procedures are necessary to outline district employees' responsibilities in the attendance reporting and the review process. Without following a specific process, the district cannot ensure all steps are taken to ensure the accuracy of information reported to the Department of Elementary and Secondary Education. This concern was also noted by the district's independent auditors in the 1998-1999 audit report.

**The district did not take adequate procedures to correct the attendance reporting errors when detected in October 1998. As a result, the district continued to be overpaid by the Department of Elementary and Secondary Education until the adjustment was made in June 1999.** The district did not adequately estimate the effects of the 1997-98 error and the 1998-99 overestimate of eligible pupils and make the necessary budget adjustments. This situation was a contributing factor in the district becoming "Financially Stressed" for the year ended June 30, 1999.

During the last five years, the district has experienced significant growth in the revenues and expenditures of the operating funds. **Despite the growth in district revenues, the district has spent more than it received during three out of the last five years.**

Controls over expenditures are lacking or inadequate. Bidding procedures were not always followed, payments were made without the required purchase orders or vendor invoices, and some expenditures appeared excessive or unnecessary for district operations.

In July 1998, the district approved an administrative salary schedule covering the two years ending June 30, 2000. Administrators were given significant pay increases and ten additional administrators were hired, resulting in an increase in administrator salary expense of approximately \$899,000 during the year ended June 30, 1999. For the year ending June 30, 2000, pay increases were provided through the salary schedule and although the district reduced the number of administrators by four, this will result in a net increase in administrator salary expense of approximately \$236,000.

The district has implemented some budget reductions for the year ending June 30, 2000. This budget includes projected operating revenues and expenditures of approximately \$113.6 million each. **With these projections, the estimated operating funds balance will continue to be approximately 1.7 percent of expenditures and the district will continue to be designated "Financially Stressed" for the year ending June 30, 2000.**

YELLOW SHEET

As noted in the "Review of 1999 Property Tax Rates" issued by the Missouri State Auditor on December 29, 1999, the 1999 property tax rate levied by the district for operating funds exceeded the tax rate ceiling by three cents per \$100 in assessed valuation. **The district levied a property tax rate of \$3.95 for operating funds, although the tax rate ceiling certified by the State Auditor was only \$3.92. Based on the 1999 assessed valuation of \$1,178,417,048, the district will receive approximately \$354,000 more than legally permissible.** Our office recommends the School Board not levy amounts in excess of the ceiling and reduce future levies to reflect this overcharge.

**The district does not have a policy prohibiting the acceptance of gifts and gratuities from district vendors. During 1998 and 1999, district employees and board members received personal benefits from the district's construction management firm totaling \$1,272.** This included golf tournament registration fees and a dinner for board members. During these years, the district conducted two selection processes for construction management services in which this firm was selected on both occasions. The acceptance of gifts from this firm could give an appearance of a conflict of interest or lack of independence of board members and district administrators.

**The district's student transportation vendor paid \$1,013 for lodging for the board President and former Finance Director to attend a customer forum conference in Miami, Florida.** The conference was held on a Friday, and the lodging included attendance at a Professional Golfers Association (PGA) tournament sponsored by the vendor. ***An appearance of a conflict of interest could harm public confidence in the board and reduce the board's effectiveness.*** A policy prohibiting these types of situations should be developed.

**The school board provided the former Superintendent with a \$42,000 cash advance upon signing a 31 month contract which began February 1, 1996.** Under the terms of the contract, the former Superintendent would pay back the advance through payroll deductions of \$7,000 per year over a six year period. Semi-monthly payroll deductions of \$292 began in July 1996. The board should consider increasing the payroll deductions to ensure the advance is paid back in the time period noted in the separation agreement. In the future, the board should refrain from entering into such agreements.

During the year ended June 30, 1999, the district had four accounts with a credit card company. Two of these accounts were in the district's name, while the other two accounts were in the name of the former Superintendent and the former Finance Director. Employees could use the two district accounts for various expenditures such as travel expenses, registrations, and supplies. **Some informal procedures relating to the credit card accounts were developed. Our review of credit card payments noted the following concerns:**

- There were at least 118 charges totaling \$19,941 made to the credit card accounts which were not supported by receipts or credit card slips.
- The statement and related receipts for one payment of \$5,457 to a credit card account could not be located.
- Purchase orders were not prepared for purchases on the credit card accounts.
- The purpose of the expenditure was not documented for numerous charges to the credit card accounts. As a result, the propriety of the expenditure could not be determined.

The district does not have a formal written policy for the usage of cellular telephones and pagers. **During the year ended June 30, 1999 the district incurred costs of approximately \$55,000 for monthly services and equipment purchases for 74 cellular phones and 66 pagers.** The phones and pagers were issued to various employees and board members and could be used for district business as well as personal use.

The district has engaged a firm since January 1990 to provide construction management services for all of its construction projects. This firm works with the district in the scheduling, planning, and design and construction management of construction projects. Payments to this firm during the year ended June 30, 1999 totaled approximately \$720,000. **Our office recommends the School Board conduct a formal selection process for construction management services for all construction projects as required by district policy and state law.** In addition, all documentation of the process should be retained.

The school district does not always follow its bidding policies. The district's procurement policy requires that formal, written bids be obtained for all purchases which involve an expenditure of more than \$5,000. The school district contracts with a transportation company to provide bus transportation for its students. The district has not solicited bids for transportation services since 1985. Procedures are not in place to adequately monitor transportation costs.

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

Honorable Mel Carnahan  
Governor of Missouri  
and  
The Board of Education  
Francis Howell R-III School District  
4545 Central School Road  
St. Charles, MO 63304

By his authority under Section 26.060, RSMo, Governor Carnahan requested the State Auditor's Office perform a review of the Francis Howell R-III School District in August 1999. In response to this request, the Missouri State Auditor's Office conducted a review of the district. The objectives of this review were to:

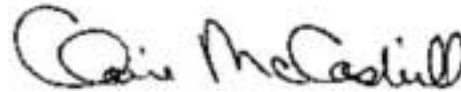

1. Review the district's financial condition and budgetary process.
2. Perform procedures we deemed necessary to evaluate citizens' concerns.
3. Review certain internal control procedures, legal compliance issues, and management practices to determine the efficiency and effectiveness of those procedures and practices.

Our review was made in accordance with applicable generally accepted government auditing standards and included such procedures as we considered necessary in the circumstances. The school board had engaged Schowalter & Jabouri, P.C., Certified Public Accountants (CPAs), to perform an audit of the district for the year ended June 30, 1999. To minimize any duplication of effort, we reviewed the report and substantiating workpapers of the CPA firm. We also reviewed board minutes, school district policies, and various school district financial records.

Our review was limited to the specific matters described above and was based on selective tests and procedures considered appropriate in the circumstances. Had we performed additional procedures, other information might have come to our attention which would have been included in this report.

The accompanying History and Organization and Appendices are presented for informational purposes. This information was obtained from the district and its audited financial reports and was not subjected to auditing procedures applied during our review.

The accompanying Management Advisory Report presents our findings and recommendations arising from our review of the Francis Howell R-III School District.

A handwritten signature in black ink, appearing to read "Claire McCaskill".

Claire McCaskill  
State Auditor

December 22, 1999 (fieldwork completion date)

The following auditors participated in the preparation of this report:

|                     |                       |

|                     | Arlances Dailey       |
|                     | Monique Williams      |

## EXECUTIVE SUMMARY

REVIEW OF THE  
FRANCIS HOWELL R-III SCHOOL DISTRICT  
ST. CHARLES COUNTY, MISSOURI  
EXECUTIVE SUMMARY

The Francis Howell R-III School District has experienced significant growth during the past several years. Enrollment has increased from 16,427 students in the 1994-1995 fiscal year to 18,513 students in the 1998-1999 fiscal year. During that five year period, operation costs of the district increased 58 percent, 82 percent of which represents salary and benefit costs. (See Appendix A for financial information.)

At the same time the district has seen its fund balances decrease, especially during the most recently completed fiscal year. The balance in the operating funds decreased from \$8.3 million at June 30, 1994, to \$2.0 million at June 30, 1999, and as a result, the district is currently designated "Financially Stressed" by the Missouri Department of Elementary and Secondary Education (DESE).

During the 1997-1998 and 1998-1999 fiscal years, the district received and spent approximately \$6.8 million in state aid to which it was not entitled. This amount must be paid back to the state in future periods. This was caused by errors in reporting the district's average daily attendance and by an error in its state aid entitlement formula calculation.

Public reports of the district's financial crisis, including the attendance reporting error, surfaced in July 1999, and during July and August 1999, the State Auditor's Office received numerous requests for petition audit information. On August 19, 1999, Governor Carnahan requested the State Auditor to perform a review of the district.

The district's financial accounting and budgetary systems have apparently not kept pace with the growth of the district and are in need of improvement. The district does not have a detailed accounting procedures manual to provide clear guidance on procedures to be followed. Budgetary information has not always been appropriately developed, and modifications to such budgets have not been made timely, decreasing the budget's effectiveness as a management tool. From July 1997 to August 1999, the school board was not provided monthly financial summaries and it appears the board was not properly monitoring budgeted and actual revenues and expenditures. The board needs to address these issues to improve control and increase public confidence in the overall financial accountability of the district.

The district has not established procedures to ensure all expenditures are for necessary district-related purposes. Numerous payments for employee travel and other employee reimbursements were not supported by adequate documentation (i.e. missing invoices and receipts, no documentation of the travel purpose). The district paid \$96,000 in charges on its credit card accounts without requiring credit card slips to be submitted, and several of these charges did not appear to be district-related. The district incurred \$55,000 in cellular phone and pager expenses, and the district did not have adequate controls to ensure cellular phone usage was reasonable and was only for district purposes.

This audit makes numerous recommendations for improvements in the Francis Howell R-III School District's accounting and budgetary systems and for improvements in controls over district finances and expenditures. The school district could resolve a number of its internal and external problems by implementing the State Auditor's recommendations.

The positive results from implementing these recommendations will include better compliance with statutory, constitutional, and district requirements; additional guarantees that all public moneys are being appropriately spent; and greater assurance to the public that district finances are being properly handled. In addition, it is imperative that the district develop a plan to improve its financial condition and move off of the "Financially Stressed" list.

## HISTORY AND ORGANIZATION

REVIEW OF THE  
FRANCIS HOWELL R-III SCHOOL DISTRICT  
ST. CHARLES COUNTY, MISSOURI  
HISTORY AND ORGANIZATION

The Francis Howell R-III School District is located in St. Charles County and covers approximately 163 square miles.

The district operates three senior high schools (9-12), an alternative high school, five middle schools (6-8), nine elementary schools (K-5), and three early childhood family education centers (PK-K). Enrollment was 18,513 for the 1998-1999 school year. At June 30, 1999, the district employed 2,181 full- and part-time employees, including 77 administrative staff, 1,485 teachers and instructional support staff, and 619 support staff.

Francis Howell R-III School District has been classified under the Missouri School Improvement Program as "Accredited" by the Missouri Department of Elementary and Secondary Education.

A seven-member Board elected for three-year terms, serves without compensation as the policy-making body for the district's operations. Members of the Board at June 30, 1999 and their current terms of office are:

| <u>Name and Position</u>                                    | <u>Current Term Expires</u> |
|---|-----------------------------|
| Catherine Elsea, President                                  | April 2000                  |
| Pat Fitzgerald, Vice President                              | April 2001                  |
| Sandra Ferguson, Treasurer                                  | April 2001                  |
| Sally A. Breck, Member (1)                                  | April 2002                  |
| Ron Howard, Member  | April 2000                  |
| Dr. Donald R. Wescott, Member (1)                           | April 2002                  |
| Vacant (2)  | April 2000                  |
| <u>Other Principal Officials</u>                            | <u>Annual Compensation</u>  |
| Dr. Lee Brittenham, Superintendent (3)                      | \$ 119,636 (4)              |
| Dr. Dan Brown, Central Area Superintendent (5)              | 92,755                      |
| Dr. Sheila Cone, North Area Superintendent                  | 92,755                      |
| Dr. Tim Ricker, South Area Superintendent                   | 92,755                      |
| Dr. Dan O'Donnell, Associate Superintendent Human Resources | 92,755                      |
| John Hutchison, Associate Superintendent Finance (6)        | 92,755                      |

- (1) Elected to the board in April 1999, replacing Dr. James Walter (Vice President) and Barbra Goeckner (Treasurer).

- (2) Jeff Carter was reelected in April 1999 and resigned in June 1999. Dr. James Walter was appointed in July 1999 to serve until the regular election in April 2000.
- (3) Placed on medical leave effective October 1, 1999 with salary and retirement benefits paid through January 31, 2001, and other benefits paid through June 30, 2000.
- (4) The Superintendent also received \$3,000 toward a tax sheltered annuity.
- (5) Appointed Superintendent effective September 20, 1999. The position of Central Area Superintendent is currently vacant.
- (6) Resigned on January 6, 2000, and this position is currently vacant.

Assessed valuation and tax rate information for the district are as follows:

|                    | <u>1999</u>      | <u>1998</u>      |
|--------------------|------------------|------------------|
| Assessed Valuation | \$ 1,178,417,048 | \$ 1,047,971,082 |
| Tax Rate           | 4.89*            | 4.94             |

\* The 1999 tax rate exceeds the approved tax rate ceiling by \$.03 per \$100 assessed valuation.

## MANAGEMENT ADVISORY REPORT

REVIEW OF THE  
FRANCIS HOWELL R-III SCHOOL DISTRICT  
ST. CHARLES COUNTY, MISSOURI  
MANAGEMENT ADVISORY REPORT

|           |                            |
|-----------|----------------------------|
| <b>1.</b> | <b>Financial Condition</b> |
|-----------|----------------------------|

During the last five years, the district has experienced significant growth in the revenues and expenditures of the operating funds (General Fund and Special Revenue Fund). Despite the growth in district revenues, the district has spent more than it received during three out of the last five years, resulting in a decline of the cash balance in the operating funds as follows:

|                            |    | Year Ended June 30, |                  |                   |                  |                  |
|----------------------------|----|---------------------|------------------|-------------------|------------------|------------------|
|                            |    | 1999                | 1998             | 1997              | 1996             | 1995             |
| Beginning cash balance     | \$ | 8,902,032           | 10,241,377       | 8,601,164         | 5,949,648        | 8,326,072        |
| Revenues                   |    | 110,330,108         | 104,588,013      | 96,007,014        | 86,005,360       | 72,807,469       |
| Expenditures               |    | (117,270,342)       | (105,927,358)    | (94,322,866)      | (83,337,472)     | (74,370,595)     |
| Net transfers              |    | 0                   | 0                | (43,935)          | (16,372)         | (813,298)        |
| Ending cash balance        | \$ | <u>1,961,798</u>    | <u>8,902,032</u> | <u>10,241,377</u> | <u>8,601,164</u> | <u>5,949,648</u> |
| Ending Cash Balance as a   |    |                     |                  |                   |                  |                  |
| Percentage of Expenditures |    | 1.67%               | 8.40%            | 10.86%            | 10.32%           | 8.00%            |

As shown in the above table, the financial condition of the operating funds has declined over the past few years. At June 30, 1999, the cash balance of the operating funds was only approximately \$2.0 million, which includes \$1.5 million in student activity funds which are generally not available for district operating expenditures. In addition, the district owed approximately \$6.8 million back to the state. As a result, the district was designated "Financially Stressed" by the Missouri Department of Elementary and Secondary Education (DESE). "Financially Stressed" means the district's balances of its operating funds are below three percent of the expenditures in its operating funds. Several issues have contributed to the overall financial decline of the district:

- A. The district did a poor job budgeting for the year ended June 30, 1999, as shown below:

| Year Ended June 30, 1999 |              |             |                            |
|--------------------------|--------------|-------------|----------------------------|
|                          | Original     |             | Variance                   |
|                          | Budget       | Actual      | Favorable<br>(Unfavorable) |
| Beginning balance        | \$ 8,712,474 | 8,902,032   | 189,558                    |
| Revenues                 | 111,588,150  | 110,330,108 | (1,258,042)                |
| Expenditures             | 111,571,319  | 117,270,342 | (5,699,023)                |
| Ending balance           | \$ 8,729,305 | 1,961,798   | (6,767,507)                |

The board was not provided monthly or periodic financial information during this time period to monitor the financial condition of the district. If better budgeting and monitoring procedures had been in place, it appears the board could have been in a position to address the financial decline in a more timely manner. See Management Advisory Report (MAR) No. 3 for more specific budgeting and financial reporting concerns.

- B. During the two years ended June 30, 1999, the district received and spent approximately \$6.8 million in basic state aid to which it was not entitled. This was caused by an error in the reporting of the district's average daily attendance data to the DESE and an entitlement calculation error. See MAR No. 2.
- C. Controls over expenditures are lacking or inadequate. Bidding procedures were not always followed, payments were made without the required purchase orders or vendor invoices, and some expenditures appeared excessive or unnecessary for district operations. See MAR Nos. 7 through 12.
- D. In July 1998, the district approved an administrative salary schedule covering the two years ending June 30, 2000. Administrators were given significant pay increases and ten additional administrators were hired, resulting in an increase in administrator salary expense of approximately \$899,000 during the year ended June 30, 1999. For the year ending June 30, 2000, pay increases were provided through the salary schedule and although the district reduced the number of administrators by four, this will result in a net increase in administrator salary expense of approximately \$236,000.

Additionally, the district negotiated salary schedules with teachers and support staff covering the two years ending June 30, 2000. District administrators indicate they are unable to make any significant reductions in salary expenses until after the period covered by the salary schedule.

- E. During the year ended June 30, 1999, the district distributed approximately \$201,000 to district employees as contingency salaries, and increased salaries by the same amount for the year ending June 30, 2000. Although these payments

were not required by district policy, the board approved the distribution. See MAR No. 6.

The district has implemented some budget reductions for the year ending June 30, 2000. This budget includes projected operating revenues and expenditures of approximately \$113.6 million each. With these projections, the estimated operating funds balance will continue to be approximately 1.7 percent of expenditures and the district will continue to be designated "Financially Stressed" for the year ending June 30, 2000.

The district has not developed a long term plan to increase the balance in the operating funds and move out of the "Financially Stressed" category. On November 4, 1999, the board approved the development of sequential budgets to increase the balance in the operating funds to at least three percent of expenditures by the 2002-2003 school year. These budgets had not been developed at the time of our review.

During June 1999, the district attempted to pass a \$.50 operating fund rate increase which was defeated by voters. The board is at its tax rate limit without a vote. In fact, as noted in MAR No. 5, the 1999 tax rate set by the district exceeded the legal limit by \$.03 per \$100 in assessed valuation or approximately \$354,000 in property taxes. This should be returned to taxpayers through reductions of future year levies.

It appears that even with an increase in revenues, reducing expenditures will be necessary to improve the district's financial problems. Salary and benefit expenditures accounted for approximately 80 percent of the operating expenditures for the year ended June 30, 1999, and control over these expenditures should be a major concern.

To investigate potential ways to reduce future expenditures, the district recently performed a comparison of its expenditures to six other local districts of similar size during the year ended June 30, 1999. Based on this comparison, the district had the highest or one of the highest per pupil cost in the areas of special education, instruction, transportation, and executive administration. The district should consider these areas when making expenditure reductions for future budgets.

While increases in revenues and/or reductions in expenditures appear necessary, the district's financial condition can also be improved with more effective management practices and more effective controls and procedures. Some needed improvements are discussed in this report.

**WE RECOMMEND** the School Board carefully review the operations of the district and develop a plan which will remove the district from the "Financially Stressed" designation.

### **AUDITEE'S RESPONSE**

*A plan was written and delivered to the DESE in December 1999. Additional planning and a final revision of the plan will be required as the district's budget is developed for the 2000-2001 fiscal year.*

**2.****Attendance Reporting and State Funding**

School districts receive state aid funding through the DESE. As outlined in Section 163.031, RSMo Cumulative Supp. 1999, state aid is calculated based on numerous factors including a factor called “eligible pupils” (EP). EP is defined as the sum of the average daily attendance (ADA) of the school term plus twice the ADA for summer school. The average daily attendance is calculated by dividing the total number of hours attended by students by the actual number of hours school was in session during that term. At the beginning of each school year, school districts estimate the EP for the school year, which is used in calculating state aid payments throughout the year. In July, after year end, the actual EP is reported to the DESE and the districts’ state aid payments are adjusted accordingly. The EP is audited annually by the school districts’ independent auditors.

For the 1997-98 school year, the Francis Howell School District originally estimated an EP of 15,888, and during May 1998, increased this estimate to 16,777. After the school year ended, the district reported an actual EP in the amount of 16,900, resulting in adjustments to the 1998-99 payments to reflect this increase. During the audit conducted in September and October 1998, the district’s independent auditors noted a discrepancy between the EP reported to the DESE and the actual audited EP. The audit noted an actual EP of 16,427. The district indicated a correction was mailed to the DESE in October 1998 to reflect the audited EP, but no follow-up was done. The DESE indicated that it did not receive this correction.

In August 1998, prior to discovering this error, the district estimated an EP of 17,683 for the 1998-99 school year, based on the EP of 16,900 reported for the 1997-98 school year. However, even after the district noted the 1997-1998 EP error, it did not re-estimate its 1998-99 EP of 17,683. The actual audited EP for 1998-99 was 16,936.

The DESE sent the district a letter dated April 7, 1999, requiring an explanation for the 473 eligible pupil discrepancy between the 1997-98 reported EP and the audited EP as noted in the audit report. The district indicated it did not receive this letter. On May 19, 1999, the district was again contacted by the DESE regarding the discrepancy and the district confirmed it was an error in its original calculations.

For the 1997-98 school year, the district received more state aid than it was due because the actual EP reported to the DESE was overstated by 473 students. The estimate for the 1998-99 EP was overstated by 747 students, so the district began receiving monthly payments which were too high. The DESE corrected a significant portion of the 1998-99 error on the district's June 1999 state aid payment.

In February 2000, the DESE completed its final calculation of the 1997-98 EP and determined that the district owes \$3.0 million to the state. In addition, the DESE is in the process of reviewing the 1998-99 EP, and DESE officials currently estimate the district will owe approximately \$1.5 million to the state. DESE officials have also discovered an

error in the entitlement calculation for the 1998-99 fiscal year and the district will owe approximately \$2.3 million to the state to correct this error. In total, the district owes approximately \$6.8 million to the state which needs to be repaid in future periods.

Our review noted the following concerns:

- A. The district's attendance system records full-day attendance for kindergarten students. Because kindergarten students attend only one-half of each day, the district must divide the recorded attendance hours for kindergarten students in half before calculating the ADA and reporting it to the DESE. The actual attendance hours as well as the school calendar hours are reported to the DESE through a computerized program called "Core Data." The ADA and EP for the school year are calculated by the Core Data system based on the information entered by the district.

For the 1997-98 school year, the district failed to divide the kindergarten attendance hours in half before posting the data to the Core Data system. This error was a significant cause of the EP overstatement of 473 students noted above. There was no supervisory review of the Core Data report to ensure accuracy before submitting it to the DESE.

The district does not have written policies and procedures governing the reporting of attendance data to the DESE. Written policies and procedures are necessary to outline district employees' responsibilities in the attendance reporting and the review process. Without following a specific process, the district cannot ensure all steps are taken to ensure the accuracy of information reported to the DESE. This concern was also noted by the district's independent auditors.

- B. The district did not take adequate procedures to correct the attendance reporting errors. As noted above, district officials indicated they sent a correction to the DESE for the audited EP for the 1997-98 school year; however, the district did not adequately follow up to ensure the corrections were received by the DESE and the necessary adjustments to the state aid payments were made. The district did not take any action to correct the 1998-99 estimated EP when its auditors discovered the 1997-98 reporting error in October 1998.

As a result, the district continued to be overpaid by the DESE until the adjustment was made in June 1999. The district did not adequately estimate the effects of the 1997-98 error and the 1998-99 overestimate of EP and make the necessary budget adjustments. This situation was a contributing factor in the district becoming "Financially Stressed" for the year ended June 30, 1999, as noted in MAR No. 1.

- C. The district's method of computing ADA does not appear to fully comply with state law. Section 163.011(3), RSMo Cumulative Supp. 1999, defines ADA as the total number of attendance hours divided by the total number of hours school was in session. Instead of recording attendance on an hourly basis, the district records attendance as full-day attended, half-day attended, or full-day absent. The

district's computerized attendance system converts this information into hourly information and computes the ADA.

Personnel from the DESE have expressed concern that the district's method of computing ADA does not fully comply with state law, and most school districts record attendance on an hourly basis rather than a daily or half-daily basis. Since ADA has a direct effect on calculating EP, the district may not be obtaining the correct amount of basic state aid. The district should review this situation and consider recording and tracking attendance on an hourly basis rather than on a daily basis.

**WE RECOMMEND** the School Board:

- A. Establish written policies and procedures to ensure accurate attendance data is submitted to the DESE.
- B. Ensure any discrepancies noted between the attendance data submitted to the DESE and reported in the annual audit are corrected in a timely manner. The effect on state aid revenue should be calculated and necessary budget adjustments should be made immediately to prevent unnecessary future adjustments and budget shortfalls.
- C. Consider implementing a system which tracks and records student attendance on an hourly basis.

**AUDITEE'S RESPONSE**

*A&C. The school district began analyzing its processes in late September 1999. The district will implement hourly attendance gathering for the 2000-2001 school year. Related policies and procedures will be established no later than June 30, 2000.*

*B. Within the policies stated above, discrepancies will be submitted to the DESE with the annual October Core Data report. The Francis Howell School District (FHSD) will encourage the DESE to make prompt and early reconciliation of the reports. Processes to accomplish the recommendation are under study. Appropriate changes will be made as quickly as possible, with full implementation no later than July 2000.*

|   |
|---|
| <b>3. Budgets and Financial Reporting</b> |
|---|

- A. Beginning in July 1997, the board did not receive monthly financial reports. The district's budgeting policy requires that monthly statements showing receipts, expenditures, and balances for each fund be prepared and submitted to the board. Without this information, the school board cannot adequately monitor the financial condition of the district or make necessary budget amendments. This concern was also noted by the district's independent auditors.

In September 1999, the Finance Office began submitting monthly summary reports of operating fund transactions and balances for board review. The reports summarize the percent of budgeted revenues received and expenditures incurred to date by major revenue and expenditure categories. In light of the district's current financial situation, timely review and monitoring of the budget to actual information is imperative.

- B. During the three years ended June 30, 1999, the district overspent final budgeted expenditures in various funds as illustrated below:

| Fund                            | Budgeted<br>Expenditures | Actual<br>Expenditures | Variance<br>Favorable<br>(Unfavorable) |
|---------------------------------|--------------------------|------------------------|--|
| <u>Year Ended June 30, 1999</u> |                          |                        |  |
| General Fund                    | \$ 48,740,030            | 49,694,992             | (954,962)                              |
| Special Revenue Fund            | 65,754,861               | 67,575,350             | (1,820,489)                            |
| Capital Projects Fund           | 21,222,841               | 26,259,422             | (5,036,581)                            |
| <u>Year Ended June 30, 1998</u> |                          |                        |  |
| Special Revenue Fund            | 61,826,204               | 61,967,208             | (141,004)                              |
| Debt Service Fund               | 7,580,245                | 7,903,974              | (323,729)                              |
| Capital Projects Fund           | 29,625,564               | 33,390,117             | (3,764,553)                            |
| <u>Year Ended June 30, 1997</u> |                          |                        |  |
| General Fund                    | 37,721,957               | 38,552,251             | (830,294)                              |
| Special Revenue Fund            | 55,760,720               | 55,770,615             | (9,895)                                |

The board approved budget amendments throughout each fiscal year which are reflected in budgeted amounts in the schedule above. But, expenditures still exceeded the revised budget amounts. These concerns were also noted by the district's independent auditors.

The budget process provides a means to allocate financial resources in advance. Failure to adhere to the expenditure limits imposed by the budgets weakens the effectiveness of this process. Section 67.040, RSMo 1994, allows for budget amendments, but only after the governing body officially adopts a resolution setting forth the facts and reasons. Section 67.080, RSMo 1994, provides that no expenditure of public monies shall be made unless it is authorized in the budget.

In addition, the budget document was not presented to and approved by the school board in a timely manner. The budget for the year beginning July 1, 1999, was presented to and approved by the board in August 1999; and the budget for the year beginning July 1, 1998, was presented to and approved by the board in July 1998. The district's budgeting policy requires that the original proposed budget be submitted to the board in March and the final budget document be approved prior to the beginning of the fiscal year.

The budget is an important document for a school district. It provides a definite financial policy for the operations of the district and must be prepared carefully and thoroughly to encompass the broad spectrum of events and activities which occur during a fiscal year. Further, a complete and well-planned budget, in addition to meeting statutory requirements, can serve as a useful management tool by establishing costs expectations for each area and provide a means to effectively monitor actual costs. By properly monitoring the budget, the district can compare revenue and expenditure projections to actual results and make appropriate changes as needed.

- C. The district periodically makes adjustments to the actual revenues and expenditures recorded on the district's computerized general ledger. Our review of adjusting journal entries for the year ended June 30, 1999, noted insufficient documentation or no documentation supporting many of the adjustments.

Five adjusting journal entries totaling approximately \$721,000 lacked adequate supporting documentation. For three of these entries, the district retained no documentation supporting the adjustments. For two of these entries, adjusting journal forms or memos were retained; however, explanations or supporting calculations were not documented on the adjusting journal forms or memos. All adjusting journal entries should be supported by appropriate documentation to ensure such entries are appropriate and have been properly approved.

**WE RECOMMEND** the School Board:

- A. Continue to ensure monthly financial reports are submitted and reviewed by the school board as required by district policy.
- B. Ensure expenditures for individual funds do not exceed the amounts approved in the budget, unless proper and timely amendments are made prior to incurring the expenditures. In addition, the board should adopt annual budgets prior to the beginning of the fiscal year and ensure the original proposed budget is submitted to the school board by March of each year as required by district policy.
- C. Ensure adequate supporting documentation is maintained for all adjusting journal entries.

**AUDITEE'S RESPONSE**

- A. *Monthly financial reports have been reinstituted. We are fully committed to continuing this practice.*
- B. *The district administration will present, to the Board of Education, a preliminary budget for fiscal year 2000-2001.*

- C. *Appropriate documentation is now being collected and retained for all adjusting journal entries.*

|   |
|---|
| <b>4. Board of Education Policy and Accounting Procedures Manuals</b> |
|---|

- A. In August 1998, the school board approved an agreement with the Missouri Consultants for Education (MCE) to develop new board policy, regulations, and forms manuals for a total cost to the district of \$16,500. The draft manuals were provided to the district in January 1999; however, as of December 1999, the school board had not approved these manuals.

At the time of our review, the district was following the official Board of Education Policies and Regulations Manual developed by the Missouri School Board Association (MSBA) which was adopted in March 1990. Many of the policies within this manual were incomplete or outdated due to changes in state law. As noted throughout the MAR, there were no policies covering some situations.

- B. The district does not have a policy prohibiting the acceptance of gifts and gratuities from district vendors. Such a policy is included in the MCE manual described in Part A which has not yet been adopted by the board.

During 1998 and 1999, district employees and board members received personal benefits from the district's construction management firm totaling \$1,272. This included golf tournament registration fees and a dinner for board members. During these years, the district conducted two selection processes for construction management services in which this firm was selected on both occasions. The acceptance of gifts from this firm could give an appearance of a conflict of interest or lack of independence of board members and district administrators.

The district's student transportation vendor paid \$1,013 for lodging for the Board President and former Finance Director to attend a customer forum conference in Miami, Florida. The conference was held on a Friday, and the lodging included attendance at a Professional Golfers Association (PGA) tournament sponsored by the vendor.

An appearance of a conflict of interest could harm public confidence in the board and reduce the board's effectiveness. A policy prohibiting these types of situations should be developed.

- C. The district has not prepared a detailed accounting procedures manual to outline the policies and procedures to be followed in handling and recording financial transactions and records. As a result, school district personnel do not always know where to obtain needed information and who is responsible for various duties.

To standardize procedures and clearly assign duties, the district should adopt a detailed accounting procedures manual which would include at a minimum the following:

- 1) A list of all funds, the purpose, and the financial statement classification;
- 2) A summary of all accounting and reporting policies which should address applications of accounting principles and budgetary procedures;
- 3) An adequate account description for the chart of accounts; and
- 4) An appropriate description of all accounting procedures and routines including standard journal entries, samples of forms and reports to be generated, processing procedures and approval requirements.

This concern was also noted by the district's independent auditors.

**WE RECOMMEND** the School Board review the current policies and the manuals prepared by the MCE and adopt a complete set of policies and procedures governing the activities of the district. In addition, the board should develop a written accounting procedures manual outlining detailed procedures to be followed in handling and recording transactions.

#### **AUDITEE'S RESPONSE**

*These activities are under way. An accounting procedures manual is in the process of development and will be completed by June 30, 2000.*

|                                  |
|----------------------------------|
| <b>5. 1999 Property Tax Rate</b> |
|----------------------------------|

As noted in the "Review of 1999 Property Tax Rates" issued by the Missouri State Auditor on December 29, 1999, the 1999 property tax rate levied by the district for operating funds exceeded the tax rate ceiling by three cents per \$100 in assessed valuation. The district levied a property tax rate of \$3.95 for operating funds, although the tax rate ceiling certified by the State Auditor was only \$3.92. Based on the 1999 assessed valuation of \$1,178,417,048, the district will receive approximately \$354,000 more than legally permissible.

In August 1999, the school district reported the \$3.95 operating levy to the State Auditor's Office and the St. Charles County Clerk. In a letter dated September 15, 1999, the State Auditor's Office notified the County Clerk of the 1999 tax rate ceiling, and a copy of the letter was mailed to the district. The district failed to contact the County Clerk to lower the tax rate to the ceiling amount certified by the State Auditor. The former Finance Director indicated he was not aware of his responsibility to contact the County Clerk with the change.

Tax rate ceilings are determined based on the requirements of Section 137.073, RSMo, and Article X, Section 22 of the Missouri Constitution (the Hancock Amendment). School districts should ensure property tax rates levied do not exceed the tax rate ceilings established by state law.

**WE RECOMMEND** the School Board not levy amounts in excess of the ceiling and reduce future levies to reflect this overcharge.

### **AUDITEE'S RESPONSE**

*The district will voluntarily correct the \$.03 error on the 1999-2000 tax rate ceiling. The board voted on February 3, 2000, to roll back the 2000-2001 property tax levy by \$.03 to repay the "over collection" in 1999-2000.*

|   |
|---|
| <b>6. Personnel Policies and Procedures</b> |
|---|

- A. On July 16, 1998, the school board approved contingency language for the teacher and administrative salary schedules covering the two years ending June 30, 2000. According to the agreements, teachers and administrators would receive salary increases contingent upon the levels of property tax collections and student attendance.

The district distributed \$201,022 in local tax collections to teachers and administrators as a one-time payment for the year ended June 30, 1999, and this same amount (\$201,022) was added to teacher and administrator salaries for the year ending June 30, 2000. Although these payments would not have been required by the terms of the original contingency agreement, the board approved a change to the language, causing the distributions.

The original contingency language indicated the salary schedules shall be adjusted based on the formula which included the amount of current year's property tax collections received through March 1999. Because the amount received through March 1999 did not trigger any contingency payments, the board approved a change to base the contingency calculations on the tax collections received through April 1999.

Because of the declining financial condition during the year ended June 30, 1999, the decision by the school board in April 1999 to incur additional expenses of approximately \$402,000 appears questionable.

- B. District sick leave policies for certificated staff (including teachers) and support staff allow for unlimited sick leave to the extent the amount spent to employ substitutes does not exceed the amount budgeted. The budget is to be established by allowing eight days of substitute pay per employee. The policies require that substitute costs in excess of the budget be deducted from the last salary check of the employees absent during the year. For certificated staff, the budget must be

exceeded by two percent before the deduction is required, and the deduction is based on the number of sick leave absence days in excess of three for each employee. For support staff, the deduction is to be made for all sick leave absence days when the budget is exceeded.

According to district records, the district spent approximately \$1,090,000 in the year ended June 30, 1999 for substitutes replacing employees during sick leave absence. Our review of this situation noted the following concerns:

- 1) The district has not established procedures to adequately track sick leave costs to ensure compliance with policy requirements. According to district records, the budgeted expenditures for sick leave substitutes were exceeded by more than two percent, and \$63,204 should have been deducted from applicable certificated staff's salaries and \$9,362 should have been deducted from applicable support staff's salaries for the year ended June 30, 1999. However, district officials indicated that due to inaccurate tracking and posting of substitute salaries, sick leave costs are not accurate and no salary deductions should be made. The district has not reviewed the substitute salary costs to determine the actual sick leave costs and to determine whether any deductions are required.
- 2) The amount budgeted for support staff sick leave is not calculated in the manner described in the board policy. Rather than budgeting substitute salaries for eight days per support staff employee, the district simply increases the prior year budget by an estimated amount. The district could not provide the amount which should have been budgeted in accordance with the board policy.

Procedures to adequately budget, record, and track sick leave costs should be established so that the district can comply with its policy. Enforcement of the policy may help reduce the number of sick leave days utilized by employees, and reduce the costs incurred by the district

- C. During the year ended June 30, 1999, the district paid employees approximately \$390,000 in stipend payments for attending training and meetings outside of their contract or work day. The district does not have a policy governing stipend payments made to district employees.

Supporting documentation for stipend payments was often insufficient or did not agree to amounts paid. For example, stipends totaling \$415 were paid to eight teachers and six paraprofessionals in which most individuals were paid for a half day, although the workshop was held for only 1.5 hours. District officials indicate there are no review or monitoring procedures to ensure stipend payments are only made for training or meetings attended outside normal work days.

A policy should be established documenting when stipends can be paid and the rates to be paid, and adequate records should be maintained supporting all stipend

payments. In addition, procedures should be established to ensure stipend payments are only made for meetings and training attended outside normal work days.

- D. The school board provided the former Superintendent with a \$42,000 cash advance upon signing a 31 month contract which began February 1, 1996. Under the terms of the contract, the former Superintendent would pay back the advance through payroll deductions of \$7,000 per year over a six year period. Semi-monthly payroll deductions of \$292 began in July 1996.

The district entered into a separation and release agreement with the former Superintendent on September 17, 1999. According to the agreement, the former Superintendent will receive his contractual salary through January 31, 2001 and the advance shall be paid in full no later than April 1, 2001. Although the payback period of the advance was reduced by 15 months, the separation agreement did not require an increase in the payroll withholdings to payback the cash advance.

The board should consider increasing the payroll deductions to ensure the advance is paid back in the time period noted in the separation agreement. In the future, the board should refrain from entering into such agreements.

**WE RECOMMEND** the School Board:

- A. Make payments only as required by the contingency salary payment agreements. Such agreements should be reviewed and the board should consider discontinuing such agreements in the future.
- B. Establish adequate procedures to budget, record, and track sick leave costs. The district should recalculate fiscal year 1999 sick leave expenses and, when sick leave budgets are exceeded, deductions from employee salaries should be made as required by leave policies.
- C. Establish a formal written policy regarding stipend payments and ensure adequate documentation is maintained supporting the payments. In addition, review procedures should be implemented to ensure stipend payments are made for only training and meetings attended outside normal work days.
- D. Review the cash advance to the former Superintendent and consider entering into negotiations to increase the payroll deductions to ensure the advance is paid back in the time period specified in the separation agreement. In the future, the board should refrain from providing long-term cash advances to employees.

**AUDITEE'S RESPONSE**

- A. *The district administration strongly urges the discontinuance of contingency language in employee negotiations, which are currently in progress.*

- B. *The district currently takes great effort in tracking and recording employee absences. District policies will be followed in regard to sick leave and the tracking of sick leave costs for the 1999-2000 school year.*
- C. *A comprehensive policy will be developed regarding stipend payments and their tracking by June 30, 2000. Adequate documentation will be established within that policy. (Note: Our year-round elementary schedule may have contributed to the impression that teachers who were "off-cycle" were being paid stipends while working)*
- D. *The district administration recommends discussion with the Board of Education and district legal counsel in this matter. The district administration recommends the discontinuance of this practice in the future.*

|           |                     |
|-----------|---------------------|
| <b>7.</b> | <b>Expenditures</b> |
|-----------|---------------------|

- A. The district has adopted a formal policy for payment procedures that requires an itemized invoice and a receiving document containing the signature of an authorized employee on file before a payment can be processed. The invoice must have been issued in response to a purchase order approved by the Superintendent or appropriate supervisor.
  - 1) Some payments were processed without an original invoice or other adequate supporting documentation.
  - 2) Several payments were processed without a properly approved purchase order.
  - 3) Several invoices did not contain an indication of approval by the appropriate supervisor.
  - 4) Several invoices were not cancelled to prevent duplicate payment. District procedures require each invoice to be stamped as "paid" to ensure the invoice cannot be paid again.

To ensure the obligation was actually incurred and properly approved, all expenditures should be supported by properly approved purchase orders and original invoices and supporting documentation. Invoices should be cancelled to prevent duplicate payment.

- B. The district's employee expense reimbursement policy requires an approved voucher and supporting receipts prior to payment. Our review of payments to employees and board members for expense and travel reimbursements noted the following concerns:

- 1) During the year ended June 30, 1999, district travel expenses, including numerous trips to out-of-state and in-state conferences and meetings, were at least \$176,770.

Reimbursements made to employees for travel expenses were not always supported by adequate documentation of actual expenses incurred. Some reimbursements were not supported by an expense report. Many employee expense reports did not contain sufficient information such as the date of trip, trip origin, destination, and purpose. Some invoices for hotels, meals, and other expenses reimbursed by the district could not be located. For example, during March 1999, the Board President was reimbursed \$168 for travel expenses to a conference in Miami, Florida. The claim was not supported by an expense report or invoices. Another example is the rental of a minivan in the amount of \$790 used by several teachers during a gifted education conference at the University of Connecticut in July 1999. One of the teachers claimed he paid for the rental on his credit card and was reimbursed by the district without providing a copy of the paid credit card statement.

Without a detailed travel expense report including documentation supporting the expenses claimed, the district cannot determine the propriety of payments made for travel expenses.

- 2) Expense reimbursements are not always submitted on a timely basis. For example, one expense report totaling \$1,664 covered a period of 10 months. The district's policy requires expense reports to be submitted monthly.
- 3) Some reimbursements for lodging and mileage appear excessive based on documentation provided. For mileage, an individual claimed two round trips from the district to Columbia, Missouri, totaling 560 miles, while the actual mileage is approximately 400 miles (200 miles per round trip). For lodging, the district paid \$184 per night in Phoenix, Arizona, and \$210 per night in New Orleans, Louisiana, while federal per diem maximums are \$106 and \$88 per night, respectively.

To ensure public funds are spent wisely, travel expenses paid by the district should be necessary, reasonable, and adequately documented. The district should consider adopting maximum limits on lodging and meal expenses.

- 4) Employees and board members are reimbursed by the school district for purchases of materials, supplies, and other items. There is often no approved purchase order or expense claim form, or any other type of documentation supporting the expense claim such as an invoice or a copy of the credit card slip. The purpose of the purchase is often not documented. For example, in November 1998, the Board President was

reimbursed \$400 for supplies for a negotiation party held at her house. Payment was made without an approved purchase order, reimbursement claim form, or invoices supporting the payment.

Employees are allowed to purchase large quantities of supplies and be reimbursed by the district, which circumvents the district's purchase order system. For example, reimbursements to the current Superintendent for history project supplies totaled \$4,921 during the year ended June 30, 1999.

Adequate supporting documentation for expense reimbursements should be obtained to ensure the district does not pay for items not intended for school purposes. Large purchases of supplies should be made through the district's purchasing procedures rather than the employee expense reimbursement process to ensure the best prices are paid and the purchases are approved in advance.

- C. The district does not have a formal written policy for the payment of employee relocation. District officials indicate that the procedure is to pay for moving expenses for administrators from assistant principals up to the superintendent level. The Finance Office requires that three written quotations from moving companies be submitted along with original invoices. During the two years ended June 30, 1999, the district paid approximately \$17,000 in moving expenses for five district employees.

For payments to two employees of \$3,812 and \$3,072, the district did not retain complete documentation of the bid process for selecting the moving companies. The bid documents for the companies selected were retained; however, the bids from the other companies were not retained. The former Finance Director was paid \$2,000 which was not supported by invoices or other documentation. The former Finance Director agreed to return this amount to the district in full by March 2000.

Formal written policies for employee relocation are necessary to ensure relocation expenses are reasonable, necessary, and adequately documented.

- D. Accounting duties are not adequately segregated. District personnel who process invoices for payment also distribute the actual checks to the vendors. This increases the risk that unauthorized expenditures may occur and go undetected. Personnel who process invoices for payment should not be distributing the actual checks.

**WE RECOMMEND** the School Board:

- A. Require approved purchase orders and approved adequate supporting documentation (such as original invoices) be on file before processing payments

in accordance with district policy. In addition, all invoices should be canceled to prevent duplicate payment.

- B.1. Require detailed travel expense reports which include information such as trip date, origin, destination, and purpose. In addition, all applicable supporting documentation, such as paid invoices or receipts, should be submitted before payment is made.
- 2. Ensure travel expense reports are submitted monthly as required by district policy.
- 3. Ensure reimbursement claims are reasonable and consider establishing maximum limits on lodging and meal reimbursements.
- 4. Require sufficient documentation supporting employee reimbursements for purchases of supplies and other items. Expense reports should document the purpose of the purchase and should contain approved purchase orders and invoices or receipts. The board should establish guidelines and limits for items purchased through the employee reimbursement process.
- C. Establish a policy for relocation of district employees stating allowable costs and limits, eligible employees, and required quotes and supporting documentation.
- D. Segregate the duties of processing invoices for payment and distributing actual checks.

#### **AUDITEE'S RESPONSE**

- A. *The policies for approving purchase orders and other related processes will be followed based upon new policies adopted by the Board of Education in January 2000.*
- B.1.  
& 2. *Administrative regulations are in place and will be appropriately applied.*
- 3. *Administration will recommend to the Board of Education a policy that establishes limits on claims for approved lodging and other reimbursements, by June 30, 2000.*
- 4. *Administration will follow policies regarding reimbursements and will require sufficient documentation for purchase of supplies and other items.*
- C. *Administration will recommend a policy for relocation expenses by June 30, 2000.*
- D. *The administration recommends the employment of an additional accounts payable staff member to accomplish this recommendation.*

**8.****Credit Card Accounts**

During the year ended June 30, 1999, the district had four accounts with a credit card company. Two of these accounts were in the district's name, while the other two accounts were in the name of the former Superintendent and the former Finance Director. Employees could use the two district accounts for various expenditures such as travel expenses, registrations, and supplies.

Some informal procedures relating to the credit card accounts were developed. The Finance Office maintained a log for checking out the two district credit cards; however, this system was not always used. Original receipts and invoices were required to be sent to the Finance Office to be reconciled to the monthly statements and posted to various accounts. Payments on the credit card accounts during the year ended June 30, 1999 totaled \$96,033. Our review of credit card payments noted the following concerns:

- 1) There were at least 118 charges totaling \$19,941 made to the credit card accounts which were not supported by receipts or credit card slips.
- 2) The statement and related receipts for one payment of \$5,457 to a credit card account could not be located.
- 3) Purchase orders were not prepared for purchases on the credit card accounts.
- 4) The purpose of the expenditure was not documented for numerous charges to the credit card accounts. As a result, the propriety of the expenditure cannot be determined. For example, there were charges totaling \$4,068 at local restaurants for which the purpose was not documented. There were also numerous travel expenses for hotels, airline tickets, and meals charged to the credit card accounts which did not include documentation supporting the purpose of the trip. While the district had documented the validity of some of these charges, the public purpose or benefit to the district for some of these expenses appears questionable.

Due to the district's financial condition and concerns it had with the use of the credit card accounts, the district closed all four accounts in September 1999. There were no formal procedures for use of the credit card accounts, including authorization, approval, and review of expenditures. As a result, controls over expenditures were circumvented and payments were processed without purchase orders, supporting documentation, approval, and documentation of purpose. Without these controls, the district cannot ensure purchases are for school purposes.

**WE RECOMMEND** the School Board review the expenditures charged to the credit card accounts for propriety, and seek reimbursement for any purchases which were not necessary district expenses. If accounts are opened in the future, controls and procedures should be established.

## **AUDITEE'S RESPONSE**

*All credit card accounts have been closed and will not be reopened.*

|  |
|--|
| <b>9. Cellular Telephones and Pagers</b> |
|--|

The district does not have a formal written policy for the usage of cellular telephones and pagers. During the year ended June 30, 1999 the district incurred costs of approximately \$55,000 for monthly services and equipment purchases for 74 cellular phones and 66 pagers. The phones and pagers were issued to various employees and board members and could be used for district business as well as personal use. Individuals were provided with service plans ranging from \$11.99 to \$89.99 per month, depending on the number of airtime minutes provided in the plan.

The monthly cellular phone invoice for May 1999 totaled \$4,815. On this invoice, twelve individual phone charges exceeded \$100, and the three largest individual charges were \$480, \$317, and \$223. The \$480 amount was for the former Finance Director, who used 1,968 airtime minutes, or an average of 64 minutes per day during this billing period, including weekends. The \$317 amount was for an elementary school principal and included \$180 in roaming charges. The \$223 amount was for the School Board President, who used 1,635 airtime minutes, or an average of 53 minutes per day, including weekends.

Numerous calls were made between district cell phones during the course of normal business hours. It appears that overall phone costs could be reduced by using the district's wired phones rather than cellular phones. During May 1999, approximately 200 calls, representing over 20% of the total airtime minutes used, were made between the cellular phones of the former Finance Director and the School Board President.

The district did not require individuals assigned phones to reimburse the district for personal calls; however, some individuals have recently reimbursed the district for a portion of the charges for their assigned phones.

Due to the current financial situation, the district has reduced the number of cellular phones and pagers in use, and required some employees to reimburse the district for all or part of their monthly cellular phone charges. District records indicate that employee cell phone reimbursements received in November and the first week of December 1999, totaled \$2,467.

The board should develop policies and procedures for cellular phone and pager usage and determine which individuals may need a phone or a pager. Usage of the cellular phones and pagers should be monitored to ensure it is necessary and for district business only.

**WE RECOMMEND** the School Board establish a policy for cellular phone and pager usage stating the individuals authorized to be assigned a phone or pager, and allowable use of the phones and pagers. All billings should be reviewed for reasonableness and the

board should ensure cell phones are used only for district business. In addition, the prior years' bills should be reviewed and reimbursement requested for any personal calls.

### **AUDITEE'S RESPONSE**

*The administration will submit a policy for the use of cell phones to the Board of Education for approval no later than June 30, 2000.*

|                                  |
|----------------------------------|
| <b>10. Construction Projects</b> |
|----------------------------------|

Through funding received from voter-approved bond issues, the district has entered into projects for the renovation and construction of various school facilities. Expenditures for facilities acquisition and construction totaled approximately \$25 million during the year ended June 30, 1999. Our review of the district's construction projects noted the following areas of concern:

A. The district has engaged a firm since January 1990 to provide construction management services for all of its construction projects. This firm works with the district in the scheduling, planning, design and construction management of construction projects. Payments to this firm during the year ended June 30, 1999 totaled approximately \$720,000.

- 1) The district did not conduct a formal selection process for construction management services until March 1998. During 1998 and 1999, this process was performed for construction management services for the ninth and tenth elementary schools, and the Early Childhood Special Education Center. Each time, the district awarded contracts to the same management firm to continue providing services to the district. Formal selection processes were not conducted for prior projects.

Documentation supporting the March 1998 construction manager selection process was not retained. The district maintained a report summarizing the proposals received from eight construction management firms; however, the original proposals were not retained. District officials indicated that requests for proposals were advertised; however, documentation supporting the advertisement was not retained.

Based on available billing records, approximately \$666,000 was paid to this firm during the year ended June 30, 1999 for projects started prior to March 1998 for which there was no formal selection process.

Section 8.679, RSMo 1994, requires proposals for services of a construction manager to be solicited by advertisement if the cost of any construction project exceeds \$500,000. The district's policy for selecting construction management services outlines specific criteria in selecting a firm. The district should continue this process to ensure it is receiving the

best services and rates. Documentation of proposals should always be retained as evidence of the district's established procedures and to show statutory requirements are followed.

- 2) The district does not adequately monitor construction management costs for each project. For projects started prior to March 1998, a separate contract for each project was not established outlining the proposed management fees, labor, and reimbursable costs associated with the project. Instead, a change order form is used to document approval of the monthly fixed fee and labor rates for all projects each year. Only some labor costs are documented for each project on the monthly billing statements. The management fees, reimbursable costs, and remaining labor costs are lumped on the billing, rather than listed by project. As a result, the district cannot monitor the costs for each project.

For those projects started since March 1998, the monthly billing statements do indicate the management fees, labor, and reimbursable costs for each project; however, the billing statements do not include the proposed project costs and the district does not compare amounts billed to the proposed costs.

Written contracts are necessary to outline the services to be rendered and the manner and amount of compensation to be paid. Contracts should be detailed to outline the proposed costs for each project. The district should ensure that detailed billing statements are received and compared to the contract for each project to ensure the contract amount is not exceeded.

- B. The district has a policy which requires board approval for all contracts and change orders, allowing the Superintendent to approve emergency change orders not to exceed \$25,000 per project, with a report to follow at the next scheduled board meeting.

Change orders were not always properly approved by the school board. From October 1997 to July 1999, ten change orders totaling approximately \$1,013,000 for three projects had no documentation of board approval. The change orders were signed by the Board President or Vice President; however, there was no documentation in the board minutes that the change orders had been approved by the board, as required by district policy.

**WE RECOMMEND** the School Board:

- A.1. Conduct a formal selection process for construction management services for all construction projects as required by district policy and state law. In addition, all documentation of the process should be retained.

2. Establish a contract for the construction management services for each construction project. In addition, billings should be detailed by project and compared to the contracted amounts to ensure the district is not overbilled.
- B. Ensure all change orders are approved by the school board as required by board policy.

### **AUDITEE'S RESPONSE**

- A.1. *The district conducted a formal selection process in 1989 for construction management services. The initial award was for a period of five years, 1990 through 1995. Each time the district has awarded contracts, it has been to the lowest bidder. Several of the projects referenced occurred prior to the enactment of Section 8.679, RSMo 1994.*
2. *The district has historically reviewed construction management costs based upon the entire calendar year's projects. The administration will follow the auditor's recommended procedure.*
- B. *The administration and board will comply with the current board policy.*

### **AUDITOR'S COMMENT**

- A.1. Section 8.679, RSMo, became effective in August 1993. All payments to the construction management firm during fiscal year 1998-99 were for projects that started subsequent to August 1993.

|   |
|---|
| <b>11. History Project and History Book</b> |
|---|

The district began an ongoing history project in 1991 involving the framing of history documents and pictures which are displayed throughout school district buildings. Expenditures relating to this history project during fiscal year 1999 totaled at least \$23,700. Our review of the history project expenditures noted the following concerns:

- A. Expenditures were charged to five accounts controlled by the current Superintendent. Two of these accounts were originally set up for a history book which is being written by the Superintendent. In December 1997, the board approved \$30,000 to publish and provide 1,000 copies of this book, which would then become the property of the district.

In July 1999, the board rescinded the \$30,000 in funding for the history book upon the request of the Superintendent who indicated that none of the \$30,000 had been spent. However, \$12,913 which had been spent on the history project in 1998 and 1999 had been charged to the two history book accounts.

Per discussions with district personnel and review of the board minutes, it appears the board has never formally approved the history project. The current

Superintendent indicated that the project had been authorized by former Superintendents.

- B. Our review of history project expenditures noted numerous instances in which district purchasing policies were not followed. Payments were primarily to frame and camera stores, and also for reimbursements to the Superintendent. Numerous expenditures were not supported by purchase orders or original invoices supporting the payments. For example, the district made nine payments totaling \$12,132 to one vendor during fiscal year 1999 without invoices or other documentation supporting the payment.

In addition to the above vendor, the district paid \$5,210 to another vendor for expenses relating to the history project during fiscal year 1999; however, no bids were obtained for these purchases.

Board authorization of projects involving significant expenditures should be documented to ensure these expenditures are reasonable and necessary uses of district funds. Expenditures for the history project should be charged to the appropriate district accounts. District purchasing policies should be followed for all purchases to ensure that expenditures were actually incurred and properly approved, and that the products or services were obtained at the lowest prices.

**WE RECOMMEND** the School Board:

- A. Review the costs associated with the district history project and determine if the project is a necessary district expense. If the board wishes to continue with the project, board authorization should be documented and a separate account should be established for the project. The district should ensure expenditures are charged to the appropriate district accounts and are related to the intended purpose of the accounts.
- B. Ensure district purchasing policies are followed for all expenditures.

**AUDITEE'S RESPONSE**

- A. *The History project was approved by Dr. Wanda J. McDaniel, then district superintendent, in November 1990. It has been determined that she did not seek Board of Education approval. The History Book project was approved by Dr. Lee Brittenham, superintendent, and subsequently approved by the Board of Education on December 18, 1997. No district money was spent on the book project.*
- B. *Both the History project (Howell Hall of History) and the History Book project have been discontinued. Any future efforts will be accomplished through private fund raising.*

|                               |
|-------------------------------|
| <b>12. Bidding Procedures</b> |
|-------------------------------|

The school district does not always follow its bidding policies. The district's procurement policy requires that formal, written bids be obtained for all purchases which involve an expenditure of more than \$5,000. For expenditures between \$1,000 and \$5,000, price quotes by phone are sufficient in lieu of written bids. The policy also requires a formal, advertised bid process for construction of facilities which may exceed \$12,500 as required by state law. The policy requires that all bid processes be conducted by the purchasing agent and that bids are to be retained in the Finance Office.

A. The following are examples of expenditures during the period from July 1998 through September 1999 for which bid policies were not followed:

1) Items purchased without documentation of bids are as follows:

| <u>Item</u>             | <u>Cost</u> |
|-------------------------|-------------|
| Furniture               | \$140,756   |
| Furniture               | 91,291      |
| Portable classroom      | 55,358      |
| Computers and equipment | 41,764      |
| Furniture installation  | 18,324      |

District personnel indicated bids were solicited from various vendors and some items were available from only one vendor; however, bid documentation and documentation of the sole source procurement situations was not maintained.

- 2) For four expenditures exceeding \$5,000, the district obtained phone price quotes although written bids were required. These expenditures include four vehicles totaling \$77,310, custodial equipment totaling \$25,040, and lawn equipment totaling \$6,392.
- 3) During October 1998, the district purchased furniture for administrative offices in one of the elementary schools. The district received bids from three vendors in the amounts of \$22,090, \$16,755, and \$14,779. Although the lowest bidder was \$7,311 less than the highest bidder, the highest bidder was selected. The district maintained no documentation supporting the selection of the highest bidder.
- 4) The district has used the same accounting firm for audit services for over 10 years. The district has continued to renew the contract with this firm without periodically soliciting proposals from other firms. The current contract extension covers the three years ending June 30, 2000. Payments made to the firm during the year ended June 30, 1999 totaled \$23,372. The district does not have a policy for the selection of the auditor.

Written documentation of bids provides evidence that the board has complied with its procurement policy. Bid documentation should include a list of vendors

contacted, a copy of bid specifications, copies of all bids received, justification for awarding the bid, and documentation of discussions with vendors. Bids may cover a specified time period, which should be adequately documented and justified. When the lowest bidder is not used, documentation justifying the selection of a different bidder should be maintained. A policy for periodically soliciting proposals for audit services should be developed and followed by the school board.

- B. The district's bidding procedures are not centralized. The Finance Office requires the employee making the purchase to solicit the bids and maintain the bid documentation. The Finance Office approves all purchases; however, the employee is not required to demonstrate that district bidding policies were followed. For those items reviewed, bid documentation was not always available and most documentation which had been retained was obtained from the employee who made the purchase rather than the Finance Office. Our discussions with various employees noted that some did not have a good understanding of the bidding policies, which apparently led to some of the concerns noted in Part A. above.

The district has a Purchasing Agent; however this individual does not perform or oversee most bid processes. District policy requires that all bid processes be conducted by the Purchasing Agent and bid documentation be maintained in the Finance Office. Effective bidding procedures should include a centralized bidding function which ensures that the district is in compliance with its policies and state law.

**WE RECOMMEND** the School Board:

- A. Follow the district's bidding policies and retain documentation of bids received and the bid process. In addition, if sole source procurement is necessary or if the lowest bidder is not selected, the district should retain documentation of these circumstances.
- B. Centralize the bidding process as required by district policy.

**AUDITEE'S RESPONSE**

- A. *The district will follow all policies and retain all documentation pertaining to or regarding bids.*
- B. *Additional personnel are required to centralize the bidding process as required by policy. The administration recommends this person be a senior accountant/internal auditor.*

|                                    |
|------------------------------------|
| <b>13. Transportation Services</b> |
|------------------------------------|

The school district contracts with a transportation company to provide bus transportation for its students. During the year ended June 30, 1999, the contractor served 466 routes traveling approximately 11,000 miles per day in addition to providing transportation for other district activities such as sporting events and field trips. During this time period, payments totaling approximately \$4,823,000 were made to the transportation company. We noted the following areas of concern during our review of this contract:

- A. The district has not solicited bids for transportation services since 1985. The district has periodically renegotiated its contract with the transportation company without seeking bids from other companies. The current transportation contract covers school years 1995-96 through 1999-00. Without periodically bidding transportation services, the district cannot ensure it is paying the lowest possible rate. After the situation was brought to their attention, the district solicited bids for transportation services covering the three years ending June 30, 2003.
- B. Procedures are not in place to adequately monitor transportation costs. As required by the contract, the district compensates the bus company based on the type of route and the number and size of buses used each day. The daily per-bus rates for the year ended June 30, 1999 ranged from \$146 to \$218 for regular bus routes.
  - 1) The district delegates the responsibility of preparing the bus routes to the transportation company and the school board is required by the DESE to approve the route listings at the beginning of the school year. The DESE also requires the district to prepare a listing of students who regularly ride the bus as of the second Wednesday of both October and February during the school year. To satisfy this requirement, the district chose to take a count of the students actually riding the bus on those two dates. Six 1998-99 school year bus routes were reviewed, comparing the number of riders counted by the district on February 10, 1999 to the manufacturer's rated capacity for the buses. Several routes in which the number of riders assigned to the buses and the number of actual riders on the count day were significantly lower than bus capacities.

| <u>Route<br/>Number</u> | <u>Bus<br/>Capacity</u> | <u>Assigned<br/>Riders</u> | <u>Actual<br/>Riders</u> |
|-------------------------|-------------------------|----------------------------|--------------------------|
| A11                     | 71                      | 22                         | 14                       |
| A31                     | 71                      | 19                         | 6                        |
| B10                     | 71                      | 55                         | 20                       |
| R627                    | 71                      | 9                          | 4                        |
| I305                    | 71                      | 31                         | 22                       |
| H402                    | 84                      | 39                         | 23                       |

The district does not have procedures to review and monitor bus routes to ensure all routes are operating efficiently. As noted by the district's independent audit, the 1998-99 school year bus routes were not approved

by the school board. Specific routes with low ridership should be reviewed and investigated to identify any areas where costs can be reduced such as decreasing the number of routes.

- 2) The transportation company submits monthly billings to the district. The district's Director of Administrative Services is responsible for reviewing and approving the billings prior to payment. However, there are no procedures in place to review the billings for accuracy. Monthly billings should be reviewed for reasonableness and accuracy to ensure the district is charged only for services received.

**WE RECOMMEND** the School Board:

- A. Periodically solicit competitive bids for transportation services.
- B.1. Conduct a thorough evaluation of the bus routes and determine ways to increase efficiency and reduce costs. The board should ensure bus routes are approved as required by the DESE.
2. Establish procedures to review monthly billings from the transportation company.

**AUDITEE'S RESPONSE**

- A. *This service was rebid and a new contract approved at the February 3, 2000, Board of Education meeting.*
- B.1. *The district utilized district-developed, bus ridership/count procedures approved by district auditors for the October 1999 and February 2000 DESE required reporting dates. Bus route evaluation will be conducted at the end of the 1999-2000 school year and in preparation for the start of the 2000-2001 school year.*
2. *The administration will analyze the current process of review for monthly billings and modify as required. Administration recommends hiring a senior accountant/internal auditor for accomplishing this process.*

|                          |
|--------------------------|
| <b>14. Food Services</b> |
|--------------------------|

The school district contracts with a food service provider to operate, administer, and manage the district's food service program. Payments for contracted food services during the year ended June 30, 1999 totaled approximately \$3,762,000. During our review, we noted the following concerns:

- A. The food service contractor bills the district for actual operating costs plus administrative and management fees based on the number of meals served. Monthly billings are received by the Administrative Services department along with a report of meals served, receipts, and expenditures. The Administrative

Services department approves the billings for payment; however, the billings are not adequately reviewed for accuracy.

Adequate review of monthly billings is necessary to ensure the district is billed only for reasonable and necessary costs. This review process can be conducted in several ways such as requiring audits of the billings, periodically reviewing the contractor's expenditure documentation, comparing billing information to meals served, or comparing billings to prior year billings.

- B. The food service contractor is responsible for collecting meal receipts and depositing the receipts into the district's bank account. The district does not review meal receipts to ensure they are properly handled and deposited by the contractor. Food service deposits made by the food service provider for the year ended June 30, 1999 totaled approximately \$3,342,000. To ensure all meal receipts are properly accounted for and deposited, meal deposits should be reconciled to the number of meals served. Any significant differences between the calculated meal receipts (number and type of meals served times price per meal) and actual deposits should be investigated and resolved.

**WE RECOMMEND** the School Board:

- A. Establish procedures to review invoices from the food service contractor to ensure actual costs reimbursed by the district are reasonable and substantiated by adequate supporting documentation.
- B. Establish procedures to reconcile meal deposits to calculated meal receipts and to investigate significant differences.

**AUDITEE'S RESPONSE**

- A. *Food service program and invoice evaluation will be conducted at the end of the 1999-2000 school year and prior to the start of the 2000-2001 school year. The administration recommends hiring a senior accountant/internal auditor for accomplishing this process.*
- B. *The administration will analyze the current process for reviewing monthly food service billings and modify accordingly. Administration recommends hiring a senior accountant/internal auditor for accomplishing this process.*

|   |
|---|
| <b>15. Petty Cash and Vending Machine Funds</b> |
|---|

- A. Various schools and organizations within the district maintain petty cash funds. Our review of the district's petty cash funds noted the following areas of concern:
  - 1) The district does not have a listing of approved petty cash funds and changes to petty cash fund amounts are made without proper approval.

For example, a payment of \$1,000 to increase a petty cash fund at a high school was made without documentation authorizing the increase.

The district does not have a written policy regarding petty cash funds. Written policies should be established outlining the procedures for maintaining, using, and accounting for petty cash. The district should also maintain a listing of all authorized petty cash funds and amounts as well as procedures for adding funds or changing fund amounts.

- 2) Payments to the petty cash funds are not always supported by invoices or supporting documentation. Our review noted payments totaling \$2,400 made to a student activities petty cash fund during the year ended June 30, 1999 without invoices or supporting documentation. Also, this petty cash fund was not maintained on an imprest basis.

Ledgers are not maintained for some petty cash funds to document all transactions, and there are no independent reviews to ensure petty cash funds are being maintained properly.

Invoices should be maintained for all petty cash expenditures and the funds should be operated on an imprest basis, meaning that cash and the invoices should always total the established balances, and checks issued to replenish the funds should equal the amount of invoices. Ledgers of all petty cash fund transactions should be maintained to document that the fund is being maintained on an imprest basis. Periodically, the funds should be counted and reconciled to the imprest balance by an independent person to ensure the funds are being accounted for properly, to detect any errors, and to help prevent these monies from being misused.

- B. The district operates several soda and vending machines throughout the various school buildings. Custodians or other district employees are responsible for replenishing the machines and emptying the change from the machines on a periodic basis. The monies are turned over to designated individuals in the buildings who count and deposit the monies.

An independent party does not periodically reconcile the amount of soda and other items purchased and remaining in inventory with receipts from the sale of the soda and other items. Failure to reconcile monies received to items sold could result in the loss or misuse of funds.

**WE RECOMMEND** the School Board:

- A.1. Establish written procedures governing the accounting for petty cash funds. In addition, the district should maintain a listing of each petty cash fund and the authorized balance of each fund, and establish procedures for adding funds or changing fund amounts.

2. Ensure petty cash funds are maintained on an imprest basis and ensure the funds are periodically counted and reconciled to the imprest balance by an independent person. Invoices should be maintained for all petty cash expenditures and ledgers should be prepared of all petty cash transactions.
- B. Ensure independent reconciliations of soda and vending machine monies received to items purchased and remaining in inventory are performed.

### **AUDITEE'S RESPONSE**

- A.1. *Written procedures have been established and financial procedures approved by the Board of Education. New regulations will be implemented during March 2000.*
2. *Written procedures have been established. The administration recommends hiring a senior accountant/internal auditor for this process.*
- B. *Administration recommends hiring a senior accountant/internal auditor to oversee this process.*

|            |                          |
|------------|--------------------------|
| <b>16.</b> | <b>District Vehicles</b> |
|------------|--------------------------|

The district owns and operates 36 vehicles and three vehicles which are provided by its bus transportation contractor and one vehicle which is provided by an outside entity for driver's education classes. During our review of the district's procedures for the usage of these vehicles, we noted the following:

- A. The district has not adopted a formal policy regarding the use of vehicles, including the prohibition of personal usage. Mileage logs are not maintained for the vehicles documenting their use. A formal policy would help ensure that vehicles are used only for district business in a manner approved by the school board. Logs are necessary to document appropriate use of the vehicles and to support gasoline charges.

The logs should include the purpose and destination of each trip, daily beginning and ending odometer readings, and operation and maintenance costs. These logs should be reviewed by district management to help ensure vehicles are used for district purposes only, are being properly utilized, and help identify vehicles which should be replaced. Information on the logs should be reconciled to gasoline and other maintenance charges.

- B. The district purchases gasoline for its vehicles through accounts at two local suppliers. The district receives monthly billings from the suppliers which detail each purchase. Payments on the district gasoline accounts totaled \$30,734 during the year ended June 30,1999.

The district does not have formal procedures for the purchase of gasoline on account and for the review of these purchases. Individuals making the purchases on account are required to submit the charge slip to the Finance Office; however, this is not always done. Our review of two invoices noted charges totaling approximately \$1,200 for which the charge slips were not submitted to the Finance Office. The Finance Office paid these invoices in total without this supporting documentation.

In addition, the Finance Office does not compare charge slips to a listing of authorized individuals and vehicle descriptions to ensure purchases are authorized and for district use, and the charge slips do not note the license plate number or description of the car.

Adequate documentation is necessary to support payments made on the district's accounts and to ensure billings are accurate. Vehicle descriptions should be documented on the charge slips, and the descriptions and employee signatures should be reviewed to ensure gasoline was purchased for a school vehicle.

**WE RECOMMEND** the School Board:

- A. Establish a formal policy governing the use of district vehicles which prohibits personal use of district vehicles, and require complete and accurate mileage logs be maintained for each vehicle. The logs should be periodically reviewed by district management for completeness and reasonableness.
- B. Establish a formal policy governing gasoline purchases on district accounts and the review of these purchases. The district should ensure all charge slips are accounted for and compared to invoices prior to payment. The license number and a description of the vehicle should be noted on the charge slip, and this information and the employee's signature should be reviewed for propriety.

**AUDITEE'S RESPONSE**

- A. *The administration will submit formal policy language to the Board of Education no later than June 30, 2000.*
- B. *Within the recommended policy will be procedures for accounting of all funds and expenditures. Administration recommends hiring a senior accountant/internal auditor for this process.*

This report is intended for the information of the school board and district's management. However, this report is a matter of public record and its distribution is not limited.

## APPENDICES

APPENDIX A

CITY OF WELLSTON, MISSOURI

YEAR ENDED JUNE 30, 1999

**From The Office Of State Auditor  
Claire McCaskill**

Report No. 2000-14  
March 6, 2000

# AUDIT REPORT

Office Of The  
State Auditor Of Missouri  
Claire McCaskill

March 2000

**Some problems were discovered as a result of an audit conducted by our office in response to the request of petitioners from the City of Wellston, Missouri.**

---

The city's quarterly COPS grant reports were not accurate and copies of some reports were not retained. During the period July 1997 through July 1999, the city over claimed approximately \$91,600 from the COPS grant due to various errors.

On August 26, 1997, the City Council established a benefits package for the mayor, treasurer, and the council members. The council transferred \$80,000 from city funds to a certificate of deposit to pay for future benefits. The benefit package has a death benefit and a severance benefit. The death benefit pays \$10,000 to the beneficiary of a city official who dies while holding office. The severance benefit pays \$10,000 to city officials having been an official for a period of at least 10 continuous years who cease to be a city official for any reason other than death or cause.

Parts of the benefit package look like a retirement plan, which the city is prohibited from establishing by state law. However, the most significant problem appears to be the increase in compensation or benefits during the term for which an officer is elected or appointed, which is prohibited by Article VII, Section 13, of the Missouri Constitution. Retroactive compensation for services previously rendered is in violation of Article III, Section 39 of the Missouri Constitution.

During the period October 1995 through April 1998, loans were made to some city officials and employees totaling approximately \$29,500, which were to be repaid through payroll deductions. The employees were required to sign a contract indicating that they would continue to make these payments if they left city employment; however, there are several past and current employees with unpaid balances totaling approximately \$6,700 as of June 30, 1999. In addition, the city did not appear to attempt to withhold any unpaid balance from the five former employees' final paycheck. It would appear these payments are in fact interest free loans to employees.

Also, since June 1999 the Mayor received his payroll checks from two to six weeks in advance of the dates earned.

Some city officials improperly received raises within their term of office, in violation of Article VII, Section 13 of the Missouri Constitution.

(over)

YELLOW SHEET

The city purchased fifteen cellular phones, some of which were to be used as city phones, and some of which were resold to city employees and another individual to be used as personal phones. The purchase price and phone bills for the personal phones initially are paid by the city and then reimbursed through payroll deduction for the employees, and through payments from the individual. Phone service is discontinued when employees leave city employment. The purchase of personal phones and service does not appear to be a necessary, proper, or prudent use of city monies. Also, the city has failed to properly bill or collect the total cost of personal phone service.

The city has taken over providing a lunch and transportation service to senior and disabled citizens, including persons outside city limits. During the two years ended June 30, 1999 and 1998, the city's net costs for this program were at least \$96,000 and \$81,000, respectively. It is unclear whether the city has the authority to provide the program or can afford it. Also, the city has not ensured that the fee charged to employees for meals obtained through the program is adequate or is always collected.

The city has not identified all costs of the city's trash collection program to ensure the fee is sufficient, has not taken adequate steps to ensure the timely collection of delinquent accounts, and has not developed procedures to ensure all customers are billed. Controls and accounting records for trash service fees are not adequate.

Bids or proposals were not solicited or bid documentation was not retained for many purchases and the city did not obtain formal written agreements with companies or individuals providing services to the city. Also, documentation to support some disbursements was either inadequate or not available.

Budgets are not approved timely and are not complete. Semi-annual financial statements are not published as required by state law.

The city has not properly accounted for the expenditure of restricted revenues and numerous other accounting controls, procedures, and records were inadequate and inaccurate.

Approximately \$4,083 in cash bond monies were not deposited and appear to be missing. Numerous other accounting controls, procedures, and records in the Municipal Court were inadequate and some records were missing.

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

To the Honorable Mayor  
and  
Members of the City Council  
City of Wellston  
Wellston, Missouri 63133

The State Auditor was petitioned under Section 29.230, RSMo, to audit the city of Wellston, Missouri. Our audit of the city included, but was not limited to, the year ended June 30, 1999. The objectives of this audit were to:

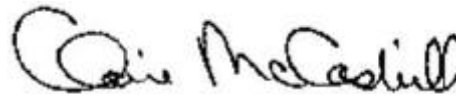

1. Perform procedures we deemed necessary to evaluate the petitioners' concerns.
2. Review compliance with certain constitutional provisions, statutes, ordinances, and attorney general's opinions as we deemed necessary or appropriate in the circumstances.
3. Review certain management practices which we believe could be improved.

Our audit was made in accordance with applicable generally accepted government auditing standards and included such procedures as we considered necessary in the circumstances. We also reviewed council minutes, city policies and ordinances, and various city financial records.

Our audit was limited to the specific matters described above and was based on the selective tests and procedures considered appropriate in the circumstances. Had we performed additional procedures, other information might have come to our attention which would have been included in this report.

The accompanying History and Organization is presented for informational purposes. This information was obtained from the city and was not subjected to auditing procedures applied during our audit of the city.

The accompanying Management Advisory Report presents our findings and recommendations arising from our audit of the city of Wellston, Missouri.

A handwritten signature in black ink, appearing to read "Claire McCaskill". The signature is written in a cursive, flowing style.

Claire McCaskill  
State Auditor

November 1, 1999 (fieldwork completion date)

## EXECUTIVE SUMMARY

## CITY OF WELLSTON, MISSOURI EXECUTIVE SUMMARY

The city of Wellston has continued to operate with poor record keeping, inadequate control systems, repeated instances of employee fraud and accounting irregularities, illegal and improper spending of public monies, and ineffective management practices. Past audits of the city of Wellston and its municipal division have shown missing monies in both the city and the municipal division, and made numerous recommendations to improve record keeping, internal control systems, and management practices. However, the city does not appear to have made adequate effort to implement our past recommendations to establish internal controls and supervisory reviews to attempt to avoid further losses.

The city has made illegal and improper disbursements such as loans and bonuses to employees, and established programs or entered into transactions to personally benefit city officials and employees. In addition, the city has not established adequate controls, supervisory review, or documentation to ensure disbursements and payroll transactions are properly authorized and prudent uses of city monies. The city has not obtained bids for major purchases. City monies have been spent, including revenues restricted for other purposes, to fund programs such as the city officials' benefit package and the senior citizens program which may not have been proper or could have been provided at less cost.

The city has not established adequate controls or supervisory reviews over cash receipts; does not prepare bank account or other reconciliations; and does not maintain records of investments. The lack of controls and supervisory review allowed numerous billing errors on the city's COPS grant, missing bond monies, errors in payroll, and unpaid loan balances to go undetected.

The city's operational decisions are based on inadequate, inaccurate, or incomplete budgets and financial reports. In addition, the City Council does not periodically compare actual receipts and disbursements to the budgeted amounts.

As a result of the mismanagement and poor records noted above, the city of Wellston is experiencing a declining cash balance. The cash balance has decreased from \$448,378 at June 30, 1997 to \$43,953 at June 30, 1999. As of that date, the city owed \$459,000 to St. Louis County for prior police services, \$62,863 on new car leases, and had a significant amount of other outstanding bills. However, the full cost of fraud, illegal activities and poor management practices and the effect of unreliable accounting information cannot be measured solely in monetary terms. The failure to maintain adequate accountability can erode the public's confidence in the city's ability to efficiently and effectively manage its programs.

The findings presented in our report identify significant weaknesses in the system of internal controls and management that must be corrected to achieve the required level of accountability and more effectively use the city's resources. The related recommendations are directed at helping the city minimize the potential for fraud, waste, and abuse throughout its operations. Allowing such misuse of public funds as described within this report is an unacceptable lack of stewardship of public trust. The City Council must evaluate management practices to more efficiently use the resources available to the city and ensure an effective system of accounting and administrative controls are in place, including an effective financial reporting system and procedures to monitor budgeted and actual activity.

## HISTORY AND ORGANIZATION

# CITY OF WELLSTON, MISSOURI HISTORY AND ORGANIZATION

The city of Wellston was incorporated as a third-class city on June 6, 1949, and is located in north St. Louis County. The population in 1990 was 5,868. The city government consists of a mayor and a six-member City Council. The six members are elected for two-year terms, one from each of three wards each year. The mayor is elected for four years, presides over the City Council, and votes only in the case of a tie. The Mayor, City Council members, and other principal officials at June 30, 1999, were:

| <u>Elected Officials</u>       | <u>Term Expires</u> | Compensation<br>Paid for<br>the Year Ended<br><u>June 30, 1999</u> |
|--------------------------------|---------------------|--|
| Lawrence Brady, Mayor          | April 2001          | 29,393   |
| Frank McNeil, Councilman       | April 2001          | 6,900  |
| James Harvey, Councilman       | April 2000          | 6,900  |
| Donald Garner, Councilman      | April 2001          | 6,900  |
| Rico Ayuso, Councilman         | April 2000          | 6,900  |
| Gracie White, Councilwoman (1) | April 1999          | 6,900  |
| Ronnie Shepard, Councilman     | April 2000          | 6,900  |

## Other Principal Officials

|                                       |            |
|---------------------------------------|------------|
| LaShonda Howard, City Clerk (2)       | 5,463      |
| Rose Evans, Treasurer (3)             | 4,529      |
| Linda Whitfield, Police Chief (4)     | 25,997     |
| Thompson Coburn, L.L.P, City Attorney | 66,390 (5) |
| Jerilyn Hill, Municipal Judge         | 6,000      |
| Victor Thompson, Prosecuting Attorney | 6,000      |
| Rosie Edwards, Court Clerk            | 23,640     |
| Cynthia Brown, Bookkeeper             | 23,654     |

- (1) Frank Brown was elected to this position at a special election on August 3, 1999.
- (2) Billie Malone served as Acting City Clerk until her termination in April 1999. Lashonda Howard was appointed as City Clerk on April 8, 1999.
- (3) James T. Jefferson served as Treasurer until August 1998. Rose Evans was appointed as Treasurer on August 15, 1998.
- (4) Jornel Williams served as Police Chief until July 1998. Linda Whitfield was appointed as Police Chief on July 31, 1998.

(5) Past due payments for services rendered in prior years have been included in this amount.

The city also employs approximately 41 full-time and 3 part-time employees.

Assessed valuation and tax rate information are as follows:

| ASSESSED VALUATION | 1999          | 1998       |
|--------------------|---------------|------------|
| Real estate        | \$ 7,628,939  | 7,662,729  |
| Personal property  | 8,053,791     | 7,460,770  |
| Total              | \$ 15,682,730 | 15,123,499 |

| TAX RATES PER \$100 ASSESSED VALUATION |        |     |
|--|--------|-----|
| General Fund                           | \$ .60 | .60 |

The city also has the following sales taxes; rates are per \$1 of retail sales:

|                     | Rate  | Expiration<br>Date |
|---------------------|-------|--------------------|
| General             | \$.01 | None               |
| Capital Improvement | .005  | None               |

## MANAGEMENT ADVISORY REPORT

CITY OF WELLSTON, MISSOURI  
SUMMARY OF FINDINGS

1. Disbursement Procedures (pages 13-19)

Bids or proposals were not solicited or bid documentation was not retained for many purchases and the city did not obtain formal written agreements with companies or individuals providing services to the city. The City Council does not review invoices before approval of payment and supporting documentation was not adequate for some disbursements. The city purchased cellular phones and service for the personal benefit of some individuals, did not ensure all costs were reimbursed and did not establish policies over the use of the city's cellular phones.

2. Community Oriented Policing Services (COPS) Grant (pages 19-21)

The city's quarterly reports were not accurate and copies of some reports were not retained. During the period July 1997 through July 1999, the city over claimed approximately \$91,600 from the COPS grant due to various errors.

3. Senior Citizens Program (pages 21-23)

The city has taken over providing a lunch and transportation service to senior and disabled citizens, including persons outside city limits. During the two years ended June 30, 1999 and 1998, the city's net costs for this program were at least \$96,000 and \$81,000, respectively. It is unclear whether the city has the authority to provide the program or can afford it. Also, the city has not ensured that the fee charged to employees for meals obtained through the program is adequate or is always collected.

4. City Trash Service (pages 23-26)

The city has not identified all costs of this program to ensure the user fee is sufficient. The city has not taken adequate steps to ensure the timely collection of delinquent accounts and has not developed procedures to ensure all customers are billed. Controls and accounting records for trash service fees are not adequate.

5. Payroll and Personnel Policies and Procedures (pages 26-33)

The City Council established a benefits package for some elected officials which appears to violate the Missouri Constitution. Loans totaling approximately \$29,500, were made to some city officials and employees with unpaid balances totaling approximately \$6,700 as of June 30, 1999. The city does not have a formal written leave policy. The city failed to deposit federal payroll taxes timely, resulting in payment of penalties and interest totaling \$5,052. Some administrative employees were paid bonuses, and duties related to payroll are not adequately segregated. The city did not

properly pay or report all the wages and payroll taxes of one city employee when earned. City officials received raises during their term of office contrary to the Missouri Constitution.

6. Meetings, Minutes, Ordinances, and Records (pages 33-36)

The council meeting minutes are not signed by either the City Clerk or the Mayor, do not always adequately document matters discussed and actions taken, and are not maintained for closed meetings. The council minutes and the meeting agendas do not document the specific reasons for going into closed sessions, and "work sessions" held by the council are not open to the public, notice is not posted, and tentative agendas and minutes are not prepared. Improvement is needed in the organization and documentation of the city's ordinances. The city does not have a formal policy regarding public access to city records.

7. Budgets and Financial Reporting (pages 37-39)

The city's budget is not approved on a timely basis and is incomplete. The City Council does not periodically compare actual revenues and expenditures to the budgeted amounts and approved expenditures in excess of budgeted amounts during the year ended June 30, 1998. The city has not published semi-annual financial statements.

8. Restricted Funds (pages 39-40)

Capital improvement sales tax and motor vehicle-related monies are not accounted for properly.

9. Permits and Licenses (pages 41-42)

Some permits are not prenumbered and the city does not account for the numerical sequence of prenumbered licenses. In addition, the permit/license fee receipt slips are not reconciled to the number of each type of permit and license issued and the amount of fees deposited. The city assessed and collected incorrect license and permit fees and could not locate the stubs for manufacturer's licenses issued prior to March 1999.

10. Accounting Controls and Procedures (pages 42-48)

Monthly bank reconciliations are not prepared and balances are not maintained in the check registers. The city does not have an investment ledger to monitor certificate of deposit investments. Internal controls need to be improved for collections by the police department for vehicle releases, police reports, and bond fees. City receipt records are not reconciled to deposits, and numerous errors and omissions were noted during our review of the city's receipt and disbursement records. The city's petty cash fund is not maintained on an imprest basis. Bids were not obtained for the sale of city vehicles to city employees. Proper documentation was not maintained to show compliance with the city's contract with the Wellston Housing Authority.

11. Municipal Court Division (pages 49-57)

Bond monies totaling \$4,083 were received by the police department but not deposited into the city treasury. Neither the police department nor the court maintains adequate records to account for tickets assigned and issued, and the ultimate disposition. The amounts disbursed to the state for the Crime Victims Compensation fund and the Peace Officer Standards and Training Commission fees were not accurate. The Court Clerk could not locate some court cases requested for review and does not forward required records of convictions on traffic offenses to the Missouri State Highway Patrol. Also, the final disposition of each case is not always adequately documented on the court docket.

CITY OF WELLSTON, MISSOURI  
MANAGEMENT ADVISORY REPORT

|           |                                |
|-----------|--------------------------------|
| <b>1.</b> | <b>Disbursement Procedures</b> |
|-----------|--------------------------------|

- A. The city's purchasing ordinance requires advertising for sealed competitive bids for all purchases of goods and services in an amount of \$1,000 or more. However, we noted bids or proposals were not solicited, or bid documentation was not retained, for many purchases. Following are some examples:

|                           |           |
|---------------------------|-----------|
| Air conditioner units     | \$110,758 |
| Car leases                | 94,294    |
| Construction              | 82,580    |
| Used police vehicles      | 42,000    |
| Food and supplies         | 49,203    |
| Tipping fees              | 38,090    |
| Trucks                    | 29,230    |
| Uniform service           | 8,764     |
| Playground material       | 6,959     |
| Carnival                  | 6,500     |
| Computer upgrades         | 6,490     |
| Engineering services      | 6,079     |
| Vehicle repair            | 6,088     |
| Clearing trees and debris | 4,205     |
| Computer purchases        | 4,140     |

While the Mayor indicated the lease purchase of the cars had been bid, no documentation could be located. Competitive bidding helps ensure the city receives fair value by contracting with the lowest and best bidders. Bidding helps ensure all parties are given an equal opportunity to participate in the city's business. In addition, complete documentation should be maintained of all bids received. If other than the lowest bid is selected, the reasons should be adequately documented.

This condition was also noted in our prior report.

- B. The city does not always obtain formal written agreements with companies or individuals providing services to the city. We noted the following examples of amounts paid during the period July 1997 through June 1999 for which there were no written agreements:

|                           |           |
|---------------------------|-----------|
| Accounting services       | \$ 22,000 |
| Legal services            | 14,236    |
| Uniform service           | 8,764     |
| Engineering services      | 6,079     |
| Clearing trees and debris | 4,205     |

Written contracts establish payment terms, clarify responsibilities and expectations of both parties, and help ensure the city receives the services it needs. Section 432.070, RSMo 1994, requires all contracts to be in writing. In addition, the city should compare invoices to contract terms to provide assurance the city is paying the appropriate amounts for services.

A similar condition was noted in our prior report.

- C. The City Council does not review invoices before approval of payment nor have they assigned someone independent of the check preparation and signing process to review the invoices. Although the Mayor and Treasurer review the invoices, they are also authorized to sign checks. In addition, there is no independent reconciliation of the invoices, approved listing of bills, and actual checks written.

Currently, a listing of accounts payable is presented to the council and approved, unless a specific invoice is questioned and reviewed. In addition, the council approves the monthly treasurer's report which reflects disbursements for the month. While the approval of the accounts payable list and treasurer's report is noted in the council minutes, the total dollar amount approved is not noted, nor are the listings conspicuously marked as approved by the council. We noted several disbursements which did not appear on the approved listing of accounts payable. In addition, transfers between accounts are not reflected on the listing presented to the council, nor are they always reflected on the monthly treasurer's report.

Good business practices require all disbursements to be closely scrutinized by the council or someone independent of the disbursement process and properly authorized. Failure to properly review all invoices and other supporting documentation, and to document authorization, increases the possibility of inappropriate disbursements occurring.

This condition was also noted in our prior report.

- D. During our review of disbursements, the following concerns were noted:

- 1) Documentation to support some disbursements was either inadequate or not available. Examples include the purchase of a dump truck (\$6,000), purchase of three used police cars (\$35,500), radio repairs (\$2,388), playground materials (\$6,959), and numerous reimbursements and cash advances to city officials,

employees, and other individuals for purchases or travel made on behalf of the city (\$6,320).

- 2) The bookkeeper often pays bills from monthly statements rather than detailed invoices. The city overpaid vendors in several instances because invoices were shown on more than one monthly statement. The city was apparently behind on its payments so, the vendors had listed the unpaid invoices again or had reflected the unpaid balance; however, the city paid the total of the two statements rather than the current balance. The vendors gave the city credit for these overpayments on the next monthly statement received.
- 3) The city has eight credit cards that are used primarily for city-related travel expenses and to order supplies by phone. Supporting documentation was either not submitted or not retained for several charges. In some instances, the person who charged the item had the supporting documentation rather than the City Bookkeeper who pays the bills.

Adequate supporting documentation should be retained for all credit card purchases and reconciled to credit card statements to ensure the propriety of the charges. Without adequate supporting documentation, the city cannot evaluate the necessity and reasonableness of credit card purchases.

All disbursements should be supported by detailed expense accounts, paid receipts, contracts, or vendor-provided invoices to ensure the obligations were actually incurred and the disbursements represent appropriate uses of public funds.

Similar conditions were noted in our prior report.

- E. Receipt of goods or services is not always indicated on the invoice prior to an expenditure being approved for payment. The documentation of the receipt of goods or services is necessary to ensure the city actually received the items or services being paid.

This condition was noted in our prior report.

- F. The city purchased fifteen cellular phones, some of which were to be used as city phones, and some of which were resold to city employees and another individual to be used as personal phones. The purchase price and phone bills for the personal phones initially are paid by the city and then reimbursed through payroll deduction for the employees, and through payments from the individual. Phone service is discontinued when employees leave city employment.

- 1) The purchase of the personal phones and service does not appear to be a necessary, proper, or prudent use of city monies. These purchases directly

benefited the employees and the individual but not the city, and additional bookkeeping was required. In addition, the city used its sales tax exempt status to benefit individuals.

Article VI, Section 23 of the Missouri Constitution provides that no political subdivision of the state shall lend its credit or grant public money or anything of value to or in aid of any corporation, association, or individual. In addition, the city should not allow such expenditures to be incurred using its sales tax-exempt status. Doing so violates the terms of the city's sales tax exemption letter.

- 2) The city is not billing the employees and the individual for the total cost of the personal phone service. The City Bookkeeper failed to properly charge each person for the total of their air time charges plus the basic monthly plan cost. For example, in May 1999, the city did not receive reimbursement for approximately \$232 for employees' personal phone bills.

In addition, the city has not received full reimbursement from the individual. At June 30, 1999, approximately \$2,100 in past due bills was owed to the city by this individual.

- 3) The city provides cellular phone service to the Mayor, the Police Chief, the police captain, the police shift supervisor, and the Parks and Recreation Department. The city does not have a formal policy regarding cellular phone usage. Cellular phone charges for May 1999 ranged from \$54 to \$530 for each of the city's five cellular phones.

Because of the significant cost of cellular phone service, the City Council should review the usage of the city's cellular phones to determine whether the city is receiving sufficient benefit for its cost. If the cellular phones are deemed necessary, a policy is needed to ensure that cellular phones are used only for reasonable business purposes. Such a policy should address which employees need a cellular phone, proper use of the phone, and a reimbursement policy if the council authorizes the phone to be used for personal matters. Procedures should be implemented to monitor cellular phone usage and review invoices for propriety.

**WE RECOMMEND** the City Council:

- A. Ensure bids are solicited for all applicable purchases in accordance with city ordinance. Documentation of the bidding process should be maintained in all cases. If the city believes that it is not practical to obtain bids on certain purchases, documentation explaining why bids were not obtained should be maintained.

- B. Obtain written agreements specifying terms of payment and the responsibilities of both parties for all services received. In addition, the council should ensure invoices are compared to contract terms.
- C. Ensure detailed and complete listings of bills are prepared, that the council's approval is reflected on the listing, and that the listing is retained. In addition, either the council or someone independent of the check preparation and signing process should review the invoices. Approved listings of bills should also be compared to checks written.
- D. Ensure all disbursements are supported by paid receipts and/or vendor-provided invoices which contain an adequate description of the goods and services received. All cash advances should be properly accounted for and the unused balances, if any, should be promptly returned to the city. In addition, the city needs to develop procedures to ensure invoices are not paid twice.
- E. Ensure the receipt of goods or services is indicated on invoices prior to being approved for payment.
- F.1. Cease paying for personal phone service and refrain from purchasing items for the personal use of individuals and employees.
  - 2. Ensure the entire cost of personal phone service is billed and seek reimbursement for the unpaid phone bills.
  - 3. Determine whether the cellular phones are cost beneficial. If the city continues to pay for the phone usage, develop a policy regarding the use of cellular phones including an assessment of which employees need a cellular phone and procedures to monitor their use.

#### **AUDITEE'S RESPONSE**

- A. *The City Council has determined to investigate enacting modifications to its current bidding requirements in order to modernize its procurement process. In any event, the City Council has directed the Mayor, the City Clerk and other appropriate officials and employees to implement internal control systems to verify and ensure that bids are solicited for all applicable purchases in accordance with all applicable requirements. The City Council has also determined to direct the Mayor, the City Clerk and other appropriate officials and employees to anticipate the city's needs in various categories of goods and services in a given fiscal year. If such needs in the aggregate are greater than a certain dollar value, the City Council has directed that the city conduct a solicitation process to meet its annual needs. In addition, the city has recently upgraded its staff, which will position the city to maintain full documentation of its contracting matters. The City Council has established a committee to oversee this activity.*

- B. *The City Council has directed the Mayor, the City Clerk and other appropriate officials and employees to implement procedures that will verify and ensure that the city obtains and maintains written agreement specifying the terms of payment and the responsibilities of both parties for all goods and services received by the city. In addition, the City Council has determined that the Treasurer of the city (or a designee of the Treasurer acceptable to the City Council) and the members of a City Council committee will compare actual invoices to the terms of the contract to verify and ensure that the provisions of the contract have been adhered to by the parties to the contract. Furthermore, expenditures associated with each contract will be compared to the city's annual budget. Recent staff upgrades will assist the city in meeting its goals and obligations.*
- C. *The City Council has directed the Mayor, the Treasurer, the Bookkeeper and other appropriate officials and employees to prepare and/or collect (1) a detailed and complete listing of all receipts and/or vendor-provided invoices containing adequate descriptions of goods and services received by the city; (2) a copy of each invoice; and (3) a copy of each check written by the city to pay such invoice. The City Council has directed that all such documents be submitted to the City Council in advance of meetings of the City Council, together with a certificate of the Treasurer, stating that the copies being submitted to the City Council conform to the originals. The members of the City Council will review all of these items in advance of any approval of any expenditures. In addition, members of a City Council committee will periodically inspect the originals of these documents to verify and ensure that the original documents conform to the copies submitted to the City Council.*
- D. *As discussed in the response to MAR No. 1(C), receipts and/or vendor-provided invoices containing adequate descriptions of goods and services received by the city will be required by the City Council prior to any approval of any payment to such vendors. In addition, cash advances will be subject to the prior approval of the City Council, and are required to be properly accounted for with any unused balances promptly returned to the city. The City Council has also directed its staff to implement procedures and install necessary computer software enhancements that will verify and ensure that no invoice is paid twice. The members of a City Council committee will monitor this activity.*
- E. *With the exception of certain limited circumstances such as retainers or down payments, the City Council has directed the Mayor, the Treasurer, the Bookkeeper and other appropriate officials and employees to implement procedures ensuring that the receipt of goods or services is indicated on invoices prior to submitting such invoices for goods or services to the City Council for payment approval. Members of a City Council committee will monitor this activity.*
- F.1. *The City Council has directed that the city discontinue paying for personal phone service and purchasing items for personal use by individuals and employees. The members of a City Council committee will monitor this activity.*

2. *The city has already implemented billing procedures to verify and ensure that the entire cost of personal phone service is billed to the individual receiving the phone service, rather than to the city and to receive reimbursement for unpaid phone bills from individual users. The City Council intends to cause the city to vigorously seek such reimbursement and intends to seek appropriate legal proceedings in the event that the individuals do not make prompt settlement with the city. The members of a City Council committee will monitor this activity.*
3. *The City Council has directed the Mayor and staff to conduct a cost-benefit analysis of the use of cellular phones by officials and employees of the city at the expense of the city. In the event that this study concludes that the continued use of cellular phones by certain city officials and employees is in the best interest of the city, the City Council has further directed the Mayor and staff to design detailed and official policies regarding the use of cellular phones, including an assessment of which employees and/or officials require a cellular phone and procedures to monitor the use of the phones. Such policies will be submitted to the City Council for its approval. In any event, the members of a City Council committee will monitor this activity.*

## **2. Community Oriented Policing Services (COPS) Grant**

The city receives federal financial assistance from the U. S. Department of Justice under the COPS Universal Hiring program to increase the number of law enforcement officers. In December 1995, the city received a grant award of \$991,293 to hire fifteen additional full-time officers to supplement the six city-funded officers already employed at that time. Under the grant provisions, the city was required to provide 25 percent of the cost of employing the additional officers until the grant expired on November 30, 1998 as well as continuing to pay the entire cost of the six city-funded officers already on staff. The city has received an extension of the grant until November 30, 2001.

A. The Police Department receives a payroll listing from the City Bookkeeper each month which lists the wages paid each police officer for each pay period. The Police Department uses the amounts shown on these listings to prepare their reimbursement request. During our review of various reimbursement requests, we noted the following problems:

- 1) During the period July 1997 through July 1999, individual salaries claimed for some officers exceeded the maximum salary allowable by the COPS program. Also, from July 1997 through June 1998, the city occasionally claimed salaries for more than the fifteen officers allowed by the COPS program. In addition, from July 1998 through July 1999, the city filed claims and received reimbursement based on 75 percent of the total amount paid to all officers employed by the city instead of just the additional grant-funded officers.

The city incorrectly received at least \$131,908 for reimbursement of these excess, unallowable salaries.

- 2) During the period July 1998 through July 1999, the city did not include the fringe benefits paid to the qualifying officers on the reimbursement requests. The city claimed only the annual salaries paid to the officers although the approved budget allows reimbursement the city's share of FICA, health insurance, life insurance, worker's compensation insurance, and unemployment insurance. In addition, prior to July 1998, the city claimed reimbursement for the employee's share of some items rather than the city's share as allowed. Based on the fringe benefits allowed per the approved grant budget, the city could have apparently claimed approximately an additional \$46,121 for fringe benefits between July 1, 1997 and July 30, 1999.
- 3) Payroll listings prepared by the City Bookkeeper were not accurate and included costs which are not allowable under the COPS program. In addition, there were errors in amounts recorded on the payroll listings, amounts included for officers who were not paid for that pay period, and amounts paid for officers which were not recorded. Compensation for overtime was included on the payroll listings and claimed for reimbursement which is not an allowable cost of the program. The city incorrectly overclaimed approximately \$5,775 due to these various errors.

The city should recalculate and correct prior reimbursement claims. It appears the city has over claimed approximately \$91,562 during the period July 1997 through July 1999.

The city hired a certified public accounting (CPA) firm to review the COPS program for the period November 1995 through June 1997. The CPA's report indicated the city had under billed the COPS grant during that period, claiming more than the maximum salaries allowable but failing to bill for fringe benefits. The city did file an amended claim and receive the prior amount noted as under billed by the CPA report, but has not improved its procedures in filing claims.

- B. The grant requires the city to submit quarterly reports detailing the monies spent and the breakdown between amounts paid with federal funds and local funds. The city's quarterly report for the period ended September 30, 1998 indicated the total accumulated federal share of outlays was \$385,596. The city had actually claimed and received approximately \$375,600 in federal reimbursements as of that date. In addition, copies of quarterly reports prepared since September 1998, were not maintained by the city.

The city should prepare complete and accurate records of all allowable salary and fringe benefit expenses and prepare and retain accurate quarterly financial status reports. The city should request reimbursement for only actual and allowable expenses incurred, less the required amount of

matching funds, in accordance with the grant agreement. The City Council should contact the applicable federal grantor agency to resolve these issues.

**WE RECOMMEND** the City Council ensure city personnel prepare and retain accurate quarterly financial reports for the COPS grant, and ensure reimbursement is requested only for allowable actual expenditures. The city should recalculate and correct prior reimbursement claims and repay any excess reimbursements.

### **AUDITEE'S RESPONSE**

*The City Council has directed the Mayor, the Treasurer, the Chief of Police, the Bookkeeper and other appropriate officials and employees to (1) prepare accurate quarterly financial reports for the COPS grant; (2) verify and ensure that reimbursement is requested only for allowable actual expenditures under the COPS program; (3) recalculate and correct prior reimbursement claims and repay any excess reimbursements; and (4) identify sources of funds if repayment is required. This process will be enhanced by the involvement of the outside independent public accountant that the city intends to retain to assist with its accounting control procedures. The City Council has instructed the Mayor, the City Clerk and other appropriate officials and employees to solicit bids for auditing services for the city. The requested services will include providing assistance to the city in responding to the City Council's directives described in this audit. Members of a City Council committee will monitor this activity.*

**3.**

#### **Senior Citizens Program**

The city's Parks and Recreation Department operates a program which provides lunch and transportation services to senior and disabled citizens of Wellston and surrounding cities. The city provides transportation to the community center where lunch is served, delivers home meals to eligible persons who cannot come into the community center, and provides transportation to shopping malls, doctors' offices, etc. The city receives some small reimbursement from the Missouri Department of Transportation for transporting the citizens. However, during the years ended June 30, 1999 and 1998, the city's net costs for this program were at least \$96,000 and \$81,000, respectively. These costs include the purchase of food and supplies, the city's portion of the purchase of a van, and estimated payroll costs for Parks and Recreation Department employees who work on the program. The city has not identified other costs related to this program, such as gasoline and vehicle maintenance, administrative overhead, and community center operating costs.

- A. Prior to July 1997, this program was handled by the Mid-East Council of Aging (MECA). The MECA rented the community center from the city of Wellston and provided the meals for the citizens. In addition, the MECA paid the city of Wellston to transport citizens from Wellston and surrounding cities to their program. In July 1997, the former mayor refused to allow MECA to continue operation of this program at the city's community center, and

the city took over this program. There was no documentation available to indicate the City Council reviewed the costs of this program prior to taking it over from the MECA. In addition, the city is still serving basically the same geographical area the MECA program covered, although some of the participants are from outside the city limits. The surrounding cities do not contribute to this program although their citizens participate.

Participation in this program is not conditioned on financial need. The city's authority or the municipal purpose to sponsor such a program has not been researched and documented. This program does not appear to be a necessary cost of operating the city and constitutes a questionable use of public funds. The city's residents have placed a fiduciary trust in their public officials to expend tax revenues and fees in a necessary and prudent manner.

- B. City employees are allowed to eat lunch through this program at a cost of \$2 per meal. While the program supervisor indicated some employees eat each day, records of the number of employees eating meals are not maintained. The City Bookkeeper, who is to receive these payments, does not maintain records of amounts paid by the employees; thus, the city cannot be assured all employees pay for their meals. The City Bookkeeper indicated city employees had not paid her anything recently. Also, there is no documentation that the city has reviewed this program to ensure the \$2 fee is adequate to recover its costs.

In addition, while the city recommends a \$.75 donation from citizens to obtain a meal, the supervisor indicated they had not received any donations since the city took over this program. However, the city's records are inadequate to verify this. To provide assurance all monies are properly collected, recorded, and deposited, the city should develop appropriate records and perform a reconciliation between the number of participants making donations and the amount collected.

**WE RECOMMEND** the City Council:

- A. Review the senior citizens program to ensure expenditures are within the city's authority and necessary to properly operate the city. In addition, the City Council should evaluate the benefits of this program to ensure the city can afford to provide this service. If continued, the City Council should consider limiting this program to Wellston residents or approaching the surrounding cities for contributions to the program and condition participation in the program on financial need.
- B. Require adequate records be maintained to ensure monies collected for meals are properly handled and recorded, and that employees pay for the meals eaten. In addition, the city should review the costs of this program to ensure the \$2 fee is adequate to recover the city's costs.

## **AUDITEE'S RESPONSE**

- A. *The City Council has directed the Mayor and staff to expand upon current efforts on the part of the city to restructure the senior citizens' program. To date, the city has been unsuccessful in re-securing a contractual arrangement with Mid-East Council for Aging to administer the senior citizens' program at no expense to the city. The restructuring efforts include investigating the following alternatives: (1) bussing the seniors to a near-by facility to obtain necessary services and discontinuing providing such services in the city; (2) requiring the demonstration of financial need from all seniors who participate in the program as a precondition to using the services provided by the city; (3) contracting with an outside vendor to provide the services at the city; and/or (4) seeking payments from neighboring communities whose citizens participate in the program at the city. Members of a City Council committee will monitor the city's progress in this area.*
- B. *The City Council has directed the Mayor and staff to prepare and maintain adequate records to verify and ensure that all monies collected for senior citizens' meals are properly handled and recorded, and that employees pay for all meals eaten. Such records will include the maintenance of an employee log book to document the use by employees of the lunch program. In addition, the City Council has directed the Mayor and staff to review the costs of this program to verify and ensure the \$2 fee currently paid by participating employees is adequate to recover the city's actual costs and to make a recommendation to the City Council based upon this review. The independent certified public accountant that the city expects to retain will provide assistance to the city in connection with this activity (see the response to MAR No. 2 for more details on the role of the accountant).*

**4.**

### **City Trash Service**

The city provides trash service to approximately 500 customers. The city contracted out this service prior to July 1997, when they began operating the service themselves.

- A. The city charges residents a quarterly fee of \$21 for trash service. The city has purchased a trash truck and utilizes city personnel to provide trash collection services. In addition, the city pays fees to dispose of the trash collected. During the years ended June 30, 1999 and 1998, the city collected approximately \$24,000 and \$37,000, respectively, in trash fees and incurred costs of at least \$60,000 and \$44,000, respectively for the purchase of a truck, estimated salary costs, and fees to dispose of the trash. The city has not identified any other costs, such as administrative costs, related to trash service. In addition, trash service fees are deposited into the city's general account and there is no separate accounting for trash service expenditures. Trash service revenues represent user fees which should be established to cover the cost of providing trash service.

The costs of providing this service should be calculated and documented and a separate accounting of trash revenues and expenses should be maintained. In addition, the city should evaluate the current financial condition of the city, the costs to the city for this program and the amount of General Fund subsidies required, and determine if rates need to be raised or whether the city can afford to subsidize this service to residents.

- B. The city has not taken adequate steps to ensure the timely collection of delinquent accounts. According to city personnel, numerous customers had delinquent trash bills at June 30, 1999. The former City Clerk indicated some customers had been delinquent for more than a year.

The City Council has not adopted a formal policy regarding delinquent trash charges. Also, the city has not established procedures to compare customers receiving trash service to billing records to ensure all customers are billed. City personnel indicated some customers had apparently been deleted from the billing files and not billed even though they were still receiving trash service.

The city needs to take action to improve its collection of delinquent trash accounts, including passing ordinances to establish delinquent penalties and comparing customers receiving trash service to customers billed. By not adequately pursuing delinquent trash accounts and billing all customers, revenues are lost for the city.

- C. The City Clerk's office handles billing and collecting the trash fees. A prenumbered receipt slip is issued for all payments. The City Clerk posts payments to a manual trash ledger and to a computerized billing system.

- 1) The City Clerk is responsible for preparing the trash bills, collecting the payments, and maintaining a trash ledger to document this activity. No independent review or oversight is performed over these duties.

An independent review of the trash records should be performed periodically to ensure the billing and collection functions are handled appropriately.

- 2) Monthly reconciliations of total trash billings, payments received, and unpaid amounts are not performed.

Monthly reconciliations are necessary to ensure that all accounting records balance, transactions have been properly recorded, and errors or discrepancies are detected on a timely basis. Complete documentation of the reconciliation should be retained to support any corrections made and to facilitate independent reviews.

- 3) The trash records maintained by the City Clerk are not adequate. The City Clerk records payments to the manual trash ledger and the computerized billing system. The manual trash ledger shows payments only, while the computerized billing system shows the amounts billed and paid in the current quarter only. The city does not maintain records which show a history of amounts billed. In addition, there were numerous errors in the manual trash ledger and the computerized system. The trash records were so poor, the actual amount of delinquencies could not be determined.

The City Council should develop improved trash records to allow month-end trash fee receivable balances to be reconciled to the beginning accounts receivable balance, billings, collections and other adjustments for the month.

To safeguard against possible loss or misuse of funds, internal controls should provide reasonable assurance that all transactions are accounted for properly and assets are adequately safeguarded. Internal controls would be improved by segregating the duties of receipting and depositing monies from that of preparing bills, recording payments, and following up on delinquent accounts. If a proper segregation of duties cannot be achieved, at a minimum, there should be an independent review of the reconciliations between trash payments recorded and deposited, and an independent review and approval of delinquent account follow-up. In addition, adequately detailed trash records should be maintained and all activity should be recorded promptly and accurately.

**WE RECOMMEND** the City Council:

- A. Identify all costs, including administrative costs and other labor, of providing trash service, and consider setting the user fee to cover the cost of the service. In addition, the council should maintain a separate accounting of all trash revenues and expenses.
- B. Adopt a formal policy regarding collection of delinquent trash bills including establishing delinquent charges and ensure all customers receiving trash service are properly billed.
- C. Develop improved trash records, ensure all records are accurately posted, and ensure beginning and ending accounts receivables balances are reconciled on a monthly basis using the billings, collections and billing adjustments during that month. Any differences which cannot be accounted for should be immediately investigated. In addition, the City Council should ensure an independent review of the utility billing and collection functions and related records is performed periodically.

**AUDITEE'S RESPONSE**

- A. *The city has directed the Mayor and staff to identify all costs, including, without limitation, administrative and labor costs of providing trash service to residents of the city. Based upon the information that the City Council obtains from this study, the City Council will consider*

*establishing an appropriate user fee to cover the cost of the service. In the alternative, the City Council has directed the Mayor to issue a request for proposals to trash companies for purposes of determining if it would be in the best interest of the citizens of the city for the city to employ the services of a third-party vendor to provide for trash collection. In addition, the City Council has directed the Mayor, the Treasurer and the Bookkeeper to maintain a separate accounting of all trash revenues and expenses and to report the same to the City Council for its review and approval in connection with all future reports of the Treasurer. This process will be enhanced by the involvement of the outside independent public accountant that the city intends to retain to assist with its accounting control procedures (see the response to MAR No. 2 for more details on the role of the accountant).*

- B. The City Council has directed the City Clerk to formalize the city's delinquent trash collection policies and to submit the same to the City Council in written form for its approval. The City Council has also instructed the City Clerk to verify and ensure that all customers receiving trash services are properly billed, and that the Treasurer and the members of a City Council committee monitor the City Clerk's collection and billing efforts. Recent personnel upgrades in the office of the City Clerk will assist the city in its efforts. This process will also be enhanced by the involvement of the outside independent public accountant that the city intends to retain to assist with its accounting control procedures (see the response to MAR No. 2 for more details on the role of the accountant).*
- C. The City Council has instructed the City Clerk to develop improved trash services records, verify and ensure that all records are accurately posted, and verify and ensure that the beginning and ending accounts receivable balances are reconciled on a monthly basis and take into account the billings, collections and billing adjustments during that month. The City Council has further directed the City Clerk immediately to investigate any unaccounted for variances. In addition, the City Council has assigned to the Treasurer the responsibility of independently reviewing the utility billing and collection functions and related records on a periodic basis. The members of a City Council committee will also independently review the trash collection system. This process will be enhanced by the involvement of the outside independent public accountant that the city intends to retain to assist with its accounting control procedures (see the response to MAR No. 2 for more details on the role of the accountant).*

|   |
|---|
| <b>5. Payroll and Personnel Policies and Procedures</b> |
|---|

- A. On August 26, 1997, the City Council established a benefits package for the mayor, treasurer, and the council members. The council transferred \$80,000 from city funds to a certificate of deposit to pay for future benefits. The benefit package has a death benefit and a severance benefit. The death benefit pays \$10,000 to the beneficiary of a city official who dies while holding office. The severance benefit pays \$10,000 to city officials having been an official for a period of at least 10 continuous years who cease to be a city

official for any reason other than death or cause. The ordinance does not define the term "for cause".

There was no documentation that the council had planned for or defined such issues as the sources of the required future funding, a projection of the timing of potential payments, or whether the amount currently set aside was adequate or excessive based on length of service of the current officials. In addition, the city ordinance does not address the issue of whether the officials in office when the ordinance was passed would be eligible to participate in this new benefit. However, as of June 1999, the city had made a payment of \$10,000 to former Mayor Robert Powell, and a payment of \$10,000 to former councilwoman Helen Robinson, who resigned after serving the city for more than the required ten years. The Mayor indicated there were only two additional city officials who could qualify for payments in the near future. The city does not maintain documentation of the number of years the various city officials have served the city.

Parts of the benefit package look like a retirement plan, which the city is prohibited from establishing by state law. However, the most significant problem appears to be the increase in compensation or benefits during the term for which an officer is elected or appointed, which is prohibited by Article VII, Section 13, of the Missouri Constitution. Retroactive compensation for services previously rendered is in violation of Article III, Section 39 of the Missouri Constitution. If the city determines the package is allowed by state law and elects to continue the package for future terms and years of service, it should ensure the city can fund such a package, by clearly documenting the sources and projected amounts of required future funding. In addition, the City Council should review the payment made from the benefit package to the former Mayor. While city records are not clear on this matter, it appears the city had begun, and later rescinded, actions to impeach the former Mayor and reassign his mayoral duties. There also was apparently some related litigation between the city and the former Mayor, who then resigned. These circumstances would appear to be for "cause" and thus a possible exception per the city ordinance.

- B. During the period October 1995 through April 1998, loans were made to some city officials and employees totaling approximately \$29,500. City personnel indicated the former mayor allowed individuals to obtain the loans and repay the city through payroll deductions. The employees were required to sign a contract indicating that they would continue to make these payments if they left city employment; however, there are several past and current employees with unpaid balances totaling approximately \$6,700 as of June 30, 1999. In addition, the city did not appear to attempt to withhold any unpaid balance from the five former employees' final paycheck. It would appear these payments are in fact interest free loans to employees. These loans were sometimes used to purchase vehicles from the city (see MAR 10. G.).

Also, since June 1999 the Mayor received his payroll checks from two to six weeks in advance of the dates earned.

Such payments would appear to violate Article VI, Section 23 of the Missouri Constitution which prohibits any political subdivision of the state from granting or lending money to an individual. In addition, it is not prudent for a city to compensate officials or employees in advance. Doing so could result in the city paying an individual for services not performed.

- C. The city did not properly pay or report all the wages and related payroll taxes of the city's environmentalist when earned. During the year ended December 31, 1998, the environmentalist earned approximately \$19,308; however, he was paid only \$14,187 of that total during that year. The remaining \$5,121 and related payroll taxes was paid in January, February and March 1999, along with his regular salary for those months. Likewise, through November 1, 1999 this employee had earned approximately \$17,925 for calendar year 1999, but had been paid only \$11,950 of that amount. It appears the city planned to again pay the balance during calendar year 2000. City officials and the employee indicated the pay was held until the following year so the employee's earnings would not exceed the maximum amount allowed before affecting the social security benefits he was receiving.

Besides manipulating the employee's allowable social security benefits, these actions may also have income tax implications. The city should pay and report all employee wages and payroll taxes through its normal payroll process when earned.

- D. The city does not have a formal written policy for overtime and compensatory time or vacation and sick leave. In addition, no leave records are maintained for the police department. While the City Bookkeeper keeps a listing of vacation, sick leave, and compensatory time earned, taken, and accumulated for all other employees, these record are not accurate. Entries on the listings did not always agree to payroll records documenting payment for vacation or compensatory time. As a result, the former City Clerk was compensated for forty hours of vacation leave when she was terminated for which she had already received payment and the City Bookkeeper has been compensated for more leave than she has accumulated.

Formal written policies should be established to ensure employees adhere to the intent of the council and to avoid any misunderstandings. In addition, accurate documentation of vacation, sick leave, and compensatory time earned, taken, and accumulated is necessary to ensure employees are properly compensated for accumulated leave and to ensure leave time used is not in excess of time accumulated.

A similar condition was noted in our prior report.

- E. The city failed to deposit federal payroll taxes timely and was assessed penalties and interest. During the period July 1, 1997 to June 30, 1999 three payments of penalties and interest were made totaling \$5,052. Timely deposits of tax withholdings are required by law and would prevent unnecessary penalty and interest charges.
- F. Sixteen administrative employees were each paid \$50 as Christmas bonuses in December 1997. In addition, on October 20, 1997, the city paid \$2,600 to the former Mayor. The City Bookkeeper indicated she was told to pay the former Mayor for several months at the beginning of his term which he had served with no pay. There is no documentation to support the propriety of this payment.

The bonuses and the payment to the former Mayor appear to represent additional compensation for services previously rendered and violate Article III, Section 39 of the Missouri Constitution. Attorney General's Opinion No. 72, 1955 to Pray, states ". . . a government agency deriving its power and authority from the Constitution and laws of the state would be prohibited from granting extra compensation in the form of bonuses to public officers after the service has been rendered."

- G. Duties related to payroll are not adequately segregated and are not reviewed by someone independent of the payroll process. The City Bookkeeper performs all payroll calculations, maintains the payroll register, prepares the payroll checks, prepares tax reports, and generates W-2 forms for employees. We noted the following additional concerns:

- 1) The 1998 W-2's did not appear to be correct for eight of the sixteen employees reviewed. The City Bookkeeper's W-2 reflected approximately \$5,000 less than her actual gross salary for the year. The City Bookkeeper indicated these errors were partially due to their use of three different payroll systems in 1998, and problems with their current payroll system. The Bookkeeper generates manual checks occasionally due to problems with the computerized payroll system. It appears these manual checks were not properly reflected on the W-2 forms.
- 2) The payroll registers are not accurate. The city utilized three payroll systems between July 1, 1997 and June 30, 1999. Until June 1998, payroll was done manually by the City Bookkeeper. The city then used an outside payroll service from June 1998 through September 1998 and in October 1998 the city began using a payroll software package.

The payroll registers prepared by the City Bookkeeper under both the manual and current computerized payroll systems did not include some checks written and included some incorrect information as compared to the actual checks generated.

In addition, the employee's share of the social security tax was calculated incorrectly for the City Bookkeeper and the former City Clerk under the manual payroll system and the City Bookkeeper's social security withholding was calculated at \$20 less than required each pay period by the current computerized payroll program.

- 3) Payroll deductions were discontinued prior to the repayment of the City Bookkeeper's loan. In April 1997, the City Bookkeeper received a loan of \$2,000. Payroll deductions to repay this loan ceased after November 1997 although there remained an outstanding balance of \$875. In addition, the City Bookkeeper received additional loans of \$250 and \$500 on April 15, 1998 and April 1, 1998, respectively. Deductions of \$375 were taken in the next pay periods but no further deductions were made. Therefore, it appears the Bookkeeper owes approximately \$1,250 to the city for past loans.

Payroll calculations should be reviewed periodically by someone independent of the payroll process to ensure amounts paid are correct and in accordance with approved salary or hourly rates. This review could be performed by the Mayor, a city council member, or the City Clerk. In addition, the city should file amended W-2 forms for 1998 which reflect the actual salaries and withholdings for individuals, and ensure the City Bookkeeper repays the remaining amount due on her loans.

- H. Some city officials improperly received raises within their term of office. The Mayor and the City Council begin their terms of office in April of the year following their election. City ordinances establish the term of office for the City Clerk as one year, and the Treasurer and Police Chief as two years; however, these ordinances do not clearly indicate when the terms begin. In July 1999, with approval of the fiscal year 2000 budget, various city officials and employees received pay raises.

The City Bookkeeper prepared a preliminary proposed budget document for the Council to consider during the budget process. Salaries for elected and appointed officials were shown as a salary range and salaries for other city employees were not reflected individually. Through the budget hearing process, the Council apparently decided to grant various raises, some of which were in excess of the ranges shown on the preliminary budget document. City Council members indicated they had approved increasing their salaries from \$575 to \$625 per month, the Mayor's salary from \$2,261 to \$2,500 per month, and the Treasurer's salary from \$450 to \$500 per month. The City Bookkeeper indicated the Council also voted to increase the City Clerk's salary \$.50 per hour, and the Police Chief's salary \$1 per hour. However, these raises approved by the Council were not documented. No final budget document incorporating changes approved by the Council was prepared and signed, the ordinance adopting the budget did not specifically address the amounts approved, nor did the minutes of the budget hearings include documentation of the specific raises discussed and approved. In addition, since July 1999,

the Mayor has actually been receiving \$3,000 per month, which is \$500 per month more than the raise the Council members said they approved.

Article VII, Section 13 of the Missouri Constitution states that compensation to municipal officers shall not be increased during a term of office. In addition, Section 79.270, RSMo 1994, states the city council shall fix the compensation of all city officials and employees by ordinance, but the salary of an official shall not be changed during the term for which he was elected or appointed. Compensation rates set by ordinance, in addition to meeting statutory requirements, document the approved amounts to be paid and reduce potential misunderstandings regarding the amount of pay each elected and appointed city official and employee is to receive.

**WE RECOMMEND** the City Council:

- A. Review this situation with legal counsel and take appropriate action.
- B. Discontinue the practice of paying officials or employees in advance.
- C. Ensure all employee wages and payroll taxes are paid and reported when earned. In addition, the city should consult with the City Attorney, and ensure the total amount earned each year is reported to the Social Security Administration and the Internal Revenue Service.
- D. Establish formal written policies for overtime and compensatory time and vacation, holiday, and sick leave. Records of vacation, sick leave, and compensatory time should be maintained in a manner that provides a complete, accurate record of the amount of time earned, taken and any accumulated balances.
- E. Ensure payroll taxes are deposited timely to avoid unnecessary penalties and interest charges.
- F. Refrain from paying Christmas bonuses and paying employees for past services.
- G. Ensure that payroll calculations are periodically reviewed by someone independent of the payroll process. In addition, the Council should ensure amended W-2 forms are filed for 1998 and the City Bookkeeper repays the \$1,250 owed on her loans.
- H. Establish by ordinance the salaries or pay rates and applicable terms of office for all officials and employees, and ensure changes to these officials' compensation do not occur during a term of office, in accordance with state law. Any increases received during a term of office or not approved by the board should be reimbursed to the city.

**AUDITEE'S RESPONSE**

- A. *For clarification, we note that the Wellston benefit ordinance was enacted in 1997 during a period of much controversy on the City Council. Further, the former Mayor of the city was not impeached by the city. Instead, the City Council was considering impeachment. The former Mayor instituted litigation against the city, and the city counter-claimed.*

*Payments made pursuant to the plan were conditioned on the recipients' retirement from and agreement not to run for office in the city and were intended to be in the nature of a settlement of ongoing disputes with the city. The former Mayor resigned as a part of a settlement with the city. The other person receiving benefits also had disputes with the city and resigned. Neither of these individuals receiving payments voted on the ordinance that authorized the benefit program. Since the benefit payments were made upon retirement from office and were in the nature of a settlement, they do not constitute "an increase in compensation" during a term of office. The current City Council members are all serving a new term of office since the benefit ordinance was adopted and received no payments under the benefit ordinance during the term of office when it was adopted.*

*Notwithstanding the foregoing, the City Council has directed the Mayor, the City Clerk and other appropriate officials and employees to confer with legal counsel to discuss the legality of the city's benefit package and to make any appropriate recommendations to the City Council for any appropriate modifications to the plan. The City Council is committed to directing the affairs of the city in a fashion consistent with the requirements of law, and will work with legal counsel to implement this philosophy on this matter. To the extent that the city elects to maintain this program, the city will include in its annual budget sources for the payment of any potential amounts under this program.*

- B. *The City Council has directed that no officials or employees of the city will be paid in advance of the scheduled pay dates. The City Council has also implemented procedures to verify and ensure that such practices will not occur in the future. The City Council will monitor compliance with this matter.*
- C. *The City Council has directed the Mayor, the Treasurer, the Bookkeeper and other appropriate officials and employees of the city to implement procedures that ensure that all employee wages and payroll taxes are paid and reported when earned through the city's normal payroll process. In addition, the City Council has directed the Mayor, the Treasurer, the Bookkeeper and other appropriate officials and employees of the city to consult with the City Attorney, the Social Security Administration and the Internal Revenue Service regarding any liability to the city. The city's engagement of an independent certified public accountant will provide needed resources and assistance to the City Council in meeting its objectives (for more information, see the response to MAR No. 2). A committee of the City Council will monitor compliance with this directive.*
- D. *The City Council adopted a comprehensive employee handbook effective July 8, 1999 covering the terms and conditions of employment with the city. This handbook establishes*

*extensive formal written policies for, among other matters, overtime, compensatory time, vacation, holiday and sick leave. In connection with the adoption of this handbook, the City Council directed the Mayor, the Chief of Police and other appropriate officials and employees to maintain adequate records of vacation, sick leave and compensatory time in a manner that provides a complete, accurate record of the amount of time earned, taken and any accumulated balances. This process will be enhanced by the involvement of the outside independent public accountant that the city intends to retain to assist with its accounting control procedures (see the response to MAR No. 2 for more details on the role of the accountant). The City Council will monitor compliance with its directives.*

- E. The City Council has directed the Mayor, the Treasurer, the Bookkeeper and other appropriate officials and employees to implement methods to verify and ensure that payroll taxes are deposited timely to avoid unnecessary penalties and interest charges. The City Council has also directed staff to investigate and implement with the approval of the City Council an electronic transfer service to provide for the payment of payroll taxes. The City Council recognizes that the city is holding payroll taxes only as trustee and that it is not free to use such amounts for the benefit of the city. This process will be enhanced by the involvement of the outside independent public accountant that the city intends to retain to assist with its accounting control procedures (see the response to MAR No. 2 for more details on the role of the accountant). The City Council will monitor compliance with its directives.*
- F. The City Council has instructed the Mayor and other appropriate officials and employees to refrain from paying Christmas bonuses and paying employees for past services. The City Council will monitor compliance with its directives.*
- G. The City Council has instructed the Mayor and other appropriate officials and employees of the city to verify and ensure that payroll calculations are periodically reviewed by the Treasurer, members of a City Council committee and by an independent certified public accountant (see the response to MAR No. 2 for more details on the role of the accountant). In addition, the City Council has directed the Mayor, the Treasurer, the Bookkeeper and other appropriate officials and employees of the city to implement procedures to verify and ensure that amended W-2 forms are filed with appropriate taxing authorities for 1998, and that any and all city officials and/or employees repay any and all amounts owed to the city for loans from the city. The City Council will monitor compliance with its directives.*
- H. The City Council has directed the Mayor, the Treasurer, the Bookkeeper, and other appropriate officials and employees of the city to study and make recommendations to the City Council regarding appropriate legislative changes to establish salaries or pay rates and applicable terms of office (including the date(s) of commencement of such terms) for all officials and employees, and to ensure that changes in compensation do not occur during a term of office and that salaries are within the amounts established pursuant to the city's budget, all in full compliance with applicable law. In addition, the City Council and the Mayor have determined to adjust current compensation to the members of the City Council,*

*the Mayor and other appropriate officials and employees of the city back to the rate in existence on the date that such person assumed office and to return to the city any amounts already paid to such persons in excess of such amounts. Further, the City Council intends to consider adopting appropriate ordinances to implement appropriate compensation increases for city officials and employees to become effective during future terms of office in compliance with applicable legal requirements. Refinements in the city's budget-making procedures and the implementation of greater internal accounting controls will enhance the city's ability to meet this directive of the City Council. The city's engagement of an independent certified public accountant will provide needed resources and assistance to the City Council in meeting its objectives (for more information, see the response to MAR No. 2). A committee of the City Council will monitor compliance with this directive.*

#### **AUDITOR'S COMMENT**

- A. We have seen no documentation of the settlement agreements referred to above. However, if these payments were intended as settlements of litigation or other disputes, such payments would not appear to have been allowable under the eligibility criteria established by the benefit package ordinance and if paid, should have come from other city funds. If these payments are characterized simply as 'payments upon retirement', they would appear to have included payment for prior years of service and their legality would be questionable, as discussed in the MAR.

Regarding the effect on current council members, the issue is not only whether they received a payment from the package during the term of office in which it was adopted, but also whether years of service prior to and including the term of office during which it was adopted will be included for the purposes of determining the eligibility for payments in the future. Inclusion of such years of service would not appear to be proper.

#### **6. Meetings, Minutes, Ordinances, and Records**

- A. The council meeting minutes are prepared by the City Clerk but are not signed by either the City Clerk or the Mayor. The council minutes should be signed by the City Clerk as preparer and by the Mayor to provide an independent attestation that the minutes are a correct record of the matters discussed and actions taken during the council's meetings.

In addition, we noted the files of meeting minutes were poorly organized, and some minutes could not be located. To ensure council actions are properly documented, all minutes should be maintained and filed in an organized manner.

This condition was noted in our prior report.

- B. The council meeting minutes do not always adequately document matters discussed and actions taken. There were numerous instances where the minutes indicated that a decision

or appointment of an official was made but did not indicate the number of votes for and against the particular issue. In addition, the minutes do not always clearly indicate the reason a bid was selected which was not the low bid.

Section 610.020, RSMo Cum. Supp. 1999, states that the minutes shall include the date, time, place, members present, members absent, and a record of votes taken. Complete and accurate minutes provide an official record of council actions and decisions.

- C.1. Formal written minutes are not maintained for closed meetings. Although minutes for closed meetings are not specifically required by law, minutes constitute the record of proceedings of the City Council. Formal written minutes for closed meetings result in better record of city transactions, proceedings, and decisions. In addition, minutes help the city demonstrate that closed discussions or business relate to the specific reasons announced for closing the meeting pursuant to Chapter 610, RSMo 1994.

The city began preparing minutes of closed meetings in March 1999.

2. The council minutes and the meeting agendas do not document the specific reasons for going into closed session. Section 610.021, RSMo Cum. Supp. 1999, allows the council to close the meetings to the extent the meetings relate to certain specified subjects. Section 610.022, RSMo Cum. Supp. 1999, requires a closed meeting, record or vote be held only for the specific allowable reasons announced publicly at an open session. In addition, this law provides that public governmental bodies shall not discuss any other business during the closed meeting that differs from the specific reasons used to justify such meeting, record, or vote.

These conditions were noted in our prior report.

- D. The Mayor and City Council sometime hold "work sessions" to discuss bills and reports prior to their regular meeting. The Mayor indicated the Council does not make decisions or vote at these sessions. The "work sessions" are not open to the public, notice is not posted, and tentative agendas and minutes are not prepared.

The governing bodies of all political subdivisions in Missouri are required to conduct most business in regular open meetings. Chapter 610, RSMo 1994 requires public notice of all meetings as well as reasonable accommodation to assure public access to meetings.

- E. Improvement is needed in the organization and documentation of the city's ordinances. The codified ordinances were updated in September 1998; however, the last ordinance included was enacted in June 1996. The city does not maintain a listing of ordinances passed since the last codification, but simply file the new ordinances in the City Clerk's office in numerical sequence. We were unable to locate several ordinances. We could not

readily determine whether the city had failed to use the missing ordinance number or an ordinance had been misplaced.

Since ordinances represent legislation which has been passed by the council to govern the city and its residents, it is important that the city's ordinances be maintained in a complete and up-to-date manner. An index of all ordinances passed and repealed by the city could help keep track of additions and changes made to the city ordinances.

This condition was noted in our prior report.

- F. The city does not have a formal policy regarding public access to city records. A formal policy regarding access and obtaining copies of city records would establish guidelines for the city to make the records available to the public. This policy should establish a contact person, an address for mailing such requests, and a cost for providing copies of public records.

Section 610.023, RSMo Cum. Supp. 1999, lists requirements for making city records available to the public. Section 610.026, RSMo Cum. Supp. 1999, allows the city to charge fees for copying public records, not to exceed the city's actual cost of document search and duplication.

**WE RECOMMEND** the City Council:

- A. Ensure council meeting minutes are signed by the Mayor and the City Clerk to attest to their completeness and accuracy, and organized files of minutes are maintained.
- B. Ensure all significant discussions, actions taken, and information required by state law are included in the minutes.
- C.1. Ensure minutes are prepared for all closed meetings.
  - 2. Ensure minutes and agendas state the specific reasons for going into a closed session, as required by state law.
- D. Ensure compliance with state law for all regular and other meetings.
- E. Update and codify the city's ordinances and ensure a complete set of ordinances is maintained. In addition, the city should consider establishing an index of all city ordinances passed and rescinded.
- F. Develop written policies regarding procedures to obtain public access to, or copies of, public city records.

## **AUDITEE'S RESPONSE**

- A. *The City Council has instructed the Mayor, the City Clerk and other appropriate officials and employees of the city to obtain the signatures of the Mayor and the City Clerk on all minutes of the City Council meetings in order to attest to the completeness and accuracy of the minutes of meetings. In addition, the City Council has recently upgraded its staff in the office of the City Clerk, which upgrade will verify and ensure that the city maintains organized files of minutes. The City Council will monitor compliance with its directives.*
- B. *As discussed in the response to MAR No. 6.A, the City Council has recently upgraded its staff in the office of the City Clerk, which upgrade will assist the city in ensuring that, in connection with all meetings of the City Council, all significant discussions, actions and information required by state law will be included in the minutes. The City Council will monitor compliance with its directives.*
- C.1. *As discussed in the response to MAR No. 6.A, the City Council has recently upgraded its staff in the office of the City Clerk, which upgrade will assist the city in ensuring that minutes are prepared and maintained for all closed meetings. The City Council will monitor compliance with its directives.*
2. *As discussed in the response to MAR No. 6.A, the City Council has recently upgraded its staff in the office of the City Clerk, which upgrade will assist the city in ensuring that minutes and agendas state the specific reasons for going into closed sessions of the City Council, as required by applicable state law. The City Council will monitor compliance with its directives.*
- D. *As discussed in the response to MAR No. 6.A, the City Council has recently upgraded its staff in the office of the City Clerk, which upgrade will assist the city in ensuring compliance with state law relating to all regular and special meetings. The City Council will monitor compliance with its directives.*
- E. *As discussed in the response to MAR No. 6.A, the City Council has recently upgraded its staff, which upgrade will assist the city in updating and codifying the city's ordinances and ensuring that a complete set of ordinances is maintained. In addition, the City Council has directed the City Clerk to establish an index of all city ordinances passed and rescinded. The City Council will monitor compliance with its directives.*
- F. *The City Council has instructed the Mayor and other appropriate officials and employees of the city to formalize and deliver to the City Council for its review and approval the city's written policies and procedures regarding public access to, or copies of, public city records. The City Council will monitor compliance with its directives.*

A. Our review of the city's budgets noted the following concerns:

- 1) The budgets are not approved on a timely basis. The budgets for the fiscal years beginning July 1, 1999, 1998, and 1997, were not approved until July 7, 1999, July 15, 1998, and August 7, 1997, respectively.

Section 67.070, RSMo 1994, requires that if a new budget is not adopted by the beginning of the new year then the council should operate under the prior year's budget. To be of maximum benefit to the taxpayers and the city, the budget should be adopted prior to the beginning of the fiscal year.

- 2) Monies restricted for specific purposes, such as the Road and Bridge Fund and the Capital Improvements Sales Tax Fund are not separately budgeted. Currently, the city prepares an operating budget which includes all of the general and restricted monies as one fund.
- 3) The budgets for the years ended June 30, 1999 and 1998, did not present a complete financial plan for the ensuing year. The actual and estimated cash and resources available at the beginning and end of the year, respectively, were not included on the budget.
- 4) The budgets did not include a comparative statement of actual or estimated receipts and disbursements for the two previous years. The city presented only the estimated budget for the current year. Amounts for the two previous years provide comparative information to help evaluate the reasonableness of the budget estimates for the upcoming year.

Sections 67.010 to 67.080, RSMo 1994, set specific guidelines for the format, approval, and amendments of the annual operating budget. A complete and well-planned budget, in addition to meeting statutory requirements, can serve as a useful management tool by establishing specific cost expectations for each area. A complete budget should include the beginning available resources and reasonable estimates of the ending available resources.

Similar conditions were noted in our prior report.

B. The City Council does not periodically compare actual revenues and expenditures to the budgeted amounts. The City Council receives a monthly report of actual receipts and disbursements; however, this does not include a comparison to amounts budgeted or year-to-date totals.

Budgets are a planning tool and should serve as a guide throughout the year to monitor revenues and expenditures. A periodic comparison of budgeted versus actual revenues and expenditures is necessary to properly monitor the financial condition of each city fund.

- C During the year ended June 30, 1998, the city approved expenditures in excess of budgeted amounts totaling approximately \$122,000. The city did not prepare an amended budget or adopt a resolution authorizing the additional expenditures, nor did the city set forth any reasons for exceeding the budgeted amounts in the council minutes.

Section 67.040, RSMo 1994, requires political subdivisions to keep expenditures within amounts budgeted. If there are valid reasons which necessitate excess expenditures, a resolution should be adopted by the governing body setting forth the amount of the budget increase and the facts and reasons for such over expenditures.

- D. The city has not published semi-annual financial statements as required by state law and city ordinance. Section 79.160, RSMo 1994, and city ordinances require the Council to prepare and publish semi-annual financial statements. In addition, Section 79.165, RSMo 1994, states the City Treasurer cannot legally disburse funds until the financial statement is published.

This condition was noted in our prior audit.

**WE RECOMMEND** the City Council:

- A. Ensure budgets are prepared timely and in accordance with state law for all city funds each year.
- B. Periodically compare actual revenues and expenditures with budgeted amounts to monitor city finances and to ensure actual expenditures do not exceed budgeted amounts.
- C. Ensure the expenditures are kept within budgeted amounts. If it is necessary to incur additional expenditures, a resolution setting forth the increase and reasons for such should be adopted.
- D. Ensure semi-annual financial statements are prepared and published in accordance with state law and city ordinance.

**AUDITEE'S RESPONSE**

- A. *The City Council has instructed the Mayor, the Treasurer, the Bookkeeper and other appropriate officials and employees to verify and ensure that budgets for all city funds are prepared on an annual basis, in a timely fashion and in accordance with state law. In addition, the City Council has directed the Mayor, the Treasurer, the Bookkeeper and other*

*appropriate officials and employees to design and submit to the City Council for its approval a detailed annual schedule to assist the city in meeting all applicable deadlines. Such schedule is required to include the receipt of input from all city departments including the Police Department and the Court System. The city intends to engage the services of an independent certified public accountant to assist it with this matter (see the response to MAR No. 2 for more details on the role of the accountant). The City Council will monitor compliance with its directives.*

- B. The City Council has instructed the Mayor, the Treasurer, the Bookkeeper and other appropriate officials and employees to periodically compare actual revenues and expenditures with budgeted amounts to monitor city finances and to verify and ensure that actual expenditures do not exceed budgeted amounts. The city intends to engage the services of an independent certified public accountant to assist it with this matter (see the response to MAR No. 2 for more details on the role of the accountant). The City Council will monitor compliance with its directives.*
- C. The City Council has instructed the Mayor, the Treasurer, the Bookkeeper and other appropriate officials and employees to verify and ensure that expenditures are kept within budgeted amounts. If it is necessary to incur additional expenditures, the City Council intends to adopt an appropriate resolution setting forth the increase and the detailed reasons for such increase. The city intends to engage the services of an independent certified public accountant to assist it with this matter (see the response to MAR No. 2 for more details on the role of the accountant). The City Council will monitor compliance with its directives.*
- D. The City Council has instructed the Mayor, the Treasurer, the Bookkeeper and other appropriate officials and employees to verify and ensure that semi-annual financial statements are prepared and published in accordance with state law and city ordinance. In addition, the City Council has directed the Mayor, the Treasurer, the Bookkeeper and other appropriate officials and employees to design and submit to the City Council for its approval a detailed annual schedule to assist the city in meeting all applicable deadlines. The city intends to engage the services of an independent certified public accountant to assist it with this matter (see the response to MAR No. 2 for more details on the role of the accountant). The City Council will monitor compliance with its directives.*

**8.**

### **Restricted Funds**

- A. Capital improvement sales tax monies are not accounted for properly. In November 1995, city voters passed a ½ cent capital improvement sales tax to be used for the purpose of funding, operating, and maintaining capital improvements. During the period January 1, 1996 through June 30, 1999, receipts from the sales tax of approximately \$607,000 were placed in the city's General Fund. Disbursements specifically for capital improvement projects are not identified in the city's records.

Section 94.577, RSMo Cum. Supp. 1999, states that all capital improvement sales tax receipts shall be deposited in a special trust fund and used solely for capital improvements. In addition, separate records of receipts and disbursements would help inform the city residents of the specific projects funded by the sales tax.

- B. During the years ended June 30, 1999 and 1998, the city received motor vehicle-related receipts totaling approximately \$144,000 and \$141,000, respectively, from the state. The city maintains a separate bank account for the deposit of these funds; however, the city has transferred monies from this account to the city's General Fund periodically. Article IV, Section 30, of the Missouri Constitution, requires that motor vehicle-related receipts apportioned by the state of Missouri be expended only for street-related purposes.

Although street-related disbursements are paid from the General Fund, these disbursements are not specifically identified in the city's accounting records. As a result of this situation, monies legally restricted for street purposes have not been accounted for fully.

To ensure compliance with the Missouri Constitution, the city should maintain a separate accounting of motor vehicle-related receipts and ensure these monies are used only for the purposes allowed by the constitution.

This condition was also noted in our prior report.

The city should perform a detailed review of the capital improvement sales tax and motor vehicle-related receipts and disbursements that have been handled in the General Fund and determine if there is any remaining balance or monies due back from the General Fund. The unspent balance of these receipts should be accounted for separately along with future receipts.

**WE RECOMMEND** the City Council establish a separate accounting of restricted receipts and disbursements for capital improvement sales tax and motor vehicle-related monies to ensure they are used solely for allowable purposes and to inform the voters of the use of these restricted funds.

### **AUDITEE'S RESPONSE**

*The City Council has instructed the Mayor, the Treasurer, the Bookkeeper and other appropriate officials and employees to establish on the books of the city a separate accounting of restricted receipts and disbursements for capital improvement sales tax and motor vehicle-related monies to verify and ensure that such funds are used solely for allowable purposes and to report the balances and uses of funds in these accounts in the city's financial information made available to members of the public. The city intends to engage the services of an independent certified public accountant to assist it with this matter (see the response to MAR No. 2 for more details on the role of the accountant). The City Council will monitor compliance with its directives.*

- A. Prenumbered permits are not used for building permits, plumbing permits, electrical permits, and occupancy permits. In addition, although the city issues prenumbered licenses for merchant's, storage, manufacturing, and business licenses, the city does not account for the numerical sequence. Also, the permit/license fee receipt slips are not reconciled to the number of each type of permit and license issued and the amount of fees deposited.

To provide additional assurance all monies are properly collected, recorded, and deposited, permits and licenses should be prenumbered and the numerical sequence should be accounted for properly. In addition, permit/license fee receipt slips should be reconciled to permit/license fee monies deposited and the number of permits/licenses issued to ensure all permit and license fees are being received, recorded, and deposited.

- B.1. City ordinance 13-201 requires businesses operating within the city limits to purchase a business license. The ordinance establishes the fee for these licenses at \$125 for most businesses. The city assessed and collected an incorrect fee of \$150 for two of the five licenses we reviewed. In addition, \$225 was collected for a license for which a fee of \$150 should have been assessed. City personnel could find no documentation to support the higher rate charged.
2. City ordinance 5-11 requires all property owners to obtain a building permit for proposed construction. The city assessed and collected an incorrect fee for three of the five permits we reviewed. The ordinance establishes the fee for these permits at four dollars on every \$1,000 of estimated construction costs. The city instead assessed a fee of 4 percent of the proposed construction costs, resulting in overcharges on the three permits totaling \$414.
- C. The city issues a prenumbered manufacturer's license to the applicable businesses and retains the stub in the license book. The City Clerk could not locate the stubs for manufacturer's licenses issued prior to March 1999.

Retention of city records is essential to establishing accountability for city financial activity and in demonstrating compliance with state and city law. Effective control of records require all documents and records be safeguarded against loss due to fire or theft, be accessible to the appropriate city officials/employees, and upon reasonable request, be accessible to the public.

**WE RECOMMEND** the City Council:

- A. Require all permits to be prenumbered and the numerical sequence of permits and licenses be accounted for properly. In addition, fees collected for all such permits and licenses should be reconciled to the number of permits and licenses issued.
- B. Ensure license and permit fees are assessed and collected in accordance with city ordinance.
- C. Ensure all records of the city are properly retained and available for review.

**AUDITEE'S RESPONSE**

- A. *The City Council recently upgraded its personnel in the office of the City Clerk. The upgrade will assist the city to implement its policy to require all permits to be pre-numbered and the numerical sequence of permits and licenses to be accounted for properly. In addition, oversight from the Mayor, the Treasurer and members of a City Council committee will assist the city to reconcile the fees collected for all such permits and licenses to the number of permits and licenses actually issued.*
- B. *The City Council recently upgraded its personnel in the office of the City Clerk. This personnel change will permit the city to verify and ensure that license and permit fees are assessed and collected in accordance with city ordinance. In addition, the City Council has directed the Mayor, the Treasurer and the members of a City Council committee to monitor the activities of personnel in the office of the City Clerk with respect to license and permit fees.*
- C. *The City Council recently upgraded its staff in the office of the City Clerk. This personnel change will permit the city to verify and ensure that all records of the city are properly retained and available for review. In addition, the City Council has directed the Mayor, the Treasurer and the members of a City Council committee to monitor the activities of the personnel in the office of the City Clerk with respect to record retention.*

**10.**

**Accounting Controls and Procedures**

- A. Monthly bank reconciliations are not prepared. In addition, balances are not recorded in the check registers. The city contracted with a certified public accounting (CPA) firm for the compilation of financial statements for the city. The CPA firm prepared bank reconciliations at January 31, 1999 and June 30, 1998 for the city's accounts. During our review of these reconciliations we noted the following concerns:

- 1) The city does not record bank fees or returned items in their general ledger or on the monthly Treasurer's report. In addition, it does not appear interest income is consistently recorded for all funds. Adjustments for these items were made by the CPA firm when reconciling the accounts.
- 2) Due to errors in recording receipts and disbursements in the city's records, additional adjustments ranging from \$435 to \$46,938 were necessary to agree the book balance to the reconciled bank balance.

Complete and accurate bank reconciliations are necessary to ensure accounting records are in agreement with the bank, and to allow errors or discrepancies to be detected and corrected timely. Maintaining a running checkbook balance ensures sufficient funds are available for disbursements.

- B. The city does not have an investment ledger to monitor certificate of deposit investments.

Complete, organized investment records are necessary to provide accurate and timely financial information upon which effective management decisions may be based. Furthermore, without such records, accountability over the city's assets and related revenues is weakened.

- C. The police department accepts cash, checks, and money orders for vehicle releases, police reports, and bond fees.

- 1) Receipt slips are not issued for the receipt of these monies. To help ensure collections are properly recorded and deposited, prenumbered receipt slips indicating the method of payment should be issued for all monies received, the numerical sequence accounted for properly, and the composition of the receipt slips reconciled to the composition of monies transmitted to the city.
- 2) Transmittals are not made on a timely basis. To adequately safeguard receipts and reduce the risk of loss or misuse of funds, transmittals should be made on a daily basis or when receipts exceed \$100.
- 3) Checks and money orders are not restrictively endorsed immediately upon receipt. To reduce the risk of loss or misuse of funds, checks and money orders should be restrictively endorsed immediately upon receipt.
- 4) Cash receipts are not transmitted to the city for deposit; instead, they are held by the police department and used for small purchases. To ensure the proper handling and safeguarding of monies, receipts should be deposited intact, and, if needed, a petty cash fund should be established and maintained on an imprest basis.

- D. City receipt records are not properly reconciled to deposits. The City Clerk's office records the amount and method of payment for all monies received on a prenumbered one-write receipt system and posts the receipt into the city cash register. The City Bookkeeper reconciles the total money on hand at the end of each day to the cash register tapes; however, the cash register tapes are not always retained. In addition, no reconciliation is made between the one-write receipt ledger and the deposits. We noted several instances when receipt slips were not issued for some monies received, indicated the incorrect method of payment, or were written for the wrong amount. Also, no one accounts for the numerical sequence of the receipt slips issued.

To adequately account for all monies received and recorded, and help ensure all receipts are properly deposited, the city should reconcile the amount and composition of monies per the one-write receipt ledger to the composition of amounts deposited. In addition, the numerical sequence of receipt slips issued should be accounted for properly.

- E. The City Bookkeeper prepares the monthly Treasurer's report which indicates the receipts for the month by classification, the disbursements for the month by check, and the ending balance. The report is prepared from the City Bookkeeper's general ledger. We noted the following concerns:

- 1) Receipts per the City Clerk's one-write receipt ledger do not always agree to the general ledger or the Treasurer's report. In addition, receipt amounts on the report were sometimes estimated when the monies had not yet been received at the time the Treasurer's report was prepared, and transfers between the city's bank accounts were not always recorded on the general ledger or the Treasurer's report.
- 2) Disbursements per the general ledger and the Treasurer's report did not always agree to the actual check issued.
- 3) The ending balance shown on the Treasurer's report did not agree to the running balance maintained in the general ledger and the totals reflected on the Treasurer's report were not always accurate.

To ensure the financial information made available to the council and public is complete and accurate, the city should ensure all funds and financial activity of the city is accurately recorded and properly presented in the monthly Treasurer's reports.

This condition was noted in our prior report.

- F. The City Bookkeeper maintains a petty cash fund of approximately \$400. The fund is not operated on an imprest basis, invoices or receipts are not maintained for some expenditures, and a ledger is not maintained to document disbursements. The fund is

entirely under the control of the City Bookkeeper and no independent review is made of the fund to ensure it is maintained properly.

Invoices should be maintained for all petty cash expenditures and the fund should be operated on an imprest basis, meaning that cash on hand and the invoices should always total the established balance, and checks issued to replenish the fund should equal the total of the invoices. A ledger of petty cash transactions should be maintained and periodically the fund should be counted and reconciled to the imprest balance by an independent person to ensure the funds are being accounted for properly, to detect any errors, and to prevent these monies from being misused.

A similar condition was noted in our prior report.

- G. In 1997, the city agreed to sell three of its vehicles to city employees for \$2,000 to \$2,500 per vehicle without obtaining bids as required by ordinance. The city entered into contracts with these employees to finance the purchase of these vehicles by allowing them to take a payroll deduction each month until the balance was repaid. One vehicle contract was canceled before the sale could be finalized and a second was canceled after the employee left the city's employment and failed to continue making the payments. The city was not able to retrieve the third vehicle even though the former employee failed to repay the contract amount.

Section 2-8 of the city code requires sealed bids to be solicited for all sales of property or services by the city in excess of a value of \$1,000.

To ensure the best price is obtained for property sold, the city should solicit bids in accordance with city ordinance, and documentation of bids received should be maintained.

- H. On December 10, 1996, the city entered into a contract with the Wellston Housing Authority to provide supplemental police services at the public housing developments. This contract requires the city police department to provide three police officers to perform specialized patrols to the public housing developments on a cost reimbursement basis not to exceed \$80,000 per year (\$26,667 in salaries and fringe benefits per officer). During the two years ended June 30, 1999 and 1998, the city received \$78,667 and \$63,333, respectively from the Housing Authority.

It appears the city failed to collect payment for services rendered in November 1997. The city has not developed procedures to ensure payment is received for each month billed. In addition, police personnel are required to complete a daily patrol log, which includes hours worked, calls and requests for service, referrals, suspicious persons, etc. and the police department also prepares a bill to be sent to the Housing Authority each month. The city was only able to locate 11 of 23 monthly bills for the period of July 17, 1997

through July 31, 1999 and could not provide us with copies of any of the daily patrol logs or most of the daily dispatch logs requested for review.

Proper documentation should be maintained to show compliance with the contract requirements. In addition, procedures should be developed to ensure payment is received for each month billed.

**WE RECOMMEND** the City Council:

- A. Ensure monthly bank reconciliations are prepared and checkbook balances are maintained. In addition, all bank fees, interest, and other adjustments should be properly recorded in the city's records.
- B. Ensure an investment ledger is maintained.
- C.1. Require prenumbered receipt slips be issued for all monies received, and ensure the numerical sequence of receipt slips issued is accounted for properly. In addition, the method of payment should be noted and the composition of receipt slips should be reconciled to the composition of monies transmitted to the city.
  - 2. Ensure transmittals are made on a daily basis or when accumulated receipts exceed \$100.
  - 3. Ensure checks and money orders are restrictively endorsed immediately upon receipt.
  - 4. Transmit monies intact to the city for deposit. The council should consider establishing an imprest petty cash fund for the police department, if necessary.
- D. Ensure the amount and composition of receipts per the one-write receipt ledger is reconciled to the composition of bank deposits. In addition, the numerical sequence of receipt slips should be accounted for properly.
- E. Ensure the general ledger and the Treasurer's report are accurate and complete.
- F. Formally establish an imprest amount for the petty cash fund and ensure the fund is periodically counted and reconciled to the imprest balance by an independent person. In addition, invoices should be maintained for all petty cash expenditures and a ledger should be prepared of all petty cash transactions.
- G. Solicit bids for the sale of all assets in accordance with city ordinance.
- H. Ensure proper documentation is maintained to reflect the city's compliance with the contract with the Housing Authority. The city should ensure it collects payment for each

month billed and should contact the Housing Authority about the unpaid bill from November 1997.

### **AUDITEE'S RESPONSE**

- A. *The City Council has instructed the Mayor, the Treasurer, the Bookkeeper and other appropriate officials and employees to verify and ensure that monthly bank reconciliations are prepared and to maintain running checkbook balances. In addition, the City Council has directed that all bank fees, interest and other adjustments be properly and promptly recorded in the city's records. The members of the City Council have determined independently to monitor the implementation of its directives on this matter. The city intends to engage the services of an independent certified public accountant to assist it with this matter (see the response to MAR No. 2 for more details on the role of the accountant).*
- B. *The City Council has instructed the Mayor, the Treasurer, the Bookkeeper and other appropriate officials and employees to maintain at all times an investment ledger for the city. The members of the City Council have determined independently to monitor the implementation of its directive. The city intends to engage the services of an independent certified public accountant to assist it with this matter (see the response to MAR No. 2 for more details on the role of the accountant).*
- C.1. *The City Council has instructed the Mayor, the Treasurer, the Bookkeeper and other appropriate officials and employees to implement procedures requiring pre-numbered receipt slips to be issued for all monies received by the city, and ensuring that the numerical sequence of receipt slips issued is accounted for properly. In addition, the City Council has also directed the Mayor, the Treasurer, the Bookkeeper and other appropriate officials and employees to establish procedures whereby the method of payment will be noted and the composition of receipt slips will be reconciled to the composition of monies transmitted to the city. The city intends to engage the services of an independent certified public accountant to assist it with this matter (see the response to MAR No. 2 for more details on the role of the accountant). The City Council will monitor compliance with its directives.*
- 2. *The City Council has instructed the Mayor, the Treasurer, the Bookkeeper and other appropriate officials and employees of the city to implement appropriate procedures whereby receipts to the city will be transmitted to the Bookkeeper for deposit into the appropriate accounts of the city on a daily basis. The members of the City Council have determined independently to monitor the implementation of this directive on this matter. The city intends to engage the services of an independent certified public accountant to assist it with this matter (see the response to MAR No. 2 for more details on the role of the accountant).*
- 3. *The City Council has instructed the Mayor, the Treasurer, the Bookkeeper and other appropriate officials and employees to implement procedures to verify and ensure that*

*checks and money orders are restrictively endorsed immediately upon receipt. The members of the City Council have determined independently to monitor the implementation of its directive. The city intends to engage the services of an independent certified public accountant to assist it with this matter (see the response to MAR No. 2 for more details on the role of the accountant).*

4. *The City Council has instructed the Mayor, the Treasurer, the Bookkeeper and other appropriate officials and employees to transmit monies intact to the city for deposit into the appropriate account. The City Council has also directed the Mayor and the Chief of Police to investigate and report to the City Council for its approval the establishment of a petty cash fund for the Police Department. The members of the City Council have determined independently to monitor the implementation of its directive on this matter. The city intends to engage the services of an independent certified public accountant to assist it with this matter (see the response to MAR No. 2 for more details on the role of the accountant).*
- D. *The City Council has instructed the Mayor, the Treasurer, the Bookkeeper and other appropriate officials and employees to verify and ensure that the amount and composition of receipts per the one-write receipt ledger is reconciled to the composition of bank deposits. In addition, the City Council has directed that the numerical sequence of receipt slips be accounted for properly. The city intends to engage the services of an independent certified public accountant to assist it with this matter (see the response to MAR No. 2 for more details on the role of the accountant). The City Council will monitor compliance with its directives.*
- E. *The City Council has instructed the Mayor, the Treasurer, the Bookkeeper and other appropriate officials and employees to implement procedures to verify and ensure that the general ledger and the Treasurer's report are accurate and complete. The members of the City Council have determined independently to monitor the implementation of its directive on this matter. The city intends to engage the services of an independent certified public accountant to assist it with this matter (see the response to MAR No. 2 for more details on the role of the accountant).*
- F. *The City Council has instructed the Mayor, the Treasurer, the Bookkeeper and other appropriate officials and employees of the city to formally establish an imprest amount for the petty cash fund and to verify and ensure that the fund is periodically counted and reconciled to the imprest balance by an independent person. In addition, the City Council has directed the city to maintain all invoices for all petty cash expenditures and a ledger of all petty cash transactions. The members of the City Council have determined independently to monitor the implementation of its directive on this matter. The city intends to engage the services of an independent certified public accountant to assist it with this matter (see the response to MAR No. 2 for more details on the role of the accountant).*

- G. *The City Council has instructed the Mayor and other appropriate officials and employees to establish policies to solicit bids for the sale of all assets in accordance with city ordinances. The City Council has also directed the Mayor and other appropriate officials and employees of the city to recommend to the City Council for approval by the City Council amendments to the city's existing ordinances to modernize the city's approach to the sale of city assets. The City Council will monitor compliance with its directives.*
- H. *The City Council has instructed the Mayor, the Treasurer, the Bookkeeper and other appropriate officials and employees to implement policies to maintain proper documentation to reflect the city's compliance with the contract with the Housing Authority. The City Council has also directed appropriate officials and employees to collect payment for each month billed and to contact the Housing Authority concerning the unpaid bill from November 1997. The members of the City Council have determined independently to monitor the implementation of its directive on this matter.*

## **11. Municipal Court Division**

- A. Bond monies are collected by the police department and transferred to the Court Clerk for deposit into the city treasury. During our review of bond records, we noted the following concerns:

- 1) Approximately \$4,083 in cash bond monies collected between February 1998 and November 1998 were not deposited and appear to be missing.

The police department issues prenumbered receipt slips with a corresponding prenumbered bond envelope for all bond monies received. The police department also posts each bond to a bond log. The bond money and one copy of the receipt slip are put into the bond envelope and placed in a lock box. In the past, the Court Clerk and a designated police officer retrieved the envelopes from the lock box and verified the amounts in each envelope. Currently the police department retrieves the envelopes from the lock box and transmits the bond monies to the Court Clerk. The Court Clerk issues a prenumbered one-write receipt slip for each bond, enters each bond in the cash register, and deposits these monies into the city treasury daily. The police bond receipt slip and the court bond receipt slip are placed in the bond envelopes, which are filed by court date.

Twenty bonds recorded on the police department's bond receipt log could not be traced to an entry on the court's one-write receipt ledger or to a deposit in the court bond account. For eight of these bonds, totaling \$1,850, the Court Clerk had filed the bond envelope in her file; however, it did not contain a copy of a court receipt slip. For the other twelve bonds, totaling \$2,233 the bond envelope was not in the Court Clerk's file. In addition, as noted in part 3 below, numerous

police department receipt slips were not entered in the bond log and could not be accounted for properly.

These discrepancies were not detected on a timely basis due to numerous internal control weaknesses, little or no independent review, and a lack of adequate record keeping. The Municipal Division should review the situation and take necessary actions to recover the missing monies.

A similar condition was also noted in our prior report.

- 2) Bond monies received by the police department are not transmitted to the Court Clerk on a timely basis. Transmittals are made approximately once a week. In addition, the Court Clerk does not always indicate her receipt of bonds from the police department. In April 1999, the Court Clerk began initialing the police bond log to indicate her receipt of bonds from the police department.

To adequately safeguard receipts and reduce the risk of loss or misuse of funds, transmittals should be made daily or when accumulated receipts exceed \$100. To adequately account for all bond receipts and ensure all receipts are properly deposited, the Court Clerk should continue to initial the bond log to indicate her receipt of bonds from the police department.

- 3) Receipt slips issued by the police department for bond collections are prenumbered; however, some receipt slips were issued out of sequence. Numerous gaps between receipt numbers existed on the police department's bond log. The police department was unable to determine the disposition of the missing receipt slips. To adequately account for bond monies and to ensure all bond monies received are transmitted to the Court Clerk, prenumbered receipt slips should be issued in sequence and accounted for properly.
- 4) Money orders received by the police department are not restrictively endorsed until they are received by the Court Clerk. To reduce the risk of loss or misuse of funds, checks and money orders should be restrictively endorsed immediately upon receipt.
- 5) Bond monies received are deposited directly into a city bank account. The Court Clerk does not maintain a bond ledger to account for the receipt, disbursement, and balance of bond monies, nor does she prepare a monthly listing of open-items (liabilities) to document the amount of bond monies being held by the city. As of June 30, 1999, neither the Court Clerk nor the city were able to determine the amount of open bonds held by the city. In addition, unclaimed bond refund checks are returned to the city where they are voided and not reissued.

A bond ledger indicating date and amount of receipt and date of disbursement is necessary to ensure proper accountability over bonds. Monthly open-items listings should be prepared and reconciled to the bond monies held by the city to ensure proper accountability over open cases and ensure monies held in trust are sufficient to meet liabilities. Any unclaimed bonds remaining one year after final court disposition should be disbursed to the state's Unclaimed Property Section as required by Section 447.595, RSMo 1994.

Similar conditions were noted in our prior report.

- 6) Bonds received are not posted to the individual case files or to the court's computer system. When a bond is applied to fines and costs or refunded, the Court Clerk places the bond receipt in the case file. A defendant must provide the copy of the original bond receipt slip to apply a bond to fines and costs or to obtain a bond refund. Due to the failure to post bonds to case files and failure to maintain a bond ledger, the Court Clerk cannot determine when bonds should be forfeited to the city or if a bond remains unclaimed. To ensure bonds are properly handled and recorded, the amount collected, the bond number, and the date of payment should be recorded on the case file.
- 7) The City Bookkeeper does not disburse specific bond monies to the city's general account when the bonds are applied or forfeited. Instead, the City Bookkeeper transfers lump sums from the bond account to the city's general account as funds are needed. To adequately account for bond monies, the City Bookkeeper should transmit any bonds to be applied or forfeited to the city on a timely basis.

- B. The municipal division accepts cash, checks, and money orders for payment of fines and court costs and deposits monies into a city bank account. Receipt slips issued by the municipal division do not indicate the method of payment received. To ensure receipts are deposited intact, the method of payment should be recorded on receipt slips, and the composition of receipt slips issued should be reconciled to the composition of bank deposits.

This condition was noted in our prior report.

- C. The duties of receiving, recording, and transmitting fine, court cost, and bond monies collected by the municipal division are not adequately segregated. Currently, the Court Clerk performs all of these duties. The City Bookkeeper indicated she reconciles the total money on hand at the end of each day to the cash register tapes and the one-write receipt ledgers, and accounts for the numerical sequence of the receipt slips issued; however, her review is not documented. In addition, no one compares the bond monies to be deposited with the original entry recorded on the police department's bond log.

To safeguard against possible loss or misuse of funds, internal controls should provide reasonable assurance that all transactions are accounted for properly and assets are adequately safeguarded. Since this is an office of one employee and proper segregation of duties cannot be achieved, at a minimum, there should be a documented independent comparison of receipt slips and bond forms issued to amounts deposited. This review should include accounting for the numerical sequence of receipt slips issued, and reconciling the composition of receipt slips issued by the court and the composition of monies transmitted to the City Treasurer for deposit.

- D.1. Neither the police department nor the court maintain adequate records to account for tickets assigned and issued, and their ultimate disposition. The police department maintains listings of tickets assigned and issued, but the listings are not complete or adequate to account for all tickets issued and their ultimate disposition. During our review, we noted numerous tickets not accounted for properly. It appears no one scans these logs for missing tickets.

Without a proper accounting of the numerical sequence and disposition of tickets, the police department and the court cannot be assured that all tickets issued were properly submitted to the court for processing. A complete listing of each ticket number, the date issued, offense, and violator's name would help ensure all tickets issued are properly submitted to the court for processing, properly voided, or not prosecuted. In addition, a record should be maintained of the ultimate disposition of each ticket.

This condition was noted in our prior report.

2. The Court Clerk does not post the ticket number to the court's computer system; thus, she was unable to locate case files from the ticket numbers. Instead, cases are filed alphabetically by the defendant's name. Seven of the sixty tickets requested could not be located. A cross-referencing system is necessary to ensure all tickets have been submitted to the court for processing and to aid in locating issued tickets and the related case files.
- E. The city did not disburse the state's portion of the Crime Victims Compensation fund (CVC) and Peace Officer Standards and Training Commission (POSTC) fees for all cases on which they were collected and some disbursements were not made timely. Section 595.045, RSMo Cum. Supp. 1999, requires 95 percent of the CVC fees be paid monthly to the state. POSTC fees should also be disbursed monthly to the state.
- F. The Court Clerk could not locate twenty-two of the sixty case files (37 percent) requested for review. The clerk was able to locate fifteen of those cases on the court's computer system. In addition, the Court Clerk could not locate one-write receipt ledgers prior to April 1997, the one-write receipt ledger for June 1997, and six court dockets for 1997. Supreme Court Administrative Rule 8 requires all municipal ordinance case files be maintained for three years after the date of filing and financial records be maintained for five

years or upon completion of an audit. Retention of applicable records is necessary to properly account for all municipal monies received.

- G. The municipal division does not forward required records of convictions on traffic offenses to the Missouri State Highway Patrol (MSHP). Section 302.225, RSMo Cum. Supp. 1999, requires records of any pleas or findings of guilty on traffic violations under the laws of the state, county, or municipal ordinance to be forwarded to the MSHP within ten days of the conviction date.

This condition was noted in our prior report.

- H. The final disposition of each case is not always adequately documented on the court docket. In addition, the Municipal Judge does not sign the court dockets after dispositions are recorded, and the Prosecuting Attorney does not always initial or sign the case file to document approval of a ticket's amendment or dismissal.

To ensure the proper disposition has been entered in the court records, the Municipal Judge should review each court docket and sign the docket to indicate approval of the recorded disposition. In addition, the Prosecuting Attorney should sign all amended and dismissed case files.

This condition was noted in our prior report.

**WE RECOMMEND** the Municipal Division:

- A.1. Review the situation with the City Council and legal counsel and contact the municipal division's bonding company.
2. Request the police department to transmit bond receipts daily or when accumulated receipts exceed \$100. In addition, the Court Clerk should continue to initial the police department's bond log to indicate her receipt of bonds from the police department.
3. Work with the police department to ensure receipt slips are issued in sequence and the numerical sequence of the receipt slips is accounted for properly.
4. Request the police department to restrictively endorse money orders immediately upon receipt.
5. Maintain a bond ledger, prepare a monthly listing of open items, and work with the City Bookkeeper to reconcile these records to the bond monies held by the city. Any unclaimed bonds remaining after one year of court disposition should be disbursed in accordance with state law.

6. Record on the case file the bond amount collected, the bond number, and the date of payment.
7. Request the City Bookkeeper to develop procedures to ensure all bond monies applied or forfeited are disbursed to the city's general account on a timely basis.
- B. Indicate the method of payment on receipt slips issued and reconcile the composition of receipt slips to bank deposits.
- C. Establish a documented review of municipal division records by an independent person.
- D.1. Work with the police department to ensure records are maintained to account for the numerical sequence and ultimate disposition of all tickets assigned and issued.
2. Post the ticket number to court computer system.
- E. Develop procedures to ensure all CVC and POSTC fees collected are remitted to the state in accordance with state law and on a timely basis.
- F. Retain all tickets, case information, and financial records in accordance with Supreme Court Rule 8.
- G. Forward records of convictions on traffic offenses to the MSHP as required by state law.
- H. Include the disposition of each case on the court docket. In addition, the Municipal Judge should ensure the docket is signed to indicate review and approval, and the Prosecuting Attorney should sign all amended and dismissed cases.

### **AUDITEE'S RESPONSE**

*The Municipal Judge, Court Clerk, Mayor and City Council responded as follows:*

- A.1. *The City Council has determined to conduct a thorough review of the issue of unaccounted-for monies related to the bond program and to co-ordinate with the city's bonding company toward the goal of recovering such sums for the city. The outside auditing firm that the city intends to retain will provide the city with assistance with this matter (see the response to MAR No. 2 for more details on the role of the accountant). The City Council will monitor compliance with its determinations.*
2. *The Court Clerk will issue new sequential, triplicate bond receipt forms to the Police Department to replace the receipts currently in use. The Police Department will be required to return the completed receipts to the Court Clerk each Monday and Thursday, including any forms that were canceled or voided. The recommended daily return of completed*

*receipts or the return of completed bond receipts when accumulated receipts exceed \$100 will be considered. The Court Clerk will verify the return of all bond receipt forms and report any missing forms to the Police Department for written reconciliation and to the Municipal Judge if no written reconciliation is provided within five working days.*

*The Court Clerk will independently verify the amounts of all bonds transmitted to her and will maintain a bond receipt log of all amounts received. The Court Clerk will accept and initial only those envelopes whose contents match the amounts claimed on the bond envelope. All non-conforming envelopes will be reported immediately to the Municipal Judge and the Mayor. The Mayor will be responsible to report the same to the City Council.*

*In addition, the City Council has directed the Police Department to cooperate with the court in achieving greater efficiencies in this matter. The City Council, working with the outside certified public accounting firm that the city intends to hire, will monitor compliance with this policy (see the response to MAR No. 2 for more details on the role of the accountant).*

- 3. The City Council has directed the Police Department to work with the court to verify and ensure that receipt slips are issued in sequence and the numerical sequence of the receipt slips is accounted for properly. The City Council will monitor compliance with this directive.*
  - 4. The City Council has directed that the Police Department work with the court to verify and ensure that money orders are restrictively endorsed immediately upon receipt. The City Council will monitor compliance with this directive.*
  - 5. The Court Clerk initiated the recommended bond deposit ledger on September 8, 1999 and has maintained the ledger since its introduction. The Court Clerk will prepare a separate written monthly list of open items from the bond deposit ledger and transmit the list to the Bookkeeper. The Bookkeeper will then transmit appropriate monies to the State of Missouri. The City Council will monitor compliance with this matter.*
  - 6. The Court Clerk has adopted a policy whereby bond amounts will be posted on the case file jacket and in the computer system and filed in the case file jackets. The City Council will monitor compliance with this policy.*
  - 7. The City Council has directed the Bookkeeper, under the supervision of the Treasurer, to develop comprehensive procedures to verify and ensure that all bond monies applied or forfeited are transferred to the city's general account on a timely basis. This function will be made easier by the Court Clerk's preparation of a monthly listing of open items to be provided as described in the response to MAR No. 11.A.5. The City Council will monitor developments concerning this matter.*
- B. The Court Clerk will indicate the method of payment, along with the case number on the receipt slips and verify the same on the deposit ticket that she prepares. The City Council*

*has also directed that the Treasurer and the Bookkeeper coordinate with the city's bank to develop a system to reconcile the method of payment with the bank deposit slip issued by the bank. The City Council will monitor developments concerning this matter.*

- C. The City Council has directed the Treasurer to conduct an impartial, independent review of the court's records on a periodic basis. The retention of outside certified public accountants will also assist with this review (see the response to MAR No. 2 for more details on the role of the accountant). In addition, the City Council has determined to monitor compliance with financial safeguards.*
- D.1. The City Council has directed the Police Department to work with the court in order to verify and ensure that records are maintained in such a fashion as to account for the numerical sequence and ultimate disposition of all tickets assigned and issued through the court. The City Council will monitor developments in this area.*
- 2. The Court Clerk will post ticket numbers submitted to the court in the computer system. The City Council has directed the Police Department to account for all tickets, particularly missing tickets. The City Council will monitor compliance with this directive.*
- E. The Court Clerk has developed procedures to verify and ensure that all CVC and POSTC fees collected are remitted to the State of Missouri in accordance with applicable law and on a timely basis. Implementation of these procedures is reflected in the fact that the Court Clerk changed her case counting method in September 1999 to address this issue and that she now prepares and submits a report to the Bookkeeper on the 20th of each month. The Bookkeeper is monitored by the Treasurer and the City Council.*
- F. The court has adopted procedures to retain all tickets, case information and financial records in accordance with applicable rules. The City Council will monitor compliance with these procedures.*
- G. The Court has adopted procedures to forward records of convictions on traffic offenses to the MSHP as required by state law. The City Council will monitor compliance with these procedures.*
- H. Upon the recommendation of the Missouri Municipal Judges Association and Court Clerk training, final disposition of each case is already documented on the court case file jacket instead of on the docket, so that the maximum amount of data remains in a single, most logical place – the court case file jacket. All posted dispositions will be signed by the disposing authority, i.e., the Prosecutor or the Judge. All Judicial dockets are signed by the Judge. A standing order is being issued to the Prosecutor to verify and ensure that his docket is signed. A standing order is being issued to the Court Clerk instructing her to only accept written and signed dispositions of a case. The City Council will monitor compliance with these procedures.*

## **AUDITEE'S OVERALL RESPONSE**

*The City Council has instructed appropriate city officials and employees to investigate fully all findings of the State Auditor and to report the result of such investigation to the City Council.*

*In order to further enhance the City Council's efforts to respond to these matters, the City Council has determined to devote more resources to training efforts for its officials and staff and to establish a relationship with the Local Government Management and Leadership Partnership, a cooperative project of the East-West Gateway Coordinating Council, the University of Missouri-St. Louis and University Outreach and Extension (the "Gateway Partnership"). In connection with training, the City Council has directed the Mayor and other appropriate officials and staff to recommend to it for its approval greater expenditures toward training programs. With respect to the Gateway Partnership, this relationship will provide the city with additional resources at no cost to the city. These resources will include (a) direct technical assistance and advice to the City Council, officials and employees; (b) training programs to enhance the ability of the Mayor and the City Council to accomplish their duties; (c) advice on grant funding opportunities; (d) facilitating collaboration and cooperation between the City and other local governments; (e) teaching and advising students for local government careers and facilitating mechanisms to get students involved in local government activities; and (f) bringing the resources of East-West Gateway and the University to bear in addressing local government problems.*

*The city's commitment to greater training measures and the engagement of the Gateway Partnership will provide needed resources and assistance to the City Council in meeting its objectives.*

This report is intended for the information of the city's management and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

REVIEW OF THE  
DIVISION OF AGING'S  
MONITORING OF NURSING HOMES  
AND  
HANDLING OF COMPLAINT INVESTIGATIONS

**From The Office Of State Auditor  
Claire McCaskill**

Report No. 2000-13  
March 1, 2000

AUDIT REPORT

Office Of The  
State Auditor Of Missouri  
Claire McCaskill

March 2000

**The following problems were discovered as a result of an audit conducted by our office of the Division of Aging's monitoring of nursing homes and handling of complaint investigations.**

**INSPECTIONS FOUND TO BE PREDICTABLE**

Our audit determined serious problems with inspections of nursing homes. Many citizen complaints received by our office allege that nursing home facilities were aware, or could predict, when the next inspection would occur. Those complaints further allege that facilities often make temporary or cosmetic changes in their staffing levels, physical environment, and quality of care in an effort to mask underlying systemic problems.

Division of Aging personnel acknowledged that it is not unusual for staffing levels to increase once an inspection begins and that this practice results in a skewed picture of actual facility staffing. Scheduling inspections in a somewhat predictable pattern tends to offset the unannounced aspect of the surveys and inspections and provides facilities the opportunity to make temporary improvements in staffing levels and the condition of the facility to coincide with the expected date of the inspection. During our review we noted several examples of the inspection order and/or inspection dates of facilities being very patterned.

In September 1998, the Division of Aging adopted a revised inspection scheduling policy designed to reduce the predictability of facility inspections. The Division of Aging should continue to identify and implement ways in which the predictability of the inspections could be reduced by varying the chronological order and timing of inspections.

**MINIMUM INSPECTION REQUIREMENTS NOT BEING MET/ADDITIONAL INSPECTIONS DO NOT OCCUR**

Our review also revealed several other problems related to the inspection process. The Division of Aging has not been able to make the minimum number of inspections required by law, much less perform additional inspections. Nevertheless, the Division of Aging rarely performs additional inspections. It would appear the Division of Aging could identify the chronically poor performing facilities and subject these facilities to additional onsite inspections. Additional inspections may help identify deficient conditions in a more timely manner and help force poor performing facilities to maintain a higher level of care throughout the year. Three examples of inspections not being adequately performed or documented, and/or deficiencies being inappropriately removed from the inspection report were noted. In addition, Division of Aging tended to cite more deficiencies when federal inspectors were present.

**FAILURE TO INVESTIGATE COMPLAINTS IN A TIMELY MANNER**

The Division of Aging does not always initiate complaint investigations in a timely manner. Complaint investigation reports are not submitted to the central office in a timely manner, particularly for complaints assigned the Springfield, St. Louis, and Kansas City Regional Offices. Numerous other problems regarding complaint investigations were noted at the Kansas City Regional Office including instances where the reporter of the complaint was not properly notified as required by state law. Also, facilities which correct the cause of the violation before the complaint investigation occurs cannot be sanctioned unless there is serious harm or injury.

(over)

YELLOW SHEET

The division does not study the sanctions imposed on nursing homes to determine which are most effective in bringing these facilities into compliance with standards. According to the division, one of the state's sanctions available, a monetary penalty, is currently too burdensome to be effective. In addition, plans facilities submit to correct sub-standard conditions often were not effective to prevent a repeat deficiency, or the plan of correction was not implemented.

#### **MINIMUM STAFFING REQUIREMENT FOR NURSING HOMES SET ASIDE**

Our audit also reviewed the Division of Aging's work as it related to the adequate staffing of nursing homes. Many complaints received by our office alleged facilities were understaffed which resulted in inadequate care provided to their residents. State law requires the Division of Aging to set minimum staffing requirements. However, in September 1998, the division rescinded the minimum staffing requirement which was too low to provide adequate care to nursing home residents. Since there no longer is a minimum staffing ratio which addresses the number and qualifications of direct resident nursing care, this action contradicted state law. The Division of Aging should establish a reasonable minimum allowable staffing requirement that also clearly establishes that additional staffing may be necessary based on resident dependency levels. The audit also recommended the division compare actual staffing hours at facilities to staffing levels recommended by the new system under development.

The audit noted that a statistic, provided by the Division of Aging in a response to an audit recommendation, regarding the number of facilities cited for inadequate staffing (229 of 491, or 47%) is misleading as it also includes cites for staff qualification and training issues. According to a June 1999 report generated by Division of Aging from the Online Survey and Certification Reporting System (OSCAR), only 42 of 492 (8.5%) facilities were cited for inadequate staffing during the most current survey.

#### **MANY DISQUALIFIED FROM WORKING WITH CHILDREN AND MENTALLY HANDICAPPED FOUND TO BE WORKING IN NURSING HOMES**

The Division of Aging is required to maintain a listing of persons who have abused, neglected, or exploited the elderly and disabled. Nursing homes, residential care facilities, businesses who hire nurses aides, hospitals, and home health agencies are prohibited from hiring anyone on the employee disqualification listing (EDL). We identified 21 instances in which a nursing home or in-home care provider under contract with the department had hired a person listed on the EDL.

The Division of Aging does not always issue a deficiency to facilities that hire persons listed on the EDL. We also noted the Division of Aging does not have adequate procedures in place to identify employers who do not perform criminal background checks.

More than 1,100 persons listed in the Department of Mental Health employee disqualification listing and the Central Registry of Child Abuse and Neglect were working in nursing homes or at in-home care providers. In addition, instances were noted in which persons listed on the Aging and Mental Health listings and within the abuse and neglect registry were working in other inappropriate work settings. These concerns will be addressed in a subsequent report to be issued by the State Auditor.

**IMPORTANT:** Immediate legislative action regarding at least two major findings of this audit are needed to better insure the quality of care for those dependent upon nursing homes as well as Division of Aging supervision of those facilities.

- Current state law allows nursing homes to avoid all fines and penalties if they correct reported violations by the time the division reinspects the nursing home on all violations except those that result in a serious physical injury. In addition, statutory provisions for penalties as they relate to repeat violations or problem homes are inadequate. As a result, penalty provisions are lacking and grossly inadequate.
- Also, this audit points out that the Division of Aging is unable to disqualify individuals from nursing home employment who are prohibited from working with children and/or the mentally handicapped. Consequently, it is vitally important appropriate legislation be enacted to better insure the quality of care and safety of nursing home residents.

**CLAIRE C. McCASKILL**  
Missouri State Auditor

Honorable Mel Carnahan, Governor  
and  
Gary J. Stangler, Director  
Department of Social Services  
and  
Richard Dunn, Director  
Division of Aging

We have conducted a review of the Division of Aging's monitoring of nursing homes and handling of complaint investigations. The objectives of this review were to:

1. Review and evaluate the division's compliance with certain statutory requirements regarding inspections of nursing homes and residential care facilities.
2. Review and evaluate the division's compliance with certain statutory requirements regarding investigation and processing of complaints.
3. Review certain management controls and practices to determine the propriety, efficiency and effectiveness of those controls and practices as they relate to the monitoring of nursing homes and complaint investigations.

Our review was made in accordance with applicable generally accepted government auditing standards and included such procedures as we considered necessary under the circumstances. In this regard, we reviewed applicable state and federal laws, we interviewed applicable personnel and inspected relevant records and reports of the Division of Aging, some nursing homes, and advocacy groups. We also received significant input from concerned citizens who had contacted our office with additional information about various nursing homes and Division of Aging practices.

As part of our review, we assessed the Division of Aging's management controls to the extent we determined necessary to evaluate the specific matters described above and not to provide assurance on those controls. With respect to management controls, we obtained an understanding of the design of relevant policies and procedures and whether they have been placed in operation and we assessed control risk. In order to assess control risk, we performed tests of controls to obtain evidence regarding the effectiveness of the design and operation of certain policies and procedures.

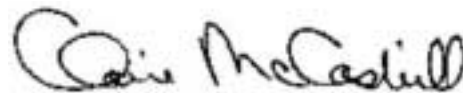

The accompanying Background Information is presented for informational purposes. This information was obtained from the Division of Aging and was not subject to the procedures applied in the review of the Division of Aging's monitoring of nursing homes and handling of complaint investigations.

Our review was limited to the specific matters described above and was based on selective tests and procedures considered appropriate in the circumstances. Had we performed additional procedures, other information might have come to our attention that would have been included in this report.

The accompanying Background Information is presented for informational purposes. This information was obtained from the Division of Aging and was not subject to the procedures applied in the review of the Division of Aging's monitoring of nursing homes and handling of complaint investigations.

The accompanying Management Advisory Report presents our findings and recommendations arising from our review of the Division of Aging's monitoring of nursing homes and handling of complaint investigations.

A handwritten signature in dark ink, appearing to read "Claire McCaskill". The signature is fluid and cursive, with the first name "Claire" being more prominent than the last name "McCaskill".

Claire McCaskill  
State Auditor

September 17, 1999 (fieldwork completion date)

## BACKGROUND INFORMATION

DEPARTMENT OF SOCIAL SERVICES  
DIVISION OF AGING  
MONITORING OF NURSING HOMES  
AND  
HANDLING OF COMPLAINT INVESTIGATIONS  
BACKGROUND INFORMATION

The Division of Aging (DA) of the Department of Social Services was created on October 1, 1979 by executive order. On August 13, 1984, the DA was statutorily established by Section 660.050, RSMo. It serves as the central agency to coordinate all programs relating to the lives of older Missourians. Its goals are to improve the quality of life, maintain personal dignity, and protect the basic rights of Missouri's senior citizens. Its services include institutional programs which safeguard residents in long-term care facilities; home and community care programs which provide support for older persons who live in the community; and programs for immediate assistance to older persons and disabled individuals who encounter abuse, neglect, or exploitation. The DA promotes public awareness of the needs and abilities of older persons while maximizing independence for older Missourians.

In accordance with the Omnibus Nursing Home Act, the DA is responsible for assuring the safety, health, welfare, and rights of persons residing in institutional facilities. The division has the legal authority to intervene in cases where abuse, neglect, or exploitation occurs among institutionalized elderly or disabled persons. The Institutional Services Unit conducts inspections of nursing homes and residential care facilities, conducts investigations of complaints of abuse or neglect at long-term care facilities, develops and implements appropriate rules and regulations in accordance with the Omnibus Nursing Home Act, and along with the U.S. Department of Health and Human Services, recommends Medicaid/Medicare certification of intermediate care and skilled facilities. In addition, the division assesses eligibility for Medicaid and cash grant assistance for long-term care residents, licenses nursing home administrators, reviews and approves architectural plans for proposed long-term care facilities, and provides data for certificate of need determinations.

The Home and Community-Based Services Section, includes the Missouri Care Options program, which is a comprehensive and coordinated approach to support elderly and disabled persons in their homes and communities. This section conducts investigations of complaints of abuse, neglect, or exploitation for the elderly and disabled who are not residing in institutional facilities and provides screening, assessment, and protective services if needed. The Older Americans Act unit monitors and provides guidance to the Area Agencies on Aging which operate various home and community programs for the elderly and disabled. The State Long-term Care Ombudsman provides oversight and assistance to the ten regional ombudsman programs, ensures complaints received by the office are investigated and coordinates the activities with other advocacy groups.

During the year ended June 30, 1999, there were about 1,250 licensed facilities, and the DA received about 7,400 Institutional Services complaints and about 14,000 Home and Community Services complaints.

## MANAGEMENT ADVISORY REPORT SECTION

Management Advisory Report -  
State Auditor's Recommendations

REVIEW OF THE  
DIVISION OF AGING'S  
MONITORING OF NURSING HOMES  
AND  
HANDLING OF COMPLAINT INVESTIGATIONS  
SUMMARY OF FINDINGS

1. Inspections (pages 9-20)

The Division of Aging (DA) does not appear to utilize its centralized data base to monitor compliance with state laws regarding the timing of facility inspections. In addition, the DA failed to conduct required inspections of these facilities. The DA schedules inspections in a somewhat predictable manner. The DA does not compare the results of its inspections to regional or national statistics. A direct correlation between the number of deficiencies cited and the presence of federal inspectors was noted. Examples of inspections not being adequately performed or documented, and/or deficiencies being inappropriately removed from the inspection report were noted.

2. Complaint Investigation Processing and Procedures (pages 20-28)

The DA does not always initiate complaint investigations in a timely manner. Complaint investigation reports are not submitted to the central office in a timely manner, particularly for complaints assigned the Springfield, St. Louis, and Kansas City Regional Offices. Numerous other problems regarding complaint investigations were noted at the Kansas City Regional Office. Also, facilities which correct the cause of the violation before the complaint investigation occurs are rarely sanctioned.

3. Report Deficiencies, Sanctions, and Corrective Action (pages 28-35)

The DA does not study the effectiveness past sanctions have on future compliance by facilities, and does not always consider a facility's history of past noncompliance when determining sanctions. The federal civil monetary penalty (CMP) appears to have been an effective sanction; however, the state CMP process is too onerous and burdensome. Plans of Correction (POC) submitted by facilities which have been cited for deficiencies are often ineffective and/or the POC is not properly monitored for compliance.

4. Staffing of Nursing Homes (pages 35-42)

The DA rescinded minimum staffing requirements. This action appeared to contradict the intent of state law. In addition, the rescinded staffing requirement appears to have been too low to provide adequate care to nursing home residents. A new system being developed provides an estimate of the actual hours of nursing care needed to meet the needs of the actual residents in a specific nursing home. The DA needs to compare staffing levels recommended by this system to actual staffing information from the facilities. DA surveyors do not review facility staffing levels and

compare them to any minimum standard or industry benchmark. The DA did not sanction a facility to the fullest extent warranted when a widespread pattern of understaffing existed.

5. Employee Disqualification Listings, Central Registry, and Criminal Backgrounds (pages 42-47)

The DA is required to maintain a listing of persons who have abused, neglected, or exploited the elderly and disabled. Nursing homes, residential care facilities, businesses who hire nurses aides, hospitals, and home health agencies are prohibited from hiring anyone on the employee disqualification listing (EDL). We identified 21 instances in which a nursing home or in-home care provider under contract with the department had hired a person listed on the EDL. The DA does not always issue a deficiency to facilities that hire persons listed on the EDL. In addition, the DA does not have adequate procedures in place to identify employers who do not perform criminal background checks. More than 1,100 persons listed in the Department of Mental Health employee disqualification listing and the Central Registry of Child Abuse and Neglect were working in nursing homes or at in-home care providers. In addition, instances were noted in which persons listed on the Aging and Mental Health listings and within the abuse and neglect registry were working in other inappropriate work settings.

REVIEW OF THE  
DIVISION OF AGING'S  
MONITORING OF NURSING HOMES  
AND  
HANDLING OF COMPLAINT INVESTIGATIONS  
MANAGEMENT ADVISORY REPORT

|           |                    |
|-----------|--------------------|
| <b>1.</b> | <b>Inspections</b> |
|-----------|--------------------|

Under federal and state regulations, the Division of Aging (DA) is charged with the responsibility to conduct inspections of licensed nursing homes and residential care facilities. Currently there are about 1,250 of these facilities operating within the state. Federal regulations require nursing homes that are certified to participate in the Medicare and Medicaid programs to be subjected to an inspection (also commonly referred to as a survey) at least once every fifteen months. State regulations require each licensed nursing home and residential care facility to be subjected to at least two inspections annually. Under DA policies, one of those inspections, designated a "full" inspection, must determine whether the facility is in full compliance with all state licensing and provision of care requirements except those reviewed during the interim inspection. The DA usually performs the "full" inspection and the federal inspection at the same time. DA policy requires the second annual state inspection process, designated the "interim" inspection, to focus on quality of care from an outcome perspective and compliance with six statutorily mandated areas (surety bonds, nurse aides training, resident funds, operational policies, grievance system, licensed administrator), and the federal Patient Self-Determination Act. Section 198.032, RSMo 1994, requires inspection reports to be centrally filed in a manner that facilitates rapid access and to be available to the public for examination and copying.

Our review of the DA's inspection process noted the following areas of concern:

- A. For inspections where deficiencies are found, the results of both full and interim state inspections are documented on a DA-107 form. If no deficiencies are found, the inspection is documented on a DA-102 form. The forms along with any necessary statements of deficiencies, plans of correction, and required letters of the inspection results make up an inspection report packet and those packets are submitted to the Central Office for data entry to DA's centralized data base and filing in the central file room. The DA policy regarding submission of completed federal inspection packets is to submit the packet, except in rare instances, within 90 days following the exit conference.

The DA does not appear to utilize its centralized data base to monitor compliance with state laws regarding the timing of facility inspections. We reviewed inspections completed for state fiscal years (SFYs) 1998, 1997, and 1996, and noted that inspection reports are often not submitted to the Central Office in a timely manner. We identified 81 inspection reports, some dating back to SFY 1996, for which the inspection had been completed but

the inspection report had not been submitted to the Central Office. We also identified 102 inspection reports which had been submitted to the Central Office but the results had not been entered into the DA's computerized data base. Because inspection reports are not submitted to and entered into the database maintained by Central Office timely, the DA is unable to rely on the system to properly monitor and ensure inspections mandated by state law have been performed. In addition, the reports that are not filed with the Central Office are not centrally filed and therefore do not appear to be readily accessible to the public as required by Section 198.032, RSMo 1994.

- B. Because the DA's system does not maintain the current status of facility inspections, we asked the DA to research inspection records to determine if the DA was in compliance with state inspection requirements for SFY 1999. The DA determined it had failed to conduct 53 full and 363 interim inspections during SFY 1999. As a result, it appears the DA is not in compliance with the state law regarding inspections for nursing homes and residential care facilities.

We compared the listing of facilities that did not receive a required inspection in SFY 1999 to the listing of facilities that had been issued a notice of noncompliance by the DA since 1997. A notice of noncompliance is only issued to a facility that was cited for a Class I violation or had a Class II violation that had not been corrected by the time of the revisit. A Class I violation is one which presents either an imminent danger to the health, safety, or welfare of any resident, or a substantial probability that death or serious physical harm would exist. A Class II violation would have a direct or immediate relationship to the health, safety, or welfare of any resident, but which does not create imminent danger. We determined twenty-three of the facilities that did not receive the required inspection had at least two notices of noncompliance issued in the last three years. One of those facilities had not received either the full or interim inspection.

The DA attributed some degree of the missed inspections to the significant increases in the number of serious complaints in SFY 1999 which required extensive investigations by DA inspectors. The total number of complaints received by the DA increased 9 percent from SFY 1997 to SFY 1998 and 21 percent from SFY 1998 to SFY 1999. In addition, the DA stated a substantial increase in the number of notices of noncompliance issued in the last two years required significant additional inspector time to write up the deficiencies, monitor those facilities, and provide testimony at hearings on the enforcement actions resulting from those notices.

The DA should take immediate action to comply with state law regarding the inspection of nursing homes and residential care facilities.

- C. We also examined inspection reports for SFYs 1998, 1997, and 1996. The DA was unable to provide documentation that any inspection, either full or interim, had been conducted at two intermediate care facilities in SFY 1996 or at one residential care

facility in SFY 1997. In addition, the DA was unable to provide inspection reports to substantiate that 23 full and 68 interim inspections had been performed in SFYs 1996 through 1998.

The DA maintains that inspectors were at these facilities and offered employee time records to verify their contention. However, without a completed inspection report, the DA is not in compliance with state law and there is no documentation that completed inspections were properly performed. In addition, written inspection reports are necessary to apprise the public whether facilities are in compliance with various state and federal regulations.

- D. Section 198.022, RSMo 1994, requires the DA to make **at least** two inspections per year. This statute also allows the DA to make as many inspections as it deems necessary. As noted above, the DA has not even been able to make the minimum number of inspections required by law, much less to perform additional inspections. Nevertheless, the DA rarely performs additional inspections. It would appear the DA could identify the chronically poor performing facilities and subject these facilities to additional onsite inspections. Additional inspections may help identify deficient conditions in a more timely manner and help force the poor performing facilities to maintain a higher level of care throughout the year.
- E. Federal and state regulations require inspections to be unannounced and unpredictable. Many citizen complaints received by both our office and the DA allege that facilities were aware of or could predict when the next inspection would occur. Those complaints further allege that facilities often make temporary or cosmetic changes in their staffing levels, physical environment, and quality of care in an effort to mask underlying systemic problems when the facility thought the inspection was pending. DA personnel acknowledged that it is not unusual for staffing levels to increase once an inspection begins. Scheduling inspections in a somewhat predictable pattern tends to offset the unannounced aspect of the surveys and inspections. During our review we noted several examples of the inspection order and/or inspection dates of facilities being very patterned.

Predictable inspections provide facilities the opportunity to make temporary improvements in staffing levels and the condition of the facility to coincide with the expected date of the inspection. In September 1998, the DA adopted a revised inspection scheduling policy. Under the revised policy, regions are to vary the geographical ordering of the inspections. Also, to further decrease the predictability of inspections, the DA starts at least 10 percent of the inspections in the evening or night hours or on weekends.

The DA should continue to identify and implement ways in which the predictability of the inspections could be reduced by varying the chronological order and timing of inspections.

- F. During the inspection process, inspection staff review 190 areas or categories to identify violations of state and federal regulations. Violations noted in these categories are called deficiencies. We obtained a September 1999 On-line Survey and Certification Reporting System (OSCAR) summary report of deficiencies issued to the certified facilities. The report included summarized data on 559 skilled nursing facilities (SNFs) in the state which included approximately 490 facilities inspected by DA. The other SNFs are hospital based and are inspected by the state's Department of Health. This summary report revealed the percentage of homes cited for the 190 categories by region, state, and the national average. We noted the DA cited certified facilities at a rate 5 percent higher than the national average for four of the 190 categories. The cite rate was 5 percent below the national average rate for nine categories. The total number of facility/cites for the state was 2,475, with 559 facilities, for an average cite rate of 4.43 deficiencies per facility for Missouri. The national average cite rate per facility is 5.36 deficiencies per facility. The DA had not studied this readily available report in any detail and could not explain why the DA average cite rate per facility was lower than the national average. While the difference between the cite rate of Missouri and the nation was often slight, the DA was below the national average in 155 categories, the same for two categories, and above for only 33 categories.

We also reviewed the variations in the cite rates among the seven regions within the state. The lowest cite rate was Region 1 in Southwest Missouri at 3.36 cites per facility. Region 4 in Northwest Missouri averaged 7.25 cites per facility. Again DA has not studied the variation between regions in much detail. Industry officials and advocates for the elderly have stated one of their biggest concerns with the DA inspection program is the apparent lack of consistency between inspections and the variations in interpretation and enforcement efforts between regions.

The DA should study the available reports of deficiency patterns to identify areas where enforcement may be weak or inconsistent and consider their impact upon the inspection process.

- G. The U.S. Department of Health and Human Services, Health Care Financing Administration (HCFA), the federal oversight agency, conducts two types of federal monitoring surveys (FMS) to determine if the DA is complying with the federal inspection process.

HCFA performs observational inspections and accompany the DA inspectors during the actual onsite inspection process. HCFA provides guidance and advice to the state inspectors to help them improve their inspection technique. We identified 31 facilities that had been subjected to an observational FMS during the period April 1996 through November 1999, and for which we could compare the number of deficiencies noted to the previous DA inspection. More deficiencies were cited during the FMS than the previous DA inspection for 19 of the 31 facilities. One facility increased from 5 to 45

deficiencies. In total, 208 deficiencies were cited during the previous DA inspection and 320 were cited at the subsequent FMS.

HCFA inspectors also conduct comparative or look behind inspections in which the federal inspectors conduct a separate inspection and compare their results to the results of the state inspection. HCFA then provides the DA with follow-up reports that identify areas in which the DA should consider providing additional training to inspection staff.

In a United States General Accounting Office (GAO) report issued in November 1999, the GAO concluded that HCFA's presence during surveys is likely to make state surveyors more attentive to their inspection tasks than they would be if they were not being observed. The report also contained the following example related to a Missouri nursing home:

"...surveyors from HCFA's Kansas City region found 24 deficiencies in a Missouri nursing home that state surveyors did not identify during their survey conducted about 6 weeks earlier. One of these deficiencies identified six residents whose nutritional status was not being adequately assessed by the nursing home, resulting in significant weight loss in several cases. One resident lost 19 percent of his weight between June and October 1998. His weight at the time of HCFA's survey was 93 pounds, which HCFA indicated was significantly below the resident's minimally acceptable body weight of 108 pounds. Fewer than 4 months after his admission to the nursing home, this resident also had developed two moderately severe pressure sores, which the home was inappropriately treating with a cream the manufacturer stated was not intended to heal pressure sores but rather to prevent irritation to the skin. According to HCFA surveyors, these deficiencies affecting multiple residents should have been evident at the time of the state's survey, but the state surveyors did not cite them."

An increase in the number of deficiencies cited when HCFA inspectors are available for guidance and advice may indicate a need for additional training for state inspectors.

- H. A statement of deficiencies (SOD) is prepared by the inspection team members who were present during the onsite inspection or complaint investigation. The SOD is then reviewed by the team supervisor and at least one other ranking manager, often the regional supervisor. The supervisory review is intended to ensure the SOD meets the technical writing standards, appears to be complete and accurate, and is based upon clear and convincing evidence that the violations noted were in fact violations and were well

supported by the facts and examples used. When the supervisory review is complete, the SOD is sent to the facility's management.

If the facility's management disagrees with the violations noted in the SOD, they can request an informal dispute resolution conference (IDR). The IDR process allows the facility to present additional evidence to show that any particular deficiency cited was not a violation or was not as serious as the inspectors indicated. Representatives of the facility, and often their attorneys, meet with several DA management and usually members of the inspection team. The DA then decides whether to uphold the deficiency, remove the deficiency, or lower or raise the severity level at which the deficiency is cited. IDR's are recorded and summary notes are made to document the decisions made.

We reviewed more than 100 SODs and generally found them to meet the supervisory review criteria noted above. We noted many instances in which one or more proposed deficiencies had been deleted by a supervisor. In most instances where a proposed deficiency had been deleted, the supporting evidence for the deficiency was marginal, the examples were weak, or it was decided to issue the deficiency under a different category. However, we noted two SODs which were extensively revised by DA management:

- 1) In December 1998, the inspection team conducted a survey and on December 22 an SOD was hand carried to the facility which identified fourteen violations of federal regulations, two violations of the Life Safety Code, and ten violations of state regulations. On December 28, the facility owner and the administrator met with DA management to protest the deficiencies and requested an IDR.

Instead of proceeding with the IDR process for the initial SOD, DA management decided that Central Office staff would conduct a review of documents and an on-site visit to interview staff, residents, and make observations of the facility. On December 29, a member of the Central Office staff visited the facility. On December 30, the facility's law firm presented a formal request for an IDR to the regional manager. On January 2, the DA issued a letter stating the results of the inspection had been revised and the facility was determined to be deficiency free.

Subsequent to DA's January 1999 decision to issue a deficiency free report to the facility, the DA returned to the facility in April 1999 to conduct a complaint investigation. This investigation resulted in the DA citing the facility for three federal and five state deficiencies, including four Class I deficiencies, and recommending a federal CMP of \$7,050 per day for 15 days. The facility has since requested an IDR.

- 2) In November 1998, the DA conducted a inspection and prepared an SOD, dated December 10, citing eleven federal and nine state and two life safety code

violations. The facility, through its attorney in a letter dated January 6, 1999, protested the citations and requested an IDR. DA management began an in-depth review of the SOD and the inspectors' workpapers, and held discussions with the inspection staff. After the initial review by an upper level management official, the number of deficiencies was reduced to six federal and six state deficiencies. The facility continued to protest and by January 22, 1999, the DA agreed to reduce the number of deficiencies to three federal and four state violations.

In late January, the regional manager and the upper level management official who had conducted the in-depth review of the SOD visited the facility and interviewed the residents identified in the remaining federal categories. The DA official stated that the residents were impaired, confused, or demented to the point that any statement by those residents could not be relied upon. On February 15, 1999, the DA issued the facility a letter stating that all proposed deficiencies had been deleted. Again the formal IDR process was not utilized in this instance.

The above instances indicate that either the DA inspection team did not adequately perform and/or document the results of the inspections, or the DA management inappropriately removed some deficiencies initially cited by the inspection team. DA management stated the reasons for the significant changes to these SODs related to insufficient documentation of findings and problems associated with report writing. Full and complete documentation as to why changes were made to the SODs is not available. One method to provide that documentation is for the DA to follow its established process for resolving disputed deficiencies.

- 3) We also reviewed a summary of a DA official's review of another inspection. After the inspection had been completed and the SOD prepared, a complaint alleged to DA management that the inspection had not been conducted properly, that information provided to the inspector was ignored, and that some deficiencies that existed had not been cited. The DA official's summary indicated that at least three Class I violations were well documented in the inspector workpapers but no violation was issued. Those violations were inadequate staffing, the facility administrator's failure to report a broken arm to the DA hotline, and failure to provide a pureed diet as ordered by a doctor which resulted in a resident choking to death. The DA provided the inspection team with additional training as a result of its internal review.

The DA should establish appropriate review procedures to ensure SODs contain all deficiencies identified by the survey team. In addition, the DA should continue to identify additional training needs and provide training to inspector staff.

**WE RECOMMEND** the Division of Aging:

- A -D. Develop and utilize a centralized inspection monitoring system to track inspections and then ensure completed inspections are submitted to the Central Office and entered into the system in a timely manner. We also recommend the DA perform all inspections as required by state law, and take the necessary steps which would allow the DA to perform additional inspections of poor performing facilities.
- E. Continue to develop and implement policies to reduce the predictability of inspections.
- F. Analyze the available reports of deficiency patterns to identify areas where enforcement may be weak or inconsistent and consider their impact upon the inspection process.
- G&H. Ensure inspectors are adequately trained and supervised, require the informal dispute resolution process to be followed when facilities dispute statements of deficiencies, ensure all deficiencies are adequately documented, and are accurately and properly reported, and develop procedures to ensure the reasons for changing draft SOD's are adequately documented.

### **AUDITEE'S RESPONSE**

- A. *During State Fiscal Year 1998, the division entered 2,422 (98.6%) of the state licensure full and second inspections into the central data base; 2,591 (98.9%) during SFY 1997 and 2,394 (99.0%) during SFY 1996. We agree that 81 or 1.1% of the inspection reports over the three year period were retained in our regional offices and that 102 or 1.4% of the reports over the three year period were in central files without being entered into the CRANE system. As a result of the auditor's recommendations, we have taken action to strengthen our internal controls over entry of data into the CRANE system; CRANE report review by regional managers and subsequent submission of the paper file to the central file unit. DA working with consumers and the long-term care industry noted the shortcomings in the federal On-line Survey, Certification and Reporting (OSCAR) System and began developing and implementing a new state system, the Automated Licensure, Inspection, Certification Environment (ALICE) under a five (5) year plan that began in 1996. The system will result in a centralized data base designed to support all primary agency operations and meet federal and state data collection requirements.*

*The division is complying with the requirement of making reports available to the public. State law requires the division to make inspection reports and written reports of investigations of complaints, of substantiated reports of abuse and neglect received in accordance with section 198.070, RSMo and complaints received relating to the quality of care of facility residents accessible to the public. These reports are to be available for examination and copying, provided that such reports are disclosed in a manner that does not identify the complainant or any particular resident. Records and reports are to clearly show what steps the division and the institution are taking to resolve problems indicated in the inspections, reports and complaints. Additionally, the federal State Operations Manual*

*(SOM) indicates that information from the survey process may be provided to interested parties within 14 calendar days after the information is made available to the facility. Provisions of the Federal Freedom of Information Act (FOIA) require that when a request to disclose related to the federal Medicare/Medicaid facilities is received, the information be released within 10 working days or if this is not possible, the requestor be notified within 10 working days when the information will be released.*

*Routinely, survey and inspection packets including complaint investigations are retained in the regional office until the survey or inspection process including the facility's submission of a plan of correction is complete (including any resulting informal dispute resolution or facility revisit). Our process has been to promptly notify the requestor of information when the information is not yet in the central file or not yet accessible by the public and provide a date when the information will be provided. Virtually every file has to be reviewed prior to release to the public to ensure that the federal and state requirements related to confidentiality of client specific information are met. Central files bases the date provided to the requestor upon the federal requirement that the facility receive the information 14 days prior to its' public release and the state requirement for accessibility. As necessary to meet the needs of individual requestors, central files will ask the region to fax or next-day mail releasable material. Allowable information is then made available to the requestor after resident specific information is removed. Again, the division believes the federal and state requirements to provide ready access to information within reasonable timeframes are being met through this process.*

- B. DA concurs that we did not meet the state requirement for two state inspections per year, one of which is an interim inspection in State Fiscal Year 1999. The division completed in State Fiscal Year 1999 full licensure inspections including adult day care programs for 1,173 or 95% of the facilities and programs in the state. Additionally, the division completed a total of 762 or 62% of the required interim inspections. During State Fiscal Year 1999, the division began responding to a dramatic increase in nursing home violations. The number of state notices of noncompliance nearly doubled from 110 to 211. The number of Medicare/Medicaid facilities cited for substandard quality of care nearly tripled from 31 to 90. The number of Medicare/Medicaid facilities cited for immediate jeopardy nearly quadrupled from 20 to 73. The division requested HCFA impose denial of payment on 63 facilities for new Medicare/Medicaid admissions and requested HCFA impose Civil Monetary Penalties (CMPs) 51 times against 30 facilities. Complex cases involving these legal actions (See Chart 2) routinely result in up to an additional 300 hours of staff time per instance. Staff time is spent conducting investigations into allegations of abuse/neglect, copying reports, letters and other material requested through discovery, responding to interrogatories, being deposed, participating in administrative meetings and hearings and preparing materials for employee disqualification list referrals.*

*Institutional Services management staff decided that should any requirements not be met we would not meet the state licensure requirement for a second visit. Additionally, full*

*inspections would be conducted in conjunction with the federal certification survey in Medicare/Medicaid facilities, even if the state 12 month timeframe was exceeded. This ensured that the top federal priority for completion of all Medicare/Medicaid certification surveys within a 12 month average (surveys conducted between 9 and 15 months) was met. Further, we began researching alternative methods to meet the state licensure requirement, such as use of outside contractors. We were unable to find a viable alternative due to the training timeframes (i.e., 9 to 12 months for a fully trained surveyor) for inspection staff.*

- C. *The division's policy has been to maintain copies of all inspection and complaint reports, other than those specifically required to be purged (i.e., unsubstantiated reports of abuse/neglect). State statute at 198.032, RSMo, sets forth requirements for maintaining those records related to facilities "noncompliance". Language is specific in that records and the steps the division and the institution are taking to resolve problems indicated in the inspections, reports and complaints are kept and available to the public or where substantiated abuse/neglect was found. Until House Bill 316 was passed during last year's legislative session, statute had been silent as to the requirement for the division to maintain a history of compliance at a facility.*

*During the three year period (SFY 1996 through SFY 1998), the division completed and is able to produce hard copies of 7,407 full and interim inspections. As stated in the auditor's report, we were unable to provide copies of 23 full and 68 interim inspections or 1.2% of the total inspections completed. As noted in the auditor's report, the division was able to show through time reports that survey staff were in the facilities during the applicable time frame. We are reviewing and will strengthen our documentation policies to ensure that all copies of documents are entered into the central data base and copies maintained in our central file unit.*

- D. *During State Fiscal Year (SFY) 1999, the division conducted a combined total of 3,368 federal surveys, state licensure full and interim inspections and revisits associated with the survey or inspection event. Division staff monitor "poor performing facilities a number of times a year by conducting:*

- C full inspections;*
- C interim inspections;*
- C revisits after issuance of a Statement of Deficiencies;*
- C complaint investigations;*
- C monitoring for up to 24 hours per day if warranted to safeguard residents; and/or*
- C a second full annual survey required by HCFA for two "poor performing" facilities under the President's Nursing Home Initiatives.*

*Currently, the Division of Aging, Institutional Services section has a total of 158 full time inspection staff. These staff are responsible for conducting state licensing activities, federal surveys and complaint investigations in the over 1,230 facilities statewide. A budget request has been submitted to the Legislature supporting additional inspectors enabling the division*

to provide the statutorily required inspections. We remain committed to meeting the state requirement for two inspections per year. We will continue to explore opportunities to spend more time in poor performing facilities.

- E. Due to the number of times DA staff are in facilities, predictability is somewhat inherent in the process, but we have taken actions to control for this tendency. Additionally, the state law for two inspections within a twelve month period (state fiscal year) and federal requirements related to survey averages and revisit timeframes (i.e., revisit near the time the facility alleges all corrections have been made) further increase the predictability of our visits. We concur with the goals of reducing the predictability of inspections and of fostering a highly qualified and competent survey staff having access to all information available to support their work.

- F. DA does review national and regional deficiency rates and patterns. The HCFA Online, Survey, Certification and Reporting (OSCAR) system serves as a starting point for our review, but has historically proven unreliable as a predictor of survey staff ability or facility status. Data available through the OSCAR system is limited to information collected during the latest four (4) annual facility surveys (routinely covering 48 months) and four (4) complaint investigations (routinely covering less than 6 months in a poor performing facility). DA has determined that we must examine multiple variables to make accurate assessments of facility performance and survey staff technical ability.

- G. During the current survey cycle, the division cited more deficiencies in 247 facilities than in the prior year, cited the same number of deficiencies in 64 facilities, cited a decreased number of deficiencies in 160 facilities and did not have two years data available for comparison in 14 facilities (excluding facilities where federal surveyors were present during either the current or previous process.) . This chart compares results of the Federal Observational Survey activity (on average 22 surveys per year) and state survey agency activity (on average 444 per year) in Missouri during the past three years.

DA agrees that there are significant differences in the citation rates of the current FOSS and previous 2 FOSS surveys as compared to the state average of a much larger population of surveys. Given the number of surveys conducted and this 4 year period, DA is more consistent in our citation rate than HCFA. The federal Health Care Financing Administration (HCFA) is responsible for providing the training including training plans and materials for survey staff. HCFA administers the Surveyor Minimum Qualification Test (SMQT) which is required to be passed by all qualified surveyors. HCFA has routinely performed the FOSS in facilities that do not have histories of being “deficiency free”. HCFA prefers their staff monitor in facilities with some level of noncompliance in their history. Therefore, we do not agree that the sole reason for the difference in the citation

rate is a result of the presence of federal surveyors and in fact, has more to do with conditions present in the facilities selected.

*DA disagrees that federal comparative surveys are comparable to state surveys of the same facility. Federal comparative surveys are completed using different criteria and resources than those set forth by HCFA for state survey agency use. Differences include: utilization of different numbers and types of survey staff; use of different samples of residents; reviews of different areas of resident care; the periods of time surveyed are not the same and findings from the federal comparative survey are not required to be legally defensible.*

- H. *DA has reviewed the two (2) examples (from the sample of 100) noted in the state auditor's review which relates to inappropriately removed deficiencies and DA was unable to make a similar determination from the information available. We noted that staff failed to adequately provide written documentation for removal of some deficiencies, however, upon interviewing those staff responsible, we determined their actions were within their scope and authority. DA's standard operating procedure allows for central office reviews including administrative reviews of statements of deficiencies (SODs) to determine, if errors have occurred in the survey process and to determine if supporting documentation and evidentiary matter is sufficient to warrant inclusion of a finding in the SOD. DA does not concur with the state auditor's opinion that management staff do not have the authority to review work of subordinates and make management decisions about the ability of the agency to sustain the conclusions reached. The division agrees that changes to SODs need to be adequately documented. We have reviewed the central office administrative review and quality assurance processes and have strengthened our internal controls over documentation requirements for these processes including feedback to field survey staff.*

## **AUDITOR'S COMMENT**

- H. The DA's contention that it is our position that the DA management should not review and make management decisions regarding the work of inspection staff is inaccurate. Obviously, it is necessary to review the adequacy of the work of inspection staff. However, it is also necessary for the DA to adequately document why changes, especially such extensive changes, are necessary to SODs. The need for this documentation is further magnified when the dispute resolution process is not used or avoided.

## **2. Complaint Investigation Processing and Procedures**

The DA is responsible for recording, investigating, and reporting the results of complaints made to the DA's elderly abuse hotline. Complaints are assigned to the Institutional Services (IS) section if the allegation concerns a nursing home or residential care facility or one of their residents. The DA received 7,399, 6,091, and 5,591 institutional complaints in SFYs 1999, 1998, and 1997, respectively. The Home and Community (HCA) section handles complaints for other clients or

potential clients of the DA. The DA received 14,099, 13,386, and 12,623 home and community complaints in SFYs 1999, 1998, and 1997, respectively.

Institutional Services complaints are classified in four categories, abuse and neglect (A/N), and Classes I, II, and III. Abuse is defined as the infliction of physical, sexual, emotional, or financial harm or injury. Neglect is the failure to provide services when such failure presents either an imminent danger to the health, safety, or welfare or substantial probability of death or serious physical harm. The classification of complaints is consistent with the standards defined in Section 198.085, RSMo Cumulative Supp. 1999. A Class I violation is one which presents either an imminent danger to the health, safety, or welfare of any resident, or a substantial probability that death or serious physical harm would result. A Class II violation would have a direct or immediate relationship to the health, safety, or welfare of any resident, but which does not create imminent danger. A Class III violation would have an indirect or potential impact on the health, safety, or welfare of any resident. Section 198.088, RSMo 1994 requires the DA to promptly review A/N, Class I and Class II complaints. Section 198.070 (5), RSMo 1994, requires DA to initiate investigation of A/N complaints within 24 hours and to notify the next of kin or responsible party as soon as possible, and to further notify them whether the report was substantiated or unsubstantiated.

For Institutional Services complaints, DA policy requires a completed investigation report for A/N and Class I complaints to be submitted to the Central Office within 60 days. Reports of Class II and III complaints are due at 120 and 150 days after receipt, respectively. With the exception of unsubstantiated A/N complaints, Section 198.032(2), RSMo 1994, requires written reports of investigations of complaints to be accessible to the public for examination and copying, provided such reports are disclosed in a manner which does not identify the complainant or any particular resident. By DA policy, HCA complaint reports are due within 90 days after receipt of the complaint. We reviewed the handling of complaints and noted the following concerns.

- A. The DA does not always initiate complaint investigations in a timely manner. DA policy, and in some cases state law, requires complaint investigations of abuse and neglect and Class I complaints to be initiated within 24 hours of the initial receipt of the complaint, Class II complaints to be initiated within 90 days, and Class III complaints to be initiated at the next visit to the facility. According to DA records, in SFY 1999 the DA failed to initiate complaint investigations within these timeframes 5.6 percent of the time for A/N, 6.4 percent for Class I, 5.1 percent for Class II, and 1.5 percent of the time for Class III.

Delayed initiation often makes it more difficult to determine whether an incident or violation actually occurred. As a result, the DA should ensure complaint investigations are initiated timely.

- B. We obtained the DA's report of overdue complaints dated May 10, 1999 and noted 1,657 complaints for which a completed summary report had not been submitted to the Central Office within the timeframes required by DA policy. Of these 1,290 were institutional

service complaints and were at least 120 days past the due date, including nine which had been received in 1996 and 108 which had been received in 1997.

The overdue complaint investigation report is produced monthly and distributed to the regions. The regions are to review the report and take necessary action to complete the investigation and submit any overdue reports. Apparently, overdue reports are given a very low priority by the regions. During our audit, our office had received numerous complaints from citizens stating that DA was unresponsive or untimely in their complaint investigations. The following table indicates the reports which were 120 days overdue by institutional service complaint type and region.

| Division of Aging 120 Day Overdue Institutional Services Complaint Investigation Reports (as of May 10, 1999) |                          |                           |                          |                      |                    |                             |                       |       |

- 1) As is evident from the table, timely completion of institutional complaint reports was a significant problem in DA state regions 1, 3, and 7 (and particularly in Region 3). We attempted to review the more serious complaints in those regions to determine whether the DA had investigated the complaints. There were 85 A/N and 232 Class I complaints which were at least 120 days overdue from these three regions.

At our request, the regional offices researched their files and provided the exit date and complaint conclusion status for the missing reports. The exit date is the date on which the DA discussed the resolution of the complaint with the facility administrator or representative. Of the 317 complaints which were at least 120 days overdue, the time between the initial complaint date and the exit date exceeded six months for 26 of these complaints and one year for 3 complaints.

- 2) We waited one month and then requested the DA provide the completed complaint investigation reports for the 317 A/N and Class I complaints which were at least 120 days overdue at the time of our earlier inquiry. Region 1 and Region 7 had submitted the overdue investigation reports, however, Region 3 failed to submit completed reports for 30 A/N and 68 Class I complaints. According to DA staff from Region 3, almost all of the missing complaints had been determined to be invalid or the allegation could not be verified. Even if a complaint is determined to be invalid or the complaint could not be verified, an investigation report is still required.

The following is an example of one of the complaints which is not supported by an investigation report:

- C One A/N complaint received December 1998 alleged that in October 1998, a legally blind woman with a broken ankle was being transferred by an employee to her bed and the employee caused her to fall to the floor. That employee yelled at her to get up and while she was trying to get up the employee twisted her causing her to break her knee and again she fell to the floor. A second employee then came into the room and both employees yelled at the woman to get up. The woman underwent surgery to repair the knee later that day. DA staff from Region 3 indicated the complaint was exited in April 1999 and the complaint was determined to be invalid. The facility named in the complaint was also named in four other missing complaint investigation reports.

Without completed investigation reports there is no assurance the complaints were investigated properly and timely, the conclusion status was reasonable, or that any appropriate enforcement action was taken. In addition, the missing reports will not be part of the public record as required by state law.

- 3) We compared the conclusion status of the 120 day overdue A/N and Class I complaints from Region 3 and noted that those reports were determined to be invalid 75 percent of the time. We noted that the average statewide rate over the last three years for which complaints were determined to be invalid was 31 percent for A/N and 46 percent for Class I complaints. Delay of investigations and completion of reports appeared to result in a decreased ability to identify valid complaints and therefore take any appropriate protective or enforcement action. As in any investigatory process, evidence is lost and memories fade, and involved parties lose interest with the passage of time.
- 4) Of the 98 missing Region 3 reports, 62 complaints arose from a Medicare and/or Medicaid certified facility. Under the State Operations Manual Section 7700, the completed complaint investigation report must be made on Form HCFA-562 and

entered into the OSCAR system within 90 days of the completion of the investigation (exit date) regardless of whether the complaint is substantiated or unsubstantiated.

- 5) We noted five instances in which a completed investigation report from Region 3 for the 120 day overdue complaints concluded that due to the excessive length of time that had passed since receipt of the report, the DA would not send the letter to the resident's family or the reporter as required by state law. Two examples of complaints where the reporter was not contacted follows:

C The first complaint, received May 2, 1996, alleged a resident was admitted to a hospital with unexplained injuries in February 1996 and was readmitted to the hospital in April 1996 and some of the resident's personal property had disappeared. The report indicated the DA conducted an on-site investigation and determined the complaint was invalid. The complaint was exited May 8, 1996. The investigator completed the report March 29, 1999, and the supervisor approved the report April 4, 1999. No letter was sent to the reporter due to the age of the complaint.

C The second complaint received October 14, 1996, indicated a resident had a black eye of unknown origin. The report indicates the investigation was initiated within 24 hours and the investigator was unable to verify the cause of the injury. The complaint was "reinvestigated" on March 25, 1999, and exited that day. The report was completed on March 29 and approved April 1, 1999. No letter was sent to the reporter due to the age of the complaint.

The DA should ensure complaint investigations are completed timely, the results of those investigations are properly documented, and required summary reports are submitted in a timely manner to help ensure appropriate enforcement actions are taken against facilities that are not in compliance with state and federal regulations. In addition, the DA should ensure all reports are available to the public, and ensure the resident's next of kin or the reporter is notified of the results of all complaint investigations.

- C. We noted that of the total 2,165 A/N complaints received in the SFYs 1999, 1998, and 1997, the complaint investigation report was assigned the "B" status (valid but corrected by time of investigation) 508 times (23 percent) and, of 3,285 Class I complaints, the "B" status was assigned 547 times (17 percent). The "B" status is to be assigned when the allegation in the complaint is valid or a regulatory violation has occurred but the DA cannot determine the harm or serious violation was clearly the fault of the facility. In each instance, there were one or more residents who were exposed to actual or potential serious harm. The "B" status is also assigned if the facility has taken corrective action by the time the DA

can investigate. This is often termed past noncompliance. Only in the most severe incidents does the "B" status noncompliance result in any punitive action against the facility. The following is an example of a complaint assigned the "B" status as well as not timely investigated:

- C      A resident who had a history of attempted and successful elopements from the facility was identified as missing at 8:40 p.m. The resident was returned to the facility at 1:40 a.m. by local police. This resident suffered from dementia and heart problems. The complaint was received on March 3, 1997. The complaint was investigated in December 1998 and was exited in January 1999. The facility was not issued a statement of deficiencies nor had any sanction imposed because of this incident. The resident was moved to another facility sometime after the elopement but before the investigation was conducted. The facility also had added a locked unit for residents having elopement risks.

As noted in the definitions above, a valid A/N or Class I situation has presented an imminent danger or substantial probability of death or serious harm to a resident. Nursing home operators and administrators are charged with the responsibility to provide 24-hour protective oversight to all residents and should be able to recognize conditions and potential problems with employees and with residents that could lead to actual harm. While use of the "B" status may be appropriate in very limited circumstances, it would appear that with effective oversight, facilities could prevent many of those incidents from ever occurring in the first place.

The DA should reexamine the policies related to enforcement actions following the determination that an abuse or neglect incident or a Class I violation occurred, but the facility had taken corrective action before the investigation was completed. The DA should consider stronger enforcement actions which may lead facilities to develop additional preventive measures which could reduce the number and severity of incidents in which nursing home residents are exposed to actual or potentially serious harm.

- D.      If a nursing home questions the appropriateness or validity of a deficiency which resulted from an inspection, survey, or complaint investigation it may appeal the deficiency through the IDR hearing. However, no such process exists for complainants who wish to appeal the result of an investigation. The state of Illinois established an administrative hearing process for complainants who are dissatisfied with the results of a complaint investigation. During the course of our review, we received many complaints from citizens who alleged the DA did not thoroughly investigate complaints.

The DA should study the merits of establishing a similar process.

**WE RECOMMEND** the Division of Aging:

- A&B. Ensure complaint investigations are initiated and completed timely, the results of those investigations are properly documented, and reports are submitted in a timely manner to help ensure appropriate enforcement actions are taken against facilities that are not in compliance with state and federal regulations. In addition, the DA should ensure required reports are available to the public, and the resident's next of kin or the reporter is notified of the results of all complaint investigations.
- C. Reexamine the policies related to enforcement actions when corrective action had been taken before the investigation was completed. In addition, the DA should consider stronger enforcement actions which may lead facilities to develop additional preventive measures.
- D. Study the merits of establishing a process for dissatisfied complainants to appeal the result of complaint investigations.

### **AUDITEE'S RESPONSE**

- A. *A total of 7,399 reports of elder abuse, neglect or exploitation and/or regulatory violations within long-term care facilities were received during State Fiscal Year (SFY) 1999; 6,091 in 1998 and 5,591 in 1997. During SFY 1999, staff initiated within 24 hours 3,511 of these reports. Changes to the federal complaint process and inclusion of additional steps in the survey process have significantly increased the hours DA staff spend meeting federal survey requirements, limiting the time available for complaint investigations. Complaint reports have continued to increase and the time allowed for initiation of certain types of complaints has been reduced. DA staff are now required to spend on average an additional 16 hours on each annual survey (including off-site preparation time). While DA believes the changes in the federal survey process will allow us to better assess and focus on facility noncompliance, it has taken time away from the complaint investigation process. The Health Care Financing Administration (HCFA) continues to prioritize completion of annual surveys above complaint investigations. We believe delaying a complaint investigation to meet other HCFA mandated requirements may result in poor resident outcomes and in our staff being unable to adequately investigate, document (including collection of evidence), report and take appropriate enforcement actions against the facility. It is essential that we have adequate staff to investigate certain complaint reports immediately. Unfortunately, as in past years, HCFA continues to increase workload requirements while not meeting the staff and other resource needs of the state survey agencies. This year, HCFA was unable to provide nearly \$600,000 of the division's budget request that would have allowed an increase in the number of field survey staff to ensure our compliance with these new or revised federal mandates including timely initiation and investigation of complaints.*

*The division had identified problems with the complaint process prior to the auditor's review and therefore, we concur with the auditor's recommendations. In State Fiscal Year (SFY) 1996, DA staff identified the need for sweeping revisions to the complaint system. Beginning*

*in SFY 1997, the division conducted internal reviews and convened focus groups to clearly identify issues and to make recommendations for systemic revision. Requests for budget appropriation for additional staff were made in 1998 and 1999 to obtain sufficient numbers of staff to implement the recommended revisions. These requests were partially funded. In addition, plans were made to replace the antiquated Central Registry for Abuse, Neglect and Exploitation (CRANE) system, through which all complaint reports are reported, tracked and documented. Until the new system comes on-line, an interim tracking and monitoring system has been implemented. The new on-line system is currently in the preliminary testing phase.*

*In mid-SFY 1999, the division began phasing in region-by-region a new complaint investigation process including a case management approach to ensure that complaint investigations are initiated timely and at a minimum, a call is placed to the reporter to determine the need for an immediate on-site visit. This process change resulted in increased community participation (family, friends, facility operators and other concerned individuals) in bringing to positive resolution issues affecting the day-to-day lives of facility residents.*

*B&C. We do concur that additional improvements are needed to the complaint system. The division took immediate action following discussions with state auditor staff to:*

- C Designate a central office complaint coordinator and monitor to ensure complaint investigations are timely handled; reporters are called; required notices are mailed; and complaint investigation data is received and entered into the system.*
- C At least quarterly, monitor quality through a random selection of completed complaint reports. Comparisons of the selected reports to established quality assurance criteria will be completed; feedback to survey staff will be provided and training will focus on areas needing improvement.*
- C Initiate a management and internal control review of complaint processing in the Kansas City Regional Office to be followed by reviews in St. Louis and Springfield.*
- C Request funds in a State Fiscal Year 2001 new budget decision item to provide investigative skills training (24 hours) at this year's annual conference for all staff and to provide for an advanced course in the spring of 2001 for supervisors and full-time complaint investigators.*

*As noted above, the division agrees that timely investigation of complaints is essential to ensuring an accurate reporting of the events that resulted in the complaint being filed. However, in order to meet the federal program mandates and state inspection requirements, as well as time frames for completion of complaint investigations, additional resources are needed to ensure all time frames are met. The Health Care Financing Administration continues to prioritize the completion of the annual survey ahead of completion of complaint investigations. The division continues to request annually through the state and federal budget processes funds for additional survey staff. Historically, we have not been successful in obtaining sufficient resources to meet the increasing need.*

*DA has reviewed our policies related to enforcement actions when corrective action has taken place before the investigation was completed. Our policies currently comport to the federal and state enforcement action requirements. From past and continuing experience, DA -- in following the required administrative process -- has found in specific cases where corrective action has taken place that we have been unable to successfully sustain cases brought forward for action when the facility has taken corrective action. DA notes that on January 18, 2000, the Missouri Court of Appeals, Western District, decided State of Missouri, Department of Social Services, Division of Aging v. Carroll Care Centers, Inc., -- S.W.2d --, WD56714 (Mo. App. Jan. 18, 2000), holding that it was proper to dismiss a CMP claim if the nursing home has corrected a cited deficiency at the time of reinspection. Here, the deficiency had been corrected by the time of reinspection. In such a case, the State's claim for sanctions was not authorized.*

*We continue to explore a wide range of sanction options and other initiatives to increase the quality of care provided to residents of long-term care facilities.*

- D. *We agree that families must be involved in resolving complaints. Beginning in SFY 2000, the division is implementing an Informal Dispute Resolution (IDR) project to informally resolve issues through face-to-face contact with a facility resident, their family members or guardians when the resident is the subject of a complaint investigation or cited in a facility inspection or survey completed by the division pursuant to chapter 198, RSMo. The primary purpose of the meeting will be to gather additional information and bring to a satisfactory conclusion the resident or families concerns.*

### **AUDITOR'S COMMENT**

- C. In regards to the appellate court's decision, if changes to current law are necessary for the DA to sanction or fine facilities for "B" status complaints, we suggest the DA seek such legislation.

### **3. Repeat Deficiencies, Sanctions, and Corrective Action**

When a facility is found either during the regular inspection process or during a complaint investigation to have violated federal or state regulations, a statement of deficiencies is prepared and there are various enforcement options available to the DA. Under federal requirements, each deficiency is classified into one of 190 categories or tags. Tags are assigned a score of A through L depending on the severity of the problem and how many residents are affected. This is called the scope and severity grid score. An A level deficiency is one which was an isolated occurrence and which has caused no actual harm with potential for minimal harm. An L level deficiency is one where the deficiency was noted in a widespread pattern of actual harm resulting in immediate jeopardy to multiple residents' health and safety.

Under current guidelines, the DA may request federal sanctions based upon the scope and severity score and whether the deficiency is corrected or uncorrected at the time of the revisit. For all deficiencies at or above the D level, the facility is not in substantial compliance with federal regulations and the DA recommends denial of payments for new admissions. The DA may also request civil monetary penalties (CMP) ranging from \$50 to \$3,000 per day. However, facilities are given three months to correct the deficiency and if corrected within that time federal sanctions are not imposed. If some deficiencies are not corrected in the three-month period, denial of payment for new admissions is to be imposed and the facility may be granted up to an additional three months to complete correction of the remaining deficiencies. If deficiencies are not fully corrected within six months, the facility is to be terminated from the Medicare and Medicaid programs. Some categories of deficiencies at the F or higher level, if noted in two consecutive inspections, will result in designation as a poor performing facility. That designation results in the facility losing the grace period to correct deficiencies before a sanction is imposed. All immediate jeopardy deficiencies, scores of J, K, or L, require appointment of temporary management or termination within 23 days and CMP ranging from \$3,050 to \$10,000 per day may be imposed. If correction of the deficiencies occurs before the termination date and the facility is found to be in substantial compliance, the facility is allowed to continue participation in the Medicare/Medicaid program.

The DA requested 73, 18, 29, and 13 federal sanctions related to inspections and complaint investigations conducted during SFYs 1999, 1998, 1997, and 1996, respectively.

For each federal level of deficiency, there is a corresponding state regulation and in addition to the federal sanctions, the DA may also assess state sanctions for these deficiencies. Violations may result in state sanctions which include issuance of a notice of noncompliance, consent agreements, voluntary closure, license denial, revocation or surrender, receiverships, forced monitoring, and loss of the ability to provide in-facility nursing assistant training programs. As under federal regulations, facilities are allowed to correct lower level deficiencies by the time of the revisit, and if they do, no sanctions are imposed.

The DA issued 211, 87, 70, and 60, notices of noncompliance during SFYs 1999, 1998, 1997, and 1996, respectively. In addition to the notices of noncompliance, the state imposed additional sanctions on facilities 53 times during this 4 year period. Those additional requirements resulted in closure, voluntary or involuntary, of 16 facilities.

We noted the following examples where sanctions were ineffective in preventing identical deficiencies, and where the same facilities were cited for numerous deficiencies, year after year:

- C      Of the 490 certified facilities in the state, 90 were issued a repeat deficiency under the same tag number in the two most recent inspections. In addition, 28 facilities had been cited under the same tag in the three most recent inspections, and 13 facilities had been issued the same repeat deficiency in each of the four most recent inspections. 43 of the 90

facilities had from two to five repeat deficiencies, and 9 of the 90 facilities had from six to as many as thirteen repeat deficiencies.

- C Four facilities had at least ten deficiencies in each of its last four inspections.
- C There were over 200 inspections where a facility had 10 or more deficiencies but a federal or state sanction was not issued.
- C One facility had been cited for 111 deficiencies in its last four inspections.

We offer the following comments designed to help correct the above examples:

- A.1. The DA does not review the effect of any sanction on the subsequent performance of the facility. In addition, the DA does not verify that the state's Medicaid agency imposed the denial of payment sanction on a facility, or whether the denial of payment resulted in an actual financial penalty on the facility. The DA should study the sanctions imposed to determine which sanctions are most effective in bringing facilities into compliance.
- 2. The DA does not always consider a facility's history of past noncompliance when determining the sanction to be requested. For the facilities subjected to more than one sanction in the four-year period, the subsequent sanction was a higher level sanction in only 13 of 29 instances. While the underlying circumstances resulting in the sanctions varied greatly, it would appear that a facility with a recent history of noncompliance should be sanctioned at or near the maximum level allowed.
- 3. From the list of federal sanctions requested by the DA since July 1995, we identified 18 facilities that had been sanctioned as a result of an inspection and have since been subjected to a subsequent inspection. The number of deficiencies cited against each of the 18 facilities at the first inspection as compared to the subsequent inspection decreased for 13 of the 18 facilities. In four instances, facilities went from more than ten deficiencies to deficiency free. In another five instances, the number of deficiencies issued at the subsequent inspection dropped by at least one half. In six of the nine instances where the decrease in the number of deficiencies was significant, the sanction imposed was a CMP. In each of the five instances where the number of deficiencies increased, the sanction applied was denial of payment for new admissions.

We also noted 12 of the 18 facilities had been issued a total of 40 repeat deficiencies. Only one of the seven facilities that had been subjected to a CMP had a repeat deficiency in the subsequent inspection. Based on these results, it appears that the imposition of CMPs may have a greater deterrent on facility noncompliance than the denial of payment for new admissions sanction.

The DA should track sanctions to determine which are most effective in reducing noncompliance and ensure a facility's history of noncompliance is considered when determining future sanctions.

- B. As noted above, federal sanctions, particularly CMP, appear to be effective in deterring noncompliance. Section 198.067, RSMo, has, since 1989, allowed the DA to seek state CMP for regulatory violations that remain uncorrected or not in accordance with the accepted plan of correction at the time of the reinspection. The DA has not pursued civil monetary penalties for regulatory violations except in a limited number of instances.

Section 198.067, as revised in 1998, allows the DA to seek CMP of up to \$10,000 per day if there was a violation of a Class I standard and a resident suffered serious physical injury or abuse of a sexual nature regardless of whether the facility had corrected the violation. As of August 1999, 25 cases had been referred to the Division of Legal Services and nine cases had been filed in circuit court. However, CMP has only been collected in one case and this was the result of a negotiated settlement. DA officials stated that their ability to effectively seek state CMP is hampered by the onerous process of filing cases in the circuit courts, which requires a very significant commitment of DA staff resources.

Other states have and use the authority to impose state civil monetary penalties. In Kansas the imposition of CMP is an administrative process with right to appeal to the courts. We also obtained a study [Rudder, C., Phillips, C. (1995) *The Nursing Home Enforcement System in New York State - Does It Work*: Nursing Home Community Coalition of New York State] of New York nursing homes and that state's enforcement process. That study also indicated a strong relationship between the imposition of state CMP and the number of deficiencies found during subsequent inspections.

Since the imposition of CMP appears to be effective in bringing facilities into compliance, and to provide nursing home residents the maximum degree of protection and highest levels of care practicable, the DA should request the legislature change the state CMP process so it is not overly burdensome and costly.

- C. When a deficiency is identified during the inspection process, the DA, within 10 days after the inspection is completed, is to issue a Statement of Deficiencies (SOD). All deficiencies noted during each inspection are contained in the SOD. The facility must, within 10 days after receiving the SOD, then prepare a Plan of Correction (POC) in which the facility indicates the actions it will take to correct the current problem and the programmatic or systemic changes it will make to help ensure the problem does not recur. The State Operations Manual requires the plan of correction to include how the corrective action will be accomplished for those residents found to have been affected by the deficient practice, how the facility will identify other residents having the potential to be affected by the same deficient practice, what measures will be put into place or systemic changes made to ensure the deficient practice will not recur, and how the facility will monitor its corrective

actions to ensure the deficient practice is being corrected and will not recur. We reviewed the POCs for three repeat tags, inadequate staffing, activities of daily living (ADL), and pressure sores. The following table summarizes the POCs reviewed:

| <u>Tag No.</u> | <u>Tag Description</u>     | <u>Number of Facilities with Repeat Deficiencies</u> | <u>POCs Reviewed</u> |
|----------------|----------------------------|--|----------------------|
| F353           | Inadequate Staffing        | 3  | 7                    |
| F312           | Activities of Daily Living | 18   | 41                   |
| F314           | Pressure Sores             | 17   | 37                   |

Our review of the 85 POCs resulted in the following concerns:

- C 37 of the POCs did appear to meet the preceding requirements and yet the facility was cited for a repeat deficiency. In these instances it appears the facility failed to monitor compliance with the POC as required.
- C Several of the POCs for a subsequent violation contained almost identical wording to the prior POC that had most recently failed.
- C We questioned whether 11 other POCs could reasonably be expected to prevent a repeat deficiency. For six of these POCs, the POC only addressed the specific residents currently affected, but did not incorporate a systemic change or identify how the facility would monitor compliance with the plan of correction. In each of these six instances, the facility was cited for a repeat deficiency.
- C If the facility was cited for insufficient staffing, the POC often did not state whether the facility would add staff and/or did not provide details regarding the staffing levels the facility would provide in the future. Instead the POC simply stated the facility would provide sufficient staffing to meet the needs of the residents. In these instances, it is not possible to monitor whether the deficiency was adequately addressed.

Currently, facilities are not cited for failure to continually monitor compliance with the POC. Once the DA accepts the POCs, the DA conducts an on-site reinspection to

determine that the facility has implemented the POC. The DA does not monitor further compliance with the POC. If the same violations are noted during subsequent complaint investigations or interim inspections, the cycle starts over again.

The DA should ensure POCs fully meet the established criteria including methodologies for facilities to monitor their continued compliance with the POC, and should ensure the POCs adequately address any systemic deficient conditions. In addition, the DA needs to ensure POCs can reasonably be expected to correct the deficiency and not accept POCs which have failed in the past. The DA should also develop procedures to continually monitor compliance with POC provisions for facilities with a history of repeat or numerous deficiencies.

**WE RECOMMEND** the Division of Aging:

A. Consider the facility's history of past noncompliance when selecting sanctions and study sanctions to determine those which are most effective in reducing noncompliance.

B. Work with the legislature to modify the state CMP process so that it can be a more effective tool in bringing facilities into compliance.

C. Ensure Plans of Correction fully meet the established criteria including methodologies for facilities to monitor their continued compliance with the POCs, and ensure the POCs adequately address any systemic deficient conditions. We also recommend the DA ensure all POCs can reasonably be expected to correct the deficiency and not accept POCs which have failed in the past. Further, the DA should develop procedures to continually monitor compliance with POC provisions for facilities with a history of repeat deficiencies.

## LEGAL ACTIONS

Chart 2

## **AUDITEE'S RESPONSE**

A.1-3. DA does review and consider the effect past sanctions have on future compliance, as applicable. Frequently, when facilities are assessed as being significantly out-of-compliance, a change in owner/operator/management company or reorganization of the corporation occurs resulting in a new state licensure application. The "new entity" no longer carries with it the previous history of noncompliance. The division believes statutory change is needed to address this issue.

*During SFY 1999, the division requested HCFA impose denial of payment on 63 facilities for new Medicare/Medicaid admissions and requested HCFA impose Civil Monetary Penalties (CMPs) 51 times against 30 facilities. The division has found state licensure actions more timely address facility noncompliance than alternative federal sanctions. In SFY 1999, the division took the following state licensure actions including: 211 state notices of noncompliance, 50 probationary licenses (issued due to legal action), 21 consent agreements and 11 receiverships. This chart details legal action increases during the period SFY 1996 through 1999.*

*The division currently has requested imposition of a total of \$5,414,305 in federal CMPs against 61 homes going back as far as 1996. HCFA has collected a total of \$1,001,670. The division currently has requests for imposition of a total of \$824,175 in state CMPs. DA agrees the CMP process could be an effective sanction. As noted in a recent General Accounting Office (GAO) report, for the federal CMP process to be effective the backlog of civil monetary penalties will need to be reduced or much of the CMPs deterrent effect will be lost.*

*GAO stated that “weaknesses remain in the deterrent effect of termination [from the Medicare/Medicaid programs], including the lack of a tie to poorly performing facility status for reinstated homes and the limited reasonable assurance period for monitoring terminated homes before reinstating them.” The Division does review and consider the effect past sanctions have on future compliance, as applicable. Facilities assessed as being significantly out-of-compliance frequently have a change in operator or owner resulting in a new Medicare/Medicaid participation agreement and issuance of a new state license. At that time, the past history of noncompliance associated with the former owner or operator cannot be considered against the “new” organization. The division believes recent changes in the HCFA State Operations Manual to limit the facilities’ opportunity to correct deficiencies may reduce “roller coaster” compliance.*

*The division is putting into place the following to address the auditor’s recommendations:*

- C Not issuing operating licenses as they come due, if there is a current class I or class II deficiency and/or if upon review the facility has a history of noncompliance or the violations cited are repeat violations.*
- C Issuing only a temporary operating permit (TOP) if a complaint against a facility has not been investigated at the time the license is due. If deficiencies are cited at a class I or class II standard as a result of the complaint investigation, and/or the operator has a history of noncompliance or the violations are repeat in nature, his or her license will then be denied.*
- C Offering operators an opportunity to enter into a consent agreement in an attempt to achieve a permanent resolution to their compliance problems and thereby improve care and/or conditions for residents.*
- C Citing administrators, as appropriate, for failing to maintain compliance to regulatory requirements when class III violations are cited repeatedly. Repeat class*

*III violations can then result in an uncorrected class II notice of noncompliance and the operator will be required to correct or face termination from the program.*

- C Amending our policy related to requests for imposition of sanctions to require an automatic increase in the sanctioning request whenever a recurrence of a violation occurs. However, DA only makes recommendations HCFA has final authority over the sanction to be imposed.*
- B. The division will continue to work closely with the legislature to enhance and improve the state civil monetary penalty process to bring about immediate action against facilities that fail to meet state licensing requirements.*
- C. The division has been meeting federal guidelines related to plans of correction. We agree the federally required plan of correction process has not been effective and has resulted in confusion for state survey agencies, facilities and consumers. When involving Health Care Financing Administration (HCFA) staff in discussions related to the acceptance of plans of correction, division staff have been told to accept plans of correction that meet the federal criteria, but are identical or nearly identical to plans previously submitted by noncompliant facilities. Effective January 14, 2000, HCFA has provided additional guidance, clarification and modification to the enforcement guidelines contained in the State Operations Manual including those related to accepted POCs. The division believes this information will enable us to address the majority of issues contained within the state auditor's recommendations for POCs.*

*The division is currently:*

- C Reviewing a sample of plans of correction from each region on a monthly basis to ensure consistency in application between regions and that plans meet the federal enforcement guidelines.*
- C Developing and implementing by the annual surveyor's training a session devoted entirely to plans of correction and adherence to the criteria set forth in the State Operations Manual.*
- C Including in the division's new automated system a report for review on-line of facility plans of correction allowing for ready comparison of corrective action plans over time to ensure facilities do not submit identical plans.*
- C Developing and implementing a process to allow electronic submission of plans of correction from facilities to allow more timely responses from the facility and state survey agency.*

#### **4.**

#### **Staffing of Nursing Homes**

One nationally recognized study [Harrington, C., Zimmerman, D., Karon, S., Robinson, J., and Beutel, P. (1999) *Nursing Home Staffing and Its Relationship to Deficiencies*: Report Prepared for the Health Care Financing Administration. San Francisco, CA: University of California.

Madison, WI: University of Wisconsin] indicated, "...fewer number of RN staff hours were associated with more quality of care deficiencies. Fewer nursing assistant hours, as expected, had a consistent, significant negative relationship with total, quality of care, and quality of life deficiencies."

Another study, commissioned by an employees' union [McDonald, I., Muller, A. (1998) *The Staffing Crisis in Nursing Homes: Why Its Getting Worse and What Can Be Done About It*: Service Employees International Union] indicates the effects of inadequate staffing in nursing homes:

"Nursing home workers tell us that when not enough aides are scheduled, and workers that can not come in are not replaced, residents do not get the care they need:

- C Residents do not get turned or repositioned every two hours.
- C Residents are not fed properly.
- C Residents do not have their hygiene needs met.
- C Residents are not walked or given adequate range of motion exercises.

As a result:

- C They develop bedsores or are unnecessarily restrained.
- C They lose weight and may become malnourished.
- C They lie in their own urine and feces.
- C They develop contractures or suffer other deterioration."

We visited five nursing homes and calculated the total hours of direct care per resident for a three month period surrounding the most recent inspection conducted at each facility. Direct care staffing levels in these homes varied from 2.48 to 3.53 hours per resident day. We noted the following staffing observations related to these visits:

- C The facility with the highest staffing level was issued two deficiencies in the most recent inspection, the facility with the next highest staffing level had no deficiencies noted, and the three facilities with the lower staffing levels had from 5 to 9 deficiencies.
- C The direct care staffing levels for days when DA conducted its inspections were between 5 and 26 total hours per day higher than the three month average staffing level. One facility brought in two senior nursing staff from a nearby facility for the inspection. Another facility flew in 4 staff to coincide with our on-site visit. DA personnel told us it is common practice for facilities to increase staffing levels during inspections.
- C Each of the five facilities had days where their direct care staffing level was below that of the Veterans Administration proposed minimum staffing level of 2.5 hours per resident day. One of the facilities operated below that standard for 64 of the 90 days reviewed.

- C Direct care staffing levels in July 1999 were .21 to .46 hours per resident day lower than during January 1999 for the five facilities.

Many complaints received by our office alleged facilities were understaffed which resulted in inadequate care provided to its residents. We noted the following concerns regarding the DA's policies and procedures regarding staffing in nursing homes.

- A. Effective September 30, 1998, the DA rescinded the minimum nursing staff requirements from the Code of State Regulations (CSR), 13 CSR 15-14.042(37). Previously, nursing homes were required to maintain minimum nursing staff to resident ratios of one staff to each 10 residents on the day shift, one to 15 on the evening shift and one to 20 on the night shift. Those minimum ratios were established in 1958 and had not been changed since that time.

The old minimum staffing standards appear to be too low when compared to current industry benchmarks. DA officials also indicated they believed the old standard was too low and problem facilities were using the standard to defend themselves against staffing deficiencies cited by DA. DA officials estimated that on average about 1.85 hours per resident day of direct care nursing would have been required to meet the old requirement. One industry official with a large chain of nursing homes stated that his company attempted to maintain approximately 3 hours of direct nursing care per resident day to provide adequate resident care. The Veterans Administration has a proposed federal regulation that would require 2.5 hours of direct care per resident day in their homes. A review the annual Medicaid cost reports submitted to the Division of Medical Services (DMS) for 1997 and 1998 indicate the industry is averaging about 3.2 hours of direct care per resident day. One national study [Harrington, C., Carrillo, H., Thollaug, S., and Summpers, P., (1999). *Nursing Facilities, Staffing, Residents, and Facility Deficiencies, 1991-97*: Report Prepared for the Health Care Financing Administration. San Francisco, CA: University of California.] of the data reported in the On-line Survey and Certification Reporting System (OSCAR) system indicates the national average direct care hours per day in 1995 and 1996 was 3.4 hours. A national advocacy group, the National Citizens Coalition on Nursing Homes, is proposing a minimum direct care staffing level of 4.13 hours per resident day.

The DA has taken the facility self-reported Minimum Data Set (MDS) resident dependency assessment information from the certified facilities and processed that information through a staffing algorithm. The results of the initial DA work indicated that 3 to 3.5 hours of direct care per resident day are necessary to meet the needs of residents in Missouri nursing homes.

Section 198.079, RSMo 1994, requires the DA to promulgate reasonable standards and regulations related to the number and qualifications of employed and contract personnel having responsibility for any service provided for residents. The current version of the state

regulation does require nursing homes to provide sufficient staff to enable residents to attain and maintain the highest practicable level of physical, mental, and psychosocial well-being. In homes with higher levels of resident dependency, additional staffing above the minimums would be required.

The actions by the DA to eliminate the minimum staffing ratios appear to contradict the intent of the state law. The DA has the authority and responsibility to determine reasonable staffing levels. The DA should consider establishing reasonable minimum staffing ratios.

- B.1. Certified nursing homes in Missouri have been connected to a networked computer system developed by HCFA, the federal oversight agency, and operated by the DA since June 1998. Facilities must enter initial and quarterly resident assessment data for each resident. This data is referred to as the Minimum Data Set or MDS data. This data allows nursing home residents to be classed by 27 resource utilization groups. The DA processes this data through an accepted staffing algorithm methodology. This process produces an estimate of the actual hours of nursing care that would be necessary to provide adequate staffing to meet the needs of that nursing home's residents. In the near future, nursing homes will be able to access those staffing reports for use in scheduling the number and type of staff that should be sufficient to meet the needs of the residents. Texas has already adopted this technology. Many other states have similar processes under development. The DA should continue developing this process through which facilities are provided individualized estimates of recommended staffing levels based upon the resident dependency levels present in their home. The DA could also use this process to establish minimum required staffing levels discussed in Part A above.
- 2. The DA should develop a system which accumulates the actual staff hours at each facility. The DA could then identify homes that are operating significantly below appropriate staff levels. Using this information, the DA could prioritize the scheduling of pending inspections and complaint investigations to identify potential problems before they can result in negative outcomes for nursing home residents. The DA should also make actual direct care staffing information readily available to the public so that Missouri citizens can make better informed decisions on where to place loved ones.
- C. Currently, DA inspectors do not review facility staffing levels and compare them to any minimum standard or industry benchmark. Instead, DA policy requires the inspectors to detect negative resident outcomes such as avoidable accidents, poor incontinence care, development of pressure sores, delayed meal services, delayed response time to call lights, dehydration, and weight loss. If those care indicators are found, then the DA will attempt to determine if they are caused by inadequate staffing levels, poor supervision of staff, or weak staff training and orientation programs. To ensure negative resident outcomes are avoided to the maximum extent possible, the DA should examine staffing levels to ensure facilities have adequate staff to meet the needs of residents.

- D. Of the five facilities we visited, the facility with the lowest staffing level was cited in February 1999 for seven deficiencies including two which were assessed as having caused actual harm to residents. The DA cited this facility for inadequate staffing and for having staff that were not qualified for their assigned duties. However, this deficiency was cited at the G scope and severity level which is defined as having only isolated incidents which resulted in actual harm but no widespread pattern of understaffing. As a result, the facility was not sanctioned or subjected to a loss of reimbursements or CMP.

Ample evidence appears to have existed to cite the facility for a widespread pattern of understaffing. On February 23, 1999, a DA inspector observed the evening shift and determined resident needs were not being met due to inadequate staffing. Based on our calculations, the staffing level for this day was 2.58 direct care hours per resident day. The staffing level in this facility was below the 2.58 level for 68 of the 90 days we reviewed. This facility had also brought in two senior nursing staff from a nearby facility owned by the same company on this very shift. The statement of deficiencies issued for the inspection noted that two residents had endured a total of 28 falls in the preceding 83 days resulting in 15 injuries and at least three hospital visits. There had also been numerous complaints about call light response time, failure of staff to assist residents to bed and to the toilet, and not providing timely and thorough incontinence care.

This facility was then found to be in compliance at the revisit on April 15, 1999. On April 19, the DA received a complaint that the facility was again understaffed. The DA again returned to the facility to investigate the complaint and again cited the facility for inadequate staffing. This time the DA cited an E scope and severity level which indicates a widespread pattern, but that no actual harm to residents resulted. Since the deficiency was cited as no actual harm, the facility was again not subjected to further sanctions. The facility was revisited in June and found to be in compliance at that time. It should also be noted that the POC approved by the DA in response to the February inspection deficiency, stipulated the facility would staff at levels equal to the old minimum staffing level (1.85 hours per resident day). It is difficult to understand why the DA would have accepted this POC when DA officials also believed the old standard was too low.

The DA should ensure that facilities found to have widespread patterns of noncompliance with the staffing requirements are subjected to the maximum federal and state sanctions and civil monetary penalties warranted in the circumstances.

**WE RECOMMEND** the Division of Aging:

- A&B. Establish reasonable minimum staffing ratios as required by state law. In addition, the DA should take steps to develop a system which accumulates the actual staff hours at facilities, and compare recommended staffing levels to actual staffing at facilities to identify potential staffing problems.

C&D. Inspectors utilize recommended and actual staffing data to help identify negative resident outcomes. We further recommend the DA aggressively cite staffing deficiencies and subject facilities that are found to be out of compliance with the staffing requirements to the maximum federal and state sanctions (including civil monetary penalties) warranted. In addition, the DA should ensure approved POCs are reasonably expected to address the staffing deficiencies noted.

### **AUDITEE'S RESPONSE**

A. *State law requires the division to issue standards and regulations related to the number and qualifications of employed and contract personnel having responsibility for any of the services provided for residents. DA does not concur with the state auditor's finding that the division appears to have contradicted state law. To the contrary, DA believes that it has complied with both the letter and spirit of the statute by requiring staffing levels which result in positive resident outcomes and which take into account the acuity levels of residents within the facilities. DA has minimum staffing levels determined by a ratio or number in those areas that lend themselves to establishment of a minimum by such a method. For example, life safety code including protective services at Title 13 Code of State Regulations (CSR) 15-14.022(57) uses a staff ratio and other professional staffing requirements found throughout 13 CSR 15-14.042 refer to the number of staff required. These regulations clearly set forth minimum staffing levels.*

*DA concurs the rescinded minimum nursing services and staffing ratio had become inadequate. The 1998 nursing services modification stating that "sufficient numbers and with sufficient qualifications to provide nursing and related services" adopts the federal philosophy of determining staffing needs based upon resident outcomes. DA believes the current state regulation is reflective of the national research community and HCFA focus on staffing a facility to meet individual resident care needs that should result in positive resident outcomes as appropriate for individual residents (i.e., maintain current condition, improve status or functioning or slow decline).*

*Deficiencies related to staffing levels, qualifications and/or training were cited in 229 of the 491 (47%) Medicare/Medicaid certified facilities during the current survey cycle. Beginning in September 1999, DA field staff began utilizing quality indicator information derived from the Minimum Data Set (MDS) assessment in the survey process (survey targeting based upon resident outcomes and acuity). Effective January 14, 2000, HCFA provided additional POCs enforcement guidance; the Division believes this information will address the majority of issues contained within the state auditor's recommendations for POCs.*

B&C. *In 1998, HCFA mandated collection of MDS information about residents in Medicare/Medicaid certified beds from all certified facilities and provided an automated system to collect the data. The MDS data can now begin being utilized for evaluation of the need for specific types and numbers of staff. The division continues working diligently with*

*the University of Missouri-School of Nursing to determine the best method to provide comparative feedback to nursing facilities and consumers related to acuity-based staffing versus actual staffing levels in Missouri facilities. It is likely, the Code of State Regulations will be modified as a result of the research being conducted.*

*The division has noted in the last year an increase in the number of facilities experiencing problems in hiring and retaining quality staff including certified nursing assistants. While staffing has been problematic in “poor” performing facilities for some time, we have seen an increase in staffing problems in facilities that historically have been “good” performers and believe that the current robust economy has reduced the number of individuals willing to work in the nursing home environment.*

*DA suggests that staffing ratios alone do not routinely take into consideration the acuity differences between individual residents and their need for specific types and levels of services. Multiple variables need to be considered when determining the staffing level and types in a nursing home. The division believes use of a ratio in determining types and levels of staff with a lack of consideration for the resident case-mix or acuity level in the facility will not ensure care needs of individual residents are met.*

*The period between 1990 and the present has seen a proliferation of differing opinions about the best methods to be used to determine staffing levels in nursing homes. Programs like Missouri Care Options (MCO) allow elderly people to remain in their homes longer. When poor health requires them to seek nursing home care, they often enter facilities requiring a higher level of care than experienced with new admissions in the past. Dramatic changes in the resident population of nursing homes have also resulted from hospital stays being minimized, more “sub-acute” care residents are being seen in the nursing home environment. With advances in medical technology allowing individuals to live longer, the result is heavier care situations continuing for longer periods of time.*

*Currently, there is no federal or state statutory requirements for survey and inspection staff to utilize a minimum standard or industry benchmark in their review of staffing levels. During the survey and inspection processes, field staff review resident outcomes to determine understaffing as required by the Health Care Financing Administration (HCFA). Field survey staff collect information about facility staffing for a two week period to be input into the federal On-line Survey, Certification and Reporting System. However, as noted by the auditor and many national studies, facilities appear to increase staff during the survey process. This results in a skewed picture of facility staffing for that two (2) week period. DA has requested in a new budget decision item for SFY 2001 four (4) auditors to assist field staff in performing survey and inspection activities including the review of records (i.e., payroll and staffing).*

- D. The report notes that “Ample evidence appears to have existed to cite the facility for a widespread pattern of understaffing.” In a review of the file, it was determined that DA*

*survey staff followed the federal guidelines in making their determination of the scope and severity of the problem within the facility. If the file is reviewed with no knowledge of the required federal survey process, DA agrees the facility's historical file might raise questions. The federal process prevented the survey team from considering all relevant facts contained in the file and including that information in determining the scope and severity of the current incident; in all likelihood, a different conclusion would have resulted with inclusion of the additional information. The division remains gravely concerned about the federal process that results in closure of incidents at the time a facility revisit with deficiencies corrected occurs. We believe that broad revisions in the federal and resulting state process are needed to prevent facility "roller coaster" compliance from continuing. Field surveyors need to be able to include in their current incident process consideration of the facility's entire noncompliance history and repeat failure(s) to adhere to facility submitted corrective action plans that result in "poor" resident outcomes. We believe the Health Care Financing Administration (HCFA) in their recent changes to the State Operations Manual have taken initial steps to end the "roller coaster" effect and allow state survey agencies to address shortcomings in plans of correction related to systemic problems and quality assurance plans. However, we believe further modifications will be necessary to provide surveyors with sufficient tools and processes to ensure these facilities either correct their system problems or discontinue caring for the elderly and adults with disabilities.*

*Additionally, the division has already taken the following actions based upon the auditor's recommendations:*

- C Continue recommending sanctions for facilities who fail to adequately care or address the needs of residents in long-term care facilities, however, final disposition of these issues does not rest with the division. The division is responsible for making recommendations to HCFA and the Division of Medical Services, the state Medicaid agency.*
- C Amend the policy for imposition of sanctions to require an automatic increase in the sanctioning request whenever a recurrence of a violation occurs.*
- C Have provided initial training to survey staff on the changes in the State Operations Manual related to plans of correction.*

## **AUDITOR'S COMMENT**

A&B. The current CSR addresses only minimum staffing requirements related to safety and protection of residents. It does not address the number and qualifications of direct resident nursing care services to be provided to residents. As a result, we do not believe the current CSR meets the letter or the intent of the law. The DA should give further consideration to establishing an absolute minimum allowable staffing requirement that also clearly establishes that additional staffing may be necessary based on resident dependency levels.

The statistic noted by the DA regarding the number of facilities cited for inadequate staffing (229 of 491, or 47%) is misleading as it also includes cites for staff qualification and training issues.

According to a June 1999 report generated by DA from the OSCAR system, only 42 of 491 (8.5%) facilities were cited for inadequate staffing during the most current survey cycle.

## **5. Employee Disqualification Listings, Central Registry, and Criminal Backgrounds**

- A.1. Various sections of state law require the DA to maintain an Employee Disqualification Listing (EDL) which includes the names of persons who have been finally determined by the department, pursuant to Section 660.315, RSMo 1994, to have recklessly, knowingly, or purposely abused or neglected or to have misappropriated any property or funds of a nursing home resident or in-home services client. There are approximately 700 persons on the DA EDL. Nursing homes and residential care facilities, providers of in home services under contract with Department of Social Services (DSS), employers who hire nurses and nursing assistants for temporary or intermittent placement in health care facilities, entities approved to issue certificates for nursing assistants training, hospitals and related health services, and home health and hospice providers are prohibited by state law from employing any person on the DA EDL.

We matched persons on the DA EDL to 1998 employment information records and noted twelve persons were employed by a licensed nursing facility and nine persons were employed by an in-home health provider under contract with the DSS. The DA manually checks quarterly employment data for 25% of the persons listed on the DA EDL, however, this process failed to detect the instances noted above. The DA should develop an automated process to identify instances in which persons listed on the DA EDL are working for nursing homes, in-home service providers, and other entities prohibited from hiring those persons. Use of the automated process should result in the DA being able to identify all instances in which an employer inappropriately hired a person listed in the DA EDL.

2. Effective August 28, 1997, Section 660.317, RSMo Cumulative Supp. 1999, requires nursing facilities to perform criminal background tests before hiring applicants who will have direct contact with residents. Applicants who have been found guilty of certain felonies are prohibited by state law from such employment. Currently, the DA has no automated procedures in place to identify employers who are employing individuals with criminal backgrounds.
3. When the DA does identify an instance in which a facility has hired a person listed on the DA EDL, it does not always issue a deficiency. Hiring a person listed on the DA EDL can be cited by the DA as either a Class I or a Class II violation. If Class II violations are corrected by the time of the reinspection, no federal or state sanction or civil monetary penalty is imposed.

A Class II standard is defined as having a direct or immediate relationship to the health, safety or welfare of any resident, but does not create imminent danger. A Class I standard is defined as having either an imminent danger to the health, safety or welfare of any resident or a substantial probability that death or serious physical harm would result. It would appear that hiring a person who had in the past committed abuse or neglect would pose an imminent danger to the health, safety or welfare of residents. The DA should consider raising the violation for hiring a person listed on the DA EDL to a Class I level deficiency and fine or sanction deficient facilities accordingly.

4. When the DA discovers a DA EDL listed person has worked for an in-home personal care vendor, a violation of their contract with the DSS, the Home and Community Monitoring unit contacts the employer and requests copies of that employee's time and service records. The monitoring unit then determines the amount paid to the employer for visits performed by the employee listed on the DA EDL and requires the vendor to repay these amounts. We provided the DA with the list of nine instances which we had identified through the automated data match where a DA EDL person worked for an in-home vendor. The DA should contact these vendors and ensure applicable amounts are repaid.
- B. The Department of Mental Health (DMH) also maintains, under Section 630.170, RSMo Cumulative Supp. 1999, a listing of persons convicted of patient, resident or client abuse. There are about 250 persons on this listing. We matched persons on the DMH EDL to 1998 employment information records and noted fifteen persons were working in a licensed nursing facility and three persons were working for an in-home health provider under contract with the DSS.

In our opinion, it does not appear appropriate for individuals who have abused or mistreated DMH clients to care for the elderly. The DA should develop an automated process to identify instances in which persons listed on the DMH EDL are working for nursing home operators and in-home care providers.

- C. The Division of Family Services maintains the Central Registry of Child Abuse and Neglect (CA/N) which contains information relating to instances of actual and alleged child abuse. We requested names of persons listed within the registry which met the following criteria: the investigation conclusion date was in the last five years, the conclusion code was A (court adjudicated) or B (probable cause), the category of abuse/neglect was 1 (physical abuse), 2 (neglect) or 6 (sexual maltreatment), and the severity code was C (serious/severe), D (permanent damage) or E (fatal). Our request resulted in approximately 16,700 records of which 14,350 included a Social Security number for the perpetrator.

We matched persons from the information obtained from the CA/N registry to 1998 employment information records and noted 1,009 persons were working in a licensed

nursing facility and 108 persons were working for an in-home health provider under contract with the DSS that were on the registry.

In our opinion, it does not appear appropriate for individuals who have been found to have abused or mistreated children to care for the elderly. The DA should develop an automated process to identify instances in which persons found to have abused children are working for nursing home operators and in-home care providers.

In addition to the instances noted above, we identified numerous other instances of potentially inappropriate or questionable workplaces for persons on the above EDLs and/or CA/N registry. These potentially inappropriate workplace settings include instances of these persons working in schools, day care facilities, DMH facilities, DSS programs, and other direct care providers. These concerns will be included in a subsequent report to be issued by our office.

**WE RECOMMEND** the Division of Aging seek legislation which would prohibit the employment of individuals found to have abused and/or neglected children and DMH clients from working in nursing homes. The DA should then develop an automated process to identify instances in which persons listed on the DA EDL, the DMH EDL, or the CA/N central registry, or individuals with criminal backgrounds are inappropriately working for nursing facilities, in-home service providers, or other entities prohibited from hiring those persons. In addition, the DA should more aggressively sanction and fine facilities and providers who hire persons listed on these EDLs and/or Central Registry. The DA should also consider raising the violation for hiring a person listed on the EDL to a Class I violation.

### **AUDITEE'S RESPONSE**

*A.1-3. State law requires facilities and in-home services providers not later than two days of hiring any person to request a criminal background check from the highway patrol and to make an inquiry to the department of social services as to whether the person is listed on the employee disqualification list. DA does not have the statutory authority to prohibit facilities from "hiring" individuals listed on the Division of Aging's Employee Disqualification Listing (DA EDL) or possessing a criminal background. When a facility fails to take appropriate and timely action to terminate an individual identified through the DA EDL and criminal background check processes or fails to complete the processes, DA has the statutory authority to cite those facilities for such violations.*

*DA concurs, at a minimum, a Class II violation occurs when a provider or facility fails to meet Section 660.317, RSMo 1998 that requires facilities to ensure individuals appearing on the DA EDL and/or having a criminal background are terminated in a timely manner. However, DA does not concur with the auditor's suggestion that identification of an individual as being on the DA EDL immediately rises to the level of "imminent danger" necessary to cite a Class I violation. Presently, individuals are placed on the DA EDL for recklessly, knowingly or purposely abusing or neglecting a resident while employed in any*

facility pursuant to Section 198.070.12, RSMo or individuals are placed on the list for having misappropriated property or funds of a resident while employed in a facility pursuant to Section 198.090.15 RSMo. Since some individuals listed on the DA EDL are not on the list as a result of abuse/neglect violations, but rather are listed as a result of lesser crimes such as misappropriation of property, the determination of a violation at a higher than routine level (Class II found at 13 CSR 15-14.042 (19)) would be based upon evidence specific to the situation. Currently, the division has the ability to cite a Class I violation if it can be determined that a facility knowingly acted or omitted the EDL check or the criminal background check or performed the check and failed to take appropriate action. The Class I violation has been and will continue to be issued under 13 CSR 15-14.042 (16) to those providers and/or facilities that act in such a manner and where such circumstances can be proven and are legally defensible.

Additionally, in regard to the auditor's recommendation that fines and sanctions be increased for facilities who hired individuals on the DA EDL or having a criminal background, from past and continuing experience, DA -- in following the required administrative process -- has found in specific cases where corrective action has taken place that we have been unable to successfully sustain cases brought forward for action when the facility has taken corrective action. DA notes on January 18, 2000, the Missouri Court of Appeals, Western District, decided *State of Missouri, Department of Social Services, Division of Aging v. Carroll Care Centers, Inc.*, -- S.W.2d --, WD56714 (Mo. App. Jan. 18, 2000), holding that it was proper to dismiss a civil monetary penalty (CMP) claim if the nursing home has corrected a cited deficiency at the time of reinspection. Here, the deficiency had been corrected by the time of the reinspection. In such a case, the State's claim for sanctions was not authorized.

The division concurs with the state auditor's recommendation for enhancement of existing procedures to identify instances in which persons listed on the Division of Aging Employee Disqualification Listing (DA EDL) are employed by providers prohibited from employing these individuals through an electronic process. While state statute places the responsibility for checking the EDL and the criminal background of individuals on the provider, current computer technology will allow for enhanced monitoring by the division of provider employment activity allowing for better identification of those facilities falling out of compliance.

The division has already taken the following steps to address the auditor's recommendations and to further strengthen our processes:

- C Established an automated process with the Department of Employment Security (MODES) for identification of instances in which those persons listed on the DA EDL are inappropriately working for nursing facilities, in-home service providers, or other entities prohibited from employing them.
- C Reviewed and strengthened Institutional Services administrative processes and assigned processing of referrals to a single distinct EDL Unit.

- C The division's responsibility is to adequately monitor the providers performance of these requirements. In order to ensure, division staff are meeting these monitoring and reporting requirements, we have:*
- C Reviewed the field policy related to EDL and criminal background checks that requires inspection staff during inspections/surveys or complaint investigations, as appropriate, to check that the facility has an effective system, including written policies and procedures, which enables them to request and obtain information needed to make appropriate hiring/retention decisions in accordance with the requirements of Sections 660.315, RSMo and 660.317, RSMo 1998. We believe the field practice addresses the requirements related to our monitoring of compliance with EDL and criminal background checks.*
- C Reaffirmed with administrative and field staff the requirement to cite a deficiency whenever a DA EDL violation occurs and recommend to HCFA and the Division of Medical Services, as appropriate, imposition of sanctions or state licensure action, whenever a provider licensed by the division fails to meet the requirements at Section 660.315, RSMo 1998 related to appropriate action when a determination is made that an individual appears on the DA EDL. Appropriate actions would be declining to employ the individual or termination of the individual whose name is listed on the DA EDL.*
- C Researched the availability of an automated process for verifying criminal background checks without successfully finding such a system within Missouri. We will continue exploring and monitoring options and new systems as they become available for automating the criminal background check process.*

*B&C. The Division concurs that legislative action will be needed to allow for verification of Department of Mental Health Employee Disqualification List (DMH EDL) and the Child Abuse and Neglect (C/AN) registry listings by division providers and facilities. While inclusion of these individuals on the DA EDL may further protect elderly and disabled adults in long-term care facilities, this issue would need to be addressed through the legislative branch who implement public policy through enactment of state law. DA believes the process of consolidation has begun with passage of the "Family Care Safety Registry and Access Line" (L. 1999 H.B. 490 & H.B. 308); that current computer technology will make information more readily accessible to the public; and that additional legislative action may be anticipated.*

### **AUDITOR'S COMMENT**

- A.3. The DA's response inaccurately implies that employment of individuals on the DA EDL is routinely cited as a Class I violation. In reality, if the DA detected instances of disqualified employees working at facilities through its quarterly match, no deficiency was cited if an inspection was not*

ongoing, if no incident had occurred involving the employee, and if the facility agreed to terminate the employment of the individual.

In regards to the appellate court's decision, if changes to current law are necessary for the DA to sanction or fine facilities for hiring individuals listed on the DA EDL or those having a criminal background, we suggest the DA seek such legislation.

This report is intended for the information of the management of the Department of Social Services, Division of Aging, and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

JEFFERSON TOWNSHIP

LINN COUNTY, MISSOURI

YEAR ENDED DECEMBER 31, 1999

**From The Office Of State Auditor  
Claire McCaskill**

Report No. 2000-12  
February 29, 2000

AUDIT REPORT

Office Of The  
State Auditor Of Missouri  
Claire McCaskill

February 2000

**Some problems were discovered as a result of an audit conducted by our office in response to the request of petitioners from the Jefferson Township, Linn County, Missouri.**

-----

The township did not establish a separate debt service fund to account for tax collections and the payment of the bond principal and interest. As a result, the township had no record of the amount of debt service revenues on hand each year. When computing the annual debt service tax rate, the township underreported the amount of debt service funds on hand, which resulted in an overcalculation of the required debt service tax rate. The township levied and collected \$29,681 in excess property taxes for the 1994 bond issue which remain in the township's general fund. Future debt service tax levies should be reduced by this amount.

The township did not properly pay, report compensation, and withhold payroll taxes for compensation paid to township officials.

The township board does not prepare formal budgets. The township prepares a schedule of the prior year's actual expenditures to use as a guide for monitoring current year's expenditures; however, this schedule does not contain all information required by state law. A complete and well-planned budget, in addition to meeting statutory requirements, can serve as a useful management tool by establishing specific cost and revenue expectations for township operations. A budget can also provide a means to effectively monitor actual costs by periodically comparing budgeted amounts to actual expenditures.

The township board does not publish annual financial statements and inventory listings as required by state law. At a minimum, the published financial statements should contain the beginning cash balance, actual receipts by source for the year, actual expenditures by major category for the year, and the ending cash balance.

State law requires the township to file annual financial reports with the State Auditor's office. The township did not prepare or file financial reports for the years 1993 through 1997. The 1998 financial report was not filed with the State Auditor's office until October 12, 1999. The financial reports are to be filed within four months after the end of the township's fiscal year (the requirement is six months after the end of the fiscal year if an audit report prepared by a certified public accountant is filed).

(over)

YELLOW SHEET

The township does not have a formal policy regarding public access to township records. A formal policy regarding access to township records would establish guidelines for the township to make records available to the public. This policy should establish a person to contact and an address to mail requests for access to records.

The Township Trustee was not bonded from April 1993 to April 1999, even though a bond is required by state law. On August 23, 1999, a bond was obtained in the amount of \$250,000, retroactive to April 1, 1999, and effective until March 31, 2000. In addition, the other two board members are co-signers on the bank account but are not bonded. Failure to bond all persons with access to assets exposes the township to risk of loss.

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

To the Board of Directors  
Jefferson Township  
Linn County, Missouri

The State Auditor was petitioned under Section 29.230, RSMo, to audit Jefferson Township, Linn County, Missouri. Our audit of the township included, but was not limited to, the year ended December 31, 1999. The objectives of this audit were to:

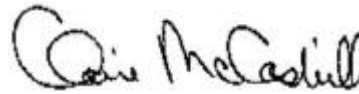

1. Perform procedures we deemed necessary to evaluate the petitioner's concerns.
2. Review compliance with certain constitutional provisions, statutes, and attorney general's opinions as we deemed necessary or appropriate in the circumstances.
3. Review certain management practices which we believe could be improved.

Our audit was made in accordance with generally accepted government auditing standards and included such procedures as we considered necessary in the circumstances. We also reviewed board minutes, policies, and various township financial records.

Our audit was limited to the specific matters described above and was based on selective tests and procedures considered appropriate in the circumstances. Had we performed additional procedures, other information might have come to our attention which would have been included in the audit of the township.

The accompanying History and Organization is presented for informational purposes. This information was obtained from the township and was not subjected to auditing procedures applied in the audit of the township.

The accompanying Management Advisory Report presents our findings and recommendations arising from our audit of Jefferson Township, Linn County, Missouri.

A handwritten signature in black ink, appearing to read "Claire McCaskill", written over a vertical line.

Claire McCaskill  
State Auditor

January 20, 2000 (fieldwork completion date)

## HISTORY AND ORGANIZATION

JEFFERSON TOWNSHIP  
LINN COUNTY, MISSOURI  
HISTORY AND ORGANIZATION

Jefferson Township is one of 14 townships in Linn County and is located in the south central region of that county. Linn County elected a township organization in 1837. There are approximately 68 miles of roads maintained by the township. The population of the township in 1990 was 793.

The township's elected Board of Directors (governing body) consists of the township trustee (board member), who serves as the ex officio treasurer, and two members of the township board. One of these two board members is appointed by the board as president. Other officers are the township clerk and the township collector. All officers are elected biennially and take office in April following the election.

Officers at December 31, 1999 were as follows:

|   | <u>Term Expires</u> | <u>Actual<br/>Compensation<br/>For the<br/>Year Ended<br/>December 31,<br/>1999</u> | <u>Amount<br/>of Bond</u> |
|---|---------------------|---|---------------------------|
| Galen Holloway, Trustee and Ex<br>Officio Treasurer | April 2001          | \$ 4,106  | 250,000                   |
| Stephen Speichinger, President                      | April 2001          | 329   |                           |
| Randy Wade, Member                                  | April 2001          | 329   |                           |
| Karen Collier, Collector                            | April 2001          | 3,182   | 116,937                   |
| Margery Curley, Clerk                               | April 2001          | 503   |                           |

In addition to the elected officials, the township has one full-time employee.

Assessed valuation and tax rate information for 1999 and 1998 were as follows:

|                    | 1999                | 1998             |
|--------------------|---------------------|------------------|
| ASSESSED VALUATION |                     |                  |
| Real estate        | \$ 4,151,667        | 4,299,328        |
| Peronal property   | 2,189,736           | 1,941,814        |
| Total              | <u>\$ 6,341,403</u> | <u>6,241,142</u> |

TAX RATES PER \$100 OF ASSESSED VALUATION

|                         |         |      |
|-------------------------|---------|------|
| General revenue         | \$ 0.10 | 0.09 |
| Road and bridge         | 0.39    | 0.37 |
| Special road and bridge | 0.35    | 0.31 |
| Debt service            | 0.57    | 0.39 |

A summary of the financial activity of the Jefferson Township (excluding the Township Collector's accounts) for the years ended December 31, 1999 and 1998, is presented below:

|                                     | 1999             |                |                      |                | 1998            |
|-------------------------------------|------------------|----------------|----------------------|----------------|-----------------|
|                                     | General Account  | Bond Account   | Debt Service Account | Total          | General Account |
| RECEIPTS:                           |                  |                |                      |                |                 |
| Property taxes                      | \$ 70,689        | 0              | 6,520                | 77,209         | 81,534          |
| County sales tax                    | 30,441           | 0              | 0                    | 30,441         | 29,612          |
| County CART distributions           | 8,156            | 0              | 0                    | 8,156          | 11,235          |
| FEMA distributions                  | 18,017           | 0              | 0                    | 18,017         | 0               |
| Bond proceeds                       | 0                | 125,000        | 0                    | 125,000        | 0               |
| Interest                            | 2,190            | 1,039          | 152                  | 3,381          | 2,077           |

## MANAGEMENT ADVISORY REPORT

JEFFERSON TOWNSHIP  
LINN COUNTY, MISSOURI  
SUMMARY OF FINDINGS

1. Bond Issues (pages 9-10)

The township did not establish a separate debt service fund to account for tax collections and the payment of the bond principal and interest. The township collected taxes of \$29,681 in excess of the amount required to pay the bond debt. In addition, the township board sells bonds by negotiated sales with one bank and should consider public competitive sales for future bond issues.

2. Township Officials' Compensation (pages 10-11)

Compensation paid to township officials did not comply with state law. The township did not properly report compensation and withhold payroll taxes for compensation paid to township officials.

3. Expenditures (pages 11-13)

The township does not have a formal bidding policy. Forms 1099 are not filed as required. The township pays its full-time employee bonuses which appear to violate the state constitution. The township does not require its employees to prepare time sheets.

4. Budgets and Financial Reporting (pages 13-14)

The township does not prepare formal budgets, does not publish annual financial statements and inventory listings, and did not submit some annual financial reports to the State Auditor's office, as required by state law.

5. Minutes, Meetings, and Records (pages 14-15)

Minutes were not maintained for some board meetings and the minutes did not always contain information as required by statute. Notices of meetings did not include tentative agendas. The township does not have a formal policy regarding public access to township records.

6. Accounting Records and Procedures (pages 15-16)

The township uses the date monies are deposited rather than the date monies are received when recording receipts in the general ledger. Checks are not restrictively endorsed immediately upon receipt. The trustee was not bonded for the period of April 1993 through April 1999, nor have other authorized check signers been bonded.

7. Road Maintenance (pages 16-17)

A formal maintenance plan for township roads has not been prepared. The township spent more money on roads within the City of Laclede than allowed by state law.

8. Township Collector's Accounting Records and Procedures (pages 17-18)

The Township Collector disposes of computerized and manual accounting records, such as bank reconciliations, account registers, and paid tax statements, at the conclusion of the tax year. Voided checks are not always retained. The Township Collector personally retained interest earnings of about \$300 annually, rather than distributing the interest to the various political subdivisions.

MANAGEMENT ADVISORY REPORT

|           |                    |
|-----------|--------------------|
| <b>1.</b> | <b>Bond Issues</b> |
|-----------|--------------------|

The township issued \$100,000 of general obligation road bonds in June 1994 which were paid off in March 1999. A new \$125,000 bond issue was approved and these bonds were issued and sold in July 1999. Both bond issues were for the purpose of providing funds for the construction, improvement, and maintenance of township roads, including the purchase of equipment necessary to carry out this purpose. We noted the following concerns related to these bond issues:

- A. The township levies property taxes to pay the bond principal and interest. A separate debt service fund has been established to account for the tax collections and the bond principal and interest payments for the 1999 bond issue; however, for the 1994 bond issue, all debt service property taxes were deposited into the township's general fund and all debt payments were made from the general fund.

Because of the lack of a separate accounting for debt service revenues and expenditures, the township had no record of the amount of debt service revenues on hand each year. When computing the annual debt service tax rate, the township underreported the amount of debt service funds on hand, which resulted in an overcalculation of the required debt service tax rate. The township levied and collected \$29,681 in excess property taxes for the 1994 bond issue which remain in the township's general fund.

Section 108.180, RSMo 1994, along with the township's bond ordinance requires a separate account for all monies derived from a debt service tax levy and restricts the use of such monies for the payment of interest and principal. The township should transfer \$29,681 from the general fund to the 1999 general obligation debt service fund and reduce future debt service property tax levies to offset these excess collections.

- B. Both the 1994 and 1999 bonds were sold by negotiated sales with the same bank. While the interest rates on these bonds do not appear unreasonably high, the township should consider competitive sales for future bond issues. Competitive sales involve the solicitation of bids from underwriting firms to purchase the bonds and sell them to the firm or group which offers the lowest interest cost. A public competitive sale promotes a fair process where all qualified underwriters have an opportunity to earn the business, and the public can be more confident that the bonds are awarded at the lowest possible cost without improper and costly insider and political conflicts.

**WE RECOMMEND** the Township Board:

- A. Transfer \$29,681 from the general fund to the 1999 bond debt service fund, and reduce future debt service property tax levies to offset these excess collections.
- B. Use competitive sales for future bond issues.

**AUDITEE'S RESPONSE**

- A. *We agree and intend to use the \$30,000 in repurchase agreement funds to service the bond debt. We will reduce future tax levies by this amount.*
- B. *We will take your recommendation under advisement; however, we believe we saved approximately \$800 to \$1,000 in attorney fees by selling the bonds through a negotiated sale. In addition, for the 1999 bond issue, we obtained more accurate information and instructions regarding setting up the necessary bond accounts.*

|  |
|--|
| <b>2. Township Officials' Compensation</b> |
|--|

- A. Prior to August 1998, Section 65.230(1), RSMo 1994, established compensation for various township officials. That statute provided that each township board member (including the trustee) and the clerk were to receive a \$6 fee for the first board meeting in a month and \$2.50 for each subsequent board meeting that month. This section was revised in August 1998 and authorized the township board and clerk to receive up to \$25 per day for the first meeting each month and up to \$10 for each meeting thereafter during the month.

Compensation paid to township officials did not comply with the above statute. It appears for a number of years the township's policy has been to pay the board members and the clerk \$8 per meeting. In April 1999, the board changed this policy to \$25 per meeting (in accordance with the revised statute). In addition, the Township Clerk received a commission of five percent on the total payroll taxes remitted to the federal government, even though this fee does not appear to be authorized by statute.

Although the amount of additional compensation paid to township officials as a result of these matters does not appear significant, the township board should review this situation and ensure any future compensation paid to township officials is in accordance with state law.

- B. The township does not properly report compensation, withhold payroll taxes, or pay the employer's share of social security on the commissions and/or fees paid to the board

members, trustee and ex officio treasurer, and the township clerk. The total compensation paid to these officials during 1999 totaled \$5,267.

The Internal Revenue Code requires employers to report such compensation on W-2 forms and withhold federal income taxes. Similarly, Chapter 143, RSMo 1994, includes requirements for reporting such compensation and withholding state income taxes. State and federal laws require employers to withhold payroll taxes and pay the employer's share of social security on the compensation paid to employees. Section 105.300, RSMo 1994, defines an appointive officer or employee of a political subdivision as an employee for social security purposes.

**WE RECOMMEND** the Township Board:

- A. In the future ensure compensation paid to township officials complies with state law.
- B. Ensure payroll taxes are properly withheld and remitted for any commissions or fees paid to township officials. In addition, the board should ensure that such compensation is properly reported on W-2 forms and social security taxes paid, including 1999.

**AUDITEE'S RESPONSE**

*We agree with these recommendations and are currently complying.*

|                        |
|------------------------|
| <b>3. Expenditures</b> |
|------------------------|

- A. The township does not have formal written bidding policies and procedures. As a result, the decision of whether to solicit bids for a particular purchase is made on an item by item basis. Bids were not solicited for insurance and officials' bonds. Additionally, the township solicited bids for the purchase of a road grader and road rock and hauling; however, the lowest bids were not selected, and justifications for selecting higher bids were not adequately documented. For road rock and hauling, township officials indicated the low bidder did not provide sufficient information in the bid; however, the board just accepted the higher bid instead of requesting additional information from the low bidder.

Formal bidding procedures for major purchases provide a framework for economical management of township resources and help ensure the township receives fair value by contracting with the lowest and best bidders. Competitive bidding also helps ensure all parties are given an equal opportunity to participate in the township's business. Bids can be obtained by telephone quotation, written quotation, sealed bid, or advertised sealed bid. Various approaches are appropriate, based on the dollar amount and type of purchase. Whichever approach is used, complete documentation should be maintained of all bids received and the reasons for selecting the winning bid.

- B. The township does not file Forms 1099 with the Internal Revenue Service (IRS). The Internal Revenue Code requires payments of \$600 or more for services by nonemployees (other than corporations) be reported to the federal government on Forms 1099. During 1998, the township paid \$22,601 for rock hauling and \$2,814 for equipment repairs which was not reported to the IRS. Similarly, 1999 payments for rock hauling (\$25,866) and equipment repairs (\$4,533) should be reported to the IRS in January 2000.
- C. The township has one full-time employee who was paid a \$300 bonus in December 1999. Similar bonuses have been paid in previous years.

These bonuses appear to represent additional compensation for services previously rendered and, as such, are in violation of Article III, Section 39 of the Missouri Constitution and Attorney General's Opinion No. 72, 1955 to Pray, which states, "...a government agency deriving its power and authority from the constitution and laws of the state would be prohibited from granting extra compensation in the form of bonuses to public officers after the service has been rendered."

- D. Documentation of actual time worked, such as a time sheet, is not available to support payroll expenditures. In addition to the full-time employee, the township utilizes a part-time employee to assist with emergency snow removal. Neither employee prepares time sheets. Time records should be prepared by the employees, approved by the township board, and filed with the township's payroll records.

**WE RECOMMEND** the Township Board:

- A. Establish formal bidding policies and procedures, including documentation requirements regarding the bids or quotes received and justification for the bid selected. In addition, when insufficient information is provided by a lower bidder, the board should consider obtaining additional information from the bidder instead of just selecting a higher bid.
- B. Ensure that IRS Forms 1099 are filed as required for prior years as well as in the future.
- C. Discontinue paying bonuses to the township employee.
- D. Require township employees to complete time sheets which reflect actual time worked and leave taken. The records should be prepared by employees, approved by the township board, and filed with township's payroll records.

**AUDITEE'S RESPONSE**

- A. *We agree with this recommendation and have already implemented a formal written bid policy.*

- B. *We agree with this recommendation and are currently complying with the Internal Revenue Service Code.*
- C. *These payments were intended as part of the employee's total compensation. In future years, we will budget this payment as a part of the employee's total compensation.*
- D. *We will take this recommendation under advisement.*

|   |
|---|
| <b>4. Budgets and Financial Reporting</b> |
|---|

- A. The township board does not prepare formal budgets. The township prepares a schedule of the prior year's actual expenditures to use as a guide for monitoring current year's expenditures; however, this schedule does not contain all information required by state law.

Section 67.010, RSMo 1994, requires each political subdivision to prepare an annual budget, and Sections 67.010 to 67.080, RSMo 1994, set specific guidelines for the format, approval, and amendments of the annual operating budget. A complete budget should include separate revenue and expenditure estimations, and include the beginning available resources and reasonable estimates of the ending available resources. The budget should also include a budget message and comparisons of actual revenues and expenditures for the two preceding fiscal years.

A complete and well-planned budget, in addition to meeting statutory requirements, can serve as a useful management tool by establishing specific cost and revenue expectations for township operations. A budget can also provide a means to effectively monitor actual costs by periodically comparing budgeted amounts to actual expenditures. Further, Section 65.380, RSMo 1994, requires the township board to prepare and file with the county clerk an annual estimate of the amount of money required to defray the expenses of the township.

- B. The township board does not publish annual financial statements and inventory listings as required by state law. Section 231.280, RSMo 1994, requires the township to publish annual financial statements and inventory listings in any newspaper of general circulation within the township which is published in the county. Publication of annual financial statements would allow residents to be better informed as to the township's financial activity and condition.

At a minimum, the published financial statements should contain the beginning cash balance, actual receipts by source for the year, actual expenditures by major category for the year, and the ending cash balance.

- C. Section 105.145, RSMo 1994, requires the township to file annual financial reports with the State Auditor's office. The township did not prepare or file financial reports for the years 1993 through 1997. The 1998 financial report was not filed with the State Auditor's office until October 12, 1999. The financial reports are to be filed within four months after the end of the township's fiscal year (the requirement is six months after the end of the fiscal year if an audit report prepared by a certified public accountant is filed).

**WE RECOMMEND** the Township Board:

- A. Prepare annual budgets in accordance with state law. The board should periodically compare actual revenues and expenditures with budgeted amounts to monitor township finances.
- B. Ensure annual financial statements and inventory listings are published in accordance with state law.
- C. File annual financial reports with the State Auditor's office as required by state law.

**AUDITEE'S RESPONSE**

- A. *We agree with this recommendation and are currently complying with state law.*
- B. *We will comply with this recommendation.*
- C. *We are currently complying with this recommendation.*

|  |
|--|
| <b>5. Minutes, Meetings, and Records</b> |
|--|

- A. In June 1999, the township board minutes indicated that two board members were compensated for attending six additional meetings and the township trustee for attending three additional meetings during April and June 1999. These additional board meetings were held to discuss the purchase of a new road grader with prospective vendors. The township board did not prepare minutes for these additional meetings.

In addition, the minutes of the board meetings did not always contain information required by statute. When the minutes indicated a motion had been passed, the minutes did not generally indicate the number of votes for and against.

Section 610.020, RSMo Cumulative Supp. 1999, requires a journal of minutes shall be taken and retained of all open meetings of a public governmental body and requires the minutes to include a record of votes taken. Complete and accurate board minutes should be maintained as a record of board decisions.

- B. The township gives adequate advance notice of their meetings; however, the notice does not include a tentative agenda. Section 610.020, RSMo Cumulative Supp. 1999, requires the notice of the meeting to include the time, date, and place of the meeting, as well as a tentative agenda.
- C. The township does not have a formal policy regarding public access to township records. A formal policy regarding access to township records would establish guidelines for the township to make records available to the public. This policy should establish a person to contact and an address to mail requests for access to records. Section 610.023, RSMo Cumulative Supp. 1999, lists requirements of making township records available to the public.

**WE RECOMMEND** the Township Board:

- A. Prepare minutes for all board meetings and ensure the minutes include records of all votes taken.
- B. Include a tentative agenda in the notice for all board meetings as required by state law.
- C. Establish a formal policy regarding public access to township records.

**AUDITEE'S RESPONSE**

*A&B. We are currently complying with these recommendations.*

*C. We have been complying with the Sunshine Law but will develop a formal policy.*

|   |
|---|
| <b>6. Accounting Records and Procedures</b> |
|---|

- A. The Township Trustee uses the date monies are deposited rather than the date received in the general ledger. To provide better accountability over funds, the date received should be recorded in the general ledger for all receipts.
- B. Checks are not restrictively endorsed. The bank applies the restrictive endorsement to checks as they are deposited. To reduce the risk of loss or misuse of funds, checks and money orders should be restrictively endorsed immediately upon receipt.
- C. The Township Trustee was not bonded from April 1993 to April 1999, even though a bond is required by Section 65.640, RSMo 1994. On August 23, 1999, a bond was obtained in the amount of \$250,000, retroactive to April 1, 1999, and effective until March 31, 2000. In addition, the other two board members are co-signers on the bank account

but are not bonded. Failure to bond all persons with access to assets exposes the township to risk of loss.

**WE RECOMMEND** the Township Board:

- A. Record the date received in the general ledger for all receipts.
- B. Restrictively endorse all checks immediately upon receipt.
- C. Ensure the Township Trustee is bonded in accordance with statutory requirements. In addition, the board should consider obtaining bond coverage for all individuals who are authorized check signers.

**AUDITEE'S RESPONSE**

- A. *We will take this recommendation under advisement.*
- B. *Checks are currently endorsed as they are received.*
- C. *The trustee will continue to be bonded as required, and we will consider obtaining bond coverage for the other board members.*

|                            |
|----------------------------|
| <b>7. Road Maintenance</b> |
|----------------------------|

- A. A formal maintenance plan for township roads is not prepared. A maintenance plan should be prepared in conjunction with the annual fiscal budget and include a description of roads to be worked on, the type of work to be performed, an estimate of the quantity and cost of materials needed, the dates such work could begin, the amount of labor required to perform the work, and other relevant information. The plan should be included in the budget message and be approved by the board. In addition, the board should consider holding a public hearing to obtain input from township residents.

A formal maintenance plan would serve as a useful management tool and provide greater input into the overall budgeting process. Such a plan provides a means to more effectively monitor and evaluate the progress made in the repair and maintenance of roads throughout the year.

- B. Beginning in 1999, the township keeps records of the amount of money spent on roads within the city limits of Laclede. These records indicate approximately \$5,400 was spent on roads within the city limits during 1999.

Section 65.295, RSMo 1994, states that a township may not expend more than one-fourth of the tax revenue generated from property within a city on the roads that are within the city. Although the city did not keep track of the amount of property taxes generated within the city of Laclede, it appears the township received approximately \$10,000 in road and bridge property taxes from city residents based on the city's assessed valuation. Therefore, the township should have only spent a maximum of approximately \$2,500 on roads within the city limits.

The board should review this matter and ensure it complies with state law.

**WE RECOMMEND** the Township Board:

- A. Prepare and document a maintenance plan at the beginning of the calendar year and periodically update the plan throughout the year. In addition, the board should review the progress made in the repair and maintenance of roads to make appropriate decisions on future projects.
- B. Keep expenditures on roads in the City of Laclede within the statutory limit.

**AUDITEE'S RESPONSE**

*We will take these recommendations under advisement.*

|  |
|--|
| <b>8. Township Collector's Accounting Records and Procedures</b> |
|--|

- A. The Township Collector maintains computer and manual records to account for the transactions of her money market and checking accounts. Computer records, consisting of account registers, bank reconciliations, and paid tax statements, were not properly retained. The Township Collector currently disposes of the manual records and deletes the computer files once the tax year has ended and the Ex Officio County Collector has issued an annual settlement. Retention of the original copy of applicable records is necessary to properly account for all monies received and disbursed. In addition, the Missouri Secretary of State has established record retention guidelines for local government officials.
- B. Voided checks are not always retained. To ensure all checks are properly accounted for, all voided checks should be properly defaced and retained.
- C. At the end of each fiscal year, the Township Collector pays out the amount of taxes owed to each political subdivision and then retains any monies left in the account. This resulted in the Township Collector retaining \$318 and \$327 more than the amount calculated on the annual settlements filed with the Ex Officio County Collector for the years ended

February 28, 1999 and 1998, respectively. These monies primarily resulted from interest earned on tax receipts held in her official account.

Section 139.430(4), RSMo 1994, allows for the Township Collector to retain a commission based on a formula of current taxes collected. This is the only source of commissions or payments to the Township Collector that are allowed by state law.

**WE RECOMMEND** the Township Collector:

- A. Retain the original copies of applicable records in accordance with the Secretary of State's guidelines.
- B. Ensure all voided checks are defaced and retained
- C. Ensure future commissions are retained in accordance with state law. We also recommend the Township Collector distribute interest earned to the political subdivisions.

**AUDITEE'S RESPONSE**

- A. *This will be done for tax year 1999.*
- B. *This will be done in the future.*
- C. *Approximately \$60 per year of the amounts retained includes commissions for drainage district collections. In the future, tax collections will be kept in non-interest bearing accounts.*

This report is intended for the information of the township's management and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

REVIEW OF THE  
DEPARTMENT OF ECONOMIC DEVELOPMENT  
DIVISION OF TOURISM

**From The Office Of State Auditor  
Claire McCaskill**

Report No. 2000-11  
February 25, 2000

AUDIT REPORT

Office Of The  
State Auditor Of Missouri  
Claire McCaskill

February 2000

**The following problems were discovered as a result of a review conducted by our office of the Department of Economic Development, Division of Tourism.**

---

Our review noted that the contract between the division and its advertising agency does not require the advertising agency to obtain competitive bids for purchases in excess of a predetermined amount. However, the advertising agency established a procurement policy for purchases relating to its contract with the division. This policy indicates that for purchases in excess of \$25,000, bids must be solicited from at least five sources. Our review of the advertising agency's records revealed that bids were not always solicited nor was bid documentation always retained for various purchases made during the audit period. Examples include \$102,508 and \$68,248 for the printing of two different magazine inserts.

Our review also examined the division's sponsoring various events to promote tourism in the state. We found the division had entered into a sponsorship contract for \$50,000, as did six other states, with the Mississippi River Cycling and Hiking Corridor, Inc. (MRCHC) to promote the Mississippi River Trail and the American Derby 2000 bicycle race.

Our review of this event revealed the division paid \$25,000 in December 1998, to the MRCHC when the arrangements of the American Derby 2000 were not yet known. MRCHC produced a promotional video to attract sponsors. The video presented MRCHC's intentions to have an 11 day race from St. Louis to New Orleans attracting race teams from across the U.S. and from Europe. The video also promised the event would be nationally televised. However, a signature sponsor was not obtained and the event had to be reorganized. The date of the event, the number of races, and the number of potential participants are still unknown.

In the future, to ensure the funds will be utilized for the intended purpose and that the event will live up to the expectations, the details of the event should be known before any sponsorship payments are made and steps should be taken to ensure the provisions of the contract have been met.

The Division of Tourism entered into a contract with the St. Louis Convention and Visitors Commission (CVC) to reimburse the CVC up to \$525,969 of the costs from the visit of Pope John Paul II to St. Louis, Missouri in January 1999. This contract was entered into without any formal action by the legislature approving this expenditure. Formal approval of this contractual obligation should have been obtained prior to the signing of the contract.

## STATE AUDITOR'S REPORT

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

Honorable Mel Carnahan, Governor  
and  
Joseph L. Driskill, Director  
Department of Economic Development  
and  
Members of the Tourism Commission  
and  
Christopher Jennings, Director  
Division of Tourism  
Jefferson City, Missouri 65102

We have conducted a review of the Department of Economic Development, Division of Tourism. The scope of this review included, but was not limited to, the period of July 1, 1997 through June 30, 1999. The objectives of this review were to:

1. Review certain management control procedures, legal compliance issues, policies, and management practices.
2. Determine the extent to which prior audit recommendations have been implemented.

Our review was made in accordance with applicable generally accepted government auditing standards and included such procedures as we considered necessary in the circumstances. In this regard, we reviewed the division's revenues, expenditures, contracts, and other pertinent procedures and documents, and interviewed division personnel.

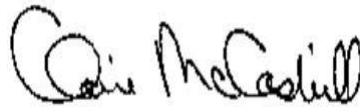

As part of our review, we assessed the division's management controls to the extent we determined necessary to evaluate the specific matters described above and not to provide assurance on those controls. With respect to management controls, we obtained an understanding of the design of relevant policies and procedures and whether they have been placed in operation and we assessed control risk.

Our review was limited to the specific matters described above and was based on selected tests and procedures considered appropriate in the circumstances. Had we performed additional

procedures, other information might have come to our attention that would have been included in this report.

The accompanying History, Organization, and Statistical Information is presented for informational purposes. This information was obtained from the division's management and was not subjected to the procedures applied in our review of the Department of Economic Development, Division of Tourism.

The accompanying Management Advisory Report presents our findings and recommendations from our review of the Department of Economic Development, Division of Tourism.

A handwritten signature in black ink, appearing to read "Claire McCaskill". The signature is fluid and cursive, with the first name "Claire" being more prominent than the last name "McCaskill".

Claire McCaskill  
State Auditor

September 17, 1999 (fieldwork completion date)

The following auditors participated in the preparation of this report:

## MANAGEMENT ADVISORY REPORT SECTION

Management Advisory Report -  
State Auditor's Current Recommendations

REVIEW OF THE  
DEPARTMENT OF ECONOMIC DEVELOPMENT  
DIVISION OF TOURISM  
SUMMARY OF FINDINGS

1. Papal Visit (pages 7-9)

The division entered into a contract with the St. Louis Convention and Visitors Commission (CVC) without having the funds appropriated for this obligation and without the approval of the Tourism Commission. In addition, the division did not require bidding documentation for any of the approved invoices submitted by the St. Louis CVC.

2. Expenditures and Contracts (pages 9-12)

The contract between the division and the advertising agency does not contain provisions requiring the advertising agency to solicit bids with its subcontractors and bid documentation was not sufficient for \$170,756 of expenditures reimbursed to the advertising agency. The division does not require the advertising agency to pay its subcontractors prior to requesting reimbursement from the division. In addition, adequate documentation is not always maintained to support expenditures. The division made reimbursements for duplicate invoices submitted and for alcohol related expenditures.

3. Sponsorships (pages 12-13)

The division agreed to sponsor and paid \$25,000 in December 1998 toward the American Derby bicycle race before the arrangements of the event were known. The division did not properly monitor the contract provisions. The specifics of this event are still unknown. Written criteria has not been developed for selecting events to be sponsored by the division and records are not maintained to enable the division to evaluate the economic impact of sponsorships.

4. General Fixed Assets (pages 13-14)

Fixed asset additions are not recorded in the fixed asset records in a timely manner and are not reconciled to equipment expenditures. A physical inventory of fixed assets is not performed on an annual basis and fixed assets are not always tagged as division property.

REVIEW OF THE  
DEPARTMENT OF ECONOMIC DEVELOPMENT  
DIVISION OF TOURISM  
MANAGEMENT ADVISORY REPORT -  
STATE AUDITOR'S CURRENT RECOMMENDATIONS

**1. Papal Visit**

On January 26 and 27, 1999, Pope John Paul II came to St. Louis, Missouri to visit. He met with President Clinton and Vice President Gore. The Papal visit was considered a visit by a head of state and \$3.4 million estimated cost was financed in part by federal funds, state agencies (including the Division of Tourism), the City of St. Louis, Papal Visit 1999 (a nonprofit corporation established by the Archdiocese of St. Louis), and others. The Division of Tourism entered into a contract with the St. Louis Convention and Visitors Commission (CVC) to reimburse the CVC up to \$526,969 of the related costs from the state's General Revenue Fund and the Tourism Supplemental Revenue Fund. While the CVC has not yet been reimbursed for any of the expenditures, the division has approved and intends to pay several of the invoiced costs. Our review of the contract and the related expenditures noted the following concerns.

- A. The division entered into the contract with the St. Louis CVC without having funds appropriated for this obligation. The expenditures associated with the Papal visit were not included in the budget approved by the Tourism Commission for fiscal year 1999. As a result, the division found it necessary to request an emergency appropriation to meet some of its contractual obligation. Additional monies were approved from the following sources:

|  |                   |
|--|-------------------|
| FY99 Supplemental General Revenue Fund - State |                   |
| Appropriation (Reappropriated to FY2000)       | \$ 299,463        |
| FY99 Appropriation Tourism Supplemental        |                   |
| Revenue Fund (Reappropriated to FY2000)        | 227,506           |
|  | <u>\$ 526,969</u> |

It appears the division may have circumvented the budgetary process by incurring expenditures prior to receiving authorization by the commission in the division's budget. To ensure there are sufficient funds to meet contractual obligations, the division should monitor expenditures from appropriations and evaluate the overall financial condition before entering into contracts for unplanned expenditures. If additional funds are needed, the division should follow the proper procedures for requesting additional appropriations before entering into contractual agreements. Section 33.040, RSMo 1994, provides that no obligation shall be incurred by any department unless there is an unencumbered balance in the appropriation sufficient enough to pay the obligation. Requesting additional appropriations in advance reduces the likelihood of deficit spending and of incurring

expenditures not approved by the legislature, which must be avoided to ensure the division operates within its budgeting authority.

- B. The contract with the St. Louis CVC was entered into after the date of the Papal visit. The contract was signed by the President of the St. Louis CVC on February 8, 1999, and the Deputy Director of the Division of Tourism on February 9, 1999, which is approximately 2 weeks after the Papal visit. In addition, the contract was not approved by the Tourism Commission until after the agreement was signed.

To ensure monies are appropriately spent, the contract terms should be defined before the purpose of the contract has occurred, and the Tourism Commission should approve major commitments before division personnel enter into such agreements.

- C. The division's contract authorizes the St. Louis CVC to expend up to \$526,969 for "acceptable related expenditures". The division has received several invoices from the CVC which have been approved; however, the division does not intend to make any reimbursements until the full contract amount has been approved. Our review of these invoices revealed the actual expenditures were incurred by the Papal Visit 1999 not-for-profit organization. The Papal Visit 1999 is affiliated with the Archdiocese of St. Louis and incurred a substantial portion of the costs relating to the Pope's visit. The St. Louis CVC is submitting invoices from the Papal Visit 1999 for reimbursement by the division.

During our review of the expenditures we noted bidding documentation has not been submitted with the invoices. In addition, the contract with the St. Louis CVC does not require competitive bidding for purchases in excess of a predetermined amount. Section 34.040, RSMo Cumulative Supp. 1999 requires all purchases in excess of \$3,000 to be competitively bid. Without requiring the CVC to submit documentation of bids, the division can not ensure it is receiving a fair value for the goods and services to be reimbursed.

**WE RECOMMEND** the division:

- A. Discontinue incurring expenditures not authorized by the commission and the legislature. In addition, the division should monitor expenditures from appropriations and evaluate the overall financial condition before entering into contracts for unplanned expenditures. If additional funds are needed, requests should be filed and approved prior to entering into contractual agreements.
- B. Ensure the Tourism Commission approves major commitments before division personnel enter into such agreements.
- C. Require contract purchases to adhere to state bidding policies and procedures.

## **AUDITEE'S RESPONSE**

- A. *When the Missouri Division of Tourism entered into the contract on February 9, 1999, the division had unencumbered funds well in excess of those needed for the \$526,969 contract with the St. Louis Convention and Visitors Commission. In fact, monthly reports generated by the Office of Administration show that at the end of February 1999, the Division of Tourism had \$3,568,059 in unencumbered funds available in the expense and equipment budget. The Missouri Division of Tourism did not exceed the appropriation authority granted by the General Assembly when it entered into the contract.*

*The budget approved by the Tourism Commission does allow the Division of Tourism flexibility to take advantage of opportunities such as the Papal visit. An opportunity of this importance and magnitude to develop recognition and showcase St. Louis and the state of Missouri to the world is truly a rarity.*

*Given the amount of funds committed to this unexpected opportunity, the Division of Tourism utilized the State of Missouri Supplemental Appropriation process available to it by requesting additional funding to minimize the financial impact on other advertising efforts that would occur later in the year. The House of Representatives and the Senate concurred with the request by including additional funding in section 14.050 of House Bill 14.*

*We concur with the recommendation that the Missouri Tourism Commission should have taken formal action approving this support prior to the signing of the contract. However, the division respectfully disagrees that it incurred expenditures not authorized by the legislature.*

- B. *We concur.*
- C. *We concur and have implemented.*

## **2. Expenditures and Contracts**

- A. The contract between the division and the advertising agency does not require the advertising agency to obtain competitive bids for purchases in excess of a predetermined amount. However, the advertising agency established a procurement policy for purchases relating to its contract with the division. This policy indicates that for purchases under \$10,000, the advertising agency may contact one or more vendors to obtain quotes, pricing, or bids. For purchases between \$10,000 and \$25,000, the policy indicates the advertising agency may solicit verbal offers using at least three sources selected in a fair and consistent manner. For purchases in excess of \$25,000, the policy indicates written bids must be solicited from at least five sources.

Our review of the advertising agency's records revealed that bids were not always solicited nor was bid documentation always retained for various purchases made during the audit period. Examples include \$102,508 and \$68,248 for the printing of two different magazine inserts.

To ensure a competitive process and to ensure all vendors receive a fair opportunity to participate in division business, the division at a minimum should require the advertising agency to obtain independent competitive bids for all purchases in excess of a predetermined amount established by the advertising agency and require the advertising agency to maintain adequate documentation of these bids to provide evidence the bidding process followed the guidelines. Furthermore, established bidding procedures should provide a framework for economical management of the division's resources and help ensure the division receives fair value by contracting with the lowest and best bidders.

In addition, the division should work with the Office of Administration to ensure these bidding requirements are included in future advertising contracts.

Similar conditions were noted in our prior report.

- B. The division does not require its advertising agency to pay its subcontractors prior to requesting reimbursement and commission fees from the division. Without requiring the advertising agency to pay its subcontractor prior to being reimbursed, the division has no assurance those subcontractors will be paid. The division should reimburse the advertising agency only after the agency has paid its subcontractors.

Similar conditions were noted in our prior report.

- C. The division contracts with a company to provide international marketing services. Our review of the expenditures made to the marketing company revealed the following concerns:

- 1) Adequate documentation is not always maintained to support expenditures. The contract with the company allows for reimbursement of professional services which are above and beyond the required services. The company was reimbursed \$9,800 for professional services; however, there were no descriptions of the types of services performed to determine whether or not they actually went above and beyond the contract requirements.

All disbursements should be supported by paid receipts and/or vendor provided invoices to ensure the expenditures are proper and in compliance with the provisions of the contract. Invoices for professional services should include the number of hours worked by day, who provided the services, the hourly rate being charged, and a description of the work performed.

- 2) We also noted that duplicate payments were made on two invoices totaling \$478. The first payment had the original invoice attached as supporting documentation while the second payment had a hand written copy of the original invoice attached as supporting documentation. To prevent duplicate payments, disbursements should only be made on properly approved original invoices.
- 3) The marketing company was reimbursed \$690 for alcoholic beverage related expenditures, which were incurred while entertaining tour operators in Ireland. Reimbursing expenditures related to alcoholic beverages is an inappropriate use of division funds. In addition, the state travel regulations and the Office of Administration's general policies prohibit reimbursement for the purchase of alcoholic beverages.

Procedures for reviewing supporting documentation should be followed to ensure expenditures are in compliance with the contract provisions and necessary to conduct state business.

**WE RECOMMEND** the division:

- A. Require the advertising agency to adhere to its bidding requirements, to maintain documentation of bids received, and to evaluate bids in accordance with the contract guidelines. In addition, the division should add to future contracts the requirement that the advertising agency obtain competitive bids for all purchases in excess of a predetermined amount.
- B. Require the advertising agency to pay its subcontractors prior to requesting reimbursement from the division.
- C.1.  
& 2. Ensure adequate supporting documentation is maintained to support all disbursements and that duplicate payments are not made by making disbursements from original invoices only. In addition, the division should seek reimbursement of the \$478.
- C.3. Ensure procedures for reviewing invoices for compliance with the contract provisions are followed and the expenditures are necessary to conduct state business.

**AUDITEE'S RESPONSE**

- A. *We concur.*
- B. *We concur with the State Auditor's recommendation that the advertising agency pay its subcontractors prior to requesting reimbursement from the division. We will implement this recommendation with the new advertising contract that will become effective July 1, 2000.*

C.1,

2&3. *We concur. The Missouri Division of Tourism has made a reduction to subsequent billings from the vendor to correct the account.*

**3.**

### **Sponsorships**

- A. The division sponsors various events to promote tourism in the state. The division entered into a sponsorship contract for \$50,000, as did six other states, with the Mississippi River Cycling and Hiking Corridor, Inc. (MRCHC) to promote the Mississippi River Trail (MRT) and the American Derby 2000 bicycle race.

Our review of this event revealed the division paid \$25,000 in December 1998, to the MRCHC when the arrangements of the American Derby 2000 were not yet known. MRCHC produced a promotional video to attract sponsors. The video presented MRCHC's intentions to have an 11 day race from St. Louis to New Orleans attracting race teams from across the United States and from Europe. The video also promised the event would be nationally televised. However, a signature sponsor was not obtained and the event had to be reorganized. The date of the event, the number of races, and the number of potential participants are still unknown.

In addition, the contract details indicate that a brochure for the Missouri portion of the MRT will be produced by mid-year 1999. Since the first payment, there has been no communication between the division and the MRCHC. The division has not performed any procedures to monitor compliance with the terms of the contract or the progress of the event.

The contract does not indicate when the remaining \$25,000 portion of the sponsorship amount will be due. Before any additional payments are made to the MRCHC, the division should request the details of the race, an expenditure report, and the brochures. In the future, to ensure the funds will be utilized for the intended purpose and that the event will live up to the expectations, the details of the event should be known before any sponsorship payments are made and steps should be taken to ensure the provisions of the contract have been met.

- B. The division has not established written criteria for selecting events to be sponsored by the division. Applications describing the event are completed and the sponsorship requests are reviewed on a case by case basis, but there are no written guidelines for determining what events should be sponsored. In addition, the division does not maintain records to determine the amount spent on sponsorships each year, the number of events sponsored, the regions benefiting from the sponsorships, and the economic impact of the sponsorships. As a result, the division is unable to properly evaluate the events to determine the economic

impact of the sponsorships and whether its funds will be used effectively and efficiently to meet the division's objectives of promoting tourism in the state.

To ensure the division's sponsorship monies are used effectively and efficiently, the division should establish written criteria for selecting events to be sponsored by the division. In addition, the division should maintain records to analyze the economic impact of sponsorships on the state as a whole and on specific regions.

**WE RECOMMEND** the division:

- A. Require arrangements for sponsorship events to be substantially complete before making any payments. In addition, contract monitoring procedures should be developed to ensure important provisions have been met.
- B. Establish written criteria for selecting events to be sponsored by the division and maintain records to analyze the economic impact of sponsorships on the state as a whole and on specific regions.

**AUDITEE'S RESPONSE**

*A&B. We concur.*

|                                |
|--------------------------------|
| <b>4. General Fixed Assets</b> |
|--------------------------------|

Our review of the division's general fixed asset records and procedures indicated the following areas in which improvements are needed:

- A. Fixed asset additions are not recorded in the fixed asset records in a timely manner and are not reconciled to equipment expenditures to ensure all items are properly recorded on the fixed asset records. For example, we reviewed the purchase of laptop computers costing \$21,100 and copy equipment costing \$12,700 which were purchased during our audit period and not added to the general fixed asset records.

The failure to properly record and reconcile property items reduces the control and accountability over fixed assets and increases the potential for loss, theft, or misuse of assets.

- B. A physical inventory of the fixed assets is not performed on an annual basis as required by the Code of State Regulations at CSR 40-2.031. The last fixed asset physical inventory verification was performed in June 1996 by an individual who had custody of selected fixed assets and was responsible for all of the record keeping duties.

Annual physical inventories are necessary to establish proper accountability over fixed assets. Documentation of the physical inventory should be retained to show compliance with the state regulations. In addition, the physical inventory should be performed by employees who are independent of the custody and record keeping responsibilities.

- C. General fixed asset items are not always numbered, tagged, or otherwise identified as division property. Property control tags should be affixed to all fixed asset items to help improve accountability and to ensure that assets are properly identified as belonging to the division.

**WE RECOMMEND** the division:

- A. Ensure general fixed asset purchases are added to the fixed asset records in a timely manner by periodically reconciling fixed asset additions to records of equipment purchases.
- B. Conduct an annual physical inventory and reconcile the physical inventory to the fixed asset records. Documentation of the physical inventories should be retained to show compliance with state regulations. The division should also ensure the individual who performs the physical inventory is independent of the custody and record keeping duties.
- C. Ensure all fixed assets are properly numbered, tagged, or otherwise identified as division property.

**AUDITEE'S RESPONSE**

A-C. *We concur.*

This report is intended for the information of the management of the Department of Economic Development, Division of Tourism and other governmental officials. However, this report is a matter of public record and its distribution is not limited.

## Follow-Up on State Auditor's Prior Recommendations

REVIEW OF THE  
DEPARTMENT OF ECONOMIC DEVELOPMENT  
DIVISION OF TOURISM  
FOLLOW-UP ON STATE AUDITOR'S PRIOR RECOMMENDATIONS

This section reports follow-up action taken by the Department of Economic Development, Division of Tourism, on recommendations made in the Management Advisory Report (MAR) of our report issued for the period of July 1, 1994 through December 31, 1995. The prior recommendations which have not been implemented, but are considered significant, have been repeated in the current MAR. Although the remaining unimplemented recommendations have not been repeated, the division should consider implementing these recommendations.

1. Presidential Library Funding

The division's control and monitoring of a \$1 million appropriation to promote tourism for the Harry S Truman Library was deficient. The division did not obtain a written contract with the NFP corporation outlining each parties' rights and obligations regarding the use of the state's money. The NFP corporation had used \$185,000 of the grant to fund the production of a film, while the remainder of the grant had been invested in fixed income investments.

Recommendation:

The division seek reimbursement of the unexpended portion of the grant. In the future, the division should enter into written agreements for all significant expenditures which specifically identify the rights and obligations of all parties. In addition, the division should establish criteria and implement procedures to ensure compliance with the written agreements and should disburse funds only as expenditures are incurred.

Status:

Implemented. The division obtained all supporting documentation of expenditures and reconciled them to the Library's records. The division requested the interest, but it was agreed that the interest should go towards the project. In addition, subsequent contracts with the Library were documented.

2. Sales Tax Funding

Section 620.467, RSMo 1994, indicated that the State Treasurer should annually transfer sales tax revenue from the General Revenue Fund-State to the Tourism Supplemental Revenue Fund. The section also indicated the transfer was based on a formula and should not exceed \$3 million in any year other than fiscal year 1996. In fiscal year 1996, the transfer may not exceed \$4 million, and the excess over \$3 million should be dedicated for the promotion of tourism presidential libraries. The fiscal year 1996 transfer totaled \$5,764,987, while using the formula the transfer should have

been \$1,764,987. This over-funding may have been due back to the state's General Revenue Fund.

Recommendation:

The division establish procedures to ensure annual transfers to the Tourism Supplemental Revenue Fund are made in compliance with the statutory restrictions. Furthermore, the division should request an Attorney General's opinion regarding the propriety of the fiscal year 1995 and 1996 transfer amounts. If determined necessary, the division should pursue revisions to Section 620.467, RSMo 1994, to clarify this section regarding the transfer provisions.

Status:

Partially implemented. While the division did not request an Attorney General's opinion regarding the propriety of the transfer amounts, it did work with the legislature to clarify and revise the wording of the statute.

3. Expenditures and Contracts

- A. The division permitted two out-of-state businesses to advertise in publications financed by the division.
- B. The division did not require its advertising agency to complete projects and pay its subcontractors prior to requesting reimbursements and commission fees from the division.
- C. The contract between the division and the advertising agency did not require the advertising agency to obtain competitive bids for purchases in excess of a predetermined amount.
- D. The contract between the division and the advertising agency did not specifically require the advertising agency to obtain written contracts with the subcontractors.
- E. The former Division Director used state resources to prepare and mail 4,527 copies of her resignation letter.

Recommendation:

The division:

- A. Refrain from using state monies to subsidize out-of-state businesses and establish procedures to ensure out-of-state businesses will not be advertised in future publications financed by the division.

- B. Require the advertising agency to complete projects and pay its subcontractors prior to requesting reimbursement from the division, and implement procedures to ensure the division does not pay the advertising agency commission fees until the project has been completed.
- C. Require the advertising agency to adhere to its bidding requirements to maintain documentation of the bids received and to evaluate bids in accordance with the contract guidelines. In addition, the division should add to future advertising contracts the requirement that the advertising agency obtain competitive bids for all purchases in excess of a predetermined amount.
- D. Work with the Office of Administration to add to future advertising contracts the requirement that the advertising agency obtain written contracts with its subcontractors. In addition, the division should implement procedures to ensure the contract terms with its advertising agency are followed.
- E. Along with the DED and the Tourism Commission, continue to work with the Attorney General's Office to determine whether the former Division Director's letter was an appropriate use of state resources and take appropriate action.

Status:

A&D. Implemented.

- B. Partially implemented. The division does ensure the projects are completed before paying the advertising agency; however, the advertising agency does not always pay its subcontractors before being reimbursed by the division. See MAR No. 2.
- C. Not implemented. See MAR No. 2.
- E. Implemented. After receiving a ruling from the Attorney General's Office with several options, the commission decided further action did not need to be taken.

4. Sponsorships

- A. The division paid over \$33,000 for promotional items and sponsorship fees without written contracts specifying what the division would receive in exchange for sponsoring the events.
- B. The division had not established written criteria for selecting events to be sponsored by the division. In addition, the division did not maintain records to determine the amount spent on sponsorships each year, the number of events sponsored, the regions benefiting from the sponsorships, and the economic impact of the sponsorships.

Recommendation:

The division:

- A. Enter into written agreements for all sponsorships which specifically identify what the division will receive in exchange for sponsoring the events.
- B. Establish written criteria for selecting events to be sponsored by the division and maintain records to analyze the economic impact of sponsorships on the state as a whole and on specific regions.

Status:

- A. Implemented.
- B. Not implemented. See MAR No. 3.

## STATISTICAL SECTION

History, Organization, and  
Statistical Information

DEPARTMENT OF ECONOMIC DEVELOPMENT  
DIVISION OF TOURISM  
HISTORY, ORGANIZATION, AND STATISTICAL INFORMATION

The Missouri Tourism Commission was created in 1967. The Division of Tourism is the administrative arm of the commission. The division is a part of the Department of Economic Development.

The commission determines policy for all matters relating to tourism promotion. The commission consists of ten members appointed for four-year terms without compensation. One member is the lieutenant governor. Two members are senators, appointed by the president pro tem of the Senate. Two members are from the House of Representatives and are appointed by the speaker of the House of Representatives. Five other persons are appointed by the governor.

Members of the Tourism Commission as of June 30, 1999, were:

| <u>Member</u>                              | <u>Term Expires</u> |
|--|---------------------|
| Lieutenant Governor Roger B. Wilson, Chair | No Term *           |
| Mr. Louis P. Hamilton, Vice-Chair          | January 2000        |
| Senator Sidney Johnson                     | No Term **          |
| Senator Roseann Bentley                    | No Term **          |
| Representative Sam Leake                   | No Term **          |
| Representative Chuck Pryor                 | No Term **          |
| Mr. Buddy W. (Bud) Bolinger                | January 1998 ***    |
| Mr. Daniel R. Keller                       | January 1999 ***    |
| Ms. Kathleen L. Tucker                     | January 1999 ***    |
| Ms. Consuelo D. (Connie) Washington        | January 1997 ***    |

\* Lieutenant Governor is automatically a member of the commission.

\*\* Appointed by the Speaker of the House or the President Pro Tem of the Senate at the beginning of each new session.

\*\*\* Continues to serve until a replacement is appointed.

The purpose of the division is to promote the state's travel industry by encouraging visits by out-of-state vacationers and by encouraging Missourians to vacation in their home state. The division is administered by a director who is appointed by the Tourism Commission. Mr. Chris Jennings has served as Director since June 1996. At June 30, 1999, the division had thirty-nine full-time employees, thirty-four of whom were under the State Merit System.

The number of people visiting each information center during the two years ended June 30, 1999 were as follows:

| Location       | Year Ended June 30, |         |
|----------------|---------------------|---------|
|                | 1999                | 1998    |
| Hannibal       | 64,370              | 67,319  |
| Jefferson City | 15,389              | 16,381  |
| Joplin         | 130,114             | 133,430 |
| Kansas City    | 128,125             | 122,777 |
| New Madrid     | 127,460             | 123,392 |
| Rock Port      | 130,247             | 130,527 |
| St. Louis      | 153,659             | 184,324 |
| Total          | 749,364             | 778,150 |

REVIEW OF  
STATE DISTRIBUTIONS  
TO COMMUNITY COLLEGES

**From The Office Of State Auditor  
Claire McCaskill**

Report No. 2000-10  
February 24, 2000

AUDIT REPORT

Office Of The  
State Auditor Of Missouri  
Claire McCaskill

February 2000

**The following problems were discovered as a result of a review conducted by our office of the State Distributions to Community Colleges.**

---

Missouri's public community college districts are funded through a combination of local district taxes, tuition and fees, and state aid. Chapter 163.191(1), RSMo 1994 makes public community colleges eligible for state funding in an amount up to 50 percent of their planned operating expenditures. In Missouri, twelve community college districts support seventeen campuses. The Department of Higher Education (DHE) and the Department of Elementary and Secondary Education (DESE) are the main distributors of state monies to community colleges.

During fiscal years 1999 and 1998, the DHE distributed monies totaling \$135 million and \$117.2 million, respectively, and the DESE distributed monies totaling \$25.6 million and \$26.3 million, respectively, to community colleges for various programs. Although some funding is provided for general operating expenses, other monies are for restricted purposes such as maintenance and repair, capital improvement, and technical education. Some programs are funded by advance payments to the community colleges while other programs are funded on a reimbursement basis.

Our review found that the DHE does not perform formal on-site monitoring for any of the monies that it distributed to community colleges. Without periodic on-site monitoring procedures, the DHE can not ensure that the items on expenditure reports are accurate and monies are used for their intended purpose.

We also noted instances where the DHE advanced postsecondary technical education funds in excess of expenditures reported by community colleges. DHE allows these entities to carry over the excess funds from one fiscal year to the next. These carryover amounts were approximately \$1.1 million and \$1.5 million for fiscal years 1999 and 1998, respectively.

While DHE personnel indicated that they were aware of the carryover monies, the DHE did not adequately monitor these carryover balances or require detailed final expenditure reports of the carryover monies. As a result, the DHE has no assurance that the carryover funds were properly spent.

(over)

YELLOW SHEET

Allowing schools to retain funds from one year to the next weakens the DHE's control over those funds. To better control these funds, the DHE should require all unused funds to be returned or if the schools are permitted to keep unused funds, then adequate documentation supporting expenditures made from these monies should be obtained by the DHE.

The Department of Elementary and Secondary Education (DESE) does perform formal on-site monitoring procedures for its programs, except for Early Childhood Education and School Age Care Programs. Formal on-site monitoring procedures are essential to provide the proper oversight needed for these programs.

## STATE AUDITOR'S REPORT

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

Honorable Mel Carnahan, Governor  
and  
Coordinating Board for Higher Education  
and  
Dr. Kala M. Stroup, Commissioner  
Department of Higher Education  
Jefferson City, Missouri 65109  
and  
Missouri State Board of Education  
and  
Dr. Robert E. Bartman, Commissioner  
Department of Elementary and Secondary Education  
Jefferson City, Missouri 65101

We have conducted a review of state distributions to community colleges. The objectives of this review were to:

1. Determine the total amount of monies distributed to community colleges from state agencies.
2. Review and evaluate internal control procedures, legal compliance issues, and management practices at the various state agencies to determine the propriety, efficiency and effectiveness of those procedures and practices.
3. For selected community colleges, review and evaluate internal control procedures, legal compliance issues, and management practices to determine the propriety, efficiency and effectiveness of those procedures and practices.

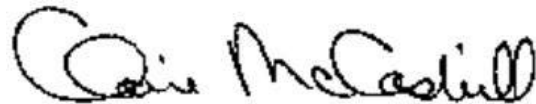

Our review was made in accordance with applicable generally accepted government auditing standards and included such procedures as we considered necessary in the circumstances. In this regard, we reviewed budgetary and planning records, expenditure records, and interviewed various state and community college personnel. Our review was generally limited to policies, practices, and transactions for the years ended June 30, 1999 and 1998.

As part of our review, we assessed the state agencies' management controls to the extent we determined necessary to evaluate the specific matters described above and not to provide assurance on those controls. With respect to management controls, we obtained an understanding of the design of relevant policies and procedures and whether they have been placed in operation and we assessed control risk. In order to assess control risk, we performed tests of controls to obtain evidence regarding the effectiveness of the design and operation of certain policies and procedures. For the purpose of this review, we have classified the management controls as expenditures and contracts.

Our review was limited to the specific matters described above and was based on selective tests and procedures considered appropriate in the circumstances. Had we performed additional procedures, other information might have come to our attention that would have been included in this report.

The accompanying History, Organization, and Statistical Information is presented for informational purposes. This information was obtained from the departments' management and was not subjected to the procedures applied in the review of state distributions to community colleges.

The accompanying Management Advisory Report presents our findings and recommendations arising from our review of state distributions to community colleges.

Claire McCaskill  
State Auditor

September 24, 1999 (fieldwork completion date)

The following auditors participated in the preparation of this report:

|                     | Gabriel Rackers        |

## MANAGEMENT ADVISORY REPORT SECTION

REVIEW OF STATE DISTRIBUTIONS TO COMMUNITY COLLEGES  
SUMMARY OF FINDINGS

1. Department of Higher Education Monitoring Procedures (pages 6-8)

The Department of Higher Education (DHE) does not perform formal on-site monitoring procedures and final expenditure reports are not received for all programs. The comparison of final expenditure reports to budgets is not documented for the postsecondary technical education funds. The DHE allows schools to carry over monies received in excess of costs.

2. Monitoring of the Early Childhood Education and School Age Care Programs (pages 8-9)

The Department of Elementary and Secondary Education does not perform formal on-site monitoring procedures for the Early Childhood Education and School Age Care programs. Similar program budgets and expenditure reports are not compared.

REVIEW OF STATE  
DISTRIBUTIONS TO COMMUNITY COLLEGES  
MANAGEMENT ADVISORY REPORT

|           |   |
|-----------|---|
| <b>1.</b> | <b>Department of Higher Education Monitoring Procedures</b> |
|-----------|---|

During fiscal years 1999 and 1998, the Department of Higher Education (DHE) distributed monies totaling \$135 million and \$117.2 million, respectively, to community colleges for various programs. Although some funding is provided for general operating expenses, other monies are for restricted purposes such as maintenance and repair, capital improvements, and technical education. Some programs are funded by advance payments to the community colleges while other programs are funded on a reimbursement basis.

- A. The DHE does not perform formal on-site monitoring for any of the monies that it distributed to community colleges. Without periodic on-site monitoring procedures, the DHE can not ensure that the items on expenditure reports are accurate and monies are used for their intended purpose.

Formal on-site monitoring procedures are essential to review and evaluate the fiscal operations and the quality and effectiveness of the programs.

- B. The DHE does not request adequate expenditure reports for the Out-of District, Workforce Preparation-TANF, and Public Safety programs which are funded by advance payments. Detailed expenditure reports would help the DHE ensure that monies disbursed are being spent or used for their intended purpose. During our review, we noted that community colleges do not always track the disbursements separately for these programs because such a procedure is not required by the DHE. Therefore, there is no assurance that all monies disbursed to community colleges for these programs were actually spent. Disbursements to community colleges for these programs for the two years ended June 30, 1999, totaled approximately \$5.5 million.

Expenditure documentation should be obtained and reviewed by the DHE to help provide assurance that monies were properly spent.

- C. During the two years ended June 30, 1999, the DHE advanced postsecondary technical education funds totaling more than \$23 million to community colleges. These advances were based on budgets provided by the community colleges and, at year end, the colleges submitted expenditure reports which documented how the funds were spent. The DHE indicated that they compared the final expenditure reports to the budgets, however, their review was not documented.

Documenting the comparison of final expenditure reports to budgets would strengthen DHE's controls over these funds and help ensure expenditures are consistent with budgets and in accordance with the program requirements.

- D. We noted instances where the DHE advances for postsecondary technical education were in excess of expenditures reported by community colleges. DHE allows these entities to carry over the excess funds from one fiscal year to the next. The following carry over amounts were noted:

| Community College                 | Year ended June 30, |           |
|-----------------------------------|---------------------|-----------|
|                                   | 1999                | 1998      |
| Metropolitan Community College    | \$ 89,037           | 113,375   |
| Moberly Area Community College    | 110,548             | 163,601   |
| Ozark Technical Community College | 237,540             | 148,864   |
| St. Louis Community College       | 354,019             | 1,072,356 |
| East Central College              | 102,842             | N/A       |
| Jefferson College                 | 37,007              | N/A       |
| North Central Missouri College    | 197,636             | N/A       |
| Mineral Area College              | N/A                 | 1,027     |
| Total                             | \$ 1,128,629        | 1,499,223 |

While DHE personnel indicated that they were aware of the carryover monies, the DHE did not adequately monitor these carryover balances or require detailed final expenditure reports of the carryover monies. As a result, the DHE has no assurance that the carryover funds were properly spent.

Allowing schools to retain funds from one year to the next weakens the DHE's control over those funds. To better control these funds, the DHE should require all unused funds be returned or, if the schools are permitted to keep unused funds, then adequate documentation supporting expenditures made from these monies should be obtained by the DHE.

**WE RECOMMEND** the DHE:

- A. Perform formal on-site monitoring procedures to ensure monies are spent appropriately and to review the quality and effectiveness of services provided by the community colleges.
- B. Obtain and review detailed expenditure reports for all programs to help ensure all monies are properly spent.

- C. Document the review and comparison of final expenditure reports to budgets for the postsecondary technical education funds.
- D. Require all unused monies to be refunded to the DHE or, if monies are not refunded, adequate documentation supporting the expenditures from these funds should be obtained.

### **AUDITEE'S RESPONSE**

- A. *We partially concur. Currently, staff does make on-site visits, gathers relevant data, and receives audit reports from each college. The DHE will develop more formalized processes and procedures to document these on-site visits, the data collection, and the review of audit reports to verify distribution of funds for the intended purpose.*
- B. *We partially concur. Currently, the DHE is following statutory requirements for distributions to community colleges. The DHE will evaluate current procedures, analyze desirable changes, and implement changes needed to help ensure all monies continue to be properly spent.*
- C. *We concur. The DHE will implement procedures to document the review and comparison of final expenditure reports to budgets for the postsecondary technical education funds.*
- D. *We concur. The DHE will develop a procedure for the community colleges to submit detailed final expenditure reports of the carryover monies for postsecondary technical education.*

|--|
| <b>2. Monitoring of Early Childhood Education and School Age Care Programs</b> |
|--|

The Department of Elementary and Secondary Education (DESE) contracts with various community colleges to provide Early Childhood Education and School Age Care Programs. Community colleges are funded by various federal and state grant awards based on budgets submitted by the colleges. Monies are advanced to those community colleges by the DESE and the colleges must submit expenditure reports which document how the funds were spent. Distributions to community colleges for these programs totaled approximately \$125,000 for the two years ended June 30, 1999.

- A. The DESE monitors the community colleges' activities carried out under its programs by reviewing annual budgets and amendments, final expenditure and program reports, and annual independent audits performed in accordance with OMB Circular A-133. However, formal on-site monitoring is not periodically conducted to review and evaluate the fiscal operations and the quality and effectiveness of the programs.

We visited one community college and noted that while the total expenditures claimed on the final expenditure reports materially agreed to the actual amount spent, individual line items for travel and staff development were not always accurate. Such items may have been detected if the DESE performed formal on-site monitoring procedures.

Formal on-site monitoring procedures are essential to provide the proper oversight needed for these programs.

- B. The DESE funds community colleges with several grants that are closely related to the Early Childhood Education and School Age Care programs. The DESE does not compare budget requests and final expenditure reports among the grants to ensure that items are not being requested or claimed twice.

Comparing budgets and final expenditure reports among similar grants such as Childcare Development Fund Grants, Extended Day Childcare Program Grants, and Discretionary Fund Grants would help ensure that all items appear reasonable and necessary.

**WE RECOMMEND** the DESE:

- A. Perform formal on-site monitoring procedures to review and evaluate the fiscal operations and the quality and effectiveness of services provided by the community colleges for the Early Childhood Education and School Age Care programs.
- B. Review budgets and final reports of grants with similar purposes to ensure items appear reasonable and necessary.

**AUDITEE'S RESPONSE**

*A&B. We concur.*

This report is intended for the information of the management of the Department of Higher Education, the Department of Elementary and Secondary Education, and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

## STATISTICAL SECTION

## History, Organization, and Statistical Information

STATE DISTRIBUTIONS  
TO COMMUNITY COLLEGES  
HISTORY, ORGANIZATION, AND STATISTICAL INFORMATION

Sections 178.770 and 178.370, RSMo 1994 provide for the establishment of community colleges through local referendum of registered voters in single or contiguous school districts. In addition, Section 178.790, RSMo Cumulative Supp. 1999, authorizes community colleges to annex additional public school districts to the existing community college taxing districts while ignoring the contiguous location factor.

Missouri's public community college districts are funded through a combination of local district taxes, tuition and fees, and state aid. Chapter 163.191(1), RSMo 1994 makes public community colleges eligible for state funding in an amount up to 50 percent of their planned operating expenditures. In Missouri, twelve community college districts support seventeen campuses. The Department of Higher Education (DHE) and the Department of Elementary and Secondary Education (DESE) are the main distributors of state monies to community colleges. Since 1974, the Coordinating Board for Higher Education (CBHE) gained responsibilities over functions relating to community college state aid and supervision, formation of districts and all matters otherwise relating to the state's relations with community college districts and matters pertaining to community colleges in public school districts.

The Department of Elementary and Secondary Education (DESE), under the direction of the state Board of Education, works with the local school officials and other groups to identify needs within the educational system and to improve education opportunities and programs for all citizens.

The CBHE provides funding through the following programs:

State Aid - State aid, which totaled approximately \$88.5 million and \$97.8 million in fiscal years 1999 and 1998, respectively, was allocated to community colleges based on a resource allocation model. The model comprises a core funding level for each community college initially established as an amount agreed upon by the community colleges and the DHE and adjusted annually for inflation, limited growth, and program improvements. This money is for general operating purposes.

Funding For Results - This program, which totaled approximately \$2.2 million and \$1.5 million in fiscal years 1999 and 1998, respectively, encourages and rewards positive educational outcomes in several areas: assessment of graduates, performance of graduates, degrees/certificates conferred, success of underrepresented groups, successful transfers to four-year institutions, and successful job placement. The state reimburses on a set per unit dollar amount for each outcome. Each college is reimbursed based on the number of units provided in each area. In addition, each college has an allocation in the core for improved teaching and/or learning projects.

Out-of-District Programs - These programs, which totaled approximately \$1.2 million and \$400,000 in fiscal years 1999 and 1998, respectively, are designed to expand geographic access

to community college education in the state. Approved projects are awarded funding based on appropriate expansion of higher education outside a college's taxing district.

Maintenance and Repair - This allows community colleges to extend the use of existing instructional or institutional support equipment and facilities or upgrade or replace them as needed. This funding totaled approximately \$5.3 million and \$2.6 million in fiscal years 1999 and 1998, respectively. The statute provides for state reimbursement for approved projects in the amount of 50 percent for a given project.

Workforce Preparation - This program, which totaled approximately \$18.9 million and \$1.9 million in fiscal years 1999 and 1998, respectively, is targeted at enhancing existing and new vocational technical programs on each community college campus.

Workforce Preparation -Temporary Assistance for Needy Families (TANF) - The TANF Utilization Plan was developed in collaboration with the Missouri community colleges, which provide TANF recipients access to basic skills development, general education, and vocational training at the campus level. Funding for this program totaled approximately \$1.9 million in both fiscal years 1999 and 1998.

State Plan for Postsecondary Technical Education - Chapter 178, RSMo directs the CBHE, in cooperation with the State Board of Education, to develop a master plan that coordinates area vocational technical schools, community colleges, and Linn State Technical College in providing advanced technical education and training for the state of Missouri. The fiscal year ending June 30, 1997 was the initial year to fund the State Plan for Postsecondary Technical Education and the CBHE board agreed to request technical education funds for the five fiscal years ending June 30, 2001. Funding for this program totaled approximately \$14.1 million and \$9.3 million in fiscal years 1999 and 1998, respectively.

Capital Improvements - This is for the design, renovation, construction, and improvement of vocational technical schools. Some of the projects require the schools to match 50 percent of the funds. Funding for this program totaled approximately \$945,000 and \$1.4 million in fiscal years 1999 and 1998, respectively.

Enhanced Technical Center at Mexico - This is for design, equipment, and construction of an Enhanced Technical Center at Mexico, Missouri for use of Linn State Technical College and Moberly Area Community College. These funds, which totaled approximately \$2.2 million for the two years ended June 30, 1999, are administered by the Office of Administration, Division of Design and Construction.

Public Safety - For the fiscal year ending June 30, 1998, the Metropolitan Community College received \$50,000 to help build a public safety training institute in greater Kansas City to serve western Missouri.

The DESE provides funding to community colleges through the following programs:

Vocational Education - Community colleges serve as one type of local education agency for Missouri's vocational education delivery system. The vocational education delivery system offers training programs in Agriculture, Business, Health Occupations, Family and Consumer Sciences, Industrial, and Marketing and Cooperative education. Funding for this program totaled approximately \$4.8 million and \$4.5 million for fiscal years 1999 and 1998, respectively.

Carl D. Perkins - The purpose of the federal Carl D. Perkins Vocational and Technology Education Act of 1990 is fourfold: 1) to build on the efforts of states and localities to develop challenging academic standards; 2) to promote the development of services and activities that integrate academic, vocational and technical instruction and that link secondary and postsecondary education; 3) to increase state and local flexibility to provide services and activities; and 4) to disseminate national research and to provide professional development and technical assistance that will improve vocational and technical education programs. Funding for these purposes exceeded \$5 million in both fiscal years 1999 and 1998.

Technical Preparation - This program prepares students for highly skilled technical careers that allow for entry into the work place as a qualified technician or continuation with further education leading to two year, four year, or advanced degrees or entry into a registered apprenticeship program. Funding for this program was approximately \$2 million in both fiscal years 1999 and 1998.

School-to-Work - Missouri's Community Careers System, the federally approved School-to-Work initiative, is a locally based education initiative bringing together educators and students, business and industry, and the community to help young people move smoothly from classrooms to careers. It is funded by money from the federal government, which is then contracted to regional and local partners through the state to help fund quality work based learning for students exploring their career paths. Funding for this program exceeded \$1.4 million for the two years ended June 30, 1999.

Sex Equity - The federal Carl D. Perkins Vocational and Technology Education Act of 1990 set aside in each state 10.5 percent of the basic state grant for vocational sex equity programs. The money, which exceeded \$1.8 million for the two years ended June 30, 1999, was divided into two areas: 1) Displaced Homemaker/Single Parent/Single Parent Women, and 2) Individuals (male and female) entering careers or occupations nontraditional to their gender, as well as girls and women ages 14 to 24. The funds are used at the local level to support members of these targeted groups by providing tuition, child care and transportation assistance, supplies, materials, and other supporting activities.

Adult Basic Education (ABE) - ABE is a program designed to educate persons sixteen years of age or older, out of school, and with less than a high school education to a level equal to high school graduation. Services are also provided for family literacy and English as a Second

Language. Funding for this program totaled approximately \$1.5 million for both fiscal years 1999 and 1998.

Futures - This is part of the state welfare reform program funded by the Department of Social Services, Division of Family Services (DFS). Funding which totaled more than \$300,000 for the two years ended June 30, 1999, comes from the Temporary Assistance for Needy Families Program. The DESE contracts with the DFS who reimburses the DESE for the participation of Futures participants in "regular" ABE programs and for Futures participants in specialized programs provided solely for Futures.

Customized Training - This program provides funding for manufacturing employers, and other related employer areas, to assist in training new employees and/or retraining existing employees. The DESE's program compliments and closely coordinates with the Missouri Job Development Fund operated by the Department of Economic Development (DED), Division of Job Development and Training (DJDT). The program provides a partnership between the State of Missouri (funding source), Local Educational Agencies (funding administrators and or trainers), employers (funds recipients), and employees (trainees). The funding, which totaled approximately \$3.9 million and \$3.3 million in fiscal years 1999 and 1998, respectively, provides training to upgrade skills of entry level, production level, and primary management level employees relative to meeting specific organizational goals.

Enhancement Grants - The Outstanding Schools Act includes provisions for grants to enhance vocational-technical education programs in public high schools, area vocational schools and community colleges. The Act also provides that these improvements should focus on vocational education programs related to occupational areas in high demand. Grant recipients are allowed to receive up to 75 percent state reimbursement on instructional equipment and 50 percent for curriculum, renovation and other allowable expenditures. Funding for this program totaled approximately \$3.5 million and \$4.1 in fiscal years 1999 and 1998, respectively.

Video Instructional Development and Educational Opportunity - This program, which totaled approximately \$227,000 for the two years ended June 30, 1999, encourages all educational institutions in Missouri to supplement educational opportunities through the use of telecommunications technology including instructional television programming and satellite broadcast instruction.

Early Childhood Education - This program totaled approximately \$52,000 for the two years ending June 30, 1999. These funds come from the federal government through the Missouri Department of Social Services to DESE. The goal of this program is to increase child care availability and quality in public schools in order to provide a safe environment that meets the individual, developmental needs of children.

School Age Care - This program, which totaled approximately \$73,000 for the two years ended June 30, 1999, assists community colleges in providing School Age Care (SAC) Programs on their

campuses. SAC Programs are provided for school aged children before/after school and/or other times when schools are not in session and SAC Programs are needed to care for school aged children. These SAC Programs can be administered separately or in conjunction with Early Childhood Education Programs which may also be provided on community college campuses.

Job Training Partnership Act (JTPA) - The JTPA is a federally funded job training program. The U.S. Department of Labor contracts JTPA funds to the State of Missouri to assist adults and youth who face serious barriers to employment with job training activities and services that result in employment, higher earnings and decreased welfare dependency. The DED, DJDT administers the funds in the state. The DED contracts funds to the DESE which have been specifically set aside in JTPA for the state education agency to establish school-to-work, literacy and lifelong learning, and non-traditional employment programs. Funding for these programs totaled approximately \$1.1 million and \$1.8 million for fiscal years 1999 and 1998, respectively.

Construction - This is for design, renovation, construction, and improvements of vocational technical schools. The schools are required to match these funds by 50 percent. Funding for this program totaled approximately \$1.5 million and \$2.3 million for fiscal years 1999 and 1998, respectively.

The DED, DJDT, also provides funding to community colleges through the following programs:

Missouri Job Development - This program, which totaled approximately \$7.7 million and \$11.6 million in fiscal years 1999 and 1998, respectively, authorizes the community colleges to provide contractual services for vocational related training or retraining as the result of making a capital investment in manufacturing. This program closely correlates with the Customized Training Program operated by the DESE.

The Department of Corrections, Division of Offender Rehabilitation Services, provides funding, which totaled more than \$1.1 million for the two years ended June 30, 1999, to one community college through the following programs:

Adult Basic Education/GED - The Northeast Correctional Center in Bowling Green, Missouri provides adult basic education and GED classes for 360 students weekly. On site GED testing is provided for offenders who successfully complete the program and score a minimum passing score on the official GED pretest.

Computers for Schools - In cooperation with DESE, this microcomputer repair training and refurbishing program at Northeast Correctional Center in Bowling Green, Missouri started training offenders in August 1998. The refurbished computer systems are provided to public schools across the state of Missouri. Currently, eighty offenders have completed their course of studies and five school districts have received computer systems.

A map of the Missouri community college districts follows.

REVIEW OF THE  
MISSOURI STATE TAX COMMISSION

**From The Office Of State Auditor  
Claire McCaskill**

Report No. 2000-09  
February 23, 2000

# AUDIT REPORT

Office Of The  
State Auditor Of Missouri  
Claire McCaskill

February 2000

**The following problems were discovered as a result of a review conducted by our office of the Missouri State Tax Commission.**

---

The Sales Tax Commission (STC) is required to certify the equivalent sales ratio of real property, for each county and the city of St. Louis, to the state Department of Elementary and Secondary Education (DESE) for use in determining distributions of school foundation formula funds. Although statistical consultants hired by the tax commission recommended the use of a weighted ratio in these calculations, the tax commission uses the median to determine the equivalent sales ratios.

The STC certified only three equivalent sales ratios as less than 33.3 (Carroll, Clay, and Newton). Our computations disclosed an additional forty-one counties would also have been certified as less than 33.3 if the weighted ratio had been used. The equivalent sales ratio used in the calculation of the distribution of school foundation formula funds is the higher of the most recent equivalent sales ratio or an average of the three highest of the last four years equivalent sales ratios. Because of this, while many school districts in the forty-four counties previously noted would not have received a lesser amount, the distribution of school foundation formula funds would be affected by using the weighted ratios in determining the equivalent sales ratios.

To determine the accuracy of assessed valuations in the counties, the STC performs ratio studies. The STC selects properties on the tax rolls of local jurisdictions and compares the assessed valuation of those properties to an appraised value determined by a STC appraiser. All ratio studies we reviewed contained numerous individual parcels that were assessed either higher or lower than the STC's established acceptable range, resulting in an excess or insufficient property tax liability for these parcels. As long as the study results in an acceptable median ratio, the STC does not consider these individual parcels to be a problem and does not investigate the reasons for the variance.

(over)

YELLOW SHEET

According to the Fifty-Third annual report issued by the tax commission, 1998 personal property assessed valuation was approximately \$14 billion. Of this amount, approximately \$7.4 billion of 1998 personal property assessed valuation pertained to vehicles. When assisting the assessing officers with the implementation of their assessment maintenance plans, the Technical Support Staff did not ensure that vehicles were being assessed in accordance with state law. State statutes provide that the assessor of each county, and each city not within a county, shall use the trade-in value published in the October issue of the National Automobile Dealers' Association (NADA) Official Used Car Guide, or its successor publication, as the recommended guide for determining the true value of motor vehicles.

Although the STC distributed a vehicle valuation guide in March 1999 which includes assessed valuations based upon the NADA guide trade-in values, the STC did not require the Assessors to use the guide.

## STATE AUDITOR'S REPORT

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

Honorable Mel Carnahan, Governor  
and  
State Tax Commission  
Jefferson City, Missouri 65101

We have conducted a review of the State Tax Commission. The objectives of this review were to:

1. Review and evaluate the procedures used in the supervision of statewide equalization of real and personal property assessments.
2. Review certain internal control procedures, compliance issues, and management practices to determine the propriety, efficiency and effectiveness of those procedures and practices.

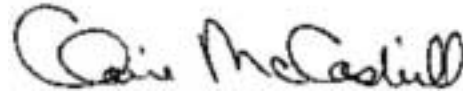

Our review was made in accordance with applicable generally accepted government auditing standards and included such procedures as we considered necessary in the circumstances. In this regard, we reviewed certain records and documents and interviewed agency personnel. Our review was generally limited to policies, practices, and transactions of the fiscal years ended June 30, 1999, 1998, and 1997.

As part of our review, we assessed the agency's management controls to the extent we determined necessary to evaluate the specific matters described above and not to provide assurance on those controls. With respect to management controls, we obtained an understanding of the design of relevant policies and procedures and whether they have been placed in operation and we assessed control risk.

Our review was limited to the specific matters described above and was based on selective tests and procedures considered appropriate in the circumstances. Had we performed additional procedures, other information might have come to our attention that would have been included in this report.

The accompanying History, Organization, and Statistical Information and Appendices are presented for informational purposes. This information was obtained from the Commission's management and was not subjected to the procedures applied in the review of the State Tax Commission.

The accompanying Management Advisory Report presents our findings and recommendations arising from our review of the State Tax Commission.

A handwritten signature in dark ink, appearing to read "Claire McCaskill". The signature is fluid and cursive, with the first name "Claire" written in a larger, more prominent script than the last name "McCaskill".

Management Advisory Report -  
State Auditor's Current Recommendations

## REVIEW OF THE MISSOURI STATE TAX COMMISSION SUMMARY OF FINDINGS

### 1. Ratio Studies (pages 7-11)

The STC is required to certify the equivalent sales ratio of real property, for each county and the city of St. Louis, to the state Department of Elementary and Secondary Education (DESE) for use in determining distributions of school foundation formula funds. Although statistical consultants hired by the STC recommended the use of a weighted ratio in these calculations, the STC uses the median to determine the equivalent sales ratios. The STC certified only three equivalent sales ratios to DESE as less than 33.3. If the weighted ratio had been used to determine the equivalent sales ratio an additional forty-one counties would have been certified as less than 33.3. All ratio studies we reviewed included numerous individual parcels that were assessed higher or lower than the statutory level of assessment which would result in an excess or insufficient tax liability.

### 2. Personal Property Tax Assessments (pages 11-12)

The STC has not ensured vehicles were properly assessed in accordance with state law.

SPECIAL REVIEW OF THE MISSOURI STATE TAX COMMISSION  
MANAGEMENT ADVISORY REPORT-  
STATE AUDITOR'S CURRENT RECOMMENDATIONS

1.

**Ratio Studies**

The Mission Statement of the State Tax Commission (STC) states: "The State Tax Commission shall uphold the constitution and statutes of the State of Missouri .... and eradicate the injustices and inequities in assessments for property tax purposes. As addressed in the STC's Fiscal Year 1999 Strategic Plan, one goal is to bring real property assessment levels, in all 115 jurisdictions in the state, to within 5% of the statutorily mandated level of assessment. To determine the accuracy of assessed valuations, the STC's Ratio Studies Section selects properties on the tax rolls of local jurisdictions and compares the assessed valuation of those properties to an appraised value determined by a STC appraiser. According to the Fifty-Third annual report issued by the STC, 1998 total assessed valuation of real property was approximately \$39 billion. Our review of the Ratio Studies Section procedures revealed the following:

- A. According to Chapter 138, RSMo Cumm. Supp. 1999, the STC is required to certify the equivalent sales ratio of real property for each county and the city of St. Louis. These certifications are made to the state Department of Elementary and Secondary Education (DESE) for use in determining distributions of school foundation formula funds. All ratios higher than thirty-one and two-thirds percent are to be certified as thirty-three and one-third percent.

Statistical consultants hired by the STC in 1977 and 1986 both recommended the STC use a **weighted ratio** for reporting a value to DESE. The 1986 consultant also reported "the **mean** or **median** of the individual sample estimates would be inappropriate to use" for reporting a value to DESE.

**Weighted ratios** consider the dollar value of each sample item while median ratios treat each sample item as though it had the same dollar value as all other sample items. Therefore, **median ratios** do not compare the total assessed value in a county to the total market value in a county. However, the STC has chosen to use the **median ratio** instead of the **weighted ratio** for certifying equivalent sales ratios to DESE.

Based on data from the most recent STC sales ratio studies, we recomputed the equivalent sales ratios using **weighted ratios** (as recommended by the consultant). Our computations disclosed the following counties have an equivalent sales ratio that is less than the legally mandated ratio.

| <u>County</u>  | <u>1998 Equivalent Sales Ratio</u> |                                    |
|----------------|------------------------------------|------------------------------------|
|                | <u>Certified<br/>By the STC</u>    | <u>Based on<br/>Weighted Ratio</u> |
| Carroll        | 30.3                               | 28.5                               |
| Clay           | 31.3                               | 31.6                               |

| Washington     | 33.3                               | 28.9                               |
| Wayne          | 33.3                               | 30.5                               |
| Wright         | 33.3                               | 31.2                               |

The STC certified only three equivalent sales ratios as less than 33.3 (Carroll, Clay, and Newton). As reflected above, an additional forty-one counties would also have been certified as less than 33.3 if the weighted ratio had been used. The equivalent sales ratio used in the calculation of the distribution of school foundation formula funds is the higher of the most recent equivalent sales ratio or an average of the three highest of the last four years equivalent sales ratios. Because of this, while many school districts in the forty-four counties previously noted would not have received a lesser amount, the distribution of school foundation formula funds would be affected by using the weighted ratios in determining the equivalent sales ratios.

- B. The statistical reports list each parcel included in the ratio study along with the ratio of assessed valuation determined by the local jurisdiction's assessing officer compared to the appraised market value determined by the STC's appraiser. All twenty-three ratio studies we reviewed contain numerous individual parcels that are assessed either higher or lower than the STC's established acceptable assessment level range. As long as the report indicates an acceptable median ratio, STC personnel indicated these individual parcels are not considered to be a problem and the reasons for the variances are not investigated. Examples of reports reviewed are as follows:

- 1) We observed one ratio study on residential properties where 29 out of the 35 parcels tested (83%), were not assessed within the established acceptable range of assessment of 18.05% to 19.95%. These parcels represented 79% of the total assessed valuation tested.

For one parcel included in the ratio study, the STC calculated an assessed valuation of \$4,279 less than the County Assessor's, representing an excess property tax liability of approximately 48%. Another parcel was assessed by the STC at \$5,399 more than the County Assessor's, representing an insufficient property tax liability of approximately 38.3%.

- 2) We observed one ratio study on commercial properties where 32 out of the 45 parcels tested (71%), were not assessed within the established acceptable range of assessment level of 30.40% to 33.60%. These parcels represented 69% of the total assessed valuation tested.

For one parcel included in the ratio study, the STC calculated an assessed valuation of \$28,300 less than the County Assessor's, representing an excess property tax liability of approximately 73.7%. Another parcel was assessed by the STC at \$37,000 more than the County Assessor's, representing an insufficient property tax liability of approximately 57.8%.

- 3) We observed one ratio study on agricultural properties where 30 out of the 40 items tested (75%), were not assessed within the established acceptable range of

assessment level of 11.40% to 12.60%. These parcels represented 64% of the total assessed valuation tested.

For one parcel included in the ratio study, the STC calculated an assessed valuation of \$3,053 less than the County Assessor's, representing an excess property tax liability of approximately 214%.

By not determining and correcting the cause of the parcels that are not assessed within the established acceptable range, the STC is not achieving its strategic goal, and the valuation of real property throughout the state does not appear to be equalized. Failure to ensure equalized property values results in some taxpayers paying excess taxes while others are paying insufficient taxes.

**WE RECOMMEND** the State Tax Commission:

- A. Use weighted ratios in calculating equivalent sales ratios.
- B. Determine the reason that numerous individual parcels fall outside the acceptable range and assist the assessors in correcting assessment methods in order to bring the assessed valuation of real properties within the STC's established acceptable ranges.

**AUDITEE'S RESPONSE**

- A. *The State Tax Commission acknowledges that Dr. Madsen's report dated January 15, 1986, recommends the use of the weighted ratio in reporting the ratio to the Department of Elementary and Secondary Education (DESE) for use in the School Foundation Formula. The Commission has found that the weighted mean is an invaluable statistic in measuring the uniformity between high and low valued parcels. However, the Commission and other statistical experts have concerns about the use of the weighted ratio for indirect equalization.*

*The major disadvantage in using this measure is its susceptibility to sampling error. This is especially true when high valued properties are appraised at a level different from other properties in the study. In instances where a high valued property is valued significantly different, a substantially larger sample size is indicated in order to achieve an accepted level of precision. The "Standard on Ratio Studies" provided by the International Association of Assessing officers cautions that, when relying on the weighted ratio, outliers should be carefully reviewed since they can strongly affect the weighted ratio, particularly when the outliers are associated with high value properties.*

*The weighted ratio can also mask problems in the appraisal of low valued properties, which have a minimal effect on this statistic. The impact on the weighted ratio is proportional to the dollar value of the properties. The Commission calculates three measures of central*

*tendency. They include the mean, median, and weighted ratios. Of these measures, the median is the only one not prejudiced by extreme ratios or property values.*

*Dr. Madsen, in a supplement report dated January 28, 1986, expressed concern on what effect any errors in the estimated value weighted mean ratio had on the allocation of school funding. He asked DESE to run simulations using various value weighted ratio estimates in order to analyze the effect that any errors in the weighted ratio might have on the amount of dollars distributed. Dr. Madsen concluded that the school formula was relatively insensitive to the ratio used. Subsequent to Dr. Madsen's study, the school foundation formula has been the subject of litigation and has been dramatically altered by State Statutes. Unlike its predecessor, the school foundation formula which exists today is extremely sensitive to the ratio certified to DESE and can result in significant shifts of school funding.*

*The State Tax Commission respectfully recommends that the Commission contract with an outside consultant to determine the appropriate ratio to be utilized in certifying the "Equivalent Sales Ratio" to the DESE.*

- B. The State Tax Commission concurs with the State Auditor's recommendation that the Commission should enhance its communication to the assessors in analyzing the results of statistical ratio studies and to provide better documentation reflecting that communication. The State Tax Commission has never established an "acceptable" range around the median for assessment purposes. The strategic plan of the State Tax Commission is to bring the assessment level of all assessing jurisdictions to within five percent of the equivalent sales ratio as outlined in Section 138.395, RSMo Supp. 1999. The Commission, through the collective effort of the Ratio and Technical Assistance Sections, will establish meetings with assessors to analyze the results of the ratio study which reflect the assessment practices and trends in a particular county. The Technical Assistance Section will be required to document such meetings and to place that information in each county's file.*

**2.**

## **Personal Property Tax Assessments**

As a means of eradicating injustices and inequities, the State Tax Commission's fiscal year 1999 Strategic Plan addresses ensuring the equitable and uniform assessments of tangible personal property.

According to the Fifty-Third annual report issued by the STC, 1998 personal property assessed valuation was approximately \$14 billion. Of this amount, approximately \$7.4 billion of 1998 personal property assessed valuation pertained to vehicles. When assisting the assessing officers with the implementation of their assessment maintenance plans, the Technical Support Staff did not ensure that vehicles were being assessed in accordance with Section 137.115.9, RSMo 1994. This section provides that the assessor of each county, and each city not within a county, shall use

the trade-in value published in the October issue of the National Automobile Dealers' Association (NADA) Official Used Car Guide, or its successor publication, as the recommended guide for determining the true value of motor vehicles. Pursuant to Section 138.410, RSMo 1994, the commission shall exercise general supervision over all the assessing officers of the state. Failure to ensure the assessment maintenance plans are being implemented in accordance with state law, could result in unequalized assessment of motor vehicles.

STC personnel indicated that for the 1998 tax year, five different guides were being used by the assessing officers to determine the true value of motor vehicles. Four of the five guides being used were developed using the NADA Official Used Car Guide, while the fifth guide being used was the actual NADA guide itself. A guide developed by the St. Louis County Assessor's Office contained 1995 - 1996 values, that were obtained from a former January publication of the NADA guide. Because the guide contained 1995 - 1996 values, the assessing officers were required to make adjustments, utilizing their judgement. Another guide, developed by the Arkansas Department of Revenue, contained assessed valuations using a twenty percent assessment rate, as opposed to the State of Missouri's rate of thirty three and one-third percent. The use of this guide required the assessing officer to adjust the assessed valuations to reflect the correct tax rate. The guides developed by St. Charles County and Jackson County Assessor's offices did not require any adjustments.

In addition, STC personnel indicated the trade-in value published in the NADA Official Used Car Guide was not always used to determine the true value of the vehicle. In one county the retail value was used while in another county the assessor determined his own values, which were much lower than those published in the NADA guide.

Although the STC distributed a vehicle valuation guide in March 1999, which includes assessed valuations computed based upon the NADA guide trade-in values, STC personnel indicated assessing officers were not required to use the guide for 1999 assessments.

By establishing written policies and procedures, that address the equalization of tangible personal property, and monitoring the implementation of such procedures the STC will ensure progress is made to eradicate the injustices and inequities in the assessment of vehicles.

**WE RECOMMEND** the State Tax Commission require all assessing officers to follow the vehicle valuation guide developed by the STC.

### **AUDITEE'S RESPONSE**

*The State Tax Commission concurs with the State Auditor's Office that uniformity in the valuation of vehicles is critical. The Commission has established a Property Valuation Guide which has been*

*distributed to all counties and the City of St. Louis for utilization in tax year 2000. Throughout the year 2000, State Tax Commission personnel will randomly sample valuations of motor vehicles to ensure compliance with statutory and constitutional provisions.*

This report is intended for the information of the management of the State Tax Commission and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

## STATISTICAL SECTION

History, Organization, and  
Statistical Information

## STATE TAX COMMISSION HISTORY, ORGANIZATION, AND STATISTICAL INFORMATION

### *A. History of the State Tax Commission.*

The State Tax Commission of Missouri in its current form was created by the Missouri Constitution of 1945. Article X, Section 14 of that constitution requires the General Assembly to create a tax commission for the purpose of performing three (3) functions:

- (1) Equalization of assessments as between counties;
- (2) To hear appeals from local boards of equalization in individual ~~assessment~~ cases; and
- (3) To perform such other duties as may be prescribed by law.

Prior to 1945 and the adoption of the most recent Constitution of Missouri, the function of the Commission was essentially divided between two bodies: the State Tax Commission, which was created in 1917, and essentially had authority over individual appeals in assessment cases, and supervisory authority over assessing officials, and the State Board of Equalization which performed the function of equalization of value among counties. The 1945 Constitution merged these bodies into one, creating the current constitutional and statutory entity now called the State Tax Commission of Missouri.

### *B. Nature and Organization of the State Tax Commission.*

Pursuant to Section 138.190, RSMo 1994, the State Tax Commission is constituted of three members, chosen from the two major political parties, appointed by the Governor with the advice and consent of the Senate. The Commissioners hold staggered terms of six years. Pursuant to Section 138.240, RSMo 1994, a majority of the commissioners must concur before the Commission can make a decision on any matter before it. The members of the Commission between July 1, 1996 and June 30, 1999 were:

| <u>Member</u>      | <u>City</u>         | <u>Term Expires</u> |
|--------------------|---------------------|---------------------|
| Van E. Donley      | Boonville, Missouri | January 23, 2000    |
| Bruce E. Davis     | Columbia, Missouri  | January 23, 1998*   |
| Douglas W. Burnett | Hartsburg, Missouri | January 23, 2002    |

- \* Although Commissioner Davis' term has expired, he continues to serve on the Commission until a successor is appointed by the Governor.

The staff of the Commission is divided into five sections:

- (1) Administration;
- (2) Legal;

- (3) Ratio Study;
- (4) Original Assessment; and
- (5) Technical Assistance.

*C. Functions of the State Tax Commission*

- (1) Supervision of Assessment Practices and Equalization.
- (2) Assessment Appeals in Individual Cases
- (3) Original Assessment
- (4) Ratio Study
- (5) Inter-County Equalization
- (6) Miscellaneous Functions

LAND TRUST OF  
JACKSON COUNTY, MISSOURI

**From The Office Of State Auditor  
Claire McCaskill**

Report No. 2000-08  
February 21, 2000

AUDIT REPORT

Office Of The  
State Auditor Of Missouri  
Claire McCaskill

February 2000

**The following problems were discovered during an audit of the Land Trust of Jackson County, Missouri conducted jointly by this office and the Kansas City, Missouri, City Auditor's Office.**

---

Although state law requires Land Trust to turn over the net sale proceeds from land sales to the taxing authorities, no such distributions have been made since 1994. Since that time, Land Trust has retained the proceeds from all property sales and used those monies to pay all operating expenses and accumulate a surplus in excess of \$500,000.

Several questionable sales transactions were noted which may warrant further review. These include two property sales made to the spouse of a Land Trust employee. One of these involved the May 1998 sale of an improved property (a property which includes a house or commercial building) for \$6,200. No documentation could be located to indicate that any monies were ever received or deposited related to this sale. In addition, it does not appear this sale went through Land Trust's review and approval process.

The other property was sold in July 1997 to the Land Trust employee's spouse for \$2,000; however, it appears only \$1,300 was received and deposited, with \$700 unaccounted for or outstanding. This property was subsequently condemned by the City of Kansas City for public use and the applicable Land Trust employee and spouse were awarded an \$11,000 settlement for this property.

Various other problems were noted regarding Land Trust's management and sale of property.

- Appraisals were not made when properties were added to inventory as required by state law.
- Letters of consent were not obtained from at least two of the three appointing authorities (City of Kansas City, Jackson County, and Kansas City School District) when an offer was accepted for less than two-thirds of a property's value.
- Many of the property sales files did not contain adequate documentation to support property valuations and offers. One of these files included the 1996 sale of the Vista Del Rio building for \$400,000. There was no documentation supporting the valuation of that property. Also, there was no documentation available concerning the sale of the Uptown Theater to a former trustee in 1993.

(over)

YELLOW SHEET

- The highest offer was not always accepted.
- Improved properties were not advertised in 1997. In addition, Land Trust does not advertise in a newspaper with a wide circulation.
- Land Trust does not have written policies or procedures regarding properties sold on an installment basis or properties held off the available sales list at the request of the City of Kansas City.

Various concerns were noted regarding expenditures incurred by Land Trust.

- In 1998, extra salary payments totaling \$10,025 were made to three Land Trust employees. There was no documentation supporting the reasons for the extra payments or indicating that they had been approved by the board. In addition, annual bonuses totaling \$32,000 were paid to employees between January 1997 and December 1998. Neither the extra salary payments nor the bonuses were reported on the employees' W-2 forms.
- From 1995 through August 1999, Land Trust expended over \$650,000 for contracted mowing services. Land Trust has not formally solicited bids or other proposals for these services. It was noted that the highest paid mowing contractor was the spouse of a Land Trust employee, receiving approximately \$50,000 in 1998 and \$42,400 during the first eight months of 1999.
- Competitive bids were not solicited for any other items and services purchased by Land Trust, including various pieces of office furniture and equipment.
- Land Trust has not solicited proposals for its banking services as required by law. In 1997, Land Trust moved its accounts to a bank where a trustee serves on the board of directors. At a minimum, this situation gives the appearance of a conflict of interest.
- The Land Commissioner is paid a \$500 monthly auto allowance without being required to provide any documentation to support these payments.
- Actual expenditures exceeded the budgets by significant amounts during the past several years.

A review of Land Trust accounting controls and procedures disclosed various record keeping and procedural weaknesses including a lack of segregation of duties, untimely deposits, inadequate records of monies collected, and checks being signed in advance of preparation, among others.

Other findings included:

- The lack of any written policies and procedures.
- Concerns regarding the bonding of the trustees and the Land Commissioner.
- Lack of proper documentation and disclosure regarding offers considered and approved, and not being fully compliant with the Open Meetings Law.

## AUDITORS' REPORT

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

The Board of Trustees of the  
Land Trust of Jackson County, Missouri  
Kansas City, Missouri 64110

The State Auditor's Office and the Kansas City, Missouri, City Auditor's Office have conducted a joint audit of the Land Trust of Jackson County, Missouri. The objectives of this audit were to review:

1. The management and sale of properties.
2. The handling of revenues generated by land sales.
3. Expenditures incurred to administer and manage properties.
4. Compliance with applicable laws and regulations.

This audit was conducted in accordance with generally accepted government auditing standards, with the exception of the completion of an external quality control review of the City Auditor's Office within the last three years.<sup>1</sup> The board had engaged William Michael Altman, Certified Public Accountant (CPA), to perform financial audits of Land Trust for the years ended December 31, 1997 and 1996. To minimize any duplication of effort, we reviewed the reports and substantiating workpapers of this CPA. We also examined selected Land Trust records, made inquiries of Land Trust officials, and examined other documents. The 1983 county audit of Land Trust was considered during the planning and performance of this audit. Our audit included, but was not necessarily limited to, the activity, records, and practices of Land Trust during the period from January 1, 1997 to August 31, 1999.

Our audit was limited to the specific matters described above and was based on selective tests and procedures considered appropriate in the circumstances. Had we performed additional procedures, other information might have come to our attention that would have been included in this report.

---

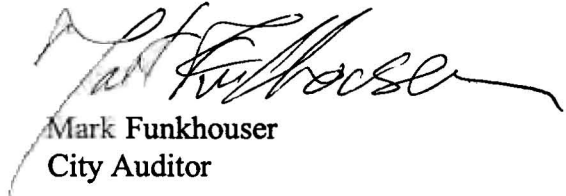

<sup>1</sup> The last review was performed in April 1995. A peer review is planned for the current year.

The accompanying History, Organization, and Statistical Information is presented for informational purposes. This information was obtained from Land Trust's management and other sources and was not subjected to the procedures applied in the audit of Land Trust.

The accompanying Management Advisory Report presents our findings and recommendations arising from our audit of the Land Trust of Jackson County, Missouri.

Claire McCaskill  
State Auditor

Mark Funkhouser  
City Auditor

October 8, 1999 (fieldwork completion date)

The following auditors participated in the preparation of this report:

State Auditor's Staff

Director of Audits: Kenneth W. Kuster, CPA  
Audit Manager: Gregory A. Slinkard, CPA, CIA  
Audit Staff: Nicole Brackman

City Auditor's Staff

Audit Supervisor: Nancy N. Hunt  
Senior Auditor: Douglas Jones

## MANAGEMENT ADVISORY REPORT SECTION

LAND TRUST OF  
JACKSON COUNTY, MISSOURI  
SUMMARY OF FINDINGS

1. Sale Proceeds and Funding Land Trust Operations (pages 7-10)

Although Land Trust is responsible for turning over the net sale proceeds from land sales to the taxing authorities, no distributions have been made since 1994. Land Trust has retained and used the sales proceeds to pay all operating expenses and to accumulate a surplus. State law requires Land Trust to requisition or request its funding for administrative expenses from the county and the municipalities.

2. Managing Land Trust Properties (pages 10-16)

Appraisals are not performed when properties are added to inventory. Letters of consent were not obtained from at least two of the three appointing authorities when an offer was accepted for less than two-thirds of the property's value. Properties are not classified in accordance with state law. Many of the property sales files did not contain adequate documentation to support property valuations and offers. In one instance, involving the sale of a property for \$400,000, there was no documentation supporting the valuation of that property. In addition, that property was not advertised among those available for sale. The highest offer was not always accepted. Deposits are not always collected with each offer as required, and checks related to deposits were sometimes returned instead of being deposited. Expenses for each property are not recorded in Land Trust's database. Installment sales are not handled in a consistent manner or in accordance with state law. The improved property list for 1997 was not advertised, and other instances were noted where individual properties were not listed in the property advertisements.

3. Questionable Property Sale Transactions (pages 16-19)

In two instances where properties were sold to the spouse of an employee, it appears all monies due were not received or deposited. The monies unaccounted for related to these sales totaled \$6,900. In addition, three other sales were noted for which all monies could not be accounted for properly. In August 1993, a former trustee resigned and subsequently purchased a property from Land Trust. Because the file related to that sale could not be located, we could not evaluate the propriety of the sale.

4. Expenditures (pages 19-24)

In 1998, extra salary payments totaling \$10,025 were made to three Land Trust employees. Annual bonuses totaling \$32,000 were paid to employees in the past three years. These payments along with the Land Commissioner's auto allowance were not reported on the employees' W-2 forms. Bids were not solicited for mowing services and other significant

expenditures. Proposals for banking services have not been formally solicited, and a trustee is on the board of directors of Land Trust's current depository bank. The Land Commissioner is paid a monthly auto allowance and he is not required to prepare reports documenting the mileage driven on Land Trust business. Actual expenditures exceeded budgeted amounts.

5. Accounting Controls and Procedures (pages 24-26)

Land Trust's accounting and other record keeping duties are not segregated. Deposits are not made on a timely basis. No receipts ledger is maintained and receipts slips are not issued. Checks and money orders are not restrictively endorsed immediately upon receipt. Land Trust checks are signed in advance of their preparation. A monthly listing of deposits being held on pending offers (open items) is not prepared and reconciled to the escrow account balance.

6. Other Compliance Issues (pages 26-27)

The term of the City of Kansas City's appointee expired in January 1998 and no efforts have been made to officially fill this position on the board. The Land Commissioner was not bonded as required. The trustees' surety bonds are not on file with the County Clerk's office and are not paid out of county funds as required. In addition, these bonds were purchased from a company owned by one of the trustees and a competitive bidding process was not used to obtain surety bond coverage.

7. Annual Financial Audits (page 28)

Proposals for audit services have not be requested since 1990. Recent audits have not been completed on a timely basis.

8. Documentation and Reporting of Board Proceedings (pages 28-30)

The board minutes did not always include a listing of the offers that were accepted and rejected, and the trustees' review and approval of expenditures is not documented in the minutes. Offers considered and approved sales are not posted or publicly disclosed. Proper notice is not always given for board meetings. The votes and reasons for closing a meeting are not documented and closed meeting minutes are not maintained.

9. Lack of Formal Policies and Procedures (page 30)

Land Trust has no written policies or procedures.

LAND TRUST OF  
JACKSON COUNTY, MISSOURI  
MANAGEMENT ADVISORY REPORT

|           |  |
|-----------|--|
| <b>1.</b> | <b>Sale Proceeds and Funding Land Trust Operations</b> |
|-----------|--|

Pursuant to Section 141.790, RSMo 1994, Land Trust is responsible for turning over the net sale proceeds from land sales to the taxing authorities in the county. This statute requires proceeds from sales to be applied first to sales expenses, then to any penalties, attorney's fees or costs, then to care and management of the property, with the balance paid to the respective taxing authorities. In 1994, Land Trust disbursed \$44,150 to the taxing authorities and has made no subsequent distributions. According to the notes to the financial statements in Land Trust's 1995, 1996, and 1997 audit reports, the trustees decided that any proceeds over and above actual expenditures would be retained and appropriated in future years to pay increasing weed cutting costs.

Between January 1, 1994 and August 31, 1999, Land Trust sold 1,431 properties with sales proceeds totaling approximately \$2 million. During the same period, Land Trust expenditures totaled approximately \$1,690,000 (not including the distributions to the taxing authorities in 1994), representing approximately \$690,000 in property maintenance expenditures and approximately \$1 million in salary and other administrative expenditures. As of August 31, 1999, Land Trust had an accumulated surplus of over \$500,000.

Although Land Trust has used the retained sales proceeds to pay all Land Trust expenses and accumulate a surplus, this is not in accordance with state law. Section 141.770, RSMo 1994, provides that salaries and other administrative expenses of Land Trust are to be advanced and paid to Land Trust upon requisition, 50 percent by the county and the remaining 50 percent by all municipalities in the county in proportion to their assessed values. The requisition shall not exceed a total of \$25,000 each year. Any amount beyond this may be requested, but must be agreed to by the county and municipal legislative bodies. According to the Land Commissioner, Land Trust has not requested any funding from the political subdivisions since the 1980's.

Land Trust should take steps to distribute net sales proceeds and request funds to pay its administrative costs in accordance with the applicable laws. In addition, considering total annual expenses averaged less than \$400,000 during 1998 and 1997, it appears the current surplus is excessive and would cover Land Trust expenses for over one year without any additional sales revenues being received.

**WE RECOMMEND** the Board of Trustees distribute net sale proceeds to the various taxing authorities in accordance with state law. Administrative funds should be requested as provided

by law.

### **AUDITEE'S RESPONSE**

*Until 1995, city administrations accepted responsibility and allocated funding for mowing the public properties held in the Land Trust inventory. This was done in accordance with public health code and ordinance standards, circuit and appeals court decisions, and an agreement signed by city and Land Trust officials. In 1989 and 1992, the City Auditor's office reported to the Mayor and City Council that the city was in violation of its own ordinances by failing to effectively cut weeds on public property, both city owned and in the Land Trust inventory. These reports recommended that the city administration formulate a system and find "an acceptable level of General Fund support" to ensure that Land Trust properties are in compliance with the Weeds and Noxious Plants ordinance. The City Manager's office and the Neighborhood and Community Services Department agreed with these proposals and agreed to prepare policy alternatives for consideration by the City Council.*

*In mid-summer 1995, under increasing budgetary constraints, the City Council informed Land Trust that city resources would not be allocated to carry out these delineated responsibilities and recommendations for mowing Land Trust lots. The vast majority of Land Trust properties conveyed by the circuit court have been abandoned, vacant, weeded lots for years prior to foreclosure. These properties, concentrated in the older, deteriorating neighborhoods of the central city, are the properties that the city decided that it would no longer mow. These are the properties that Land Trust has the responsibility to market.*

*The comprehensive intent and purpose of the Land Tax Collection Law states that Land Trust's primary responsibility is the sale of tax delinquent properties. An effective marketing strategy requires that the lots are mowed prior to sale. The sale of property in violation of code standards is virtually impossible. Potential buyers are reluctant to purchase overgrown lots, often filled with trash and debris.*

*The city's inability to provide funding for the mowing of the public properties held in Land Trust confronted the Board of Trustees with a choice:*

- 1. Continue distributing net sale proceeds to the taxing authorities. This would have resulted in most of the Land Trust lots being in violation of the Weed and Noxious Plants ordinance, in the further deterioration of the neighborhoods, and a steady decline in property values in these areas, as well as an inability on the part of Land Trust to carry out its legislated responsibilities to sell properties.*
- 2. Find an alternative system that would permit Land Trust to fulfill its legislated responsibility and continue to market the lots and return them to the tax rolls.*

*The Board of Trustees felt it necessary that the properties continue to be mowed in order to*

*effectively market them and to minimize ordinance violations in the central city. Land Trust hired contractors and began to budget for this unexpected and large expense. The new costs of weed cutting, as well as salaries and other administrative expenses, were considered expenses of sale required for the marketing of the properties.*

*In regard to Section 141.770, it is Land Trust's position that it is acting in accordance with state law. The audit report cites only paragraph 3 of this section to substantiate the statement that Land Trust is holding an excessive surplus of about \$500,000 in violation of state law. This section must be interpreted in its entirety and in conjunction with Section 141.790, which also deals with the operating expenses of Land Trust. Section 141.770, paragraph 1, states:*

*"Each annual budget of the land trust shall be itemized as to objects and purposes of expenditure, prepared not later than December fifteenth of each year, and shall include therein only such appropriations as shall be deemed necessary to meet the reasonable expenses of the land trust during the forthcoming fiscal year. Any unexpended funds from the preceding fiscal year shall be deducted from the amounts needed to meet the budget requirements of the forthcoming year."*

*Section 141.790, paragraph 2, states in relevant part:*

*"When any parcel of real estate is sold or otherwise disposed of by the land trust, the proceeds therefrom shall be applied and distributed in the following order:*

*(1) To the payment of expenses of sale;. . ."*

*The expenses of sale are those costs required for the marketing of property.*

*The Land Trust budget for 2000 projects expenditures of about \$410,000. Based on average yearly sales, the board projects a deficit of \$104,000. Therefore according to law, Land Trust has the authority to retain \$514,000 to meet its reasonable expenses for the year 2000.*

*During the period subject to audit, Land Trust, which receives no tax revenue, has been self-sufficient and has not found it necessary to requisition \$25,000 or any additional funds from Jackson County and the City of Kansas City to meet its salary, administrative, and mowing expenses which amount to about \$500,000 per year.*

*This large surplus was unexpected and resulted from the sale of 3 unusual properties including the Vista Del Rio for \$400,000 (sale total, \$510,000). Such sales are unprecedented and unlikely to occur in the future.*

*Therefore, it is Land Trust's position that the current surplus is not excessive, that it must be used to cover expenses for 2000, and that Land Trust has been and is acting in accordance with the full intent and scope of the Land Tax Collection Law.*

## **AUDITORS' COMMENT**

We do not agree that the mowing responsibilities turned over to Land Trust in 1995 has prevented it from distributing any sales proceeds to the various taxing authorities since that time, and this decision by the Land Trust Board was clearly not in accordance with state statutes. We also disagree with Land Trust's interpretation of the statutes cited in this finding. In their response, Land Trust asserts that retaining a surplus of \$514,000 for calendar year 2000 is justified based on projected expenditures of \$410,000 and a \$104,000 deficit. This analysis and conclusion is flawed because projected revenues for the current year are not considered in this analysis. A more accurate estimate of a surplus that Land Trust could justify based on the law, is the amount of the projected deficit (\$104,000) for calendar year 2000.

The response further states that Land Trust has been self-sufficient and has not found it necessary to requisition any funds from Jackson County or the City of Kansas City. This comment is contrary to state law. The statutes do not authorize Land Trust to retain all sales proceeds and be self-sufficient, and it ignores the provisions of Section 141.770.3, RSMo, which requires that monies needed to pay salaries and other administrative expenses be requisitioned or requested from the county and municipalities in the county.

### **2. Managing Land Trust Properties**

During a review of the Land Trust's management and sale of properties, we noted the following concerns:

- A. Appraisals are not performed when properties are added to inventory as required by state law. The Land Commissioner indicated that he does not prepare a property valuation worksheet until after an offer has been made on a property. We reviewed 72 sales files and found that valuation worksheets were completed by the Land Commissioner an average of seven days after offers were made.

Section 141.760, RSMo 1994, requires Land Trust to immediately assume possession and control of all properties it acquires, direct the land commissioner to inventory and appraise the properties, and thereafter maintain a perpetual inventory of those properties.

Without appraisals prepared as properties are added to inventory and periodically updated, Land Trust does not have a value for all the properties it is responsible for managing and is unable to track the change in value between the time a property is received and when it is ultimately sold. In addition, conducting appraisals after receiving an offer could affect the value placed on property by Land Trust, providing an environment where unfair treatment or other improprieties could occur.

- B. Land Trust did not obtain letters of consent from at least two of the three appointing authorities (Jackson County, City of Kansas City, and Kansas City School Board) when an offer was accepted for less than two-thirds of the value noted on the valuation worksheet. We noted that 7 of 72 sales reviewed were sold for less than the two-thirds valuation determined by Land Trust. Two properties were each sold for approximately \$6,500 less than the two-thirds valuation and the other five were sold below the two-thirds valuation by amounts of less than \$100.

Section 141.750.2, RSMo 1994, states:

"... if such selling price represents a consideration less than two-thirds of the appraised value of said real estate, then the land trustees shall first procure the consent thereto of not less than two of the three appointing authorities, which consent shall be evidenced by a copy of the action of each such appointing authority duly certified to by its clerk or secretary attached to and made a part of said deed." (emphasis added)

Land Trust officials have taken a position that since the trustees are appointed and represent the three appointing bodies, no further written consents are required. However, this interpretation is in direct conflict with the statutes.

- C. Land Trust does not classify properties in accordance with state law. Properties in Land Trust's inventory records are only classified as improved properties (properties which include a house or commercial building) or vacant lots. Section 141.760, RSMo 1994, requires Land Trust to classify property as (a) suitable for private use, (b) suitable for public use, or (c) not useable in present condition and held as public land reserve. In addition, that law requires Land Trust to make every effort to return land classified as "private use" to private ownership as soon as possible; to offer "public use" land to any public body subject to the discretion of the trustees; and to study or make recommendations to taxing authorities about possible use of land classified as "not useable".

Classifying all properties as "available" does not allow Land Trust to focus its efforts on managing, selling or otherwise disposing of property based on the condition or best potential use of the property.

- D. Land Trust has not established effective procedures over the property sale process. Our review of 72 sales files, which included 160 offers, disclosed the following concerns:

- 1) Many of the property sales files did not contain adequate documentation to support property valuations and offers. For example, we noted 19 offers related to 9 sales where a valuation worksheet was not present in the file at the

time the decision was made on those offers. While two of these files contained valuation worksheets prepared after decisions were made on the offers, the other seven contained no documentation indicating the Land Commissioner ever determined the value of the properties. One of the sales files without a valuation worksheet related to the \$400,000 sale of the Vista Del Rio building in 1996. This sale was the largest sale noted during our review of Land Trust. According to county records, the appraised value of the property was \$1,942,520 when it was deeded to Land Trust in March 1996 and the delinquent taxes and judgements totaled \$1,711,296.

We noted instances where valuation worksheets were not signed or dated by the Land Commissioner and instances where valuation worksheets were dated after the trustees made their decision to accept or reject the offers. Also, the trustees did not sign or include the date of acceptance or rejection for a number of offer sheets reviewed.

Land Trust should ensure property sales are properly handled and fully documented. Proper and complete information should be made available to the trustees when considering offers on properties, to ensure that Land Trust receives fair value for the properties, to provide evidence that statutory requirements are met, and to ensure that offers are consistently handled.

- 2) Land Trust did not always accept the highest offer in instances when more than one offer was submitted on a property. We noted that Land Trust accepted a \$1 offer from a church for a commercial building, while rejecting a \$1,000 offer from an individual. This file did not contain a valuation worksheet; however, according to county records, the appraised value of this property was \$14,286 when it was deeded to Land Trust.

While there is no legal requirement for Land Trust to sell property to the highest bidder, it would appear to be in the best interests of the taxing authorities to do so. Not selling properties to the highest bidder contributes to the appearance of unfair or unequal treatment. If there are valid reasons for selling a property to a lower bidder, the circumstances should be thoroughly documented.

- 3) Land Trust did not always collect a deposit with each offer as required. According to Land Trust's standard offer sheet, offerors are required to submit a deposit of 10 percent of the offer amount for an improved property and 25 percent for a vacant lot when an offer is made on a property.

Not requiring deposits for all offers submitted creates an environment for inconsistent treatment and gives the perception of favoritism.

- 4) Rather than being deposited into a bank account, deposit checks submitted with offers were sometimes marked void and returned to the offeror after the offer was rejected.

All deposits submitted with offers should be deposited intact and subsequently refunded by check, if the applicable offer is rejected. Handling these funds in a consistent manner improves accountability, reduces the risk of loss or misappropriation, and helps prevent perceptions of favored or unequal treatment.

- E. An individual record for each property is included in Land Trust's database; however, the expenses for each property are not recorded in the database or in the property file. It appears Land Trust's database system has the capability to track costs, but this capability is not being used. The information in the database for the individual properties only includes the address/location, legal description, offers made on the property, and the property's status.

Maintaining a record of expenses for each property is necessary for Land Trust to distribute the net proceeds from each sale to the taxing authorities as required by law. Section 141.790, RSMo 1994, requires Land Trust to establish accounts on its books relating to the operation, management, or other expenses of each parcel of real estate.

- F. Land Trust has sold some properties on an installment basis, whereby the purchaser pays for the property over a period of time. We noted such installment sales (properties sold on a Note and Deed of Trust) have not been handled in a consistent manner and Land Trust has no written procedures related to these types of sales. The office manager indicated that sales paid over a longer period of time are charged interest, while sales paid over a shorter term are not charged interest. Section 141.760(4), RSMo 1994, indicates that interest at a legal rate is to be charged on the balance of installment sales.

We also noted an instance where penalties were charged for late or delinquent payments, while such penalties were not charged in other similar instances. In addition, for the two existing installment sales as of August 1999, neither purchaser had made a payment on the respective property since 1997. It appears Land Trust has not taken adequate steps to collect the remaining amounts due or to recover the properties.

A written policy should be established for all aspects of such sales. All installment sales should be handled in a consistent manner to ensure all purchasers receive equal treatment and avoid any perception of favoritism. This would include charging interest and penalties on a consistent basis and in accordance with state law. In addition, Land Trust should take timely action to recover amounts owed on delinquent installment sales or recover the properties.

- G. Each year, Land Trust advertises improved properties in inventory in a local newspaper. However, it appears no properties were advertised by Land Trust in 1997. We could not locate an advertisement for that year and Land Trust could not provide a copy of the advertisement. In addition, we noted instances where individual properties were not advertised after being received by Land Trust. For example, the Vista Del Rio building noted earlier was not listed in the 1996 property advertisement. Further, Land Trust does not advertise its properties in a newspaper with a wide circulation, but instead advertises in a weekly newspaper with a limited circulation.

Land Trust should ensure all improved properties in inventory are advertised at least once annually in a newspaper with a wide circulation. By not doing so, all potential purchasers are not made aware of available properties.

- H. Land Trust holds property off the available sales list at the request of the City of Kansas City, Missouri. The city requests properties to be held for redevelopment projects and these requests are forwarded to Land Trust by a letter or phone call. Land Trust staff indicated that the trustees decide whether or not to grant the request. Land Trust records indicate that the city currently has about 240 properties held off the list of available properties. Land Trust does not have written policies and procedures in place to ensure these transactions are documented and monitored.

Some of the above conditions were similarly noted in the 1983 audit of Land Trust conducted by the Jackson County Legislative Auditor.

**WE RECOMMEND** the Board of Trustees:

- A. Direct the Land Commissioner to appraise or value properties when they are received as required by state law.
- B. Obtain the consent of at least two appointing authorities before approving sales for less than two-thirds of the established value and document this approval by attaching copies of these letters to the deed as required by state law.
- C. Classify properties as required by state law.
- D.1. Ensure adequate and complete documentation is maintained in all sales files regarding property valuations and offers. Valuation worksheets should be prepared for all properties and be used in evaluating each offer.
2. Accept the highest offers made on properties, with any exceptions explained and documented.
- 3.&4. Require deposits be submitted with all offers considered by the board, that all monies

received be deposited intact, and that any refunds be made by check from Land Trust.

- E. Maintain records accounting for the operation, management, or other expenses related to each parcel of real estate as required by state law.
- F. Establish a written installment sale policy to ensure installment sales are handled in a consistent manner and in accordance with state law, and ensure delinquent installment sales are pursued on a timely basis.
- G. Advertise all improved properties at least once annually in a newspaper with a wide circulation.
- H. Develop and implement written procedures regarding "hold" properties.

### **AUDITEE'S RESPONSE**

- A. *The Board of Trustees agrees with this recommendation. The board at a meeting in December 1999, directed the Land Commissioner to appraise and value the properties based upon the 2/3 valuation.*
- B. *The Board of Trustees agrees that Land Trust was not in strict adherence with this part of the statute in regard to the sale of 2 properties. The other 5 sales were very close to the 2/3 valuation and approved after changed circumstances were presented to the board (for example, the adjacent owner and purchaser removed dead tree from the property at his expense). The board has requested letters of consent from the taxing authorities regarding sales for public purposes and received no response.*
- C. *The properties in the Land Trust inventory are classified according to state statute; those suitable for private use are available to the public, those suitable for public use are held off the market at the request of the taxing authorities. Land Trust currently has no properties classified as "not useable".*
- D.1.  
& 2. *The Board of Trustees agrees with these recommendations. The board is in the process of implementing procedures to ensure full and complete documentation for every offer in the files.*
- 3. *The Board of Trustees' policy has always required deposits for each offer submitted.*
- 4. *Prior to the audit, Land Trust had established a policy not to accept personal checks and this should not be a problem in the future.*
- E. *The Board of Trustees thinks that this recommendation too narrowly interprets Section*

141.790, paragraph 1, which was enacted in 1943. According to Section 141.780, the board has the authority and discretion to group or regroup individual tracts for economy or convenience. Given the large number of properties now in the inventory, the only feasible way to track actual expenses with actual income is to prorate these expenses to the properties sold in a given year.

- F. *The Board of Trustees agrees with this recommendation. Land Trust does not have a policy of selling properties on payment to the general public . Currently, there are no properties being financed by Land Trust. The two installment sales mentioned in the audit have been closed out. All monies due have been collected on one and title to the other property has been regained through foreclosure. These situations are rare and occur when property is occupied when Land Trust receives title and eviction would cause undesirable consequences for the resident.*
- G. *The Board of Trustees agrees that all improved properties should be advertised. This has been done in the newspaper with the widest circulation in the neighborhoods where Land Trust has the largest concentration of properties for sale.*
- H. *The city has used Land Trust as a land banking agency. The Board of Trustees has established procedures regarding "Hold" properties. Prior to the audit report, a letter was sent to the city asking it to inform Land Trust of plans for the properties which the city has held off the market for public use. Land Trust is still awaiting a response.*

|   |
|---|
| <b>3. Questionable Property Sale Transactions</b> |
|---|

- A. During our review, we noted the following sales made to a spouse of an employee:
  - 1) In May 1998, an improved property was sold for \$6,200 to the spouse of a Land Trust employee; however, we found no documentation to indicate that any monies were received or deposited related to this sale. In addition, it does not appear this sale went through Land Trust's review and approval process.

According to the offer sheet, the offer was made on May 30, 1998, and accepted that same day. According to Land Trust records, the trustee meeting for May 1998 occurred on May 28, 1998; two days before this offer was received and accepted. The next recorded trustee meeting was June 30, 1998. The board minutes from these meetings contain no record of an offer being accepted or rejected for this property. As a result, it appears the offer related to this sale may not have been brought to the board for consideration and approval. Further, no valuation worksheet could be located documenting Land Trust's appraisal of the property and this property did not appear on Land

Trust's 1998 advertisement of available improved properties. The deed related to this property sale was prepared on June 30, 1998, and subsequently recorded by the county on September 23, 1998.

We asked the employee about this sale and were told that there should be more files related to the sale and that they were probably in the Land Commissioner's office. We were later told this sale had been discussed with the Land Commissioner and that the property sale should have been canceled because the property was not really useable or fixable. It was explained that the \$6,200 check had never been deposited and was returned to the offeror. We were also told that the deed should have been canceled and Land Trust would be preparing an affidavit to void the deed.

We drove by and viewed the exterior of the property at that address. From the exterior, the house appears to be in better condition than many of the other Land Trust houses we observed, and did not appear to be in any worse condition than the houses immediately adjacent to it. The block also has a number of newer homes.

In addition, a subsequent discussion with the Land Commissioner did not support the employee's explanation of this situation. According to the Land Commissioner, he was not aware this property had been in Land Trust until we asked questions about this transaction.

- 2) On July 25, 1997, another property was sold for \$2,000 to the same Land Trust employee's spouse. We were only able to trace \$1,300 received and deposited, with \$700 being unaccounted for or outstanding. Even though the full sale price was not accounted for, the property was deeded to this individual on November 18, 1997.

In February 1997, the City of Kansas City passed an ordinance authorizing property acquisition and relocation services related to a development project in the area where this property is located. In March 1998, this piece of property (along with other surrounding properties) was condemned by the City of Kansas City for public use and the applicable Land Trust employee and spouse were subsequently awarded an \$11,000 settlement for this property. We were unable to determine whether these two individuals had prior knowledge of the city's plans for future development in this area.

It appears improprieties may have occurred related to the two property purchases noted above. The lack of segregation of duties discussed later in this report contributed to this situation.

It should be noted that the Land Trust employee did not disclose the relationship with this individual when we inquired whether any properties were sold to related parties or during discussions concerning these two sales. We also determined the employee's spouse is a mowing contractor for Land Trust (see MAR No. 4). Again, the Land Trust employee did not disclose the relationship with this individual when we asked whether any related parties performed contract work for Land Trust.

- B. Based on the approved offer sheets and deeds maintained in the sale files and the deposit records, we could not locate all amounts due related to three other property sales reviewed as follows:

|                              | Offer    |          | Amount      |
|------------------------------|----------|----------|-------------|
|                              | Amount   | Deposits | Unaccounted |
|                              |          |          | For         |
| Sale A                       | \$ 8,000 | 6,000    | \$ 2,000    |
| Sale B                       | 1,500    | 120      | 1,380       |
| Sale C                       | 1,300    | 225      | 1,075       |
| Total Amount Unaccounted For |          |          | \$ 4,455    |

These sales may represent additional instances where all monies due were not collected. We attempted to contact the purchasers of the properties in these transactions. The purchasers in Sales A and C confirmed that the amounts deposited represented the total monies paid on those properties. The difference between the amounts offered and the actual payments could be due to errors or inadequacies in record keeping or could possibly represent fraudulent activity. Purchaser B did not respond to our request for information. These sales should be reviewed and an effort made to collect any monies which may be owed to Land Trust.

- C. In August 1993, a former trustee resigned his position with Land Trust and subsequently purchased the Uptown Theater. According to a letter dated February 3, 1994, from the Land Commissioner to the Mayor of Kansas City, this trustee resigned from the Land Trust Board on August 19, 1993. On this same date, the property was deeded to a company owned by this individual for \$7,500. The deed was signed by the board's vice-chairman and secretary and notarized. The deed was recorded with the county on November 12, 1993.

Because of the circumstances surrounding the sale of this property, we requested the applicable sale file for review. We were informed by Land Trust officials that it could not be located. As a result, we were unable to verify whether any other offers were received related to this property, to determine whether Land Trust's appraisal of the property was reasonable, or to evaluate the propriety of the sale.

Although the county had appraised the property prior to tax delinquency at \$561,354,

Land Trust officials stated that the property was of little or no value at the time of the sale and was a liability due to environmental concerns. The delinquent taxes and judgements related to this property at the time it was deeded to Land Trust totaled \$69,724. The theatre is now part of a tax increment financing plan. Such a plan allows new taxes generated by development to be used to reimburse certain costs incurred by that developer.

**WE RECOMMEND** the Board of Trustees ensure that all monies related to property sales are collected, recorded, and deposited before signing deeds transferring ownership. In addition, the board should develop and implement policies and procedures that address sales to related parties or Land Trust officials and ensure such sales are properly documented.

### **AUDITEE'S RESPONSE**

*The Board of Trustees does have policies and procedures that require that all monies related to sales are collected, recorded, and deposited before transferring ownership. It is Land Trust's policy that sales to related parties and Land Trust officials are inappropriate.*

*A.1.*

*&2. The Board of Trustees is taking this matter very seriously. The employee has been suspended and an independent investigation is in progress. The board intends to take whatever actions are appropriate after the investigation is complete.*

*B. In reviewing these sales, the Board of Trustees found that two of the three sales (A&C) were not adequately documented but that all money owed to Land Trust had been collected. We are continuing to investigate Sale B (\$1,380 still unaccounted for).*

*C. It is unfortunate that the file on the transaction cannot be found. The trustee resigned at the county courthouse before coming to the Land Trust meeting and making an offer to purchase the Uptown Theater. This property was on the market for over 2 years. There were no other offers made for the purchase of this property. It was shown many times by office personnel during the time it was held by Land Trust. The facade at the top of the building was falling to the ground, thus making it unsafe for people walking on the street. It was barricaded from the alley in the rear around to the front of the building. It was decided that any reasonable offer should be accepted, if the purchaser had the financial means to restore the building. This would relieve Land Trust, the State of Missouri and the taxing authorities of liability and promote Broadway development. Two appraisals were made by the FDIC indicating a negative value for the property.*

|    |              |
|----|--------------|
| 4. | Expenditures |
|----|--------------|

During our review of Land Trust expenditures, we noted the following concerns:

- A. In January 1998, Land Trust changed its payroll cycle from paying twice a month to once a month. During 1998, extra salary payments totaling \$10,025 were made to the three salaried Land Trust employees. During the first half of 1998, one extra payment was made to the attorney and Land Commissioner and two extra payments were made to the office manager. In addition, the Land Commissioner received an extra \$500 auto allowance payment during this period.

According to the office manager, one of her extra payments was for unused vacation leave; however, we could not verify this because leave records are not maintained. In addition, there is no written leave policy and employees reported different understandings of Land Trust's informal policy. It appears the other extra salary payments may have occurred because of errors caused due to employees not being paid at the same time each month. There was no documentation supporting the reason(s) for the extra payments or indicating they had been approved by the Board of Trustees. In addition, these payments were not reported on the applicable employees' W-2 forms as required by the Internal Revenue Code.

The Land Trust Board should review the payments noted above and recover any unauthorized compensation. The employee W-2 forms should be amended, as necessary. To reduce the risk of unauthorized disbursements, the Land Trust Board should compare checks issued to the monthly check register and establish a regular monthly payday. Also, a written leave policy should be established to clarify the board's intent regarding this benefit. Employee leave records should be required in conjunction with this policy.

- B. Land Trust employees have been paid annual bonuses. We noted bonuses totaling \$6,000 in January 1997, \$18,000 in December 1997, and \$8,000 in December 1998, which were paid to the employees, including the Land Commissioner. The board did not retain any documentation indicating their approval of these bonuses or how the bonuses were determined. In addition, these payments were not included in the amounts reported on the employees' W-2 forms.

These payments appear to represent additional compensation for services previously rendered and, as such, are in violation of Article III, Section 39 of the Missouri Constitution. Also, Attorney General's Opinion No. 72, to Pray, 1952, states ". . . a government agency which derives its power and authority from the Constitution and laws of this state would be prohibited from granting compensation in the form of bonuses to public officers or servants after the service has been rendered." In addition, the employee W-2 forms should be amended to reflect this additional compensation.

- C. According to the Land Commissioner, Land Trust currently holds approximately 1,500 properties which need to be mowed periodically. Prior to 1995, the City of Kansas City had been mowing weeds on most Land Trust properties and absorbing the associated costs. In 1995, the city discontinued mowing Land Trust properties and turned this responsibility and the associated expenses for this maintenance over to Land Trust. Since that time, expenditures for contracted mowing services have increased significantly and represent a large portion of Land Trust's operating costs. Recent mowing expenditures of Land Trust were:

| <u>Calendar<br/>Year</u>                 | <u>Total Mowing<br/>Expenditures</u> |
|--|--------------------------------------|
| 1994                                     | \$ 2,800                             |
| 1995                                     | 56,555                               |
| 1996                                     | 130,058                              |
| 1997                                     | 150,092                              |
| 1998                                     | 188,365                              |
| 1999 (eight months)<br>ended August 31,) | 126,808                              |

- 1) Land Trust has not formally solicited bids or other proposals for these mowing expenses. According to Land Trust officials, possible mowing contractors have been identified through references or by individuals/companies contacting Land Trust regarding the need for mowing services. Land Trust has never advertised publicly for these services.

According to Land Trust officials, the Land Commissioner selects the mowing contractors and determines the amount of mowing business awarded to each one. Each mowing contractor is paid the same rate (\$6 per 1,000 square feet).

A governmental entity should award significant service contracts through an advertised, competitive bid process to the extent possible. The lack of a public and competitive procurement process, at a minimum, could give the appearance of favoritism and unfair treatment of other contractors. The spouse of a Land Trust employee was Land Trust's highest paid mowing contractor, receiving approximately \$50,000 in 1998 and \$42,400 in the first eight months of 1999 for mowing services.

- 2) Land Trust does not maintain adequate documentation to ensure the mowing services billed to Land Trust are actually provided. According to the Land Commissioner, he visits some of the properties mowed to ensure the services billed are provided and documents this by initialing the invoice prior to payment. However, no documentation is maintained identifying the specific properties

inspected.

Land Trust should develop and implement procedures to verify and document that mowing services billed are actually performed.

- D. In addition to the expenditures discussed in part C. above, we noted that competitive bids were not solicited for any other items and services purchased by Land Trust. Examples of significant purchases which were not bid included computer equipment (\$14,500), a copier (\$7,800), and an executive desk and chair (\$3,100).

Formal bidding procedures for significant purchases provide a framework for economical management of resources and help ensure that the board receives fair value by contracting with the lowest and best bidders. In addition, competitive bidding ensures all parties are given an equal opportunity to participate in Land Trust business. Documentation of bids should include, at a minimum, a listing of vendors from whom bids were requested, a copy of the request for proposal, newspaper publication notices when applicable, bids received, the basis and justification for awarding bids, and documentation of all discussions with vendors.

- E. Land Trust has not formally solicited proposals for its banking services in recent years. However, in 1997 Land Trust moved its accounts to a bank where a trustee serves on the board of directors. There was no mention in the board's minutes of whether this trustee participated in the decision to move the bank accounts or whether he abstained from this decision. Because of the lack of documentation, this situation at a minimum, gives the appearance of a conflict of interest. In addition, Land Trust does not have a written depository agreement with this bank.

Land Trust should solicit bids for its banking services every two years in accordance with Section 110.070, RSMo 1994. Any trustee associated with a bank bidding for the services should abstain from the selection process and that abstention should be documented. Land Trust should also enter into a contract with the depository bank, outlining the terms agreed to and the services to be received.

- F. The Land Commissioner is paid \$500 a month as an auto allowance to defray travel expenses he incurs on Land Trust business in his personal vehicle. The Land Commissioner is not required to prepare reports documenting the mileage incurred while performing his duties to support or justify these payments in any manner. In addition, the monthly payments are not reported as compensation on his W-2 forms.

Considering the extent of the auto allowance, the board should require the Land Commissioner to prepare and submit monthly reports documenting the mileage and other expenses incurred on Land Trust business. Any payments to the Land Commissioner which are above the amount of documented expenses should be treated

as compensation and should be subject to payroll withholdings and reported on his annual W-2 form.

In addition, in 1998 we noted Land Trust paid \$2,370 for repairs to the Land Commissioner's personal vehicle. Considering the monthly auto allowances being paid to the Land Commissioner, it does not appear reasonable for Land Trust to also pay for the cost of repairs to his vehicle.

- G. Actual expenditures exceeded budgeted amounts in the administrative account as follows:

| Calendar<br>Year | Budgeted<br>Expenditures | Actual<br>Expenditures | Actual<br>Over<br>Budgeted |
|------------------|--------------------------|------------------------|----------------------------|
| 1998             | \$ 366,259               | 431,455                | 65,196                     |
| 1997             | 301,503                  | 350,957                | 49,454                     |
| 1996             | 220,877                  | 287,699                | 66,822                     |
| 1995             | 195,598                  | 210,336                | 14,738                     |

Source: Land Trust budgets, financial statements, and records.

If there are valid reasons for excess expenditures, budget amendments should be made following the same process by which the annual budget is approved. By allowing budgets to be routinely exceeded, any benefits intended by the budget process are diminished or lost.

A complete and well-planned budget can serve as a useful management tool by establishing specific cost and revenue expectations for each area of operations. A budget can also provide a means to monitor actual costs by periodically comparing budgeted amounts to actual expenditures.

**WE RECOMMEND** the Board of Trustees:

- A. Review the extra salary and auto allowance payments and recover any unauthorized amounts. The employee W-2 forms should be amended, as necessary. In addition, the board should set employee compensation, require that documentation for salaries paid is maintained, and establish a regular monthly payday. Also, a written leave policy should be established and employee leave records maintained.
- B. Review the propriety of bonuses that have been paid and, in the future, discontinue paying bonuses to employees. Furthermore, the employees' W-2 forms must be amended to report the compensation already paid.

- C&D. Establish a formal procurement policy and ensure competitive bids are solicited for all significant purchases. Land Trust should develop and implement procedures to verify and document that mowing services billed were actually performed.
- E. Solicit proposals for banking services every two years and enter into a written agreement with the depository bank. Any trustee associated with a bank bidding for the services should abstain from the selection process to avoid a potential conflict of interest. That abstention should be documented in the board minutes.
- F. Require the Land Commissioner to prepare and submit monthly reports to support auto allowance payments. Amounts paid in excess of actual expenses incurred should be reported as compensation on W-2 forms. In addition, the trustees should establish a policy not to pay both an auto allowance and actual expenses. In conjunction with this, the trustees should review the \$2,370 payment related to the repairs made to the Land Commissioner's personal vehicle and consider recovering this amount.
- G. Ensure actual expenditures do not exceed the amounts budgeted. The budget should be amended if additional expenditures are necessary.

#### **AUDITEE'S RESPONSE**

*The Board of Trustees agrees with the recommendations regarding 4.A-G. Procedures are being implemented to correct any deficiencies and problems.*

*In regard to A & B, an independent accountant has been hired to review the matters in question.*

*In regard to C.1.&2., in 1995, when Land Trust undertook new mowing responsibilities, the office requested a list of city contractors who had experience in mowing properties in the Land Trust inventory. The Board of Trustees is taking appropriate action to procure bids for future grass cutting contracts and to maintain better documentation for these services. The Trustees and the Land Commissioner were unaware that one of the contractors was the spouse of an employee.*

*In regard to D, Land Trust did receive bids for office equipment. The proposals should have been more fully documented.*

*In regard to E, the Trustee did abstain from the vote approving the transfer of funds and in the future the board will take bids.*

|  |
|--|
| <b>5. Accounting Controls and Procedures</b> |
|--|

Land Trust collects money from property sales and from deposits submitted with offers on properties. The sales proceeds are deposited in a trust account and the offer deposits are deposited in an escrow account. An administrative account is used to pay expenses of Land Trust and money is transferred periodically from the trust account to the administrative account. A review of Land Trust's accounting controls and procedures disclosed the following concerns:

- A. The accounting duties of Land Trust are not adequately segregated. The office manager essentially performs all accounting and record keeping duties, which include collecting monies, preparing and making the deposits, performing bank reconciliations, preparing checks, and maintaining documentation related to disbursements. In addition, this individual is responsible for handling offer sheets, maintaining the sales files, and preparing and filing deeds. It appears no independent review of the duties and activities performed by this individual is performed.

To safeguard against possible loss or misuse of funds, internal controls should provide reasonable assurance that all transactions are properly accounted for and assets are adequately safeguarded. An adequate system of internal controls requires segregation of duties. The Board of Trustees should, at a minimum, designate someone independent of the process to perform and document periodic reviews of the records and procedures.

- B. Deposits are not made on a timely basis. During the year ended December 31, 1998, deposits into the trust account were made an average of two times a month, with deposits averaging \$7,770. During this same period, deposits into the escrow account were made an average of two to three times a month with deposits averaging \$2,450. In some months, only one deposit was made into each of these accounts. During our review of sale files, we noted an instance where the payment on the balance of a property purchase was received and deposited several weeks before the initial cash deposit submitted with the offer was deposited. In another instance, a deposit related to a rejected offer was not deposited until after Land Trust had sent a refund check to the individual who had submitted the offer.

In January 1999, Land Trust's office was burglarized and over \$19,200 in checks and money orders were reported stolen. While it appears Land Trust was able to get most of the checks replaced, the seriousness of this situation would have been reduced had the monies been deposited on a timely basis. The timeliness of deposits did improve after the burglary; however, further improvement is still needed.

To adequately safeguard receipts and reduce the risk of loss due to theft or misuse of funds, deposits should be made on a daily basis or when accumulated receipts exceed \$100.

- C. The records maintained to document the monies collected by Land Trust are

inadequate. No receipts ledger is maintained to account for all monies received and receipt slips are issued only when they are requested. Generally, the only information supporting the monies collected is documented on the deposit tickets and in the sale files.

To help ensure collections are properly recorded and deposited and to reduce the risk of loss or theft, all monies should be recorded on prenumbered receipt slips and in a receipts ledger when received. This could be readily accomplished by the establishment of a one-write receipts system. In addition, recorded receipts should be reconciled to bank deposits on a periodic basis.

- D. Checks and money orders are not restrictively endorsed immediately upon receipt. During a cash count conducted in July 1999, we noted that 14 of 21 checks held by Land Trust had not been restrictively endorsed.

To reduce the risk of loss or misuse of funds, checks and money orders should be restrictively endorsed immediately upon receipt.

- E. Checks issued on Land Trust bank accounts require two signatures (the Land Commissioner and one trustee). According to the Land Commissioner, a trustee will generally sign the checks in advance of their preparation and then the Land Commissioner will sign after the checks are prepared. However, during our July 1999 cash count, we noted two blank checks signed in advance by both a trustee and the Land Commissioner.

A trustee signing checks in advance eliminates the additional control intended by a dual signature system. When both signators sign checks in advance of their preparation, a serious control weakness exists which provides an opportunity for the theft or loss of funds.

- F. A monthly listing of deposits being held on pending offers (open items) is not prepared for the escrow account. Monthly listings of open items should be prepared and reconciled to the balance in the escrow account to ensure proper accountability over these monies.

**WE RECOMMEND** the Board of Trustees:

- A. Adequately segregate the duties performed by the office manager and designate someone independent of the process to perform and document periodic reviews of the records and procedures.
- B. Require deposits be made daily or when accumulated receipts exceed \$100.

- C. Ensure adequate records of monies collected are maintained by requiring that all monies received be recorded on prenumbered receipt slips and that a receipts ledger be maintained. Recorded receipts should be reconciled to deposits on a periodic basis.
- D. Require checks and money orders be restrictively endorsed upon receipt.
- E. Prohibit the practice of signing blank checks in advance. If it is not always practical for a trustee to sign the checks subsequent to their preparation, the board should designate another Land Trust employee who is independent of the disbursements function to serve as the second signator.
- F. Require monthly listings of open items be prepared and reconciled to the monies held in the escrow account.

### **AUDITEE'S RESPONSE**

*The Board of Trustees agrees with these recommendations. New procedures are being implemented to correct any deficiencies and problems.*

|           |                                |
|-----------|--------------------------------|
| <b>6.</b> | <b>Other Compliance Issues</b> |
|-----------|--------------------------------|

- A. The term of the City of Kansas City's appointee to Land Trust expired on January 31, 1998, and this individual has continued to serve in this position. Section 141.720, RSMo 1994, states that if any appointing authority fails to make any appointment of a land trustee within thirty days after any term expires or vacancy occurs, then the appointment shall be made by the mayor of the city with the largest population in the county.

We could find no official correspondence from Land Trust to either the former Mayor or current Mayor of Kansas City informing them of the need to address this expired term.

- B. During our review, we noted the Land Commissioner was not bonded as required by law. Section 141.740, RSMo 1994, requires the Land Commissioner to furnish a surety bond of at least \$10,000 at the expense of Land Trust and this bond is to be filed with the County Clerk. The failure to properly bond individuals exposes Land Trust to risk of loss.

After we brought this matter to the attention of Land Trust officials, they indicated actions would be taken to obtain bond coverage for this official.

- C. Each of the trustees is bonded for \$25,000; however, the bonds are not filed with the County Clerk's office as required. The bond premiums were paid by Land Trust rather than the county. Section 141.730, RSMo 1994, requires the trustees to furnish surety bonds in an amount not to exceed \$25,000 that are approved by the County Collector, paid out of county funds, and deposited with the County Clerk.

One of the trustees owns the company from which the trustees' surety bonds were obtained. The bond premiums paid this company totaled \$1,065. This amount covered the four years of the trustees' terms. There was no documentation that quotes were obtained for this bond coverage, nor was there any mention in the board minutes whether the applicable trustee participated in the decision to purchase these bonds from his company or whether he abstained from this decision.

Because of the lack of documentation, this situation, at a minimum, gives the appearance of a conflict of interest. In such situations, bids should be solicited for the surety bond coverage and the applicable trustee should abstain from the decision.

**WE RECOMMEND** the Board of Trustees:

- A. Notify the current Mayor of Kansas City about the need to address the expired term of the applicable trustee.
- B&C. Ensure surety bond coverage is maintained for the Land Commissioner and the Board of Trustees as required. In addition, the board must ensure that the surety bonds of the trustees as well as the Land Commissioner are filed with the County Clerk's office. The bond premiums for the trustees should be paid out of county funds in accordance with state law. Furthermore, Land Trust should obtain quotes for surety bond coverage and in situations where a potential conflict of interest exists, document the abstention of the applicable trustee(s).

**AUDITEE'S RESPONSE**

- A. *In a conversation with the office of the previous Mayor, the Land Commissioner was told that the trustee would be re-appointed. This was near the end of the Mayor's term and preparations were being made to make the appropriate transitions. The trustee was also contacted and confirmed that the Mayor had re-appointed him. No further action was taken.*
- B. *The Board of Trustees has taken care of the bonding of the Land Commissioner.*
- C. *The Trustee mentioned did abstain from any vote authorizing his company to issue the bonds. In the future, bids will be obtained for this bond coverage.*

**7.****Annual Financial Audits**

Section 141.760, RSMo 1994, requires an annual audit of Land Trust's accounts and records be conducted by a certified public accountant. During our review of recent financial audits, we noted the following concerns:

- A. Land Trust has not formally requested proposals for audit services since the selection of the current auditor in 1990. Land Trust should periodically solicit proposals for audit services from several independent auditors or auditing firms to compare and evaluate audit services available in terms of quality, experience, and cost.
- B. The audits were not completed on a timely basis. The audit reports for the years ended December 31, 1995, 1996, and 1997, were not issued until approximately 12, 19, and 18 months, respectively, after the end of the applicable year. In addition, the audit for the year ended December 31, 1998, had not been completed as of January 25, 2000.

To obtain maximum benefit of audit services, Land Trust should ensure its financial audits are completed on a timely basis. The ability to complete timely audits should be considered during the evaluation of audit proposals.

**WE RECOMMEND** the Board of Trustees:

- A. Periodically solicit proposals for auditing services.
- B. Ensure financial audits are completed on a timely basis.

**AUDITEE'S RESPONSE**

*The Board of Trustees agrees with these recommendations and intends to implement whatever changes are necessary.*

**8.****Documentation and Reporting of Board Proceedings**

- A. The board minutes did not always include a listing of the offers that were accepted and rejected at the trustees' meetings. In addition, the minutes did not include documentation of the board's review and approval of Land Trust expenditures.

To adequately document the board's review of offers, a listing of the offers accepted and rejected should be prepared and maintained with the minutes. In addition, the

board should review and approve all expenditures of Land Trust and that review and approval should be documented.

B. Land Trust does not post or make any other type of public disclosure (such as to the three appointing authorities) of the offers considered and the sales approved related to its properties. The public posting or other disclosure of all offers considered and all approved sales would provide additional control and help ensure all offers received have been brought to the trustees for consideration.

C. Land Trust did not fully comply with all provisions of Section 610.020, RSMo Cumulative Supp. 1999, (the Open Meetings Law):

- 1) Proper notice was not always given for trustee meetings as required. For example, the March 1999 trustee meeting was advertised in the newspaper the same day as the meeting. That advertisement incorrectly reported the time of the meeting and did not include an agenda. In addition, in September 1999, we noted that a meeting of the trustees was held, but no notice was given.

Section 610.020, RSMo Cumulative Supp. 1999, requires all public governmental bodies to give notice of the time, date, and place of each meeting, and its tentative agenda in a reasonable manner to advise the public. Notice shall be given at least twenty-four hours prior to the commencement of any meeting.

- 2) According to Land Trust employees, the trustees discuss personnel matters during closed meetings in December of each year; however, the meeting minutes did not document the related votes or the reasons for closing the meeting. In addition, there were no minutes maintained to document the matters discussed in these closed meetings.

Section 610.022, RSMo Cumulative Supp. 1999, requires that before any meeting may be closed, the question of holding the closed meeting and the reason for the closed meeting shall be voted on at an open session. In addition, closed meeting minutes should be maintained to document these meetings.

**WE RECOMMEND** the Board of Trustees:

- A. Ensure the approval and rejection of offers is adequately documented by including a detailed listing of accepted and rejected offers with all board minutes. The board's review and approval of Land Trust expenditures should be documented.
- B. Ensure the offers considered and approved sales are posted and/or publicly disclosed in some other manner.

- C.1. Ensure timely, accurate, and complete notice is given for all meetings of the board as required by law.
2. Ensure a public vote is held prior to going into closed session. The vote and the reason(s) for going into closed session should be entered into the minutes. In addition, minutes should be maintained to document the matters discussed in the closed meetings.

### **AUDITEE'S RESPONSE**

*The Board of Trustees agrees with these recommendations and intends to implement whatever changes are necessary.*

|  |
|--|
| <b>9. Lack of Formal Policies and Procedures</b> |
|--|

Land Trust has no written policies or procedures, and Land Trust officials indicated that their only formal procedures are those contained in the state statutes. Statutes cannot, and are not intended to, serve as a substitute for internally established operating policies and procedures of a governmental entity. The lack of established policies and procedures and management oversight contributed to many of the problems noted in other parts of this report.

Land Trust should conduct a comprehensive review of its activities and operations and identify those areas where established policies and procedures are needed. These would include, but not necessarily be limited to, property valuations and sales, the handling of deposits, installment sales, related party transactions, payroll and personnel matters, properties withheld from those available for sale, and procurement procedures. Written policies and procedures are needed to ensure Land Trust officials and employees are aware of their duties and responsibilities, and to ensure that the public receives equitable treatment. Such policies and procedures would also help ensure employees adhere to the intent of the board and avoid any misunderstandings.

This condition was also noted in the 1983 audit of Land Trust conducted by the Jackson County Legislative Auditor.

**WE RECOMMEND** the Board of Trustees develop and implement formal written policies and procedures.

### **AUDITEE'S RESPONSE**

*The Board of Trustees agrees that it should have written policies and procedures to reflect the policies and procedures which are followed by the Land Trust office. The board would like to point out that, during the period under audit, Land Trust received into its inventory and sold hundreds of properties. The problems cited in the audit were not the result of a lack of policy*

*and procedure, but failures in a few isolated instances to strictly adhere to the guidelines established for the effective management and sale of the properties held in the Land Trust inventory.*

This report is intended for the information of the management of the Land Trust of Jackson County, Missouri, and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

## STATISTICAL SECTION

History, Organization, and  
Statistical Information

LAND TRUST OF  
JACKSON COUNTY, MISSOURI  
HISTORY, ORGANIZATION, AND STATISTICAL INFORMATION

**Background**

The Land Trust of Jackson County, Missouri, was established by an act of the state legislature in 1943 as a public corporation acting in a governmental capacity. Land Trust was created and operates pursuant to Sections 141.700 to 141.810, RSMo 1994, and it is authorized to exercise all the powers in Sections 141.210 to 141.690, RSMo 1994, for the effective management, sale, or other disposition of real estate. The beneficiaries of Land Trust are the various taxing authorities in the county, including the county, municipalities, and school districts. Properties in Land Trust are exempt from all taxation and all prior delinquent taxes or other assessments are set aside.

The activities of Land Trust are overseen by a board of trustees, consisting of three members. One is appointed by the county legislature, one is appointed by the city council of the city with the largest population, and one is appointed by the board of the school district with the largest population. The trustees are appointed for four-year terms, receive \$2,400 annually as compensation, and must have at least 10 years experience in the management or sale of real estate. The trustees have the responsibility to manage, maintain, protect, rent, lease, repair, insure, alter, sell, trade, exchange or otherwise dispose of trust properties under terms and conditions determined by the trustees. The trustees may also appoint a land commissioner and other employees, as needed, to carry out the duties and responsibilities of Land Trust.

**Foreclosure and Land Trust Sale Processes**

According to the Jackson County Collector, the county begins foreclosure proceedings on properties when taxes are in arrears for three years. After the judgement in the foreclosure suit, properties are sold on the courthouse steps for the amount of the back taxes and any judgement amounts assessed against the property. After a property has been offered for sale on three different days at the county foreclosure sale with no successful bids, Land Trust is deemed to have bid the full amount of all tax bills and other assessments included in the judgement. Overall, the process from tax delinquency to Land Trust receiving the property can take about five years. For example, the timeline for properties sold at the 1998 auction from tax delinquency to the properties being deeded to Land Trust was as follows:

| Timeline for 1997 Foreclosures |                          |                          |                    |               |
|--------------------------------|--------------------------|--------------------------|--------------------|---------------|
| Property Tax<br>Delinquent     | Foreclosure<br>Initiated | Foreclosure<br>Judgement | County<br>Tax Sale | Deed<br>Filed |
| 1994, 1995, and 1996           | May 1997                 | November 1997            | August 1998        | January 1999  |

Sources: Jackson County deeds and interviews with Land Trust and County staff.

The county conducts two tax sales each year, one in Kansas City and one in Independence, to sell properties for delinquent taxes. Generally, properties sold at the Kansas City tax sale are within Kansas City's geographic boundaries and the properties sold at the Independence tax sale are located in other areas of Jackson County. Properties deeded to Land Trust from the Kansas City tax sale represented 94 percent of the properties received by Land Trust between 1994 and 1999. Between January 1, 1994 and August 31, 1999, Land Trust received 2,482 properties and sold 1,431 properties.

A summary of Land Trust's property inventory balances and additions and sales activity is presented below:

|                             | Year Ended December 31, |              |              |              |              | Eight Months Ended August 31, |
|-----------------------------|-------------------------|--------------|--------------|--------------|--------------|-------------------------------|
|                             | 1994                    | 1995         | 1996         | 1997         | 1998         | 1999                          |
| Beginning inventory balance | 2,036                   | 2,353        | 2,595        | 2,675        | 2,756        | 2,888                         |
| Additions                   | 575                     | 499          | 359          | 345          | 341          | 363                           |
| Sales                       | (258)                   | (257)        | (279)        | (264)        | (209)        | (164)                         |
| Ending inventory balance    | <u>2,353</u>            | <u>2,595</u> | <u>2,675</u> | <u>2,756</u> | <u>2,888</u> | <u>3,087</u>                  |

Sources: Land Trust sales records, Jackson County deeds, and County Assessor's records.

Land Trust receives a report of sales from the county tax sales and uses this information to enter properties into its inventory database. When the deed is received, it is compared to the report of sales and database entries. Within a few days, letters are mailed to adjacent property owners notifying them about available properties. Property worksheets that describe the property and provide a map of the immediate vicinity are prepared using legal descriptions in the deed and plat maps. A list of available improved properties is advertised and this list as well as a list of vacant lots are also available at Land Trust's office.

Citizens may make offers for properties owned by Land Trust by completing an offer sheet and submitting a deposit. When an offer is made on a piece of property, a valuation worksheet is given to the Land Commissioner to complete after conducting a site visit. A valuation (full value and two-thirds value) of the property is made and noted on the worksheet, which is then placed in a sale file along with the offer sheets. Valuations on improved properties are more detailed than those for vacant lots.

Land Trust trustees generally meet on a monthly basis to review the offers and either accept or reject them. Offers may be rejected because they are less than the two-thirds value (minimum set by state law) or because a higher bid is submitted. Letters are sent to offerors notifying them of the status of their offer (accepted or rejected). After receiving the final payment, a special warranty deed is

prepared and signed by two trustees and recorded at the county recorder's office. Copies of the deed are sent to the county and city as notification that properties have been sold.

### **Land Trust Personnel**

The members of the Board of Trustees are:

| <u>Members</u>                | <u>Appointing Body</u>      | <u>Year<br/>Initially<br/>Appointed<br/>to Board</u> | <u>Term Expires</u> |
|-------------------------------|-----------------------------|--|---------------------|
| Robert Newsome, Chairman      | City of Kansas City         | 1987   | 1/31/98 *           |
| Herman Johnson, Vice Chairman | Kansas City School District | 1987   | 1/31/03             |
| Greg Patterson, Secretary     | Jackson County              | 1993   | 1/31/02             |

\* Mr. Newsome continues to serve in this position until he is reappointed or a replacement is named.

Land Trust employees and their compensation (in 1998) are as follows:

| <u>Employees</u>                 | <u>1998 Compensation</u> |
|----------------------------------|--------------------------|
| Willie McCann, Land Commissioner | \$42,625 (1)             |
| Duke Bledsoe, Attorney           | 38,400 (2)               |
| Ardie Shannon, Office Manager    | 34,200 (3)               |
| J.T. Spotts, Map Researcher      | 19,540 (4)               |

- (1) This amount includes the \$31,500 annual salary authorized in the 1998 budget, an extra salary payment of \$2,625, \$6,500 in auto allowances, and a \$2,000 bonus.
- (2) This amount includes the \$33,600 annual salary authorized in the 1998 budget, an extra salary payment of \$2,800, and a \$2,000 bonus.
- (3) This amount includes the \$27,600 annual salary authorized in the 1998 budget, two extra salary payments totaling \$4,600, and a \$2,000 bonus.
- (4) This amount includes \$17,540 earned on an hourly basis and a \$2,000 bonus.

### **Audits**

In addition to annual financial audits, in 1983 the Jackson County Legislative Auditor audited Land Trust. That auditor reported various problems, including but not limited to, a lack of documented procedures, minutes containing inadequate or inconsistent information, taxing authorities not being contacted when property was sold for less than two-thirds of the value determined by Land Trust, all properties not being listed in the inventory, and properties were not being appraised by Land Trust

when received.

## **Financial Data**

The following is a comparative table of revenues, expenditures, and changes in fund balance.

|  | Eight<br>Months<br>Ended<br>August 31,<br>1999 | Year Ended December 31, |                |                |                |                |
|--|--|-------------------------|----------------|----------------|----------------|----------------|

CITY OF STOTTS CITY, MISSOURI

YEAR ENDED DECEMBER 31, 1998

**From The Office Of State Auditor  
Claire McCaskill**

Report No. 2000-07  
February 7, 2000

# AUDIT REPORT

Office Of The  
State Auditor Of Missouri  
Claire McCaskill

February 2000

**Some problems were discovered as a result of an audit conducted by our office in response to the request of petitioners from the City of Stotts City, Missouri.**

---

The City of Stotts City does not adequately segregate accounting and bookkeeping duties. Deposits are not made intact on a timely basis and the City Clerk routinely cashes personal checks. The City Collector is responsible for collecting utility payments and turning the monies over to the City Clerk for deposit. The City Clerk was only depositing a portion of the utility payments until November and December, 1998, when it appears she reimbursed the account for monies not previously deposited.

Based on our comparison of City Collector records to deposits made by the City Clerk, it appears the City Clerk would have had \$5,299 in undeposited receipts (including approximately \$1,100 in cash payments) at the end of October, 1998.

The City Clerk indicated she routinely cashed personal checks for herself and friends from utility receipts. She cashed one of her personal checks dated November 3, 1998 which was not deposited until December 16, 1998. It appears the City Clerk was borrowing from the city in this instance.

The City Clerk also indicated she would make loans to individuals by cashing their checks with city proceeds and holding their checks until they indicated they could cover their checks or replace it with cash. The City Clerk indicated several of the individuals did not cover their checks and she personally paid back the amounts not repaid to the city; however, the city records do not support this explanation regarding repayment.

These practices represent a poor control over cash receipts and should be discontinued. To ensure proper control and maintain accountability over cash, receipts should be deposited intact on a timely basis.

The city has several bank accounts that are non-interest bearing. Some employees and officials who collect monies or sign checks are not adequately bonded and checks are sometimes signed in advance by the Mayor.

(over)

YELLOW PAGES SHEET

Utility accounting and bookkeeping duties are not adequately segregated. Improvements are needed regarding the city's receipt procedures and tracking of delinquent customers. Utility billings are not reconciled to payments received and amounts remaining unpaid. The number of gallons of water billed to customers is not reconciled to the gallons of water pumped by the city. The balance in the meter deposit account is not reconciled to actual meter deposits. The board does not periodically review and establish water and sewer rates.

The city does not prepare or adopt annual budgets, and annual audits are not obtained in a timely manner. Semi-annual financial statements have not been published and annual financial reports are not submitted to the State Auditor's office as required by state law.

The city does not have a formal bidding policy. As a result, the decision of whether to solicit bids for a particular purchase is made on an item-by-item basis. Bids were either not solicited or bid documentation was not retained in some instances, including waste water treatment supplies and equipment (\$3,233), insurance (\$1,780), and auditing services (\$2,170).

City personnel indicated that telephone solicitation is occasionally used for purchases, but the price quotes have not been adequately documented to show that bids were solicited.

A formal bidding policy for major purchases based upon specified dollar amounts would provide a more efficient framework for economical management of city resources and help ensure the city receives fair value by contracting with the lowest and best bidders.

Several hiring concerns and a city transaction dealing with relatives of city officials were noted that appear questionable.

During the year ended December 31, 1998, the city deposited \$10,081 of state motor vehicle-related receipts into the General Fund and incurred only \$580 of street-related expenditures. During the first four months of 1999, the city opened a separate account for motor vehicle related revenues and deposited \$1,097 of the \$2,088 received in this accounts. Article IV, Section 30 of the Missouri Constitution, requires that motor vehicle-related revenues apportioned by the state of Missouri be expended for street-related purposes.

Improvements are needed regarding the city's ordinance book. Notice of the regular board meetings and the meeting's agenda are not posted. Board minutes do not identify the disbursements approved by the board at its monthly meeting. The city did not properly retain some city records and does not have a formal policy regarding public access to city records.

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

To the Honorable Mayor  
and  
Members of the Board of Aldermen  
City of Stotts City  
Stotts City, Missouri 65756

The State Auditor was petitioned under Section 29.230, RSMo, to audit the city of Stotts City, Missouri. Our audit of the city included, but was not limited to, the year ended December 31, 1998. The objectives of this audit were to:

1. Perform procedures we deemed necessary to evaluate the petitioners' concerns.
2. Review compliance with certain constitutional provisions, statutes, ordinances, and attorney general's opinions as we deemed necessary or appropriate in the circumstances.
3. Review certain management practices which we believe could be improved.

Our audit was made in accordance with generally accepted government auditing standards and included such procedures as we considered necessary in the circumstances. We also reviewed board minutes, city policies and ordinances, and various city financial records.

Our audit was limited to the specific matters described above and was based on the selective tests and procedures considered appropriate in the circumstances. Had we performed additional procedures, other information might have come to our attention which would have been included in this report.

The accompanying History and Organization is presented for informational purposes. This information was obtained from the city and was not subjected to the auditing procedures applied in the audit of the city.

The accompanying Management Advisory Report presents our findings and recommendations arising from our audit of the city of Stotts City, Missouri.

A handwritten signature in black ink that reads "Claire McCaskill".

Claire McCaskill  
State Auditor

October 7, 1999 (fieldwork completion date)

## HISTORY AND ORGANIZATION

# CITY OF STOTTS CITY, MISSOURI HISTORY AND ORGANIZATION

The city of Stotts City is located in Lawrence County. The city was incorporated in 1895 as a fourth-class city. The population of the city in 1990 was 235.

The city government consists of a mayor and a four-member board of aldermen. The four board members are elected for two-year terms. The mayor is elected a for two-year term, presides over the board of aldermen, and votes only in the case of a tie. The Mayor, Board of Aldermen, and other principal officials at December 31, 1998, were:

| <u>Elected Officials</u>             | <u>Term Expires</u> | <u>Actual Compensation for the Year Ended December 31, 1998</u> | <u>Bond</u> |
|--------------------------------------|---------------------|---|-------------|
| Jim Stearns, Mayor                   | April 2000          | \$ 50   | \$          |
| Vicky Stearns, Alderman              | April 2000          | 26  |             |
| Carol Estes, Alderman                | April 2000          | 26  |             |
| Rodney White, Alderman*              | April 1999          | 26  |             |
| Vacant, Alderman**                   | April 1999          | 26  |             |
| Cherri Stearns, City Collector***    | April 1999          | 2,400   | 2,500       |
| <u>Other Principal Officials</u>     |                     |   |             |
| Allene White, City Clerk/Treasurer   |                     | 3,702   | 2,500       |
| Charles Stearns, Utility Manager**** |                     | 8,134   |             |

\* Re-elected in April 1999 to another two-year term.

\*\* Jerry Daniels served as Alderman through November 1998, and was replaced in February 1999 by Diana Hill. Diana was elected in April 1999 to a two-year term.

\*\*\* Peggy Waltrip was elected in April 1999 to a two-year term.

\*\*\*\* Prior to February 1998, the city had two managers for the utility system. Charles Stearns served as the Sewer System Manager and Chris Stearns served as the Water System Manager.

Assessed valuation and tax rate information for 1998 are as follows:

## ASSESSED VALUATION

|                      | <u>1998</u>       |
|----------------------|-------------------|
| Real estate          | \$ 371,700        |

## MANAGEMENT ADVISORY REPORT

CITY OF STOTTS CITY, MISSOURI  
SUMMARY OF FINDINGS

1. Expenditures (pages 9-11)

The city has no formal bidding policy. Supporting documentation was not available for additional payments of \$1,302 made to the City Clerk and other employee reimbursements. The Mayor does not review related invoices or supporting documentation prior to signing checks. The city does not withhold any payroll taxes and forms 1099-Miscellaneous are not filed as required.

2. Related Party Transactions (pages 11-12)

Several hiring concerns and a city transaction dealing with relatives of city officials were noted that appear questionable.

3. City Utilities (pages 12-15)

Utility accounting and bookkeeping duties are not adequately segregated. Improvements are needed regarding the city's receipt procedures and tracking of delinquent customers. Utility billings are not reconciled to payments received and amounts remaining unpaid. The number of gallons of water billed to customers is not reconciled to the gallons of water pumped by the city. The balance in the meter deposit account is not reconciled to actual meter deposits. The board does not periodically review and establish water and sewer rates.

4. Accounting Controls and Procedures (pages 15-18)

Accounting and bookkeeping duties are not adequately segregated. Deposits are not made intact on a timely basis and the City Clerk indicated she cashed personal checks and held them until the individual said they were good or brought cash in to cover them. She said she personally paid back some of these undeposited checks; however, the city records do not support her repayment. The city has several bank accounts that are noninterest bearing. Some employees and officials who collect monies or sign checks are not adequately bonded and checks are sometimes signed in advance by the Mayor.

5. Ordinances, Board Meetings, and Records (pages 18-20)

Improvements are needed regarding the city's ordinance book. Notice of the regular board meetings and the meeting's agenda are not posted. Board minutes do not identify the disbursements approved by the board at its monthly meeting. The city did not properly retain some city records and does not have a formal policy regarding public access to city records.

6. Budgets, Audits, and Financial Reporting (pages 20-21)

The city does not prepare or adopt annual budgets, and annual audits are not obtained in a timely manner. Semi-annual financial statements have not been published and annual financial reports are not submitted to the State Auditor's office as required by state law.

7. Restricted Revenues and City Streets (pages 21-22)

The city does not properly account for some revenues which are restricted for specific uses. In addition, the city does not have formal plans for street construction, repair, or maintenance.

8. City Property (page 22)

The city does not maintain any fixed asset records for city property.

CITY OF STOTTS CITY, MISSOURI  
MANAGEMENT ADVISORY REPORT

|           |                     |
|-----------|---------------------|
| <b>1.</b> | <b>Expenditures</b> |
|-----------|---------------------|

- A. The city does not have a formal bidding policy. As a result, the decision of whether to solicit bids for a particular purchase is made on an item-by-item basis. Bids were either not solicited or bid documentation was not retained in some instances, including waste water treatment supplies and equipment (\$3,233), insurance (\$1,780), and auditing services (\$2,170).

City personnel indicated that telephone solicitation is occasionally used for purchases, but the price quotes have not been adequately documented to show that bids were solicited.

A formal bidding policy for major purchases based upon specified dollar amounts would provide a more efficient framework for economical management of city resources and help ensure the city receives fair value by contracting with the lowest and best bidders.

Competitive bidding also helps ensure all parties are given equal opportunity to participate in the city's business. Not only can bids be handled by telephone quotation, but bids can also be obtained by written quotation, by sealed bid or by advertised sealed bid. Various approaches are appropriate, based on dollar amount and type of purchase. Whichever approach is used, complete documentation should be maintained of all bids received and reasons noted why the bid was selected.

- B. The City Clerk is paid a monthly salary of \$200. In addition, checks were issued to the City Clerk totaling \$1,302 in 1998. The City Clerk indicated the payments were for "extra" hours worked, mileage, and miscellaneous supplies and expenses; however, there is no documentation to support these additional payments. Since the City Clerk's compensation and job duties have not been established by ordinance, it is unclear whether the City Clerk was to receive any additional compensation (See MAR #5). In addition, board minutes do not document whether the extra payments were specifically approved by the board.

The Utility Manager was paid \$3,134 in addition to his monthly salary of \$400 in 1998 (and approximately \$1,200 during the first four months in 1999). The additional amount was for extra hours worked, mileage, and miscellaneous supplies and expenses. The Utility Manager did submit a request for the additional pay. However, his request did not contain sufficient information such as the date when extra hours were worked, date of trip, trip origin, destination, and purpose for mileage requests. In addition, invoices for miscellaneous supplies and expenses reimbursed by the city were not maintained.

Failure to require adequate supporting documentation for expenditures increases the risk that the city will pay for items not intended for city purposes. To help ensure the propriety of all payments, documentation should be maintained to support all payments and all payments should be approved by the board. Also, without a detailed travel expense

report including documentation supporting the expenses claimed, the city cannot determine the propriety of payments made for travel expenses.

- C. The City Clerk prepares and signs checks and the Mayor also signs the checks; however, the Mayor does not review the related invoices or supporting documentation prior to signing the checks. To ensure all expenditures are properly reviewed and approved, the board should designate the Mayor or a board member to review the related invoices before the checks are signed.
- D. Vendor invoices or other supporting documentation were not retained for some expenditures. These expenditures included \$1,295 for mowing services during 1998 and \$60 for gift certificates. All expenditures should be supported by paid receipts or vendor invoices to ensure the obligations were actually incurred and the expenditures represent appropriate uses of public funds.
- E. The city does not withhold payroll taxes or pay the employer's share of social security on the compensation paid to city officials and employees. Internal Revenue Service Code requires employers to withhold federal income taxes, and Section 143.191, RSMo 1994, requires employers to withhold state income taxes from wages.

In addition, Section 105.300, RSMo 1994, defines an elective or appointed officer or employee of a political subdivision as an employee for social security purposes.

- F. The city did not file Forms 1099 with the Internal Revenue Service. The Internal Revenue Code requires payments of \$600 or more for services by nonemployees (other than corporations) be reported to the federal government on Forms 1099. During the year ended December 31, 1998 the city paid one individual \$1,295 for mowing and repairs.
- G. In March 1995, the city purchased a tractor for \$2,000 to be used for mowing city property. However, the city has not used the equipment and contracts with an individual to mow city property. The city paid \$1,185 for mowing services in 1998. The board needs to establish some plans for use of their equipment and determine whether the city has the financial resources necessary to maintain the equipment.

**WE RECOMMEND** the Board of Aldermen:

- A. Establish formal bidding policies and procedures. In addition, documentation of the bidding process should be maintained in all cases.
- B. Review the additional payments to the City Clerk and Utility Manager and determine if the payments were proper. The board should require detailed travel expense reports be submitted and invoices or receipts to support expenses claimed for reimbursement.
- C. Designate the Mayor or a board member to review all supporting invoices before the checks are signed.
- D. Require adequate supporting documentation for all expenditures.
- E. Ensure federal and state income taxes, as well as social security taxes, are properly withheld and remitted for any wages and salaries paid. In addition, the city should ensure prior years' wages and salaries are properly reported to the IRS.

- F. Ensure that IRS Forms 1099 are filed as required for prior years as well as in the future.
- G. Review the needs of the city and determine the city's plans for use of city equipment.

### **AUDITEES RESPONSE**

A. *We have made attempts to contact various suppliers in the past and will ensure we document our bidding efforts in the future.*

B. *The Board voted to allow additional compensation for city employees several years ago. We will ensure our ordinances reflect this in the future.*

C&D. *We agree with these recommendations.*

E&F. *We will consider implementing these recommendations.*

G. *We plan to sell the tractor.*

|           |                                   |
|-----------|-----------------------------------|
| <b>2.</b> | <b>Related Party Transactions</b> |
|-----------|-----------------------------------|

A. We noted several instances of potential nepotism as follows:

- . Two of Mayor Stearns sons were employed by the city prior to 1998 in the water and sewer department. In February 1998, one of the sons resigned and the remaining son (and husband of Alderwoman Stearns) assumed the Water System Manager's duties. The board meeting minutes were not available to document discussion regarding hiring someone for this position. Alderwoman Stearns indicated to us that she abstained from voting on the hiring of her husband.
- . In April 1998, the city hired Alderwoman Estes' father-in-law to mow city property and make street sign repairs. Alderwoman Estes abstained from voting on the decision to hire her father-in-law; however, in June 1998, the board approved additional work to be performed by the Alderwoman's father-in-law at an increased rate of pay. Even though the city indicated she abstained from voting on the decision the board minutes did not document specifically whether she abstained from voting on the issue.

The appointment or hiring of a relative by a public official is prohibited by the Missouri Constitution. Article VII, Section 6 of the Missouri Constitution provides that any public official who names or appoints to public office or employment any relative within the fourth degree shall forfeit his office.

Because of the serious consequences which result in hiring a relative, the board should ensure its members abstain from any decision to hire a relative and ensure that action is fully documented in the board minutes.

B. The city charges a \$85 water hook-up fee and a \$150 sewer hook-up fee. In June and September 1998, the city installed two free meter connections on property owned by a

relative of a board member. According to the city, the connections were in exchange for the granting of an easement through the property approximately four years ago. Although the related board member was not on the board at the time, the agreement was not in writing and board minutes were not available to document any decisions made by the board regarding this issue.

Officers and agents of a city serve in a fiduciary capacity. Personal interests in business matters of the city create the appearance of conflicts of interest. To avoid the appearance of conflicts of interest, all transactions and agreements between the city and relatives of board members should be fully documented and approved by the Board of Aldermen, and written agreements should be prepared if necessary.

**WE RECOMMEND** the Board of Aldermen:

- A. Ensure future appointments comply with the restriction of Article VII, Section 6 of the Missouri Constitution in regard to the hiring of relatives. If a relative of a board member is considered for employment, that board member should abstain from voting on the issue and an adequate record of the abstention should be maintained.
- B. Avoid transactions that represent actual conflicts of interest or the appearance of conflicts of interest. City officials who have a conflict that is unavoidable should fully disclose their interest and should not vote on matters which involve them personally. City officials should ensure strict compliance with the law when conducting city business and should consider adopting a code of conduct for city officials.

**AUDITEES RESPONSE**

*This has been done in the past and will be adequately reflected in the minutes in the future. We agree with the recommendations.*

|                          |
|--------------------------|
| <b>3. City Utilities</b> |
|--------------------------|

The city provides water and sewer to approximately 90 customers. Our review of the billing and receipt process and internal controls revealed the following areas of concern:

- A. The City Collector is responsible for billing, collecting, and recording all utility payments. Neither the board nor other personnel independent of the billing and collection functions provide adequate supervision or an independent review of the work performed by the City Collector.

To safeguard against possible loss or misuse of funds, internal controls should provide for reasonable assurance that all transactions are accounted for properly and assets are adequately safeguarded. An adequate system of internal controls requires segregation of duties. The Board of Aldermen should, at a minimum, designate someone independent of the process to perform and document periodic reviews of the records and procedures. Supervisory or independent review and approval of the rate calculations and adjustments helps to ensure such transactions are proper and reduces the possibility that improper or erroneous adjustments would go undetected.

- B. The City Collector does not record utility payments on the utility stubs. Utility stubs are discarded by the City Collector after the utility payment is received. Documentation of payments is noted on individual ledger sheets maintained for each customer account; however, the date of payment and actual amount received is not indicated on the ledger sheets. No review or reconciliation of recorded receipts to amounts transmitted to the City Clerk is performed.

To ensure all utility payments are properly recorded and transmitted, utility stubs should be retained noting the method of payment and the composition of the receipts should be reconciled to the amounts transmitted to the City Clerk.

- C. Monthly lists of delinquent customers are prepared by the City Collector; however, the lists do not include any prior delinquent amounts for each customer. In addition, the list is not provided to the Board of Aldermen to periodically review delinquent accounts.

To ensure adequate follow-up procedures are performed, a listing of all delinquent amounts should be maintained. In addition, the board should review delinquent accounts for collectibility.

- D. The city does not perform monthly reconciliations of total amounts billed, payments received, and amounts remaining unpaid for water and sewer services.

Monthly reconciliations are necessary to ensure that all accounting records balance, transactions have been properly recorded, any errors or discrepancies are detected on a timely basis. Complete documentation of the reconciliation and any corrections made should be retained to facilitate independent reviews.

- E. The city does not reconcile the total gallons of water billed to customers to the gallons of water pumped. The Utility Manager tracks gallons of water pumped and estimated the system was losing approximately 30 to 40 percent of its water pumped.

To help detect significant water loss on a timely basis and to help ensure all water usage is properly billed, the city should reconcile the total gallons of water pumped to the gallons of water billed on a monthly basis and investigate significant differences. The Public Service Commission generally recommends investigation if water usage not billed exceeds 15 percent.

- F. City residents are required to pay a meter deposit before receiving water and sewer services. The City Collector records the meter deposits on her individual account ledger sheets and the monies are deposited along with the other utility receipts. At December 31, 1998, the city had \$3,305 set aside in a separate savings account for meter deposits. Currently, the city collects a \$50 deposit, however, varying amounts ranging from \$5 to \$25 have been collected in past years. The total amount of meter deposits recorded on the individual account ledger sheets totals only \$1,800. This amount does not reconcile to the balance in the applicable bank account for several reasons:

1. The city is unsure of the amount of deposit paid by many residents.
2. Interest earned on the balances has accumulated in the account.

The city needs to identify all customer deposits currently held by the city and update the permanent record of this information. This detailed listing of customer deposits could then be reconciled to monies in the savings account. Without these reconciliations, the possibility of errors going undetected is increased.

- G. The city has not periodically performed formal reviews of the water and sewer rates. The city's sewer rate ordinance passed on May 20, 1997, set sewer rates for the next 12 months. The city has not formally reviewed the adequacy of sewer rates since that time. The mayor indicated water rates have been unchanged for about the last four years.

Section 67.042, RSMo 1994, provides that fees may be increased if supported by a statement of the costs necessary to maintain the funding of such service. However, the board did not prepare a statement of costs to maintain the sewer system as required when the rates were increased in 1997.

Water and sewer fees are user charges which should cover the cost of providing the related services. The city should perform periodic detailed reviews of the costs of providing these services and set rates appropriately. Preparation of a statement of costs would allow the city to determine the rates necessary to support current and future operations as well as provide documentation to customers of the rationale behind the rates.

**WE RECOMMEND** the Board of Aldermen:

- A. Adequately segregate the accounting duties of the City Collector or designate someone independent of the process to perform and document periodic reviews of the records, procedures and rate calculations and adjustments made to the water and sewer billings.
- B. Require the City Collector to record the method and date of payment on the utility stubs and reconcile them to the amounts transmitted to the City Clerk. The utility stubs should be retained to document the payments received.
- C. Maintain a listing of delinquent accounts which documents the respective delinquent amounts. In addition, the listing should be reviewed by the board.
- D. Perform monthly reconciliations of the amounts billed to amounts collected and delinquent accounts.
- E. Compare gallons of water pumped to gallons billed on a monthly basis. Any significant differences should be documented and investigated.
- F. Ensure the city maintains a listing of water meter deposits and periodically reconcile the listing to monies held by the city. Excess amounts identified should be transferred from the water meter bank accounts and made available for use in the Water and Sewer Fund.
- G. Perform periodic reviews of the costs to maintain utility services, and establish rates to ensure revenues are adequate. In addition, a statement of the costs to maintain funding of the service should be prepared, as required by state law, before enacting any rate increase.

**AUDITEES RESPONSE**

A-C,  
E&F. *We agree with these recommendations.*

D&G. *We will review these recommendations.*

|  |
|--|
| <b>4. Accounting Controls and Procedures</b> |
|--|

- A. The Board of Aldermen has not appointed a separate individual to serve as City Treasurer. The City Clerk also serves as City Treasurer, and with the exception of the functions related to the collection of utility payments, this individual is responsible for most of the record keeping duties of the city. These duties include depositing all utility monies, recording and depositing all other city monies, preparing invoices for payments, preparing and co-signing checks, performing bank reconciliations, and preparing monthly financial reports. Neither the board nor other personnel independent of the cash custody and record keeping functions provide adequate supervision or an independent review of the work performed by the city clerk.

Attorney General's Opinion No. 24, 1955 to Dodds, concluded that in a fourth-class city the holding of the positions of City Clerk, City Treasurer, and City Collector or any two of these three offices, by the same person at the same time would be incompatible. Holding any two of these three offices does not allow the segregation of duties necessary for a proper evaluation and review of financial transactions. The current procedures jeopardize the system of independent checks and balances intended by state law.

To safeguard against possible loss or misuse of funds, internal controls should provide reasonable assurance that all transactions are accounted for properly and assets are adequately safeguarded. Internal controls could be improved by segregating duties to the extent possible. In addition, the board should require someone independent of the cash custody and record keeping functions to perform periodic reconciliations of receipts to deposits, invoice files to checks issued, and review bank statements and bank reconciliations.

- B. Deposits are only made approximately once a month. On April 6, 1998, \$939 was deposited which included some receipts held over fifty days. Receipts are not always kept in a secured location until the deposit. In addition, checks and money orders are not restrictively endorsed until the deposit is prepared, rather than when received. To adequately safeguard receipts and reduce the risk of loss, theft, or misuse of funds, receipts should be restrictively endorsed upon receipt, kept in a secure location and deposited intact daily or when accumulated receipts exceed \$100.
- C. Monies are not deposited intact by the City Clerk and are sometimes held for extended periods of time. The City Collector is responsible for collecting utility payments and turning the monies over to the City Clerk for deposit. The City Clerk was only depositing a portion of the utility payments until November and December, 1998, when it appears she reimbursed the account for monies not previously deposited.

| December  |    | 3,174                            | 4,988                        | 1,814                                   | 252   |
| Totals    | \$ | 22,024                           | 22,276                       | 252                                     |   |

Based on our comparison of City Collector records to deposits made by the City Clerk, it appears the City Clerk would have had \$5,299 in undeposited receipts (including approximately \$1,100 in cash payments) at the end of October, 1998.

The City Clerk indicated she routinely cashed personal checks for herself and friends from utility receipts. She cashed one of her personal checks dated November 3, 1998 which was not deposited until December 16, 1998. It appears the City Clerk was borrowing from the city in this instance.

The City Clerk also indicated she would make loans to individuals by cashing their checks with city proceeds and holding their checks until they indicated they could cover their checks or replace them with cash. The City Clerk indicated several of the individuals did not cover their checks and she personally paid back the amounts not repaid to the city.

The City Clerk's explanation is not supported by the bank deposits reviewed during this time period. We were unable to identify any checks or cash deposited that would represent repayment by the City Clerk. Due to the lack of controls and the inadequacy of the city records, we have no assurance that payments received by the city were properly deposited.

These practices represent a poor control over cash receipts and should be discontinued. To ensure proper control and maintain accountability over cash, receipts should be deposited intact on a timely basis.

- D. At December 31, 1998, the city had six bank accounts with a total cash balance of approximately \$27,000. Of this amount, the city had approximately \$10,500 in non-interest bearing checking accounts. To maximize the interest earnings of the city, monies should be maintained in interest bearing accounts when possible.

- E. Checks issued on the bank accounts require signatures of both the City Clerk and Mayor; however, checks are sometimes signed in advance by the Mayor. Signing checks in advance does not allow for proper review of the documentation to support the disbursement and diminishes the control intended by dual signatures.
- F. Some employees and officials who collect monies or sign checks are not adequately bonded. The City Clerk and City Collector are each covered by a \$2,500 bond; however, this bond coverage may not be adequate based on annual receipts exceeding \$44,000 in 1998. In addition, the Mayor signs checks but is not bonded. The city's revenue bond covenant requires all officers and employees of the city handling funds and accounts to be bonded in each fiscal year by an amount not less than the total amount of principal and interest becoming due on all obligations of the city during the fiscal year (approximately \$6,000). Failure to properly bond all persons with access to monies exposes the city to risk of loss.
- G. Voided checks are not always properly defaced and retained. Voided checks are torn up and discarded. To ensure all checks are properly accounted for, all voided checks should be properly defaced and retained.

**WE RECOMMEND** the Board of Aldermen:

- A. Consider appointing separate individuals to the position of City Clerk and City Treasurer. If this is not possible, at a minimum, procedures for an adequate independent review of the record keeping functions should be established.
- B. Restrictively endorse checks and money orders immediately upon receipt, keep receipts in a secure location until deposited, and deposit all monies intact daily or when receipts exceed \$100.
- C. Require all receipts be deposited intact and ensure the practice of cashing personal checks and making loans is discontinued.
- D. Maintain city funds in interest bearing accounts when possible.
- E. Discontinue the practice of signing checks in advance.
- F. Review the amount of bond coverage for all individuals with access to monies and consider obtaining bond coverage for the Mayor.
- G. Deface and retain all voided checks.

**AUDITEES RESPONSE**

*A&F. We will review this recommendation.*

*B&D. We are working on implementing these recommendations.*

*C. We will review this situation and take appropriate action. The City Clerk no longer has access to utility proceeds.*

*E&G. We agree with these recommendations.*

|   |
|---|
| <b>5. Ordinances, Board Meetings, and Records</b> |
|---|

A. Our review of the city ordinances disclosed the following concerns:

1. Some of the city's ordinances could not be accounted for and the city indicated one of the ordinance books was missing. The city was unable to locate the ordinances establishing water rates and water hookup fees. Also, a review of the city's existing ordinance book indicated ordinances are not sequentially numbered and there was no index of all ordinances passed by the city. The city is unable to determine the status of some of the ordinances.
2. Compensation and duties of all city officials and employees are not set by ordinance. The city has ordinances for the water system related compensation and duties of the City Collector and Utility Manager, however, the ordinances do not address sewer related compensation and duties. Also, the city has not adopted an ordinance establishing the term of office for the City Clerk. Section 79.270 and 79.290, RSMo 1994, require the compensation and duties of city officials to be set by ordinance. Section 79.320, RSMo 1994, requires the term of office of the City Clerk be fixed by ordinance.
3. The city has not prepared ordinances to document the approved tax levy for each year. Section 94.210, RSMo 1994, states the board of aldermen shall fix the annual tax rate levy by ordinance for each tax year. In addition, the city does not hold public hearings on the proposed property tax rates. Section 67.110, RSMo 1994, requires each governing body to hold at least one public hearing prior to approval of the proposed tax rates at which citizens may be heard. The section also provides guidance on what information is to be included at the public hearing. Ordinances have also not been established to set the city's current water meter deposit amount.

Since the ordinances represent legislation which has been passed by the Board of Aldermen to govern the city and its residents, it is important that the city ordinances be complete, well-organized, and current. Such items as duties and compensation of city officials and the annual tax levy should be set forth in the ordinances to give the taxpayers information on how the city is to be governed.

- B. The Board of Aldermen holds regular meetings on the third Tuesday of every month. Notice of the regular board meeting and the meeting's agenda is not posted. Section 610.020, RSMo, 1994 requires notice of each meeting and its tentative agenda to be given at least twenty-four hours in advance, or if not feasible, reasons are to be documented in the board minutes.
- C. The board minutes do not identify the disbursements approved by the board at its monthly meetings. The only reference to board approval is a notation that a motion was made and approved to pay bills.

To adequately document the board's review and approval of all disbursements, a complete and detailed listing of bills should be prepared, signed, or initialed by the aldermen to denote their approval, and retained in the official minutes.

- D. The city did not properly retain some city records. Minutes for several council meetings could not be located. In addition, the City Collector discarded all utility stubs after collections were turned over to the City Clerk.

All city financial records should be retained at least until such time as they are audited. All significant records (ordinances, minutes, contracts, etc.) should be maintained in a secure location.

- E. The city does not have a formal policy regarding public access to city records. A formal policy regarding access to city records would establish guidelines for the city to make records available to the public. This policy should establish a person to contact and an address to mail requests for access to records. Section 610.023, RSMo 1994, lists requirements for making city records available to the public.

**WE RECOMMEND** the Board of Aldermen:

- A. Ensure a complete and updated set of ordinances is maintained. This would include passing new ordinances where appropriate and required. In addition, the city should consider establishing an index of all future city ordinances passed and rescinded. Also, the Board should hold public hearings on proposed property tax rates as required by state law.
- B. Ensure proper notification and agendas for public meetings are given or reasons for any deviation are documented in the minutes in accordance with applicable statutes.
- C. Ensure the approval of all disbursements is adequately documented in the board minutes.
- D. Require records to be retained in a secure location at least until such time as they are audited or are no longer relevant.
- E. Establish formal written policies and procedures regarding public access to city records.

**AUDITEES RESPONSE**

A,C

*&D. We agree with these recommendations.*

*B. This was done in the past and we will ensure it is done in the future.*

*E. We have always provided access to records and will consider implementing a formal policy.*

- A. The city does not prepare and adopt annual budgets. Section 67.010, RSMo 1994, requires the preparation of an annual budget which shall present a complete financial plan for the ensuing year.

A complete and well-planned budget, in addition to meeting statutory requirements, can serve as a useful management tool by establishing specific cost and revenue expectations for each area of city operations. A budget can also provide a means to effectively monitor actual costs by periodically comparing budgeted amounts to actual expenditures. A complete budget should include separate revenue and expenditure estimations by fund, and include the beginning available resources and reasonable estimates of ending available resources. The budget should also include a budget message and comparisons of actual or estimated revenues and expenditures for the two preceding fiscal years.

- B. Section 250.150, RSMo 1994, requires the city to obtain annual audits of the combined waterworks and sewer system. In July 1997, the city contracted with a CPA firm to audit the city's financial statements for the two years ended December 31, 1996. As of June 22, 1999, only the audit report for the year ended December 31, 1995 had been issued (issued on November 23, 1998). The city is not ensuring timely audits are performed. The city has not made arrangements for the audit of the two years ended December 31, 1998.

To ensure timely audits, the city should periodically solicit proposals for annual audit services and ensure the contracts require the timely issuance of the audit reports.

- C. The city prepares and posts at city hall an annual financial statement. However, the city has not published semi-annual financial statements as required by state law. Section 79.160, RSMo 1994, requires the Board of Aldermen to semi-annually publish a full and detailed statement of the receipts, expenditures, and indebtedness of the city, in a newspaper in the city. In addition, the receipts and disbursements on the financial statement posted for the year ending December 31, 1998, were not complete and accurate. For example, the financial statement did not include \$1,000 in utility receipts that were deposited into the Sewer Replacement and Extension Reserve and the Sewer Bond Reserve funds. Also, the financial statement did not present the city's indebtedness for the revenue bonds of \$96,110.

Accurate and complete semi-annual published financial statements are necessary to comply with state law and to keep the citizens informed of the financial activity and condition of the city.

- D. The city does not submit annual financial reports to the State Auditor's Office as required by state law. The last financial report submitted was for the year ended December 31, 1986. Section 105.145, RSMo 1994, requires political subdivisions to file an annual report of the financial transactions of the political subdivision with the State Auditor's Office.

**WE RECOMMEND** the Board of Aldermen:

- A. Prepare annual budgets in compliance with state law, and make periodic comparisons between budgeted and actual revenues and expenditures.
- B. Periodically solicit proposals for annual audit services and ensure the contracts require the timely issuance of the audit reports.
- C. Publish complete and accurate semiannual financial statements for all city funds as required by state law.
- D. Submit annual financial reports to the State Auditor's Office as required by state law.

**AUDITEES RESPONSE**

A, C  
& D. *We agree with these recommendations.*

B. *We contacted several firms initially to provide audit services, however, only one firm responded or was qualified. In the future, we will ensure audit contracts require timely issuance of audits.*

|           |   |
|-----------|---|
| <b>7.</b> | <b>Restricted Revenues and City Streets</b> |
|-----------|---|

- A. During the year ended December 31, 1998, the city deposited \$10,081 of state motor vehicle-related receipts into the General Fund and incurred only \$580 of street-related expenditures. During the first four months of 1999, the city opened a separate account for motor vehicle related revenues and deposited \$1,097 of the \$2,088 received into this account. Article IV, Section 30 of the Missouri Constitution, requires that motor vehicle-related revenues apportioned by the state of Missouri be expended for street-related purposes.

To ensure compliance with the Missouri Constitution, the city should ensure all of these revenues are used only for appropriate purposes.

- B. The city has not established a city-wide plan for the construction, repair, or maintenance of streets. A formal plan of street improvements noting the more critical needs of the city is needed to support the expenditures made by the city. This plan is necessary to show whether financial resources are sufficient to meet the critical needs, to provide financial support for budget preparation and expenditures for street repairs, and to answer any questions raised by the public.

**WE RECOMMEND** the Board of Alderman:

- A. Ensure all of the state motor vehicle-related receipts are accounted for in a separate fund and spent in accordance with applicable laws and regulations. The board should determine if state motor vehicle-related receipts were used for street-related expenses and transfer applicable amounts to the street fund for any unexpended balance.
- B. Prepare formal annual plans for maintenance and improvement of city streets.

**AUDITEES RESPONSE**

- A. *We will review this recommendation.*
- B. *We do this on an informal basis.*

|                         |
|-------------------------|
| <b>8. City Property</b> |
|-------------------------|

The city has not prepared and maintained permanent, detailed property records for general fixed assets, including the cost of land, buildings, equipment, and furniture owned by the city. In addition, the city has not prepared and maintained permanent, detailed property records for the water and sewer systems. Also, annual physical inventories are not performed.

Property records for general fixed assets are necessary to ensure accountability for all items purchased and owned and for determining the proper amount of insurance coverage.

To develop appropriate records and procedures for general fixed assets and the fixed assets of the sewer system, the city needs to undertake a comprehensive review of all property owned by the city. Assets should be counted, tagged for specific identification, and recorded by description and serial number in a detailed property ledger at historical cost or estimated historical cost if the original cost is not available. The city should properly record all fixed asset transactions, and ensure the accuracy of the recorded fixed assets. Periodically, the city should take physical counts of its assets and compare to the detailed records.

**WE RECOMMEND** the Board of Aldermen establish property records for general fixed assets and the fixed assets of the water and sewer systems that include all pertinent information for each asset, such as tag number, description, cost, acquisition date, location, and subsequent disposition. In addition, annual physical inventories should be performed.

**AUDITEES RESPONSE**

*We agree with this recommendation.*

This report is intended for the information of the city's management and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

\* \* \* \* \*

SPECIAL REVIEW OF  
SHERIFF'S OFFICE  
MILLER COUNTY, MISSOURI

PERIOD JANUARY 1, 1999 THROUGH AUGUST 11, 1999  
AND THE YEAR ENDED DECEMBER 31, 1998

**From The Office Of State Auditor  
Claire McCaskill**

# AUDIT REPORT

Office Of The  
State Auditor Of Missouri  
Claire McCaskill

January 2000

**The following problems were discovered as a result of a review conducted by our office of the Miller County Sheriff's Department.**

---

On May 16, 1998, the Sheriff held a sale of surplus and unclaimed property. The sale advertisement stated that more than 200 surplus and unclaimed items were to be sold; however, a complete listing of all items to be sold was not prepared and retained. In addition, a complete listing of all monies received was not maintained. The final settlement record signed by the auctioneer indicated sale proceeds totaled \$5,818. However, copies of receipt slips retained by the Sheriff's office totaled only \$5,661. Without a complete listing of items to be sold and those actually sold and for what amounts, the Sheriff has less assurance that all sale proceeds were accounted for properly.

Some sale proceeds were not collected the day of the sale. The Sheriff's father did not pay for his purchases (\$822) until a week later, and the Sheriff did not pay for items he purchased (\$275) at the sale until July 1998. In May 1999, the Sheriff paid \$260 to the County Treasurer to cover a shortage that was noted when a reconciliation was prepared of sale proceeds to amounts turned over to the County Treasurer.

Also, at the time of the sale, the Sheriff's procedure was to charge a \$5 gun permit fee for all gun permits issued, except for those permits issued to individuals involved in law enforcement or the judicial system. However, the Sheriff did not require his father to pay gun permit fees for the six permits issued to him for guns purchased at the sale. The Sheriff stated that his father is not involved in law enforcement or the judicial system.

Balances on deposit for inmates exceeded the balance in the Inmate Account by \$148. From June 1998, when this account was opened, until August 1999, more than \$20,000 of commissary inventory was purchased from this account to be resold to inmates at a ten percent mark up. However, as of August 1999, the balance in the account showed no profit, and no monies had been paid over to the county's General Revenue Fund.

In addition, improvement is needed in the accounting controls and procedures for other receipts and activities of the Sheriff's office. Cash receipt and disbursement records are not complete, and bank reconciliations are not performed for the various accounts.

Three bonds totaling \$1,580 were collected by the Sheriff's office and not deposited. Two were discovered missing when the court notified the office it had not received the bonds. A third missing bond was detected during our audit. Many of these concerns were also noted in a prior report issued by our office.

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

County Commission of Miller County, Missouri  
and  
Sheriff of Miller County, Missouri

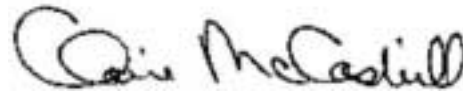

We have conducted a special review of the records, accounts, and procedures of the Sheriff's office of Miller County, Missouri. The scope of the special review included, but was not limited to, the period January 1, 1999 through August 11, 1999 and the year ended December 31, 1998. The objectives of this review were to:

1. Review and evaluate certain controls and procedures regarding the collection of and accounting for various receipts.
2. Review compliance with certain constitutional provisions, statutes, and attorney general's opinions.
3. Follow up on prior audit recommendations.

Our review was made in accordance with applicable generally accepted government auditing standards and included such procedures as we considered necessary in the circumstances. In this regard, we reviewed the financial records and procedures of the Sheriff's office, interviewed personnel of the office, and examined other records and documents as we considered necessary for the review.

Our review was limited to the specific matters described above and was based on the selective tests and procedures considered appropriate in the circumstances. Had we performed additional procedures, other information might have come to our attention which would have been included in this report.

The accompanying Management Advisory Report presents our findings, comments, and recommendations arising from our audit of the Sheriff's office of Miller County, Missouri.

A handwritten signature in black ink, reading "Claire McCaskill". The signature is written in a cursive, flowing style.

Claire McCaskill  
State Auditor

November 4, 1999 (fieldwork completion date)

## EXECUTIVE SUMMARY

SPECIAL REVIEW OF  
SHERIFF'S OFFICE  
MILLER COUNTY, MISSOURI  
EXECUTIVE SUMMARY

Complete listings of items offered for sale and monies received were not retained for a sale of surplus and unclaimed property in May 1998. Some sale proceeds were not collected the day of the sale. The Sheriff's father did not pay for his purchases (\$822) until a week later, and the Sheriff did not pay for items he purchased (\$275) at the sale until July 1998. In May 1999, the Sheriff paid \$260 to the County Treasurer to cover a shortage that was noted when a reconciliation was prepared of sale proceeds to amounts turned over to the County Treasurer.

The total of the monies held for individual inmates exceeded the balance in the Inmate Account by \$148. From June 1998, when this account was opened, until August 1999, more than \$20,000 of commissary inventory was purchased from this account to be resold to inmates at a ten percent mark up. However, as of August 1999, the balance in the account showed no profit, and no monies had been paid over to the county's General Revenue Fund.

In addition, improvement is needed in the accounting controls and procedures for other receipts and activities of the Sheriff's office. Cash receipt and disbursement records are not complete, and bank reconciliations are not performed for the various accounts. Three bonds totaling \$1,580 were collected by the Sheriff's office and not deposited. Two were discovered missing when the court notified the office it had not received the bonds. A third missing bond was detected during our audit. Many of these concerns were also noted in our prior Management Advisory Report.

Tom Russell serves as Sheriff of Miller County.

## MANAGEMENT ADVISORY REPORT

SPECIAL REVIEW OF  
SHERIFF'S OFFICE  
MILLER COUNTY, MISSOURI  
MANAGEMENT ADVISORY REPORT

**1.**

**Sheriff's Sale**

On May 16, 1998, the Sheriff held a sale of surplus and unclaimed property. The sale advertisement stated that more than 200 surplus and unclaimed items were to be sold; however, a complete listing of all items to be sold was not prepared and retained. In addition, a complete listing of all monies received was not maintained. The final settlement record signed by the auctioneer indicated sale proceeds totaled \$5,818. However, copies of receipt slips retained by the Sheriff's office totaled only \$5,661. Without a complete listing of items to be sold and those actually sold and for what amounts, the Sheriff has less assurance that all sale proceeds were accounted for properly.

Some sale proceeds were not collected the day of the sale, and the monies were not deposited intact. Cash was withheld from the first deposit and used to pay expenses related to the sale totaling \$678. This included \$441 of auctioneer commissions, \$200 of payments to Sheriff's office personnel for working at the sale and \$37 for meals. These payments should have been made through the county's warrant or payroll process. Of the \$200 payment, the Sheriff stated he received \$50. The Sheriff should not have received compensation in addition to his authorized salary.

On May 19, 1998, \$3,818 of the \$5,140 total to be deposited (\$5,818-\$678) was deposited. The Sheriff indicated his father had purchased some items at the sale but was not able to take them that day. He returned at a later date to pick them up, and he paid for the items at that time. His check for \$822, which was dated May 24, 1998, was deposited June 2, 1998. On July 7, 1998, \$275 of cash was deposited which the Sheriff indicated was his payment for items he had purchased at the sale. Total deposits as of July 7, 1998, then totaled \$4,915. It is not clear what happened to the remaining \$225 (\$5,140 - \$4,915) of receipts.

From May 1998 to July 1998, disbursements from the account totaled \$1,598, and included two invoices totaling \$209 which dated back to June and July 1997. These disbursements should have been processed through the county warrant system and in a timely manner. In addition, \$35 had been spent on flower purchases for employees. Sale proceeds remaining in the bank account totaling \$3,282 were turned over to the County Treasurer on July 7, 1998. Apparently sometime after the sale, a report was prepared to reconcile the sale proceeds to amounts paid to the Treasurer. Based on this report sale proceeds totaling \$260 were still due to the Treasurer. On May 3, 1999, the Sheriff personally paid \$260 to the Treasurer to cover the shortage (\$225 of undeposited receipts and \$35 of flower purchases).

At the time of the sale, the Sheriff's procedure was to charge a \$5 gun permit fee for all gun permits issued, except for those permits issued to individuals involved in law enforcement or the judicial system. However, the Sheriff did not require his father to pay gun permit fees for the six permits issued to him for guns purchased at the sale. The Sheriff stated that his father is not involved in law enforcement or the judicial system.

**WE RECOMMEND** the Sheriff maintain complete listings of items offered for sale and monies received for any future sales. In addition, a report of each sale should be prepared and all sale proceeds deposited and/or paid to the County Treasurer in a timely manner, and gun permit fees need to be collected for all applicable gun permits.

### **AUDITEE'S RESPONSE**

*The Sheriff indicated this was the first auction the county or his office had held. In the future, they will certainly keep all receipt slips. They did have a complete listing of items to be sold, but lost it when the computer crashed. They will keep a hard copy and a back up disk in the future.*

*All monies will be deposited in the bank and disbursed by check in the future.*

*The Sheriff believes that while setting up the sale was a part of his duties, conducting the sale was not. He has, however, upon advice of his attorney, returned his \$50 and the \$37 to the county. The older bills paid from the account were towing charges related to the sale items and were paid from sale proceeds.*

*Regarding gun permits, everyone is now charged a \$5 gun permit fee.*

|  |
|--|
| <b>2. Accounting Controls and Procedures</b> |
|--|

- A. Accounting duties are not adequately segregated. Currently, The Office Manager is primarily responsible for receiving, recording, and depositing all monies and for preparing and signing all checks. There were no independent reviews of the work performed by this employee.

To safeguard against possible loss or misuse of funds, internal controls should provide reasonable assurance that all transactions are accounted for properly and assets are adequately safeguarded. Internal controls would be improved by segregating the duties of receiving and depositing monies from that of recording receipts and preparing disbursements. If proper segregation of duties cannot be achieved, at a minimum, procedures for adequate independent review should be established.

- B.1. Receipt slips were not issued for some monies received and redi-form receipt slips were issued for some monies rather than official, pre-numbered receipt slips. In addition, the numerical sequence of receipt slips was not accounted for properly. Some receipt slips were not issued in order, some were skipped and not properly defaced to prevent later use, and some voided receipt slips were not properly retained.

To ensure all monies are properly handled, official, pre-numbered receipt slips should be issued for all monies received, and receipt slips issued should be reconciled to bank deposits. The reconciliation of receipt slips to deposits should include agreeing the composition of receipt slips (i.e. cash, checks, and money orders) to the composition of deposits. In addition, the numerical sequence of receipt slips should be accounted for properly.

2. Receipts were not deposited in a timely manner. Deposits into the Inmate and Miscellaneous Accounts were made only three to four times per month and ranged from \$321 to \$16,790. Deposits into the Bond Account were made only once or twice per week.

To ensure all monies are properly accounted for and to adequately safeguard cash receipts, deposits should be made intact daily or when accumulated receipts exceed \$100.

During the audit period, at least three cash bonds were received but were not deposited. One bond in the amount of \$1,200 was received June 12, 1998, but discovered missing. Proceeds from the May 1998 sale of surplus and unclaimed property were used to pay this amount to the court. Another bond in the amount of \$330 was received November 12, 1998, but discovered missing. The officer who receipted those monies reimbursed the Sheriff's office for the shortage in October 1999. Both of these shortages were noted by the Sheriff's office when the respective court notified the Office Manager that the bond had not been remitted to them. A third bond totaling \$50 received October 2, 1998, has also never been deposited and is not on hand. That shortage was not detected by the Sheriff's office.

These shortages could have been prevented or detected in a more timely manner if the above recommendations which were also made in our report issued for the three years ended December 31, 1997, had been implemented. The Sheriff responded in that report that those recommendations had been implemented.

- C. As of August 11, 1999, the Sheriff maintained six bank accounts. Cash control ledgers or other listings of receipts and disbursements were not complete and periodic book balances were not maintained for the various accounts. In addition, formal bank reconciliations were not prepared for any of the accounts.

Complete and accurate cash control records are necessary to provide accountability over funds, provide summarized financial information, and facilitate reconciliations between bank and book balances. Formal bank reconciliations are necessary to ensure accounting records agree with bank records and to detect errors in a timely manner.

- D. Monthly listings of open items (liabilities) are not prepared for the Inmate, Fine and Cost, and Bond and Garnishment Accounts. We prepared open items listings for these accounts as of August 11, 1999, and noted the following concerns:

1. The total of the monies held for individual inmates exceeded the balance in the Inmate Account by \$148. The Inmate Account was opened in June 1998. Between June 1998 and July 1999, more than \$20,000 worth of inventory was purchased for the commissary. The employee responsible for providing the commissary service stated that all inventory was marked up ten percent. Assuming that all inventory was sold, approximately \$2,000 of profit should have been generated during this period. However, no commissary profit was ever turned over to the county, and the balance in the Inmate Account is not sufficient to account for any profit.

The Inmate Account open items listing includes some balances that are being held for inmates which have been released. The Sheriff should attempt to refund

these monies. Any monies remaining unclaimed should be disposed of in accordance with state law.

2. Total open items for the Fine and Cost Account exceeded the cash balance by \$3,081. This shortage is less than the shortage noted in our prior audit. The open items listing includes partial payments on cases dating back to 1991. If it appears unlikely the remaining amount owed on these cases will be collected, a court order should be obtained to allow the balances in these cases to be applied to costs or prorated among the various court costs, if necessary. Attorney General Opinion No. 26, 1973 to Osborne, concluded that "If, when liability has been established, accrued costs cannot be collected in full, charges not having any statutory priority or not allocated under court rule should be prorated." Old inactive case balances increase the volume of cases which must be monitored and controlled, putting a greater burden on limited personnel resources. In addition, failure to prorate available monies when it is unlikely the balance will be collected, deprives the state and county of the use of those monies.
3. The cash balance in the Bond and Garnishment Account exceeded the identified open items by \$837.

Monthly listings of open items should be prepared and reconciled to cash balances for each account to ensure monies have been properly recorded and handled and sufficient funds are available for the payment of all liabilities. Differences identified through the reconciliation process should be resolved in a timely manner. Unidentified or unclaimed monies remaining in the accounts should be disbursed in accordance with state law.

- E.1. The Sheriff maintains custody of a Training and Equipment Account. Receipts into this account were primarily donations and proceeds from the annual Sheriff's picnic. On three occasions, the Sheriff used these monies to provide a payroll advance to an employee. In all three instances, the advance was reimbursed by the employee. Employees were also allowed to purchase law enforcement related equipment through this account and make reimbursement over a period of time. The Sheriff did not retain adequate supporting documentation for 6 of the 24 disbursements reviewed. At our request, the Sheriff obtained copies of invoices from the vendors for these six items.

In addition, the Sheriff maintains custody of a Petty Cash Fund bank account. Receipts into this account were primarily proceeds of the May 1998, Sheriff's sale and commissions from vending machines located in the Sheriff's office. On four occasions these monies were used to purchase flowers for employees due to death or illness.

These monies represent accountable fees which should be turned over to the County Treasurer. There is no statutory authority for the Sheriff to maintain such accounts outside the county treasury. In addition, Attorney General's Opinion No. 45, 1992 to Henderson, states, "... sheriffs of third class counties are not authorized to maintain a bank account for law enforcement purposes separate from the county treasury." The remaining account balances should be transferred to the County Treasurer, and future donations and picnic proceeds should be transmitted to the County Treasurer to be spent for law enforcement purposes.

2. Bank interest totaling approximately \$1,300 has accumulated in the various bank accounts as of July 31, 1999. These monies also represent accountable fees which should be turned over to the County Treasurer.
- F. Upon incarceration, any monies in the custody of an inmate are to be receipted for deposit into the Inmate Account. However, inmates who are held only 12 to 48 hours are often given a cash refund of their monies. Adequate supporting documentation was not retained for some cash refunds.

To facilitate the reconciliation of receipt slips issued to amounts deposited and to ensure all monies are properly accounted for, adequate supporting documentation should be obtained for all cash refunds.

- G.1. The Sheriff provides commissary services to inmates whereby inmates are allowed to purchase snacks and personal items. The Sheriff's office does not maintain perpetual inventory records of commissary items. To adequately account for commissary merchandise, a detailed inventory ledger should be maintained on a perpetual basis. Perpetual inventory records should document the beginning balance for each item, items purchased, items sold or otherwise disposed of, and the ending balance of each item. Periodic physical inventory counts should be performed and reconciled to perpetual inventory records. Loss, misuse, or theft of commissary inventory may go undetected without adequate inventory records.
2. The Sheriff maintains custody of the revenues generated through the sale of commissary items. These monies are held in the Inmate Account and are used to replenish the commissary inventory. Commissary proceeds represent accountable fees which should be turned over to the County Treasurer. Invoices to replenish the commissary inventory should then be paid by the county.

Conditions similar to parts A. through E. were noted in our prior report.

**WE RECOMMEND** the Sheriff:

- A. Adequately segregate duties or establish procedures for independent review.
- B.1. Issue official, prenumbered receipt slips for all monies received and reconcile them to bank deposits, including composition. In addition, the numerical sequence of the receipt slips should be accounted for properly.
2. Deposit receipts daily or when accumulated receipts exceed \$100.

In addition, the Sheriff should obtain reimbursement of the \$50 bond.

- C. Maintain complete and accurate cash control records and perform monthly bank reconciliations for the various accounts.
- D. Prepare and reconcile open items listings to cash balances monthly and investigate any differences.

In addition, we recommend the Sheriff:

1. Ensure reimbursement is obtained for the \$148 shortage in the Inmate Account. The Sheriff should attempt to refund balances to inmates which have been released and any monies remaining unclaimed should be disposed of in accordance with state law.
  2. Along with the Associate Judge, review the older cases and determine the appropriate disposition of monies being held on inactive cases in the Fine and Cost Account.
  3. Dispose of any unidentified monies remaining in the Bond Account.
- E. Turn over custody of the Training and Equipment Account and the Petty Cash Fund bank account and all future revenues to the County Treasurer. In addition, accumulated interest and all future interest should be turned over.
- F. Obtain adequate supporting documentation for any refunds not made by check.
- G.1. Maintain perpetual inventory records for commissary items and reconcile inventory records to periodic physical inventory counts. Any discrepancies should be investigated in a timely manner.
2. Turn over commissary proceeds to the County Treasurer, periodically. In addition, invoices to replenish the commissary inventory should be paid by the county.

#### **AUDITEE'S RESPONSE**

- A&C. They now have an additional office employee and will be able to implement these recommendations.*
- B. This needs to be done and will be done. The Sheriff will personally reimburse the bond account \$50.*
- D.1. They are reviewing the inmate accounts for indigents who were provided with commissary items at no cost. They will bill the county for these items. And, they also believe some items purchased were given to all inmates and not resold as commissary items.*
- 2. They will meet with the Judge and work to close out this account.*
  - 3. This will be done.*
- E. The Petty Cash Account has been closed and the Training and Equipment Account will be turned over to the Treasurer, as well as any interest earned.*
- F. All monies will be deposited and disbursed by check.*
- G. They are in the process of contracting with a company to provide commissary services. Profit from the sales will be paid to the county each time the vendor is paid.*

This report is intended for the information of the management of the office of Sheriff of Miller County, Missouri and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

FOLLOW-UP ON STATE AUDITOR'S PRIOR RECOMMENDATIONS

SPECIAL REVIEW OF  
SHERIFF'S OFFICE  
MILLER COUNTY, MISSOURI  
FOLLOW-UP ON STATE AUDITOR'S PRIOR RECOMMENDATIONS

This section reports follow-up action taken by the Miller County Sheriff's office on recommendations made in the Management Advisory Report (MAR) of our report of Miller County issued for the three years ended December 31, 1997. The prior recommendations which have not been implemented, but are considered significant, have been repeated in the current MAR. Although the remaining unimplemented recommendation has not been repeated, the Sheriff should consider implementing this recommendation.

Sheriff's Accounting Controls and Procedures

- A. The Sheriff maintained several bank accounts for donations and LET fees.
- B.1. Receipt slips were not issued for some monies.
  - 2. Receipts were sometimes not deposited in a timely manner. At February 9, 1998, the bookkeeper was holding unidentified cash receipts totaling \$320.
  - 3. Checks and money orders were not restrictively endorsed until deposited.
- C. Monies deposited into the miscellaneous bank account were not paid over to the county in a timely manner.
- D. The Sheriff held numerous bank accounts, including four inactive accounts. Bank reconciliations were not prepared, and periodic check register or cash control totals were not maintained for any of the accounts.
- E. Monthly listings of open items were not prepared for the fine and cost account and the bond and garnishment account.
- F. Accounting duties were not adequately segregated, and independent reviews of the work performed by the bookkeeper were not performed.
- G. Access to seized property was not restricted to an official custodian. Centralized records of seized property were not maintained, and physical inventories were not performed and reconciled to seized property records.

Recommendation:

The Sheriff:

- A. Remit all monies in the Training and Equipment, LET, and DARE accounts to the County Treasurer for deposit to the county's General Revenue, LET, and DARE funds, as applicable. Expenditures should be authorized by the Sheriff and made through the County Commission's normal expenditure process as provided for in the budgets of the various funds.
- B.1. Issue receipt slips for all monies received.

2. Deposit receipts daily or when accumulated receipts exceed \$100. In addition, the Sheriff should determine the proper disposition of all unidentified monies. Balances which remain unidentified should be disbursed in accordance with state law.
  3. Restrictively endorse all checks immediately when received.
- C. Turn over fees to the county monthly as required by state law.
  - D. Maintain daily check register or cash control totals and perform bank reconciliations monthly for the various bank accounts. In addition, the Sheriff should close all inactive accounts with residual balances.
  - E. Prepare monthly listings of fine and cost and bond and garnishment open items and reconcile such listings to the cash balances. Any differences should be investigated and resolved.
  - F. Adequately segregate accounting and bookkeeping duties to the extent possible and ensure that documented independent reviews of work are performed.
  - G. Establish an official custodian for evidence and other seized property and maintain a centralized inventory record of all property received including information such as a description, persons involved, current location, case number, and disposition of such property. An inventory of all items on hand should be performed to ensure that items are properly identified, tagged, and logged. Periodic inventories should be performed by an independent person to ensure inventory on hand is properly logged and the log contains entries for all inventory in storage.

Status:

- A. Partially implemented. Monies in the LET and DARE accounts were remitted to the Treasurer. However, custody of the Training and Equipment Account and the Petty Cash Fund bank accounts has not been turned over to the Treasurer. See MAR No. 2.
- B.1  
- 2,  
E &
  - F. Not implemented. See MAR No. 2.
  - B.3.  
& C. Implemented.
  - D. Partially implemented. All inactive accounts have been closed. However, check registers or cash control records are not maintained and bank reconciliations are not performed. See MAR No. 2.

- G. Partially implemented. One employee has been assigned as custodian of evidence and a centralized inventory record was established in June 1998. However, a periodic inventory has not yet been performed and some items in storage have not been identified to a specific case and added to the inventory record. Although not repeated in the current MAR, our recommendation remains as stated above.

TWENTY-FIRST JUDICIAL CIRCUIT  
CITY OF BRECKENRIDGE HILLS, MISSOURI  
MUNICIPAL DIVISION  
TWO YEARS ENDED DECEMBER 31, 1998

**From The Office Of State Auditor  
Claire McCaskill**

Report No. 2000-05  
January 24, 2000

AUDIT REPORT

Office Of The  
State Auditor Of Missouri  
Claire McCaskill

January 2000

**During our audit of the Twenty-First Judicial Circuit, City of Breckenridge Hills, Missouri, Municipal Division, we identified certain management practices which we believe could be improved.**

Cash receipts for bonds totaling at least \$13,978 were received and not deposited during the period January 1, 1997 through August 31, 1998. A bond ledger showing receipt, disbursement, and balance for each bond was not maintained. In addition, bond monies were not deposited intact on a timely basis, and monthly bank reconciliations were not prepared. These factors helped conceal the misappropriation of funds.

These misappropriations could have been prevented or detected on a more timely basis if adequate oversight and reviews had been performed and internal controls had been established.

The city of Breckenridge Hills Municipal Division accepts cash, checks, and money orders for payment of bonds. Cash bond payments are collected by the police department, recorded on a prenumbered bond form and a bond log, and are transmitted to the Court Clerk within a day of receipt. Check and money order payments for bonds received from other courts are also recorded on the prenumbered bond forms and police bond log by the Court Clerk. The Court Clerk deposits bond receipts into a separate bank account. Bonds are disbursed as the applicable case is settled in court.

In the Spring of 1999, the city hired a consultant to install an updated computerized accounting system for the court. As part of the implementation of the new system, the consultant prepared a listing of bond open items (liabilities) which was reconciled to the bond bank account balance. The open items balance exceeded the bank account balance by approximately \$14,000 at May 31, 1999. This difference was subsequently identified as bond monies received which had not been deposited.

Prior to May 1999, a bond ledger showing bond receipts, disbursements, and open balances was not maintained, monthly listings of open items were not being prepared, and the bond bank account was not being reconciled. The Court Clerk listed the bond receipts individually on deposit stubs indicating the corresponding bond form number next to each entry. Deposit stubs functioned as both a record of bonds receipted and a record of bonds deposited by the court. Though the police department also maintained a log of bonds receipted, there was no independent reconciliation of bonds collected by the police department to bonds deposited by the Court Clerk. In addition, the Court Clerk did not issue a receipt slip to the police department indicating which bonds had been transmitted to her.

(over)

YELLOW SHEET

Based on police department receipt records and various other records that were available, \$13,978 of bond monies collected by the police department from January 1, 1997 through August 31, 1998, were not recorded on deposit stubs or deposited by the Court Clerk. The Court Clerk responsible for depositing these monies was removed from that position on August 31, 1998 and resigned from the city in December 1998, prior to these discrepancies being discovered.

We recommend the municipal division, along with the city, continue to work with law enforcement officials regarding any criminal prosecution and to obtain restitution of the missing funds.

The duties of receiving, recording and depositing or transmitting monies are not adequately segregated and some receipts were not deposited or transmitted on a timely basis.

We recommend the municipal division establish a documented review of court accounting records by an independent person and deposit receipts intact daily or when accumulated receipts exceed \$100.

Phillip Algee serves as the Municipal Judge of the city of Breckenridge Hills. Jenny House served as Court Clerk through August 31, 1998. She was responsible for receiving, recording, depositing, and disbursing monies and preparing bank reconciliations.

## FINANCIAL SECTION

## State Auditor's Reports

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

**INDEPENDENT AUDITOR'S REPORT ON  
THE FINANCIAL STATEMENT**

Presiding Judge  
Twenty-First Judicial Circuit  
and  
Municipal Judge  
Breckenridge Hills, Missouri

We have audited the accompanying special-purpose financial statement of the city of Breckenridge Hills Municipal Division of the Twenty-First Judicial Circuit as of and for the years ended December 31, 1998 and 1997. This special-purpose financial statement is the responsibility of the municipal division's management. Our responsibility is to express an opinion on this special-purpose financial statement based on our audit.

Except as discussed in paragraph four, we conducted our audit in accordance with generally accepted auditing standards and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the special-purpose financial statement is free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the special-purpose financial statement. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

The accompanying special-purpose financial statement was prepared for the purpose of presenting the receipts, disbursements, and changes in cash of the city of Breckenridge Hills Municipal Division of the Twenty-First Judicial Circuit and is not intended to be a complete presentation of the financial position and results of operations of the municipal division.

Internal controls and accounting records of the city of Breckenridge Hills Municipal Division were inadequate. At least \$13,978 in bond monies received by the court from January 1, 1997 through August 31, 1998 were misappropriated. In addition, records accounting for the numerical sequence and ultimate disposition of each traffic ticket and summons issued were not maintained

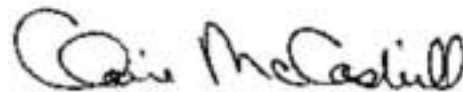

properly. As a result, we were unable to satisfy ourselves by appropriate audit tests or other means as to receipts and disbursements beyond amounts recorded in the municipal division's records for the years ended December 31, 1998 and 1997.

In our opinion, except for the effects, if any, on the financial statement of the matters discussed in the preceding paragraph, the special-purpose financial statement referred to in the first paragraph presents fairly, in all material respects, the receipts, disbursements, and changes in cash of the city of Breckenridge Hills Municipal Division of the Twenty-First Judicial Circuit as of and for the years ended December 31, 1998 and 1997, in conformity with the comprehensive basis of accounting discussed in Note 1, which is a basis of accounting other than generally accepted accounting principles.

The city of Breckenridge Hills Municipal Division has not presented the disclosures required by Governmental Accounting Standards Board (GASB) Technical Bulletin 98-1, *Disclosures about Year 2000 Issues*, as amended by GASB Technical Bulletin 99-1, that the GASB has determined are necessary to supplement, although not be a part of, the basic financial statements. In addition, we do not provide assurance that the municipal division is or will become year 2000-compliant, that the municipal division's year 2000 remediation efforts will be successful in whole or in part, or that parties with which the municipal division does business are or will become year 2000-compliant.

In accordance with *Government Auditing Standards*, we also have issued our report dated October 27, 1999, on our consideration of the municipal division's internal controls over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grants.

The accompanying History, Organization, and Statistical Information is presented for informational purposes. This information was obtained from the municipal division's management and was not subjected to the auditing procedures applied in the audit of the special-purpose financial statement referred to above.

A handwritten signature in dark ink, appearing to read "Claire McCaskill". The signature is fluid and cursive, with the first name "Claire" written in a larger, more prominent script than the last name "McCaskill".

**Missouri State Auditor**

**INDEPENDENT AUDITOR'S REPORT ON COMPLIANCE  
AND ON INTERNAL CONTROL OVER FINANCIAL REPORTING**

Presiding Judge  
Twenty-First Judicial Circuit  
and  
Municipal Judge  
Breckenridge Hills, Missouri

We have audited the special-purpose financial statement of the city of Breckenridge Hills Municipal Division of the Twenty-First Judicial Circuit as of and for the years ended December 31, 1998 and 1997, and have issued our report thereon dated October 27, 1999. That report expressed a qualified opinion on the special-purpose financial statement. Except as discussed in the report on the financial statement of the municipal division, we conducted our audit in accordance with generally accepted auditing standards and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States.

Compliance

As part of obtaining reasonable assurance about whether the special-purpose financial statement of the city of Breckenridge Hills Municipal Division of the Twenty-First Judicial Circuit is free of material misstatement, we performed tests of the municipal division's compliance with certain provisions of laws, regulations, contracts, and grants, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no material instances of noncompliance that are required to be reported under *Government Auditing Standards*. However, we noted certain other instances of noncompliance which are presented in the accompanying Management Advisory Report.

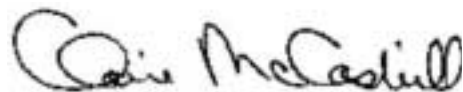

Internal Control Over Financial Reporting

In planning and performing our procedures related to the special-purpose financial statement of the city of Breckenridge Hills Municipal Division of the Twenty-First Judicial Circuit, we considered the municipal division's internal control over financial reporting in order to determine

our auditing procedures for the purpose of expressing our opinion on the special-purpose financial statement and not to provide assurance on the internal controls over financial reporting. However, we noted certain matters involving the internal controls over financial reporting and their operation that we consider to be reportable conditions. Reportable conditions involve matters coming to our attention relating to significant deficiencies in the design or operation of the internal controls over financial reporting that, in our judgement, could adversely affect the municipal division's ability to record, process, summarize, and report financial data consistent with the assertions of management in the special-purpose financial statement.

A material weakness is a condition in which the design or operation of one or more of the internal control components does not reduce to a relatively low level the risk that misstatements in amounts that would be material to the special-purpose financial statement being audited may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions. Our consideration of the internal controls over financial reporting would not necessarily disclose all matters in the internal controls that might be reportable conditions and, accordingly, would not necessarily disclose all reportable conditions that are also considered to be material weaknesses. However, we noted certain matters involving the internal controls over financial reporting and their operation that we consider to be material weaknesses, and these matters are presented in the accompanying Management Advisory Report.

This report is intended for the information of the management of the city of Breckenridge Hills Municipal Division of the Twenty-First Judicial Circuit and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

A handwritten signature in dark ink, appearing to read "Claire McCaskill". The signature is fluid and cursive, with the first name "Claire" being more prominent than the last name "McCaskill".

Claire McCaskill  
State Auditor

The accompanying Notes to the Financial Statement are an integral part of this statement.

## Notes to the Financial Statement

TWENTY-FIRST JUDICIAL CIRCUIT  
BRECKENRIDGE HILLS, MISSOURI  
MUNICIPAL DIVISION  
NOTES TO THE FINANCIAL STATEMENT

1. Summary of Significant Accounting Policies

A. Reporting Entity and Basis of Presentation

The accompanying special-purpose financial statement presents only selected data for the funds administered by the city of Breckenridge Hills Municipal Division of the Twenty-First Judicial Circuit of the state of Missouri.

Receipts, disbursements, and changes in cash are presented for the municipal division. The operating costs of the division are paid by the city of Breckenridge Hills and are not included in the financial statement.

The municipal division is responsible for cash bonds posted until case disposition allows appropriate disbursement. Bond monies relating to pending cases in the custody of the municipal division are included in the financial statement.

B. Basis of Accounting

The Statement of Receipts, Disbursements, and Changes in Cash is prepared on the cash basis of accounting; accordingly, amounts are recognized when they are received or disbursed. This basis of accounting differs from the generally accepted accounting principles, which require revenues to be recognized when they become available and measurable or when they are earned and expenditures or expenses to be recognized when the related liabilities are incurred.

C. Fiscal Authority and Responsibility

The municipal division accounts for fines and court costs resulting from prosecution of violations of municipal ordinances before the municipal judge or received through the traffic violations bureau, as well as cash bonds posted. Municipal violations could include traffic offenses, both moving and nonmoving; parking offenses; and other violations for which amounts are received by the municipal division and remitted to the city treasury. The municipal division also may account for restitutions received and disbursed through the division.

2. Cash

Section 479.080, RSMo 1994, requires municipal divisions to deposit fines and court costs into the city treasury at least monthly. The division does not maintain a bank account, transmitting fines and court costs directly to the City Clerk for deposit to the city treasury. A separate escrow bank account for bond monies received is maintained by the municipal division. At December 31, 1998 and 1997, the escrow bank account balance of the city of Breckenridge Hills Municipal Division of the Twenty-First Judicial Circuit was entirely covered by federal depositary insurance.

3. Disbursements to State

The municipal division collects various amounts that must be remitted to the state of Missouri. These amounts include the judgement for the Motorcycle Safety Trust Fund, and the surcharges for the Crime Victims' Compensation, Services to Victims Fund, and the Peace Officer Standards and Training Commission Fund. The state's portion of these amounts are deposited into the city treasury. Amounts remitted by the city to the state are not included in the financial statement.

4. Missing Funds

Bonds totaling at least \$8,222 in the year ended December 31, 1998 and \$5,756 in the year ended December 31, 1997, received by the police department but not deposited to the escrow account are included in receipts and are presented as unaccountable disbursements on the financial statement.

## MANAGEMENT ADVISORY REPORT SECTION

## Executive Summary

TWENTY-FIRST JUDICIAL CIRCUIT  
CITY OF BRECKENRIDGE HILLS, MISSOURI  
MUNICIPAL DIVISION  
EXECUTIVE SUMMARY

Cash receipts for bonds totaling at least \$13,978 were received and not deposited during the period January 1, 1997 through August 31, 1998. A bond ledger showing receipt, disbursement, and balance for each bond was not maintained. In addition, bond monies were not deposited intact on a timely basis, and monthly bank reconciliations were not prepared. These factors helped conceal the misappropriation of funds.

These misappropriations could have been prevented or detected on a more timely basis if adequate oversight and reviews had been performed and internal controls, as noted in the accompanying Management Advisory Report, had been established.

Phillip Algee serves as the Municipal Judge of the city of Breckenridge Hills. Jenny House served as Court Clerk through August 31, 1998. She was responsible for receiving, recording, depositing, and disbursing monies and preparing bank reconciliations.

Management Advisory Report -  
State Auditor's Current Recommendations

TWENTY-FIRST JUDICIAL CIRCUIT  
CITY OF BRECKENRIDGE HILLS, MISSOURI  
MUNICIPAL DIVISION  
MANAGEMENT ADVISORY REPORT-  
STATE AUDITOR'S CURRENT RECOMMENDATIONS

We have audited the special-purpose financial statement of the city of Breckenridge Hills Municipal Division of the Twenty-First Judicial Circuit as of and for the years ended December 31, 1998 and 1997, and have issued our report thereon dated October 27, 1999. That report expressed a qualified opinion on the special-purpose financial statement for the years ended December 31, 1998 and 1997. Discrepancies in bond records were identified by a consultant hired to install a new computerized accounting system for the court. Mayor Archie Ledbetter requested the Office of State Auditor perform an audit of the court records.

The following Management Advisory Report presents our findings and recommendations arising from our procedures related to the municipal division's special-purpose financial statement. During those procedures, we also identified certain management practices which we believe could be improved. Our procedures were not designed or intended to be a detailed study of every system, procedure, and transaction. Accordingly, the findings presented in the following report should not be considered as all-inclusive of areas where improvements may be needed.

|           |                      |
|-----------|----------------------|
| <b>1.</b> | <b>Missing Funds</b> |
|-----------|----------------------|

The city of Breckenridge Hills Municipal Division accepts cash, checks, and money orders for payment of bonds. Cash bond payments are collected by the police department, recorded on a prenumbered bond form and a bond log, and are transmitted to the Court Clerk within a day of receipt. Check and money order payments for bonds received from other courts are also recorded on the prenumbered bond forms and police bond log by the Court Clerk. The Court Clerk deposits bond receipts into a separate bank account. Bonds are disbursed as the applicable case is settled in court.

In the Spring of 1999, the city hired a consultant to install an updated computerized accounting system for the court. As part of the implementation of the new system, the consultant prepared a listing of bond open items (liabilities) which was reconciled to the bond bank account balance. The open items balance exceeded the bank account balance by approximately \$14,000 at May 31, 1999. This difference was subsequently identified as bond monies received which had not been deposited.

Prior to May 1999, a bond ledger showing bond receipts, disbursements, and open balances was not maintained, monthly listings of open items were not being prepared, and the bond bank account was not being reconciled. The Court Clerk listed the bond receipts individually on deposit stubs indicating the corresponding bond form number next to each entry. Deposit stubs functioned as

both a record of bonds receipted and a record of bonds deposited by the court. Though the police department also maintained a log of bonds receipted, there was no independent reconciliation of bonds collected by the police department to bonds deposited by the Court Clerk. In addition, the Court Clerk did not issue a receipt slip to the police department indicating which bonds had been transmitted to her.

Based on police department receipt records and various other records that were available, \$13,978 of bond monies collected by the police department from January 1, 1997 through August 31, 1998, were not recorded on deposit stubs or deposited by the Court Clerk. The Court Clerk responsible for depositing these monies was removed from that position on August 31, 1998 and resigned from the city in December 1998, prior to these discrepancies being discovered.

**WE RECOMMEND** the municipal division, along with the city, continue to work with law enforcement officials regarding any criminal prosecution and to obtain restitution of the missing funds.

### **AUDITEE'S RESPONSE**

*The Municipal Judge and Court Clerk responded:*

*We agree and plan to continue to work with law enforcement officials to resolve this issue.*

|  |
|--|
| <b>2. Accounting Controls and Procedures</b> |
|--|

- A. The duties of receiving, recording, and depositing or transmitting monies are not adequately segregated. The Court Clerk performs all of these duties. Neither the Municipal Judge nor other personnel independent of the cash custody and record-keeping functions provide any supervision or review of the work performed by the Court Clerk.

To safeguard against possible loss or misuse of funds, internal controls should provide reasonable assurance that transactions are accounted for properly and assets are adequately safeguarded. Since this is currently an office of one employee and proper segregation of duties cannot be achieved, at a minimum, there should be an independent comparison of monies receipted by the court and police department to deposits and transmittals to the city. Independent reviews should also include accounting for the numerical sequence of bond forms and receipt slips issued, and a reconciliation between the composition of bond forms and receipt slips issued and the composition of bond monies deposited to the municipal division bond bank account or fine and cost monies transmitted to the city.

- B. Some receipts were not deposited or transmitted on a timely basis. Fines and costs were sometimes held two to four days before being transmitted to the city. Bond monies were

held for an average of two to three weeks before being deposited. In addition, as noted in MAR No. 1, some bond monies were never deposited.

To adequately safeguard receipts and reduce the risk of loss or misuse of funds, deposits and transmittals should be made daily or when accumulated receipts exceed \$100.

- C. The municipal court issues prenumbered receipt slips for payments of fines and court costs. The method of payment (cash, check, or money order) is not always correctly marked on the face of the receipt slip. There were several instances where the composition of receipts per the receipt slips did not reconcile to the composition of the amounts transmitted.

To ensure receipts are deposited intact, the method of payment should be marked correctly and the composition of receipt slips issued should be reconciled to the composition of transmittals to the city. Such a review would help ensure monies are properly handled, recorded and transmitted.

A similar condition was noted in our prior report.

**WE RECOMMEND** the municipal division:

- A. Establish a documented review of court accounting records by an independent person.
- B. Deposit receipts intact daily or when accumulated receipts exceed \$100.
- C. Ensure the method of payment is recorded on each receipt slip and the composition of receipts is reconciled to the composition of transmittals.

### **AUDITEE'S RESPONSE**

*The Municipal Judge and Court Clerk responded:*

*A&B. We agree and this has already been implemented.*

*C. We agree.*

### **3. Court Procedures**

- A. While the city has established a Traffic Violations Bureau (TVB) that allows offenses to be paid prior to the court date, the Municipal Judge has not issued a court order to formally establish the TVB. Supreme Court Rule No. 37.49(a) allows for the establishment of a TVB by a court order prepared by the Municipal Judge.

This condition was also noted in our prior report.

- B. Procedures established to pursue the collection of delinquent accounts and failure to appear cases include issuing warrants; however, the court did not ensure some warrants were issued on a timely basis. Of twenty-four such cases selected for review, thirteen cases should have had a warrant issued for failure to appear, but did not. The municipal division estimates warrants have not been properly issued on approximately 2,000 cases.

Proper and timely issuance of warrants for amounts due to the court helps to maximize court revenue along with providing equitable treatment for those citizens who are paying fines and court costs when due.

- C. The Prosecuting Attorney does not always sign tickets after amendments or recommendations are made. To ensure the proper disposition of all cases has been entered in the court records, the Prosecuting Attorney should sign all amendments and recommendations.
- D. The court has not implemented adequate procedures to follow up on bonds held for over one year. As of July 31, 1999, the balance of the bond account included bonds totaling \$9,505 which have been held in excess of one year.

An attempt should be made to determine the proper disposition of these monies. This should include conducting a review of any bonds posted by persons who failed to make the required court appearance to determine if the bonds should be forfeited and monies paid over to the city treasury as provided by Section 479.210, RSMo 1994. Those bonds which cannot be forfeited and remain unclaimed for one year after disposition of the case should be turned over to the state's Unclaimed Property Section.

**WE RECOMMEND** the municipal division:

- A. Issue a court order to formally establish the TVB.
- B. Prepare and activate warrants on all applicable cases. The division should also ensure all warrants are being prepared and activated in a timely manner.
- C. Require the Prosecuting Attorney to sign all amendments and recommendations.
- D. Follow up on all bonds held for more than one year and dispose of bonds in accordance with state law.

### **AUDITEE'S RESPONSE**

*The Municipal Judge and Court Clerk responded:*

A,B,  
&C. *We agree.*

D. *Upon resolution of the missing bond monies, we will follow up and dispose of these bonds properly.*

#### **4. Ticket Accountability**

A. Neither the police department nor the court accounts for the numerical sequence and ultimate disposition of traffic tickets and summonses issued. A police department clerk enters the date issued, violator's name, and ticket number of all traffic tickets issued by the police department into the court's computer system. Likewise, the Court Clerk enters similar information for summonses issued by other city departments. However, a log of tickets and summonses issued is not generated from the computer to review for missing numbers. In addition, records of voided tickets are not maintained and police officers often do not retain their voided tickets or unused portions of ticket books. Out of 475 traffic tickets and summonses selected, thirty-three items which appear to have been either issued or voided during the audit period could not be accounted for properly. Another sixty-seven of these items, which appear to have been unissued, also could not be accounted for properly.

Without a proper accounting for the numerical sequence and ultimate disposition of traffic tickets and summonses, the police department and court cannot be assured that all tickets issued are properly submitted to the Court Clerk for processing. A log listing each ticket or summons number, the date issued, and the violator's name would help ensure all tickets and summons issued have been submitted to the court for processing, properly voided, or not prosecuted. In addition, a record should be maintained accounting for the ultimate disposition of each ticket and summons to ensure all tickets and summons have been accounted for properly.

This condition was also noted in our prior report.

B. Some records of convictions on traffic offenses were not forwarded to the Missouri State Highway Patrol (MSHP). Three of nineteen applicable items reviewed were not sent to the MSHP as required. Section 302.225, RSMo Cum. Supp. 1998, requires records of any pleas or findings of guilty on traffic violations under the laws of the state, county, or municipal ordinance to be forwarded to the MSHP within ten days of the conviction date.

**WE RECOMMEND** the municipal division:

A. Work with the police department to ensure the numerical sequence and ultimate disposition of traffic tickets and summonses issued are accounted for properly.

- B. Ensure all records of convictions on traffic violations are forwarded to the MSHP as required by state law.

**AUDITEE'S RESPONSE**

*The Municipal Judge and Court Clerk responded:*

- A. *We agree and this has already been implemented.*
- B. *We agree.*

This report is intended for the information of the municipal division's management and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

## Follow-Up on State Auditor's Prior Recommendations

TWENTY-FIRST JUDICIAL CIRCUIT  
CITY OF BRECKENRIDGE HILLS, MISSOURI  
MUNICIPAL DIVISION  
FOLLOW-UP ON STATE AUDITOR'S PRIOR RECOMMENDATIONS

This section reports follow-up action taken by the city of Breckenridge Hills Municipal Division on recommendations made in the Management Advisory Report (MAR) of our report on the Twenty-First Judicial Circuit Municipal Divisions issued for the two years ended December 31, 1993. The prior recommendations which have not been implemented, but are considered significant, have been repeated in the current MAR. Although the remaining unimplemented recommendations have not been repeated, the court should consider implementing these recommendations.

City of Breckenridge Hills Municipal Division

- A.1. Prenumbered bond forms were not issued for bonds collected by other political subdivisions, nor were they recorded in the bond log. The method of payment received was not marked in the bond log or on the bond form by the police department. In addition, the Court Clerk did not reconcile the composition of bond monies received to the composition of monies deposited.
- 2. The Court Clerk did not maintain a bond ledger indicating the date and amount of receipt and the date of disbursement.
- B. Receipt slips issued by the court did not always indicate the method of payment received.
- C. The Municipal Judge did not sign the docket after dispositions were recorded.
- D. The Municipal Judge had not issued a court order to formally establish the city's Traffic Violations Bureau (TVB).
- E. Neither the police department nor the court accounted for the numeric sequence or the ultimate disposition of traffic tickets issued.

Recommendations:

The city of Breckenridge Hills Municipal Division:

- A.1. Request the police department to issue prenumbered bond forms for all bonds received and post all bonds to the bond log. In addition, the police department should record the method of payment on its bond log for all monies received and reconcile the composition of receipts to the composition of monies transmitted.
- 2. Maintain a bond ledger indicating date and amount of receipt and date of disbursement for all bonds received.

- B. Record the method of payment on all receipt slips issued and reconcile the composition of receipts to the composition of monies transmitted.
- C. Require the judge's signature on the court dockets.
- D. Issue a court order to formally establish the TVB.
- E. Work with the police department to ensure the numerical sequence and ultimate disposition of traffic tickets issued or accounted for properly. In addition, all voided tickets should be retained.

Status:

- A.1. Partially implemented. Prenumbered bond forms are now issued by the Court Clerk for bonds received from other political subdivisions and the method of payment is now marked on the face of the bond form. The method of payment is not marked in the police department bond log, however only cash is accepted by the police department now. In addition, the Court Clerk does not reconcile the composition of bond monies received to the composition of monies deposited.
- 2. Implemented in May 1999.
- B. Not implemented. See MAR No. 2.
- C. Implemented.
- D. Not implemented. See MAR No. 3.
- E. Not implemented. See MAR No. 4.

## STATISTICAL SECTION

History, Organization, and  
Statistical Information

TWENTY-FIRST JUDICIAL CIRCUIT  
CITY OF BRECKENRIDGE HILLS, MISSOURI  
MUNICIPAL DIVISION  
HISTORY, ORGANIZATION,  
AND STATISTICAL INFORMATION

The city of Breckenridge Hills Municipal Division is one of approximately eighty-five municipal divisions within the Twenty-First Judicial Circuit, which is composed of St. Louis County. The Honorable Robert S. Cohen serves as the Presiding Judge.

The municipal division is governed by Chapter 479, RSMo 1994, and by Supreme Court Rule No. 37 titled "Ordinance Violations and Traffic Violations Bureau (TVB)." Section 479.050, RSMo 1994, provides that each municipal division may establish a TVB in which fines and costs are collected at times other than during court and transmitted to the city treasury.

Operating Costs

The operating costs and court salaries of the municipal division are paid by the city of Breckenridge Hills.

Organization

The Court Clerk is responsible for recording transactions as well as handling collections and disbursements. The Assistant City Clerk or Police Clerk receives payments of fines and court costs when the Court Clerk is not present. The Breckenridge Hills Police Department collects bonds and transmits monies directly to the Court Clerk. Fines and court costs are transmitted to the City Clerk for deposit to the city treasury. Bond monies are deposited in a municipal division bank account pending disposition. Court is held twice a month. Although it has not been formally established, a TVB receives payments of fines and court costs at times other than during court.

January 2000

**The annual review of audits of fire protection districts in Greene County has been completed. This review covered reports for the years ended December 31, 1998 that were required to be submitted to the State Auditor's office within six months after the year end.**

---

The state auditor is required by law to review the audit reports of every Greene County fire protection district with annual revenues in excess of \$50,000. Eight of the 11 districts in the county fall into this category. The other districts submitted unaudited financial reports.

This report includes information about the district's revenues, expenditures, and balances, and summarizes comments made by the various districts' independent auditors including recommendations for improving accountability and management of finances.

**Copies of the audit are available upon request.**

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

Honorable Mel Carnahan, Governor  
and  
Members of the General Assembly  
and  
Boards of Directors of Fire Protection  
Districts in Greene County

We have conducted a special review of independent audits of the fire protection districts in Greene County as required by Section 321.690, RSMo 1994. The purposes of this review were to:

1. Evaluate the impact of statutory audit requirements and State Auditor's regulations on the effectiveness of financial reporting and auditing for fire protection districts in Greene County.
2. Assess the degree of compliance by these districts with statutory audit requirements and the State Auditor's regulations.
3. Bring to the attention of the various fire districts and independent auditors any specifically identifiable reporting deficiencies which should be taken into consideration and corrected in future audit reports.
4. Summarize and evaluate the financial data presented for the various fire districts.

Section 321.690, RSMo 1994, requires all fire protection districts with revenues in excess of \$50,000 annually to cause an audit to be performed on a biennial basis. For those districts with annual revenues of less than \$50,000, the State Auditor may exempt the district from the audit requirement if the appropriate reports are filed.

For those districts for which an audit is required, the district must file a copy of the completed audit report and management letter with the State Auditor within six months after the close of the fiscal year. The audit reports and management letters are reviewed to determine that they are prepared according to guidelines contained within the Code of State Regulations (CSR) (Section 15 CSR 40-4). Any weaknesses noted during the review are communicated to the districts by letter. Should the weaknesses be of a serious enough nature to require the report to be amended, the district is granted a ninety-day period from the date of notification by the State Auditor to correct the report. The State Auditor accepted all of the required audit reports that were received for the year(s) ended December 31, 1998.

During our review, we considered Section 321.690, 1994 and 15 CSR 40-4 (which are presented in Appendices B and C), and audit reports and other financial information submitted to

the State Auditor by the various fire districts for the year(s) ended December 31, 1998. Because some data presented in the schedules and appendices was compiled from information submitted by the various fire districts and their independent auditors and was not verified by us via additional audit procedures, we express no opinion on the schedules and appendices.

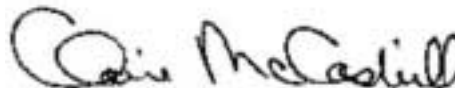

Our review was limited to the specific matters described above and was based on procedures considered appropriate in the circumstances. Had we performed additional procedures, other information might have come to our attention that would have been included in this report.

Some problems were noted in our review of the fire protection districts' audit reports and the compliance deficiencies are summarized on Schedule 4. The problems noted included, failure to submit the audit report to the State Auditor's office (SAO) by June 30, 1999, failure to submit engagement letters to the SAO, failure to notify the SAO of entrance and exit conferences, lack of complete and adequate footnote disclosures, failure to include needed comments and recommendations in management letters, failure to include follow up action on prior year's findings, failure to include required schedules in the audit reports, and failure to conduct the audit in accordance with generally accepted governmental auditing standards (GAGAS).

To better determine the quality of the fire district audits, we reviewed the supporting working papers of various independent auditor reports for the year(s) ended December 31, 1998. The information contained in the working papers constitutes the principal record of work the auditor has accomplished and provides evidence for conclusions that he has reached concerning significant matters. Generally Accepted Governmental Auditing Standards (GAGAS) require that a written record of the auditor's work be retained. However, some auditor's working papers need to be improved in this area.

As shown in Appendix A, independent auditors made a few specific recommendations to improve the overall management of fire districts. Recommendations included concerns regarding budgets and overall policies and procedures. Each fire district should review all recommendations and the applicability to their individual district. Consideration should be given by individual districts to have their independent auditor review any areas where risk and citizen concern may be evident.

This is the fifth review the State Auditor's office has performed of the Greene County fire protection districts' reports and many improvements have been noted. It appears that the fire protection districts, on the whole, are working to improve the quality of their financial reporting. We solicit from the readers of this report any suggestions for changes or requests for other new information which may be of benefit to those involved with the Greene County fire protection districts.

Claire McCaskill  
State Auditor

November 23, 1999 (fieldwork completion date)

| Audit was not performed in accordance with GAGAS.                                    | 15CSR 40-4.030  | 1 *              | 7                            | 14%     |
| Some needed comments and recommendations were not included in a management letter.   | 15 CSR 40-4.030 | 3 **             | 7                            | 43%     |
| Follow-up to prior management letter was not included in the report.                 | 15 CSR 40-4.030 | 1                | 4 (1)                        | 25%     |
| Appropriate footnote disclosures were not included.                                  | 15 CSR 40-4.030 | 2 ***            | 7                            | 29%     |
| Some required report schedules were not included.                                    | 15 CSR 40-4.020 | 1 ****           | 7                            | 14%     |

\* The audit report did not include a report on internal control or compliance with laws and regulations.

\*\* A problem noted that apparently should have been reported in a management letter included overspending the budget.

\*\*\* Although the audit reports contained most of the necessary footnotes, we noted deficiencies regarding appropriate footnote disclosure of budgetary practices, and changes in general fixed assets.

\*\*\*\* Some of the schedules missing include a schedule of tax rates and assessed valuation, schedule of insurance in force, and a schedule of principal officeholders and their compensation.

(1) Two districts did not have prior management recommendations and one district was not required to obtain an audit in the prior year.

The accompanying Notes to the Schedules are an integral part of this schedule.

## NOTES TO THE SCHEDULES

REVIEW OF INDEPENDENT AUDITS OF FIRE PROTECTION DISTRICTS  
IN GREENE COUNTY  
NOTES TO THE SCHEDULES

1. Significant Information

A. General

At December 31, 1998, there were eleven fire protection districts in Greene County. Districts are required to have biennial audits performed if revenues exceed \$50,000, or file a financial statement if revenues are less than \$50,000.

Upon completion of the audit, copies of the report and management letter are to be submitted to the State Auditor for review. Seven audits and three financial statements have been received as follows:

1. The Battlefield, Ebenezer, Fair Grove, Strafford, and Willard Fire Protection Districts obtained audits for the year ended December 31, 1998. Each of these districts, except Fair Grove, previously obtained audits for the year ended December 31, 1997. The Fair Grove Fire Protection District was not required to obtain an audit for the year ended December 31, 1997 because their revenues were less than \$50,000 for that year. The Brookline and Logan-Rogersville Fire Protection District obtained audits for the two years ended December 31, 1998.
2. The Walnut Grove Fire Protection District obtained an audit for the two years ended December 31, 1997. This district plans to obtain an audit for the two years ended December 31, 1999. No information is presented in this report for the year ended December 31, 1998.
3. The Ash Grove, Bois D'Arc and West Republic Fire Protection Districts were not required to obtain audits. Information presented in this report for the year ended December 31, 1998, was obtained from unaudited information provided by these districts. Information presented for the year ended December 31, 1997, for these districts and the Fair Grove Fire Protection District was previously obtained from unaudited financial statements.

B. Schedules

Information included in these schedules was compiled from the audit reports, management letters, and unaudited financial statements received from the Greene County fire protection districts.

In analyzing these schedules, some disparity will result due to the different methods of presenting essentially the same information.

Reasons for some problems in comparison are:

1. The financial statements of the Battlefield, Brookline, Ebenezer, Fair Grove, Logan-Rogersville, Strafford, and Willard Fire Protection Districts are presented on the modified accrual basis of accounting in accordance with generally accepted accounting principles. The ending balances represent assets net of liabilities. Revenues are recognized in the fiscal period in which they become available and measurable. Expenditures are recognized in the fiscal period in which the related liability is incurred.
2. The financial statements of the Ash Grove, Bois D'Arc and West Republic Fire Protection Districts are presented on a cash basis of accounting. The ending balances represent cash balances. Revenues are recognized when received in cash and expenditures are recognized when disbursed in cash.

The schedules presented are as follows:

Schedule 1 presents revenues, expenditures, and fund balance for the General Fund in a combined format. The General Fund is the general operating fund of each district and is used to account for all operating resources.

Schedule 2 presents the general fixed asset balances of the districts at December 31, 1998, with comparative totals of general fixed assets at December, 31 1997. The fire protection districts that are presented are only those which obtained an audit. However, the Fair Grove Fire Protection District's audit report did not include a schedule of general fixed assets.

Schedule 3 presents the assessed valuations of the individual fire protection districts as well as tax levies. Immaterial differences were noted in the assessed valuations presented in the audit reports and the amounts submitted by the districts to the State Auditor's office. In addition, in 1997 and 1998, Walnut Grove Fire Protection District levied .03 and .01, respectively, in excess of the levies approved by the State Auditor's office. In 1997 and 1998, the Fair Grove Fire Protection District levied .02 and .01, respectively, in excess of the levies approved by the State Auditor's office. In 1997, Bois D'Arc and Brookline Fire Protection Districts levied .01 in excess of amounts approved by the State Auditor's office.

Schedule 4 is a listing of deficiencies noted regarding compliance with State Auditor's regulation 15 CSR 40.

C. Method of Accounting

All of the districts' operations are accounted for in the General Fund, which is a governmental type fund. As described in Note 1.B., the districts use various methods of accounting for their General Funds.

For those districts which have obtained audits, except Fair Grove, all fixed assets acquired or constructed for general governmental purposes are reported as expenditures in the General Fund and are capitalized in the General Fixed Assets Account Group. Purchased fixed assets are capitalized at historical cost or at estimated historical cost if actual historical cost is not available.

Depreciation is usually not provided on general fixed assets; however, the Brookline and Logan-Rogersville Fire Protection districts did provide for depreciation over the useful lives of the general fixed assets. The total accumulated depreciation through December 31, 1998, was \$115,125 for the Brookline Fire Protection District and \$903,376 for the Logan-Rogersville Fire Protection District.

2. Audit Adjustments

Audit adjustments were made to the ending balances for the Fair Grove and Willard Fire Protection Districts at December 31, 1997.

The adjustment for the Fair Grove Fire Protection District was to change from a cash basis of accounting to the modified accrual basis of accounting. The adjustment for the Willard Fire Protection District was to increase property taxes receivable to include railroad and utility taxes.

3. Independent Audits

For the year(s) ended December 31, 1998, three independent auditors each performed one audit, and two independent auditors each performed two audits.

4. Compensation Of Directors

The independent audit reports included the names of the principal officeholders during the year ended December 31, 1998 and 1997, and the compensation received by each official in the performance of his or her duty as established by Section 321.190, RSMo 1994. The districts have three-member boards of directors, except the Brookline and Willard Fire Protection District have five-member boards. When more than three or five names were listed, it was due to a change in the officials serving on the board.

The following is a list of total compensation paid to directors by each district which was audited, except the Fair Grove Fire Protection District.

| <u>District</u>   | <u>Total Compensation Paid</u> |             |
|-------------------|--------------------------------|-------------|
|                   | <u>1998</u>                    | <u>1997</u> |
| Battlefield       | \$ 5,730                       | 6,250       |
| Brookline         | 0                              | 0           |
| Ebenezer          | 0                              | 0           |
| Logan-Rogersville | 3,600                          | 4,475       |
| Strafford         | 5,150                          | 4,450       |
| Walnut Grove      | (Note 1)                       | 0           |
| Willard           | 1,000                          | 1,000       |

## APPENDICES

## Appendix A

### REVIEW OF INDEPENDENT AUDITS OF FIRE PROTECTION DISTRICTS IN GREENE COUNTY SUMMARY OF MANAGEMENT LETTER COMMENTS ISSUED BY AUDITORS IN CONNECTION WITH THE AUDITS OF THE YEAR(S) ENDED DECEMBER 31, 1998

The following is a summary of the various comments contained in those management letters received by the State Auditor for audits of the year(s) ended December 31, 1998. These comments apply to one fire protection district unless otherwise noted. The comments extracted from the management letters were not verified by the State Auditor's office via additional audit procedures for accuracy, validity, or completeness.

#### Budgets

- \* A district did not present the projected fund balance on the budget.
- \* A district's budget did not include revenues.

#### Policies and Procedures

- \* A district should extend the bid process to include documentation of the actual bids as an attachment to the invoices where goods were purchased.
- \* A district should improve the filing of expenditure documentation to facilitate the location of invoices at any time.
- \* A district should include in the formal minutes of board of director meetings the actual calculation of Fireman's Fund payments to firefighters.
- \* A district should consider moving the entire accounting system to the computer program used for payroll.

## Appendix B

321.690. 1. In counties of the first classification having a charter form of government and having more than nine hundred thousand inhabitants and in counties of the first classification which contain a city with a population of one hundred thousand or more inhabitants which adjoins no other county of the first classification, the governing body of each fire protection district shall cause an audit to be performed consistent with rules and regulations promulgated by the state auditor.

2. (1) All such districts shall cause an audit to be performed biennially. Each such audit shall cover the period of the two previous fiscal years.

(2) Any fire protection district with less than fifty thousand dollars in annual revenues may, with the approval of the state auditor, be exempted from the audit requirement of this section if it files appropriate reports on its affairs with the state auditor within five months after the close of each fiscal year and if these reports comply with the provisions of section 105.145, RSMo. These reports shall be reviewed, approved and signed by a majority of the members of the governing body of the fire protection district seeking exemption.

3. Copies of each audit report must be completed and submitted to the fire protection district and the state auditor within six months after the close of the audit period. One copy of the audit report and accompanying comments shall be maintained by the governing body of the fire protection district for public inspection at reasonable times in the principal office of the district. The state auditor shall also maintain a copy of the audit report and comment. If any audit report fails to comply with the rules promulgated by the state auditor, that official shall notify the fire protection district and specify the defects. If the defects specified are not corrected within ninety days from the date of the state auditor's notice to the district, or if a copy of the required audit report and accompanying comments have not been received by the state auditor within six months after the end of the audit period, the state auditor shall make, or cause to be made, the required audit at the expense of the fire protection district.

4. The provisions of this section shall not apply to any fire protection district based and substantially located in a county of the third classification with a population of at least thirty-one thousand five hundred but not greater than thirty-three thousand.

**Title 15—ELECTED OFFICIALS**  
**Division 40—State Auditor**  
**Chapter 4—Audits of Fire Protection**  
**Districts in St. Louis and Greene**  
**Counties**

**15 CSR 40-4.010 Requirements for Districts**

*PURPOSE: The state auditor has authority to establish standards and reporting requirements for audits performed on fire protection districts in St. Louis and Greene Counties. This rule sets forth requirements to be met directly by the district.*

(1) The district is responsible for preparing and providing financial information to be included in the audit report. The district shall maintain adequate accounting records for that purpose. These records may be maintained on the bases of accounting deemed appropriate by the district but the records shall provide adequate information to allow the district to report in accordance with generally accepted accounting principles.

(2) The district shall engage an independent auditor to conduct the audit. The state auditor does not recommend, select or approve the district's auditor or the auditor's fee, except as provided in 15 CSR 40-4.010(4). The district is responsible for fulfilling all contractual obligations with the auditor, including payment of all earned fees.

(3) The district shall require from the independent auditor an engagement letter which sets out all essential particulars. A copy of the engagement letter shall be submitted to the state auditor for his/her review before commencement of audit fieldwork. The purpose of this review is to provide reasonable assurance that the district has contractually committed an auditor to provide services to satisfy requirements of 15 CSR 40-4. The contents of this letter should include, but are not limited to:

(A) Period for which the financial statements are audited;

(B) Purpose of the audit;

(C) Scope of the audit, including consideration of the internal control structure and tests of compliance with applicable laws and regulations;

(D) Provisions that the auditor will communicate, in writing, to the district material weaknesses or reportable conditions in the internal control structure, instances of non-compliance with applicable laws and regulations and other areas of possible improvement;

(E) Provision that all workpapers, etc., will be made available to the state auditor for his/her review upon his/her request;

(F) Provision that the auditor will comply with applicable rules issued by the state auditor under 15 CSR 40;

(G) Provision that the auditor will discuss with the district any factors s/he may discover which would prevent him/her from issuing an unqualified opinion on the financial statements and allow the district and the auditor the opportunity to arrive at a resolution acceptable to both;

(H) Statement of the auditor's responsibility for detection of errors, irregularities and illegal acts; and

(I) The estimated cost of the audit and the rates which are the basis for that estimate.

(4) The district must file a copy of the completed audit report with the state auditor within six (6) months after the close of the audit period. If any audit report fails to comply with promulgated rules, the state auditor will notify the district and specify the defects. If the specified defects are not corrected within ninety (90) days from the date of the state auditor's notice to the district, or if a copy of the required audit report has not been received by the state auditor within the specified time, the state auditor will make, or cause to be made, the required audit at the expense of the district.

*Auth: section 321.690, RSMo (Cum. Supp. 1993). \* Original rule filed May 12, 1978, effective Sept. 11, 1978. Amended: Filed Dec. 2, 1985, effective Feb. 13, 1986. Amended: Filed June 14, 1994, effective Nov. 30, 1994.*

*\*Original authority 1977, amended 1981, 1986, 1991, 1993.*

**15 CSR 40-4.020 Standards for Auditing and Financial Reporting**

*PURPOSE: The state auditor has authority to establish standards and reporting requirements for audits performed on fire protection districts in St. Louis and Greene Counties. This rule sets forth standards for the auditing and financial reporting of the district.*

(1) The independent auditor shall meet all requirements of Chapter 326, RSMo. The auditor must be able to demonstrate that s/he meets the independence criteria contained in the code of professional ethics and rules of conduct promulgated by the Missouri State Board of Accountancy.

(2) The independent auditor shall provide to the state auditor reasonable notification of any entrance or exit conferences held with the district. This notification shall be sufficiently

in advance to allow the state auditor to attend the entrance or exit conference at his/her discretion. Upon request, the independent auditor shall provide a draft copy of the audit report and management letter to the state auditor prior to the exit conference.

(3) The audit shall conform to the standards for auditing of governmental organizations, programs, activities and functions as established by the comptroller general of the United States.

(4) The financial statements, supplementary data and accompanying notes shall be presented in conformity with generally accepted accounting principles.

*Auth: section 321.690, RSMo (Cum. Supp. 1993). \* Original rule filed May 12, 1978, effective Sept. 11, 1978. Amended: Filed Dec. 2, 1985, effective Feb. 13, 1986. Amended: Filed June 14, 1994, effective Nov. 30, 1994.*

*\*Original authority 1977, amended 1981, 1986, 1991, 1993.*

**15 CSR 40-4.030 Contents of Audit Reports**

*PURPOSE: The state auditor has authority to establish standards and reporting requirements for audits performed on fire protection districts in St. Louis and Greene Counties. This rule describes required and suggested information to be included in the audit reports.*

(1) Standards for auditing and financial reporting of fire protection districts are given in 15 CSR 40-4.020.

(2) All audit reports shall contain:

(A) A table of contents;

(B) A report on the financial statements;

(C) Combined financial statements and appropriate note disclosures;

(D) Other financial information which includes, but is not limited to, the following:

1. Supplemental schedule of expenditures/expenses by object, if not included in the financial statements;

2. Tax rates and assessed valuation;

3. Schedule of insurance in force which shall include, in addition to other information, the agent for each policy; and

4. Principal officeholders who held office during the period under audit, compensation received by each official in performance of his/her duty and all other compensation or reimbursement of expenses made by the district to each officeholder; and

## Appendix C

(E) A report on the consideration of the internal control structure, a report on the tests of compliance with applicable laws and regulations and a management letter communicating areas of possible improvement not otherwise reported. The required scope of audit for the reports and management letter is set forth in 15 CSR 40-4.040(3). The reports and management letter shall include the findings and recommendations, if any, which the auditor developed during his/her audit and the district's responses to those findings and recommendations. The reports and management letter shall also indicate the nature of previous recommendations and the extent to which the district has implemented those recommendations.

(3) If the district or the auditor deems it appropriate, audit reports may contain or utilize the following:

(A) A history and organization section prepared by the district (unaudited);

(B) Comparative financial data for one (1) or more years; and

(C) Other statements, exhibits, schedules or analyses as deemed necessary or appropriate by the district or the auditor.

*Auth: section 321.690, RSMo (Cum. Supp. 1993). \* Original rule filed May 12, 1978, effective Sept. 11, 1978. Amended: Filed Dec. 2, 1985, effective Feb. 13, 1986. Amended: Filed June 14, 1994, effective Nov. 30, 1994.*

*\*Original authority 1977, amended 1981, 1986, 1991, 1993.*

### 15 CSR 40-4.040 Scope of Audit

**PURPOSE:** *The state auditor has authority to establish standards and reporting requirements for audits performed on fire protection districts in St. Louis and Greene Counties. This rule sets forth the scope of the audit.*

(1) Nothing in the rules promulgated for audits of fire protection districts shall be construed as restricting, limiting or relieving the independent auditor of his/her professional judgment or responsibility.

(2) The audit shall include those tests of the accounting records and other auditing procedures which the independent auditor considers necessary in the circumstances to conform to the standards for auditing of governmental organizations, programs, activities and functions as established by the comptroller general of the United States.

(3) As part of the audit described in section (2), the auditor will obtain an understanding of the internal control structure, assess control risk and report any material weaknesses or reportable conditions. The auditor will also test compliance with applicable laws and regulations and report all material instances of noncompliance. As a part of, or in addition to, audit tests or procedures which may be necessary for the audit, the auditor shall—

(A) Review systems, procedures and management practices, including:

1. Review cash management practices to the extent necessary to determine whether significant improvements appear practicable and economically justifiable;

2. Evaluate the purchasing function to the extent necessary to determine that the district generally receives fair value, for example, bidding of significant purchases; that purchases generally represent items consistent with the function of the district; and that there is not significant likelihood of misuse or misappropriation of the district's resources through the purchasing process;

3. Review fixed asset records and procedures to the extent necessary to determine that fixed assets are properly recorded, physically controlled and in the possession of the district;

4. Review fidelity bond coverages to determine that all persons with access to assets of the district appear covered in sufficient amounts;

5. Evaluate the budgeting practices to the extent necessary to determine whether significant improvements appear practicable and economically justifiable;

6. Review related party transactions;

7. Review evaluate other areas as required by the district; and

8. Review significant areas or matters which come to the attention of the auditor;

(B) The auditor will note areas of possible improvement in the district's systems, procedures and management practices. In evaluating district systems, procedures and management practices, the auditor should consider whether improvements appear practicable and economically justifiable.

(C) Test compliance with applicable laws and regulations, including:

1. Design the audit to provide reasonable assurance of detecting errors, irregularities and illegal acts that could have a direct and material effect on the financial statements;

2. Be aware of the possibility of illegal acts that could have an indirect and material effect on the financial statements; and

3. Test compliance with other legal provisions as s/he deems necessary or appropriate in the circumstances.

(D) Legal provisions which the auditor should consider in his/her audit include, but are not limited to, the following:

1. Article III, Sections 38(a) and 39(3) and Article VI, Section 25, *Constitution of Missouri* limitations on use of funds and credit;

2. Article VI, Section 26, *Constitution of Missouri* limitations on indebtedness without popular vote;

3. Article VI, Section 29, *Constitution of Missouri* application of funds derived from public debts;

4. Article VII, Section 6, *Constitution of Missouri* penalty for nepotism;

5. Chapter 67, RSMo budgetary requirements;

6. Sections 70.210 to 70.230 and Section 432.070, RSMo contracts;

7. Section 105.145, RSMo annual report;

8. Chapter 105, RSMo conflict of interest;

9. Chapter 108, RSMo bond issues;

10. Chapter 321, RSMo fire protection districts;

11. Other applicable portions of the *Constitution of Missouri* and the *Missouri Revised Statutes*;

12. Applicable sections of *Code of State Regulations*; and

13. Other applicable legal provisions.

(4) The auditor shall report on the reviews and examinations required by this rule in a management letter as set forth in 15 CSR 40-4.030 (2)(E).

*Auth: section 321.690, RSMo (Cum. Supp. 1993). \* Original rule filed May 12, 1978, effective Sept. 11, 1978. Amended: Filed Dec. 2, 1985, effective Feb. 13, 1986. Amended: Filed June 14, 1994, effective Nov. 30, 1994.*

SCHUYLER COUNTY HEALTH DEPARTMENT  
BUILDING PROJECT

**From The Office Of State Auditor  
Claire McCaskill**

Report No. 2000-03

January 7, 2000

# AUDIT REPORT

Office Of The  
State Auditor Of Missouri  
Claire McCaskill

January 2000

**Some problems were discovered as a result of an audit conducted by our office regarding the Schuyler County Health Department Building Project, Schuyler County, Missouri.**

---

Building project expenditures totaled approximately \$30,000 and \$215,400 in 1998 and 1999, respectively.

Inadequate advanced project planning and the necessary related fiscal and budgetary planning prevented the board from properly identifying and controlling project costs.

Other problems with board management of the project included the following:

- Inadequate internal controls overseeing project invoices and payments.
- Inadequate budgeting.
- Inadequate safeguarding of assets.

Building cost estimates were not reported to nor requested by the board in a timely manner, the health department paid a vendor \$4,000 in excess of the contract price, and the "interior carpentry" services apparently was not performed in accordance with contractual specifications. The \$4,000 overpayment was refunded after we brought it to the attention of the health department.

The Board of Trustees did not include building project expenditures in its annual budgets for 1998 and 1999. Additionally, the board does not perform or document a periodic comparison of actual revenues and expenditures with budgeted amounts.

The health department did not obtain or maintain insurance coverage on the building during its construction, exposing taxpayer funds to possible loss.

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

To the Board of Trustees of the  
Schuyler County Health Department  
Schuyler County, Missouri

We have conducted a review of the Health Department building project of Schuyler County, Missouri. The scope of this review included, but was not necessarily limited to, procedures and conditions as they relate to the construction of the health department's new building. The objectives of this review were to:

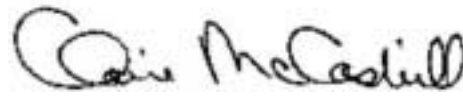

1. Determine the propriety of transactions and compliance with laws and regulations relating to the construction of the new health department building.
2. Investigate concerns of county citizens and members of the Board of Trustees regarding the building construction project and possible improprieties.
3. Review certain management practices and legal compliance issues to determine the propriety and efficiency of those procedures and practices.

Our review was made in accordance with applicable generally accepted government auditing standards and included such procedures as we considered necessary in the circumstances. In this regard, we reviewed the financial records, reports and procedures of the department; reviewed records relating to the health department building project; held discussions with appropriate health department officials and personnel, county officials; and, reviewed other records and documents as we considered necessary for the review.

Our review was limited to the specific matters described above and was based on the selective tests and procedures considered appropriate in the circumstances. Had we performed additional procedures, other information might have come to our attention which would have been included in this report.

The accompanying History and Organization is presented for informational purposes. This information was obtained from the health department and was not subjected to the auditing procedures applied in the review of the health department.

The accompanying Management Advisory Report presents our findings and recommendations arising from our review of the health department building project of Schuyler County, Missouri.

A handwritten signature in dark ink, appearing to read "Claire McCaskill". The signature is fluid and cursive, with the first name "Claire" written in a larger, more prominent script than the last name "McCaskill".

Claire McCaskill  
State Auditor

September 24, 1999 (fieldwork completion date)

## HISTORY AND ORGANIZATION

SCHUYLER COUNTY, MISSOURI  
HEALTH DEPARTMENT BUILDING PROJECT  
HISTORY AND ORGANIZATION

The Schuyler County Health Department was created under the authority of Chapter 205, RSMo 1994, in 1978 to provide a wide range of health and medical services to the residents of Schuyler County. Services provided include public health, health education, communicable disease surveillance and control, home health, immunization, WIC (Women and Infant Children), sanitation services, personal care services and homemaker chore program through Medicaid, and birth and death certificates.

The health department is governed by an elected five-member Board of Trustees. Board members are elected for four year terms. At times, board vacancies are filled by appointment by the County Commission, pending future election. The current board members are:

April 1999 - Present

Georgia Ann Robinson, Chairman  
Diane Sanchez  
Cathy Middleton  
Angela Schmitter  
Eldon Tallman (1)

(1) Replaced by Cathy Lay by appointment in July 1999.

The previous board members were:

January 1997 - March 1999

George Reindel, Chairman  
Robert Slaughter  
Georgia Ann Robinson  
Twila Anderson (2)  
Janet Blaise (3)

(2) Replaced by Diane Sanchez by appointment in July 1997.

(3) Replaced by Cathy Middleton by appointment in November 1998.

The health department administrator from January 2, 1996 through August 5, 1999 was Susan Chidester. The current health department Acting Administrator, Janice Shaw, was hired on August 5, 1999.

The health department is partially funded by a county property tax with a ceiling of fifteen cents per \$100 valuation. Assessed valuation and tax rate information for tax year 1999 were as follows:

ASSESSED VALUATION \*

|                   |                     |
|-------------------|---------------------|
| Real Estate       | \$21,516,738        |
| Personal Property | <u>10,894,066</u>   |
| Total             | <u>\$32,410,804</u> |

TAX RATE PER \$100 OF ASSESSED VALUATION:

|                        |       |
|------------------------|-------|
| Health Department Fund | \$.15 |
|------------------------|-------|

- \* Assessed valuations for the tax year were made on real and personal properties owned by the taxpayers on January 1 of the tax year. Taxes levied during the tax year become delinquent after December 31 of that year.

## MANAGEMENT ADVISORY REPORT

SCHUYLER COUNTY, MISSOURI  
HEALTH DEPARTMENT BUILDING PROJECT  
SUMMARY OF FINDINGS

1. Overall Planning (pages 8-9)

Inadequate advanced project planning and related fiscal and budgetary planning prevented the board from properly identifying and controlling project costs. Lack of adequate planning allowed several other problems to develop.

2. Building Construction Procedures and Project Oversight (pages 10-12)

Building cost estimates were not reported to nor requested by the board in a timely manner. The health department paid a vendor \$4,000 in excess of the contract price, and the "interior carpentry" contractor did not furnish or install mini-blinds in windows as required by the contract specifications.

3. Budgetary Practices (pages 12-13)

The Board of Trustees did not include building project expenditures in its annual budgets for 1998 and 1999. Additionally, the board does not perform or document a periodic comparison of actual revenues and expenditures with budgeted amounts.

4. Insurance Coverage (pages 13-14)

The health department did not obtain or maintain insurance coverage on the building during its construction, exposing taxpayer funds to possible loss.

SCHUYLER COUNTY, MISSOURI  
HEALTH DEPARTMENT BUILDING PROJECT  
MANAGEMENT ADVISORY REPORT

The Health Department Board of Trustees began discussing the need for a new office building as early as 1997 due to concerns related to client safety, poor building foundation and roof, lack of compliance with the Americans with Disabilities Act (ADA), limited parking, and carbon monoxide problems.

The Board of Trustees considered two options to alleviate the health and safety concerns of the old building; those being the demolition of the old building and construction of a new building or the sale of the existing building and purchase of land elsewhere for a building site. On June 30, 1998, the board approved the purchase of land at another location at a cost of \$7,500. Ultimately, the board sold the old building on September 29, 1998 at a price of \$6,000. The health department started construction of a new 3,300 square foot office building at the new site in October 1998. The new building was completed in June 1999.

Because of public concerns and questions directed to the Schuyler County Commission and Health Department Board members regarding the health department building project, the State Auditor's office performed a review of certain records and reports of the health department and held discussions with certain members of the Board of Trustees, department officials and personnel, county officials, and others as we considered necessary.

| Other                                    | 574               |
| Total                                    | \$ <u>245,400</u> |

Building expenditures totaled approximately \$30,000 and \$215,400 in 1998 and 1999, respectively.

During our review of the building project we noted that many of the concerns and problems appeared to largely originate from inadequate board involvement in advanced project planning and the necessary related fiscal and budgetary planning. For example, the board did not appear to take adequate measures in the early planning stages of the building project to identify an expected cost per square foot for a new building. Had this been done, such information could have been used to help establish the initial scope of the project and to ensure the expected total project costs were identified and compared to the department's available building funds. At that point the size of the building to be built could have been reduced as necessary to avoid exceeding available funding or longer term financing could have been considered and negotiated.

These planning failures essentially prevented the board from properly identifying and adequately controlling the cost of the building project. There were several notable problems with board management of the project, including the following:

- C Inadequate board involvement in planning and project management.
- C Inadequate internal controls overseeing project invoices and payments.
- C Inadequate budgeting.
- C Inadequate safeguarding of assets.

**WE RECOMMEND** in any future projects or health department operations the Board of Trustees ensure it evaluates in advance all construction costs and other potential costs related to the project in an effort to determine realistic, usable, and complete cost estimates. This information should then be used by the board to determine project feasibility and scope and to prepare a proper financial plan. In addition, the board must ensure it exercises proper board oversight, has effective internal controls, adequate budgeting, and properly safeguards all assets.

### **AUDITEE'S RESPONSE**

*The Health Board responded:*

*The board agrees there were problems with the handling of the building project by the former Board of Trustees. The current board will ensure that future projects and endeavors will be more adequately planned.*

*The former administrator responded:*

*Idid as the board asked. Had I known the proper procedure and process for the building project, these concerns would have been handled properly.*

## **2. Building Construction Procedures and Project Oversight**

- A. Chapter 49, RSMo 1994, establishes construction guidelines for county buildings and requires the board to appoint a suitable person to superintend any construction project. Chapter 49, RSMO 1994, requires the superintendent to prepare plans and a cost estimate for the project and submit them to the board for approval and also to submit periodic progress reports during construction.

The Board of Trustees authorized the former administrator to act as the superintendent for the construction project, however, it appears she did not properly or adequately inform the board of the total expected cost. Based on health department records and documented estimates obtained by the former administrator, in March 1998 it was expected that the building would cost at least \$62,200. However, it appears many other costs had not been identified and the department did not learn until April 1998 that state law would require that project laborers be paid prevailing wages. The unidentified costs and prevailing wage requirements significantly increased the expected cost of the project but there was no documentation that any effort was made by the board or the administrator to determine the total effect of those differences and incorporate them into planning considerations.

The administrator met with the project architect in May 1998 to establish the initial plans and it was not until November 24, 1998 that the board met with the architect. There was no documentation that the board asked for an estimated total project cost at that meeting. The administrator indicated that she knew at that time the cost would be approximately \$65 to \$70 per square foot but she did not inform the board. No one was able to provide written details of any discussions with the architect and the details were not included in the board minutes.

A cost of \$70 per square foot would equal a total cost of \$231,000. There is no record that the former administrator ever disclosed the total cost estimate to the board.

The board should ensure future projects are adequately planned and cost estimates are obtained and documented. In addition, the board must ensure that it applies adequate oversight to all health department operations. Good management practices require extensive and detailed oversight by the board.

- B. Our comparison of payments to vendors against contract bids revealed the electrical contractor was overpaid \$4,000. The health department contracted with a vendor to install all electrical services for its new building at a cost, after change orders, of \$18,362.

The vendor was actually paid \$22,362. After we brought the overpayment to the health department's attention, the \$4,000 was reimbursed in October 1999.

Good management practice requires invoices be compared to contract bids to prevent the possibility of such inappropriate payments. Failure to adequately review invoices and other supporting documentation and to periodically compare payments made to the contract bid increases the possibility of overpayment.

- C. The health department contracted with the lowest of two bidding vendors to provide "interior carpentry" services, consisting of installation of interior walls, ceilings, insulation, windows, and painting at a total cost of \$91,750. According to the contract specifications, the contractor was to furnish and install mini-blinds at each window, however, none were installed. It appears this was authorized by the former administrator without board approval and there was no reduction in the contract cost to compensate for the omission. In lieu of the contractor installing blinds, the former administrator said she planned to install mini-blinds herself. Since the completion of the building project the current administrator has purchased and installed mini-blinds in the conference room. Several other windows still need blinds added.

The board as a part of its oversight responsibilities should ensure contractors perform all work specified in the contract. If modifications to contract specifications become necessary they should be in writing, reviewed by the architect, and approved by the board of trustees.

The board should review the contract specifications and consider contacting the vendor to request full contract compliance or an appropriate price adjustment.

**WE RECOMMEND** the Board of Trustees:

- A. Apply adequate oversight procedures and comply with all laws and regulations regarding construction or other activities in any future projects. This would include ensuring project cost estimates are obtained, presented and evaluated to ensure the best informed management decisions are made.
- B. In the future, perform periodic comparisons of amounts paid to vendors to the contract bids to prevent overpayment and ensure the propriety of all payments made.
- C. Review the interior contract specifications and consider requesting the contractor comply with the contract or make appropriate price adjustments.

**AUDITEE'S RESPONSE**

*The Health Board responded:*

*A&B. We agree. For any future projects, the board will apply adequate oversight procedures.*

*C. We plan to review the interior contract specifications.*

*The former administrator responded:*

*C. I personally obtained a larger than specified window for the conference room at no expense to the health department. The contractor installed this window and during the installation the window pane was cracked. The contractor replaced the window at no cost to the health department. I agreed with the contractor he could provide a new window in lieu of mini-blinds at each window. The health department owned pleated shades that would be installed in lieu of mini-blinds.*

### **AUDITOR'S COMMENT**

The agreement on the blinds was not documented or submitted to the board, therefore the timing of the contractor's agreement to provide a replacement window at no cost could not be compared to the timing of the agreement on the mini-blinds.

### **3. Budgetary Practices**

- A. The former administrator was responsible for preparing and submitting to the Board of Trustees the health department's annual budget. As noted in our report of Schuyler County for the two years ended December 31, 1998, health department expenditures exceeded budgeted amounts during the years ended December 31, 1998 and 1997 by approximately \$65,700 and \$47,800, respectively. The overspending was partly a result of unbudgeted construction costs for the new building in 1998 and increases in employee salary expenditures in 1998 and 1997. Similarly, the 1999 budget failed to include expected building expenditures. In July 1999, near building project completion, an amended 1999 budget was submitted that included 1999 budgeted and 1998 actual construction expenditures.

During our review we determined the board did not adequately comply with statutory requirements for advanced public notice of the hearings for consideration of the original or amended budgets. Any major project such as this health department building project requires careful advanced planning and strict compliance with the county budget laws and careful monitoring to ensure that unexpected problems and cost surprises are minimized.

- B. The board does not perform or require a periodic comparison of actual revenues and expenditures with budgeted amounts. Such monitoring might have allowed the board to identify financial problems resulting from the building project on a more timely basis.

A complete and well-planned budget can serve as a useful management tool by establishing specific cost expectations for each area and providing a means to effectively monitor costs and financial condition.

**WE RECOMMEND** the Board of Trustees:

- A. Ensure complete and accurate budgets that reflect all anticipated revenues and expenditures are prepared. In addition, ensure the department complies with statutory requirements for advanced public notice of the hearings for consideration of the original or amended budgets.
- B. Compare actual revenues and expenditures with budgeted amounts on an ongoing basis.

**AUDITEE'S RESPONSE**

*The Health Board responded:*

*A&B. We are currently complying with the budget laws and comparing actual to budgeted amounts and will continue to do so in the future.*

|                              |
|------------------------------|
| <b>4. Insurance Coverage</b> |
|------------------------------|

The health department failed to obtain builder's risk insurance to cover the building project during construction. By monitoring contract terms and physical progress, the board was aware of significant project costs in early 1999, however, no insurance coverage was obtained. This lack of insurance coverage subjected taxpayer funds to unnecessary risks of loss. Had the building been damaged or destroyed during construction, the health department would have received no compensation for any losses.

An insurance policy on the new building, consisting of \$240,000 in coverage, was purchased in August 1999, and retroactively took effect on June 26, 1999 according to the policy.

To adequately safeguard health department assets and prevent loss of taxpayer monies, the board should obtain adequate insurance coverage for all new assets.

**WE RECOMMEND** the Board of Trustees ensure that health department assets continue to be adequately insured to protect against potential losses.

**AUDITEE'S RESPONSE**

*The Health Board responded:*

*The current board did review for insurance coverage and found that the building lacked adequate coverage. Proper coverage was obtained and it will be continued in the future.*

*The former administrator responded:*

*I acknowledge that I did not follow through and obtain adequate insurance coverage.*

This report is intended for the information of the health department's management and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

FORTY-FOURTH JUDICIAL CIRCUIT

MUNICIPAL DIVISIONS

YEARS ENDED 1998 AND 1999

**From The Office Of State Auditor  
Claire McCaskill**

# AUDIT REPORT

Report No. 2000-02  
January 4, 2000

Office Of The  
State Auditor Of Missouri  
Claire McCaskill

May 2000

**During our audit of the Forty-Fourth Judicial Circuit, City of Mansfield, Missouri, Municipal Division, we identified the following problems.**

The City of Mansfield Municipal Division accepts cash, checks, and money orders for payment of fines, court costs, and bonds. The Court Clerk is responsible for receiving, recording, and depositing court monies as well as preparing disbursements and reconciling bank statements. Prenumbered receipt slips are issued for monies received, and deposits are made into a municipal court bank account.

Court records indicate \$3,898 was collected by the court but not deposited into the court bank account. In addition, \$64 cash was reported stolen on August 8, 1999 in a break-in at city hall. As a result, undeposited receipts total \$3,962.

The monies that are missing appear to represent cash receipts which were received between July 1998 and June 1999 and recorded but not deposited. The cash percentage of deposits decreased approximately 20 percent during July 1998 through June 1999.

Two receipt books containing a total of 300 municipal court receipts could not be located by the court. We located 84 duplicate copies of these receipt slips. It appears that receipt slips were issued from these two receipt books at the same time other receipt books were in use. The "missing receipt books" included court monies that were received but not deposited into the court's bank accounts. The use of these additional receipt books helped to conceal the misappropriation. Because 216 receipt slips are still missing, it appears likely additional monies have been misappropriated.

Information gathered during our review has been provided to the Wright County Prosecuting Attorney and Sheriff.

The duties of receiving, recording, depositing, and disbursing court receipts are not adequately segregated. The Court Clerk performs all of the duties related to the collection and disbursement of fines, court costs, and bonds. Neither the Judge nor other personnel independent of the cash custody and record-keeping functions provide any supervision or review of the work performed by the Court Clerk.

Receipt slips are not deposited on a timely basis. Receipts were deposited approximately once or twice a month. To adequately safeguard receipts and to reduce the risk of loss or misuse of funds, deposits should be made intact daily or when accumulated receipts exceed \$100.

Fines and court costs are not disbursed monthly to the state and city treasury. As of August 1999 the former court clerk had not disbursed fines and court costs to the city since September 1998. Crime Victim's Compensation (CVC) and Police Officer Standards and Training Commission (POSTC) fees have not been turned over to the state since February 1999. State law requires 95 percent of the CVC to be paid monthly to the state. POSTC fees should also be disbursed monthly to the state.

## State Auditor's Report

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

**INDEPENDENT AUDITOR'S REPORT ON  
THE FINANCIAL STATEMENTS**

Presiding Judge  
and  
Municipal Judges  
Forty-Fourth Judicial Circuit

We have audited the accompanying special-purpose financial statements of the various municipal divisions of the Forty-Fourth Judicial Circuit as of and for the years ended September 30, 1999 and 1998, and June 30, 1999 and 1998, as identified by municipality and fiscal period in the table of contents. These special-purpose financial statements are the responsibility of the municipal divisions' management. Our responsibility is to express an opinion on these special-purpose financial statements based on our audit.

We conducted our audit in accordance with generally accepted auditing standards and the standards applicable to financial audits contained in Government Auditing Standards, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the special-purpose financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the special-purpose financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

The accompanying special-purpose financial statements were prepared for the purpose of presenting the receipts, disbursements, and changes in cash of the municipal divisions of the Forty-Fourth Judicial Circuit and are not intended to be a complete presentation of the financial position and results of operations of the municipal divisions.

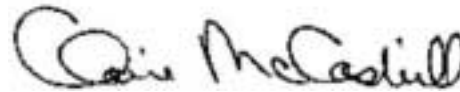

In our opinion, the special-purpose financial statements referred to in the first paragraph present fairly, in all material respects, the receipts, disbursements, and changes in cash of the municipal divisions of the Forty-Fourth Judicial Circuit as of and for the years ended September 30, 1999 and 1998, and June 30, 1999 and 1998, in conformity with the comprehensive basis of accounting discussed in Note 1, which is a basis of accounting other than generally accepted accounting principles.

The various municipal divisions of the Forty-Fourth Judicial Circuit have not presented the disclosures required by Governmental Accounting Standards Board (GASB) Technical Bulletin 98-1, *Disclosures about Year 2000 Issues*, as amended by GASB Technical Bulletin 99-1, that the GASB has determined are necessary to supplement, although not be a part of, the basic financial statements. In addition, we do not provide assurance that the municipal divisions are or will become year 2000-compliant, that the municipal divisions' year 2000 remediation efforts will be successful in whole or in part, or that parties with which the municipal divisions do business are or will become year 2000-compliant.

In accordance with Government Auditing Standards, we also have issued our report dated October 5, 1999, on our consideration of the municipal divisions' internal controls over financial reporting and on our tests of their compliance with certain provisions of laws, regulations, contracts, and grants.

The accompanying History, Organization, and Statistical Information is presented for informational purposes. This information was obtained from the municipal divisions' management and was not subjected to the auditing procedures applied in the audit of the special-purpose financial statements referred to above.

State Auditor

October 5, 1999 (fieldwork completion date)

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

**INDEPENDENT AUDITOR'S REPORT ON COMPLIANCE  
AND ON INTERNAL CONTROL OVER FINANCIAL REPORTING**

Presiding Judge  
and  
Municipal Judges  
Forty-Fourth Judicial Circuit

We have audited the special-purpose financial statements of the various municipal divisions of the Forty-Fourth Judicial Circuit as of and for the years ended September 30, 1999 and 1998, and June 30, 1999 and 1998, and have issued our report thereon dated October 5, 1999. We conducted our audit in accordance with generally accepted auditing standards and the standards applicable to financial audits contained in Government Auditing Standards, issued by the Comptroller General of the United States.

Compliance

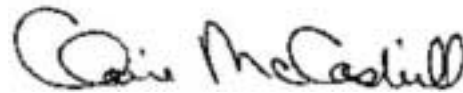

As part of obtaining reasonable assurance about whether the special-purpose financial statements of the various municipal divisions of the Forty-Fourth Judicial Circuit are free of material misstatement, we performed tests of the municipal divisions' compliance with certain provisions of laws, regulations, contracts, and grants, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance.

Internal Control Over Financial Reporting

In planning and performing our audit of the special-purpose financial statements of the various municipal divisions of the Forty-Fourth Judicial Circuit, we considered the municipal divisions' internal controls over financial reporting in order to determine our auditing procedures for the purpose of expressing our opinion on the special-purpose financial statements and not to provide assurance on the internal controls over financial reporting. However, we noted certain matters involving the internal controls over financial reporting and their operation that we consider to be reportable conditions. Reportable conditions involve matters coming to our attention relating to significant deficiencies in the design or operation of the internal controls over financial reporting that, in our judgement, could adversely affect the municipal divisions' ability to record, process, summarize, and report financial data consistent with the assertions of management in the special-purpose financial statements.

A material weakness is a condition in which the design or operation of one or more of the internal control components does not reduce to a relatively low level the risk that misstatements in amounts that would be material to the special-purpose financial statements being audited may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions. Our consideration of the internal controls over financial reporting would not necessarily disclose all matters in the internal controls that might be reportable conditions and, accordingly, would not necessarily disclose all reportable conditions that are also considered to be material weaknesses. However, we noted certain matters involving the internal controls over financial reporting and their operation that we consider to be material weaknesses, and these matters are presented in the accompanying Management Advisory Report.

This report is intended for the information of the management of the various municipal divisions of the Forty-Fourth Judicial Circuit and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

A handwritten signature in dark ink, appearing to read "Claire McCaskill". The signature is fluid and cursive, with the first name "Claire" written in a larger, more prominent script than the last name "McCaskill".

## Notes to the Financial Statements

FORTY-FOURTH JUDICIAL CIRCUIT  
MUNICIPAL DIVISIONS  
NOTES TO THE FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies

A. Reporting Entity and Basis of Presentation

The accompanying special-purpose financial statements present only selected data for the funds administered by the various municipal divisions of the Forty-Fourth Judicial Circuit of the state of Missouri. The municipal divisions of the city of Gainesville and the city of Mansfield are reported on separately.

Receipts, disbursements, and changes in cash are presented for each municipal division. The operating costs of each division are paid by the respective municipality, the county, or the state of Missouri, as applicable, and are not included in the financial statements.

The municipal division is responsible for cash bonds posted until case disposition allows appropriate disbursement. Bond monies relating to pending cases, whether in the custody of the city or the municipal division, are included in these financial statements.

B. Basis of Accounting

The Statements of Receipts, Disbursements, and Changes in Cash are prepared on the cash basis of accounting, accordingly, amounts are recognized when they are received or disbursed. This basis of accounting differs from generally accepted accounting principles, which require revenues to be recognized when they become available and measurable or when they are earned and expenditures or expenses to be recognized when the related liabilities are incurred.

C. Fiscal Authority and Responsibility

The municipal divisions account for fines and court costs resulting from prosecution of violations of municipal ordinances before the municipal judge or received through the traffic violations bureau, as well as cash bonds posted. Municipal violations could include traffic offenses, both moving and nonmoving; parking meter and overtime parking offenses, and other violations for which amounts are received by the municipal divisions and remitted to the city treasury. The municipal divisions also may account for restitutions received and disbursed through the divisions.

2. Cash

Section 479.080, RSMo 1994, requires municipal divisions to deposit fines and court costs into the city treasury at least monthly. Some divisions maintain bank accounts into which fines and court costs are deposited and later remitted to the city treasury. Other divisions do not maintain bank accounts, transmitting fines and court costs directly to the city treasury. Escrow bank accounts for bond monies received may be maintained by the city or the municipal division.

At the financial statement dates identified in the table of contents for the years ended 1999 and 1998, all bank account balances reported for the municipal divisions of the Forty-Fourth Judicial Circuit were entirely covered by federal depositary insurance.

3. Disbursements to State

The municipal divisions collect various amounts that must be remitted to the state of Missouri. These amounts include the surcharges for the Crime Victims' Compensation and Services to Victims Funds, and the Peace Officer Standards and Training Commission Fund. The state's portion of these amounts are deposited into the city treasury for all municipal divisions, except the municipal divisions of the Village of Theodosia, the city of Hartville, and the city of Mountain Grove. Amounts remitted by the cities to the state are not included in the financial statements.

## MANAGEMENT ADVISORY REPORT SECTION

Management Advisory Report -  
State Auditor's Current Recommendations

FORTY-FOURTH JUDICIAL CIRCUIT  
MUNICIPAL DIVISIONS  
MANAGEMENT ADVISORY REPORT -  
STATE AUDITOR'S CURRENT RECOMMENDATIONS

We have audited the special-purpose financial statements of the various municipal divisions of the Forty-Fourth Judicial Circuit as of and for the years ended September 30, 1999 and 1998, and June 30, 1999 and 1998, and have issued our report thereon dated October 5, 1999.

The following Management Advisory Report presents our findings and recommendations arising from our procedures related to the municipal divisions' special-purpose financial statements. During those procedures, we also identified certain management practices which we believe could be improved. Our procedures were not designed or intended to be a detailed study of every system, procedure, and transaction. Accordingly, the findings presented in the following report should not be considered as all-inclusive of areas where improvements may be needed.

**1.**

**City of Ava Municipal Division**

- A. The duties of receiving, recording, and depositing court receipts are not adequately segregated. Currently, the Court Clerk performs all these duties. To safeguard against possible loss or misuse of funds, internal controls should provide reasonable assurance that all transactions are accounted for properly and assets are adequately safeguarded. Internal controls would be improved by segregating the duties of receiving and depositing court monies from recording receipts. If proper segregation of duties cannot be achieved, at a minimum, there should be a documented supervisory review of the reconciliations and a comparison of court receipt slips issued to amounts deposited.
- B. The municipal division accepts cash, checks, and money orders for fines, court costs, and bonds; however, the method of payment is not always indicated on receipt slips. To ensure all receipts are deposited intact, the method of all payments received should be indicated on the receipt slips. The composition of receipt slips issued should be reconciled to the composition of deposits.
- C. The municipal division allows defendants to pay fines and court costs over a period of time. The Court Clerk maintains the balance due information on a computerized spreadsheet; however, periodic listings of amounts due are not prepared. In addition, a control ledger is not maintained showing the total amount due which can be reconciled to the individual account receivable records. Monthly or periodic listings of accounts receivable are necessary to facilitate the monitoring of amounts due to the court, to provide information to the Municipal Judge, and to help maximize collections. These listings should be reconciled on a periodic basis to the individual accounts receivable records.

**WE RECOMMEND** the city of Ava Municipal Division

- A. Adequately segregate the duties of receiving, recording, and depositing court receipts. At a minimum, there should be a documented supervisory review of the reconciliation between receipts and deposits.
- B. Record the method of payment on each receipt slip issued, and reconcile total cash, checks, and money orders received to deposits.
- C. Prepare a periodic listing of accounts receivable and reconcile this information to the individual accounts receivable records. A report of cases with delinquent payments and/or significant balances should be provided to the Municipal Judge regularly for review.

**AUDITEES RESPONSE:**

*The Municipal Judge and Court Clerk responded as follows:*

- A. *In a small community segregation of duties is not always possible. The city treasurer performs the monthly bank reconciliation, and will begin comparing receipts to deposits.*
- B. *The Court Clerk does record all method of payments to the receipt books and it is also documented on all cash register tapes; however, in the future we will ensure that police officers who collect money also indicate the method of payment.*
- C. *At this time we are working on a system to make a computerized listing of total amounts due on unpaid fines and it will be implemented in the next fiscal year. However, the clerk does review unpaid balances with the Judge on each court day on the Show Cause docket. We also have several work days that we review cases with significant balances throughout the year.*

|           |   |
|-----------|---|
| <b>2.</b> | <b>City of Hartville Municipal Division</b> |
|-----------|---|

- A. The duties of receiving, recording, depositing, and disbursing court receipts are not adequately segregated. Currently, the Court Clerk performs all of these duties. To safeguard against possible loss or misuse of funds, internal controls should provide reasonable assurance that all transactions are accounted for properly and assets are adequately safeguarded. Since this is an office of one employee and proper segregation of duties cannot be achieved, at a minimum, there should be a documented supervisory review of the bank reconciliations and a comparison of court receipt slips issued to amounts deposited.
- B. The municipal division accepts cash, checks, and money orders for fines, court costs and bonds. The Court Clerk does not always record the method of payment on receipt slips. To ensure all receipts are deposited intact, the method of all payments received should be indicated on the receipt slips. The composition of receipt slips issued should be reconciled to the composition of bank deposits.
- C. Neither the police department nor the municipal division maintains records adequate to account for all tickets issued and their ultimate disposition. The Court Clerk maintains records of the ticket book issued to each officer. The police department discontinued

keeping a ticket log in May 1997, and places copies of tickets issued in a file in no particular order.

Without a proper accounting of the numerical sequence of tickets issued, the police department and the municipal division cannot be assured that all tickets issued are properly submitted to the municipal division for processing. A log listing the ticket books assigned, each ticket issued in numerical sequence, the date issued, and the violator's name would help ensure all tickets issued were submitted to the municipal division for processing, properly voided, or not prosecuted. In addition, a record of the ultimate disposition of each ticket should be maintained to ensure all tickets have been accounted for properly.

**WE RECOMMEND** the city of Hartville Municipal Division:

- A. Establish a documented review of municipal division records by an independent person.
- B. Record the method of payment on each receipt slip issued, and reconcile total cash, checks, and money orders received to deposits.
- C. Work with the police department to ensure records are maintained to account for the numerical sequence and ultimate disposition of all tickets assigned and issued.

**AUDITEES RESPONSE:**

*The Court Clerk responded as follows:*

- A. *The judge will begin reviewing the monthly bank reconciliations and will sign them to document the review.*
- B. *Any receipt slips with the method not indicated were simply an oversight. In the future I will be more careful.*
- C. *We have discussed this with the police chief and he is maintaining a numerical listing of the tickets.*

|           |  |
|-----------|--|
| <b>3.</b> | <b>City of Mountain Grove Municipal Division</b> |
|-----------|--|

The duties of receiving, recording, and depositing court receipts are not adequately segregated. Currently, the Deputy Court Clerk performs all of these duties. To safeguard against possible loss or misuse of funds, internal controls should provide reasonable assurance that all transactions are accounted for properly and assets are adequately safeguarded. Internal controls would be improved by segregating the duties of receiving and depositing court monies from recording receipts. If proper segregation of duties cannot be achieved, at a minimum, there should be a documented supervisory review of the bank reconciliations and a comparison of court receipt slips issued to amounts deposited.

**WE RECOMMEND** the city of Mountain Grove Municipal Division adequately segregate the duties of receiving, recording, and depositing court receipts. At a minimum, there should be a documented supervisory review of the reconciliation between receipts and deposits.

**AUDITEES RESPONSE:**

*The Municipal Judge and Court Clerk responded that the City Clerk will begin reviewing the bank reconciliation monthly.*

This report is intended for the information of the management of the various municipal divisions of the Forty-Fourth Judicial Circuit and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

## Follow-Up on State Auditor's Prior Recommendations

FORTY-FOURTH JUDICIAL CIRCUIT  
MUNICIPAL DIVISIONS  
FOLLOW-UP ON STATE AUDITOR'S PRIOR RECOMMENDATIONS

This section reports follow-up action taken by the municipal divisions of the Forty-Fourth Judicial Circuit on recommendations made in the Management Advisory Report (MAR) of our report issued for the years ended 1995 and 1994. The prior recommendations which have not been implemented, but are considered significant, have been repeated in the current MAR. Although the remaining unimplemented recommendations have not been repeated, the municipal divisions should consider implementing these recommendations.

1. City of Ava Municipal Division

- A. Receipt slips did not consistently indicate the method of payment.
- B. Bond forms issued by the Douglas County Sheriff's Department for the City of Ava Municipal Division did not indicate the method of payment received, the date bond monies were received, and were not prenumbered. In addition, bond monies received by the Court Clerk were not periodically reconciled to the Sheriff's department's records of bond monies collected.
- C. The Municipal Judge did not sign the court dockets after case dispositions were recorded, and the City Attorney did not sign tickets that were not prosecuted.
- D. The court charged the Law Enforcement Training fee on several dismissed cases.

Recommendation:

The city of Ava Municipal Division:

- A. Indicate the method of payment on all receipt slips issued and reconcile total cash, checks, and money orders received to bank deposits.
- B. Request the Douglas County Sheriff to issue prenumbered bond forms indicating the method of payment and the date when bond monies are collected by the Sheriff's department. In addition, bond monies received by the Court Clerk should be reconciled periodically to the Sheriff's department's records.
- C. Require the Municipal Judge's signature on all court dockets and the City Attorney's signature on all tickets not prosecuted.
- D. Discontinue collecting LET fees on dismissed cases in accordance with state law.

Status:

- A. Not implemented. See MAR No. 1.
- B-D. Implemented.

2. City of Hartville Municipal Division

Receipt slips were not prenumbered and did not always indicate the method of payment received.

Recommendation:

The City of Hartville Municipal Division issue prenumbered receipt slips for all monies received, indicate the method of payment on each receipt slip issued, and reconcile total cash, checks, and money orders received to bank deposits.

Status:

Partially implemented. Prenumbered receipt slips are issued; however, the receipt slips did not always indicate the method of payment received. See MAR No. 2.

3. City of Mountain Grove Municipal Division

- A. The municipal division did not have adequate procedures to follow-up on amounts owed to the court.
- B. The Municipal Judge did not sign the court dockets after case dispositions were recorded, and the City Attorney did not sign tickets which were amended or not prosecuted.
- C. The Law Enforcement Training (LET) Fund fee was not collected on nontraffic ordinance violations.

Recommendation:

The City of Mountain Grove Municipal Division:

- A. Establish procedures to maximize the collection of fines and court costs owed to the municipal division.
- B. Require the Municipal Judge's signature on the court dockets and the City Attorney's signature on all amended tickets and tickets not prosecuted.
- C. Collect the LET fee on all nontraffic ordinance violations in accordance with state law.

Status:

A-C. Implemented.

## STATISTICAL SECTION

History, Organization, and  
Statistical Information

FORTY-FOURTH JUDICIAL CIRCUIT  
MUNICIPAL DIVISIONS  
HISTORY, ORGANIZATION,  
AND STATISTICAL INFORMATION

Organization

The Forty-Fourth Judicial Circuit is composed of Douglas, Ozark, and Wright counties. The Honorable John G. Moody serves as Presiding Judge. There are six municipal divisions within the Forty-Fourth Judicial Circuit. The municipal divisions of the city of Gainesville and the city of Mansfield are reported on separately.

The municipal divisions are governed by Chapter 479, RSMo 1994, and by Supreme Court Rule No. 37 titled "Ordinance Violations and Traffic Violations Bureau (TVB)." Section 479.050, RSMo 1994, provides that each municipal division may establish a TVB in which fines and costs are collected at times other than during court and transmitted to the city treasury.

Operating Costs

The operating costs and court salaries of each municipal division are paid by the respective municipality, the county, or the state of Missouri, as applicable.

Municipal Division Organization, Personnel and Caseload Information

1. City of Ava

Organization

The Court Clerk is responsible for recording transactions as well as handling collections. Fines, court costs, and bonds are deposited directly into the city treasury daily. The municipal division also collects fees for prisoner board and police report copies which are deposited in to the city treasury daily. Court is held twice a month. A TVB has been established to receive payment of fines and court costs at times other than during court.

| Number of cases filed | 779                         | 434         |

2. City of Hartville

Organization

The City Clerk serves as the Court Clerk and is responsible for recording transactions as well as handling collections and disbursements. The municipal division maintains a bank account for fines, court costs, and bonds. Fines and court costs are paid monthly to the city treasury and the state. Court is held once a month. A TVB has been established to receive payment of fines and court costs at times other than during court.

| Number of cases filed | 194                         | 171         |

3. City of Mountain Grove

Organization

The City Clerk serves as the Court Clerk and, assisted by the Deputy City Clerk is responsible for recording transactions and handling collections and disbursements. The police dispatchers receive payment of fines, court costs, and bonds when the Court Clerk is not present. The police dispatchers transmit collections to the Court Clerk daily. A bank account is maintained for fines and court costs. Amounts collected are paid monthly to the city treasury and the state. Bond monies are deposited into a separate municipal division bank account pending disposition. Court is held once a month. A TVB has been established to receive payment of fines and court costs at times other than during court.

#### 4. Village of Theodosia

##### Organization

The Court Clerk is responsible for recording transactions as well as handling collections and disbursements. The municipal division maintains a bank account for fines, court costs, and bonds. Fines and court costs are paid monthly to the city treasury and the state. Court is held four times a year. A TVB was established in March 1998, to receive payment of fines and court costs at times other than during court. Only one case was filed and processed through the municipal division during the two years ended September 30, 1999. The Associate Circuit Judge of Ozark County serves as the judge for this municipality.

FORTY-FOURTH JUDICIAL CIRCUIT  
 MUNICIPAL DIVISIONS  
 ORANIZATIONAL CHART

\* Reported on separately.

\* \* \* \* \*

NINETEENTH JUDICIAL CIRCUIT

COLE COUNTY, MISSOURI

THREE YEARS ENDED DECEMBER 31, 1998

**From The Office Of State Auditor  
Claire McCaskill**

Report No. 2000-01  
January 4, 2000

AUDIT REPORT

Office Of The  
State Auditor Of Missouri  
Claire McCaskill

January 2000

*The Nineteenth Judicial Circuit Court consists of Cole County. During our audit, we identified certain management practices which we believe could be improved.*

At December 31, 1998, the Nineteenth Judicial Circuit, Cole County, Missouri, held assets for four receivership cases totaling \$2.75 million. Three of the four receiverships involve utility companies for which the court has ordered the companies to make refunds to customers, and the other receivership involves an insurance company that is being liquidated. One of the four cases was placed in receivership in 1981 and its assets are \$1.6 million of the \$2.75 million total, while the other cases were placed in receivership from 1986 to 1994. The assets of the receiverships are invested, and the investment income is distributed based on orders from the circuit judges.

Although only \$4,819 from these receiverships' assets was distributed to the claimants of the assets from 1996 through 1998, other parties as noted below have received more substantial amounts during the three years ended December 31, 1998:

|  |           |
|--|-----------|
| Cole County General Fund                 | \$687,118 |
| (designated for courthouse improvements) |           |
| Receivers' fees                          | 48,438    |
| Banking fees                             | 20,658    |
| Bonding fees and other                   | 7,129     |

The receivers' fees were paid to current or former court employees who serve as the court-appointed receivers. The receivers' duties and responsibilities include holding and administering the assets of the cases. In addition to their normal court salaries, the receivers are paid monthly compensation ranging from \$250 to \$430 from the receiverships' assets, and the receivers are to perform these duties outside of normal court working hours. Because there has been little activity in these accounts other than investment activity which is handled by the applicable banks, it appears the receivers' workload has decreased over the years while their compensation has remained the same.

The State Auditor recommended the circuit judges review these receivership cases and determine whether the receivership assets should be distributed to the state Unclaimed Property Section or should be disposed of in another manner.

Receipts handled by the Associate Circuit Division III from civil, criminal, traffic, and municipal cases, as well as applicable cash bonds totaled approximately \$967,000, \$925,000, and \$833,000 for years ended December 31, 1998, 1997, and 1996, respectively. Our audit noted the following concerns related to these collections:

(over)

YELLOW SHEET

- Some monies received for payment of traffic tickets are not recorded on the receipts ledger or deposited on a timely basis. All receipts should be recorded immediately upon receipt and deposited on a timely basis.
- The court has not established procedures to follow up on checks which have been outstanding for a considerable length of time. If the payees cannot be located, the amounts should be disposed of in accordance with state law.

The Juvenile Office receives payments for restitution, care and maintenance, and drug test fees collected directly by juvenile officers. Receipts handled by the Juvenile Office totaled approximately \$22,700, \$12,500, and \$14,500 for years ended December 31, 1998, 1997, and 1996 respectively. Monies collected by the Juvenile Office are transmitted to the Cole County Treasurer's office.

- Receipts related to care and maintenance are not transmitted to the County Treasurer's office on a timely basis.
- The Juvenile Office did not retain billing invoices, ledgers of account balances, and payment histories for care and maintenance cases for the years ended December 31, 1997 and 1996. In addition, these records were discarded for certain cases filed in 1998. These records should be retained to document the validity of transactions, provide an audit trail, and account for all monies received. In addition, all records should be retained in accordance with Supreme Court Administrative Rule 8.
- Procedures to monitor and collect accrued costs could be improved. The Juvenile Office has established procedures to issue second billing notices when delinquent, issue court orders for hearings on payment of costs, and refer cases to the Deputy Juvenile Officer for possible garnishment of wages. Our review of accrued costs noted cases in which no court order was entered and no other follow-up action was taken to collect accrued costs. Three cases reviewed had outstanding balances totaling approximately \$5,362 in which no pursuit of collection has been made since December 1998.
- In addition, Juvenile Office personnel indicated that certain accounts were written off approximately two months after a second billing notice was issued and in some instances accounts were written off without the authorization of the Judge. Also, when authorization was obtained from the Judge to write off an account, the applicable documentation was not kept. To ensure the validity of account write-offs, all amounts written off should be approved by the Judge and documentation of this approval should be retained.

## STATE AUDITOR'S REPORT

**CLAIRE C. McCASKILL**  
**Missouri State Auditor**

Presiding Judge and Court en banc  
and  
The Circuit Clerk of the  
Nineteenth Judicial Circuit  
Cole County, Missouri

The State Auditor is required under Section 29.200, RSMo 1994, to audit all accounts of the Nineteenth Judicial Circuit, Cole County, Missouri. The Cole County Commission engaged Evers & Company, Certified Public Accountants (CPAs), L.L.C., to perform annual audits of the financial statements of Cole County, including the various divisions of the Nineteenth Judicial Circuit, Cole County, Missouri for the years ended December 31, 1998, 1997, and 1996. To satisfy our statutory obligation and minimize duplication of effort, the State Auditor has used the work of the CPAs. We reviewed the reports and substantiating working papers of the CPAs to satisfy ourselves as to the appropriateness of using their reports, and we accept them in partial fulfillment of our responsibility under Section 29.200, RSMo 1994.

The objectives of our review were to:

1. Review certain financial activity and related procedures and examine compliance with certain constitutional provisions, statutes, and attorney general's opinions as we deemed necessary or appropriate in the circumstances.
2. Examine certain management practices which we believe could be improved.
3. Follow up on the status of recommendations made in our previous report.

Our review was made in accordance with generally accepted government auditing standards and included such procedures as we considered necessary in the circumstances. In this regard, we reviewed the records and procedures, and interviewed personnel of the judicial circuit.

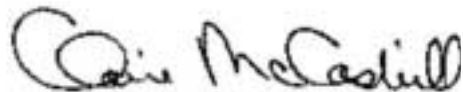

As part of our review, we assessed the judicial circuit's management controls to the extent we determined necessary to evaluate the specific matters described above and not to provide assurance on those controls. With respect to management controls, we obtained an understanding of the design of relevant policies and procedures and whether they have been placed in operation and we assessed control risk.

Our review was limited to the specific matters described above and was based on selective tests and procedures considered appropriate in the circumstances. Had we performed additional procedures, other information might have come to our attention which would have been included in this report.

The accompanying History, Organization, and Statistical Information is presented for informational purposes. This information was obtained from the judicial circuit's management and the Office of State Courts Administrator and was not subjected to the procedures applied in our review of the Nineteenth Judicial Circuit, Cole County, Missouri.

Our comments on internal controls, compliance with legal requirements, management practices, and related areas are presented in the accompanying Management Advisory Report.

A handwritten signature in black ink, appearing to read "Claire McCaskill". The signature is fluid and cursive, with the first name "Claire" written in a larger, more prominent script than the last name "McCaskill".

## MANAGEMENT ADVISORY REPORT SECTION

Management Advisory Report -  
State Auditor's Current Recommendations

NINETEENTH JUDICIAL CIRCUIT  
COLE COUNTY, MISSOURI  
SUMMARY OF FINDINGS

1. Receiverships (pages 7-8)

The court is holding \$2.75 million in four receiverships for which current or former court employees serve as the court-appointed receivers. About \$1.6 million of this money has been held since 1981, and there has been little or no follow-up to locate the claimants of the receiverships' assets. Transfers to Cole County's General Fund and payments of receivers and banking fees represent the majority of the expenditures from these receiverships; while little has been paid to claimants. It appears these receivership monies should be disposed of properly.

2. Associate Circuit Division III's Accounting Controls and Procedures (pages 8-10)

Some monies received for payment of traffic tickets are not immediately recorded or deposited. Follow-up is not performed on old outstanding checks. Monthly listings of open items are not prepared, and some unclaimed monies have been held for more than nineteen years.

3. Juvenile Office's Accounting Controls and Procedures (pages 10-13)

Prenumbered receipt slips are not issued immediately upon receipt of some monies. Checks are not restrictively endorsed immediately upon receipt and receipts are not transmitted to the County Treasurer on a timely basis. Some accounting records were not retained. Collection of some accrued costs are not actively pursued, accrued costs may be written off without the Judge's approval, and when the write-off is approved, documentation is not retained.

NINETEENTH JUDICIAL CIRCUIT  
COLE COUNTY, MISSOURI  
MANAGEMENT ADVISORY REPORT-  
STATE AUDITOR'S CURRENT RECOMMENDATIONS

In addition to our review of the reports and substantiating working papers of Evers & Company, Certified Public Accountants, L.L.C., we included those procedures which we considered necessary in the circumstances.

We reviewed probable compliance with certain constitutional provisions, statutes, administrative rules, and attorney general's opinions as we deemed necessary or appropriate. This review was not intended to provide assurance of full compliance with all regulatory provisions and, thus, did not include all regulatory provisions which may apply. However, our review disclosed certain conditions that may represent noncompliance and these findings are presented in our report.

During our audit, we identified certain management practices which we believe could be improved. Our audit was not designed or intended to be a detailed study of every system, procedure, and transaction. Accordingly, the findings presented in our report should not be considered as all-inclusive of areas where improvements may be needed.

The period of audit for the purposes stated above included, but was not limited to, the three years ended December 31, 1998.

|           |                      |
|-----------|----------------------|
| <b>1.</b> | <b>Receiverships</b> |
|-----------|----------------------|

The Nineteenth Judicial Circuit, Cole County, Missouri, currently has four receivership cases for which current or former court employees serve as the court-appointed receivers. The two circuit judges of the Nineteenth Judicial Circuit each preside over two of these cases. The receivers' responsibilities include holding and administering the assets of the cases. In addition to their normal court salaries, the receivers are paid monthly compensation ranging from \$250 to \$430 from the receiverships' assets for performing the receivers' duties, and the receivers are to perform these duties outside of normal court working hours. At December 31, 1998, the assets of these receiverships totaled \$2.75 million.

Three of the four receiverships involve utility companies for which the court has ordered the companies to make refunds to customers, and the other receivership involves an insurance company that is being liquidated and its assets are being distributed to its creditors. During the three years ended December 31, 1998, only \$4,819 from these receiverships' assets was distributed to the claimants of the assets. Court personnel have indicated that most of the claimants cannot be located and that little or no follow-up is currently done to locate the claimants. Because there has been little activity in these accounts other than investment activity which is handled by the

applicable banks, it appears the receivers' workload has decreased over the years while their compensation has remained the same.

One of the four cases was placed in receivership in 1981 and its assets are \$1.6 million of the \$2.75 million total, and the other cases were placed in receivership from 1986 to 1994. The assets of the receiverships are invested, and the investment income of the receiverships was distributed as follows during the three years ended December 31, 1998:

|  |           |
|--|-----------|
| Cole County General Fund                 | \$687,118 |
| (designated for courthouse improvements) |           |
| Receivers' fees                          | 48,438    |
| Banking fees                             | 20,658    |
| Bonding fees and other                   | 7,129     |

Due to the long period of time that the majority of the receivership assets have been held by the court, and due to the lack of follow-up in locating the claimants of the assets, the circuit judges should review these receivership cases and determine whether the assets should be disposed of in another manner. Sections 447.500 through 447.595, RSMo, include laws which pertain to the Uniform Disposition of Unclaimed Property and it appears that these laws could apply to the receivership cases. Specifically, Section 447.532, RSMo, states that all intangible personal property that has remained unclaimed by the owner for more than seven years is presumed abandoned and should be turned over to the state Unclaimed Property Section.

**WE RECOMMEND** the circuit judges review these receivership cases and determine whether the receivership assets should be distributed to the state Unclaimed Property Section or should be disposed of in another manner.

### **AUDITEE'S RESPONSE**

*The Circuit Judges provided the following response:*

*We appreciate the recommendation and will review to determine if the unclaimed property laws apply to these receiverships.*

## **2. Associate Circuit Division III's Accounting Controls and Procedures**

The Associate Circuit Division III maintains bank accounts and records for civil, criminal, traffic, and municipal cases, as well as any applicable cash bonds. In addition, an interest account is maintained to purchase equipment and supplies related to office operations. Receipts handled by the Associate Circuit Division III totaled approximately \$967,000, \$925,000, and \$833,000 for years ended December 31, 1998, 1997, and 1996, respectively. During our review of the

Associate Circuit Division III's accounting records and procedures, we noted the following concerns:

- A. Some monies received for payment of traffic tickets are not recorded on the computer system's receipts ledger or deposited on a timely basis. Traffic payments received in the mail are not recorded until a copy of the applicable traffic ticket has been received from the Prosecuting Attorney. In addition, partial traffic payments received in the mail are not recorded until payment is made in full. Receipt slips are issued for walk-in payments in the situations noted above; however, these receipt slips are not prenumbered by a printer. A cash count on June 18, 1999, noted receipts of \$2,505 which were not recorded on the computer system's receipts ledger. Of this amount, \$602 represented money orders for partial payments which were dated from 1988 through 1996.

To adequately safeguard receipts and reduce the risk of loss or misuse of funds, all receipts should be recorded immediately upon receipt and deposited on a timely basis. The court should also review the old money orders for partial payments and determine the proper disposition of these moneys. If the court deems it necessary to record receipts on the computer system after the applicable tickets are received or payment is received in full, a system should be developed in which these receipts are recorded on prenumbered receipt slips or a manual receipts log until they are recorded on the computer system.

- B. The court has not established procedures to follow up on checks which are outstanding for a considerable length of time. At December 31, 1998, checks totaling \$7,997 had been outstanding for more than one year. Some checks were outstanding for as long as nine years.

Checks which have been outstanding for a considerable length of time should be periodically reviewed to determine if the checks should be canceled and reissued if the payee can be located. If the payees cannot be located, the amounts should be disposed of in accordance with Sections 447.500 through 447.595, RSMo, or Sections 50.470 through 50.490, RSMo, as applicable.

- C. Listings of open items are not prepared for the civil account and listings of open items had not been prepared for the bond account since September 1998. Upon our request, open items listings were prepared for these accounts in May 1999; however, unreconciled differences of \$5,511 and \$1,476 existed between the open items listings and reconciled bank balances for the civil account and bond account, respectively.

Monthly listings of open items should be prepared and reconciled to cash balances for each account to ensure records are in balance and sufficient funds are available for the payment of all liabilities. Further, the court could attempt to determine the reasons for the differences and if proper disposition of the unidentified monies cannot be determined, these monies should be disposed of in accordance with state law.

- D. The court has held \$795 in unclaimed bonds and court refunds for sixteen individuals in a savings account since before 1980. Since these cases are over ten years old, the case files have been destroyed. In addition, approximately \$30,307 in old unclaimed bonds are currently in the bond bank account. Bonds remaining unclaimed for one year after disposition of the case should be disbursed to the state's Unclaimed Property Section in accordance with Section 447.595, RSMo 1994.

Conditions similar to Parts C and D were also noted in our prior report.

**WE RECOMMEND** the Associate Circuit Division III:

- A. Ensure all receipts are recorded immediately upon receipt and deposited on a timely basis and follow-up on the \$602 in old money orders for partial payments. For receipts that cannot be recorded immediately on the court's computer system, the court should develop a system in which these receipts are recorded on prenumbered receipt slips or a manual receipts log until they are recorded on the computer system.
- B. Establish procedures to periodically review outstanding checks and take action to resolve any old outstanding checks on a timely basis. Checks where the payees can be located should be reissued. Any unclaimed amounts should be disposed of in accordance with state law.
- C. Prepare monthly open-items listings and reconcile these listings to cash balances. Differences between the open-items listings and the cash balances should be investigated and resolved on a timely basis.
- D. Disburse all unclaimed bonds in accordance with state law.

**AUDITEE'S RESPONSE**

*The Associate Circuit Judge and the Division III Chief Clerk provided the following responses:*

- A. *We concur with the recommendation. We will attempt to more timely record and deposit these monies; possibly in the same manner as we process bonds. In addition, through off-site visits with other counties on the Banner System, we will investigate procedures that may alleviate this concern in the future.*
- B. *We concur with the recommendation and will work to resolve these outstanding checks. We are expecting additional staff in the near future who will be able to devote time to this area.*
- C. *This recommendation has been implemented.*

- D. *We will work with the Cole County Treasurer to implement this recommendation.*

### **3. Juvenile Office's Accounting Controls and Procedures**

The Juvenile Office receives payments for restitution and care and maintenance. Fees for drug tests are collected directly by juvenile officers when they meet with a juvenile. These drug test fees are later transmitted to the Juvenile Office. Receipts handled by the Juvenile Office totaled approximately \$22,700, \$12,500, and \$14,500 for years ended December 31, 1998, 1997, and 1996, respectively. Monies collected by the Juvenile Office are transmitted to the Cole County Treasurer's office.

- A. Receipt slips are not issued for drug test fees collected by juvenile officers. Also, receipt slips are only issued for cash received by the Juvenile Office and not for other receipts received by mail or in the form of check. In addition, receipt slips are not prenumbered; therefore, the numerical sequence of receipts slips cannot be accounted for and properly reconciled to the receipts journal.

To properly account for all monies received, prenumbered receipts slips should be issued for all receipts. In addition, the numerical sequence of receipts slips should be accounted for and receipts should be reconciled to the receipts journal.

- B. Checks are not restrictively endorsed immediately upon receipt. Instead, they are endorsed when the deposit is made. To reduce the risk of loss or misuse of funds, checks should be restrictively endorsed immediately upon receipt.
- C. Receipts related to care and maintenance are not transmitted to the County Treasurer's office on a timely basis. During the year ended December 31, 1998, care and maintenance receipts totaled approximately \$21,910. Transmittals were made approximately three times a month and averaged approximately \$645. In addition, we reviewed receipts through June 1999, and noted that only three transmittals, averaging \$2,057, have been made since the first of the year. To adequately safeguard receipts, reduce the risk of loss, theft, or misuse of funds, and maximize interest income, transmittals should be made daily or when accumulated receipts exceed \$100.
- D. The Juvenile Office did not retain billing invoices, ledgers of account balances, and payment histories for care and maintenance cases for the years ended December 31, 1997 and 1996. In addition, these records were discarded for certain cases filed in 1998. These records should be retained to document the validity of transactions, provide an audit trail, and account for all monies received. In addition, all records should be retained in accordance with Supreme Court Administrative Rule 8.

- E. Procedures to monitor and collect accrued costs could be improved. The Juvenile Office has established procedures to issue second billing notices when delinquent, issue court orders for hearings on payment of costs, and refer cases to the Deputy Juvenile Officer for possible garnishment of wages. Our review of accrued costs noted cases in which no court order was entered and no other follow-up action was taken to collect accrued costs. Three cases reviewed had outstanding balances totaling approximately \$5,362 in which no pursuit of collection has been made since December 1998. Without the active pursuit of accrued costs, a loss in revenue may result.

In addition, Juvenile Office personnel indicated that certain accounts were written off approximately two months after a second billing notice was issued and in some instances, accounts were written off without the authorization of the Judge. Also, when authorization was obtained from the Judge to write off an account, the applicable documentation was not retained. To ensure the validity of account write-offs, all amounts written off should be approved by the Judge and documentation of this approval should be retained.

**WE RECOMMEND** the Juvenile Office:

- A. Issue prenumbered receipt slips for all monies received and account for the numerical sequence. In addition, receipt slips issued should be reconciled to the receipts journal.
- B. Restrictively endorse all checks immediately upon receipt.
- C. Transmit receipts daily or when accumulated receipts exceed \$100.
- D. Retain all records in accordance with Supreme Court Administrative Rule 8.
- E. Ensure follow-up procedures are performed for all accrued costs. Any delinquent accounts which are deemed uncollectible should be written off following a review and documented approval by the Judge.

**AUDITEE'S RESPONSE**

*The Juvenile Court Administrator provided the following responses:*

- A. *Numbered receipt books have been issued to all juvenile officers with instructions for providing written receipt slips for all drug tests or other revenue collected. Part-time intensive supervision employees will work with the juvenile officer responsible for the intensive supervision program to provide receipt slips for drug tests administered in that program. The receptionist and the administrative assistant have also been provided with receipt books. The administrative assistant receives copies of all receipt slips and will reconcile them to the receipt journal.*

- B. *Procedures have been initiated to ensure that all checks are restrictively endorsed immediately upon receipt.*
- C. *Procedures have been initiated to ensure that receipts will be transmitted to the County Treasurer's office daily or when the amount exceeds \$100.*
- D. *Supreme Court Administrative Rule 8 has been reviewed. Supreme Court Rule 122.04 requires that all social histories, records and information except official court files be destroyed when the juvenile reaches age 17 unless the juvenile remains under the jurisdiction of the court. However, these accounting records for juveniles that have not reached age 17 will be available in this office.*
- E. *Procedures for follow-up on accrued cost have been reviewed. Any accounts deemed uncollectible will be reviewed and approved by the Judge.*

This report is intended for the information of the judicial circuit's management and other applicable government officials. However, this report is a matter of public record and its distribution is not limited.

## Follow-Up on State Auditor's Prior Recommendations

NINETEENTH JUDICIAL CIRCUIT  
COLE COUNTY, MISSOURI  
FOLLOW-UP ON STATE AUDITOR'S PRIOR RECOMMENDATIONS

This section reports follow-up action taken by the Nineteenth Judicial Circuit, Cole County, Missouri, on recommendations made in the Management Advisory Report (MAR) of our report issued for the three years ended December 31, 1990. The prior recommendations which have not been implemented, but are considered significant, have been repeated in the current MAR. Although the remaining unimplemented recommendations have not been repeated, the judicial circuit should consider implementing these recommendations.

1. Circuit Clerk's Accounting Controls and Procedures - Child Support Account

- A. Delinquent child support payments were not adequately monitored.
- B. Intercepted monies collected by the state were not recorded on the child support system.
- C. Child support monies were kept in a noninterest-bearing checking account.

Recommendation:

The Circuit Clerk:

- A. Implement procedures to monitor delinquent child support payments and issue delinquent notices in accordance with state law.
- B. Record intercepted monies on the child support system.
- C. Invest child support deposits in an interest-bearing account.

Status:

A&B. Implemented.

- C. Not implemented. Although not repeated in the current report, our recommendation remains as stated above.

2. Circuit Clerk's Computer Controls

- A. Passwords were not utilized to limit the potential of unauthorized access to case file data.

- B. No records of on-line changes to case records were maintained or reviewed by a supervisor.

Recommendation:

The Circuit Clerk:

- A. Develop a system where access to case files is obtained by using passwords. Each employee should be assigned an independent password which is changed periodically. Each employee's password should limit access only to the information that is necessary to meet the employee's duties and for which authorization has been granted.
- B. Generate a record of on-line changes to case file information. These records should be periodically reviewed by supervisory personnel.

Status:

- A. Partially implemented. Passwords which limit access to case file data are assigned to employees and kept confidential; however, passwords are not changed periodically. Although not repeated in the current report, our recommendation remains as stated above.
- B. Implemented.

3. Circuit Clerk's Open Items

Court case numbers were not used to identify each amount on the open items listings.

Recommendation:

The Circuit Clerk indicate the court case number for each amount on the open items list.

Status:

Implemented.

4. Associate Circuit Division's Accounting Controls and Procedures

- A.1. Monthly listings of open items were not prepared.
- 2. Receipts were not deposited on a timely basis.
- 3. Some unclaimed bonds were held in a savings account since 1980.

4. Summary accrued cost records were not maintained. In addition, the court had no procedures to monitor or follow-up on uncollected amounts.
- B. Passwords were not independently assigned to personnel and were not changed periodically.
- C. The Sheriff's department did not account for the numerical sequence of traffic tickets or their ultimate disposition.

Recommendation:

The Associate Circuit Division:

- A.1. Prepare monthly open-items listings and reconcile them to the cash balance.
  2. Deposit receipts daily or when total receipts exceed \$100.
  3. Disburse all unclaimed monies in accordance with state law.
  4. Update the accrued cost records and establish procedures to monitor and follow up on uncollected amounts.
- B. Periodically assign and change independent data passwords. Each employee's password should limit access to only the information that is necessary to meet the employee's duties and for which authorization has been granted.
- C. Work with the Sheriff's department to ensure records are maintained to account for all traffic tickets issued. A system should also be developed to account for the ultimate disposition of all tickets.

Status:

- A.1.
  - & 3. Not implemented. See MAR No. 2.
- A.2.
  - & 4. Implemented.
- B. Partially implemented. Passwords are currently used to limit access to appropriate information, are kept confidential, and are deleted when an employee transfers or terminates; however, passwords are not changed periodically. Although not repeated in the current report, our recommendation remains as stated above.

- C. Partially implemented. The 1998 sequence of traffic ticket numbers issued, voided, or on-hand were manually accounted for; however, the Sheriff's department does not track the ultimate disposition of each ticket. Although not repeated in the current report, our recommendation remains as stated above.

5. Probate Division's Accounting Controls and Procedures

- A. Accounting and bookkeeping duties were not properly segregated.
- B. Receipts were not deposited on a timely basis.

Recommendation:

The Probate Division:

- A. Adequately segregate the duties of receiving monies from that of recording receipts and depositing court monies.
- B. Deposit receipts daily or when total receipts exceed \$100.

Status:

- A. Implemented.
- B. Not implemented. Although not repeated in the current report, our recommendation remains as stated above.

## STATISTICAL SECTION

History, Organization, and  
Statistical Information

NINETEENTH JUDICIAL CIRCUIT  
COLE COUNTY, MISSOURI  
HISTORY, ORGANIZATION, AND STATISTICAL INFORMATION

Organization

The Nineteenth Judicial Circuit includes only Cole County.

The Nineteenth Judicial Circuit consists of two circuit judges and two associate circuit judges. One circuit judge serves as the presiding judge and is responsible for the administration of the circuit.

In addition to the judges, the personnel of the Nineteenth Judicial Circuit, Cole County, Missouri, include a circuit clerk, an associate circuit division clerk, a probate division clerk, a juvenile court administrator, nine deputy court clerks, six court clerks, thirty-nine deputy juvenile officers and aides, two court reporters, three court marshals, a secretary to the presiding judge, and six juvenile office support staff. The above totals include full-time and part-time personnel.

Operating Costs

The operating expenses of the various courts and the juvenile office are paid by Cole County. The salaries of court personnel are paid by the state of Missouri, except for the salaries of two court marshals which are paid by Cole County. The salary of the juvenile officer is paid in part by the state of Missouri and in part by Cole County. The salaries of the remaining juvenile office personnel are paid by Cole County or with grant funding received from the state.

Expenditures incurred for the Nineteenth Judicial Circuit, Cole County, Missouri, were obtained from the Cole County budget and information provided by the State Courts Administrator's office and are as follows:

|                           | Year Ended December 31, |                  |                    |                    |                  |                    |                    |                  |                    |
|---------------------------|-------------------------|------------------|--------------------|--------------------|------------------|--------------------|--------------------|------------------|--------------------|
|                           | 1998                    |                  |                    | 1997               |                  |                    | 1996               |                  |                    |
|                           | State of Missouri-      |                  | Operating Expenses | State of Missouri- |                  | Operating Expenses | State of Missouri- |                  | Operating Expenses |
|                           | Personal Service        | Personal Service |                    | Personal Service   | Personal Service |                    | Personal Service   | Personal Service |                    |

| Juvenile | 221                 | 224          | 187           | 177          | 221          | 218          |
| Probate  | 140                 | 106          | 134           | 104          | 149          | 78           |
|          | <u>9,680</u>        | <u>9,802</u> | <u>10,468</u> | <u>9,868</u> | <u>9,137</u> | <u>9,153</u> |

Compliance by the Nineteenth Judicial Circuit, Cole County, Missouri, with time standards for disposition of certain types of cases, provided by the State Court Administrator's Missouri Judicial Report for fiscal year 1998, is as follows:

| Type of Case       | Time Standard    | Nineteenth<br>Judicial Circuit,<br>Cole County,<br>Missouri | State<br>Total |
|--------------------|------------------|---|----------------|
| Circuit Civil      | 90% in 18 months | 93 %  | 79 %           |
|                    | 98% in 24 months | 96  | 87             |
| Domestic Relations | 90% in 8 months  | 92  | 83             |
|                    | 98% in 12 months | 97  | 90             |
| Associate Civil    | 90% in 6 months  | 83  | 84             |
|                    | 98% in 12 months | 93  | 95             |
| Circuit Felony     | 90% in 8 months  | 92  | 85             |
|                    | 98% in 12 months | 98  | 93             |
| Associate Criminal | 90% in 4 months  | 84  | 79             |
|                    | 98% in 6 months  | 93  | 89             |

### Receiverships

As of December 31, 1998, four special receiverships, having court or former court employees appointed as receiver, were held under the registry of the Nineteenth Judicial Circuit, Cole County. The companies (defendants) that have been ordered to deposit applicable funds into the registry of the court and the receiver appointed by the court to keep and preserve these funds are as follows:

| <u>Company</u>                      | <u>Court Appointed Receiver</u> |
|-------------------------------------|---------------------------------|
| Old Security Life Insurance Company | Elaine S. Healy                 |
| Southwestern Bell Telephone Company | Sharon Morgan                   |
| Southwestern Bell Telephone Company | Jackie Blackwell                |
| Various utility companies           | Brenda Keys*                    |

\* Effective February 1999, Julie Smith was appointed as the successor receiver.

These receiverships were established under the provisions of Rule 68.02, Missouri Rules of Civil Procedure, relative to "Receivers in Circuit Courts." The cash and investment balances (presented at fair market value), receipts, and disbursements of these receiverships for the three years ended December 31, 1998, are as follows:

|  | Year Ended December 31, |           |           |
|--|-------------------------|-----------|-----------|
|  | 1998                    | 1997      | 1996      |
| RECEIPTS   |                         |           |           |
| Investment income -                                  | \$                      |           |           |
| Interest   | 165,687                 | 181,066   | 171,321   |
| Net increase (decrease) in fair value of investments | 14,153                  | 42,519    | (42,661)  |
| Total Revenues                                       | 179,840                 | 223,585   | 128,660   |
| DISBURSEMENTS  |                         |           |           |
| Refunds to claimants                                 | 0                       | 367       | 4,452     |
| Transfers to Cole County                             | 295,000                 | 261,875   | 130,243   |
| Receiver fees  | 16,745                  | 15,885    | 15,808    |
| Banking fees   | 6,905                   | 6,934     | 6,819     |
| Other  | 2,082                   | 2,142     | 2,905     |
| Total Expenses                                       | 320,732                 | 287,203   | 160,227   |
| RECEIPTS OVER (UNDER) DISBURSEMENTS                  | (140,892)               | (63,618)  | (31,567)  |
| CASH AND INVESTMENTS, JANUARY 1                      | 2,889,681               | 2,953,299 | 2,984,866 |
| CASH AND INVESTMENTS, DECEMBER 31                    | \$ 2,748,789            | 2,889,681 | 2,953,299 |

In addition to the receiverships noted above, each circuit judge of the Nineteenth Judicial Circuit oversees various cases in which the state Department of Insurance has been named the receiver. Special deputies are appointed by the department and approved by the applicable judge to manage the assets of the receiverships.

### Personnel

At December 31, 1998, the judges, Juvenile Court Administrator, and Circuit Clerk, of the Nineteenth Judicial Circuit, Cole County, were:

Thomas Brown III, Circuit Judge, Division I  
 Bryon L. Kinder, Circuit Judge, Division II (Presiding Judge)
